Communication as a vital component for any effort to create social change; necessary communication to reach out to target audiences—people and communities in need—from campaigns persuading communities to change knowledge, attitudes, and practices to aiding other development efforts in areas of health, education, rural development, or sustainable agricultural practices; importance of communication as an integral part to any effort aimed at creating large-scale social change. Same as IS:3116.

**JMC:3120 History of Mass Communication in the U.S.** 3 s.h.
Historical analysis of professional practices. Prerequisites: JMC:1200.

**JMC:3125 Media and Consumers** 3 s.h.
Communications media in historical, political, economic contexts and their relationships with audiences; criteria for evaluating media content in relation to nature and consequences of news, entertainment, advertising.

**JMC:3130 Comparative Communication Systems** 3 s.h.
Culture and communication as central to examining media in different social and political settings; emphasis on contemporary problems.

**JMC:3131 Sex, Speech, and Digital Media Regulation** 3 s.h.
Representation and regulation of sex-themed visual imagery in public spaces and mass media; history of regulation of sex-themed visual imagery in context of religion and art, background for regulation of pornography, erotica, and obscenity in Anglo-American tradition and under international law; focus on regulation of pornography as “speech” under the First Amendment; transfer of First Amendment free speech principles designed to regulate sex-themed content from media in real space to media in cyberspace.

**JMC:3135 New Media and the Future of Sport** 3 s.h.
Emergence and significance of Internet blogs, social media, convergence journalism, video games, and fantasy sports; economic, regulatory, and cultural forces that shape new media sport journalism and entertainment. Same as SPST:3198, AMST:3198.

**JMC:3140 News-Editorial Problems** 3 s.h.
Current issues in journalism, editing strategies; emphasis on press performance and practical problems journalists confront in their work.

**JMC:3145 On the Campaign Trail: Elections and the Media** 3 s.h.
Relationship between political campaigns and mass media; critical evaluation of nature, role, function of media political coverage.

**JMC:3146 Arab Spring in Context: Media, Religion, and Geopolitics** 3 s.h.
Protest movements that started in Tunisia in 2011 and swept across North Africa and the Middle East transforming Arab and Islamic societies in radically different ways; function of social media, satellite television, communication technology; influence of religious leaders and groups on some protest outcomes; impact of wealth and geopolitics on social fabric of Islamic societies within and outside Arab countries. Requirements: for COMM:3834 — g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as RELS:3834, IS:3834, WLLC:3834, COMM:3834.

**JMC:3150 Media and Health** 3 s.h.
Potential and limits of mass media’s ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as CBH:3150, GHS:3150.

**JMC:3155 Law, Media, and Current Issues** 3 s.h.
Current topics in communication law.

**JMC:3160 Images and Society** 3 s.h.
Development and uses of photography, film, and television as technologies of reproduction in contemporary culture.

**JMC:3165 African Americans and the Media** 3 s.h.
GE: Values, Society, and Diversity. Same as AFAM:3925.

**JMC:3170 Communication Technology and Society** 3 s.h.
Implications and effects of computer-based forms of communication, especially the Internet, for journalists, the media audience, and society at large.

JMC:3175 Gender and Mass Media 3 s.h.
Media images and representations of the body in terms of gender; impact on people, society; media and body image, sexuality, gender roles, gender and power; race, ethnicity, class; age; critical analysis of mediated images.

JMC:3180 Journalism Ethics 3 s.h.
Application of ethical principles in journalistic decision making; consideration of potentially conflicting values, loyalties, and goals that force professional journalists to make difficult choices.

JMC:3181 The Business of Sport Communication 3 s.h.
Critical and practical approach to understanding contemporary sports media and business practices that mark it; focus on sports media industries and institutions; branding, marketing, demographic, public relations, and promotional factors that shape content. Same as SPST:3181.

JMC:3182 Sport, Scandal, and Strategic Communication in Media Culture 3 s.h.
Use of sport scandal to consider relationship between sport and media in American and global popular culture; broad range of case studies used to consider what constitutes a sport scandal, how this definition shifts in different circumstances; crucial roles media play in creating, communicating, and diffusing these crises; how phenomenon of sports scandal has intensified along with emergence of cable television, the Internet, and social media. Same as SPST:3182.

JMC:3183 Sport and the Media 3 s.h.
Examination of sport and media’s intimate relationship; aesthetic, cultural, political, economic, and industrial factors that shape it. Same as SPST:3175.

JMC:3185 Topics in Mass Communication 2-3 s.h.
Focus on particular area, issue, approach, or body of knowledge; may include international media, media criticism, new technologies, history of documentary photography, literary journalism, media management.

JMC:3190 Classics of Sports Journalism: From Jack London to Grantland 3 s.h.
Historical examples of celebrated works of sports journalism; focus on long-form texts. Same as SPST:3180.

JMC:3210 Workshop for Secondary School Journalism/Communication Teachers 1-3 s.h.
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as EDTL:3026.

JMC:3250 Foundations of Event Management 3 s.h.
Large, major special events, professional meetings, and conferences; development and planning, implementation of events, management and evaluation of events; development requirements of planning events, development strategies, budgeting, staffing requirements, resource allocation, site planning, basic risk management requirements, emergency procedures; event implementation policy and procedures; relationship to elements within development stages; event management and evaluation procedures. Same as SRM:3154, EVNT:3250.

JMC:3260 Event Planning Workshop 3 s.h.
Hands-on experience in event planning; working with clients, conceptualizing events, lining up small and large details, promoting events via social media and other means, carrying out events, and reflecting on outcomes; meet with event planning professionals; complete individual and group projects. Same as EVNT:3260.

JMC:3300 Media Law and Communication 3 s.h.
Issues affecting the media: freedom of expression, libel, privacy, access to information, protection of news sources, free press/fair trial, copyright, government regulation of broadcasting. Requirements: junior standing.

JMC:3400 Specialized Reporting and Writing 4 s.h.
Topics may include public affairs, law, science, business, medicine, intercultural affairs, education, computer-assisted reporting. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3405 Depth Reporting and Writing 4 s.h.
Enterprise reporting; emphasis on reporter as researcher, organizer, writer of complex stories in a variety of contexts. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3410 Magazine Reporting and Writing 4 s.h.
Finding ideas, researching, interviewing; problems of organization and style; identification of audiences and markets; development of writing skills. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3411 Radio and Television Storytelling 4 s.h.
Principles; gathering, writing, editing, reporting the news; techniques and concepts as a foundation for understanding, successfully writing, and delivering broadcast news. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Corequisites: JMC:3603. Requirements: journalism major.

JMC:3412 Strategic Communication Writing 4 s.h.
Principles and practices of persuasive writing; focus on public relations; may include editorials, op-ed pieces, magazine essays, reviews. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher and (JMC:2200 or FPC:2200). Requirements: journalism major.
JMC:3415 Writing Across Cultures 4 s.h.
Forms of travel writing and other types of crosscultural reporting; skills, knowledge, understandings vital to writing well about an increasingly multicultural and diverse world. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3450 Freelance Reporting and Writing 4 s.h.
Approaches to writing and marketing articles to magazines, newspapers, other publications; developing ideas, researching periodical markets, writing queries, writing and rewriting articles for publication. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3460 Arts and Culture Reporting and Writing 4 s.h.
Writing about arts and culture in a range of formats (e.g., news, profiles, features, criticism, essays); emphasis on original reporting that draws on resources, issues, people, and events on campus and in the community, especially in visual and performing arts. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3470 Narrative Journalism 4 s.h.
Process of writing the true story; development of skills in researching, interviewing, information gathering, organization, story-telling techniques, writing final story; story publication in magazines, newspapers, journals, online. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3490 Feature Reporting and Writing 4 s.h.
Storytelling techniques for magazine, newspaper, web site features; stylistic flair; human elements in stories; research, interviewing, and reporting. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3600 Topics in Media Production 4 s.h.
Analysis and solution of problems with communication strategies and/or media products: public relations, newsletter production, radio, media research, web basics, global media, interviewing, PR fund-raising. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3603 TV News Production 4 s.h.
Electronic news gathering (ENG); conceptualization, shooting, editing basic news packages. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3605 Editing the News 4 s.h.
Principles and process of editing content for publication; micro- and macroediting, headline writing, other aspects of editing. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3610 Graphic Design 4 s.h.
Problems of design, layout and production; practical and aesthetic considerations; digital techniques; creative projects. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3615 Strategic Communication Campaigns 4 s.h.
Development and presentation of public relations campaigns for client organizations; communication theory and research techniques applied to analyzing and solving public relations problems through objective-based strategic planning. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher and (JMC:2200 or FPC:2200) and JMC:3412. Requirements: journalism major.

JMC:3620 Applied Digital and Social Media 4 s.h.
Creation of original journalistic web sites incorporating writing, design, and structure; contemporary online media issues. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3625 Planning and Evaluation of Strategic Campaigns 4 s.h.
Undergraduate-level research methods used specifically for public relations and advertising; basic quantitative and qualitative methods as related to strategic communication; hands-on exercises. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher. Requirements: journalism major.

JMC:3630 Photo Storytelling: Making Powerful Images 4 s.h.
Techniques; basic craft, location shooting, editing photographs; group critiques of assignments. Prerequisites: JMC:2010 with a grade of C- or higher and JMC:2020 with a grade of C- or higher.

JMC:3633 Philanthropy Communication in a Digital World 4 s.h.
World of philanthropy and nonprofit work that changes rapidly with and in response to developments in digital communications; campaigns and fundraisers driven by free agents on social networking sites as an example of how philanthropists and nonprofit workers operate in digital environment; overview of trends in areas of philanthropy and nonprofit work; practical skills to help communicate, create, and disseminate messages using multiple digital tools and social media; analysis of communication/media strategies; media production. Same as FPC:3633.

JMC:4100 Advanced Reporting and Writing 4 s.h.
Project journalism; extended magazine pieces, explanatory/investigative journalism, series for newspapers, or task-force projects by entire class on a major issue, with goal of publication. Prerequisites: JMC:3400 or JMC:3405 or JMC:3410 or JMC:3411 or JMC:3412 or JMC:3415 or JMC:3450 or JMC:3460 or JMC:3470 or JMC:3490. Requirements: journalism major and one course from JMC:3400 through JMC:3490.
JMC:4120 Iowa Journalist  
Experience in photojournalism and desktop publishing software consistent with real-world media and public relations objectives; students write, edit, design, and produce Iowa Journalist magazine. Prerequisites: JMC:3400 or JMC:3405 or JMC:3410 or JMC:3411 or JMC:3412 or JMC:3415 or JMC:3450 or JMC:3460 or JMC:3470 or JMC:3490 or JMC:3600 or JMC:3603 or JMC:3605 or JMC:3610 or JMC:3615 or JMC:3620 or JMC:3625 or JMC:3630 or JMC:3633. Requirements: journalism major and one course from JMC:3400 through JMC:3620.

JMC:4130 Advanced Public Relations Writing  
Case-based study of corporate public relations practice; globalization issues, branding and integrated communication, crisis management. Prerequisites: JMC:3412. Requirements: journalism major.

JMC:4300 Advanced Photo Storytelling  
Photojournalism skills; may include documentary photography, advanced photojournalism methods and techniques. Prerequisites: JMC:3630.

JMC:4310 Advanced Media Workshop  
Journalism and mass communication skills; may include editing, broadcasting, design, multimedia. Prerequisites: JMC:3400 or JMC:3405 or JMC:3410 or JMC:3411 or JMC:3412 or JMC:3415 or JMC:3450 or JMC:3460 or JMC:3470 or JMC:3490 or JMC:3600 or JMC:3603 or JMC:3605 or JMC:3610 or JMC:3615 or JMC:3620 or JMC:3625 or JMC:3630 or JMC:3633. Requirements: journalism major and one course from JMC:3400 through JMC:3620.

JMC:4320 Advanced Television News  
Advanced training and experience in producing, writing, and reporting television news packages and newscasts; emphasis on meeting professional standards. Prerequisites: JMC:3411 and JMC:3603. Requirements: journalism major.

JMC:4330 Visual Storytelling  
Experience with journalistic storytelling techniques, generating story ideas, researching, writing, producing, editing, and critiquing documentary features and other visual narratives; use of digital video and archival material to produce visual narrative pieces for broadcast and other media platforms. Prerequisites: JMC:3411 and JMC:3603. Requirements: journalism major.

JMC:4340 Convergence Journalism  
Use of multiple technologies for journalistic storytelling across media platforms, such as print, television, and Internet. Prerequisites: JMC:3620. Requirements: journalism major.

JMC:4900 Special Projects in Mass Communication  
Research and readings to fit needs, interests of students.

JMC:4910 Readings in Communication and Mass Communication  
Focus on a problem or issue.

JMC:4950 Honors Readings  
Topic in journalism or mass communication, chosen by student. Requirements: honors standing.

JMC:4955 Honors Project  
Independent research or project for honors students. Requirements: honors standing.

JMC:4993 Honors Workshop  
Preparation for honors project; coordination of student's individual thesis work, introduction to issues in research design, methods. Requirements: honors standing.

Graduate

JMC:5100 Masters Seminar  
Theoretical or methodological problems in mass communication.

JMC:5237 Financial and Budget Fundamentals for Communicators  
How a company operates as a business; rapid changes in international economy; important SEC documents and other sources of information on public companies; a public company's financial statements; comparison of public companies financial conditions; analysis and informed conclusions about a public company’s financial condition.

JMC:5238 Strategic Communication Campaigns  
Practice of strategic communication through traditional and new media for purpose of benefiting nonprofit organizations or bringing about social change; examples and strategies from corporate, nonprofit, and social marketing campaigns; application of knowledge for benefit of real-world clients; principles and strategies applied to professional projects.

JMC:5239 Strategic Web Video Communication  
Production of video content and releasing visual stories online; tools needed to capture compelling images and edit meaningful stories; strengths and weaknesses of video storytelling using portable video cameras and affordable editing software; for graduate students who are working professionals.

JMC:5240 Social Media and Online Communication  
Exploration of information industry growth; creative processes involved in developing a blog and utilizing multimedia tools to enhance strategic messages; focus on characteristics and spread of new communication technologies and their social, economic, and political effects.

JMC:5248 Strategic Political Communication  
Study of political communication; topics range from classic issues (agenda setting) to current debates and emerging topics associated with new media; readings address political communication in the United States.
JMC:5266 Risk Communication 3 s.h.
Examination of risk as a central concept in communication process; risk as intrinsically an interdisciplinary concept; literature from a wide range of disciplines and perspectives (communication, psychology, sociology, formal risk analysis); case studies drawn from issues and cultural contexts (environmental, technological or health risks, food safety risks; international military crisis or threats of terrorism, natural disasters); emphasis on comparison of European and American contexts.

JMC:5267 Strategic Health Care Communication 3 s.h.
Breaking down health care to basics; writing and communicating about health care in an understandable way so that hospitals, medical groups, and health care businesses can be better understood when doing business with each other as well as the public and consumers at large; health care writing and communication so consumers can understand, avoid injuries and even death from medical errors shown by studies on health literacy; how doctors and insurance companies can convey their messages in easy-to-understand way to lessen public frustration with the system.

JMC:5268 Strategic Planning for the Communication Professional 3 s.h.
Use of a 10 step strategic planning model to discuss ways that an effective strategic planning process can be developed to effectively respond to a changing environment; strategic planning for an organization, department, specific project, and personal growth; ways that strategic thinking can help develop strategic thinking skills that transfer to any part of a career.

JMC:5269 Media Management for Strategic Communicators 3 s.h.
Looking at media in a completely new way; focus on economics and management of competitive businesses; how modern-day businesses in the media sector succeed or fail and why; decision making, competition, and outcomes; emphasis on news media companies that operate in public glare and offer rich opportunities for critical observation.

JMC:5285 Strategic Communication Externship 3 s.h.
Externship to allow connection between academic program and professional world; enhancement of skill and knowledge.

JMC:5300 Media Principles, Problems, and Challenges 3 s.h.
Current issues in journalism and mass communication in the United States and the world.

JMC:5400 Master's Advanced Writing and Editing 3 s.h.
Writing workshop for M.A. strategic communication students.

JMC:5910 Masters Tutorial arr.
Topics in communication and mass communication inquiry.

JMC:5920 Masters Practicum arr.
Research, readings, projects to fit needs, interests of students.

JMC:5950 Capstone Project in Strategic Communication 3 s.h.
Workshop of capstone projects required for graduation; for students nearing completion of M.A. in strategic communication. Requirements: M.A. in strategic communication program enrollment.

JMC:5955 Masters Research arr.
Independent research for projects, theses.

JMC:6100 Ph.D. Seminar 1 s.h.
Forum on theoretical or methodological problems in mass communication.

JMC:6210 Social Science Theories in Media and Communication 3 s.h.
Introduction to social science theory used by communication scholars to study media and communication; use of theory to explain media and communication phenomena.

JMC:6220 Critical Cultural Theories in Media and Communication 3 s.h.
Continuation of JMC:6210; introduction to critical cultural theories; use of theories to explain media and communication phenomena.

JMC:6245 Communication and Change 3 s.h.
Diverse perspectives on changing communication forms and their implications for media and society; theoretical and methodological approaches to research involving innovation.

JMC:6255 Problems in International Communication 3 s.h.
Representative topics: communication systems in national development and globalization; international and cross-cultural communication structure and theory; human rights; images, values; mass persuasion; laws, agreements; information channels, content, flow, effects; censorship, language, literacy.

JMC:6256 Gender and Mass Communication 3 s.h.
Approaches to the study of gender and communication; topics vary. Same as GWSS:6256.

JMC:6310 Quantitative Research Methods for Media and Communication 3 s.h.
Journalism and media communication research methods that involve collection and analysis of quantifiable data; surveys, content analyses, and experiments.

JMC:6320 Qualitative Research Methods for Media and Communication 3 s.h.
Interpretive research methods in journalism and communication studies that involve field observation, interviews, and textual analysis; use of contemporary, historical, and legal resources; ethical and philosophical positions underlying use of these methods.

JMC:6330 Reading Group 1-3 s.h.
Analysis and discussion of important texts.
JMC:6333 Seminar in Media Communication 3 s.h.
Topics vary.

JMC:6340 The Internet, Human Rights, and Freedom of Expression 3 s.h.
Origins of international human rights regime from a comparative and collective memory perspective; major human rights and freedom of expression controversies from a comparative and international perspective.

JMC:6700 Approaches to Teaching 3 s.h.
Institutional and disciplinary issues that influence the journalism/mass communication classroom, philosophies of teaching, and use of teaching strategies, techniques, and classroom technologies; for students planning to work in academia.

JMC:6776 Visual Narratives Techniques 3 s.h.
Analyses of theories, aesthetics, and methodologies of visual narratives in media storytelling; narrative techniques employed in different media from broadcast television documentaries and news features to narrative storytelling in cyberspace; conceptual survey of visual narratives; hands-on research, writing, production, and editing of narrative video content for broadcast television and online platforms; production of a high-quality visual narrative project.

JMC:6800 Mass Communication Seminar 2-3 s.h.
Readings, research.

JMC:6910 Ph.D. Tutorial  arr.
Communication and mass communication inquiry.

JMC:6920 Ph.D. Research Practicum  arr.
Conceptualization and execution of research projects.

JMC:6999 Dissertation  arr.
Large Data Analysis

Chair, Department of Computer Science
• Alberto Segre

Coordinator, Large Data Analysis
• Suely P. Oliveira (Computer Science)

Undergraduate certificate: large data analysis
The Certificate in Large Data Analysis is administered by the Department of Computer Science (p. 198).

Undergraduate Program of Study
• Certificate in Large Data Analysis
The certificate addresses the need for people with the quantitative and computational skills to make sense of massive data. Expertise in this field involves computational and algorithmic skills to efficiently process large data sets, statistical analysis to understand if correlations seen in large data sets are significant, and mathematical skills to develop and understand the underlying algorithms for the data analysis.

Certificate
The Certificate in Large Data Analysis requires a minimum of 21 s.h. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

Students majoring in computer science, mathematics, or statistics may count a maximum of 6 s.h. of course work for their major toward the certificate. Students pursuing other majors should consult with their major advisors to ascertain whether they may count certificate course work toward their majors.

Most of the certificate courses have prerequisites not included in the certificate requirements. Students should select courses for which they have met the prerequisites.

Prerequisites (or their equivalents) for the certificate include:

- CS:1210 Computer Science I: Fundamentals 4 s.h.
- MATH:1850 Calculus I 4 s.h.
- MATH:1860 Calculus II 4 s.h.
- MATH:2700 Introduction to Linear Algebra 4 s.h.

The following course work is required.

Level I
Both of these:

- MATH:3800 Elementary Numerical Analysis 3 s.h.
- STAT:2010 Statistical Methods and Computing 3 s.h.

Level II
This course:

- STAT:3200 Applied Linear Regression 3 s.h.

Two of these:

- CS:4700/MATH:4860 High Performance and Parallel Computing 3 s.h.
- CS:4980 Topics in Computer Science II (consult advisor for section approval) 3 s.h.
- MATH:4820 Optimization Techniques 3 s.h.
- MSCI:3200 Database Management 3 s.h.

May include one of these:

- STAT:5400 Computing in Statistics 3 s.h.
- STAT:5810/BIOS:5310 Research Data Management

Level III
Both of these:

- MATH:4740/STAT:4740/CS:4740 Large Data Analysis (capstone course) 3 s.h.

MSCI:6421/CS:6421 Knowledge Discovery 3 s.h.

Topic courses on machine learning, internet measurements and analytics, big data technologies, or topological data analysis may be substituted for the requirements with the approval of the large data analysis advisory board.
Latin American Studies

**Director, Division of Interdisciplinary Programs**
- Helena R. Dettmer

**Director, Latin American Studies**
- Joy Hayes (Communication Studies)

**Coordinator, Latin American Studies**
- Karmen R. Berger

**Undergraduate minor:** Latin American studies  
**Undergraduate certificate:** Latin American studies  
**Faculty:** http://clas.uiowa.edu/latin-american-studies/faculty  
**Web site:** http://clas.uiowa.edu/latin-american-studies

The Latin American Studies Program (LASP) is interdisciplinary, focusing on the history, politics, social organization, economy, geography, music, religion, art, and literature of Central and South America, Mexico, the Caribbean, the United States, and elsewhere around the globe. Faculty members from across the College of Liberal Arts and Sciences participate in the Latin American Studies Program as affiliated faculty members. Other University of Iowa faculty members occasionally offer courses and participate in the program's research, study, and interdisciplinary activities.

The Latin American Studies Program prepares students for graduate study or for Latin America-related careers in business, communications, government, bilingual/bicultural education, secondary teaching, community organizing, and international work.

In addition to its instructional activity, LASP sponsors a wide variety of activities, brings scholars of Latin America to campus, and fosters institutional linkages.

Latin American Studies is one of the academic units in the Division of Interdisciplinary Programs (p. 226).

**Undergraduate Programs of Study**
- Certificate in Latin American Studies  
- Minor in Latin American studies

**Certificate**

The Certificate in Latin American Studies requires a minimum of 24 s.h. The certificate program is open to current University of Iowa undergraduate students (except those earning a major in international studies (p. 415) with an emphasis in Latin American studies) and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in certificate courses.

A student may earn the certificate or the minor in Latin American studies, but not both.

The 24 s.h. required for the certificate must be earned in LASP-approved courses (see "Associated Courses" and "Courses" below) and must include at least 12 s.h. of credit earned at the University of Iowa. All students develop an individual certificate plan of study in close cooperation with a LASP advisor. They may count a total of 12 s.h. of credit earned for majors, minors, and other certificates toward the Certificate in Latin American Studies. In some cases, students may be able to count certificate courses toward certain General Education Program (p. 313) requirements.

The Certificate in Latin American Studies requires the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAS:2700 Introduction to Latin American Studies</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>LAS:4700 Latin American Studies Seminar</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>Spanish and Portuguese courses</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>Additional courses</td>
<td>12 s.h.</td>
</tr>
</tbody>
</table>

The required Spanish and Portuguese courses (6 s.h.) must be chosen from the lists under "Associated Courses" below.

The required additional courses (12 s.h.) also must be chosen from the lists under "Associated Courses" and "Courses" below. They must include courses from at least two different departments, and they may include a maximum of one (3 s.h.) additional course in Spanish or Portuguese.

**Study Abroad**

The program highly recommends study abroad in Latin America. Students must have prior approval to apply credit from a study abroad program toward the certificate requirements; contact the Latin American Studies Program.

**Minor**

The minor in Latin American studies requires a minimum of 15 s.h. in LASP-approved courses (see "Associated Courses" and "Courses" below), including 12 s.h. in University of Iowa courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

A student may earn the minor or the certificate in Latin American studies, but not both.

Students may count a total of 6 s.h. earned for majors, certificates, and other minors toward the Latin American studies minor. The minor is interdisciplinary, so it may include a maximum of 6 s.h. of credit from any single department or program.

Students are strongly encouraged to take either or both of these for the minor.

**Study Abroad**

The Latin American Studies Program highly recommends, but does not require, that students have an in-depth Latin American cultural experience, usually through study abroad, before completing their undergraduate requirements.

In cooperation with International Programs Study Abroad, LASP faculty members facilitate student participation in programs in many Latin American countries. University of Iowa students may enroll in programs in Argentina,
Brazil, Chile, Colombia, Costa Rica, Cuba, the Dominican Republic, Honduras, Mexico, and Uruguay. Programs range from intensive language study to group programs with a special focus. The University of Iowa cosponsors these programs through various consortiums.

Study abroad courses may be counted toward requirements for the certificate and the minor with prior approval from a LASP director.

**Financial Support**

Students are encouraged to apply for a Stanley Undergraduate Award for International Research/Fieldwork through University of Iowa International Programs. The awards are given to outstanding University of Iowa undergraduates who, in close consultation with a faculty member, propose well-conceived, small-scale research or fieldwork projects that require travel abroad. Students may conduct projects while participating in a study abroad program and may combine the award with other awards and financial assistance. For information regarding other scholarships, contact LASP advisors, International Programs staff, and the LASP director.

**Activities**

In addition to its instructional activity, LASP organizes a range of public programming activities each semester, including film series, photography and art exhibits, conferences, roundtable discussions, and lectures. Recent events include public lectures on community media and violence in Mexico and Colombia and on the cultural legacies of the 1960s in Latin America, and the annual Charles A. Hale Lecture in Latin American Studies. In the past, LASP cosponsored an interdisciplinary symposium on the Latino Midwest and the International Conference of the American Portuguese Studies Association.

**Associated Courses**

The following courses are approved for the Latin American studies certificate and minor. Students may petition to include other courses that have significant Latin American content; consult the Latin American Studies Program.

SPAN:4920 Topics in Film Studies 3 s.h.
Linguistics

Chair
• William D. Davies

Undergraduate major: linguistics (B.A.)
Undergraduate minor: linguistics
Graduate degrees: M.A. in linguistics; Ph.D. in linguistics
Faculty: http://clas.uiowa.edu/linguistics/people/faculty
Web site: http://clas.uiowa.edu/linguistics/

Linguistics is the scientific study of human languages, which are highly complex systems. Areas of study include word structure (morphology), speech sounds (phonetics) and their patterns of combination and contrast (phonology), sentence structure (syntax), and meaning relations (semantics).

Linguists study well-known and familiar languages, such as English, Spanish, Russian, and Chinese. They also study less well-known languages and even those languages about which little has been discovered. While human languages are different from one another in many ways, there are broad similarities among them, supporting the idea that the capacity for language is part of human cognitive functions.

The description of formal patterns of human language has a number of applications. Linguistics is connected to psychology and to speech and hearing, in studying how children learn language, how speakers process and interpret language, and how injuries and disorders affect both production and perception of speech. Linguistics also is linked with anthropology and other social sciences in studying how language use relates to culture, region, class, and gender. Linguists collaborate with computer scientists to construct computational representations of syntax and semantics for processing natural languages.

Linguistics has important ties with instruction in foreign languages and in English as a second language (ESL). Studies of how languages are learned are based in part on analysis of the languages in question. They also are grounded strongly in theories of second language acquisition, which in turn are related to theories of how linguistic knowledge is represented in the mind.

People with linguistic training teach ESL and help clinicians retrain people with linguistic disabilities. Some help design school programs for minority groups or intelligence and achievement tests. Linguists also work in occupations related to law, the computer industry, and foreign languages.

High scores on verbal, analytic, and quantitative aptitude tests are indicators of success in linguistics. Although few aspects of the field deal with numbers, students must be able to reason logically and explicitly and deal with formulas and abstract symbols.

Undergraduate Programs of Study
• Major in linguistics (Bachelor of Arts)
• Minor in linguistics

Depending on their vocational goals, students planning to major in linguistics should consider pursuing their studies either through the M.A. in linguistics with a professional focus or through the Ph.D., or they should complete a second major. Appropriate companion fields include languages, anthropology, computer science, English, mathematics, philosophy, psychology, sociology, speech pathology, and elementary and secondary education.

Bachelor of Arts

The Bachelor of Arts with a major in linguistics requires a minimum of 120 s.h., including 30 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The major in linguistics prepares students to do basic language analysis in syntax-semantics (sentence patterns and their relation to meanings) and phonology (sound patterns). Elective courses in a variety of subspecialties enable students to tailor the program to their own interests.

The major in linguistics requires the following course work.

All of these:
LING:3001 Introduction to Linguistics 3 s.h.
LING:3005 Articulatory and Acoustic Phonetics 3 s.h.
LING:3010 Syntactic Analysis 3 s.h.
LING:3020 Phonological Analysis 3 s.h.

One of these:
A course in language history, such as
LING:3080
A course in an old language (classical Greek, Latin, Old English, Sanskrit)

And:
Electives chosen in consultation with a faculty advisor, bringing total credit in the major to 30 s.h.

Students must complete no fewer than 15 s.h. of requirements for the major at the University of Iowa, including LING:3005 Articulatory and Acoustic Phonetics, LING:3010 Syntactic Analysis, and LING:3020 Phonological Analysis.

The course LING:1003 English Grammar does not count toward the linguistics major.

TESL Emphasis

As part of the major in linguistics, students may complete an emphasis in Teaching English as a Second Language (TESL). The TESL emphasis can prepare students to teach English to nonnative speakers abroad. It also is excellent preparation for graduate work in second language education. TESL emphasis students complete the requirements for the linguistics major listed above, using the following course work to partially satisfy the electives requirement.

Both of these:
LING:4040 The Structure of English 3 s.h.
LING:4050 Methods of Teaching English as a Second Language 3 s.h.

One of these:
LING:3030 Child Language-Linguistic Perspectives 3 s.h.
LING:3670 Language Processes 3 s.h.
LING:4080 Linguistic Theory and Second Language Acquisition 3 s.h.
LING:4090 Practical Phonetics 3 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Before the fifth semester begins: Introduction to Linguistics [LING:3001] and one additional linguistics course

Before the seventh semester begins: three more courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: two more courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors in the Major

Students majoring in linguistics have the opportunity to graduate with honors in the major. Departmental honors students must complete the required course work for the major and must prepare an honors thesis, working in consultation with their academic advisor. Honors students in linguistics must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University’s honors program.

Minor

The minor in linguistics requires a minimum of 15 s.h. in linguistics courses, including at least 12 s.h. in University of Iowa courses. The minor must include the courses listed below. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

LING:3001 Introduction to Linguistics 3 s.h.
LING:3005 Articulatory and Acoustic Phonetics 3 s.h.
LING:3010 Syntactic Analysis 3 s.h.
LING:3020 Phonological Analysis 3 s.h.
Additional approved course numbered 3000 or above 3 s.h.

Joint B.A./M.A. with TESL Focus

Undergraduate linguistics majors who plan to earn a master’s degree in linguistics with a Teaching English as a Second Language (TESL) focus have the opportunity to enroll in the joint Bachelor of Arts/Master of Arts degree program. Students in the joint B.A./M.A. program take selected graduate-level courses while they are still undergraduates and may count 12 s.h. of advanced course work toward both degrees. Once students complete the requirements for the bachelor’s degree, they are granted the B.A. and they usually complete the M.A. one year later.

As part of the undergraduate major with TESL focus, B.A./M.A. students take LING:4040 The Structure of English, a course in language history, LING:3001 Introduction to Linguistics, and LING:3005 Articulatory and Acoustic Phonetics.

They substitute some graduate-level course work for normal undergraduate requirements. Instead of taking LING:3010 Syntactic Analysis to fulfill the B.A. syntax requirement, they take LING:5010 Introduction to Syntax, the first course in the mandatory two-course syntax sequence for M.A. students. Instead of taking LING:3020 Phonological Analysis to fulfill the B.A. phonology requirement, they take LING:5020 Introduction to Phonology, the first in the graduate two-course phonology sequence.

In addition, LING:4050 Methods of Teaching English as a Second Language and LING:6010 Syntactic Theory count toward both degrees and typically are taken during the senior year.

To be admitted to the program, students must be working toward an undergraduate major in linguistics, must have completed at least 80 s.h. of undergraduate course work (typically by the end of their fifth semester), and must have a g.p.a. of at least 3.50.

Graduate Programs of Study

- Master of Arts in linguistics
- Doctor of Philosophy in linguistics

Department of Linguistics graduate programs emphasize theory and research. Students interested in non-university careers also may take courses in applied linguistics and other fields, either in connection with doctoral work or as an option in the M.A. program.

Iowa’s linguistics department has particular strengths in phonology, syntax, and second language acquisition (SLA).

The phonology curriculum emphasizes current theoretical perspectives, including optimality theory, and the collection, description, and interpretation of novel phonological and phonetic data. Courses feature extensive work in data analysis and problem solving, focusing on construction and evaluation of phonological theories, particularly in light of new empirical data.

The syntax curriculum includes the dual emphases of empirical and theoretical perspectives. It offers a variety of foundational courses that build analytic and argumentation skills, as well as specialized course work on current issues in syntactic theory. The courses consist of intensive work in problem solving. They combine discovery and description of new linguistic data with exploration of the implications of such facts in testing and constructing syntactic theories.

The curriculum in second language acquisition includes courses that provide an overview and analysis of current SLA research conducted within the generative framework, with emphasis on explaining the linguistic competence of second language learners in terms of universal grammar.
(UG), the innate language acquisition device. Work focuses on experimental research investigating the influence of the first language, theories of UG access, and related topics.

**Master of Arts**

The Master of Arts in linguistics requires a minimum of 31-37 s.h. of graduate credit with thesis, or 37 s.h. without thesis.

All M.A. students complete the following set of required core courses in phonology, syntax, and language acquisition (total of 22 s.h.).

<table>

</tbody>
</table>

Thesis students also complete at least 9 s.h. of electives and may earn up to 6 s.h. for the thesis. Nonthesis students also complete 15 s.h. of Department of Linguistics course work, which may include a 9 s.h. focus (e.g., teaching English as a second language). A student's advisor must approve all courses that count toward the degree.

A student with a linguistics background may waive up to 6 s.h. of course work if the department determines that he or she completed comparable work before enrolling in the program.

Comprehensive examinations cover phonology, syntax, and applied linguistics (for students who choose this option).

**Doctor of Philosophy**

The Doctor of Philosophy in linguistics requires a minimum of 72 s.h. of graduate credit, or 73 s.h. for graduates of the M.A. nonthesis program. The highly selective program provides students with a strong foundation in theoretical linguistics and helps them develop the skills they will need to explore the close relationship between linguistics and related disciplines.

The Ph.D. core includes the following course work (total of 18 s.h.).

- Two upper-level syntax courses numbered LING:7010 or above
- Two upper-level phonology courses numbered LING:7020 or above
- Two or more seminars

An approved specialty area of 18 s.h. also is required, and students must achieve proficiency in a foreign language, as specified by department regulations.

To pass the comprehensive examination for the Ph.D., a student must gain approval for two papers of publishable quality. One must be in phonology or syntax. The other should be in an area of the student's choosing and must be distinct from the area of the first paper.

An oral defense of the dissertation and three years in residence at the University of Iowa are required. In addition, all candidates are required to gain supervised experience in teaching and research.

**Related Certificate: Cognitive Science of Language**

The Graduate College offers the Certificate in Cognitive Science of Language, which requires a minimum of 12-15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program ensures that students have training in interdisciplinary approaches to the study of language along with strong theoretical grounding in their Ph.D. discipline. See Cognitive Science of Language (p. 933) (Graduate College) in the Catalog for more information.

**Admission**

Applicants to the graduate program in linguistics must complete an application form, submit GRE General Test scores, and have three letters of recommendation sent to the Department of Linguistics. Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores. Applications for admission should be submitted as early as possible for the following academic year.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Financial Support**

Applications should be received by February 1 for the following academic year in order to have priority in consideration for financial aid. Applications received after February 1 are considered for remaining aid. Early submission of an application is strongly encouraged.

Exceptionally well-qualified applicants may be eligible for a Presidential Graduate Research Fellowship. Individuals interested in being nominated for a presidential fellowship should submit all application materials by January 15 for the following academic year.

Applications for all awards are considered only for students whose application for admission is complete.

**Facilities**

The Department of Linguistics has a laboratory equipped with 20 computer workstations for small group instruction, individual work, and student research in speech analysis, second language acquisition, computational linguistics, and other areas. The department also has a soundproof booth connected to a computer with software for speech analysis. Remote terminals and personal computers are also available to students.

The departmental reading room, which contains a modest library, provides a common meeting place for faculty and students. Students have considerable influence on
departmental affairs and enjoy a high degree of individual instruction.

LING:3117 Psychology of Language 3 s.h.
Theoretical, empirical investigations of linguistic behavior; behaviorist, rationalist models in context of formal linguistic structure and context of models of speech perception and production. Offered spring semesters. Prerequisites: LING:3001. GE: Social Sciences. Same as CSD:3117.

LING:3118 Language Acquisition 1-3 s.h.

LING:3302 Introduction to Chinese Linguistics 3 s.h.
Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as SLA:3302, CHIN:3302.

LING:3670 Language Processes 3 s.h.
Psychological processes involved in using languages, including speech perception and production, the meaning of words, understanding and producing sentences, and basics of discourse and pragmatics; developmental and neural bases of language processes. Prerequisites: PSY:2701. Requirements: grade of C‑ or higher in PSY:2601, grade of C‑ or higher in PSY:2810, and psychology major; or nonmajor and CSD:1015 or LING:3001. Same as PSY:3670.

LING:4020 Morphology 3 s.h.
Lexicon and principles of word formation; principal processes of inflection, derivation, and compounding found in the world's languages; relation to phonology, syntax; practice in morphological analysis from a variety of languages. Prerequisites: LING:3001.

LING:4030 Introduction to Computational Linguistics 3 s.h.
Introduction to computational linguistics; focus on theory and practice of natural language processing and syntactic and semantic analysis. Same as CS:4460.

LING:4040 The Structure of English 3 s.h.
Descriptive analysis of English, including word and sentence structure; focus on relevance to teaching English as a second language. Offered fall semesters. Prerequisites: LING:3001.

LING:4050 Methods of Teaching English as a Second Language 3 s.h.
Observations of ESL and intensive English classes at the University; design and presentation of short lessons, text evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: LING:3005 and LING:4040. Same as SLA:4401.

LING:4060 Introduction to Semantics 3 s.h.
Overview of meaning in natural language mapped onto lexical and syntactic structures; formal logical and set theory description; discussion of truth conditions, compositionality, presupposition, definiteness, quantification in natural language. Requirements: course in syntax.

LING:4080 Linguistic Theory and Second Language Acquisition 3 s.h.
Introduction of research results obtained by generative second language acquisition framework and their implications for classroom teaching methods; current views of language architecture; focus on inflectional morphology and linguistic interfaces, which have been proposed to be severe bottlenecks for acquisition; research findings on acquisition of syntax, phonology, semantics, linguistic pragmatics; pedagogical implications of these findings. Prerequisites: LING:3010 and LING:3020. Same as SLA:4080.

LING:4090 Practical Phonetics 3 s.h.
Contemporary articulatory and acoustic research, including second-language acquisition, elicitation and computer analysis of primary linguistic data. Prerequisites: LING:3005.

LING:4589 Philosophy of Language 3 s.h.
Main issues in contemporary philosophy of language; topics may include theories of meaning, truth, belief, interpretation, translation, speech acts, performatives, rule following, reference, naming, propositional attitudes, metaphor. Same as PHIL:4589.

Graduate

LING:5000 Proseminar: Morphosyntax 1 s.h.
Basic morphological analysis of languages other than English; morphological markers of syntactic relations (morphosyntax), such as case/agreement, possession, switch reference and other inflectional marking. Corequisites: LING:5010.

LING:5010 Introduction to Syntax 3 s.h.
Methods and argumentation for formal analysis of sentence structure through induction from language data of central concepts and relations; hypothesis testing, empirical bases of theoretical concepts. Corequisites: LING:5000. Same as SLA:5010.

LING:5020 Introduction to Phonology 3 s.h.
Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisites: LING:3005. Same as SLA:5020.

LING:5030 First Language Acquisition 3 s.h.
Child language from a crosslinguistic perspective. Prerequisites: LING:3005 and (LING:4040 or LING:5010). Same as SLA:5401.
LING:5040 Linguistic Field Methods 3 s.h.
Collection and analysis of primary linguistic data from unfamiliar language; methods of elicitation, theory, practical problems; extensive practice in eliciting data from a consultant. Prerequisites: LING:3005. Requirements: a course in syntax and a course in phonology.

LING:5070 Practicum in Teaching English as a Second Language 3 s.h.
Practical experience in TESL, observation and participation in intensive English classes; design and teaching of ESL classes under supervision. Offered summer sessions. Prerequisites: LING:4050.

LING:5090 Special Projects arr.
Theoretical and applied topics.

LING:6010 Syntactic Theory 3 s.h.
Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisites: LING:5010. Same as SLA:6010.

LING:6020 Phonological Theory 3 s.h.
Post-SPE phonological theory, including autosegmental phonology, feature geometry, the syllable, optimality theory. Prerequisites: LING:5020. Same as SLA:6011.

LING:6040 Linguistic Structures 3 s.h.
Grammatical and/or phonological structure of a selected language or language family.

LING:6050 Language Universals Linguistic Typology 3 s.h.
Proposed universal principles of linguistic structure; approaches to classification of languages on the basis of grammatical and phonological structure. Prerequisites: LING:5010.

LING:6080 Generative Second Language Acquisition 3 s.h.
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: (LING:3010 or LING:5010) and (LING:3020 or LING:5020). Same as SLA:6452.

LING:6101 Cognitive Science of Language Proseminar I 3 s.h.
Survey of five major disciplines within language sciences: formal linguistic, communication disorders, psychological, neuroscience, and computational approaches. Requirements: graduate standing in communication sciences and disorders, linguistics, psychology, or neuroscience. Same as PSY:6102, CSD:6102.

LING:6190 Topics in Comparative Romance Linguistics 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Recommendations: additional graduate course work in linguistics. Same as SPAN:6190, CLSA:6990, SLA:6302.

LING:6415 Seminar: Language, Gender, and Sexuality 3 s.h.
Role of language and discourse in cultural constructions of gender identities and relations, including domination and subordination; theoretical perspective and methodological approaches that have shaped thought on the language/gender nexus. Same as ANTH:6415, GWSS:6415.

LING:6900 Master's Thesis arr.

LING:7000 Seminar: Spanish Linguistics 3 s.h.
Same as SPAN:7000.

LING:7010 Advanced Syntactic Theory 2-3 s.h.
Recent developments in syntax; comparison of theories, argumentation, and uses of data. Prerequisites: LING:6010. Same as SLA:7401.

LING:7020 Advanced Phonological Theory 2-3 s.h.
Current issues. Prerequisites: LING:6020. Same as SLA:7402.

LING:7040 Topics in Linguistic Theory 2-3 s.h.
Varied topics in linguistic theory; for graduate students.

LING:7090 Seminar: Problems in Linguistics 2-3 s.h.
Intensive study of theoretical and practical problems. Same as SLA:7404.

LING:7100 Special Projects arr.

Mathematics

Chair

- Daniel D. Anderson

Undergraduate major: mathematics (B.A., B.S.)
Undergraduate minor: mathematics
Graduate degrees: M.S. in mathematics; Ph.D. in mathematics
Faculty: http://www.math.uiowa.edu/people/faculty
Web site: http://www.math.uiowa.edu/

Mathematics is a basic tool for understanding modern society as well as a crucial requirement for many careers in science, engineering, business, and the professions. Research in this living, dynamic subject is at the highest level in history; CareerCast.com also ranked mathematician as the best job to hold in 2014.

An undergraduate degree in mathematics prepares students for a variety of careers in government and business, for secondary teaching, for graduate study, and with proper planning, for a variety of professional programs. Graduate study is advisable for some business and governmental positions and for college and university teaching and research. The department also offers a minor and partners with the Departments of Computer Science and Statistics and Actuarial Science to offer the undergraduate Certificate in Large Data Analysis (p. 445).

Undergraduate Programs of Study

- Major in mathematics (Bachelor of Arts, Bachelor of Science)
- Minor in mathematics

Students majoring in mathematics (either B.A. or B.S.) enroll in one of three programs: Program A is for students who plan to work in business or government or pursue graduate study in mathematics; program B is for students who seek secondary school teaching licensure; and program C is for those seeking specialization in a math-related area, such as actuarial science, biomathematics, business, computer science, economics, physics, statistics, and so forth. Program C may be especially appropriate for students who plan to seek a math-related job after earning a bachelor's degree, rather than going on to graduate study.

B.A. OR B.S. WITH SECOND MAJOR

Students majoring in mathematics may choose to earn a second major in computer science, statistics, actuarial science, or other disciplines. They must satisfy all requirements of program A, program B, or program C in mathematics as well as all requirements for the second major. For more information, consult an advisor and see Declaring or changing a major under For Students on the College of Liberal Arts and Sciences web site.

TRANSFER FROM ENGINEERING TO MATHEMATICS

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in mathematics requires a minimum of 120 s.h., including at least 39-41 s.h. (11-12 courses) of work for the major. The Bachelor of Science with a major in mathematics requires a minimum of 120 s.h., including at least 45-47 s.h. (13-14 courses) of work for the major. (Total credit for the major depends on the student's choice of program A, B, or C.) Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

All students complete the post-calculus mathematics requirement, the upper-level mathematics requirement, and the requirements for program A, B, or C.

For policies concerning transfer credit, correspondence credit, credit by examination, cumulative grade-point average, general rules relating to regression and duplication, and so forth, see For Students on the College of Liberal Arts and Sciences web site. For information about duplication, regression, and use of the second-grade-only option for mathematics courses, contact the Department of Mathematics.

The department's Handbook for Undergraduate Majors provides details about schedule planning and career options for mathematics students. For more information on admission, financial support, employment opportunities, the faculty, facilities, and other topics, visit the University of Iowa and Department of Mathematics web sites.

The major in mathematics (B.A. or B.S., program A, B, or C) requires the following course work.

POST-CALCULUS MATHEMATICS REQUIREMENT

Students majoring in mathematics (Bachelor of Arts or Bachelor of Science) must earn at least 15 s.h. in post-calculus mathematical sciences courses offered by the University of Iowa; students may not count transfer courses or credit by exam toward this requirement. At least 12 s.h. of the required 15 s.h. in post-calculus courses must be earned in Department of Mathematics courses (prefix MATH) or in courses cross-listed with the department.

Post-calculus courses in the Department of Mathematics are numbered 2000 or above, excluding these:

MATH:3700 Introduction to Matrix Theory;
MATH:3750 Classical Analysis;
MATH:3995 Topics in Mathematics;
MATH:3996 Individual Study and Honors in Mathematics;
MATH:3997 Readings in Mathematics;
MATH:4010 Basic Analysis; and
MATH:4020 Basic Abstract Algebra.

Post-calculus courses offered by the Department of Computer Science, and the Department of Statistics and Actuarial Science must have a calculus prerequisite.
UPPER-LEVEL MATHEMATICS REQUIREMENT
All mathematics majors must take at least one upper-level math course offered by the Department of Mathematics. Upper-level math courses include MATH:3900 Introduction to Mathematics Research and courses numbered 4000 or above, excluding these:
MATH:4010 Basic Analysis;
MATH:4020 Basic Abstract Algebra; and
MATH:4120 History of Mathematics.

Program A
Program A is primarily for students who plan to work in business or government or to pursue graduate study in mathematics.

PROGRAM A: CORE COURSES
Students must complete a two-semester sequence of calculus I-II. Advanced placement credit, CLEP credit, and credit granted through the Mathematics Incentive Program is accepted for all or part of the calculus requirement.

B.A. and B.S. students complete the following core courses.

MATH:1850 & MATH:1860 Calculus I-II
MATH:2700 Introduction to Linear Algebra
MATH:2850 Calculus III
MATH:3600 Introduction to Ordinary Differential Equations
MATH:3720 Introduction to Abstract Algebra I
MATH:3770 Fundamental Properties of Spaces and Functions I

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

PROGRAM A: ELECTIVES
B.A. students complete four electives (12-16 s.h.), including at least one upper-level mathematics course.

B.S. students complete six electives (18-24 s.h.), including at least three upper-level mathematics courses.

Mathematics
Students may choose from mathematics courses numbered MATH:2150 Foundations of Geometry, MATH:3800 Elementary Numerical Analysis or courses above MATH:3800, excluding MATH:4010 Basic Analysis and MATH:4020 Basic Abstract Algebra.

Computer Science
Students may choose computer science courses numbered CS:1210 through CS:4740, excluding CS:2111 Programming Practice, CS:3110 Introduction to Informatics, CS:3210 Programming Languages and Tools, CS:3910 Informatics Project, CS:3980 Topics in Computer Science I, and CS:3990 Honors in Computer Science or Informatics.

Statistics and Actuarial Science

Among the courses listed above, only one of the following three courses, STAT:2020, STAT:3100, or STAT:3120 can be counted; although none of these courses can be counted if taken after STAT:4100.

Students may choose actuarial science courses numbered ACTS:3080 Mathematics of Finance I, ACTS:3085 Introduction to Mathematics of Finance, and ACTS:4130 through ACTS:4380

Consult the department's Handbook for Undergraduate Majors for a complete list of electives in computer science, and statistics and actuarial science.

Program B
Program B is intended for students seeking secondary school teaching licensure. In addition to earning a Bachelor of Arts or Bachelor of Science with a major in mathematics, students must complete the Teacher Education Program (TEP); see "B.A. or B.S. with Teacher Licensure" below.

PROGRAM B: CORE COURSES
Students must complete a two-semester sequence of calculus I-II. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement. B.A. and B.S. students complete the following core courses.

All of these:

MATH:1850 & MATH:1860 Calculus I-II
MATH:2150 Foundations of Geometry
MATH:2700 Introduction to Linear Algebra
MATH:2850 Calculus III
MATH:3720 Introduction to Abstract Algebra I
MATH:3770 Fundamental Properties of Spaces and Functions I

CS:1210 Computer Science I: Fundamentals
STAT:3120 Probability and Statistics

One of these:

MATH:4050 Introduction to Discrete Mathematics
MATH:4060 Discrete Mathematical Models

More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

PROGRAM B: ELECTIVES
B.A. students in Program B must take at least one additional Department of Mathematics post-calculus course (3-4 s.h.). B.S. students in Program B must take at least three additional Department of Mathematics post-calculus courses (9-12 s.h.), including two chosen from MATH:3900 Introduction to Mathematics Research and courses numbered 4000 or above, excluding MATH:4010 Basic Analysis and MATH:4020 Basic Abstract Algebra.

The post-calculus courses must be chosen avoiding duplication and regression with the core math courses, particularly when the engineering math courses are considered. With the department's approval, capable students are encouraged to substitute more advanced courses in the same subject area for any of the electives. The Handbook for Undergraduate Majors offers advice on course selection.
**Program C**

Program C enables students to specialize in a math-related subtrack, such as the mathematics of making optimal business decisions, risk management and insurance, economics, finance, physics, chemistry, biostatistics, biomathematics, computer science, statistics and actuarial science, or all departments within the College of Engineering. In consultation with the faculty advisor, each student builds on the Program C core to prepare a subtrack plan of study tailor-made to his or her interests and academic or career goals. The proposed study plan must be approved by the Department of Mathematics undergraduate committee. Students must file their subtrack plan of study before they begin their senior year; they use the Program C Plan of Study form, available at the Department of Mathematics office. The Handbook for Undergraduate Majors has plans for choosing electives in several areas; students may use these or propose other plans.

**PROGRAM C: CORE COURSES**

Students must complete a two-semester sequence of calculus I-II. Advanced placement credit, CLEP credit, and credit earned through the Mathematics Incentive Program is accepted for part or all of the calculus requirement. B.A. and B.S. students complete the following core math courses.

- MATH:1850 & MATH:1860 Calculus I-II: 8 s.h.
- MATH:2700 Introduction to Linear Algebra: 4 s.h.
- MATH:2850 Calculus III: 4 s.h.
- One additional proof course such as MATH:3720 or MATH:3770: 4 s.h.

Some subtracks require additional core courses; consult the Handbook for Undergraduate Majors. Additional core courses count as required electives (see "Program C: Electives" below). Students who specialize in engineering should consult the Department of Mathematics. More advanced courses may be substituted for the core courses, with Department of Mathematics approval.

**PROGRAM C: ELECTIVES**

B.A. students choose six or seven electives, depending on their subtrack. B.S. students choose eight or nine approved electives. All electives must be offered for 3-4 s.h. of credit. At least three of the electives must be offered by the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science (prefixes CS, MATH, and STAT or ACTS). At least two of the three electives must be post-calculus math courses (prefix MATH). All mathematics majors must take 15 s.h. of post-calculus math courses and at least one upper-level math course; see "Post-Calculus Mathematics Requirement" and "Upper-Level Mathematics Requirement" above.

Some subtracks require additional core courses (see "Program C: Core Courses" above); the additional core courses count as required electives. For a list of suggested subtracks and restrictions on electives in each subtrack, consult the Handbook for Undergraduate Majors.

**B.A. or B.S. with Teacher Licensure**

Mathematics majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Students majoring in mathematics who wish to earn teacher licensure should choose program B in the mathematics major (Bachelor of Arts or Bachelor of Science); see "Program B" above.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Many mathematics courses must be taken in sequence, so students must begin major requirements as early as possible, and individual plans of study must be constructed carefully. The mathematics major typically requires 11 or 12 courses for Bachelor of Arts students and 13 or 14 courses for Bachelor of Science students. Students must choose program A, B, or C by the end of the third semester and must remain in their chosen program until they graduate in order to stay on track for the four-year graduation plan.

**Before the third semester begins:** course work in the major through second-semester calculus

**Before the fifth semester begins:** two or three more courses in the major

**Before the seventh semester begins:** three or four more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major**

Students majoring in mathematics have the opportunity to graduate with honors in the major. Departmental honors students must complete all requirements for the major and must maintain a g.p.a. of at least 3.40 in the major and overall. To graduate with honors in the major, they must complete one of the options below.

Option 1: complete four of the courses below, including a two-course sequence, with a B average for the four courses.

- MATH:4090 A Rigorous Introduction to Abstract Algebra: 4 s.h.
- MATH:4210 Foundations of Analysis: 4 s.h.
- MATH:5000 & MATH:5010 Abstract Algebra I-II: 8 s.h.
- MATH:5200 & MATH:5210 Introduction to Analysis I-II: 8 s.h.
Undergraduate Majors.

For more information, see the department’s Handbook for courses numbered MATH:3720 or above, excluding these:

- taking one additional course chosen from MATH:2150 or
- satisfy the minor’s post-calculus course requirement by MATH:2560, and MATH:3550 at the University of Iowa may not be taken pass/nonpass. Transfer credit and credit of at least 2.00 in all courses for the minor and in all UI calculus courses taken in the Department of Mathematics must be maintained. Students who have taken MATH:1560, MATH:2550, MATH:2560, and MATH:3550 at the University of Iowa may satisfy the minor’s post-calculus course requirement by taking one additional course chosen from MATH:2150 or courses numbered MATH:3720 or above, excluding these:

- MATH:3750 Classical Analysis;
- MATH:3995 Topics in Mathematics;
- MATH:3996 Individual Study and Honors in Mathematics;
- MATH:3997 Readings in Mathematics;
- MATH:4010 Basic Analysis; and
- MATH:4020 Basic Abstract Algebra.

Students who have taken MATH:1560, MATH:2550, MATH:2560, and MATH:3550 at the University of Iowa may satisfy the minor’s post-calculus course requirement by taking one additional course chosen from MATH:2150 or courses numbered MATH:3720 or above, excluding these:

- MATH:3750 Classical Analysis;
- MATH:3995 Topics in Mathematics;
- MATH:3996 Individual Study and Honors in Mathematics;
- MATH:3997 Readings in Mathematics;
- MATH:4010 Basic Analysis; and
- MATH:4020 Basic Abstract Algebra.

For more information, see the department’s Handbook for Undergraduate Majors.

Minor

The minor in mathematics requires a minimum of 15 s.h. in mathematics courses, including 12 s.h. earned in post-calculus courses taken in the Department of Mathematics at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit and credit by examination do not count toward the 12 s.h. of post-calculus courses.

Courses numbered 2000 or above are considered post-calculus, excluding these:

- MATH:3700 Introduction to Matrix Theory;
- MATH:3750 Classical Analysis;
- MATH:3995 Topics in Mathematics;
- MATH:3996 Individual Study and Honors in Mathematics;
- MATH:3997 Readings in Mathematics;
- MATH:4010 Basic Analysis; and
- MATH:4020 Basic Abstract Algebra.

Students who have taken MATH:1560, MATH:2550, MATH:2560, and MATH:3550 at the University of Iowa may satisfy the minor’s post-calculus course requirement by taking one additional course chosen from MATH:2150 or courses numbered MATH:3720 or above, excluding these:

- MATH:3750 Classical Analysis;
- MATH:3995 Topics in Mathematics;
- MATH:3996 Individual Study and Honors in Mathematics;
- MATH:3997 Readings in Mathematics;
- MATH:4010 Basic Analysis; and
- MATH:4020 Basic Abstract Algebra.

For more information, see the department’s Handbook for Undergraduate Majors.

Related Certificate: Large Data Analysis

The Certificate in Large Data Analysis (p. 445) can be earned in addition to a B.A. or B.S. degree in mathematics. The certificate focuses on handling, processing, and extracting information from large data sets. As computers have become faster and smaller, more information can be gathered and used for a large range of applications, such as for weather forecasting; identifying people and trends utilizing Facebook or other social media; understanding the genome; and searching for disease causes and cures, as well as many other areas of study. The certificate is interdisciplinary, requiring courses from three areas of study—computer science, mathematics, and statistics. Computer science teaches students how to handle large amounts of data and how to implement the algorithms to process them while statistics helps students to understand what can and cannot be legitimately inferred from the data. Mathematics focuses on algorithms and methods for connecting these important areas of data collection.

Graduate Programs of Study

- Master of Science in mathematics
- Doctor of Philosophy in mathematics

Master of Science

The Master of Science in mathematics requires a minimum of 30 s.h. of graduate credit. Students earn the degree through courses and comprehensive examinations. There is no M.S. thesis. Requirements (courses and comprehensive examination areas) may be modified with the department's consent.

Four different programs (I, II, III, and IV) lead to the M.S. in mathematics. Program II is designed for secondary school teachers.

Program I

Program I prepares students for further study of pure and applied mathematics and for employment in government and business. M.S. students in program I take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the degree.

Program I requires the following courses.

- MATH:5000 & MATH:5010 Abstract Algebra I-II 8 s.h.
- MATH:5200 & MATH:5210 Introduction to Analysis I-II
- MATH:5400 General Topology 4 s.h.
- MATH:5410 Introduction to Smooth Manifolds 4 s.h.
- MATH:5600 Nonlinear Dynamics with Numerical Methods 4 s.h.
- MATH:5700 Partial Differential Equations with Numerical Methods 4 s.h.

The two comprehensive examinations are chosen from algebra, analysis, differential equations with numerical methods, and topology.

Program II

Program II is designed for secondary school teachers. Program II requirements are similar to those for
programs I and III, but program II students complete two mathematics education courses and a minimum of 24 s.h. in Department of Mathematics courses. The following courses may be used to satisfy the program II mathematics course requirements.

MATH:3600 Introduction to Ordinary Differential Equations 2-3 s.h.
Mathematics courses (prefix MATH) numbered 4000 or above

Students are encouraged to consult with the mathematics education faculty when planning their course of study.

Program III

Program III focuses on applied mathematics. Students in program III take several courses and pass two comprehensive examinations. Students must earn a grade of B-minus or higher in six of the courses and maintain a g.p.a. of at least 2.75 in all mathematics courses taken for the M.S.

Program III requires the following courses.

All of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH:5200 &amp; MATH:5210 Introduction to Analysis I-II</td>
<td>8 s.h.</td>
</tr>
<tr>
<td>MATH:5600 Nonlinear Dynamics with Numerical Methods</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MATH:5700 Partial Differential Equations with Numerical Methods</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MATH:5800 Numerical Analysis: Nonlinear Equations and Approximation Theory</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MATH:5810 Numerical Analysis: Differential Equations and Linear Algebra</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Both courses in group A, or two courses from group B:

Group A

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH:5400 General Topology</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MATH:5410 Introduction to Smooth Manifolds</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

Group B

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH:4060 Discrete Mathematical Models</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>MATH:4610 Continuous Mathematical Models</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>MATH:4820 Optimization Techniques</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

The two comprehensive examinations are chosen from analysis, differential equations with numerical methods, numerical analysis, and topology.

Program IV

Program IV is designed for nondepartmental students working toward a Ph.D. in areas of study that require mathematical knowledge. The program has no specific required courses.

Students in program IV are considered to have passed the comprehensive examination for the master’s degree in mathematics if they have maintained a g.p.a. of at least 3.00 in all mathematics courses taken for the M.S. in mathematics and have successfully completed the Ph.D. comprehensive examination in their area of study.

Students in program IV are assigned a mathematics advisor, who works with them and their major advisor to plan an appropriate curriculum for the M.S. in mathematics. A suitable program of study should be approved by a mathematics advisor before the student takes the Ph.D. comprehensive examination, and a member of the mathematics faculty should serve on the Ph.D. comprehensive examination committee.

Doctor of Philosophy

The Doctor of Philosophy in mathematics requires a minimum of 72 s.h. of graduate credit. The program places strong emphasis on preparation for research and teaching. The department maintains no division between pure and applied mathematics. It cooperates in interdisciplinary doctoral programs with the College of Education (see Teaching and Learning (p. 793) in the Catalog) and the Program in Applied Mathematical and Computational Sciences (p. 925).

Ph.D. students in mathematics must satisfy the following requirements for course work (credits and breadth), examinations, foreign language, and the Ph.D. thesis. Students must spend at least three years in residence at a graduate college, including at least one year at the University of Iowa. They also should enroll in specific courses designated as preparatory for the Ph.D. examinations (consult the Department of Mathematics graduate studies director).

To further encourage mathematical breadth, students must earn at least 33 s.h. of graduate credit in regular courses equivalent to or more advanced than Ph.D. comprehensive examination preparatory courses. For a list of accepted Department of Mathematics courses numbered 6000 or above and rules to ensure proper distribution, contact the department.

The Ph.D. examinations consist of a qualifying exam and a comprehensive exam. Students choose three areas from the department's list of qualifying examination areas: algebra, analysis, differential equations with numerical methods, and topology. For each qualifying area, there is a two-semester course sequence numbered 5000 or above that is designated as preparatory, although exams may differ from course content. The three parts of the qualifying exam are taken over a two-week period. An exam committee gives one grade (pass, fail, conditional pass) on the entire three-part qualifying examination (the committee has at least six faculty members, with at least two from each exam area). If the grade is fail, the committee has the option to consider each part of the exam separately, offering the student the option of pass in one or two of the areas and fail in the other(s).

The Ph.D. comprehensive exam tests students on research-related topics.

Candidates also take an oral final examination on their dissertation material.

Ph.D. students are required to demonstrate reading proficiency in French, German, or Russian by passing a reading test administered by the appropriate language department, earning a grade of B or higher in the second semester of a sequence offered by the appropriate language department, or passing a special examination approved by the Department of Mathematics graduate committee. Courses that do not carry graduate credit may be used to satisfy this requirement, but they do not count toward the required 72 s.h. of graduate credit. Students must demonstrate language competence after enrolling in graduate school.
The most distinctive aspect of a Ph.D. is the thesis. The department expects the thesis to be an original mathematical work comparable in content and writing quality to that found in standard published research journals. The thesis is written under the supervision of a mathematics department faculty member and must be approved by the Ph.D. defense committee.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Applicants to the Ph.D. program have preference for admission and funding.

**Master of Science**

Admission to M.S. programs I, II, and III is competitive and based on a combination of undergraduate course work and grades, letters of recommendation, and test scores. Numerical standards change every year or so; exceptions may be made to the following guidelines.

Applicants must have completed work in an undergraduate program equivalent to the major in mathematics offered by the University of Iowa Department of Mathematics, with an undergraduate g.p.a. of at least 3.20. Relevance and difficulty of courses are considered when evaluating grades; grades of C or lower in mathematics courses must be balanced by grades of A. Individuals whose preparation does not meet this requirement may be admitted conditionally and are asked to take specific courses that cover deficiencies.

Applicants must score at least 155 on the quantitative section of the revised Graduate Record Exam (GRE) General Test (700 on the old GRE). Applicants whose first language is not English are required to demonstrate their competence in English, normally by scoring at least 105 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicant must have a record of grades that is balanced between mathematics courses and difficult courses. Applicants must also meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Doctor of Philosophy**

Admission to the Ph.D. program is competitive and based on a combination of undergraduate or graduate course work and grades, letters of recommendation, and test scores. Required scores on the GRE quantitative section and TOEFL are the same as those for admission to the M.S. program, but applicants to the Ph.D. program must have an undergraduate or graduate g.p.a. of at least 3.40.

**Courses**

Courses numbered below 3000 are not open to graduate students.

**Pre-Lower Level Undergraduate**

Credit earned in MATH:0100 Basic Algebra I and MATH:0300 Basic Geometry does not count toward graduation.

**MATH:0300 Basic Geometry** 3 s.h.

Angles, triangles, polygons, areas, Pythagorean theorem, similar triangles, circles, loci, related topics. Offered spring semesters. Requirements: grade of C- or higher in MATH:0100 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Geometry - Developmental.

**Lower-Level Undergraduate**

The sequences MATH:1850 Calculus I and MATH:1860 Calculus II, and MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus are similar, but they cover the material in a different order and with different emphases. Students who have taken the first semester or one sequence must consult with their advisor before taking the second semester of the other sequence; they also must take a math placement test.

Students who consider taking MATH:1860 Calculus II after MATH:1380 Calculus and Matrix Algebra for Business or MATH:1460 Calculus for the Biological Sciences must consult with their advisor.

**MATH:1000 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**MATH:1005 College Algebra** 4 s.h.

Algebraic techniques, equations and inequalities, functions and graphs, exponential and logarithmic functions, systems of equations and inequalities. Requirements: grade of C- or higher in MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course.

**MATH:1010 Trigonometry** 3 s.h.

Trigonometric functions, solutions of right and oblique triangles, complex numbers. Requirements: grade of C- or higher in MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course.

**MATH:1020 Elementary Functions** 4 s.h.

Functions, relations, coordinate systems; properties and graphs of algebraic, trigonometric, logarithmic, exponential functions; inverse trigonometric functions; properties of lines, conic sections. Requirements: grade of C- or higher in MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.
MATH:1120 Logic of Arithmetic  4 s.h.
Mathematical and conceptual foundations of the natural numbers used in elementary school arithmetic teaching; multiple algorithmic approaches to arithmetic and its mathematical and contextual relationships, extensions to integers, rational and irrational numbers, multiple representations. Requirements: grade of C- or higher in MATH:1020 or a more advanced math course, or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1130 Theory of Arithmetic  3 s.h.
Sets, cardinalities, reasoning in proofs, counterexamples, arithmetic with integers, rationals, irrationals, number theory, functions, algebraic expressions. Requirements: grade of C- or higher in MATH:1020 or a more advanced math course, or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1140 Mathematical Basis of Elementary Geometry  3 s.h.
Points, lines, planes; measurement, two- and three-dimensional coordinate geometry, transformational geometry and vectors; applications of geometry to solve real-world problems. Requirements: (elementary teacher certificate candidacy or certification) and (grade of C- or higher in MATH:0100 or satisfactory score on math placement exam). Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1240 Finite Mathematics  4 s.h.
Introduction to logic, set theory, linear equations and inequalities, linear programming, matrix algebra, combinatorial probability. Requirements: MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1340 Mathematics for Business  4 s.h.
Algebraic techniques, functions and functional models, exponential and logarithmic functions and models, linear programming, informal introduction to calculus; examples and applications from management, economic sciences, related areas. Requirements: grade of C- or higher in MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1380 Calculus and Matrix Algebra for Business  4 s.h.
Quantitative methods for treating problems arising in management, economic sciences, related areas; introduction to differential and integral calculus, systems of linear equations and matrix operations. Requirements: grade of C- in MATH:1005 or MATH:1340, or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1440 Mathematics for the Biological Sciences  4 s.h.
Relations, functions, coordinate systems, graphing, polynomials, trigonometric functions, logarithmic and exponential functions; discrete mathematics, probability; examples and applications from biological sciences. Requirements: grade of C- or higher in MATH:1005 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1460 Calculus for the Biological Sciences  4 s.h.
Differential, integral calculus; differential equations, multivariable calculus; applications to life sciences. Requirements: grade of C- or higher in MATH:1440 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1550 Engineering Mathematics I: Single Variable Calculus  4 s.h.
Limits, derivatives, max/min, other applications, mean-value theorem, approximating functions, concavity, curve sketching, exponential models; Riemann sums, fundamental theorem; integration techniques, improper integrals, approximations. Requirements: grade of C- or higher in MATH:1020, or grades of C- or higher in MATH:1005 and MATH:1010, or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1560 Engineering Mathematics II: Multivariable Calculus  4 s.h.
Vector geometry; functions of several variables; polar coordinates; partial derivatives, gradients, directional derivatives; tangent lines and planes; max/min/parametric curves, curvilinear motion; multiple integrals; vector fields, flows; integration on curves, work; divergence, flux, Green's theorem. Requirements: grade of C- or higher in MATH:1550, or score of 4 or higher on AP Calc (AB) exam, or score of 3 or higher on AP Calc (BC) exam.
MATH:1850 Calculus I 4 s.h.
Fundamental concepts, limits, methods, and techniques of differential calculus of a single variable; definite and indefinite integrals, substitution rule, fundamental theorem of calculus; applications including graphing, extreme values, areas, and volumes. Requirements: grade of C- or higher in MATH:1020, or grades of C- or higher in MATH:1005 and MATH:1010, or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course. GE: Quantitative or Formal Reasoning.

MATH:1860 Calculus II 4 s.h.
Techniques of integration including by-parts, trigonometric Integrals, trigonometric substitutions, partial fractions, improper integrals; applications (i.e., arclength), area surfaces of revolutions, application to physics; introduction to differential equations; parametric equations and polar coordinates; infinite sequences and series, convergence tests, power series, Taylor polynomials and series. Requirements: grade of C- or higher in MATH:1850 or satisfactory score on math placement exam. Recommendations: it is strongly recommended that students whose math placement score is older than one year retake the math placement test for accurate placement and success in the course.

Core Undergraduate

Graduate students in mathematics must have departmental approval to earn credit for any of the courses listed below numbered 3000 or above, except MATH:3995 Topics in Mathematics. Graduate students in other disciplines may earn credit for any course numbered 3000 or above.

MATH:2150 Foundations of Geometry 3 s.h.
Axiomatic development of common foundation for Euclidean, non-Euclidean geometry; constructions of non-Euclidean models, independence of parallel postulate. Prerequisites: MATH:1860.

MATH:2550 Engineering Mathematics III: Matrix Algebra 2 s.h.
Applications, computers for matrix calculations; matrix, vector arithmetic; linear independence, basis, subspace (in R2, R3); systems of equations, matrix reduction; rank, dimension; determinants; applications; eigenvalues, eigenvectors; diagonalization, principal axis theorem. Prerequisites: MATH:1550.

MATH:2560 Engineering Mathematics IV: Differential Equations 3 s.h.
Ordinary differential equations and applications, with integrated use of computing, student projects; first-order equations; higher order linear equations; systems of linear equations, Laplace transforms; introduction to nonlinear equations and systems, phase plane, stability. Prerequisites: MATH:1560 and MATH:2550.

MATH:2700 Introduction to Linear Algebra 4 s.h.
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row echelon form, dimension, rank, determinants, eigenvalues and eigenvectors. Prerequisites: MATH:1550 or MATH:1850.

MATH:2850 Calculus III 4 s.h.
Multivariable calculus; vector functions, line integrals, total differentials, gradient, implicit functions, coordinate systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes' theorem. Requirements: grade of C- or higher in MATH:1860.

MATH:2995 Introduction to Research Opportunities 1 s.h.
Modern mathematics research areas and activities; seminar. Prerequisites: MATH:1860 and MATH:2700.

MATH:3550 Engineering Mathematics V: Vector Calculus 3 s.h.
Partial derivatives, max-min problems, integrals along curves, surfaces and solids, vector fields and conservation of energy; curl, divergence, Stokes' theorem and the divergence theorem; the classical partial differential equations and qualitative behavior of their solutions. Prerequisites: MATH:1560 and MATH:2550. Corequisites: MATH:2560.

MATH:3600 Introduction to Ordinary Differential Equations 2-3 s.h.
First-order ordinary differential equations; second-order linear differential equations; series solutions; higher-order linear and matrix differential equations; existence and uniqueness theorems. Prerequisites: MATH:2700 and MATH:2850.

MATH:3700 Introduction to Matrix Theory 3 s.h.
Vector algebra and geometry of three-dimensional Euclidean space and extensions to n-space and vector spaces; lines and planes, matrices, linear transformations, systems of linear equations, reduction to row-echelon form, dimension, rank, determinants, eigenvalues, eigenvectors. Requirements: graduate standing.

MATH:3720 Introduction to Abstract Algebra I 4 s.h.
Basic logic, proof methods, sets, functions, relations, mathematical induction; gradual transition from familiar number systems to abstract structures—division algorithm, unique factorization theorems; groups, subgroups, quotient groups, homomorphisms. Prerequisites: MATH:2700.

MATH:3750 Classical Analysis 3 s.h.
Multivariable calculus, vector functions, line integral, total differentials, gradient, implicit functions, coordinate systems, Taylor's expansion, extrema, multiple integrals, vector fields, surface integrals, Stokes' theorem. Requirements: graduate standing and one year of calculus.

MATH:3770 Fundamental Properties of Spaces and Functions I 4 s.h.
Elementary topological and analytic properties of real numbers; emphasis on ability to handle definitions, theorems, proofs. Corequisites: MATH:2700. Requirements: second-semester calculus.

MATH:3800 Elementary Numerical Analysis 3 s.h.
Computer arithmetic, root finding, polynomial approximation, numerical integration, systems of linear equations, ordinary differential equations; use of higher-level computer language such as Matlab, Maple, Mathematica. Prerequisites: MATH:1860 or MATH:1860. Same as CS:3700.

MATH:3900 Introduction to Mathematics Research 3 s.h.
Research experience; students study an elementary topic of active research, then work in groups under faculty supervision. Prerequisites: MATH:1860 and MATH:2700.

MATH:3995 Topics in Mathematics 3 s.h.
Varied topics. Recommendations: junior, senior, or graduate standing in mathematics, classics, or related fields.

MATH:3996 Individual Study and Honors in Mathematics arr.

MATH:3997 Readings in Mathematics arr.

Upper-Level Undergraduate

Graduate students in mathematics may not earn credit for MATH:4010 Basic Analysis and MATH:4020 Basic Abstract Algebra.

MATH:4010 Basic Analysis 3 s.h.
Elementary topological and analytical properties of real numbers; emphasis on ability to handle definitions, theorems, proofs; same material as MATH:3770 for non-mathematics graduate students. Requirements: graduate standing, one year of calculus, and one semester of linear algebra.

MATH:4020 Basic Abstract Algebra 3 s.h.
Basic logic, proof methods, sets, functions, relations, mathematical induction; gradual transition from familiar number systems to abstract structures (division algorithm, unique factorization theorems); groups, subgroups, quotient groups, homomorphisms; same material as MATH:3720; for non-mathematics graduate students. Requirements: graduate standing, one year of calculus, and one semester of linear algebra.

MATH:4040 Matrix Theory 3 s.h.
Vector spaces, linear transformations, matrices, equivalence of matrices, eigenvalues and eigenvectors, canonical forms, similarity, orthogonal transformations, bilinear and quadratic forms. Prerequisites: MATH:2700 or MATH:3700.

MATH:4050 Introduction to Discrete Mathematics 3 s.h.
Basic methods of enumerative combinatorics, inclusion-exclusion and generating functions, applications of group theory (Polya-Burnside theorem). Offered fall semesters. Prerequisites: MATH:1860 and MATH:2700.

MATH:4060 Discrete Mathematical Models 3 s.h.
Basic combinatorics and graph theory, their applications (which may include scheduling, matching, optimization); Eulerian and Hamiltonian paths, spanning trees. Offered spring semesters. Prerequisites: MATH:2700.

MATH:4080 Elementary Theory of Numbers 3 s.h.
Factorization, congruence, Diophantine equations, law of quadratic reciprocity. Prerequisites: MATH:1860 and MATH:2700.

MATH:4090 A Rigorous Introduction to Abstract Algebra 4 s.h.
Rigorous review of groups including homomorphisms and quotient groups; group actions; Sylow's theorems; rigorous review of rings; ideals, ring homomorphisms, quotient rings; polynomial rings; vector spaces and linear transformations; basic field theory; serves as a bridge between MATH:3720 and MATH:5000. Requirements: MATH:3720 or graduate standing.

MATH:4120 History of Mathematics 3 s.h.
May include numerical systems; Babylonian, Egyptian, and Greek mathematics; mathematics of other cultures; calculus; 19th- and 20th-century mathematics. Requirements: two semesters of calculus and one semester of linear algebra.

MATH:4200 Complex Variables 3 s.h.
Geometry of complex plane, analytic functions; Cauchy-Goursat theorem, applications; Laurent series, residues, elementary conformal mapping. Prerequisites: MATH:2850 or MATH:3750.

MATH:4210 Foundations of Analysis 4 s.h.
Introduction to fundamental ideas of analysis; emphasis on understanding and constructing definitions, theorems, and proofs; real and complex numbers, set theory in metric spaces, compactness and connectedness, sequences, Cauchy sequences, series, and continuity; elements of differential and integral calculus; sequences and series of functions; modes of convergence; equicontinuity; serves as a bridge between MATH:3770 and MATH:5200. Requirements: MATH:3770 or graduate standing.

MATH:4250 Introduction to Financial Mathematics 2-3 s.h.
Financial mathematics; option pricing and portfolio optimization, stochastic integration, methods due to Ito and Feynman-Kac, Monte-Carlo simulation. Prerequisites: MATH:2850 or STAT:3120.

MATH:4500 Introduction to Differential Geometry I 3 s.h.
Space curves, Frenet frames, intrinsic and extrinsic geometry of surfaces, first and second fundamental forms, isometries, Gauss map, Gaussian curvature, Theorema Egregium, geodesics, covariant differentiation; may include global theory of curves and Gauss-bonnet theorem. Prerequisites: (MATH:2850 and MATH:3770) or MATH:3600.

MATH:4510 Introduction to Differential Geometry II 3 s.h.
Continuation of MATH:4500; geometry of surfaces in Euclidean space, Gauss-Bonnet theorem and its applications, minimal surfaces, abstract surfaces; may include Riemannian manifolds, connections, elementary Lie groups, applications of differential geometry to other disciplines (physics, engineering). Prerequisites: MATH:4500.

MATH:4610 Continuous Mathematical Models 3 s.h.
Building and analyzing mathematical models involving differential equations for specific problems from engineering and the sciences; modeling project. Prerequisites: MATH:3600.

MATH:4740 Large Data Analysis 3 s.h.
Current areas that deal with problem of Big Data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: CS:1210 and MATH:2700 and (STAT:2010 or STAT:2020). Same as CS:4740, STAT:4740.

MATH:4820 Optimization Techniques 3 s.h.
Basic theory of optimization, use of numerical algorithms in solution of optimization problems; linear and nonlinear programming, sensitivity analysis, convexity, optimal control theory, dynamic programming, calculus of variations. Prerequisites: MATH:2700 and MATH:2850 and MATH:3800. Same as CS:4720.

MATH:4860 High Performance and Parallel Computing 3 s.h.
Parallel scientific computing methods such as parallel algorithms for dense and sparse matrices; implementation using libraries such as MPI; current topics such as grid computing. Prerequisites: CS:2630 and MATH:2700. Same as CS:4700.

MATH:5000 Abstract Algebra I 4 s.h.
Groups and homomorphisms, Sylow Theorems, rings, finitely generated modules over a PID, Galois theory, vector spaces, linear transformations and matrices, canonical forms. Prerequisites: MATH:3720.

MATH:5010 Abstract Algebra II 4 s.h.
Continuation of MATH:5000. Prerequisites: MATH:5000.

MATH:5200 Introduction to Analysis I 4 s.h.
Real numbers, fundamentals of limits and continuity in the context of metric spaces; Lebesque theory of functions of one real variable. Requirements: MATH:3770 or graduate standing.

MATH:5210 Introduction to Analysis II 4 s.h.
Local theory of analytic functions of one complex variable, power series, classical transcendental functions; spaces of functions. Prerequisites: MATH:5200.

MATH:5400 General Topology 4 s.h.
Basic concepts of general topological spaces and continuous functions; countability of sets, topological space, comparing topologies; subspace, order, and product topologies; closed sets and limit points, continuous functions, metric topology, quotient topology (including projective spaces and gluing cells), connectedness in the real line and in general spaces, components and local connectedness, compactness in Euclidean and general spaces, limit point compactness, local compactness, countability axioms, separation axioms, normal spaces and Urysohn’s Lemma, complete metric spaces, convergence in function spaces. Prerequisites: MATH:3770.

MATH:5410 Introduction to Smooth Manifolds 4 s.h.
Calculus on smooth manifolds; smooth functions, mean value theorem, chain rule, smooth manifolds, tangent vectors, tangent spaces, inverse and implicit functions theorems, submersions and immersions, vector fields, flows, nonlinear algebra, differential forms, Stokes theorem. Prerequisites: MATH:2700 and MATH:2850 and MATH:5400.

MATH:5500 Nonlinear Dynamics with Numerical Methods 4 s.h.
Nonlinear differential equations, one- and two-dimensional flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, fractals; Euler’s, multistep, and Runge-Kutta numerical methods. Prerequisites: MATH:3600 and MATH:3770.

MATH:5700 Partial Differential Equations with Numerical Methods 4 s.h.
Conservation laws, weak solutions, diffusion equation, Laplace’s equation, finite difference methods, variational methods, finite element method. Prerequisites: MATH:2850 and MATH:3600 and MATH:3770.

MATH:5800 Numerical Analysis: Nonlinear Equations and Approximation Theory 4 s.h.
Root finding for nonlinear equations; polynomial interpolation; polynomial approximation of functions; numerical integration. Prerequisites: (MATH:2700 and MATH:2850) or MATH:3550. Requirements: knowledge of computer programming. Same as CS:5710.

MATH:5810 Numerical Analysis: Differential Equations and Linear Algebra 4 s.h.
Numerical methods for initial value problems for ordinary differential equations; direct and iterative methods for linear systems of equations; eigenvalue problems for matrices. Prerequisites: (MATH:2700 and MATH:2850) or (MATH:3550) and MATH:3600. Requirements: knowledge of computer programming. Same as CS:5720.

MATH:5900 First-Year Graduate Seminar 1 s.h.
Introduction to mathematics graduate program. Requirements: first-year graduate standing in mathematics.

MATH:5950 Qualifying Exam Preparation Seminars 0 s.h.
Exam preparation in pure and applied mathematics.
Graduate

MATH:6000 Introduction to Algebra I  3 s.h.
Abstract algebra: semigroups, groups, rings, integral domains, polynomial rings, division rings, fields, vector spaces, matrices, modules over rings, lattices, categories. Prerequisites: MATH:5000.

MATH:6010 Introduction to Algebra II  3 s.h.
Continuation of MATH:6000. Prerequisites: MATH:6000.

MATH:6200 Analysis I  3 s.h.
Lebesgue measure and integral, fundamental theorem of calculus, abstract measures and integration, Fubini's theorem, Radon-Nikodym theorem, Riesz representation theorem, L-p spaces. Prerequisites: MATH:5210.

MATH:6210 Analysis II  3 s.h.
Hilbert space, Banach space techniques; Hahn-Banach theorem, open mapping theorem, principle of uniform boundedness; reflexivity, H-p spaces, Paley-Wiener theorem, space of functions analytic on the open unit disk. Prerequisites: MATH:4200 and MATH:6200.

MATH:6400 Introduction to Algebraic Topology  3 s.h.
Homotopy, fundamental group and covering spaces, CW and simplicial complexes, simplicial homology, Euler characteristic. Prerequisites: MATH:5400.

MATH:6410 Introduction to Differential Topology  3 s.h.
Manifolds, functions: tangent bundle, Morse-Sard theorem, transversality, submanifolds, tubular neighborhoods, normal bundles, vector fields, degree and intersection theory, fixed-point theory, Morse theory. Prerequisites: MATH:5410.

MATH:6500 Differential Geometry I  3 s.h.
Differentiable manifolds, forms, tensors, Riemannian metrics, isometries, connections, geodesics, curvature, related topics.

MATH:6510 Differential Geometry II  3 s.h.
Continuation of MATH:6500; varied topics, may include study of existence and uniqueness of solutions to differential equations and systems related to geometry, indefinite metrics, Lie groups, attributes of manifolds with particular curvature properties, global Riemannian geometry, Kahler geometry, applications of differential geometry to other disciplines. Prerequisites: MATH:6500.

MATH:6600 Ordinary Differential Equations I  3 s.h.
Existence, uniqueness, continuous dependence of solutions to initial value problems, variational calculus, Lagrangian and Hamiltonian systems, differential inequalities, perturbation theory, normal forms, invariant manifolds, KAM theory, bifurcation theory, boundary value problems. Prerequisites: MATH:5210.

MATH:6610 Ordinary Differential Equations II  3 s.h.
Continuation of MATH:6600. Prerequisites: MATH:6600.

MATH:6700 Partial Differential Equations I  3 s.h.
Elliptic equations; potential theory, maximum principle, a priori estimate, Dirichlet problem; initial value problem for parabolic equations; hyperbolic equations; Duhamel's principle, Cauchy problem; nonlinear equations, characteristics, canonical form, first-order systems. Prerequisites: MATH:5210.

MATH:6710 Partial Differential Equations II  3 s.h.
Continuation of MATH:6700. Prerequisites: MATH:6700.

MATH:6850 Theoretical Numerical Analysis I  3 s.h.
Theoretical foundations of numerical analysis, within framework of functional analysis; application areas including approximation theory, numerical methods for partial differential equations, integral equations, introduction to functional analysis. Prerequisites: MATH:5200 and MATH:5210 and MATH:5800 and MATH:5810.

MATH:6860 Theoretical Numerical Analysis II  3 s.h.
Continuation of MATH:6850. Prerequisites: MATH:6850.

Advanced Graduate

MATH:7000 Homological Algebra  2-3 s.h.
Modules, tensor products, groups of homomorphisms, categories, functors, homology functors, projective and injective modules, derived functors, torsion and extension functors, homological dimension. Prerequisites: MATH:6010.

MATH:7030 Topics in Algebra  2-3 s.h.
May include algebraic number theory, groups, representation theory, algebras, ideal theory, lattice theory. Prerequisites: MATH:6010.

MATH:7070 Seminar: Algebra  arr.

MATH:7080 Seminar: Commutative Ring Theory  arr.

MATH:7090 Seminar: Representation Theory  arr.

MATH:7200 Functional Analysis I  2-3 s.h.
Locally convex topological vector spaces, duality, tensor products and nuclear spaces; Krein-Milman theorem, Choquet's theorem, geometry of Banach spaces, nonlinear functional analysis; operators on Hilbert spaces, spectral theory, algebras of operators. Prerequisites: MATH:6210.

MATH:7210 Functional Analysis II  2-3 s.h.
Continuation of MATH:7200. Prerequisites: MATH:7200.

MATH:7250 Topics in Analysis  2-3 s.h.
Measure theory, integration, general topology.

MATH:7400 Topology of Manifolds  3 s.h.
Embedding, knotting, immersions; isotopy, homotopy, regular neighborhoods, engulfing, surgery, cobardism; three-, four-, and higher dimensional manifolds.  
Prerequisites: MATH:6400 and MATH:6410.

MATH:7450 Topics in Topology  2-3 s.h.
May include homotopy theory, topology of 3-manifolds, 4-manifolds, or higher-dimensional manifolds, knotting and embedding problems, fiber bundles and characteristic classes, K-theory, PL manifolds, infinite-dimensional manifolds.

MATH:7470 Seminar: Topology  arr.

MATH:7580 Seminar: Mathematical Physics  arr.

MATH:7630 Topics in Mathematical Biology  2-3 s.h.
Application of mathematics to biology.

MATH:7660 Seminar: Nonlinear Dynamics and Differential Equations  arr.

MATH:7670 Seminar: Mathematical Biology  arr.

MATH:7730 Topics in Partial Differential Equations  2-3 s.h.
Regularity theory, nonlinear analysis in partial differential equations, fluid dynamics, harmonic analysis, conservation laws, other topics.

MATH:7830 Topics in Applied Mathematics  arr.
Application of mathematics to other disciplines.

MATH:7870 Seminar: Numerical Analysis  arr.

MATH:7990 Reading Research  arr.
Medieval Studies

Chair
- John Finamore (Classics)

Coordinator
- Michael E. Moore (History)

Undergraduate certificate: medieval studies
Web site: http://clas.uiowa.edu/classics/undergraduate-program/medieval-studies-program

The Medieval Studies Program offers an undergraduate program of study and a selection of courses open to students in all majors.

Undergraduate Program of Study

• Certificate in Medieval Studies

Certificate

The Certificate in Medieval Studies requires a minimum of 21 s.h. in medieval studies course work. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The program enables students to combine study in three or more disciplines into an organized investigation of the Middle Ages, a rich historical period that continues to influence today's culture. Students may earn the Certificate in Medieval Studies as a distinct interest or combine it with focused study in areas such as art history; classics; comparative literature; gender, women's, and sexuality studies; languages (e.g., French, German, Italian, Portuguese, Spanish); music; philosophy; religion; and theater.

Students must include courses from at least three different departments in their work for the certificate; they may count a maximum of 10 s.h. from a single department or program. Courses used to fulfill General Education Program (p. 313) requirements or the requirements of a major or minor may be counted toward the certificate in most cases. Up to 6 s.h. of transfer credit may be counted toward certificate requirements, with the Certificate in Medieval Studies coordinating committee's approval; contact the certificate program's coordinator.

All certificate students must complete one of the following two courses and should do so early in their program of study.

MDVL:3409 Medieval Civilization I 3 s.h.
MDVL:3410 Medieval Civilization II 3 s.h.

Remaining courses may be chosen from the lists under "Associated Courses" and "Courses" below. Students should consult regularly with a medieval studies advisor while planning and completing their program of study.

The Medieval Studies Program strongly encourages students to complete course work in a language relevant to the medieval period. Latin is recommended for anyone intending to pursue graduate study in the field. Many language courses have prerequisites, and some are offered irregularly, so students should complete their language course work as early as possible. The following language courses are approved for the medieval studies certificate.

ENGL:3256 Elementary Old English 3 s.h.
RELS:4001-RELS:4002 Biblical Hebrew I-II 8 s.h.

Sample Study Plans

Both of these sample study plans fulfill the certificate's requirements.

Sample plan for a student planning graduate work in medieval studies:

MDVL:3226/ENGL:3226 Literature and Culture of the Middle Ages 3 s.h.
MDVL:3410/HIST:3410 Medieval Civilization II 3 s.h.
ARTH:2420 Introduction to Medieval Art 3 s.h.
CLSL:2001 World of Cicero 3 s.h.
CLSL:2002 Golden Age of Roman Poetry 3 s.h.
HIST:4418 Medieval Intellectual History 3 s.h.
1150-1500
RELS:1225 Medieval Religion and Culture 3 s.h.

Sample plan for a student with a general interest in medieval studies:

MDVL:3409 Medieval Civilization I 3 s.h.
ENGL:3256 Elementary Old English 3 s.h.
ENGL:3286 Chaucer 3 s.h.
HIST:4412 History of the Medieval Church 3 s.h.
HIST:4426 Women, Power, and Society in Medieval Europe 3 s.h.
MUS:2301 History of Music I 3 s.h.
SPAN:3700 The Cid in History and Legend 3 s.h.

Associated Courses

The following courses are approved for the medieval studies certificate. Other courses may be approved for satisfaction of certificate requirements; students who wish to have a course approved should make a request to the Certificate in Medieval Studies coordinating committee. The coordinating committee revises the list of approved courses as necessary.

ARABIC LANGUAGE AND LITERATURE

ARAB:2001 Intermediate Modern Standard Arabic I 5 s.h.
ARAB:2002 Intermediate Modern Standard Arabic II 5 s.h.

ART AND ART HISTORY

ARTH:2420 Introduction to Medieval Art 3 s.h.
ARTH:3391 Themes in Medieval Art 3 s.h.
ARTH:3990 Topics in Art History (when topic is medieval) 3 s.h.

CENTER FOR THE BOOK

UICB:4910/HIST:4910 The Book in the Middle Ages 3 s.h.
Courses

MDVL:3226 Literature and Culture of the Middle Ages
3 s.h.

English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3226.

MDVL:3409 Medieval Civilization I
3 s.h.
Europe from the decline of Roman empire to the eleventh century; cultural, political, economic, artistic and architectural foundations of Western civilization. Same as HIST:3409.

MDVL:3410 Medieval Civilization II
3 s.h.
Europe from the eleventh century to the Italian Renaissance; cultural, political, economic, artistic, and architectural foundations of Western civilization. GE: Historical Perspectives. Same as HIST:3410.

MDVL:4408 The Twelfth-Century Renaissance
3 s.h.
Social, economic, intellectual, and cultural rebirth of Europe in the 12th century; Latin learning and education; developments in vernacular literature, art, architecture, new religious orders and institutions, pilgrimage and Crusade. Same as HIST:4408.

MDVL:4411 Economic and Social History of Medieval Europe
3 s.h.
Changes in western Europe from 300 to 1500 A.D.; feudalism, manorialism, revival of towns, heresy, women, monasticism, agricultural and commercial revolutions, Black Death. GE: Historical Perspectives. Same as HIST:4411.

MDVL:4412 History of the Medieval Church
3 s.h.
Development of Christianity to end of great schism; rise of Roman primacy, development of monasticism, orthodox and heterodox groups. GE: Historical Perspectives. Same as HIST:4412.

MDVL:4417 Medieval Intellectual History
3 s.h.
300-1150
Philosophy, art, literature, religious culture of Europe from waning of classical intellectual modes of culture in late antiquity, to their recovery in 12th century. Same as HIST:4417.

RELIGIOUS STUDIES

RELS:1225 Medieval Religion and Culture
3 s.h.

SPANISH AND PORTUGUESE

SPAN:3700 The Cid in History and Legend
3 s.h.

THEATRE ARTS

THTR:3276/ENGL:3276 Medieval Drama
3 s.h.
European philosophy, religion, literature, art from 12th-century rise of scholasticism; their transformation in period of Copernicus, Luther. Same as HIST:4418.

**MDVL:4419 Ancient and Medieval Science** 3 s.h.
Greeks' initiation of scientific inquiry; developments in astronomy, cosmology, optics, mathematics, physics, medicine, psychology in ancient and medieval societies of Middle East, Europe. Same as HIST:4419.

**MDVL:4421 The Middle Ages in Film** 3 s.h.
How films that represent medieval events and literature may be analyzed to reveal the culture and times in which the films were made; Middle Ages and European nationalistic mythmaking as represented in film. Same as HIST:4421.

**MDVL:4423 Ireland in the Early Middle Ages** 3 s.h.
Ireland and the northern British islands 400-1000 C.E., a region of small kingdoms and thin population, lacking natural resources, far from Rome and ancient centers of Mediterranean culture; development of civilization, including monastic, legal, theological, and scholarly traditions that had a major impact on continental Europe; early medieval Irish history; introduction to the world of historical scholarship. Same as HIST:4423.

**MDVL:4426 Women, Power, and Society in Medieval Europe** 3 s.h.
Same as HIST:4426.
Museum Studies

Chair, Department of Anthropology
• James Enloe (Anthropology)

Coordinator, Museum Studies
• Russell Ciochon (Anthropology/Pediatric Dentistry)

Undergraduate certificate: museum studies
Faculty: http://www.uiowa.edu/~mstudies/MSContact.htm
Web site: http://www.uiowa.edu/~mstudies/

Museum studies has a long history at the University of Iowa, with courses offered continuously since 1910. Iowa’s museum studies students have become directors, curators, educators, and exhibit specialists in museums throughout the country.

Museums embrace every aspect of human experience. Iowa’s Museum Studies Program reflects this multiplicity, offering courses related to many fields, including American studies, anthropology and archaeology, art, biology, business, communication studies, earth and environmental sciences, elementary and secondary education, English, world languages, history, and library and information science.

Instructors for museum studies courses reflect the program’s interdisciplinary nature. They include faculty members from anthropology, art and art history, business, history, law, library and information science, and other related fields. The University archivist for University of Iowa Libraries is an affiliated faculty member of the Museum Studies Program, as are the collections management specialists for the University’s Museum of Art, Museum of Natural History, and Old Capitol Museum.

The Museum Studies Program is administered by the Department of Anthropology (p. 55).

Undergraduate Program of Study

• Certificate in Museum Studies

College of Liberal Arts and Sciences students who are interested in museum studies may earn the certificate, or they may use the individualized plan of study track in the interdepartmental studies major to create a museum studies concentration relevant to their academic and professional interests.

Certificate

The Certificate in Museum Studies requires 18 s.h. The program provides a broad foundation of knowledge increasingly valued in the museum field.

The certificate is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program.

Museum studies courses introduce students to the spectrum of museum endeavors, from organization and mission planning to institutional histories and current developments in the field. Most courses developed by the program offer hands-on experience in exhibition planning and design, collection management, educational programming, community development, and administration.

A major in one of the natural sciences (e.g., biology, geoscience), anthropology, science education, art history, American studies, or history is recommended for students preparing for museum careers.

Students may count a maximum of 6 s.h. completed for a major, a minor, or another certificate offered by the College of Liberal Arts and Sciences toward the Certificate in Museum Studies.

Work for the certificate consists of an introductory course, a minimum of four courses on specific museum studies topics, and an internship. Students must request permission from the coordinator of the museum studies certificate to use courses that are not included in the program, and the proposed course content and requirements must fit into one of the program’s defined areas.

Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The Certificate in Museum Studies requires the following course work.

INTRODUCTORY COURSE

Students should begin the certificate with MUSM:3001 Introduction to Museum Studies, which is prerequisite to some of the program’s more advanced courses and is approved for the Social Sciences area of the General Education Program. The course provides a historical overview of museum development and function while introducing students to issues such as museum governance and financing, ethics and law, collection management, exhibition and educational programming, interpretation, and audience research.

MUSM:3001 Introduction to Museum Studies 3 s.h.

MUSEUM STUDIES TOPIC AREAS

Students complete a minimum of four courses in museum studies topic areas, choosing from the lists below. The areas are collection care and management; exhibition development and public education; history, theory, and culture; and museum administration and management. Students must select one course each from three of the four topic areas (9 s.h. total). They also must complete a fourth course (3 s.h.) from any of the four topic areas.

Collection Care and Management

The Certificate in Museum Studies also requires the following experiences:

• Washington, D.C. Tour
• Professional Reflection Paper

Students are encouraged to participate in museum events, field trips, and local and national museum studies organizations.
Museum Administration and Management

MUSM:3080 Marketing, Promoting, Politicking 3 s.h.
MUSM:3100 Historic House Management and Preservation 3 s.h.
MUSM:3500 Nonprofit Organizational Effectiveness I 3 s.h.
MUSM:4150 Introduction to Grant Writing 3 s.h.

MUSEUM STUDIES INTERNSHIP

After completing at least 12 s.h. of the required coursework above, students must complete the following internship, earning a minimum of 3 s.h.

MUSM:4080 Museum Internship arr.

The Certificate in Museum Studies coordinator works closely with students and affiliated faculty members to ensure that the internship provides students with the instruction and experience they need.

Facilities and Resources

Museum studies students have access to a wide variety of museums and related resources, including the following University of Iowa museums: the Museum of Natural History, the Museum of Art, the Old Capitol Museum, the Medical Museum, and the Athletics Hall of Fame.

The Museum Studies Program maintains close connections with a number of local, community-based museums and organizations, including the State Historical Society of Iowa, the Herbert Hoover Presidential Library and Museum, the African American Museum of Iowa, the Iowa Children’s Museum, and the Johnson County Historical Society.

The University of Iowa Collections Coalition, consisting of 19 collections and collection-support organizations, is an essential resource for the Museum Studies Program. It provides museum studies internships, directed study projects, opportunities for site visits, and volunteer experiences for students as well as guest speakers.

Courses

Introduction

MUSM:3001 Introduction to Museum Studies 3 s.h.

Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum.

Collection Care and Management

MUSM:3003 Natural History Research Collections 3 s.h.

Techniques, methods, and issues specific to natural history research collections; practice in preparing and cleaning specimens; role of natural history specimens in modern scientific research. Recommendations: basic understanding of the diversity of plants and animals and natural history museum collections, MUSM:3001 or MUSM:3200, and BIOL:1411 or BIOL:1412; or other experience.

MUSM:3090 Topics in Museum Studies 1 s.h.

Systematic and analytic methods used for research in physical collections; tutorials in collection building, curation, and preservation; designed by members of the University of Iowa Collections Coalition. Same as EES:3090.

MUSM:3200 Collection Care and Management 3 s.h.

How a museum’s management policy relates to its administrative, legal, and ethical obligations to its collections; acquisitions, deaccessions, collection use, data standards, storage environment, health, safety, documentation. Same as EES:3200.

MUSM:4200 Advanced Collection Care and Management 3 s.h.

Builds on MUSM:3200: types and materials of museum objects and their care; storage and preservation of paper, books, photographs, works of art, electronic media, textiles, furniture, archaeological artifacts, and natural history specimens; collections project and hands-on practice in preservation techniques, enclosures, and supports; for students planning museum careers or professions that require care of collections. Prerequisites: MUSM:3200 or EES:3200. Same as EES:4200.

Exhibition Development and Public Education

MUSM:3004 Exhibition Planning 3 s.h.

Preliminary work for and process of developing museum exhibitions; history of exhibit design, evaluation, budgets, teams and team member roles, working with community and special interest groups, methods of production and display; students research a topic, choose artifacts and images, and create a narrative and exhibit script. Prerequisites: MUSM:3001.

MUSM:3110 Learning in Museums 3 s.h.

Exploration of the methodology of museum education; institutional objectives that facilitate learning in museum setting; exhibition and program development, didactic materials, and funding strategies. Prerequisites: MUSM:3001. Recommendations: good writing skills. Same as EDTL:3010.

History, Theory, and Culture

MUSM:3120 Natural History Museums: A History 3 s.h.

History of the natural history museum; origin, character, and evolution; anecdotes and personalities; how natural history museums influenced society and their continuing relevance to a technological world. Recommendations: at least one course in museum studies, such as MUSM:3001.
MUSM:3237 Politics of the Archaeological Past 3 s.h.
How control over management of material remains of the ancient past, and representations of that past, intersect with the identity of diverse groups, including archaeologists, indigenous peoples, national governments, collectors, ethnic minorities and majorities, museum curators; struggles for control of the archaeological past at different scales (artifacts, skeletal remains, sites, imagery, narratives) and in different regions of the world. Same as ANTH:3237.

MUSM:4081 The Art Museum: Theory and Practice 3 s.h.
Introduction to different aspects of art museums; emphasis on roles of art historians, especially curatorial practice; current and historical theories and practices of art exhibitions; varying debates of the politics of display; art museum professions; the many facets of art exhibition preparation; the University of Iowa Museum of Art collections. Same as ARTH:4081.

MUSM:4130 Museum Literacy and Historical Memory 3 s.h.
Concepts and methods for understanding the role of museums in shaping knowledge and collective memory of history; institutionally based exhibits and collections, historical markers and public monuments, public holidays and events, media and artistic works that interpret the past; how events, people, and civic ambitions are memorialized and how memories of them are shaped; appearance of museums and related practices in the non-Western world after 1850. Same as HIST:4130.

MUSM:4150 Introduction to Grant Writing 3 s.h.
Comprehensive training in grant proposal writing; basics of project development and management; core principles for writing small and large proposals to public and private funding sources; finer points of grant writing to increase competitiveness of future proposals and applications; for students with limited grant writing experience. Same as EALL:4130.

Directed Studies and Internship
MUSM:4050 Directed Studies and Projects arr.
Advanced readings in historical development, educational philosophy, programs, operations of museums; individual projects coordinated with programs, exhibits, or collections of campus and area museums. Prerequisites: MUSM:3001 or MUSM:3004 or MUSM:3200.

MUSM:4080 Museum Internship arr.
Working experience in functions, departments, programs of the sponsoring museum; relation to museum’s overall mission and museum field in general.

Museum Administration and Management
MUSM:3080 Marketing, Promoting, Politzing Contemporary Public Art 3 s.h.
How public art projects are conceived, created, and paid for; projects sponsored and funded by federal, state, and local governments and private businesses 1960 to present; projects' operational structures, how artists are selected; Vietnam Veterans Memorial, Serra's *Tilted Arc*, recent projects. Same as ARTH:3080.

MUSM:3100 Historic House Management and Preservation 3 s.h.
Management, preservation, interpretation, and basic operations of historic structures and the museums they serve.

MUSM:3500 Nonprofit Organizational Effectiveness I 3 s.h.
Music

**Director, Division of Performing Arts**
- Alan MacVey

**Director, School of Music**
- David Gier

**Director of planning**
- Kristin Thelander

**Associate directors**
- Benjamin Coelho, Christine Getz, Dan Moore

**Undergraduate major:** music (B.A., B.M.)
**Undergraduate minor:** music
**Graduate degrees:** M.A. in music; M.F.A. in music; Ph.D. in music; D.M.A.
**Graduate minor:** theory pedagogy
**Graduate certificate:** sacred music

**Faculty:** [http://music.uiowa.edu/people](http://music.uiowa.edu/people)
**Web site:** [http://music.uiowa.edu/](http://music.uiowa.edu/)

The University of Iowa School of Music is prominent in a fine arts community of international repute. It has long been recognized as one of the excellent university-based music schools in the United States. The school's on-campus enrollment of approximately 470 music majors is large enough to sustain strong programs in all areas of specialization, yet small enough to ensure the individual attention essential to each student's development.

The faculty consists of highly trained artist-teachers in each specialization area and scholars of international distinction. Faculty ensembles in residence include the Iowa Woodwind Quintet and the Iowa Brass Quintet. Private lessons with faculty members are offered in all band and orchestra instruments, voice, piano, and organ.

The school's undergraduate programs offer all qualified students, whether music majors or nonmajors, the opportunity for further study of music. In addition to its comprehensive course offerings for majors, the school provides a substantial selection of courses especially recommended for nonmajors and several approved for the General Education Program (p. 313) (see "Courses for Nonmajors" below).

Graduate programs in music are designed primarily to prepare students for teaching in secondary schools, colleges, and universities and for careers in performance and music therapy.

The School of Music is a charter member of the National Association of Schools of Music. The requirements for entrance and for graduation are in accordance with the association's published standards.

The department is one of three academic units in the Division of Performing Arts (p. 227). It participates in offering the division's Certificate in Performing Arts Entrepreneurship (p. 498).

**Undergraduate Programs of Study**
- Major in music (Bachelor of Arts, Bachelor of Music)
- Minor in music

The Bachelor of Music program offers concentrations in composition, music education, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Professional certification in music education and music therapy are available only through the B.M.

The Bachelor of Arts is a nonprofessional degree for students who are not planning careers as musicians or who plan to earn more than one bachelor's degree or a B.A. with more than one major, including a second major in a performing arts area.

All undergraduate enrollments require School of Music approval. Entering first-year and transfer students who plan to major in music must be accepted into a performance area through audition either in person or by recording before they register. Students who plan to major in composition also must submit examples of creative work; for details, see "Composition Concentration" below. All entering students must complete the online theory diagnostic examination for MUS:1201 Musicianship and Theory I and a piano proficiency exam to determine appropriate placement in related courses.

Transfer students admitted to the School of Music must complete a minimum of one year of applied music (lower- or upper-level) and one year of major ensemble at the University of Iowa in order to earn a degree in music. Transfer students who have not completed the equivalent of the four-semester sequence of Musicianship and Theory I-IV (MUS:1201 Musicianship and Theory I, MUS:1202 Musicianship and Theory II, MUS:2203 Musicianship and Theory III, and MUS:2204 Musicianship and Theory IV) must complete a theory diagnostic exam to determine appropriate placement in the musicianship and theory sequence. Transfer students who have not completed the equivalent of two semesters of class piano or a piano proficiency exam must meet piano proficiency requirements at the University of Iowa.

**Bachelor of Music**

The Bachelor of Music requires a minimum of 120 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The program offers concentrations in composition, music therapy, and performance; a second emphasis in jazz studies may be added to the performance concentration. Bachelor of Music students may not choose guitar as their major instrument, and Bachelor of Arts students may not transfer to the B.M. program with guitar as their major instrument. Students seeking licensure/certification in music education or music therapy should enroll in the B.M. program.

Many students earn more than 120 s.h. in fulfilling the requirements for their majors—for instance, those who choose the music therapy concentration or seek teacher certification. The College of Liberal Arts and Sciences maximum hours rule does not apply to the Bachelor of...
Music, so B.M. students may count more than 56 s.h. of course work in music toward the degree.

The Bachelor of Music requires the following School of Music course work.

**GENERAL COURSE REQUIREMENTS**

All of these:

- MUS:1200 Fundamentals of Music for Majors (or successful completion of the online theory diagnostic examination for MUS:1201) 3 s.h.
- MUS:1201 Musicanship and Theory I 4 s.h.
- MUS:1202 Musicanship and Theory II 4 s.h.
- MUS:1211 Group Instruction in Piano I (or successful completion of proficiency exam I) 1 s.h.
- MUS:1212 Group Instruction in Piano II (or successful completion of proficiency exam II) 1 s.h.
- MUS:2203 Musicanship and Theory III 4 s.h.
- MUS:2204 Musicanship and Theory IV 4 s.h.

To register for MUS:1201, students also must register for MUS:1211 or already have completed that course or have been exempted from it by proficiency exam. To register for MUS:1202, students also must register for MUS:1212 or already have completed that course or have been exempted from it by proficiency exam. Transfer students should complete the group piano requirement during their first year in residence unless they are exempted by proficiency exam.

This course:

- MUS:1210 Recital Attendance (six semesters) 6 s.h.

Six semesters of MUS:1210 are required for all B.M. students, except music therapy students, who are required to take four semesters. Transfer students should plan to enroll in this course each of their remaining semesters, or until the requirement is met.

All of these:

- MUS:2301 History of Music I (western music of the Middle Ages, Renaissance, and Baroque) 3 s.h.
- MUS:2302 History of Music II (western music 1750-present) 3 s.h.
- MUS:3625 Techniques of Conducting 2 s.h.
- MUS:4900 Senior Recital 1 s.h.

To complete the senior recital, students must have achieved upper-level applied status or be enrolled in upper-level applied music courses (see "Applied Music" below). Music therapy students may complete a senior recital or a senior research project. Composition students substitute MUS:4910 Bachelor's Thesis for the senior recital. The senior recital, research project, or thesis must be completed at the University of Iowa.

One of these:

- MUS:1009 Jazz Cultures in America and Abroad 3 s.h.
- MUS:1310 World Music 3 s.h.
- MUS:1720 History of Jazz 3 s.h.
- MUS:2311 Music of Latin America and the Caribbean 3 s.h.

At least 3 s.h. from these:

- MUS:2206 Form and Analysis 3 s.h.
- MUS:3001 Introduction to Improvisation 3 s.h.
- MUS:3220 Instrumentation 2 s.h.
- MUS:3665 Arranging for Band 2 s.h.
- MUS:3710 Intermediate Jazz Improvisation 2 s.h.
- MUS:3750 Jazz Theory 3 s.h.
- MUS:4200 Counterpoint Before 1600 3 s.h.
- MUS:4201 Counterpoint After 1600 3 s.h.
- MUS:4210 Keyboard Harmony 2 s.h.
- MUS:4710 Advanced Jazz Improvisation 2 s.h.
- MUS:4750 Transcription 2 s.h.

**APPLIED MUSIC**

Students must complete four years of applied music. Instruction is provided on two levels, lower and upper. Students must achieve upper-level status before they may present the senior recital. Readiness for upper-level applied music is determined by a jury examination in the area. The eighth semester of applied music may be waived for students who have successfully completed a senior recital, are enrolled in the Teacher Education Program, and are student teaching. Students are allowed a maximum of six semesters (not including summer) in lower-level applied instruction. Those who want to continue lessons beyond the maximum allowable lower-level registration must do so under the nonmajor category.

Composition students are required to take 6 s.h. of lower-level applied music and 2 s.h. of secondary piano.

Music therapy students who complete a senior research project rather than a senior recital are required to take three years of lower-level applied music.

**ENSEMBLE PARTICIPATION**

Students must complete eight semesters of major ensemble participation. They normally enroll in a major ensemble during consecutive semesters, beginning early in their degree work, to ensure timely completion of the requirement. Ensemble assignments are made at the discretion of the major teacher and ensemble director. String students participate in University Orchestra and Chamber Orchestra. Wind and percussion students participate in the Symphony Band/Concert Band/University Band. Voice students participate in Camerata Singers, University Choir, Kantorei, and/or University Chorale. Keyboard students may substitute accompaniment for major ensemble participation for two semesters during their junior and/or senior years, with their major applied-music teacher’s consent. Composition students may, with their advisor’s consent, substitute two semesters of other ensembles during their junior and/or senior year.

Music therapy students who complete a senior research project rather than a senior recital are required to complete 6 s.h. of major ensemble participation.

Any student who wants to request adjustment of the major ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the studio instructor, and the associate director for undergraduate studies.

Major ensembles are as follows:

- MUS:1176 Women's Chorale 1 s.h.
- MUS:3160 Symphony Band/Concert Band 1 s.h.
- MUS:3170 Kantorei 1 s.h.
- MUS:4750 Transcription 2 s.h.
MUS:3172 Camerata Singers 1 s.h.
MUS:3174 University Choir 1 s.h.
MUS:3180 Orchestra 1 s.h.

**ELECTIVES**

Students may take advanced electives in performance (including chamber music and piano accompaniment), theory, composition, music education, music therapy, music history, diverse music cultures, music literature, conducting, and orchestration.

**Performance Concentrations**

A performance concentration is available in each of the orchestral areas—strings, brass, woodwinds, and percussion—and in voice, piano, and organ. Students must take at least an additional 17 s.h. beyond the School of Music general course requirements. This course work includes required courses and electives unique to each performance area. Course listings for each of the respective areas are available from the School of Music office.

**JAZZ STUDIES EMPHASIS**

Students with a performance concentration may add a second emphasis in jazz studies. To be admitted to the jazz studies emphasis, students must audition after they complete their first year. Students admitted to the emphasis are assigned to the jazz studies advisor in addition to their regular faculty advisor.

Senior recital and recital attendance requirements are the same as those for the Bachelor of Music. In addition to satisfying all course requirements for the B.M., jazz studies emphasis students must complete 21 s.h. of jazz course work. Many jazz studies courses fulfill other B.M. course requirements, including music electives.

**Music Therapy Concentration**

Admission to the music therapy concentration is based on successful completion (grade of C-plus or higher) of MUS:1687 Orientation to Music Therapy. Students must earn a B-minus or higher in all remaining music therapy core courses. In addition to the core courses in music therapy listed below, specific courses are required in biology, anatomy, psychology, and music.

A six-month, full time internship in an American Music Therapy Association (AMTA) approved off-campus clinical facility is required for completion of the degree. There are a limited number of approved music therapy internships in the Iowa City area, and many internship placements require relocation to a different city. Students are eligible to begin applying for their internship one year prior to the start of the internship. Securing an internship typically involves completing application materials, interviewing on site or via electronic platform, and demonstrating musical competencies. Students are not automatically placed in internships, but must work with the clinical advisor to select and apply for appropriate programs. Following successful completion of the internship, students are eligible to take the board certification examination in music therapy. This exam is offered through the Certification Board for Music Therapists. This leads to national board certification as a music therapist, with the credential music therapist-board certified (MT-BC).

Since music therapists work with vulnerable populations, the School of Music is required to run a criminal background check on all students when they begin their clinical experiences. Criminal convictions could negatively impact a student’s ability to continue in the music therapy program and/or gain placement at an internship site. For more information, contact the director of the music therapy program.

The music therapy concentration requires the following course work.

All of these:

- MUS:1687 Orientation to Music Therapy 2 s.h.
- MUS:3675 Music Therapy Practicum (Section 1 taken twice for 2 s.h. and Section 2 taken once for 1 s.h.) 5 s.h.
- MUS:3680 Music in Special Education 2-3 s.h.
- MUS:3690 Music Therapy with Adults 3 s.h.
- MUS:4670 Internship in Music Therapy 3 s.h.
- MUS:4685 Music Therapy with Children 3 s.h.
- EDTL:4630 Psychology of Music 2-3 s.h.
- EDTL:4640 Introduction to Music Research 2-3 s.h.

At least two of these (total of 4 s.h.):

- MUS:2671 Music Foundations in Therapy I 2 s.h.
- MUS:2672 Music Foundations in Therapy II 1-2 s.h.
- MUS:3676 Percussion Experience for Teachers and Therapists 1 s.h.

All of these:

- MUS:1120 Undergraduate Secondary Performance—Voice (two semesters required) 2 s.h.
- MUS:1210 Recital Attendance (four semesters required) 4 s.h.
- MUS:1211 Group Instruction in Piano I 1 s.h.
- MUS:1212 Group Instruction in Piano II 1 s.h.
- MUS:2213 Group Instruction in Piano III 1 s.h.

One of these:

- MUS:3851 Introduction to the Alexander Technique 3 s.h.
- DANC:3085 Introduction to Afro-Cuban Dance 1 s.h.

One of these:

- MUS:1007 Garage Band: The Basics 2 s.h.
- MUS:3665 Arranging for Band 2 s.h.

One of these:

- MUS:1121 Lower Level Secondary Performance—Piano 1 s.h.
- MUS:3001 Introduction to Improvisation 3 s.h.

One of these:

- PSY:2930 Abnormal Psychology: Health Professions 3 s.h.
- PSY:3320 Abnormal Psychology 3 s.h.

One of these:

- ANTH:1101 Cultural Anthropology 3 s.h.
- PSY:2301 Introduction to Clinical Psychology 3 s.h.
Composition students must satisfy the degree requirements stated under "Bachelor of Music." The composition concentration requires additional course work in composition and music theory; contact the School of Music office.

The course MUS:4910 Bachelor’s Thesis replaces the recital required of applied music students. It consists of one or more compositions, approved by a committee of three faculty members and performed in regularly scheduled School of Music recitals.

**B.M. with Teacher Licensure**

Music majors who intend to earn licensure to teach in elementary and/or secondary schools must complete the College of Education’s Teacher Education Program (TEP) in addition to the requirements for the Bachelor of Music major and all requirements for graduation.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Undergraduate students seeking teacher licensure/certification must be enrolled in a Bachelor of Music program in performance and must complete the appropriate licensure program (e.g., band, choral, string). Students must be admitted to the Teacher Education Program before they may take required professional education courses. See "Admission to the Teacher Education Program" below.

All students must complete the College of Liberal Arts and Sciences General Education Program (p. 313). In addition to the B.M. requirements in music, TEP students must take General Education courses that fulfill licensure requirements. The certification program requires courses in music methods and techniques, professional education courses, and student teaching.

The following courses are required for all music TEP students.

<table>
<thead>

---

**Composition Concentration**

The composition concentration is open to students who have been admitted to a performance area in the School of Music. Before admission to the concentration, students normally must complete the following four-semester sequence.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUS:1201 Musicianship and Theory I</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MUS:1202 Musicianship and Theory II</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MUS:2203 Musicianship and Theory III</td>
<td>4 s.h.</td>
</tr>
<tr>
<td>MUS:2204 Musicianship and Theory IV</td>
<td>4 s.h.</td>
</tr>
</tbody>
</table>

The last course in the sequence, MUS:2204, is a prerequisite for MUS:2220 Composition (undergraduate composition lessons).

Applicants to the composition concentration must submit a portfolio of creative work to the composition faculty for evaluation and acceptance into the program. Students who wish to prepare a portfolio may register for MUS:1139 Secondary Performance—Composition.
BRASS, WOODWIND, AND PERCUSSION STUDENTS
Brass, woodwind, and percussion students in the TEP participate in MUS:1165 Hawkeye Marching Band for one semester. Exceptions must be approved by the head of the music education area.

The following courses are required.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

STRING STUDENTS
String majors in the TEP take one semester of secondary performance on each of three string instruments other than their primary instrument (total of 3 s.h.).

The following courses are required.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>

<td>3 s.h.</td>
</tr>
</tbody>
</table>

VOCAL AND KEYBOARD STUDENTS
Vocal majors in the TEP register for MUS:1121 Lower Level Secondary Performance—Piano for one semester. Keyboard students register for MUS:1120 Undergraduate Secondary Performance—Voice for two semesters, MUS:1510 Diction for Singers I, and MUS:2510 Diction for Singers II. Keyboard majors with a choral music emphasis must include choral ensembles in their major ensemble experience.

The following courses are required.

<table>

</tr>
</tbody>
</table>

Secondary performance 1-2 s.h.

KEYBOARD STUDENTS (NONVOCAL)
Keyboard students who plan to teach in nonvocal areas complete the requirements in either the brass-woodwind-percussion area or the string area, as stated above.

Admission to the Teacher Education Program
Application forms for admission to the Teacher Education Program are available from the Office of Education Services at the College of Education. Application deadlines for the secondary Teacher Education Program are October 1 for entry the following spring and March 1 for entry for the secondary Teacher Education Program are October 1 for entry the following spring and March 1 for entry for the secondary Teacher Education Program are October 1 for entry the following spring and March 1 for entry.

Minimum requirements for admission to the music TEP are:

- admission to the School of Music;
- a University of Iowa g.p.a. and a cumulative g.p.a. of at least 3.00 at the time of admission to the program;
- a g.p.a. of at least 3.00 on all music course work;
- successful completion of MUS:1201 Musicianship and Theory I and MUS:1202 Musicianship and Theory II;
- completion of at least 30 s.h. of college credit;
- completion of a 10-hour volunteer practicum in a K-12 school setting (volunteer verification form on the Teacher Education Program application web site);
- a completed application form;
- two recommendations (with original signatures, forms on the Teacher Education Program application web site);
- transcript(s) of all college courses;
- an essay, typewritten on a separate sheet, of no more than 500 words on the topic of a contemporary teaching challenge faced by teachers nationally and how you would address it;
- a resume, typewritten on a separate sheet, of paid or volunteer work experience, including jobs, employers, and dates of employment; and
- an acceptable score on either the Praxis I exam (Pre-Professional Skills Tests, combined test, test code 5750) with a cumulative score of at least 522 and no score below 170 on the reading, writing, and mathematics tests, or Praxis Core (combined test, test code 5751) for reading (156), writing (162), mathematics (150).

Beginning fall 2015, first-year students interested in seeking music licensure, who earned a high school g.p.a. of 3.20 and who are accepted into the School of Music, are directly admitted into the Teacher Education Program. By the last day (Friday) of finals week in the fall semester, any student who has been directly admitted through early admission must also complete the following:

- achieve passing scores on a standardized test, either Praxis I (PPST or CPPST) with a cumulative score of at least 522, and no score below 170 on reading, writing, and mathematics tests, or Praxis Core for reading (156), writing (162), and mathematics (150);
- at least 10 hours of volunteer work (if not done prior to admission) and submission of the verification form; and
- a criminal background check.

Bachelor of Arts
The Bachelor of Arts with a major in music requires a minimum of 120 s.h., including 42-47 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). Students must satisfy all requirements for graduation with...
a bachelor's degree; contact the School of Music and the Academic Advising Center to learn more.

The music major for the Bachelor of Arts is designed for students who have strong abilities and interest in music but are not planning on careers as musicians or who wish to pursue a double major or earn more than one bachelor's degree. Students must audition and be accepted into a performance area. They develop musicianship and performance skills and choose from a wide variety of music electives.

Students in many areas, from engineering and physics to history, art, and English, find that a B.A. in music is a good addition to their studies. Other students choose the B.A. in music to complement course work in business (especially the minor in business administration), foreign language and literature, or interdisciplinary fields such as American studies. Some students combine a B.A. in music with undergraduate preparation to study law or medicine.

All music majors with scholarships must participate in a major ensemble and studio lessons each semester.

The major in music (Bachelor of Arts) requires the following course work.

All of these:
- MUS:1200 Fundamentals of Music for Majors (or successful completion of MUS:1201 online theory diagnostic examination) 3 s.h.
- MUS:1201 Musicianship and Theory I 4 s.h.
- MUS:1202 Musicianship and Theory II 4 s.h.
- MUS:1211 Group Instruction in Piano I (or successful completion of proficiency exam I) 1 s.h.
- MUS:1212 Group Instruction in Piano II (or successful completion of proficiency exam II) 1 s.h.

To register for MUS:1201, students also must register for MUS:1211 or already have completed that course or have been exempted from it by proficiency exam. To register for MUS:1202, students also must register for MUS:1212 or already have completed that course or have been exempted from it by proficiency exam. Transfer students should complete the group piano requirement during their first year in residence unless they are exempted by proficiency exam.

All of these:
- MUS:1210 Recital Attendance (two semesters) 2 s.h.
- Lower-level applied music 4 s.h.
- Major ensemble (minimum of four semesters) 4 s.h.

For a list of major ensembles, see "Ensemble Participation" under "Bachelor of Music" above. With approval, students may use MUS:3730 Jazz Band to satisfy the major ensemble requirement. Any student who wishes to request adjustment of the major ensemble requirement must submit his or her request in writing to a review committee consisting of the ensemble director(s) involved, the studio instructor, and the associate director for undergraduate studies.

Two of these:
- MUS:1720 History of Jazz 3 s.h.
- MUS:2301 History of Music I 3 s.h.
- MUS:2302 History of Music II 3 s.h.

At least 6 s.h. from these:
- MUS:1310 World Music 3 s.h.
- MUS:1720 History of Jazz 3 s.h.
- MUS:2203 Musicianship and Theory III 4 s.h.
- MUS:2204 Musicianship and Theory IV 4 s.h.
- MUS:2301 History of Music I 3 s.h.
- MUS:2302 History of Music II 3 s.h.
- MUS:2311 Music of Latin America and the Caribbean 3 s.h.
- MUS:3625 Techniques of Conducting 2 s.h.
- MUS:3665 Arranging for Band 2 s.h.
- MUS:3750 Jazz Theory 3 s.h.
- MUS:4200 Counterpoint Before 1600 3 s.h.
- MUS:4750 Transcription 2 s.h.
- MUS:4760 Jazz Composition and Arranging 2 s.h.

All of these:
- Performance electives (lower- or upper-level applied music, ensembles, or improvisation) 6 s.h.
- Music electives 6 s.h.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

In addition to the requirements listed under the checkpoints, all students must complete 2 s.h. in applied music and 1 s.h. in a major ensemble each semester.

The Four-Year Graduation Plan is not available for music therapy and music education.

Bachelor of Arts

The Bachelor of Arts in music requires 42-47 s.h. in School of Music courses.

Before the third semester begins: 15-18 s.h. of course work in the major, including MUS:1201 Musicianship and Theory I, MUS:1202 Musicianship and Theory II, MUS:1211 Group Instruction in Piano I, and MUS:1212 Group Instruction in Piano II

Before the fifth semester begins: at least 23-32 s.h. of course work in the major

Before the seventh semester begins: at least 33-41 s.h. of course work in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: at least 40-46 s.h. of course work in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Music

Students may apply more than 56 s.h. earned in School of Music courses toward the minimum 120 s.h. required for the B.M.

Before the third semester begins: 18 s.h. of course work in the major, including MUS:1201 Musicianship and Theory I, MUS:1202 Musicianship and Theory II, MUS:1211 Group Instruction in Piano I, and MUS:1212 Group Instruction in Piano II
Before the fifth semester begins: at least 34 s.h. of course work in the major, including MUS:2203 Musicianship and Theory III and MUS:2204 Musicianship and Theory IV.

Before the seventh semester begins: at least 50 s.h. of course work in the major and at least 90 s.h. earned toward the degree.

Before the eighth semester begins: at least 56 s.h. of course work in the major.

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

Honors in the Major

Students majoring in music have the opportunity to graduate with honors in the major. Members of the School of Music honors program must have a g.p.a. of at least 3.80 in music.

To graduate with honors in the music major, students must complete at least 6 s.h. of honors work in music, normally in their junior and senior years. They must earn a minimum of 3 s.h. of the required honors work in MUS:4995 Honors in Music by completing one or more honors projects, such as solo or ensemble recitals; compositions, transcriptions, orchestrations, or arrangements; and essays, research papers, editions, or translations. Honors projects must be in addition to the projects normally required for graduation with a major in music.

Students also may earn honors credit in other honors courses (normally upper-level undergraduate courses) or in approved graduate courses (music history and music theory are particularly recommended).

For complete details about requirements for graduation with honors in the music major, visit Honors in Music on the School of Music web site and consult the school’s honors advisor.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.

Minor

The minor in music requires a minimum of 15 s.h. in music courses, including 12 s.h. earned in courses considered advanced for the minor (music courses numbered 3000 or above) and 3 s.h. earned at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work for the minor may not be taken pass/nonpass.

Work for the minor must include one music theory course, one music history course, and 3 s.h. of performance courses (applied instruction or ensembles). Auditions with the instructor are required for admission to the lower-level applied instruction courses; admission to the theory courses is determined by results on the theory placement exam or completion of MUS:1200 Fundamentals of Music for Majors.

The following courses are also considered advanced for the minor.

PRELIMINARY PROCEDURES FOR MUSIC THERAPY GRADUATE STUDENTS

Since music therapists work with vulnerable populations, the School of Music is required to run a criminal background check on all students when they begin their clinical experiences. Criminal convictions could negatively impact a student's ability to continue in the music therapy program and/or gain placement at an internship site. For more information, contact the director of the music therapy program.

ENSEMBLE PARTICIPATION

Graduate students in the performance and pedagogy tracks of all graduate programs are required to complete four semesters of major ensemble participation. Students normally enroll in major ensemble participation during consecutive semesters beginning early in their degree work, to ensure completion of the major ensemble requirements in a timely manner. Ensemble assignments are made at the discretion of the major teacher and ensemble director.

Major ensembles are as follows.

- MUS:1176 Women's Chorale 1 s.h.
- MUS:3160 Symphony Band/Concert Band 1 s.h.
- MUS:3170 Kantorei 1 s.h.
- MUS:3172 Camerata Singers 1 s.h.
- MUS:3174 University Choir 1 s.h.
- MUS:3180 Orchestra 1 s.h.

Keyboard majors may substitute piano accompaniment for major ensemble participation, at their major applied teacher's discretion. Jazz studies majors substitute MUS:3730 Jazz Band for major ensemble participation. Theory, composition, music education, and music therapy majors have no major ensemble requirement. The M.A. in musicology requires one semester of any ensemble.

Any student who wants to request adjustment of this requirement must submit his or her request in writing to a review committee consisting of the major ensemble director(s) involved, the major teacher, and the School of Music associate director for graduate studies.

Master of Arts

The Master of Arts program in music requires a minimum of 30-37 s.h. of graduate credit. The M.A. concentrations in performance, conducting, jazz studies, composition, music theory, musicology, music therapy, and music education require a recital, capstone project, or thesis. Performance majors present a public recital in place of a written thesis. Music therapy majors complete a capstone research project. Jazz studies majors present a public recital and a separate performance project. The Master of Arts in music education is offered with thesis and nonthesis options.

All M.A. programs—except music therapy and music education—require the following course work.

INTRODUCTORY COURSE

MUS:5300 Introduction to Graduate Study in Music 2 s.h.

MUSIC THEORY

Students must earn 6 s.h.
Students may earn a Master of Arts while working toward the Master of Fine Arts, but they must take two separate final examinations.

**Doctor of Philosophy**

The Doctor of Philosophy program in music requires a minimum of 72 s.h. of graduate credit. Ph.D. concentration areas include composition, musicology, music education, music theory, and vocal pedagogy and literature. The vocal pedagogy and literature program is designed for students who already have achieved a professional level of musical performance; they are required to audit in their major performance area.

Information about specific admission and curricular requirements for each area is available from the School of Music office.

Ph.D. students in composition, musicology, music theory, and vocal pedagogy and literature must complete the courses required for the M.A. (see "Master of Arts" above). They also must complete the following course work.

One or more additional music theory course(s) listed in the M.A. requirements

One of these:

MUS:7950 Ph.D. Thesis

MUS:7960 Composition Ph.D. Thesis

Proficiency in one or more foreign languages is required for Ph.D. students in composition, musicology, music theory, and music literature. Ph.D. students in music education should contact the School of Music for requirements.

**Doctor of Musical Arts**

The Doctor of Musical Arts is offered with two concentrations: conducting, and performance and pedagogy. Requirements for the D.M.A. are the same as for the Ph.D. (see "Doctor of Philosophy" above), except that the D.M.A. requires three recitals or programs (MUS:7900 D.M.A. Recital and MUS:7970 D.M.A. Essay) instead of the Ph.D. thesis. At the performance area's discretion, a concerto performance with orchestra or other appropriate ensemble from the School of Music may be substituted for one of the recitals. Some performance areas allow one or more lecture recitals, with faculty approval. Singers may substitute one major opera role or one major solo contribution to an orchestra performance for one of their recitals. See the school's associate director for graduate programs for specific area requirements.

**Minor in Theory Pedagogy**

The graduate minor in theory pedagogy requires 15-18 s.h. of credit. The program is open to students who have been admitted to a graduate degree program in the School of Music. The minor requires the following courses.

One of these:

MUS:4200 Counterpoint Before 1600

MUS:4201 Counterpoint After 1600

Both of these:

MUS:6200 Music Theory Colloquium (taken twice)

MUS:6215 Music Theory Pedagogy
One of these:
MUS:5235 Tonal Analysis 3 s.h.
MUS:6250 Advanced Tonal Theory and Analysis 3 s.h.

One of these:
MUS:5236 Post-Tonal Analysis 3 s.h.
MUS:6251 Advanced Post-Tonal Theory and Analysis 3 s.h.

Two of these:
MUS:5240 Special Topics in Theory and Analysis 3 s.h.
MUS:6210 History of Music Theory I 3 s.h.
MUS:6211 History of Music Theory II 3 s.h.
MUS:6250 Advanced Tonal Theory and Analysis 3 s.h.
MUS:6251 Advanced Post-Tonal Theory and Analysis 3 s.h.

Certificate in Sacred Music

The Certificate in Sacred Music requires 25 s.h. It is an interdisciplinary program with courses in sacred music, choral conducting and literature, keyboard, voice, religion, and art and art history. Students may earn the certificate while working toward a graduate degree. Individuals not enrolled in a graduate program may complete the certificate, but they must be admitted to the Graduate College and have the consent of a faculty advisor.

The certificate requires the following course work.

Liturgy, History of Church Music Hymnology, and Keyboard Studies (10-11 s.h.)
Both of these:
MUS:4452 Liturgics 2 s.h.
MUS:4454 Service Playing and Improvisation 2 s.h.
At least 3 s.h. from these:
MUS:3021 Upper Level Piano arr.
MUS:3022 Upper Level Organ arr.
MUS:4210 Keyboard Harmony 1-2 s.h.
MUS:6021 Major Piano arr.
MUS:6022 Major Organ arr.
At least 3 s.h. from these:
MUS:4450 Organ Literature Survey 2 s.h.
MUS:5450 History of Organ Building and Design 2-3 s.h.
MUS:5452 Organ Pedagogy 2 s.h.
MUS:5465 Hymnology 1-2 s.h.
MUS:5475 Organ Literature Special Topics 2 s.h.

Choral Conducting, Literature, and Vocal Studies (7-8 s.h.)
Required (if no previous conducting study):
MUS:3625 Techniques of Conducting 2 s.h.
At least 3 s.h. from these:
MUS:3020 Upper Level Voice arr.
MUS:3645 Choral Conducting and Literature 3 s.h.
MUS:5510 Graduate Diction 2 s.h.
MUS:5520 Principles of Voice Production 3 s.h.
MUS:6020 Major Voice arr.
MUS:6520 Methods of Teaching Voice 3 s.h.
MUS:6561 Seminar: Choral Literature and Analysis I 1-3 s.h.
MUS:6562 Seminar: Choral Literature and Analysis II 1-3 s.h.
MUS:6563 Seminar: Choral Literature and Analysis III 1-3 s.h.
MUS:6564 Seminar: Choral Literature and Analysis IV 1-3 s.h.
MUS:6581 Advanced Choral Conducting I 1-3 s.h.
MUS:6582 Advanced Choral Conducting II 1-3 s.h.
MUS:6583 Advanced Choral Conducting III 1-3 s.h.
MUS:6584 Advanced Choral Conducting IV 1-3 s.h.

Religion, History, and Art History (6 s.h.)
ARTH:3070 Themes in Baroque-Era Art 3 s.h.
ARTH:3390 Early Medieval Art 3 s.h.
ARTH:3391 Themes in Medieval Art 3 s.h.
ARTH:3550 Leonardo, Raphael, and Their Contemporaries 3 s.h.
ARTH:3720 The Romantic Revolution 3 s.h.
ARTH:3730 Realism, Impressionism, Post-Impressionism 3 s.h.
ARTH:3820 Modern Art 3 s.h.
ARTH:3840 Contemporary Art 3 s.h.
HIST:4241 Varieties of American Religion 3 s.h.
HIST:4412 History of the Medieval Church 3 s.h.
HIST:4417 Medieval Intellectual History 300-1150 3 s.h.
HIST:4418 Medieval Intellectual History 1150-1500 3 s.h.
RELS:3247 Banned from the Bible: Pseudepigrapha and Apocrypha 3 s.h.
RELS:4741 Varieties of American Religion 3 s.h.
Other courses numbered 3000 or above approved by Certificate in Sacred Music advisor

Optional Electives (1-2 s.h.)
MUS:3220 Instrumentation 2 s.h.
MUS:3601 Undergraduate Music Education Workshop II 1 s.h.
Other electives numbered 3000 or above approved by the Certificate in Sacred Music advisor

Financial Support

Qualified graduate students are invited to apply for teaching and research assistantships. Inquiries should be directed to the School of Music office.

Facilities, Resources

Center for New Music

The Center for New Music is a vital component of the School of Music’s composition program. Since its founding in 1966, the center has been both laboratory and showcase for late-20th and 21st-century music. It
presents at least four concerts of contemporary works each academic season. It also provides a forum for visiting composers and other creative artists, bringing new music to a variety of outreach venues. Audition, rehearsal, and programming information is available on the Center for New Music web site.

**Rita Benton Music Library**

The Rita Benton Music Library is currently located in the University's Main Library. The music library holds more than 70,000 scores, including chamber music sets; 50,000 books, including bound journals; 3,500 microforms, chiefly manuscripts and early printed books; and 28,000 media items in all formats. It receives about 300 journals. Its rare book division has particular strengths in 18th- and 19th-century music theory treatises and instrumental methods, and an outstanding collection of keyboard and chamber music by Ignaz Pleyel. The library also houses the Goldman Band Collection. Music manuscripts of the composer Phillip Greeley Clapp, a former director of the school, are housed in Special Collections & University Archives.

The library's large reference collection is supplemented by several online resources, including Music Index, IIMP, Grove Music Online, RILM, RISM, RIPM, WorldCat, and InfoHawk Catalog, the University's online library catalog. Online resources for streamed audio include Classical Music Library, Naxos Music Library, Naxos Jazz, African-American Song, Smithsonian Global Sound, and the Database of Recorded American Music (DRAM).

Materials circulate to University of Iowa faculty and students and to institutions that have reciprocal agreements with the University. Individuals not affiliated with the University may qualify for borrower's permits.

**Courses**

Several School of Music courses are especially appropriate for non-music majors. Some are approved for General Education; look for them (prefix MUS) under "Literary, Visual, and Performing Arts" in the General Education Program (p. 313) section of the Catalog.

The courses listed under "General Music Courses" below are especially appropriate for non-music majors, as are several listed under "Music History" below. For others, see "Courses for Nonmajors" earlier in this Catalog section.

Non-music majors may participate in most School of Music ensembles; see "Ensembles" below.

**General Music Courses, Lower-Level Undergraduate**

The following courses are especially appropriate for non-music majors.

Instruction in MUS:1020 Performance Instruction for Nonmajors consists of a half-hour lesson per week. The course is offered on a fee-per-course basis, in addition to tuition. Students register under separate section numbers for different instruments.

**MUS:1000 First-Year Seminar** 1 s.h.
An aspect of performance, creativity, musical literature, or scholarship; seminar format with classroom participation, papers, projects, other assignments; may require attendance at lectures, rehearsals, or performances. Requirements: first- or second-semester standing.

**MUS:1001 Group Piano I: Non-Music Majors** 1 s.h.
Reading, technical study, chording, playing by ear, improvisation; for beginners. Requirements: non-music major. GE: Literary, Visual, and Performing Arts.

**MUS:1002 Group Piano II: Non-Music Majors** 1 s.h.
Continuation of MUS:1001. Requirements: non-music major.

**MUS:1007 Garage Band: The Basics** 2 s.h.
Application of GarageBand software (Mac platform) using midi keyboards; composition and music theory for projects using drag-and-drop looping, multitrack recording, sound effects, mixing, importing music for composition. Requirements: prior musical experience (student can sing or play an instrument).

**MUS:1008 Jazz Masters** 3 s.h.
Major 20th-century jazz leaders of varied styles and recordings; developments between 1917 and present.

**MUS:1010 Recital Attendance for Non-Majors** 1 s.h.
Musical experience through student, faculty recitals.

**MUS:1012 Creativity in Music** 3 s.h.
Where does music come from? When, why, and how did people first start making music? How do music creators turn raw inspiration into finished pieces? How do improvisers create music on the spot? Can anyone create music or is that something only for composers? Development of music creation from long ago to present day; presentations by guest composers and performers who will demonstrate how they compose or improvise their music. GE: Literary, Visual, and Performing Arts.

**MUS:1020 Performance Instruction for Nonmajors** 1 s.h.
Bassoon, cello, clarinet, euphonium, flute, horn, oboe, organ, percussion, piano, saxophone, string bass, trombone, trumpet, tuba, viola, violin, or voice. Requirements: non-music major; GE: Literary, Visual, and Performing Arts.

**MUS:1066 Introduction to Film Music** 3 s.h.
Major styles and composers of film music from early 20th century to the present; focus on case studies to understand different roles music can play in cinema; opportunities to employ critical thinking and listening skills to analyze particular films or key scenes. GE: Literary, Visual, and Performing Arts.

**MUS:1100 Fundamentals of Music for Non-Music Majors** 3 s.h.
Notation of pitch and rhythm, intervals, scales, key signatures, triads, and seventh chords. Requirements: non-music major.

</table>
The Alexander Technique and "self-use"—how movement choices affect results achieved; improvement of physical skills and presence; principles in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting); application to skills in daily life, addressing underpinnings of movement; physical participation (e.g., lying down, rolling, sitting, standing, locomotion). Same as DPA:3851, DANC:3851, THTR:3851.

**Applied Music: Lower-Level Undergraduate Majors**

Instruction consists of individual and/or class lessons, at the instructor's option, for a minimum of one hour per week (students register for 2 s.h.), or one half-hour per week (students register for 1 s.h.). Music majors are required to attend weekly performance and pedagogy seminars in applied music.

Courses are offered on a fee-per-course basis, in addition to tuition, and may be repeated.

Guitar instruction is offered only at the lower level. Enrollment in MUS:2038 Lower Level Jazz Guitar is limited to three Bachelor of Arts students. Students may not enroll in the Bachelor of Music program with guitar as their major instrument.

**MUS:2020 Lower Level Voice**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2021 Lower Level Piano**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance. Requirements: piano major or approval of the area following a successful audition.

**MUS:2022 Lower Level Organ**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2023 Lower Level Violin**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2024 Lower Level Viola**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2025 Lower Level Cello**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2026 Lower Level String Bass**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2027 Lower Level Flute**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2028 Lower Level Oboe**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2029 Lower Level Clarinet**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2030 Lower Level Bassoon**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2031 Lower Level Saxophone**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

**MUS:2032 Lower Level Horn**

Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.
MUS:2033 Lower Level Trumpet  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:2034 Lower Level Trombone  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:2035 Lower Level Euphonium  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:2036 Lower Level Tuba  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:2037 Lower Level Percussion  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:2038 Lower Level Jazz Guitar  
1 s.h.  
Requirements: audition required.

Applied Music: Upper-Level Undergraduate Majors

Instruction consists of individual and/or class lessons, at the instructor's option, for a minimum of one hour per week (students register for 2 s.h.), or one half-hour per week (students register for 1 s.h.). Music majors are required to attend weekly performance and pedagogy seminars in applied music.

Courses are offered on a fee-per-course basis, in addition to tuition, and may be repeated.

Guitar instruction is offered only at the lower level. Students may not enroll in the Bachelor of Music program with guitar as their major instrument.

MUS:3020 Upper Level Voice  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3021 Upper Level Piano  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance. Requirements: piano major or approval following a successful audition.

MUS:3022 Upper Level Organ  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3023 Upper Level Violin  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3024 Upper Level Viola  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3025 Upper Level Cello  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3026 Upper Level String Bass  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3027 Upper Level Flute  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3028 Upper Level Oboe  
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.
MUS:3029 Upper Level Clarinet
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3030 Upper Level Bassoon
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3031 Upper Level Saxophone
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3032 Upper Level Horn
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3033 Upper Level Trumpet
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3034 Upper Level Trombone
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3035 Upper Level Euphonium
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3036 Upper Level Tuba
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

MUS:3037 Upper Level Percussion
Applied lessons and guided instruction in performance, technique, musicality, pedagogy (teaching); weekly lessons; weekly performance/pedagogy seminar conducted in a master class format; student participation as performers, critics, and practice teachers with instructor guidance.

Applied Music: Graduate Majors
Instruction consists of individual and/or class lessons, at the instructor's option, for a minimum of one hour per week (students register for 2 s.h.), or one half-hour per week (students register for 1 s.h.). Courses are offered on a fee-per-course basis, in addition to tuition, and may be repeated.

Applied Music: Secondary Instruction for Majors
Instruction consists of one half-hour lesson per week. Courses are offered on a fee-per-course basis, in addition to tuition, and may be repeated.

MUS:6585 Score Reading 1 s.h.

MUS:6586 Orchestral Literature 2 s.h.

MUS:6590 Seminar in Advanced Band Literature and Band History arr.
Band literature; history.

Ensembles
Enrollment requires consent of instructor. Courses may be repeated.

MUS:1160 University Band 1 s.h.
Participation in University Band.

MUS:1165 Hawkeye Marching Band 1 s.h.
Offered fall semesters.

MUS:1166 Large Pep Band 1 s.h.
Performing ensemble for basketball games and wrestling meets. Requirements: membership by audition.

MUS:1176 Women’s Chorale 1 s.h.

MUS:1180 All-University String Orchestra 1 s.h.
Repertoire, rehearsal pacing, and performance expectation geared to general students. Open to all UI students with no audition.

MUS:3150 Percussion Ensemble arr.
Range of styles and idioms, primarily written during the 20th and 21st centuries; historical or cultural aspects such as ancient rudimental drumming styles, ragtime, jazz, popular music, and music from Africa, the Caribbean, Brazil, Cuba, China.

MUS:3151 Percussion Chamber Ensemble 1 s.h.
Advanced percussion ensemble experience to complement work in larger format percussion ensemble; preparation and performance of most important repertoire for percussion ensemble; new works brought to light in a small chamber group setting. Requirements: upper-level undergraduate or graduate percussion major.

MUS:3160 Symphony Band/Concert Band 1 s.h.
Participation in Symphony Band or Concert Band. Requirements: (for concert band) membership by audition.

MUS:3163 Steel Band 1 s.h.
Musical and cultural introduction to steel band music of Trinidad and other Caribbean musical styles, including calypso, soca, ska, and reggae.

MUS:3170 Kantorei 1 s.h.

MUS:3172 Camerata Singers 1 s.h.

MUS:3174 University Choir 1 s.h.

MUS:3180 Orchestra 1 s.h.

MUS:3182 Chamber Orchestra 1 s.h.
Requirements: upper-level undergraduate standing.

MUS:3190 Center for New Music Ensemble 0-1 s.h.
Participation in the Center for New Music; focus on contemporary composition and performance, 20th- and 21st-century repertoire and styles.

MUS:3480 Piano Accompaniment arr.
Collaborative arts techniques, methods, and history. Requirements: keyboard major.

MUS:3481 Piano Chamber Music arr.
Requirements: music major.

MUS:3482 String Chamber Music arr.

MUS:3485 Wind Chamber Music arr.
Preparation, performance of representative literature; sections for woodwinds, brass, flute, clarinet, horn, saxophone, double reed, trumpet, trombone, brass choir, tuba/euphonium ensemble.

Jazz Studies

MUS:1009 Jazz Cultures in America and Abroad 3 s.h.
How to listen to jazz and recognize a variety of processes that are taking place in performances and recordings; historical, social, and political issues, including race and gender; the unique blend of jazz of a particular region; attendance at live performances, meet and interview musicians, critics, and educators. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

MUS:1711 Jazz Rhythms and Interpretation 1 s.h.
Methods for sight-reading and interpreting jazz notation. Requirements: music major or audition.
**MUS:1720 History of Jazz** 3 s.h.
Major 20th-century styles, artists, seminal works, and recordings; developments between 1917 and 1972. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

**MUS:2014 Giants of Jazz: Miles, Trane, and Duke** 3 s.h.
Miles Davis, John Coltrane and Duke Ellington as figureheads of the Jazz music style; how they changed the trajectory of modern music along with sidemen (B. Strayhorn and H. Hancock); Ellington's resolute defiance of stereotypical views of African Americans; Miles' brazen protests against civil injustices; how these icons are much more than mere musicians; cultural impact of landmark albums including "Kind of Blue," "A Love Supreme," and "The Birth of the Cool"; focus on their life, music and sociopolitical impact. Same as AFAM:2014.

**MUS:3001 Introduction to Improvisation** 3 s.h.
Introduction to the practice of improvisation through performance of repertoire and the development of practicing strategies; exercises in melody, harmony, rhythm and transcription that together form an integrated approach to developing improvisations. Prerequisites: MUS:1201. Requirements: audition.

**MUS:3710 Intermediate Jazz Improvisation** 2 s.h.
Improvisation in the jazz repertoire of standards, bebop, and major composers such as Thelonious Monk, Wayne Shorter; memorization and use of melodies, knowledge of chords to the thirteenth, chromatic harmony, development of rhythmic motifs/alteration, strategies for multiple chorus improvisations; separate section for drummers. Prerequisites: MUS:3001 and MUS:3750. Requirements: audition.

**MUS:3730 Jazz Band** 1 s.h.
Jazz performance ensembles, rehearsals, and concerts on and off campus.

**MUS:3740 Small Jazz Ensembles** 1 s.h.
Development of repertoire from standard jazz literature, arrangements and compositions by ensemble members; rehearsals (three hours per week) and performances on and off campus. Requirements: audition.

**MUS:3750 Jazz Theory** 3 s.h.
Development of skills for interpreting melodies and chord symbols in mainstream practice of jazz harmony at the piano; application of scales, development of voice leading for jazz harmonies, reharmonization, and analysis. Requirements: MUS:1201 or audition.

**MUS:3760 Jazz Band Techniques** 1 s.h.
Development of skills for sight-reading and interpreting notated jazz. Prerequisites: MUS:1711.

**MUS:4710 Advanced Jazz Improvisation** 2 s.h.
Builds on the skills learned in MUS:3710; contemporary techniques and styles used by current practitioners of improvisation; free improvisation, bitonal harmonies, through-composed forms, collective improvisation, nonwestern approaches. Prerequisites: MUS:3710 and MUS:3750. Requirements: audition.

**MUS:4750 Transcription** 2 s.h.
Individual projects to transcribe improvisations, small ensemble arrangements, large ensemble arrangements, or nonwestern techniques; use of computer notation programs and midi-realizations. Prerequisites: MUS:3710 and MUS:3750.

**MUS:4760 Jazz Composition and Arranging** 2 s.h.
Experience writing and arranging original jazz material for small and large ensembles, and presenting scores in computer notation; individual lessons. Prerequisites: MUS:3750.

**Music Education**

The College of Education offers additional music education courses; see Teaching and Learning (p. 793) in the Catalog for listings and descriptions. Some courses have two numbers, one for the School of Music and the other for the College of Education. Students preparing for music teacher licensure should register under the education number.

Also see MUS:3760 Jazz Band Techniques under "Jazz Studies."

**MUS:3600 Undergraduate Music Education Workshop** 1 s.h.
Topics vary; for inservice music teachers.

**MUS:3601 Undergraduate Music Education Workshop II** 1 s.h.
Topics vary; for inservice music teachers.

**MUS:3605 Instrumental Techniques** 2 s.h.
Same as EDTL:3605.

**MUS:3630 Band Methods and Materials** 3 s.h.
High school and elementary school music methods required for teaching certificate; for instrumental music education majors. Same as EDTL:3630.

**MUS:3635 Instrumental Conducting** 3 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: MUS:3625. Same as EDTL:3635.

**MUS:3640 Choral Methods** 3 s.h.
Organization, implementation of effective choral music programs for all ages. Same as EDTL:3640.

**MUS:3645 Choral Conducting and Literature** 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under EDTL:3645. Prerequisites: EDTL:3640 and MUS:3625. Same as EDTL:3645.

**MUS:3659 Class Strings** 1 s.h.
String playing and basic principles of string pedagogy; for band and string students. Offered fall semesters for band; offered fall and spring semesters for string. Requirements: teacher education student in music.
MUS:3660 String Methods and Materials 3 s.h.
Methods for teaching bands in schools. Offered fall semesters. Same as EDTL:3660.

MUS:3664 Introduction to Band Instruments 2 s.h.
Survey of wind and percussion instruments; for music education string majors.

MUS:3665 Arranging for Band 2 s.h.
Scoring and arranging techniques for concert, marching bands. Offered spring semesters.

MUS:3666 Marching Band Techniques 1 s.h.
Administration, show design. Offered fall semesters.

MUS:5600 Graduate Music Education Workshop 1 s.h.
For inservice music teachers; topics vary. Same as EDTL:5600.

MUS:5601 Graduate Music Education Workshop II 1 s.h.
Varied topics; for inservice music teachers. Same as EDTL:5601.

Music History
The following courses deal with periods and special topics in music history. They are offered about every two years. All of them have as prerequisites MUS:5301 Advanced History and Literature of Music I and MUS:5302 Advanced History and Literature of Music II, or the equivalents, or consent of instructor.

MUS:6326 Renaissance Music Notations 3 s.h.
MUS:6350 Music 1945-Present 3 s.h.
Several courses in music history are appropriate for nonmusic majors. Other music history courses appropriate for nonmajors are listed under “General Music Courses” above.

MUS:2301 History of Music I 3 s.h.

MUS:2302 History of Music II 3 s.h.

MUS:3486 Bach Performance Seminar 1 s.h.
Performance practice and interpretation of J.S. Bach’s music and late German Baroque period using modern instruments; differences between Baroque performance on period and modern instruments; concept of historically informed practice (HIP) and its application in performing Bach's masterpieces; master-class format culminating in a public recital of repertoire studied during semester. Prerequisites: MUS:1125 or MUS:1126 or MUS:1127 or MUS:1128.

MUS:5300 Introduction to Graduate Study in Music 2 s.h.
Music library; reference materials; bibliography; research problems, methods; writing research papers. Offered fall and spring semesters.

MUS:5301 Advanced History and Literature of Music I 3 s.h.
History and style of Medieval, Renaissance, and Baroque music (750-1750). Offered fall semesters.

MUS:5302 Advanced History and Literature of Music II 3 s.h.
History and style of Classical, 19th-, 20th-, and 21st-century music (1750-present). Offered spring semesters.

MUS:5310 Introduction to Musicology 1-3 s.h.
Methods, materials of research in historical musicology; field of musicology. Requirements: for 1 s.h. — MUS:5300; for 3 s.h. — concurrent enrollment in MUS:5300.

MUS:6300 Musicology Colloquium 0 s.h.

MUS:6310 Seminar in Musicology 3 s.h.
One or more selected areas of music history.

MUS:6314 Topics in Ethnomusicology 3 s.h.
Perspectives on analysis and representation of selected musical cultures from around the world.

MUS:6315 Foundations of Ethnomusicology 3 s.h.
Ethnomusicology in relation to domains of musical, humanistic, social science scholarship on expressive culture and artistic processes. Requirements: senior standing.

MUS:6325 Renaissance Music 3 s.h.
Prerequisites: MUS:5301.

MUS:6326 Renaissance Music Notations 3 s.h.
Renaissance white notation, keyboard tablatures, musical paleography; transcription of early vocal, instrumental notations; editorial problems. Prerequisites: MUS:5301.

MUS:6330 Seventeenth-Century Music 3 s.h.
Prerequisites: MUS:5301.

MUS:6335 Eighteenth-Century Music 3 s.h.
Prerequisites: MUS:5302.

MUS:6340 Nineteenth-Century Music 3 s.h.
Prerequisites: MUS:5302.

MUS:6345 Music 1900-1945 3 s.h.
Prerequisites: MUS:5302.

MUS:6350 Music 1945-Present 3 s.h.
Prerequisites: MUS:5302.

MUS:6355 American Music 3 s.h.
Prerequisites: MUS:5302.
**MUS:6375 Music Editing** 3 s.h.
Principles and methods of music editing; use of primary source materials, establishment of music text, preparation of critical apparatus; project to prepare a critical edition of music for publication. Prerequisites: MUS:5300.

**MUS:7380 Readings in Music History** arr.

**Music and Technology**
Also see MUS:4250 Composition: Electronic Media I and MUS:4251 Composition: Electronic Media II listed under "Composition" above.

**MUS:3410 Fundamentals of Piano Technology** 1 s.h.
Offered spring semesters. Requirements: music major.

**MUS:3780 Audio Recording I** 3 s.h.
Introduction to audio fundamentals, including basic acoustics and audio systems; survey of important equipment and practices, use of microphones and mixers; introduction to AVID's Pro Tools digital audio workstation; students with no background in audio production brought up to an operational proficiency level with basic recording systems; related technical topics develop an understanding of common equipment and conventional application in modern recording studio setting; recording techniques used in MUS:3781.

**MUS:3781 Audio Recording II** 3 s.h.
Survey of Pro Tools; fundamental digital audio concepts applied to hands-on music recording and postproduction projects on digital audio workstations; Pro Tools 101 content with supplementary readings and recording sessions; operational knowledge of Pro Tools software and hardware configurations; basic processes of software-based digital audio recording through recording sessions and sample projects; development of functional understanding of postproduction concepts. Prerequisites: MUS:3780.

**Music Therapy**

**MUS:1687 Orientation to Music Therapy** 2 s.h.
Theory, practice; typical clients and places of employment in music therapy.

**MUS:2671 Music Foundations in Therapy I** 2 s.h.
Skill development on social instruments such as guitar, autoharp, piano; percussion, song-leading skills, and repertoire development for use in clinical music therapy sessions. Prerequisites: MUS:1687. Requirements: music therapy major.

**MUS:2672 Music Foundations in Therapy II** 1-2 s.h.
Advanced skill development on guitar for use in clinical music therapy sessions; percussion techniques, and related skills used in therapeutic settings. Prerequisites: MUS:2671. Requirements: music therapy major.

**MUS:3675 Music Therapy Practicum** 1-2 s.h.
Supervised clinical training with adult clients and children in variety of health care and educational settings. Prerequisites: MUS:1687. Requirements: music therapy major.

**MUS:3676 Percussion Experience for Teachers and Therapists**
Hands-on learning experiences in percussion techniques used by music teachers, special education teachers, music therapists, or social workers; basics of hand drumming centering on West African djembe and Trinidadian steel band; skills necessary for interacting with students and clients in educational and clinical settings.

**MUS:3680 Music in Special Education** 2-3 s.h.
Music methods and materials appropriate for students with disabilities in special educational settings; overview of individualized educational planning for students with disabilities. Requirements: music therapy or music education major.

**MUS:3690 Music Therapy with Adults** 3 s.h.
Techniques, procedures for work with adult clients with disabilities. Prerequisites: MUS:1687. Requirements: music therapy major.

**MUS:4630 Psychology of Music** 2-3 s.h.
Cognition of music, affective response, aesthetic response, musical ability. Same as EDTL:4630.

**MUS:4670 Internship in Music Therapy** arr.
Clinical training under direction of board certified music therapist. Requirements: core music therapy requirements.

**MUS:4675 Senior Project in Music Therapy** 1 s.h.

**MUS:4685 Music Therapy with Children** 3 s.h.

**MUS:6670 Graduate Music Therapy Practicum** arr.
Seminar, clinical field work. Requirements: undergraduate music therapy practicum.

**MUS:6675 Research in Music Therapy—Graduate** 1 s.h.
Research methodology; foundation for subsequent semesters of research on capstone project in music therapy.

**MUS:6680 College Teaching and Clinic Supervision in Music Therapy** 1-2 s.h.
Principles of college teaching, curriculum development, clinical supervision in music therapy.

**MUS:6685 Theory and Research in Music Therapy** 1 s.h.
Historical background, current principles and practices associated with theories of music therapy, common uses with specific populations; research methodologies associated with testing; theories and clinical practices, assigned research publications; information covered over several semesters with each semester covering three to four common theories; seminar includes strengths and limitations of each theory and its place within clinical practice. Requirements: undergraduate core courses in music therapy.
MUS:6690 Special Studies in Music Therapy 1-3 s.h.
Seminar. Requirements: music therapy or music education graduate standing.

Orchestra and Band Instruments
Also see MUS:3660 String Methods and Materials, under "Music Education" above.

MUS:3140 Audition Repertoire 1 s.h.
Practicum on passages frequently requested at professional auditions.

MUS:3483 Baroque Seminar for Strings 1 s.h.
Introduction to Baroque performance practices and techniques on period string instruments; ensembles. Requirements: enrollment in upper-level or graduate-level applied studies.

MUS:5101 Advanced Woodwind Pedagogy and Literature I 2 s.h.
Saxophone and clarinet solo and study literature; integration of pedagogical topics.

MUS:5102 Advanced Woodwind Pedagogy and Literature II 3 s.h.
Oboe, bassoon, and flute solo and study literature; integration of pedagogical topics.

MUS:5111 Advanced Brass Pedagogy and Literature I 2 s.h.
Tuba, euphonium, and trombone literature; pedagogical topics.

MUS:5112 Advanced Brass Pedagogy and Literature II 2 s.h.
Trumpet and horn literature; pedagogical topics.

MUS:5115 Advanced Brass Ensemble Literature 2 s.h.
Brass chamber music literature, including mixed and like-instrument ensembles.

MUS:5121 Advanced String Methods and Literature I 2 s.h.
Violin, viola, cello, and double bass solo and chamber music repertoire, pedagogical methods.

MUS:5122 Advanced String Methods and Literature II 2 s.h.
Violin, viola, cello, and double bass solo and chamber music repertoire, pedagogical methods.

MUS:5130 Advanced Percussion Pedagogy and Literature 2 s.h.
Percussion literature, styles, notation, performance techniques, composition; survey.

MUS:6150 Seminar in Performance and Pedagogy Research I 1 s.h.
Research in the student's area; selection of a research topic. Offered spring semesters.

MUS:7132 Seminar in Performance and Pedagogy Research II 1 s.h.
Continuation of MUS:6150; thesis proposal preparation; survey of related literature. Offered spring semesters.

Organ and Sacred Music

MUS:4450 Organ Literature Survey 2 s.h.
Fifteenth century to present. Requirements: advanced undergraduate or graduate standing.

MUS:4452 Liturgics 2 s.h.
History of liturgies and survey of liturgical music from Judaism to present.

MUS:4454 Service Playing and Improvisation 2 s.h.
Hymn playing, accompanying, basic improvisation techniques. Requirements: organ major.

MUS:5450 History of Organ Building and Design 2-3 s.h.
Development of organ design from Middle Ages to present; basic concepts of construction, maintenance.

MUS:5452 Organ Pedagogy 2 s.h.
History, theory, practice from Renaissance to present; methods, literature appropriate for various levels.

MUS:5465 Hymnology 1-2 s.h.
Survey of historic hymnody: ancient odes, Latin hymns, Reformation hymns and psalms; current developments in hymnody and hymnals; may be special topic study.

MUS:5475 Organ Literature Special Topics 2 s.h.
Specialized study in selected areas of organ literature.

Piano

MUS:1211 Group Instruction in Piano I 1 s.h.
Beginning instruction for music majors whose principal performing medium is voice or an orchestral or band instrument; skill development in sight reading, technique, harmonization, transposition, improvisation, simple literature. Corequisites: MUS:1201. Requirements: music major.

MUS:1212 Group Instruction in Piano II 1 s.h.
Elementary to early intermediate instruction for music majors whose principal performing medium is voice or an orchestral or band instrument; continued skill development begun in MUS:1211; introduction of easy solo and ensemble literature. Corequisites: MUS:1202. Requirements: MUS:1211 or successful completion of proficiency examination.

MUS:2213 Group Instruction in Piano III 1 s.h.
Varies by semester: skills for the music therapy profession, sight-reading, harmonization, transposition, reading from a fake book, and improvisation (fall); skills for the music education profession, sight-reading, harmonization, transposition, score, and hymn reading (spring). Requirements: music therapy, music education, or piano major.

MUS:3400 Methods of Teaching Piano 2 s.h.
Methods, materials, and teaching techniques for preschool students, precollege students, and adult learners. Requirements: keyboard major.
MUS:5400 Piano Pedagogy I  2 s.h.
In-depth study of techniques and materials needed to teach intermediate and advanced piano students; judging competitions; conducting master classes; writing curriculum vitaeas and cover letters in preparation for academic job searches.

MUS:5401 Piano Pedagogy II  2 s.h.
History of the piano and its technique and pedagogy; national schools of piano playing; relationship of technological changes in piano construction to piano technique, pedagogy, and composition; major methods and treatises, historical recordings and video clips; research leading to understanding of students' individual piano lineage.

MUS:5410 Piano Literature I  2 s.h.
Baroque era to Mozart or Chopin through 1900.

MUS:5411 Piano Literature II  2 s.h.
Beethoven through Schumann or 20th century.

MUS:7400 Special Studies Piano Literature  arr.
Individual research in special aspects of piano literature; primarily for D.M.A. students.

MUS:7401 Special Studies in Piano Accompaniment and Chamber Music  arr.
Advanced collaborative arts practicum. Prerequisites: MUS:3480.

Recital and Thesis
MUS:3990 Special Studies  arr.
MUS:4900 Senior Recital  1 s.h.
MUS:4910 Bachelor’s Thesis  0-1 s.h.
MUS:4995 Honors in Music  1-4 s.h.
Requirements: honors standing.

MUS:6900 M.A. Recital  arr.
MUS:6920 M.A. Performance Project  arr.
MUS:6950 M.A. Thesis  arr.
MUS:7900 D.M.A. Recital  arr.

Theory
MUS:1200 Fundamentals of Music for Majors  3 s.h.
Rudiments of music—notation of pitch and rhythm, meter, scales, keys, intervals, triads; first of a five-semester sequence.

MUS:1201 Musicianship and Theory I  4 s.h.
Principles of harmony; emphasis on aural skills, theoretical concepts, notation. Offered fall semesters. Requirements: MUS:1200 or successful completion of music theory diagnostic exam, and concurrent enrollment in MUS:1211 or successful completion of piano proficiency exam.

MUS:1202 Musicianship and Theory II  4 s.h.
Continuation of MUS:1201. Offered spring semesters. Prerequisites: MUS:1201. Requirements: MUS:1212 or successful completion of piano proficiency exam.

MUS:2203 Musicianship and Theory III  4 s.h.
Continuation of MUS:1201 and MUS:1202; focus on common-practice repertory. Offered fall semesters. Prerequisites: MUS:1202.

MUS:2204 Musicianship and Theory IV  4 s.h.
Continuation of MUS:1201, MUS:1202, and MUS:2203; focus on late 19th- and early 20th-century repertories. Offered spring semesters. Prerequisites: MUS:2203.

MUS:2206 Form and Analysis  3 s.h.
Analysis of musical forms and procedures, including 18th- and 19th-century tonal repertoires. Prerequisites: MUS:2204. Requirements: undergraduate standing.

MUS:4200 Counterpoint Before 1600  3 s.h.
Two- and three-part counterpoint; Renaissance polyphony. Requirements: MUS:2203 for undergraduates; MUS:5200 for graduate students.

MUS:4201 Counterpoint After 1600  3 s.h.
Two- and three-part writing in the style of J.S. Bach; fugue. Requirements: MUS:2204 for undergraduates; MUS:5200 or exemption on Graduate Theory Advisory Exam for graduate students.

MUS:4210 Keyboard Harmony  1-2 s.h.
Melody harmonization and figured-bass realization at the keyboard. Requirements: MUS:2204 for undergraduates, MUS:5200 for graduate students; and keyboard proficiency.

MUS:5200 Basic Analytical Techniques  3 s.h.
Theories and strategies of analysis applied to tonal and post-tonal music.

MUS:5235 Tonal Analysis  3 s.h.
Requirements: MUS:2204 for undergraduates; MUS:5200 or exemption on Graduate Theory Advisory Examination for graduate students.

MUS:5236 Post-Tonal Analysis  3 s.h.
Requirements: MUS:2204 for undergraduates; MUS:5200 or exemption on Graduate Theory Advisory Examination for graduate students.

MUS:5240 Special Topics in Theory and Analysis  3 s.h.
Requirements: MUS:2204 for undergraduates; MUS:5200 or exemption on Graduate Theory Advisory Examination for graduate students.

MUS:6200 Music Theory Colloquium  0 s.h.
MUS:6210 History of Music Theory I 3 s.h.
Requirements: MUS:5200 or exemption on Graduate Theory Advisory Examination.

MUS:6211 History of Music Theory II 3 s.h.
Prerequisites: MUS:5200 and MUS:6210.

MUS:6215 Music Theory Pedagogy 3 s.h.
Methods and techniques of teaching college-level music theory, including harmony, sight singing, ear training.

MUS:6250 Advanced Tonal Theory and Analysis 3 s.h.
Prerequisites: MUS:5235.

MUS:6251 Advanced Post-Tonal Theory and Analysis 3 s.h.
Prerequisites: MUS:5236.

MUS:7280 Readings in Music Theory 0-1 s.h.

Voice and Opera

MUS:1510 Diction for Singers I 2 s.h.
Italian and German pronunciation for singing; basics of international phonetic alphabet; no previous background required.

MUS:2510 Diction for Singers II 2 s.h.
French and English pronunciation for singing.
Prerequisites: MUS:1510.

MUS:3500 Opera Workshop 2 s.h.
Opera performing techniques, including acting, aria interpretation, scene work.
Prerequisites: MUS:3501.

MUS:3501 Opera Theater Chorus 1 s.h.
Requirements: audition.

MUS:3502 Opera Production 2-4 s.h.
Preparation and rehearsals leading up to performance of full production; may include one-act opera, chamber opera, musical theater production, or full-length opera.

MUS:3503 Vocal/Operatic Coaching 1 s.h.
Professional-level vocal coaching in preparation for opera productions, opera workshop, degree recitals.
Corequisites: MUS:3502.

MUS:3510 Interpretation of German Art Song 1 s.h.
Schubert, Schumann, Brahms, Wolf, Strauss, Mahler; appropriate diction, style.
Prerequisites: MUS:1510 and MUS:2510.

MUS:3511 Interpretation of Non-German Art Song 1 s.h.
Art songs in English, French, Italian, Spanish; appropriate diction, style.
Prerequisites: MUS:1510 and MUS:2510.

MUS:3520 Singing for Actors 2 s.h.
Skill development for healthy, effective singing in the musical theatre style; techniques of vocal production through breath management, resonance, articulation, flexibility; song interpretation and repertoire.

MUS:3521 Acting for Singers and for Dancers 2 s.h.
Fundamentals of acting technique, with attention to demands on performers in opera, musical theater, and dance.
Same as THTR:3521, DANC:3521.

MUS:5510 Graduate Diction 2 s.h.
Advanced pronunciation of singing languages.
Requirements: grade of B or higher in undergraduate diction in French, German, and Italian.

MUS:5520 Principles of Voice Production 3 s.h.
Basic physical, physiological, pedagogical principles in understanding professional, nonprofessional, impaired voice production; vocal anatomy, voice classification; control of loudness, pitch, register, quality; efficient, inefficient use of voice; instrumentation for voice analysis, synthesis. Offered fall semesters of odd years.

MUS:5555 Voice Habilitation 2-3 s.h.
Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters.
Prerequisites: CSD:4114 or CSD:5201. Same as CSD:5213.

MUS:5620 Methods of Teaching Voice 3 s.h.
Attitude, musicianship, foreign language aptitude, physical and emotional characteristics; mental images used to modify respiratory, phonatory, articulatory behavior; vocal hygiene; performance anxiety; student-teacher relationships; administration in vocal schools, professional organizations. Offered spring semesters.

MUS:6520 Methods of Teaching Voice 3 s.h.
Comparison of Kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Same as CSD:6204, THTR:6525.

MUS:6530 Topics in Vocal Performance 2 s.h.
Selected areas of vocal performance.

MUS:6535 Opera Theater Directing Seminar 2 s.h.
Exploration, discussion, and experience using techniques unique to directing opera. Score and libretto analysis, fundamentals of stagecraft, casting and management skills.

MUS:6540 Survey of Operatic Literature 3 s.h.
Important operatic scores examined from standpoint of performers, directors; production problems.

MUS:6541 Survey of Song Literature I 3 s.h.
German language lieder from 18th century to present; French mélodie from Meyerbeer to present. Offered fall semesters of odd years.
MUS:6542 Survey of Song Literature II 3 s.h.
British, American, Italian, Spanish, Latin American, 
Scandinavian, and Russian art song from 18th century to 
present. Offered fall semesters of even years.

MUS:6556 Instrumentation for Voice Analysis 2 s.h.
Glottographic, videostroboscopic, electromyographic, and 
acoustic analysis for assessment of vocal and respiratory 
function; using these techniques in conjunction with 
perceptual evaluation of voice; through the Vocolgy 
Institute in Utah. Offered summer sessions of even years. 
Requirements: enrollment in Summer Vocolgy Institute, 
Salt Lake City, Utah. Same as CSD:6221.
Optical Science and Technology Center

**Director**
- Michael E. Flatte (Physics and Astronomy)

**Faculty:** [http://ostc.uiowa.edu/members](http://ostc.uiowa.edu/members)

**Web site:** [http://ostc.uiowa.edu](http://ostc.uiowa.edu)

The Optical Science and Technology Center consists of faculty members from the Departments of Chemical and Biochemical Engineering (p. 861) and Electrical and Computer Engineering (p. 884) (College of Engineering), and the Departments of Chemistry (p. 135) and Physics and Astronomy (p. 507) (College of Liberal Arts and Sciences). Among the faculty are distinguished scientists who have developed international reputations for innovative research on the frontiers of optical science and engineering. Funding to support research in the Center comes from a variety of federal, state, and private sources, including the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA), the Office of Naval Research (ONR), the National Institutes of Health (NIH) and the ACS Petroleum Research Fund.

Current research areas include laser spectroscopy and photochemistry, photonics and optoelectronics, ultrafast laser development, condensed matter physics, materials growth techniques, device physics/engineering, surface chemistry, chemical sensors, environmental chemistry, polymer science, plasma physics, and nonlinear optics.

Much of the research is housed in the modern Iowa Advanced Technology Laboratories. The laboratories in this environmentally-controlled building are devoted primarily to research in areas of optical science and technology. These world-class research laboratories offer state-of-the-art equipment including a variety of novel laser systems (such as widely tunable, ultrafast lasers), materials growth and characterization facilities, optoelectronics device fabrication and characterization, UHV surface science laboratories, and supersonic molecular beam time-of-flight mass spectrometer systems. Scientists also have access to University and department diagnostic support facilities, including nuclear magnetic resonance, mass spectrometry, Fourier transform infrared spectroscopy, X-ray diffraction, and electron microscopy.

**Courses**

**OSTC:3750 Fundamentals of Micro and Nanofabrication**

3 s.h.

Fundamentals of micro- and nano-fabrication processes; physical principles of photo and electron beam lithography, alternative nano-lithography techniques, thin film deposition, molecular beam epitaxy, atomic layer deposition, self-assembly; metrology methods; physical and chemical processes of wet and plasma etching; cleanroom science, operations, safety protocols; sequential micro- and nano-fabrication processes involved in manufacture of semiconductor, photonic, nanoscale devices; imaging and characterization of micro- and nano-structures; scientific and technological applications of emerging micro- and nano-devices and systems.

Prerequisites: PHYS:1611 or PHYS:1612 or PHYS:1702 or BIOL:1141 or CHEM:1060 or CHEM:1110 or CHEM:1120.

Requirements: undergraduate lab course in chemistry, biology, physics, or engineering. Same as PHYS:3750.
Performing Arts Entrepreneurship

**Director, Division of Performing Arts**
- Alan MacVey

**Coordinator, Performing Arts Entrepreneurship**
- David McGraw

**Undergraduate certificate:** performing arts entrepreneurship

**Web site:** [http://dpa.uiowa.edu/academic-programs/performing-arts-entrepreneurship-certificate](http://dpa.uiowa.edu/academic-programs/performing-arts-entrepreneurship-certificate)

**Undergraduate Program of Study**
- Certificate in Performing Arts Entrepreneurship

The Division of Performing Arts, in partnership with the John Pappajohn Entrepreneurial Center in the Tippie College of Business, offers the undergraduate Certificate in Performing Arts Entrepreneurship. The program gives students the opportunity to pursue professional studies in the performing arts, in the framework of a liberal arts education, and to develop the skills required for creating market-based opportunities in the arts.

**Certificate**

The Certificate in Performing Arts Entrepreneurship requires a minimum of 29 s.h. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor’s degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The program is designed for students of dance, music, and theatre arts who wish to learn about the business of the performing arts and to develop the entrepreneurial skills necessary for promoting their artistic work.

Certificate students are strongly encouraged, but not required, to pursue a major in one of the performing arts.

Work for the certificate includes entrepreneurship-related courses in accounting, financial management, and marketing as well as courses focused on arts management and leadership practices in both commercial and nonprofit organizations (20 s.h.). Students also must complete course work in dance, music, or theatre arts (9 s.h.) and an internship in an arts organization (0 s.h.).

Students may not use a course to satisfy more than one certificate requirement (e.g., a business course required for the certificate that is cross-listed in dance, music, or theatre arts may not also be counted toward the performing arts course requirement).

The Certificate in Performing Arts Entrepreneurship requires the following course work.

**PERFORMING ARTS**

Certificate students earn 9 s.h. in courses numbered 3000 or above taken in one of three performing arts units: the Department of Dance, the School of Music, or the Department of Theatre Arts. Many of these courses have prerequisites; consult an advisor about course sequencing.

**BUSINESS AND ENTREPRENEURSHIP**

Students must complete ENTR:1350 Foundations in Entrepreneurship, an entrepreneurship prerequisite that is offered both on campus and online. They also must complete several courses that focus on entrepreneurial and arts financing; entrepreneurship, innovation, and new ventures in the arts; entrepreneurial marketing; e-commerce for entrepreneurs; arts management; and arts leadership.

Prerequisite:

ENTR:1350 Foundations in Entrepreneurship 2 s.h.

One of these:

ARTS:3400 Grant Writing in the Arts 3 s.h.

ENTR:3100 Entrepreneurial Finance 3 s.h.

One of these:

DPA:3520 New Ventures in the Arts 3 s.h.

ENTR:2000 Entrepreneurship and Innovation 3 s.h.

All of these:

DPA:3510 Introduction to Arts Management 3 s.h.

DPA:4510 Arts Leadership Seminar 3 s.h.

ENTR:3200 Entrepreneurial Marketing 3 s.h.

ENTR:3600 E-Commerce Strategies for Entrepreneurs 3 s.h.

**INTERNSHIP**

Students may complete the required internship (0 s.h.) during any semester in the program. The Pomerantz Career Center coordinates a wide variety of internships; see Career Center Programs (p. 1201) (University College) in the Catalog. Students also may choose other internship opportunities. The Iowa Arts Council and the Iowa Cultural Corridor Alliance maintain lists of recommended host organizations.

**Living-Learning Community**

First- and second-year students studying performing arts entrepreneurship may apply to live in the Arts Living-Learning Community, a coed floor in a University of Iowa east campus residence hall. The community includes students from art and art history, dance, film, music, and theatre arts.

**Courses**

**Lower-Level Undergraduate**

**DPA:1000 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**DPA:1412 The Arts in Performance** 3 s.h.

**DPA:2060 Dance and Society in Global Contexts** 3 s.h.
Dance and other physical endeavors as embodied forms of knowledge and culture; U.S. dance practices; European and African dance cultures; aesthetic and political issues raised by concert dance (i.e., performance, choreography, spectatorship, criticism); ethnographic methods to examine the function of dance in cultural formation (i.e., spiritual, celebratory, social, political contexts); lecture, discussion, viewing, movement workshops, formal and informal writing, field research, and BLOG construction. GE: Literary, Visual, and Performing Arts. Same as DANC:2060.

**Upper-Level Undergraduate and Graduate**

**DPA:3004 World of the Beatles**

How the Beatles' music was influenced by American pop music, the drug culture, and the Avant Garde, nonwestern instruments and philosophy, anti-war sentiments, and world politics, and so forth; Beatlemania's impact on British and American cultures and its role in opening Eastern Europe to the West. Same as MUS:3004.

**DPA:3085 Introduction to Afro-Cuban Dance**

Introduction to the dance, drumming, and songs of the Afro-Cuban folkloric traditions; emphasis on dance. May participate in UI Afro-Cuban Drum and Dance ensemble. Same as DANC:3085.

**DPA:3086 Afro-Cuban Drum and Dance Performance**

Dance repertory for the UI Afro-Cuban Drum and Dance Ensemble. Performance pieces based on dance, drumming, songs of the Afro-Cuban folkloric traditions. May participate in UI Afro-Cuban Drum and Dance Ensemble. Same as DANC:3086.

**DPA:3154 Introduction to Afro-Cuban Drumming**

Drumming, dance, songs from folkloric and ceremonial Afro-Cuban forms; emphasis on drumming; may include participation in Afro-Cuban drum and dance ensemble. Same as MUS:3154.

**DPA:3210 Makeup Design for the Stage**

Same as THTR:3210.

**DPA:3221 Technology for the Entertainment Industry**

Introduction to technology skills that are at the center of the entertainment industry; programming and operating digital lighting and sound consoles, intelligent lighting systems, projection hardware and software; outdoor event rigging, metal construction, and fabrication. Same as THTR:3221.

**DPA:3510 Introduction to Arts Management**

Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as THTR:3510, INTD:3510.

**DPA:3520 New Ventures in the Arts**

3 s.h.

**DPA:3850 Introduction to Laban Movement Studies**

**DPA:3851 Introduction to the Alexander Technique**

1 s.h.

Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research. Same as DANC:4060.

**DPA:4060 The Contemporary Dance Scene**

3 s.h.

Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or THTR:3520 or ENTR:2000. Same as ENTR:4510, THTR:4510, INTD:4510.

**DPA:4510 Arts Leadership Seminar**

3 s.h.

**DPA:5060 Theories of Dance and the Body**

3 s.h.

Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Same as DANC:5060.

**DPA:5550 Collaborative Performance**

1-4 s.h.

Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as DANC:5550, THTR:5610.
Philosophy

Chair

• David Cunning

Undergraduate major: philosophy (B.A.)
Undergraduate minor: philosophy
Graduate degrees: M.A. in philosophy; Ph.D. in philosophy
Faculty: http://clas.uiowa.edu/philosophy/people/faculty
Web site: http://clas.uiowa.edu/philosophy/

The Department of Philosophy offers programs of study for undergraduate and graduate students. It also administers the interdisciplinary undergraduate major in ethics and public policy, which it offers jointly with the Departments of Economics and Sociology; see Ethics and Public Policy (p. 286) in the Catalog.

Undergraduate Programs of Study

• Major in philosophy (Bachelor of Arts)
• Minor in philosophy

Undergraduate courses in philosophy are designed to impart knowledge of fundamental issues and main developments in philosophy while strengthening logical and analytic skills. A major in philosophy develops abilities useful for work in many fields and for any situation requiring clear, systematic thinking. Philosophy majors earn among the very highest scores on the Law School Admission Test (LSAT), the Graduate Management Admission Test (GMAT), the Medical College Admission Test (MCAT), and the Graduate Record Exam (GRE) General Test. Philosophy graduates enter into such fields as law, business, medicine, scientific research, government, consulting, journalism, and K-12 education, among others. Students who intend to teach philosophy in a college setting must earn a graduate degree.

Bachelor of Arts

The Bachelor of Arts with a major in philosophy requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. A minimum of 21 s.h. for the major must be earned at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also complete the College of Liberal Arts and Sciences General Education Program (p. 313).

Students should discuss the requirements for the major with an advisor as soon as possible. The advisor can suggest the most effective order for taking courses, based on each student's interests and on the relation of the course topics to each other.

The major requires 30 s.h. of philosophy courses (prefix PHIL), of which at least two courses must be numbered 4000 or above. Only 6 s.h. of the total hours required for the major can be taken in course work numbered at the 1000-level (see the list below for options).

May take two courses from these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL:1033 The Meaning of Life</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:1034 Liberty and the Pursuit of Happiness</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:1401 Matters of Life and Death</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:1636 Principles of Reasoning: Argument and Debate</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:1861 Introduction to Philosophy</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

In addition, the major in philosophy requires the following course work.

VALUE THEORY

At least two of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL:2402 Introduction to Ethics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2415 Bioethics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2429 War, Terrorism, and Torture</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2432 Introduction to Political Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2435 Philosophy of Law</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2436 The Nature of Evil</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3342 Multiculturalism and Toleration</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3430 Philosophy of Human Rights</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3431 Aesthetics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3485 Buddhist Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3847 Philosophical Issues (if content is applicable; check with instructor)</td>
<td>3-4 s.h.</td>
</tr>
<tr>
<td>PHIL:3849 Undergraduate Seminar in Philosophy (if content is applicable; check with instructor)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4152 Plato (if content is applicable; check with instructor)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4153 Aristotle (if content is applicable; check with instructor)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4375 Rawls's Political Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4480 Analytic Ethics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4481 Issues in Philosophy of Law</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4482 History of Ethics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4485 Political Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4798 Topics in Philosophy (if content is applicable; check with instructor)</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

METAPHYSICS/EPISTEMOLOGY

At least two of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIL:2343 Philosophy East and West</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2437 Introduction to Metaphysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2442 Knowledge and the Threat of Skepticism</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2480 Language and Its Social Roles</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2534 Philosophy of Religion</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2538 Minds and Machines</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:2542 Minds and Brains</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3002 Ancient Skepticism</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3112 Medieval Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3318 Twentieth-Century Philosophy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3604 Introduction to Philosophy of Science</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3633 Philosophy of History</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:3847 Philosophical Issues (if content is applicable; check with instructor)</td>
<td>3-4 s.h.</td>
</tr>
<tr>
<td>PHIL:3849 Undergraduate Seminar in Philosophy (if content is applicable; check with instructor)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHIL:4050 Topics in Buddhist Philosophy</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

PHIL:2480 Introduction to Ethics 3 s.h.
PHIL:2415 Bioethics 3 s.h.
PHIL:2429 War, Terrorism, and Torture 3 s.h.
PHIL:2432 Introduction to Political Philosophy 3 s.h.
PHIL:2435 Philosophy of Law 3 s.h.
PHIL:2436 The Nature of Evil 3 s.h.
PHIL:3342 Multiculturalism and Toleration 3 s.h.
PHIL:3430 Philosophy of Human Rights 3 s.h.
PHIL:3431 Aesthetics 3 s.h.
PHIL:3485 Buddhist Philosophy 3 s.h.
PHIL:3847 Philosophical Issues (if content is applicable; check with instructor) 3-4 s.h.
PHIL:3849 Undergraduate Seminar in Philosophy (if content is applicable; check with instructor) 3 s.h.
PHIL:4152 Plato (if content is applicable; check with instructor) 3 s.h.
PHIL:4153 Aristotle (if content is applicable; check with instructor) 3 s.h.
PHIL:4375 Rawls's Political Philosophy 3 s.h.
PHIL:4480 Analytic Ethics 3 s.h.
PHIL:4481 Issues in Philosophy of Law 3 s.h.
PHIL:4482 History of Ethics 3 s.h.
PHIL:4485 Political Philosophy 3 s.h.
PHIL:4798 Topics in Philosophy (if content is applicable; check with instructor) 3 s.h.
PHIL:4152 Plato (if content is applicable; check with instructor) 3 s.h.
PHIL:4153 Aristotle (if content is applicable; check with instructor) 3 s.h.
PHIL:4258 Descartes 3 s.h.
PHIL:4260 Spinoza and Leibniz 3 s.h.
PHIL:4263 Berkeley and Hume 3 s.h.
PHIL:4266 Kant 3 s.h.
PHIL:4346 Frege and Russell 3 s.h.
PHIL:4373 Heidegger 3 s.h.
PHIL:4377 Wittgenstein 3 s.h.
PHIL:4379 Quine 3 s.h.
PHIL:4586 Topics in Metaphysics 3 s.h.
PHIL:4587 Epistemology 3 s.h.
PHIL:4588 Philosophy of Mind 3 s.h.
PHIL:4589 Philosophy of Language 3 s.h.
PHIL:4590 Foundations of Cognitive Science 3 s.h.
PHIL:4694 Philosophy of Science 3 s.h.
PHIL:4696 Philosophy of the Human Sciences 3 s.h.
PHIL:4798 Topics in Philosophy (if content is applicable; check with instructor) 3 s.h.

ANCIENT PHILOSOPHY
This course:
PHIL:2111 Ancient Philosophy 3 s.h.

MODERN PHILOSOPHY
At least one of these:
PHIL:2214 Seventeenth-Century Philosophy 3 s.h.
PHIL:2215 Modern Philosophy 3 s.h.
PHIL:2216 Eighteenth-Century Philosophy 3 s.h.

INTRODUCTORY LOGIC
And this course:
PHIL:2603 Introduction to Symbolic Logic 3 s.h.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

Before the fifth semester begins: at least one course in the major
Before the seventh semester begins: at least five courses in the major and at least 90 s.h. earned toward the degree
Before the eighth semester begins: at least six courses in the major
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Honors in the Major
Students majoring in philosophy have the opportunity to graduate with honors in the major. In order to be admitted to the departmental honors program, a student must have taken and passed three courses required for the philosophy major. To graduate with honors in the major, students must complete the requirements for the major with a g.p.a. of at least 3.40 in philosophy course work and must write an acceptable honors thesis on a significant topic in philosophy of interest to them. Contact the department’s honors advisor for more information.

Minor
The minor in philosophy requires a minimum of 15 s.h. in philosophy courses, including at least 9 s.h. in courses numbered 2000 or above. At least 12 s.h. for the minor must be taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Contact the undergraduate studies director for more information.

Graduate Programs of Study
• Master of Arts in philosophy
• Doctor of Philosophy in philosophy

The Department of Philosophy grants admission only for the Ph.D. program. The M.A. is awarded to students as they work successfully toward the Ph.D.; it is not offered as a terminal degree.

The graduate program is designed to train teachers and scholars in philosophy. The main areas in the graduate curriculum are metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Master of Arts
The Master of Arts in philosophy requires a minimum of 30 s.h. of graduate credit and is offered without thesis. The M.A. is not offered as a terminal degree; it is awarded to students as they work successfully toward the Ph.D. Requirements include courses in metaphysics, epistemology, history of philosophy, ethics, logic, philosophy of science, and value theory. There is no foreign language requirement. Students must take an oral final examination. Contact the graduate studies director for more information.

Joint M.A./J.D.

The Department of Philosophy and the College of Law offer a joint Juris Doctor/Master of Arts degree program. M.A./J.D. students may count 12 s.h. earned in the joint program toward both degrees. They must earn 18 of the 30 s.h. required for the M.A. in graduate-level philosophy courses (the usual requirement is 24 s.h.). They also must earn a minimum of 36 s.h. in undergraduate and graduate philosophy courses, combined (the usual requirement is 42 s.h.).

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

See “Juris Doctor” and “Joint J.D./Graduate Degrees” in the College of Law (p. 969) section of the Catalog.

Doctor of Philosophy
The Ph.D. requires a minimum of 72 s.h. of graduate credit. Candidacy for the doctoral program is determined by a formal vote of the entire Department of Philosophy
faculty, usually after the student has completed three semesters of graduate study in residence.

Requirements include courses in metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory. Students are required to take a comprehensive examination that covers their area of specialization and includes both written and oral components. Upon successfully completing the exam, they begin work on a prospectus for their dissertation. There is no foreign language requirement. Contact the graduate studies director for more information.

Courses

For more detailed descriptions of undergraduate and graduate courses offered during a given semester or summer session, visit the University's ISIS web site before early registration.

Lower-Level Undergraduate

PHIL:1001 CLAS Master Class 1-3 s.h.
Exploration of a single topic in a series of lectures by faculty presenting divergent perspectives; illuminates intellectual adventure inherent in liberal arts and sciences; encourages discovery of majors and other areas of study within the College of Liberal Arts and Sciences. Same as CLAS:1001, RELS:1010, THTR:1001, CS:1001, CSD:1001, ENGL:1001, BIOC:1001, ARTS:1001.

PHIL:1010 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

PHIL:1033 The Meaning of Life 3 s.h.
Philosophical investigation of the nature of human life and of what makes human life valuable and/or meaningful. GE: Historical Perspectives.

PHIL:1034 Liberty and the Pursuit of Happiness 3 s.h.
Examination of conflict between state power and individual liberty; philosophical and historical examination of theories from Plato through today. GE: Historical Perspectives.

PHIL:1401 Matters of Life and Death 3 s.h.
Contemporary ethical controversies with life and death implications; topics may include famine, brain death, animal ethics, abortion, torture, terrorism, capital punishment. GE: Values, Society, and Diversity.

PHIL:1636 Principles of Reasoning: Argument and Debate 3 s.h.
Critical thinking and its application to arguments and debates. GE: Quantitative or Formal Reasoning.

PHIL:1861 Introduction to Philosophy 3 s.h.
Varied topics; may include personal identity, existence of God, philosophical skepticism, nature of mind and reality, time travel, and the good life; readings, films. GE: Values, Society, and Diversity.

PHIL:2111 Ancient Philosophy 3 s.h.
Ancient Greek philosophy from Thales to Aristotle; pre-Socratic cosmologists, Socrates, ancient medicine and religion, rivalry between sophists and philosophers; primary focus on reaction of Plato and Aristotle to this intellectual inheritance culminating in their greatest achievement, the invention of systematic philosophy.

PHIL:2214 Seventeenth-Century Philosophy 3 s.h.
Varied topics; may include free will, the mind-body problem, existence of God, relationship between God and creatures, science and religion, stoicism, early feminism; Francis Bacon, Rene Descartes, Margaret Cavendish, Baruch Spinoza, Anne Conway, G.W. Leibniz, Mary Astell, John Locke.

PHIL:2215 Modern Philosophy 3 s.h.
Varied topics; may include free will, the mind-body problem, existence of God, creation versus evolution, subjectivity of perception, limits of cognition, the good life; Rene Descartes, Margaret Cavendish, Baruch Spinoza, Anne Conway, G.W. Leibniz, Mary Astell, John Locke, George Berkeley, David Hume, Immanuel Kant.

PHIL:2216 Eighteenth-Century Philosophy 3 s.h.
Varied topics; may include appearance versus reality, empiricism and science, the mind-body problem, existence of God, creation versus evolution, subjectivity of perception, limits of cognition, the good life, early feminism; Mary Astell, John Locke, George Berkeley, David Hume, Immanuel Kant.

PHIL:2343 Philosophy East and West 3 s.h.
A comparative study of Eastern and Western theories and arguments concerning the nature and existence of the self.

PHIL:2402 Introduction to Ethics 3 s.h.
Analytical and historical introduction to ethical theories; issues such as the nature of the goodness, distinction between right and wrong. GE: Values, Society, and Diversity.

PHIL:2415 Bioethics 3 s.h.
Recent developments in biotechnology and medicine; designer babies and cloning, genetic screening for disease, distributive justice in health care, animal experimentation, physician-assisted suicide, and euthanasia.

PHIL:2429 War, Terrorism, and Torture 3 s.h.
Examination of some of the most compelling ethical and legal questions surrounding the topic of war (Can a war ever be just? If so, under which conditions is one justified in waging war? Are there limitations on permissible ways to fight a war? How are acts of terrorism different from acts of war? Is torture ever justified?).

PHIL:2432 Introduction to Political Philosophy 3 s.h.
Survey of central problems in political philosophy; focus on liberty, equality, justice, and purpose of the state; core philosophers may include John Locke, Jean-Jacques Rousseau, Thomas Hobbes, John Stuart Mill, and John Rawls.
PHIL:2435 Philosophy of Law 3 s.h.
Examination of jurisprudential theories and their answers to the question, "What is law?"; intersection between law and morality, legal punishment, political obligation, constitutional interpretation.

PHIL:2436 The Nature of Evil 3 s.h.
The nature of evil explored through philosophical texts, videos and films, case studies of individuals.

PHIL:2437 Introduction to Metaphysics 3 s.h.
Questions about the ultimate nature of reality and our place in it: What is the nature of space and time? Is time travel possible? What is the self and how does it persist through time and change? What is the nature of causation? Do we have free will?

PHIL:2442 Knowledge and the Threat of Skepticism 3 s.h.
Skeptical doubt and distinction between appearance and reality; nature of knowledge and what, if anything, we can know.

PHIL:2480 Language and Its Social Roles 3 s.h.
Introduction to basic concepts in philosophy of language and speech act theory; social and political uses of language including nature of speech, silencing, oppressive and hate speech, propaganda and dehumanizing language, lying and misleading with language.

PHIL:2534 Philosophy of Religion 3 s.h.
Historical to contemporary treatments of central issues; nature of faith, existence and nature of God, science and religion, ethics and religion, miracles, religious experience, interpretation of religious texts. Requirements: sophomore or higher standing. Same as RELS:2834.

PHIL:2538 Minds and Machines 3 s.h.
Questions concerning artificial intelligence: What is a mind? What is the relationship between minds and machines? What distinguishes real minds from artificial minds? Could computers or robots think or have feelings? If we create something whose intelligence surpasses that of humans, do we have a right to control it? Are your smart electronic devices parts of your mind? How has the Internet changed our lives? Do we survive, perhaps immortally, if we upload contents of our minds to the Internet or Cloud?

PHIL:2542 Minds and Brains 3 s.h.
Nature of mind in the age of the brain; exploration of questions (How is the mind related to the brain? What do brain scans show? How does the brain process information? What is conscious experience? Is free will threatened by neuroscience? How are intuitive conceptions of memory, emotion, and other mental capacities changing?).

PHIL:2603 Introduction to Symbolic Logic 3 s.h.
Main ideas and techniques of modern natural deduction with quantifiers (all, some, most, exactly one); relations and identity; topics in philosophy of logic including nature of logic, nature of functions, logical necessity, identity as a relation, and how we know logic.

Upper-Level Undergraduate and Graduate

PHIL:3002 Ancient Skepticism 3 s.h.
Introduction to skeptical philosophy of Greek philosopher and physician, Sextus Empiricus (c. 160-210 A.D.); skepticism as a way of life and a form of philosophical therapy, skeptic's avoidance of dogmatism by suspension of belief, attaining suspension through discovery of opposing arguments on either side of any philosophical problem, skeptic's attack on ancient theories of ethics and logic, search for a criterion of truth, relation of skepticism to rival contemporary schools of medicine (Empiricists, Rationalists, Methodists); influence of the rediscovery of Sextus' writings on 17th century thinkers.

PHIL:3112 Medieval Philosophy 3 s.h.
Introduction to St. Thomas Aquinas, William of Ockham, and Duns Scotus, three of the most brilliant philosophers of the high middle ages (11th through 13th centuries); their writing as Christians in (fascinated) reaction to philosophical systems of their pagan predecessors; how medieval philosophers wrestled with problems concerning possibility of free will and responsibility in face of divine omniscience and foreknowledge; existence of abstract universals in a world that is nonabstract and particular; nature and existence of God; skepticism and limits of human knowledge; nature of good and evil. Same as HIST:3112.

PHIL:3143 Existentialism and Freedom 3 s.h.
Main ideas of existentialism, including free will, authenticity, power, nihilism; emphasis on Jean Paul Sartre, Simone de Beauvoir, Friedrich Nietzsche, Martin Heidegger, Soren Kierkegaard, Albert Camus.

PHIL:3312 Twentieth-Century Philosophy 3 s.h.
Exploration of fundamental issues that shaped philosophy in the past century; impact of the theory of evolution on philosophy; whether philosophy is a science; nature of truth and meaning; nature of necessity; nature of space, time, and being; John Dewey, Bertrand Russell, Gottlob Frege, Ludwig Wittgenstein, W.V.O Quine, Saul Kripke, David Lewis.

PHIL:3342 Multiculturalism and Tolerance 3 s.h.
Evaluation of multiculturalism as a political policy and as a personal attitude of respect; individual and collective identity, gender justice, autonomy, toleration, multiculturalism and education; contested practices.

PHIL:3430 Philosophy of Human Rights 3 s.h.
Examination of the concept of human rights; sources of human rights; how we justify calling some, while not other rights, "human rights"; applied issues in women's, children's, and anti-poverty rights.
PHIL:3431 Aesthetics 3 s.h.
Issues regarding art, aesthetic judgment, and role of art in society; investigation of questions: What is art and what is good art? What is conceptual art? Are aesthetic judgments just a matter of taste, or are some opinions about art better than others? What features of artworks matter for making such judgments, and which don’t? Issues pertaining to various arts including painting and sculpture, music, fiction and poetry, performance arts; introduction to artworks and artists.

PHIL:3510 Neuroethics 3 s.h.
Issues that arise from advances in knowledge of brain-mind relations: cognitive neuroenhancement, neuroimaging-based lie detection and privacy, changing standards of moral and legal responsibility, justification of punishment, admissibility of neuroimaging in legal contexts.

PHIL:3604 Introduction to Philosophy of Science 3 s.h.
Examination of basic questions regarding nature of science and scientific knowledge: When is a field of inquiry a science? What counts as evidence in a science, and why? In what sense, if any, is science objective? What are scientific laws, theories, and explanations? If scientific theories are never proven with certainty, are we justified in believing them to be true? Recommendations: background in science (psychology, biology, chemistry, physics).

PHIL:3633 Philosophy of History 3 s.h.
Major problems; objectivity, historiographic methods and theory of interpretation, nature of historical explanations, historical laws and free will, reducibility of group phenomena to individual actions.

PHIL:3845 Buddhist Philosophy 3 s.h.
Theories and arguments concerning the Buddhist path to enlightenment. Same as RELS:3645.

PHIL:3847 Philosophical Issues 3-4 s.h.
A philosophical topic or controversy.

PHIL:3849 Undergraduate Seminar in Philosophy 3 s.h.
Selected problems. Same as CLSA:3849.

PHIL:3950 Readings in Philosophy arr.
Requirements: honors standing and sophomore or higher standing.

PHIL:4050 Topics in Buddhist Philosophy 3 s.h.
Buddhist theories and arguments concerning nature and existence of the self.

PHIL:4152 Plato 3 s.h.
Introduction to metaphysics, epistemology, and moral theory of Plato; topics may include the philosophy of Socrates, Plato's theory of Forms, the tripartite soul, nature of virtue and moral education; Plato's cosmology and assimilation of human nature to the divine; close reading and interpretation of specific texts.

PHIL:4153 Aristotle 3 s.h.
Introduction to metaphysics, epistemology, and moral theory of Aristotle; topics may include Aristotle's theories of matter and form, causation, motion, change, space, void, time; Aristotle's philosophy of biology and theory of the soul; unity of virtue, nature of action and choice; the syllogism. Combines survey with close reading and interpretation of specific texts.

PHIL:4258 Descartes 3 s.h.
Descartes' systematic philosophy and impact on current debates; topics may include skepticism, the confusion of everyday experience, the mind-body problem, innate ideas and empiricism, free will, nature and existence of God, science and religion, problem of evil, stoicism.

PHIL:4260 Spinoza and Leibniz 3 s.h.
Comparative and critical examination of metaphysical and epistemological views of 17th-century rationalists, Baruch Spinoza and G.W. Leibniz; topics may include monism, panpsychism, space and time, free will and necessity, the confusion of everyday experience, incomplete versus complete ideas, nature and existence of God, stoicism, passions and emotions as objects of detached scientific investigation.

PHIL:4263 Berkeley and Hume 3 s.h.
Comparative and critical examination of metaphysical and epistemological views of 18th-century empiricists, George Berkeley and David Hume; topics may include the theory of ideas, perception, skepticism, limits of knowledge, the mind-body problem, scientific and philosophical method, role of God in Berkeley's and Hume's philosophical systems.

PHIL:4266 Kant 3 s.h.
Main ideas and major texts of Kant's metaphysics and epistemology; particular attention given to Critique of Pure Reason.

PHIL:4346 Frege and Russell 3 s.h.
Major issues concerning Frege's revolution in logic, Cantor's taming of the infinite, and Russellian synthesis of these revolutions to form Logicist thesis that all of pure mathematics (including geometry) is a branch of the science of logic; central issues in the philosophy of language and analysis of logical form; Russell's theory of definite descriptions and his logicism as a paradigm for a philosophical solution to mysteries of existence, number, infinite, motion, and Zeno paradoxes.

PHIL:4373 Heidegger 3 s.h.
Main ideas and major texts of Martin Heidegger; early and later periods; particular attention given to Being and Time; focus on Heidegger's analyses of Being and being-in-the-world.

PHIL:4375 Rawls's Political Philosophy 3 s.h.
Major works by John Rawls, selected secondary readings; contractualism, concept of justice, justice as fairness as an alternative to utilitarianism, Kantian foundations, comprehensive and political liberalism.
they seem to us to be? What reason do we have for thinking that things are as they are, and rational belief; investigation of questions: Do we really know as much as we are inclined to think we do? Can we rule out the possibility that we are dreaming or being systematically deceived right now? And if we can't, what reason do we have for thinking that things are as they seem to us to be?

PHIL:4377 Wittgenstein 3 s.h.
Main ideas and major texts of Ludwig Wittgenstein; early and later periods; particular attention given to *Tractatus, Philosophical Investigations*, and development of Wittgenstein's thought.

PHIL:4379 Quine 3 s.h.
Evaluation of Quine's attempt to restructure philosophy so that ontological questions are questions of "what there is" and methods for answering such questions are methods of natural (empirical) sciences; central issues pertaining to Quine's thesis that this naturalization program also applies to physics, mathematics, logic; comparison of Dewey's pragmatist and evolutionary reconstruction in philosophy to that of Quine and others (e.g., Carnap, Russell, Wittgenstein); major themes involving Quine on set theory, modal logic, the *a priori*; and the thesis that meaning is translation and translation is indeterminate.

PHIL:4480 Analytic Ethics 3 s.h.
Exploration of central meta-ethical questions: Are there objective values, and if there are, can we gain knowledge of what has such value? Should we always act so as to bring about the best consequences? If not, why not? Can we derive moral conclusions from scientifically established facts about the world? If not, does this undermine the idea that we can offer sensible arguments for ethical conclusions?

PHIL:4481 Issues in Philosophy of Law 3 s.h.
Nature of law and legal interpretation; natural law theory and positivism; critical legal theories.

PHIL:4482 History of Ethics 3 s.h.
Thomas Hobbes' 1651 publication, *Leviathan*, set British moral philosophy on a new course, rejecting most of the presuppositions of theistic natural law theory, shocked and outraged many of his contemporaries, and set in motion a debate about the nature of morality that continues today in philosophical ethics; focus on debate between sentimentalists (Francis Hutcheson, David Hume, Adam Smith) who regarded morality as a matter of human attitudes and emotions, and rationalists (Samuel Clarke, Ralph Cudworth, Richard Price) who regarded morality as analogous to mathematics.

PHIL:4485 Political Philosophy 3 s.h.
Political philosophy topics; may include obligation to obey the law, secession, nature of rights, limits of state power, just distribution of property, feminist criticisms.

PHIL:4586 Topics in Metaphysics 3 s.h.
In-depth exploration of metaphysical problems: material constitution, persistence of objects and persons through time, problem of universals, mind-body problem, free will and determinism.

PHIL:4587 Epistemology 3 s.h.
Theories of nature, structure, and extent of knowledge and rational belief; investigation of questions: Do we really know as much as we are inclined to think we do? Can we rule out the possibility that we are dreaming or being systematically deceived right now? And if we can't, what reason do we have for thinking that things are as they seem to us to be?

PHIL:4588 Philosophy of Mind 3 s.h.
Foundational questions about the mind: What is the mind, and how is it related to the brain? What makes minds so special? How do we know if other animals, or even other people, have minds? Can things without brains, such as aliens or computers, think? What is consciousness? Are we mere machines, lacking free will, if neuroscientists can explain the mind?; recent research in related sciences including neuroscience, psychology, cognitive ethology (animal cognition).

PHIL:4589 Philosophy of Language 3 s.h.
Main issues in contemporary philosophy of language; topics may include theories of meaning, truth, belief, interpretation, translation, speech acts, performatives, rule following, reference, naming, propositional attitudes, metaphor. Same as LING:4589.

PHIL:4590 Foundations of Cognitive Science 3 s.h.
Cognitive science defined as the study of individual agency; its nature, mechanisms, and patterns; development of cognitive science from historical roots in psychology, computer science, neuroscience, philosophy, linguistics; key issues; motivations for and varieties of cognitive explanations; models of cognitive architecture; nature of information processing; relation between cognitive processes and experimental tasks; relation between cognitive and neural theories, models, explanations.

PHIL:4591 Mathematical Logic 3 s.h.
Presentation of logic as the science that studies kinds of structure; different axiom systems, decidability, model theoretic semantics, Gödel's incompleteness theorems; topics include nature of logic, mathematics, type-theories, set-theoretical paradoxes.

PHIL:4592 Modal Logic 3 s.h.
Presentation of systems of logic designed to capture concepts of necessity and possibility; different axiom systems, semantics, nonexistent objects; topics include nonclassical systems, nature of possible worlds, relevant entailment, transworld identity, and counterparts inhabiting parallel worlds.

PHIL:4594 Philosophy of Science 3 s.h.
Issues in the nature of science and scientific knowledge considered in greater depth; nature of causation, kinds of relations that might hold between sciences and scientific theories, and varieties of explanation. Requirements: prior course work in philosophy.

PHIL:4691 Mathematical Logic 3 s.h.
Presentation of logic as the science that studies kinds of structure; different axiom systems, decidability, model theoretic semantics, Gödel's incompleteness theorems; topics include nature of logic, mathematics, type-theories, set-theoretical paradoxes.

PHIL:4692 Modal Logic 3 s.h.
Presentation of systems of logic designed to capture concepts of necessity and possibility; different axiom systems, semantics, nonexistent objects; topics include nonclassical systems, nature of possible worlds, relevant entailment, transworld identity, and counterparts inhabiting parallel worlds.

PHIL:4694 Philosophy of Science 3 s.h.
Issues in the nature of science and scientific knowledge considered in greater depth; nature of causation, kinds of relations that might hold between sciences and scientific theories, and varieties of explanation. Requirements: prior course work in philosophy.

PHIL:4696 Philosophy of the Human Sciences 3 s.h.
Explanation and understanding, theorizing about human nature, reducibility of collective facts to facts about individuals, values and ideology, freedom and causality.

PHIL:4798 Topics in Philosophy 3 s.h.
A single philosopher or philosophical problem.

Physics and Astronomy

Chair
- Frederick N. Skiff

Undergraduate majors: physics (B.A., B.S.); applied physics (B.S.); astronomy (B.A., B.S.)
Undergraduate minors: physics; astronomy
Graduate degrees: M.S. in physics; M.S. in astronomy; Ph.D. in physics (optional subprogram in astronomy)
Faculty: http://www.physics.uiowa.edu/people
Web site: http://www.physics.uiowa.edu/

The Department of Physics and Astronomy provides comprehensive and rigorous instruction in all basic aspects of its subjects. It also provides research facilities and guidance in selected specialties for advanced individual scholarly work.

In addition to its undergraduate and graduate programs of study, the department offers several courses that undergraduate students in all majors may use to satisfy the General Education Program (p. 313) Natural Sciences requirement and a First-Year Seminar designed for entering undergraduates.

All of the department's courses and advanced laboratories are taught by faculty members. Faculty members also supervise associated laboratories taught by graduate students. Enrollment in courses beyond the elementary level is typically 15 to 20 students; there is ample opportunity for individual work. Special introductory courses are offered for students majoring in physics and astronomy and for others with a special interest in these subjects.

Total enrollment in physics and astronomy courses is approximately 1,700 each semester of the academic year and 150 during the summer session. The department has around 80 undergraduate majors, half of whom are honors students, and 70 graduate students.

About 70 percent of graduates with bachelor's degrees pursue advanced study. Others find positions in government and industrial laboratories and in secondary school teaching. Some use their training as the basis for careers in industry, employment in research laboratories, and graduate study in physics and related sciences.

MATHEMATICS
MATH:1850 & MATH:1860 Calculus I-II 8 s.h.
MATH:2700 Introduction to Linear Algebra 4 s.h.
MATH:2850 Calculus III 4 s.h.

LABORATORIES
PHYS:3756 Intermediate Laboratory 3 s.h.

One of these:
ASTR:4850 Astronomical Laboratory 3 s.h.
PHYS:3850 Electronics 4 s.h.
PHYS:4750 Advanced Laboratory 3 s.h.

Students who choose PHYS:3850 Electronics as one of their two required laboratory courses are advised to take it before they take PHYS:3756 Intermediate Laboratory.

OTHER REQUIRED COURSES

One of these sequences:
PHYS:1701 & PHYS:1702 & PHYS:2703 Physics I-II - Physics III (strongly preferred)
PHYS:1611-PHYS:1612 Introductory Physics I-II 8 s.h.

All of these:
PHYS:2704 Physics IV 4 s.h.
PHYS:3710 Intermediate Mechanics 3 s.h.
PHYS:3730 Statistical Physics 3 s.h.
PHYS:3741-PHYS:3742 Introduction to Quantum Mechanics I-II 6 s.h.
PHYS:3811-PHYS:3812 Electricity and Magnetism I-II 6 s.h.

Two of these:
ASTR:3771 Introduction to Astrophysics I 3 s.h.
ASTR:3772 Introduction to Astrophysics II 3 s.h.
ASTR:4770 Radio Astronomy 3 s.h.
ASTR:4850 Astronomical Laboratory 3 s.h.
PHYS:3850 Electronics (may not be repeated) 4 s.h.
Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, including further work in mathematics. In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 56 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

**Bachelor of Arts: Physics**

The Bachelor of Arts with a major in physics requires a minimum of 120 s.h., including at least 44 s.h. of work for the major (minimum of 24 s.h. in physics plus 20 s.h. in supporting course work). Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The major in physics for the B.A. is designed for students who wish to build a foundation of knowledge in physics but do not plan a research-oriented career in the discipline. It is appropriate for those planning careers in medicine, law, science-related administration, business, or technical writing. It also is good preparation for students interested in secondary school science teaching; see "B.A. or B.S. with Teacher Licensure" below.

The B.A. program requires fewer physics courses than the B.S. program does, giving students a wider choice of electives. Bachelor of Arts students take calculus in addition to physics courses, which include a laboratory. They also take science courses in a thematic area or the physics course work required for teacher licensure, and the department encourages them to do additional work.

The physics major for the Bachelor of Arts requires the following courses or their equivalents. Many upper-level physics courses have prerequisites; students should consult their advisors when choosing courses numbered 3000 or above.

The course work required for teacher licensure

**B.A. or B.S. with Teacher Licensure**

Physics majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Students with a strong interest in science teaching may complete a major offered by the Science Education Subprogram. Students choose one of five emphases—biology, chemistry, earth science, physics, or all-science—and earn a Bachelor of Science degree. They may apply for admission to the Teacher Education Program. See Science Education (p. 788) in the Catalog.

**Joint B.A./M.A.T. with Science Education Subprogram**

Bachelor of Arts students in physics who are interested in pursuing a graduate degree in teaching may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates majoring in biology, chemistry, environmental sciences, or physics, the joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "Joint B.A./M.A.T. with Science Education Subprogram" in the Teaching and Learning (p. 793) (College of Education) section of the Catalog. Interested students should consult an advisor.
Bachelor of Science: Applied Physics

The Bachelor of Science with a major in applied physics requires a minimum of 120 s.h., including at least 59-83 s.h. of work for the major. Total credit required for the major depends on the student's choice of concentration. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The major in applied physics is intended primarily for students interested in a broad program of study in physics combined with a significant concentration of courses in a field that has immediate application to industry. The degree provides a foundation for a wide range of employment opportunities in high-technology industries, including research and development, product design and testing, sales, and quality control. It also is designed to include exposure to physics sufficient to allow students to continue with graduate studies in either physics or astronomy.

The major offers four areas of concentration: optics, solid-state electronics, computer science, and medical physics. Students also may design customized concentration areas in close consultation with their advisors and with departmental approval.

An essential component of each concentration is successful completion of a related one-semester internship or practicum experience in a research laboratory (an applied physics thesis is required for the latter option). Well-prepared students will be able to complete the degree in four years. Students should work closely with their advisors on a graduation plan.

All applied physics students complete a common set of courses that includes calculus, linear algebra, physics, and an experiential learning course. They also complete the courses required for their chosen concentration. The department encourages them to take additional course work; advisors can suggest electives that will enrich programs and help students prepare for graduate work.

The major in applied physics requires the following courses. Many upper-level physics courses have prerequisites; students should consult their advisors when choosing courses numbered 3000 or above.

COMMON REQUIREMENTS

Students in all concentrations must successfully complete the following courses or their equivalents.

Mathematics—all of these:
- MATH:1850 & MATH:1860 Calculus I-II 8 s.h.
- MATH:2700 Introduction to Linear Algebra 4 s.h.
- MATH:2850 Calculus III 4 s.h.

Physics—one of these sequences:
- PHYS:1701 & PHYS:1702 & PHYS:2703 Physics I-II - Physics III (strongly preferred) 12 s.h.
- PHYS:1611-PHYS:1612 Introductory Physics I-II 8 s.h.

Physics—all of these:
- PHYS:2704 Physics IV 4 s.h.
- PHYS:3710 Intermediate Mechanics 3 s.h.
- PHYS:3741 Introduction to Quantum Mechanics I 3 s.h.
- PHYS:3811 Electricity and Magnetism I 3 s.h.

Experiential learning—one of these:
- A one-semester industrial internship
- A one-semester practicum in a research laboratory (requires an applied physics thesis)

COMPUTER SCIENCE CONCENTRATION

All of these:
- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:3756 Intermediate Laboratory 3 s.h.
- PHYS:3812 Electricity and Magnetism II 3 s.h.
- PHYS:3850 Electronics 4 s.h.
- CS:1210 Computer Science I: Fundamentals 4 s.h.
- CS:2230 Computer Science II: Data Structures 4 s.h.
- Two additional computer science courses numbered 3000 or above 6 s.h.

One of these:
- CS:2630 Computer Organization 3 s.h.
- CS:2820 Object-Oriented Software Development 4 s.h.
- CS:3330 Algorithms 3 s.h.

OPTICS CONCENTRATION

All of these:
- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:3756 Intermediate Laboratory 3 s.h.
- PHYS:3812 Electricity and Magnetism II 3 s.h.
- PHYS:3850 Electronics 4 s.h.
- PHYS:4720 Introductory Optics 3 s.h.

Two of these:
- PHYS:4726 Electro Optics 3 s.h.
- PHYS:4728 Introductory Solid State Physics 3 s.h.
- PHYS:4820 Optical Signal Processing 3 s.h.

SOLID-STATE ELECTRONICS CONCENTRATION

All of these:
- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:4728 Introductory Solid State Physics 3 s.h.
- ECE:2400 Linear Systems I 3 s.h.
- ECE:2410 Principles of Electronic Instrumentation 4 s.h.
- ECE:3320 Introduction to Digital Design 3 s.h.
- ECE:3410 Electronic Circuits 4 s.h.
- ENGR:1300 Engineering Problem Solving II 3 s.h.
- ENGR:2120 Engineering Fundamentals II: Electrical Circuits 3 s.h.
- ENGR:2730 Computers in Engineering 3 s.h.

One of these:
- PHYS:3742 Introduction to Quantum Mechanics II 3 s.h.
- PHYS:3812 Electricity and Magnetism II 3 s.h.
MEDICAL PHYSICS CONCENTRATION
All of these:

- PHYS:3756 Intermediate Laboratory 3 s.h.
- PHYS:3850 Electronics 4 s.h.
- BIOL:1411-BIOL:1412 Foundations of Biology - Diversity of Form and Function 8 s.h.
- CHEM:1110 & CHEM:1120 Principles of Chemistry I-II 8 s.h.
- CHEM:2210 & CHEM:2220 Organic Chemistry I-II 6 s.h.
- CHEM:2410 Organic Chemistry Laboratory 3 s.h.

Two additional biology courses numbered 2000 or above 6-8 s.h.

One of these:

- BIOS:5110 Introduction to Biostatistics 3 s.h.
- STAT:3510 Biostatistics 3 s.h.

One of these:

- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:3742 Introduction to Quantum Mechanics II 3 s.h.
- PHYS:3812 Electricity and Magnetism II 3 s.h.
- PHYS:4750 Advanced Laboratory 3 s.h.
- PHYS:4905 Special Topics in Physics (physics of the body) 3 s.h.

Bachelor of Science: Astronomy

The Bachelor of Science with a major in astronomy requires a minimum of 120 s.h., including at least 63 s.h. of work for the major. The program provides balanced and integrated course work in astronomy, mathematics, and physics that prepares students for advanced study in astronomy or astrophysics. It also serves as an interesting choice of major for a liberal arts education.

Bachelor of Science students take calculus and linear algebra in addition to physics and astronomy courses, which include laboratories. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The astronomy major for the Bachelor of Science requires the following courses or their equivalents. Required courses ASTR:3771 Introduction to Astrophysics I and ASTR:4850 Astronomical Laboratory are offered every other year; students are responsible for registering for them when they are offered.

MATHEMATICS
All of these:

- MATH:1850 & MATH:1860 Calculus I-II 8 s.h.
- MATH:2700 Introduction to Linear Algebra 4 s.h.
- MATH:2850 Calculus III 4 s.h.

LABORATORIES
This course:

- ASTR:4850 Astronomical Laboratory (offered every other year) 3 s.h.

And one of these:

- PHYS:3756 Intermediate Laboratory 3 s.h.
- PHYS:3850 Electronics 4 s.h.

OTHER REQUIRED COURSES
One of these sequences:

- PHYS:1701 & PHYS:1702 & PHYS:2703 Physics I-II - Physics III (strongly preferred) 12 s.h.
- PHYS:1611-PHYS:1612 Introductory Physics I-II 8 s.h.

All of these:

- ASTR:1771-ASTR:1772 General Astronomy I-II 8 s.h.
- ASTR:3771-ASTR:3772 Introduction to Astrophysics I-II (offered every other year) 6 s.h.
- PHYS:2704 Physics IV 4 s.h.
- PHYS:3710 Intermediate Mechanics 3 s.h.
- PHYS:3741 Introduction to Quantum Mechanics I 3 s.h.
- PHYS:3811-PHYS:3812 Electricity and Magnetism I-II 6 s.h.

One of these:

- PHYS:3742 Introduction to Quantum Mechanics II 3 s.h.
- PHYS:4731 Plasma Physics I 3 s.h.
- PHYS:4740 Elementary Particles and Nuclear Physics 3 s.h.
- PHYS:4761-PHYS:4762 Mathematical Methods of Physics I-II 6 s.h.
- ASTR:4770 Radio Astronomy 3 s.h.

ADDITIONAL COURSE WORK

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, by taking one or more of the courses listed below.

- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:3742 Introduction to Quantum Mechanics II 3 s.h.
- PHYS:4720 Introductory Optics 3 s.h.
- PHYS:4731 Plasma Physics I 3 s.h.
- PHYS:4740 Elementary Particles and Nuclear Physics 3 s.h.
- PHYS:4761-PHYS:4762 Mathematical Methods of Physics I-II 6 s.h.
- ASTR:4770 Radio Astronomy 3 s.h.

In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 56 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

Bachelor of Arts: Astronomy

The Bachelor of Arts with a major in astronomy requires a minimum of 120 s.h., including at least 49 s.h. of work for
the major. The B.A. program requires fewer physics and mathematics courses than the B.S. program does, giving students a wider choice of electives.

The program is designed for students who wish to build considerable knowledge in astronomy but do not plan a research-oriented career in the field. It is appropriate for students planning careers in secondary school science teaching or science-related administration; see Science Education (p. 788) (College of Education) in the Catalog. It also is appropriate for those planning to earn professional degrees.

Bachelor of Arts students take calculus in addition to physics and astronomy courses, which include laboratories. Students also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The astronomy major for the Bachelor of Arts requires the following courses or their equivalents.

One of these sequences:

- PHYS:1701 & PHYS:1702 & PHYS:2703 Physics I-II - Physics III (strongly preferred) 12 s.h.
- PHYS:1611-PHYS:1612 Introductory Physics I-II 8 s.h.

All of these:

- ASTR:1771-ASTR:1772 General Astronomy I-II 8 s.h.
- ASTR:3771-ASTR:3772 Introduction to Astrophysics I-II 6 s.h.
- ASTR:4850 Astronomical Laboratory 3 s.h.
- PHYS:2704 Physics IV 4 s.h.
- PHYS:3710 Intermediate Mechanics 3 s.h.
- PHYS:3756 Intermediate Laboratory 3 s.h.
- MATH:1850 & MATH:1860 Calculus I-II 8 s.h.

One of these:

- PHYS:3730 Statistical Physics 3 s.h.
- PHYS:4720 Introductory Optics 3 s.h.

One of these:

- PHYS:3811 Electricity and Magnetism I (requires MATH:2850 as prerequisite) 3 s.h.
- PHYS:3850 Electronics 4 s.h.

**B.A.: Astronomy**

**Before the third semester begins:** math through calculus I-II and physics I-II

**Before the fifth semester begins:** physics III-IV and at least one more course in the major

**Before the seventh semester begins:** three more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.S.: Astronomy**

**Before the third semester begins:** calculus I-II and physics II

**Before the fifth semester begins:** all of the remaining required math courses, physics III-IV, and two other courses in the major

**Before the seventh semester begins:** four more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A.: Physics**

**Before the third semester begins:** calculus II and physics II

**Before the fifth semester begins:** physics III-IV and up to four more courses in the major

**Before the seventh semester begins:** two to four more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.S.: Physics**

**Before the third semester begins:** calculus II and physics II

**Before the fifth semester begins:** physics III-IV, introduction to linear algebra, calculus III, and up to two more courses in the major

**Before the seventh semester begins:** two to four more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General
Education courses, and a sufficient number of semester hours to graduate

**B.S.: Applied Physics**

*Before the third semester begins:* calculus II and physics II

*Before the fifth semester begins:* physics III-IV, introduction to linear algebra, calculus III, one more course in the major, and up to four courses in another science or engineering department

*Before the seventh semester begins:* two to four more courses in the major, up to three other science or engineering courses, and at least 90 s.h. earned toward the degree

*Before the eighth semester begins:* two or three more courses in the major or other science or engineering courses and all or part of an academic year research experience or a summer research experience or internship as approved by the applied physics coordinator

*During the eighth semester:* enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major**

Students majoring in physics, applied physics, or astronomy have the opportunity to graduate with honors in their major. Departmental honors students must maintain a University of Iowa g.p.a. of at least 3.33. To graduate with honors in the major, they must earn 6-8 s.h. in PHYS:4999 Undergraduate Research during their junior and senior years and conduct an investigation under the guidance of a faculty member. They must present a written report of their research (honors thesis) and describe their research results at a departmental seminar.

Departmental honors students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University's honors program.

**Minor: Physics**

The minor in physics requires a minimum of 15 s.h. in physics, including 12 s.h. taken at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

Course work numbered 3000 or above must include 6 s.h. chosen from these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR:3771</td>
<td>Introduction to Astrophysics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:3772</td>
<td>Introduction to Astrophysics II</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:4850</td>
<td>Astronomical Laboratory</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Remaining work may be chosen from any astronomy or physics courses numbered 3000 or above.

Most University of Iowa courses for the minor have prerequisites; students must complete a course's prerequisites before they may enroll in the course.

**Graduate Programs of Study**

- Master of Science in physics
- Master of Science in astronomy
- Doctor of Philosophy in physics (with optional subprogram in astronomy)

Graduate study in physics and astronomy is highly individualized. The department does not offer a Ph.D. in astronomy, but students may pursue a Ph.D. in physics with a subprogram and dissertation in astronomy.

Each entering graduate student is assigned a faculty advisor, who assists in preparing a plan of study and in guiding the student's progress. All graduate students who intend to pursue a Ph.D. in physics must pass the qualifying exam (see "Doctor of Philosophy: Physics").

In addition to offering graduate degree programs, the Department of Physics and Astronomy participates in an interdisciplinary doctoral program, the Program in Applied Mathematical and Computational Sciences (p. 925) (Graduate College).

**Master of Science: Physics**

The Master of Science program in physics requires a minimum of 30 s.h. of graduate credit. It is offered with thesis or critical essay. The M.S. with thesis requires a thesis based on an original experimental or theoretical investigation by the student. The M.S. with critical essay requires a critical essay on the literature of a particular area of physics.

The M.S. may be a terminal degree or a step toward a Ph.D. In either case, the final examination is oral, conducted by a committee of three faculty members.

Each student's plan of study should provide for as much advanced work as his or her aptitude and previous preparation permit. Up to one-third of the program of study may be taken in related scientific fields other than physics (e.g., mathematics, chemistry, astronomy, geology, engineering).

All master's degree students in physics must earn the required 30 s.h. of graduate credit in courses numbered 4000 or above, with at least 15 s.h. in courses numbered 5000 or above. They must maintain a g.p.a. of at least 3.00.

Students who choose the thesis option must write a thesis based on an original experimental or theoretical investigation that they have conducted. Students may
earn a maximum of 6 s.h. in PHYS:7990 Research: Physics or PHYS:7992 Individual Critical Study.

Students who choose the critical essay option must conduct an independent study of the literature on a chosen topic and write a critical essay on that topic. Students may earn a maximum of 4 s.h. in PHYS:7990 Research: Physics or PHYS:7992 Individual Critical Study.

Master of Science: Astronomy

The Master of Science program in astronomy requires a minimum of 30 s.h. of graduate credit. It is offered either with or without thesis. The M.S. may be a terminal degree or a step toward a Ph.D. in physics with specialization in astronomy or astrophysics. In either case the final examination is oral, conducted by a committee of three faculty members.

Up to one-third of the program of study may be taken in related scientific fields (e.g., meteorology, geology, electrical engineering); selection of such courses is encouraged.

All M.S. students in astronomy must maintain a g.p.a. of at least 3.00. Seminars do not count toward the minimum of 30 s.h. required for the degree.

Students in the thesis program earn the required 30 s.h. in courses numbered 4000 or above, with at least 15 s.h. in courses numbered 5000 or above. Thesis students must earn at least 6 s.h. in the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR:6785 The Interstellar Medium</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6790 Stellar Astrophysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:7775 Special Topics in Astrophysics</td>
<td>1-3 s.h.</td>
</tr>
</tbody>
</table>

Thesis students may earn a maximum of 6 s.h. in PHYS:7992 Individual Critical Study and ASTR:7991 Research: Astronomy.

Students in the nonthesis program must maintain a g.p.a. of at least 3.00 in core graduate courses. They must earn 18 s.h. in the following core graduate courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR:6785 The Interstellar Medium</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6790 Stellar Astrophysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:7775 Special Topics in Astrophysics</td>
<td>1-3 s.h.</td>
</tr>
<tr>
<td>PHYS:5710 Classical Mechanics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5811 Classical Electrodynamics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5812 Classical Electrodynamics II</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Nonthesis students may earn a maximum of 4 s.h. in PHYS:7992 Individual Critical Study and ASTR:7991 Research: Astronomy.

Doctor of Philosophy: Physics

The Doctor of Philosophy program in physics requires a minimum of 72 s.h. of graduate credit. For students interested in doing doctoral work in astronomy, the department offers an optional astronomy subprogram, including dissertation, within the Ph.D. program in physics.

Graduate students who wish to pursue a Ph.D. in physics must pass a qualifying examination in all principal areas of physics at the level of advanced undergraduate work. The examination, which may be repeated only once, is given each year before the beginning of the spring semester. Students must pass the qualifying examination before the beginning of their fourth semester of graduate work at the University of Iowa. Students with high scores on the Graduate Record Exam (GRE) subject test in physics may be exempt from this requirement.

All Ph.D. students must take comprehensive examinations; participate in advanced seminars; do original research in experimental physics, theoretical physics, or astrophysics; and prepare and defend a written dissertation based on this work.

The program of study for the Ph.D. in physics includes thorough course work in both classical and quantum physics for all students, whether their specialized research is in an experimental or a theoretical area.

All Ph.D. students in physics must earn at least 24 s.h. in departmental courses numbered 5000 or above. They may not count credit earned in PHYS:7990 Research: Physics, PHYS:7992 Individual Critical Study, ASTR:7991 Research: Astronomy, or seminars.

Ph.D. students in physics without the astronomy subtrack must complete the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS:4761-PHYS:4762 Mathematical Methods of Physics I-II (students who pass a written examination are exempt from this requirement)</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>PHYS:5710 Classical Mechanics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5730 Statistical Mechanics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5741-PHYS:5742 Quantum Mechanics I-II</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>PHYS:5811-PHYS:5812 Classical Electrodynamics I-II</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

These courses freely use advanced mathematics (e.g., complex variables, tensor analysis). An introduction is provided in PHYS:4761 and PHYS:4762. The selection of less advanced course work depends on the adequacy of a student's preparation for graduate work; students' choice of more advanced and specialized courses depends on the direction in which their interests develop.

Ph.D. students in physics with the optional subprogram in astronomy must complete a total of six courses from the following two lists.

Four of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASTR:6781 Galactic Astronomy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6782 Extragalactic Astronomy</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6785 The Interstellar Medium</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6790 Stellar Astrophysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6870 Radiative Processes in Astrophysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:6880 High Energy Astrophysics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ASTR:7830 Space and Astrophysical Plasma</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:7760 General Relativity and Cosmology</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Two of these (total of 6 s.h.):

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS:5710 Classical Mechanics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5730 Statistical Mechanics I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>PHYS:5741-PHYS:5742 Quantum Mechanics I-II</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>PHYS:5811-PHYS:5812 Classical Electrodynamics I-II</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

After a Ph.D. student has chosen a research specialty, he or she must submit a formal thesis proposal and defend the proposal in an oral comprehensive exam. The appropriate thesis advisor then becomes the candidate's general advisor and the chair of the comprehensive and
final examination committee. The comprehensive exam must be taken before the beginning of the fourth year of graduate study.

Ph.D. candidates are not recommended for the degree until they have written the dissertation in proper form for formal publication and have submitted it for publication, with the approval of the research advisor, to a widely distributed, refereed scientific journal.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Financial Support**

Students qualified for graduate study are encouraged to apply for fellowships and assistantships. Contact the Department of Physics and Astronomy chair.

**Research, Facilities**

The department has an excellent library and a number of well-equipped laboratories and observatories, as well as a student computer cluster for which students can obtain accounts. Faculty, students, and staff access national supercomputers via the Internet. The central machine shop is fully equipped and staffed by skilled instrument makers and machinists, and there are electronics and machine shops for use by advanced students and research staff.

Experimental research is conducted in astronomy (optical, radio, and X-ray), atomic and molecular physics, condensed matter physics, elementary particle physics, laser physics, medical physics, plasma physics, and space physics. Extensive facilities are available for construction of specialized research equipment and for data processing and analysis.

State-of-the-art semiconductor materials and devices are grown in two molecular beam epitaxy machines. Ultrafast laser techniques are developed and used to probe electron transport, energy relaxation, recombination, and spin dynamics in the novel nanostructures grown in these machines. Experiments also are conducted on laser-induced coherent phenomena and coherent control of charge carriers in semiconductor nanostructures. The experimental condensed matter program is closely coordinated with the condensed matter theory group.

Plasma physics is an active area of experimental and theoretical research. Laboratory experiments studying plasma processes of importance in various space and astrophysical plasmas are performed in a Q machine, including experiments on waves and instabilities in dusty plasmas. Additional laboratory and microgravity experiments with dusty plasmas include studies of Coulomb crystals, shocks, and complex fluids. Glow discharges for plasma processing applications are studied using laser diagnostics and numerical simulations. Wave propagation and plasma particle dynamics also are studied in collisionless plasmas through laboratory experiments. Laser techniques are developed for measuring plasma flow and following particle orbits. Plasma theory efforts include analytical and numerical investigations of magnetic reconnection and turbulence in space and astrophysical plasmas; collaboration with laboratory and space plasma experimental groups in strongly coupled dusty plasmas, waves, and instabilities; and free electron lasers and hydrodynamic turbulence.

State-of-the-art laser systems are available for high-resolution spectroscopic measurement and ultrafast studies of molecular structure, for collisional relaxation and nonlinear optical effects in atomic and molecular systems, and for plasma diagnostics.

Experimental research in elementary particle physics is carried out at Fermi National Accelerator Laboratory, Stanford Linear Accelerator Center, CERN in Switzerland, and other international laboratories. The present generation of high-energy experiments has been designed to probe both the strong nuclear force and the weak interactions.

The department is well-equipped for research and instruction in observational astronomy. The primary optical instrument is a fully automated 15-inch telescope at a dark-sky site in Arizona. The telescope is equipped with CCD cameras and a variety of filters. There are 3-meter and 4.5-meter radio telescopes on the roof of Van Allen Hall, which are used for instruction and student research projects.

Research programs in galactic and extragalactic radio astronomy are carried out using the facilities of the National Radio Astronomy Observatory, including the Very Large Array and the Very Long Baseline Array, one element of which is 10 miles north of campus. Current long-term research activities include studies of the center of the Milky Way galaxy; investigations of extragalactic radio sources; the formation of powerful winds in young, luminous stars; radio-wave scattering in the interstellar and interplanetary media; and interacting binary stars. A research program in X-ray astronomy has been established, and there is a laboratory for instrument development. Research topics in X-ray astronomy concentrate on observations of X-ray emission from black holes and supernova remnants, using existing spacecraft.

Active theoretical research is carried on in astrophysics; atomic, molecular, and optical physics; condensed matter physics; elementary particle physics; laser physics; mathematical physics; nuclear physics; plasma physics; and space physics. An active mathematical physics seminar fosters the exchange of ideas between mathematics and physics.

The primary emphasis of Iowa’s program in experimental and theoretical space physics is on studies of cosmic and heliospheric physics, magnetospheric physics, and magnetosphere-ionosphere interactions. Facilities are available for designing and constructing spaceflight instruments. Investigators in the department have flown instruments for studying plasmas, energetic charged particles, auroral images, plasma waves, and radio emissions on a wide variety of terrestrial and planetary spacecraft, including Pioneer 10 and 11, Dynamics Explorer, Voyager 1 and 2, Galileo, Polar, Cassini, and Mars Express.

**Courses**

The Department of Physics and Astronomy offers a number of courses approved for the Natural Sciences requirement of the College of Liberal Arts and Sciences General Education Program. Look for courses with prefixes ASTR and PHYS under "Natural Sciences" in the General Education Program (p. 313) section of the Catalog.
Physics, Lower-Level
Undergraduate

PHYS:1000 First-Year Seminar  1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

PHYS:1100 From Quarks to Quasars  3-4 s.h.
Conceptual explanation of the latest discoveries in physics—from the smallest objects, such as quarks and atoms, to the largest, such as galaxies, black holes, and quasars. Requirements: nonscience major. GE: Natural Sciences without Lab; Natural Sciences with Lab.

PHYS:1200 Physics of Everyday Experience  3 s.h.
Principles of physics for nonscience majors; basic motion, behavior of fluids, waves, temperature and heat, gravity and planetary motion, electricity and magnetism, optics, nuclear energy, radioactivity, and medical imaging technology; examples from everyday experience. GE: Natural Sciences without Lab.

PHYS:1300 Nanoscience  3 s.h.
Properties of very small materials and structures; unique properties emerging at a length scale of one billionth of a meter, or one nanometer. GE: Natural Sciences without Lab.

PHYS:1400 Basic Physics  3-4 s.h.
Quantitative treatment of mechanics, electricity, heat, liquids, gases, and atomic, nuclear, and elementary particle physics. Prerequisites: MATH:1010. Requirements: closed to students who have taken PHYS:1511 or PHYS:1512 or PHYS:1611 or PHYS:1612. GE: Natural Sciences without Lab; Natural Sciences with Lab.

PHYS:1410 Physics of Sound  3-4 s.h.
Acoustical foundations of music; production of sound by vibrating objects, properties of sound waves, vocal acoustics, hearing, room acoustics, principles of electroacoustics. GE: Natural Sciences without Lab; Natural Sciences with Lab.

PHYS:1511 College Physics I  4 s.h.
Mechanics, waves, thermodynamics, special relativity. Prerequisites: MATH:1010. GE: Natural Sciences with Lab.

PHYS:1512 College Physics II  4 s.h.
Continuation of PHYS:1511; electricity, magnetism, light, modern physics. Prerequisites: PHYS:1511. GE: Natural Sciences with Lab.

PHYS:1611 Introductory Physics I  4 s.h.

PHYS:1612 Introductory Physics II  3-4 s.h.
Continuation of PHYS:1611; electricity, magnetism, light. Prerequisites: PHYS:1611. Corequisites: MATH:1560 or MATH:1860. GE: Natural Sciences without Lab; Natural Sciences with Lab.

PHYS:1619 Introductory Physics II Lab  1 s.h.
Laboratory for PHYS:1612. Requirements: 3 s.h. in PHYS:1612. GE: Natural Sciences Lab only.

PHYS:1701 Physics I  4 s.h.
Newtonian mechanics for point particles and rigid bodies; conservation laws. Offered fall semesters. Corequisites: MATH:1850. Requirements: physics or astronomy major. GE: Natural Sciences with Lab.

PHYS:1702 Physics II  4 s.h.

PHYS:1999 Undergraduate Seminar  arr.
Selected topics in physics and astronomy; discussion, presentations.

PHYS:2703 Physics III  4 s.h.
Continuation of PHYS:1702; electromagnetic waves, optics; mechanical and sound waves; thermal physics. Offered fall semesters. Prerequisites: PHYS:1702.

PHYS:2704 Physics IV  3-4 s.h.
Introduction to quantum mechanics and other topics in modern physics, including special relativity, atomic and solid state physics. Offered spring semesters. Prerequisites: PHYS:1612 or PHYS:2703 and MATH:1860. Requirements: for 3 s.h. option — nonmajor.

PHYS:2990 Reading in Physics  arr.
Selected topics in physics.

Physics, Upper-Level
Undergraduate and Graduate

PHYS:3710 Intermediate Mechanics  3 s.h.
Newtonian mechanics; noninertial reference systems; central forces, celestial mechanics; rigid body motion; Lagrangian, Hamiltonian equations of motion; small oscillations. Prerequisites: (PHYS:1511 or PHYS:1611 or PHYS:1701) and MATH:1860.

PHYS:3730 Statistical Physics  3 s.h.
Integrated introduction to subjects of thermodynamics, statistical mechanics, kinetic theory; emphasis on applications. Prerequisites: PHYS:2704 and PHYS:3710.

PHYS:3741 Introduction to Quantum Mechanics I  3 s.h.
Superposition principle, Stern-Gerlach experiment, linear operators, measurement theory, time evolution, angular momentum, wave mechanics in one dimension, one-dimensional harmonic oscillator, two-body problems with central forces, the hydrogen atom. Prerequisites: PHYS:2704 and PHYS:3710 and MATH:2700 and MATH:2850.

PHYS:3742 Introduction to Quantum Mechanics II  3 s.h.
Perturbation theory, variational methods, WKB approximation, scattering, Helium atom, periodic table, atomic spectroscopy, transition rates, other selected applications. Prerequisites: PHYS:3741.

PHYS:3750 Fundamentals of Micro and Nanofabrication 3 s.h.
Fundamentals of micro- and nano-fabrication processes; physical principles of photo and electron beam lithography, alternative nano-lithography techniques, thin film deposition, molecular beam epitaxy, atomic layer deposition, self-assembly; metrology methods; physical and chemical processes of wet and plasma etching; cleanroom science, operations, safety protocols; sequential micro- and nano-fabrication processes involved in manufacture of semiconductor, photonic, nanoscale devices; imaging and characterization of micro- and nano-structures; scientific and technological applications of emerging micro- and nano-devices and systems. Prerequisites: PHYS:1611 or PHYS:1612 or PHYS:1702 or BIOL:1141 or BIOL:1060 or CHEM:1110 or CHEM:1120. Requirements: undergraduate lab course in chemistry, biology, physics, or engineering. Same as OSTC:3750.

PHYS:3756 Intermediate Laboratory 3 s.h.
Electricity; electronics; magnetism; optics; atomic, nuclear, solid state physics; techniques in data analysis, including error analysis. Prerequisites: PHYS:1612 or PHYS:1702 and PHYS:2703. Corequisites: PHYS:3811.

PHYS:3811 Electricity and Magnetism I 3 s.h.
Electrostatics, magnetic fields, introduction to Maxwell's equations. Prerequisites: (PHYS:1512 or PHYS:1612 or PHYS:1702) and MATH:2850.

PHYS:3812 Electricity and Magnetism II 3 s.h.
Continuation of PHYS:3811; magnetism, electromagnetic waves, A.C. circuits, applications of Maxwell's equations to wave guides, antennas, optics, plasma physics, other topics. Prerequisites: PHYS:3811.

PHYS:3850 Electronics 4 s.h.
Design and construction of small circuits; use of measurement instruments—oscilloscope, multimeter, function generator; circuits, including transistors, operational amplifiers, digital, analog-to-digital conversion. Prerequisites: PHYS:1512 or PHYS:1612 or PHYS:1702. Requirements: physics or astronomy major.

PHYS:4720 Introductory Optics 3 s.h.
Geometrical and physical optics; interference; diffraction; polarization; microscopic origins of macroscopic optical properties of matter; optical activity; electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisites: PHYS:3812. Same as ECE:4720.

PHYS:4726 Electro Optics 3 s.h.
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise: application to communication systems. Requirements: for ECE:5790 — ECE:3700; for PHYS:4726 — PHYS:3812. Same as ECE:5790.

PHYS:4728 Introductory Solid State Physics 3 s.h.
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: MATH:2850 and PHYS:3741. Same as ECE:4728.

PHYS:4731 Plasma Physics I 3 s.h.
Physics of ionized gases, including orbit theory, guiding center motion, adiabatic invariants, ionization balance description of plasmas by fluid variables and distribution functions; linearized wave motions, instabilities; magnetohydrodynamics. Prerequisites: PHYS:3812.

PHYS:4740 Elementary Particles and Nuclear Physics 3 s.h.
Accelerators, particle detectors, passage of radiation through matter; nuclear structure, nuclear reactions; quark model of hadrons; strong, electromagnetic, weak interactions of elementary particles; gauge theories, intermediate vector bosons; unification of electromagnetic and weak interactions. Prerequisites: PHYS:3741.

PHYS:4750 Advanced Laboratory 3 s.h.
Topics in electricity; electronics; magnetism; atomic, nuclear, plasma, solid state physics; techniques in data analysis, including error analysis.

PHYS:4761 Mathematical Methods of Physics I 3 s.h.
Functions of complex variables, integration methods, linear vector spaces, tensors, matrix algebra. Prerequisites: MATH:2850.

PHYS:4762 Mathematical Methods of Physics II 3 s.h.
Continuation of PHYS:4761; Hilbert space, special functions, Fourier transform and expansions in orthogonal polynomials, differential equations, Green's functions. Prerequisites: PHYS:4761.

PHYS:4820 Optical Signal Processing 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780 — ECE:3700; for PHYS:4820 — PHYS:3812. Same as ECE:5780.

PHYS:4860 Computational Physics 3 s.h.
Introduction to contemporary use of computers by physicists; topics such as numerical solutions of ordinary differential equations in classical mechanics, boundary value problems in electricity and magnetism, eigenvalue problems in quantum mechanics, Monte Carlo simulations in statistical mechanics, methods of data analysis. Prerequisites: PHYS:3710 and PHYS:3741 and PHYS:3811.

PHYS:4905 Special Topics in Physics arr.

PHYS:4990 Reading in Physics arr.
Selected topics in physics.
PHYS:4999 Undergraduate Research arr.
Supervised research leading to written report or oral presentation.

Physics, Graduate

PHYS:5000 Workshops and Special Training in Physics arr.
Workshops and special training opportunities for postbaccalaureate students; may include collaborations with other departments, institutions, or externally funded research organizations.

PHYS:5710 Classical Mechanics 3 s.h.
Dynamics of mass points; Lagrange multipliers, small oscillations, Hamilton’s equations; canonical transformations, Hamilton-Jacobi theory; chaos. Prerequisites: PHYS:3710.

PHYS:5729 Fluid Mechanics 3 s.h.
Basic equations of fluid mechanics and solutions of these equations for various cases of special interest; compressible and incompressible flows in two- and three-dimensions, rotational and irrotational flows, self-similar solutions, instabilities, turbulence; relate solutions to application of general interest to physicist and engineers; subsonic and supersonic flows around wings and bodies, gravity waves in oceans and atmospheres, transition to supersonic flow in a rocket nozzle, supersonic outflow of gas from the Sun and other stars, and physics of high energy explosions. Prerequisites: PHYS:3710. Requirements: knowledge of vector calculus at level used in PHYS:3811 and PHYS:3812.

PHYS:5730 Statistical Mechanics I 3 s.h.
Probability concepts; kinetic equations; classical and quantum equilibrium statistical mechanics with applications, including ideal and imperfect gases and phase transitions, irreversible processes, fluctuation-dissipation theorems. Prerequisites: PHYS:3730 and PHYS:3741.

PHYS:5741 Quantum Mechanics I 3 s.h.
Nonrelativistic quantum mechanics, Schrödinger wave mechanics, Hilbert space methods, perturbation theory, scattering, spin and angular momentum, identical particles, selected applications, introduction to relativistic theory. Prerequisites: PHYS:3741 and PHYS:3742.

PHYS:5742 Quantum Mechanics II 3 s.h.
Continuation of PHYS:5741. Prerequisites: PHYS:5741.

PHYS:5811 Classical Electrodynamics I 3 s.h.
Advanced electromagnetostatics, boundary value problems, Green’s functions, Maxwell’s equations, radiation theory, physical optics, multiple expansion of radiation field. Prerequisites: PHYS:3812.

PHYS:5812 Classical Electrodynamics II 3 s.h.
Special relativity, motion of charges in fields, theories of radiation reaction, special topics. Prerequisites: PHYS:5811.

PHYS:6710 Nonlinear Dynamics 3 s.h.
Deterministic approach of turbulence and chaotic dynamical systems; qualitative theory of ordinary differential equations, perturbation in classical mechanics, ergodicity, bifurcation, universal properties of discrete maps, intermittency, fractals, quantitative characterizations of chaos.

PHYS:6720 Nonlinear Optics 3 s.h.

PHYS:6726 Laser Principles 3 s.h.

PHYS:6822 Topics in Quantum Electronics arr.
Quantum optics, optical properties of matter, laser science, photonics.

PHYS:7270 Ethics in Physics for Graduate Students arr.
Responsible conduct and ethics training.

PHYS:7604 Ethics in Physics for Postdocs 0 s.h.
Responsible conduct and ethics training.

PHYS:7720 Semiconductor Physics 3 s.h.
Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as ECE:7720.

PHYS:7725 Special Topics in Condensed Matter 3 s.h.
Current topics, such as superconductivity and magnetism. Prerequisites: PHYS:7820.

PHYS:7729 Plasma Physics II 3 s.h.
Continuation of PHYS:4731; cold plasma waves, MHD stability, kinetic theory of plasmas, including Landau damping and velocity space instabilities; nonlinear evolution. Prerequisites: PHYS:4731.

PHYS:7730 Advanced Plasma Physics I 3 s.h.
Microscopic plasma behavior: statistical mechanics of plasmas; Liouville equation; BBGKY hierarchy; Fokker-Planck equation and relaxation processes; Balescu-Lenard equation; Vlasov equation and linearized wave motion; shocks, nonlinear plasma motions, and instabilities; fluctuations and radiation processes; topics from recent literature.

PHYS:7740 Introduction to Quantum Field Theory 3 s.h.
Quantization of relativistic and nonrelativistic field theories, covariant perturbation theory, theory of renormalization, dimensional regularization, renormalization group theory, introduction to gauge theories and anomalies. Prerequisites: PHYS:5742.

**PHYS:7745 Special Topics in Quantum Mechanics**
Current topics in quantum mechanics, such as string theory, relativistic quantum mechanics, quantum gravity, axiomatic quantum field theory.

**PHYS:7746 Particle Physics**
Elementary particle properties and phenomenology, quark-parton models, quantum chromodynamics, unified theory of weak and electromagnetic interactions.

**PHYS:7760 General Relativity and Cosmology**
Einstein's theory of gravitation; applications to astrophysics and cosmology.

**PHYS:7820 Theoretical Solid State Physics I**
Central principles of the quantum theory of solids; lattice dynamics, electronic structure, optical properties, superconductivity, magnetism; emphasis on viewpoint of elementary excitations. Prerequisites: PHYS:4728 and PHYS:5742.

**PHYS:7840 Quantum Gauge Theories**

**PHYS:7905 Special Topics in Physics**
Arranged.

**PHYS:7920 Seminar: Solid State Physics**
Current research.

**PHYS:7930 Seminar: Plasma Physics**
Current research. Same as ECE:7930.

**PHYS:7936 Seminar: Space Physics**
Current research.

**PHYS:7940 Seminar: Nuclear Physics**
Current research.

**PHYS:7945 Seminar: Math/Physics**
Current research.

**PHYS:7946 Seminar: Elementary Particle Physics**
Current research.

**PHYS:7990 Research: Physics**
Arranged.

**PHYS:7992 Individual Critical Study**
Essay on topic chosen in consultation with faculty member. Requirements: candidacy for M.S. with critical essay.

---

**Astronomy, Lower-Level Undergraduate**

**ASTR:1000 First-Year Seminar**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

**ASTR:1060 Origins of Life in the Universe (Part 1)**
Fundamental questions (How old is the universe? What is the nature of life? How has life evolved on Earth? What are our human origins? Are there other habitable planets in the universe?) that revolve around understanding origins from different perspectives (i.e., astronomy, physics, geoscience, biology, chemistry, anthropology); work with faculty from several departments to investigate these questions; inquiry-based activities to build success in critical thinking, teamwork, effective written and oral communication; origin of the universe, biochemistry of life, and origin of life on Earth; first of a two-part sequence. Recommendations: first-year or sophomore standing. GE: Natural Sciences without Lab. Same as BIOL:1060, EES:1060.

**ASTR:1061 Origins of Life in the Universe (Part 2)**
Fundamental questions (What is the nature of life? What is evolution and how has life evolved on Earth? What are our human origins? Are there other habitable planets in the universe?) that revolve around understanding origins from different perspectives (astronomy, physics, geoscience, biology, chemistry, anthropology); students work with faculty from several departments to investigate these questions; inquiry-based activities to build success in critical thinking, teamwork, and effective written and oral communication; second of a two-part sequence. GE: Natural Sciences with Lab. Same as BIOL:1061, ANTH:1061, EES:1061.

**ASTR:1070 Stars, Galaxies, and the Universe**
Survey of stars, galaxies, and the universe; life cycles of stars, including black holes and pulsars; diversity of galaxies, including the Milky Way and distant quasars; cosmology—the history, structure, and fate of the universe; current results from recent astronomical observations; night sky observation. Recommendations: closed to physics and astronomy majors. GE: Natural Sciences without Lab; Natural Sciences with Lab.

**ASTR:1079 Introductory Astronomy Laboratory**
Laboratory for ASTR:1070 or ASTR:1080. GE: Natural Sciences Lab only.

**ASTR:1080 Exploration of the Solar System**
Survey of the solar system; physical properties of the planets, comets, and asteroids; origin of the solar system; search for extrasolar planetary systems; search for life in the universe; current results of recent planetary space missions; night sky observation. Recommendations: closed to physics and astronomy majors. GE: Natural Sciences without Lab; Natural Sciences with Lab.

Political Science

Chair
• Sara Mitchell

Undergraduate majors: political science (B.A., B.S.); international relations (B.A., B.S.)

Undergraduate minors: political science; international relations

Graduate degrees: M.A. in political science; Ph.D. in political science

Faculty: http://clas.uiowa.edu/polisci/people/faculty

Web site: http://clas.uiowa.edu/polisci/

The Department of Political Science offers two undergraduate majors and minors as well as graduate degree programs. It collaborates with other departments to offer the Certificate in Social Science Analytics (p. 571). In addition, it offers several courses that undergraduate students in all majors may use to fulfill General Education Program (p. 313) requirements and a First-Year Seminar designed for entering undergraduate students.

Undergraduate Programs of Study

• Major in political science (Bachelor of Arts, Bachelor of Science)
• Major in international relations (Bachelor of Arts, Bachelor of Science)
• Minor in political science
• Minor in international relations

B.A. and B.S.: Political Science

The Bachelor of Arts with a major in political science requires a minimum of 120 s.h., including 33 s.h. of work for the major (all in political science courses). The Bachelor of Science with a major in political science requires a minimum of 120 s.h., including 44 s.h. of work for the major (33 s.h. in political science courses and 11 s.h. of approved mathematics/statistics courses). Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. In addition, they must maintain a g.p.a. of at least 2.00 in all political science courses taken at the University of Iowa, and in all political science courses taken at other institutions and at the University combined. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

Most of the political science course work required for the major is the same for B.A. and B.S. students, but the major for the B.S. includes a political science research component. The major for the B.S. also requires a set of mathematics/statistics courses, while the major for the B.A. does not.

Students must earn at least 18 s.h. of the political science credit required for the major (33 s.h.) at the University of Iowa. Credit earned in POLI:1000 First-Year Seminar, POLI:3124 Political Science Des Moines Internship Program, and POLI:4900 Government Internship does not count toward the major, but grades in these courses become part of a student's grade-point average.

In planning course work, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: students earning a B.A. or B.S. may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

The major in political science requires the following course work.

POLITICAL SCIENCE COURSES (B.A. AND B.S.)

Introductory course:
POLI:1100 Introduction to American Politics 3 s.h.

Additional introductory courses—four of these:
POLI:1001 Introduction to Politics 3 s.h.
POLI:1002 Lawyers in the American Political System 3 s.h.
POLI:1200 Introduction to Political Behavior 3 s.h.
POLI:1300 Introduction to Political Thought and Action 3 s.h.

POLI:1400 Introduction to Comparative Politics 3 s.h.
POLI:1401 Introduction to the Politics of Russia and Eurasia 3 s.h.
POLI:1403 Introduction to Politics in the Muslim World 3 s.h.
POLI:1500 Introduction to International Relations 3 s.h.

Bachelor of Arts students also complete the following political science course work.

18 s.h.

At least six additional political science courses numbered 2000 or above

The following courses do not count toward this requirement.

POLI:3124 Political Science Des Moines Internship Program
POLI:4900 Government Internship

It is strongly recommended that students not pursuing the major through online education take at least 12 s.h. in regularly scheduled classroom courses, with a maximum of 3 s.h. of online course work taken at the 3000-level or above.

ADDITIONAL POLITICAL SCIENCE COURSES (B.A.)

Advanced courses:
Political science courses numbered 2000 or above 12 s.h.

The following courses do not count toward the 12 s.h.
- POLI:3124 Political Science Des Moines Internship Program
- POLI:4900 Government Internship

Bachelor of Science students also complete the following political science course work.
- POLI:3000 Understanding Political Research 3 s.h.

One of these:
- POLI:4600 Honors Research Project 3 s.h.
- POLI:4701 Undergraduate Research Tutorial 3 s.h.

Recommended but not required:
- POLI:4702 Senior Research Project/Paper 3 s.h.

MATHEMATICS/STATISTICS COURSES (B.S.)
Bachelor of Science students complete one of the following approved sets of mathematics/statistics courses (11 s.h.) with a g.p.a. of at least 2.00. Other sets of courses may be used with written approval of the B.S. program advisor.

Set 1:
- MATH:1380 Calculus and Matrix Algebra for Business (students may substitute MATH:1550 or MATH:1850) 4 s.h.
- STAT:4143/PSQF:4143 Introduction to Statistical Methods 3 s.h.
- STAT:6513 Intermediate Statistical Methods 4 s.h.

Set 2:
- ECON:2800 Statistics for Strategy Problems 3 s.h.
- MATH:1380 Calculus and Matrix Algebra for Business 4 s.h.
- STAT:1030 Statistics for Business 4 s.h.

Set 3:
- MATH:1850 Calculus I (students may substitute MATH:1550) 4 s.h.
- MATH:1860 Calculus II (students may substitute MATH:1560) 4 s.h.
- STAT:4143/PSQF:4143 Introduction to Statistical Methods 3 s.h.

EMPHESES IN POLITICAL SCIENCE (B.A. AND B.S.)
Students may elect to complete one or two emphases while fulfilling the requirements for the major. The emphasis is indicated on the transcript at graduation if the student completes the emphasis and requests recognition from the department.

Each emphasis consists of four courses. Emphases are available in American institutions, American political practice, international relations, law and politics, identity politics, political communication, political economy, political processes, political theory, politics of democratization, politics of developing areas, and politics of industrial democracies. For lists of courses approved in each area, contact the Department of Political Science.

B.A. and B.S.: International Relations
The Bachelor of Arts with a major in international relations requires a minimum of 120 s.h., including at least 33 s.h. of work for the major. The Bachelor of Science with a major in international relations requires a minimum of 120 s.h., including at least 44 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

Students must complete a minimum of 18 s.h. of work for the major at the University of Iowa. A maximum of 15 s.h. of approved transfer credit may be applied toward the major.

The major in international relations focuses on economic relations between states, a crucial area of study in today's globalized world. Students in the major are introduced to the politics of foreign countries. They develop an understanding of how countries interact and acquire a deep appreciation for the root causes of problems that transcend national boundaries.

Students choose one of five tracks: conflict and foreign policy, international business and economic relations, regional politics and relationships, transnational issues, or a self-defined track. Requirements for the major are the same for B.A. and B.S. students, except that the major for the B.S. requires a set of mathematics/statistics courses, while the major for the B.A. does not.

The major in international relations requires the following course work.

INTERNATIONAL RELATIONS CORE (B.A. AND B.S.)
All of these:
- POLI:1500 Introduction to International Relations 3 s.h.
- POLI:3512 International Conflict 3 s.h.
- POLI:3516 The Politics of International Economics 3 s.h.

One of these:
- HIST:2403 Western Civilization III 3-4 s.h.
- HIST:3143 International Politics: The History of the Present 3-4 s.h.
- HIST:3155 The World Since 1945 3 s.h.

METHODS COURSE (B.A. AND B.S.)
- POLI:3000 Understanding Political Research 3 s.h.

SENIOR SEMINAR (B.A. AND B.S.)
- POLI:4800 Senior Seminar in International Relations 3 s.h.

MATHEMATICS/STATISTICS COURSES (B.S.)
Bachelor of Science students must complete one of the following approved sets of mathematics/statistics courses (11 s.h.) with a g.p.a. of at least 2.00. Substitutions must be approved by the director of undergraduate studies.

Set 1:
MATH:1380 Calculus and Matrix Algebra for Business (or equivalent or higher level calculus course) 4 s.h.
STAT:4143/PSQF:4143 Introduction to Statistical Methods 3 s.h.
STAT:6513 Intermediate Statistical Methods 4 s.h.

Set 2:
ECON:2800 Statistics for Strategy Problems 3 s.h.
MATH:1380 Calculus and Matrix Algebra for Business (or equivalent or higher level calculus course) 4 s.h.
STAT:1030 Statistics for Business 4 s.h.

Set 3:
MATH:1850 Calculus I 4 s.h.
MATH:1860 Calculus II 4 s.h.
STAT:4143/PSQF:4143 Introduction to Statistical Methods 3 s.h.

Tracks (B.A. and B.S.)

International relations students complete one of the following five tracks, each of which requires 15 s.h. of course work. Students who would like to declare the major in international relations before deciding on a track may declare the open track for advising purposes. They should talk with an advisor and decide on a track as soon as possible.

CONFLICT AND FOREIGN POLICY TRACK

The conflict and foreign policy track requires the following course work (minimum of 15 s.h.).

This course:
POLI:1501 Introduction to American Foreign Policy 3 s.h.

Four of these, including at least 6 s.h. of course work offered by each of two departments:

POLI:3126 Environmental Policy 3 s.h.
POLI:3410 Russian Foreign Policy 3 s.h.
POLI:3419 War in the Muslim World 3 s.h.
POLI:3420 Southeast Asia: Democracy, Identity, and Development arr.
POLI:3421 Southern Africa: Development and Governance 3 s.h.
POLI:3422 Transnational Issues and the Horn of Africa arr.
POLI:3423 The Middle East: Policy and Diplomacy 3 s.h.
POLI:3500 American Foreign Policies 3 s.h.
POLI:3503 Politics of Terrorism 3 s.h.
POLI:3505 Causes, Consequences, and Management of Civil War 3 s.h.
POLI:3506 Consequences of War 3 s.h.
POLI:3510 State Failure in the Developing World 3 s.h.
POLI:3514 Regional Peace and Security 3 s.h.
POLI:3518 Water Wars: Conflict and Cooperation 3 s.h.
POLI:3520 National Security Policy 3 s.h.
POLI:3550 Problems of International Politics 3 s.h.
POLL:3603 War and Film arr.
POLL:4500 Honors Seminar on International Politics 3 s.h.
HIST:4105 World Events in Historical Context 3 s.h.
HIST:4125 War and Peace in the Twentieth Century 3 s.h.
HIST:4146 The History of Warfare 3 s.h.
HIST:4176 Vietnam War on Film 3-4 s.h.
HIST:4228 Cold War America 3 s.h.
HIST:4230 The Political Culture of U.S. Foreign Policy 3 s.h.
HIST:4232 United States in World Affairs 3-4 s.h.
HIST:4264 U.S.A. in a World at War 1931-1945 3 s.h.
HIST:4435 War and Society in Modern Europe 3 s.h.
HIST:4499 First World War 3-4 s.h.
HIST:4617 History, Memory, and Pacific War 3 s.h.
HIST:4620 Japan-US Relations 3 s.h.

INTERNATIONAL BUSINESS AND ECONOMIC RELATIONS TRACK

The international business and economic relations track requires the following course work (minimum of 15 s.h.).

Two of these:
ECON:1100 Principles of Microeconomics 4 s.h.
ECON:1200 Principles of Macroeconomics 4 s.h.
GEOG:2910 The Global Economy 3 s.h.

Three of these, including courses from at least two different departments:

POLI:3126 Environmental Policy 3 s.h.
POLI:3400 Introduction to Political Economy 3 s.h.
POLI:3502 Politics and the Multinational Enterprise 3 s.h.
POLI:3504 Globalization 3 s.h.
POLL:4500 Honors Seminar on International Politics 3 s.h.
POLL:4500 Honors Seminar on International Economics 3 s.h.
POLL:4500 Honors Seminar on International Geopolitics 3 s.h.
POLL:3500 American Foreign Policies 3 s.h.
POLL:3503 Politics of Terrorism 3 s.h.
POLL:3505 Causes, Consequences, and Management of Civil War 3 s.h.
POLL:3506 Consequences of War 3 s.h.
POLL:3510 State Failure in the Developing World 3 s.h.
POLL:3514 Regional Peace and Security 3 s.h.
POLL:3518 Water Wars: Conflict and Cooperation 3 s.h.
POLL:3520 National Security Policy 3 s.h.
POLL:3550 Problems of International Politics 3 s.h.
POLL:3603 War and Film 3 s.h.
POLL:4500 Honors Seminar on International Politics 3 s.h.
POLL:4500 Honors Seminar on International Economics 3 s.h.
POLL:4500 Honors Seminar on International Geopolitics 3 s.h.
POLL:3500 American Foreign Policies 3 s.h.
POLL:3503 Politics of Terrorism 3 s.h.
POLL:3505 Causes, Consequences, and Management of Civil War 3 s.h.
POLL:3506 Consequences of War 3 s.h.
POLL:3510 State Failure in the Developing World 3 s.h.
POLL:3514 Regional Peace and Security 3 s.h.
POLL:3518 Water Wars: Conflict and Cooperation 3 s.h.
POLL:3520 National Security Policy 3 s.h.
POLL:3550 Problems of International Politics 3 s.h.
POLL:3603 War and Film 3 s.h.
**REGIONAL POLITICS AND RELATIONSHIPS TRACK**

The regional politics and relationships track requires the following course work (minimum of 15 s.h.).

This course:

- **POLI:1400 Introduction to Comparative Politics** - 3 s.h.

Four of these, including at least 6 s.h. of courses from each of two departments:

- **POLI:1401 Introduction to the Politics of Russia and Eurasia** - 3 s.h.
- **POLI:1403 Introduction to Politics in the Muslim World** - 3 s.h.
- **POLI:2415 Latin American Politics** - 3 s.h.
- **POLI:3401 European Union** - 3 s.h.
- **POLI:3403 Parties and Elections Around the World** - 3 s.h.
- **POLI:3404 Public Policy Around the World** - 3 s.h.
- **POLI:3405 Authoritarian Politics** - 3 s.h.
- **POLI:3408 Chinese Politics and Society** - 3 s.h.
- **POLI:3410 Russian Foreign Policy** - 3 s.h.
- **POLI:3412 Government and Politics of Europe** - 3 s.h.
- **POLI:3413 Russian Politics** - 3 s.h.
- **POLI:3416 France in the 21st Century** - 3 s.h.
- **POLI:3419 War in the Muslim World** - 3 s.h.
- **POLI:3420 Southeast Asia: Democracy, Identity, and Development** - 3 s.h.
- **POLI:3421 Southern Africa: Development and Governance** - 3 s.h.
- **POLI:3422 Transnational Issues and the Horn of Africa** - 3 s.h.
- **POLI:3423 The Middle East: Policy and Diplomacy** - 3 s.h.
- **POLI:3450 Problems in Comparative Politics** - 3 s.h.
- **POLI:3501 International Organization and World Order** - 3 s.h.
- **POLI:3507 Women and Politics in Global Perspective** - 3 s.h.
- **POLI:3509 International Courts: The Intersection of Law and Politics** - 3 s.h.
- **HIST:1008 Issues in European Politics and Society** - 3 s.h.
- **HIST:2602 Civilizations of Asia: China** - 3 s.h.
- **HIST:2604 Civilizations of Asia: Japan** - 3-4 s.h.
- **HIST:2606 Civilizations of Asia: South Asia** - 3-4 s.h.
- **HIST:2607 Civilizations of Asia: Korea** - 3-4 s.h.
- **HIST:2708 Civilizations of Africa** - 3 s.h.
- **HIST:3145 Europe and the U.S. in the Twentieth Century** - 3 s.h.
- **HIST:4289 The Atlantic World c. 1450-1850** - 3 s.h.
- **HIST:4460 Twentieth-Century Europe: The Nazi Era** - 3 s.h.
- **HIST:4464 Modern France 1789-1871** - 3 s.h.
- **HIST:4465 Modern France 1870-Present** - 3 s.h.
- **HIST:4475 Germany Since 1914: Weimar, Hitler, and After** - 3-4 s.h.
- **HIST:4486 Modern Britain: The Twentieth Century** - 3 s.h.
- **HIST:4493 Soviet Union 1917-1945** - 3-4 s.h.
- **HIST:4501 Society and Revolution in Cuba** - 3 s.h.
- **HIST:4502 History of Mexico** - 3 s.h.
- **HIST:4515 Introduction to Modern Latin America** - 3 s.h.
- **HIST:4525 Latin American Revolution** - 3 s.h.
- **HIST:4615 Modern Japan** - 3 s.h.
- **HIST:4640 Imperialism and Modern India** - 3 s.h.
- **HIST:4655 China Since 1927** - 3 s.h.
- **HIST:4666 Topics in Asian History** - 3 s.h.
- **HIST:4685 Modern Korean History** - 3 s.h.
- **HIST:4715 African History Since 1880** - 3 s.h.
- **HIST:4810 History of the Modern Middle East** - 3 s.h.
- **HIST:4815 Topics in the Modern Middle East** - 3 s.h.

**TRANSNATIONAL ISSUES TRACK**

The transnational issues track requires the following course work (minimum of 15 s.h.).

At least five of these, including 3 s.h. of credit in courses from each of three departments:

- **POLI:3126 Environmental Policy** - 3 s.h.
- **POLI:3422 Transnational Issues and the Horn of Africa** - 3 s.h.
- **POLI:3501 International Organization and World Order** - 3 s.h.
- **POLI:3507 Women and Politics in Global Perspective** - 3 s.h.
- **POLI:3509 International Courts: The Intersection of Law and Politics** - 3 s.h.
- **ECON:3625 Environmental and Natural Resource Economics** - 3 s.h.
- **ECON:3750 Transportation Economics** - 3 s.h.
- **ECON:3760 Health Economics** - 3 s.h.
- **GEOG:1020 The Global Environment** - 3 s.h.

SELF-DEFINED TRACK

Students may create their own track with permission from the director of undergraduate studies. A self-defined track may not duplicate an existing track or another academic program of study at the University of Iowa. It must consist of at least 15 s.h. of course work, which must include 3 s.h. of credit earned in courses from each of three departments.

B.A. or B.S. with Teacher Licensure

Political science majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education’s Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferal.

The Department of Political Science course POLI:1100 Introduction to American Politics is approved for teacher education requirements.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

B.A.: Political Science

In addition to the following checkpoints, B.A. honors students must complete POLI:4000 Honors Seminar on the Study of Politics and one additional honors seminar before the seventh semester begins.

Before the fifth semester begins: two courses in the major

Before the seventh semester begins: six courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: eight courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.S.: Political Science

In addition to the following checkpoints, B.S. honors students must complete POLI:4000 Honors Seminar on the Study of Politics and one additional honors seminar before the seventh semester begins.

Before the fifth semester begins: two courses in the major

Before the seventh semester begins: eight courses in the major, including two of the three required mathematics/statistics courses and POLI:3000 Understanding Political Research; and at least 90 s.h. earned toward the degree

Before the eighth semester begins: 11 courses in the major, including POLI:4701 Undergraduate Research Tutorial

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.A.: International Relations

Before the third semester begins: POLI:1500 Introduction to International Relations

Before the fifth semester begins: all core courses and the methods course

Before the seventh semester begins: at least 12 s.h. in the track and at least 90 s.h. earned toward the degree

Before the eighth semester begins: all track requirements

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.S.: International Relations

Before the third semester begins: POLI:1500 Introduction to International Relations

Before the fifth semester begins: all core courses and the methods course

Before the seventh semester begins: at least two of the mathematics/statistics courses, at least 12 s.h. in the track, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: all core courses, the methods course, the remaining mathematics/statistics course, and all track requirements

During the eighth semester: enrollment in all remaining course work in the major, all remaining General
Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major: Political Science**

Students majoring in political science have the opportunity to graduate with honors in the major. To enter the major's honors program, students must have a g.p.a. of at least 3.33 in the major and must be members of the University's honors program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University of Iowa Honors Program.

Departmental honors students must maintain a g.p.a. of at least 3.50 in the major. They must complete 9 s.h. in honors courses numbered 2000 or above with a grade of B or higher in each course, and they are encouraged to take honors sections of introductory courses whenever available. Their work must include the following courses.

- **POLI:4400 Honors Seminar on American Politics** (preferably taken during the second year) 3 s.h.
- **POLI:4300 Honors Seminar on Political Theory** 3 s.h.
- **POLI:4400 Honors Seminar on Comparative Politics** 3 s.h.
- **POLI:4500 Honors Seminar on International Politics** 3 s.h.
- One course numbered 5000 or above, with the instructor's consent 3 s.h.
- Final honors project—one of these:
  - **POLI:4600 Honors Research Project** 3 s.h.
  - **POLI:4601 Honors Senior Thesis** 3 s.h.

For more information about honors in the political science major, contact the Department of Political Science honors advisor.

**Honors in the Major: International Relations**

Students majoring in international relations have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.50 in the major. They must complete **POLI:4500 Honors Seminar on International Politics** or **POLI:4400 Honors Seminar on Comparative Politics**. They also must designate **POLI:4800 Senior Seminar in International Relations** as an honors course and complete an honors thesis, registering in **POLI:4601 Honors Senior Thesis**.

Honors students in international relations must be members of the University's honors program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University of Iowa Honors Program.

**Minor: Political Science**

The minor in political science requires a minimum of 15 s.h. in political science courses, including 12 s.h. in courses numbered 2000 or above and 12 s.h. taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Credit by exam is not accepted. Credit from **POLI:1000 First-Year Seminar**, **POLI:3124 Political Science Des Moines Internship Program**, and **POLI:4900 Government Internship** does not count toward the minor. Credit earned through a University of Iowa Regents program is considered credit earned at the University of Iowa.

Students may complete an emphasis area (see "Emphases in Political Science" above); however, emphasis areas in the minor are not recorded on the transcript. Students may request a letter from the Department of Political Science noting the completion of an emphasis area in the minor.

**Minor: International Relations**

The minor in international relations requires a minimum of 15 s.h. in course work approved for the international relations major, including at least 9 s.h. in courses numbered 3000 or above and at least 12 s.h. taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 9 s.h. earned in course work from one department toward the minor.

Courses for the minor must include this:

- **POLI:1500 Introduction to International Relations** 3 s.h.
- And one of these:
  - **POLI:3512 International Conflict** 3 s.h.
  - **POLI:3516 The Politics of International Economics** 3 s.h.

**Certificate in Social Science Analytics**

The Department of Political Science collaborates with the Departments of Geographical and Sustainability Sciences (p. 323), Sociology (p. 585), and Statistics and Actuarial Science (p. 613) to offer the undergraduate program in social science analytics; see Social Science Analytics (p. 571) in the Catalog. The Department of Political Science administers the certificate.

**National Honor Society**

The department sponsors a chapter of Pi Sigma Alpha. Students who have a cumulative g.p.a. of at least 3.30, have attained junior standing, and have completed 15 s.h. of course work in political science are considered for membership. Contact the Department of Political Science honors advisor for more information.

**Graduate Programs of Study**

- Master of Arts in political science
- Doctor of Philosophy in political science

Graduate study in political science emphasizes the Doctor of Philosophy program, which is designed for students planning academic careers. The department usually offers
the master's degree only as a preliminary step toward the Ph.D.

**Master of Arts**

The Master of Arts program in political science requires a minimum of 30 s.h. of graduate credit, with a g.p.a. of at least 3.25. No thesis is required. Each student's record is reviewed by a final examination committee, which may waive the final oral examination.

A first-year evaluation committee convvenes at the end of the student's first year of courses; if the committee finds that a student's work provides sufficient evidence of the research and writing skills ordinarily demonstrated in a master's thesis, it may recommend that the student be allowed to proceed with a doctoral program. When the first-year evaluation committee finds the quality of a student's work inadequate for recommending continuation toward the Ph.D., the committee may recommend that the student be permitted to seek the nonthesis M.A. as a terminal degree.

**Doctor of Philosophy**

The Doctor of Philosophy program in political science requires a minimum of 72 s.h. of graduate credit. The program is designed to prepare students for research, teaching, and scholarly endeavor in academic settings and private or governmental institutions. It produces graduates who are deeply committed to the study of politics, familiar with fundamental knowledge about political processes, well trained in methods and techniques for careful investigation of basic and applied research questions, and determined to make contributions to the discipline of political science and to society.

The department usually admits seven to ten Ph.D. students each year, so students work closely with faculty members, often collaborating on research and publication. Graduate students know one another and enjoy supportive, congenial working conditions.

Doctoral study usually lasts four to five years. The first-year curriculum for all students consists of core courses equally divided between substance and methodology. Emphasis is on basic research methods, including quantitative methods, that political scientists must understand thoroughly. Special attention is given to research design, collection of observations, and data analysis and interpretation.

The second and third years of study are spent in small seminars with focused, substantive topics. Papers written for these seminars might be submitted to journals or read at professional meetings. Students must take their qualifying examinations by the end of the third year. They take their comprehensive examination (oral defense of the dissertation proposal) by the middle of the first semester of their fourth year.

The fourth and fifth years are spent on dissertation research and writing. Students who do basic research and gather data abroad often require an additional year to complete the dissertation.

Six fields of study are available: American politics, comparative politics, international relations, political theory, formal theory, and for those who wish to go beyond the basic methodology training, research methods. Each student chooses three fields of study for qualifying examinations.

The Guide to Doctoral Study in Political Science, available from the Department of Political Science and on its website, provides a comprehensive statement of departmental requirements.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Courses**

**Lower-Level Undergraduate**

The following courses are numbered below 3000; they are introductory undergraduate courses. Course POLI:1000 First-Year Seminar does not count toward the major or the minor in political science.

**POLI:1000 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**POLI:1001 Introduction to Politics** 3 s.h.
Introduction to selected processes, institutions, or behaviors central to the study of politics.

**POLI:1002 Lawyers in the American Political System** 3 s.h.
Training and careers of lawyers; various roles they play in the American political system. Requirements: no prior enrollment in POLI:3150 with subtitle Lawyers in the American Political System.

**POLI:1100 Introduction to American Politics** 3 s.h.
Structure and processes of American national government; how the United States manages political conflict; impact of the U.S. Constitution; effect of public opinion, interest groups, and media on government; role and evolution of Congress, presidency, bureaucracy, and Supreme Court. GE: Social Sciences.

**POLI:1200 Introduction to Political Behavior** 3 s.h.
Patterns and basis of political behavior of American electorate; trends in voter turnout; vote choice; ideology, partisanship, and public opinion. GE: Social Sciences.

**POLI:1300 Introduction to Political Thought and Action** 3 s.h.
Common problems, literature, analytic techniques. GE: Social Sciences; Values, Society, and Diversity.

**POLI:1400 Introduction to Comparative Politics** 3 s.h.
Politics worldwide, including all regions and levels of development; wide-ranging themes, including regime types, political change, political culture, public opinion, government structures, state-society relations, electoral systems, public policy issues. GE: International and Global Issues; Social Sciences.

POLI:1401 Introduction to the Politics of Russia and Eurasia
Political dynamics in postcommunist countries of east-central Europe and Eurasia; imperial legacies, ideology and practice of communist politics, patterns of democracy and authoritarianism. GE: International and Global Issues; Social Sciences.

POLI:1403 Introduction to Politics in the Muslim World
Processes of politics and government in pivotal countries of the Muslim world; foundations of Islam, legacies of Western imperialism, regime types, regional conflicts, oppositional organizations; domestic and foreign policy; selected countries include Syria, Iran, Iraq, Egypt, Turkey, Saudi Arabia, Palestine, and Israel. GE: International and Global Issues; Social Sciences.

POLI:1500 Introduction to International Relations
Survey of key issues in international relations, including causes of wars, different types of theories of international relations, international organizations, and global environmental problems. GE: International and Global Issues; Social Sciences.

POLI:1501 Introduction to American Foreign Policy
Foreign policies: goals, basic themes and general patterns, problems encountered by policy makers, means employed in dealing with other nations and international organizations, processes by which policies are formulated, factors that influence structure of policies. GE: International and Global Issues; Social Sciences.

POLI:1600 Introduction to Political Communication
Institutions, dynamics, issues of political communities considered as networks of communication; representative topics include political actors, ads, films, media, myths, news, publics, regulations, rhetorics, symbols. GE: Social Sciences.

POLI:1601 Introduction to Political Media
Politics in news, culture, commerce, campaigns, and government with attention to current media (e.g., cinema, internet, print, television).

POLI:1700 Introduction to Political Analysis
Tools necessary to analyze and solve puzzles in politics (i.e., Why do countries go to war rather than negotiate? Why do lifelong enemies become allies? Why do majorities act irrationally?): questions approached from a quantitative perspective (unlike most political analyses), in particular, game theory—a branch of mathematics that investigates how rational players act in situations (like those in politics) of strategic interaction. GE: Quantitative or Formal Reasoning.

POLI:2107 Black Literature and Politics: Controversies of National Allegiance
Black literature born amid political controversy, from slave narratives to award-winning texts of late 20th century; evolving politics of African American writers; changing political landscape of this expansive period and representative literature; how African American writers shape U.S. political debate; surprising politics of many canonical African American writers. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as AFAM:2781, ENGL:2460.

POLI:2415 Latin American Politics
Governmental institutions, major interest groups; focus on area as a whole. GE: International and Global Issues; Social Sciences.

POLI:2700 Business, Government, and Society
How business, governments, and societies interact and fail to interact; exploration of questions that are empirical (i.e., how does the relationship between business and government impact society?) and normative (i.e., how should the relationship between business and government impact society?); where one sits on business-government-society (BGS) triangle often shapes how normative questions are answered; how such an approach helps to better understand these relationships and how they lead to specific corporate, government, and societal outcomes.

Upper-Level Undergraduate and Graduate
The following courses are numbered 3000-4999; they are considered advanced for undergraduates. Course POLI:4900 Government Internship does not count toward the major or the minor in political science; it is offered only satisfactory/fail.

POLI:3000 Understanding Political Research
Creating knowledgeable evaluators of current research in political science; interpretation of different quantitative techniques with examples from current political science research.

POLI:3001 Hawkeye Poll
Basics of survey design, sampling, question wording, interpreting responses, and writing press releases; students work together to help design questions as part of the Hawkeye Poll, a collaborative teaching and research enterprise in the Department of Political Science.

POLI:3050 Problems in Methods: Visualizing Social Science Data
Problems in political science research methods; data collection, interpretation, analysis.

POLI:3100 American State Politics
Approaches to analysis of political behavior in American state governments; emphasis on cultures, parties, actors, processes, issues.
POLI:3101 American Constitutional Law and Politics
Role of U.S. Supreme Court in American political system; emphasis on analysis of Supreme Court cases.

POLI:3102 The U.S. Congress
History of Congress, how congressional elections shape what legislators do, how laws are made in Congress, rules and maneuvers that shape these laws, and the future of Congress as one of the major institutions of American government; gain an understanding of Congress and why Americans continue to be confused and fascinated by this complicated branch and its politics.

POLI:3104 Immigration Politics
United States immigration policy and political consequences of Latino population growth; contrast of political experiences of Latinos with groups and ideals of democratic political systems; analyses of past immigration policies; studies of public opinion, voter turnout, and campaign tactics.

POLI:3105 Minority Representation in American Politics
Effects of voting rights legislation, election laws, interest groups, and institutional constraints on minority representation in American politics.

POLI:3106 Racism and Politics in the U.S.
Evolution of white racial attitudes over time; political experiences of African Americans contrasted with other groups and the ideals of democratic political systems; effect of race on political participation, partisan affiliation, vote choice, and policy preferences.

POLI:3107 Writing in Political Science: Writing for "Science" and for "Politics"
Writing for "science" and "politics" of political science; science writing emphasis on clear explanation to produce understanding; political writing emphasis on advocacy, which can highlight, obscure, and "spin" to motivate readers; evaluation of examples of each writing form; principles that help clear or obfuscate, explain or persuade, depending on their purpose; students compose examples of each writing form.

POLI:3108 American Political Development
Transformations in American political behavior and institutions over time.

POLI:3109 Fixing America's Electoral System
What's wrong with American politics and what can be done to fix it; overview of major problems facing American democracy from polarized political parties and money in politics, to low voter turnout and trust in government, to growing gap between super rich and middle class; focus on problem solving, including movement towards digital politics and new media, participatory democracy, reform of congressional elections and non-partisan redistricting, presidential elections (Electoral College), presidential nomination process, campaign finance, voter registration and voting, proportional representation. Requirements: no prior enrollment in POLI:3150 with subtitle Election Reform.

POLI:3110 Local Politics
Models of city government, relation to state and federal governments; rights, liabilities of municipalities; city elections, campaigns, issues; role of pressure groups.

POLI:3111 American Public Policy
Functions and policies of national government; emphasis on domestic policy making, impact of public policy.

POLI:3112 Direct Legislation
Direct democracy—lawmaking by the citizenry without legislative action; origins, historical perspectives, usage across politics, regulations; consequences of direct democracy; concerns about equality of access, tyranny of majority; United States, other countries.

POLI:3113 Research in Judicial Politics
Applied research training in courts and judicial politics. Prerequisites: POLI:3101 or POLI:3120 or POLI:3121.

POLI:3114 Women and Politics in the United States
Involvement of women in the U.S. political system; topics include political theories about women's involvement in politics and government, women and constitutional law, public policies that affect women, women's participation in politics at the mass and elite levels.

POLI:3116 The Presidency
Constitutional foundations, subsequent development, current status of the office of the presidency; evolution of presidential selection process; powers, structures, functions of the office; role of president as legislative, executive, and public leader.

POLI:3117 Public Administration and Bureaucratic Politics
Administrative and organizational theory and behavior; techniques of management; relations between administration and other branches in federal and state governments; administrative politics.

POLI:3118 Interest Groups
Theory, organization, and structure of interest groups; how they influence Congress, executive branch, courts, elections.

POLI:3119 Policy Matters: Perspective on Contemporary Problems
Public policy issues in scholarly perspective; UI experts provide background introduction to weekly issues: presentations of new policy initiatives, roundtable on policy options; panels representing local, state, and national options and experience involving policy practitioners, legislators, and advocates. Same as HIST:3115.

POLI:3120 The Criminal Justice System
Role of actors, institutions that constitute and participate in the American criminal justice system.

POLI:3121 The Judicial Process
Role of courts, lawyers, judges, interest groups in the American political system.
POLI:3122 Public Choice
Introduction to some of the most important topics in public choice (i.e., How do we explain what the public “wants”? Can we determine group preferences and group choices even if individual incentives run contrary to society’s needs?); study of public choice theory problems in political science—how we determine society’s preference among candidates, public policies, or even types of government.

POLI:3123 State Politics in Iowa
Introduction to Iowa government and politics; emphasis on Iowa Constitution, founding and history, political institutions, voting, political parties, mass movements and interest groups; evangelical movement in Iowa, immigration, and Iowa’s role in national politics given the state’s first-in-the-nation caucus.

POLI:3124 Political Science Des Moines Internship Program
Supervised professional work experience in government and nongovernment organizations, as well as private industry. Corequisites: POLI:3125. Requirements: sophomore or higher standing.

POLI:3125 Perspectives on Contemporary Iowa
In-depth examination of the state of Iowa; culture, politics, and contemporary issues facing the state and Midwest region in which it resides; historical and political development of Iowa as a state; policy implications of development on contemporary Iowa; how history, culture, and politics impact citizenship of the state; designed to enrich internship program in Des Moines, IA.

POLI:3126 Environmental Policy
Analysis of environmental problems through an interdisciplinary approach drawing from economics, environmental economics, political economy, and political science; how environmental resources differ from other goods that economists study (usually there is no market for them); government policies that are needed to maintain and improve environmental quality; how governments are influenced by voters’ policy preferences and by policy preferences of special interest groups; three main areas of political economy as it relates to environmental policy.

POLI:3127 Legislative Policy Seminar
Policy research for the Iowa Legislature.

POLI:3150 Problems in American Politics
1-3 s.h.
Problems in studying American system; structures, functions, behavior.

POLI:3201 Political Campaigning
Current state of political campaigning at all levels of government; history of campaigning, role of money and campaign finance reform, television and negative advertising, Internet campaigning.

POLI:3202 Political Psychology
3 s.h.
Political phenomena from psychological perspective; political behaviors of individuals, including decision making by elites and masses, evaluations of political candidates, mass mobilization, response to mass media; psychological concepts including stereotyping, social cognition, attitude, group identification.

POLI:3203 Campaigns, Elections, and Voting Behavior
Determinants of voting behavior; correlates of political participation, political apathy; political socialization processes; nature and functions of elections.

POLI:3204 Public Opinion
Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as SOC:3525.

POLI:3300 Postmodern Political Theory
3 s.h.
Major writers and intellectual trends, from 19th century to World War II.

POLI:3302 Current Political Theory
3 s.h.
Thinkers or schools of thought, from World War II to present.

POLI:3303 Political Issues
3 s.h.
Representative topics include democracy, revolution, justice, obligation, technology, authority.

POLI:3305 Modern Political Theory
3 s.h.
Major writers and intellectual trends in political thought from Renaissance and Reformation to 19th century.

POLI:3306 Problems of Democracy
3 s.h.
Theory and practice of democracy; democratic ideals and the institutions and practices necessary for those ideals to work in everyday politics—power, equality, majority rule, participation, trust, representation.

POLI:3400 Introduction to Political Economy
3 s.h.
Economic reasoning applied to political issues, including evolution of institutions, voting, leadership, interest groups, bargaining tactics, federalism, bureaucracy, fairness and compensation for wrongs, legitimacy of democracy, electoral cycles in economic policy, revolutions.

POLI:3401 European Union
3 s.h.
Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

POLI:3403 Parties and Elections Around the World
3 s.h.
Comparative approach and exploration of political parties and elections around the world; party formation and development, identification and voter behavior, competition and strategies; election outcomes; electoral systems and their consequences. Recommendations: POLI:1400 is strongly recommended.
POLI:3404 Public Policy Around the World 3 s.h.
Does the design of democratic institutions lead to poor or slow government response to crises (e.g., Hurricane Katrina, Gulf Oil Spill)? Does increased citizen participation in policy making help or hurt? How can citizens in democracies hold government accountable, especially when it is under pressure to adopt certain policies (e.g., economic stimulus packages, environmental or financial regulations, health care, taxation)? Implementation of laws in democracies, accountability of policy makers and consequences of controlling them, and so forth.

POLI:3405 Authoritarian Politics 3 s.h.
Political dynamics in countries with authoritarian governing regimes; how those dynamics differ from their counterparts in democracies; how decisions are reached and get enforced; forms political struggles take; how interest groups pursue influence; ways individuals deal with the government; tension between regime control and societal progress.

POLI:3406 Ethnic and Religious Conflict in the Muslim World 3 s.h.
Ethnic and religious conflict in the Muslim world; language rights, cultural preservation, and religious nationalism examined through case studies of ethnic and religious groups in countries such as Afghanistan and Iraq; conditions under which conflict becomes violent, protracted, and regionalized; strategies available to states and minority groups for resolving or managing conflicts.

POLI:3408 Chinese Politics and Society 3 s.h.
Comprehensive introduction to modern Chinese history; current Chinese political system and political culture; public policy issues.

POLI:3410 Russian Foreign Policy 3 s.h.
Russia's behavior as a major economic, military, and diplomatic power in the world and what shapes that behavior; Russians' perceptions of other countries; Russian national interests; capabilities and domestic political dynamics; implications for foreign policy of the United States and other countries.

POLI:3411 Democracy: Global Trends and Struggles 3 s.h.
Diverse contemporary understandings and practices of democracy; worldwide democratization trends; what political, economic, cultural and transnational factors shape those trends; how elites and citizens struggle to promote or retard democracy; the news full of people around the world taking action to demand democracy and what this term, so highly prized, really means; what is known about when democracy will replace authoritarianism; how can democracies more fully live up to their promise.

POLI:3412 Government and Politics of Europe 3 s.h.
Political institutions, processes of selected European countries. GE: International and Global Issues; Social Sciences.

POLI:3413 Russian Politics 3 s.h.
Institutions and processes of governing this large world power; Russian political dynamics, including struggles to unify or diversify power; political responses to major economic, technical, and social challenges. Recommendations: POLI:1401. GE: International and Global Issues; Social Sciences.

POLI:3414 Government and Politics of the Far East 3 s.h.
Functions, institutions of government in countries of Far East; focus on social, economic, historical environments. GE: International and Global Issues; Social Sciences. Same as ASIA:3414.

POLI:3416 France in the 21st Century 3 s.h.
French politics from the end of the 20th century to beginning of the 21st century; history of France’s Fifth Republic; institutional development; key events that influenced politics in France over the last 50 years; major issues that shape France today—citizenship, immigration, identity, France’s role in the European Union, electoral and institutional reform, rise of the extreme right, role of women in French society, how protest still affects French politics.

POLI:3417 Political Leadership 3 s.h.
Foundations, effects of leadership in different political systems.

POLI:3418 Governance in the Middle East 3 s.h.
Institutions and social systems that are affected by political behavior; ways in which Islam, oil production, and international forces shape political evolution in the region; comparative political inquiry of the operation of government institutions in the context of specific historical legacies, economic structures, and population characteristics in Iran, Iraq, Egypt, Turkey, Saudi Arabia.

POLI:3419 War in the Muslim World 3 s.h.
Foundations, evolutions, and outcomes of recent wars in the Middle East; primary focus on insurgencies in Syria, Afghanistan, Pakistan, and Iraq, together with Arab-Israel conflict; Sunni-Shiite, Jewish-Arab, Arab-Kurd cleavages; military activities of international forces; rise of insurgent forces (i.e., the Taliban); Al Qaeda alliance; shadow governments; institutions of governance; strategies and ideologies of oppositional organizations. Requirements: no prior enrollment in POLI:3450 with subtitle War in the Muslim World.

POLI:3420 Southeast Asia: Democracy, Identity, and Development arr.
Eleven states of Southeast Asia; governance, development strategies, domestic politics, approach to democracy and national identity; regional politics and important transnational issues; role of ASEAN, terrorism, trans-Pacific trade and investment issues, China's looming presence, impact of ongoing and historic conflicts; briefings, discussions, presentations.

POLI:3421 Southern Africa: Development and Governance 3 s.h.
Comparative approach to politics of ten countries in the Southern Africa region; mineral riches, substantial agricultural resources, millions of hard working and talented people; poverty, underdevelopment, and inequality; varied paths toward development; mosaic of ethnic, religious, and regional groups that impact domestic and regional politics; politics analyzed at regional, state, and sub-state level.

**POLI:3422 Transnational Issues and the Horn of Africa**
Eight states in the Horn of Africa region; important transnational and regional issues; governance, development strategies, domestic politics, social and civic dynamics of countries in the region; wildlife trafficking, piracy, fight against HIV/AIDS, imprint of colonialism, secession, ethnic and national identities, democratization, role of women in society, impact of ongoing and historic conflicts; briefings, discussions, presentations.

**POLI:3423 The Middle East: Policy and Diplomacy**
Nineteen states and entities of North Africa and the Middle East; issues of governance, development strategies, domestic politics, and approach to democracy and national identity; regional politics and important transnational issues; role of political Islam; impacts of the Arab Spring, terrorism, oil, role of women in society, ongoing and historic conflicts; briefings, discussions, presentations.

**POLI:3450 Problems in Comparative Politics**
Structures, functions, behaviors of different political systems.

**POLI:3500 American Foreign Policies**
Ends pursued, problems encountered, means employed by the United States in relations with other states and international organizations.

**POLI:3501 International Organization and World Order**
Different conceptualizations of world order; multiple sources of world order including force, power, norms, international institutions; International order and main sources; question peace being the same as world order.

**POLI:3502 Politics and the Multinational Enterprise**
Operations of multinational business enterprises; relationship between business and politics; focus on corporations interacting with sovereign states, other companies, interest groups, international governmental organizations (IGOs), and non-governmental organizations (NGOs).

**POLI:3503 Politics of Terrorism**
Interplay between technological change and military strategy; changes in warfare brought about by information revolution; cyber weapons and other features of war in computer age: unmanned systems including aerial drones and ground-based robots; moral considerations associated with military robotics; anti-missile systems; predicting future changes in technology and military strategy.

**POLI:3504 Globalization**
Introduction to multidisciplinary literature on political economy and culture of globalization; major topics of debate on globalization.

**POLI:3505 Causes, Consequences, and Management of Civil War**
Causes, duration, management, and consequences of civil war; factors that create more frequent, longer civil wars (e.g., greed, grievance, ethnic conflict, state capacity); conflict management strategies for ending civil wars and minimizing long-term negative consequences.

**POLI:3506 Consequences of War**
War's enduring effects: war's impact on individuals, including combatants and noncombatants; war's impact on states, including states' development, economic, political, and social effects; war's effects on the international system.

**POLI:3507 Women and Politics in Global Perspective**
Women and politics in Europe and the global South; women's participation in political parties and social movements, women in the bureaucracy, women and the politics of intersectionality, feminism and the state, emergence of female gender identities.

**POLI:3508 Race in World Politics**
Fundamental questions about racial and ethnic politics; racial and ethnic identities and their intersection with other major social cleavages such as class, nationality, sexuality, religion, gender; concepts and use of race and ethnicity viewed through varied theoretical perspectives; contemporary events around the globe.

**POLI:3509 International Courts: The Intersection of Law and Politics**
Introduction to important international courts including (Permanent) International Court of Justice, European Court of Justice, International Criminal Tribunal for Yugoslavia, International Criminal Tribunal for Rwanda, and International Criminal Court; the formation, design, and expansion of international courts from political and legal perspectives; states' capabilities, regime type, and war; intersection of domestic and international law, emphasizing the major legal systems in the world (civil law, common law, Islamic law).

**POLI:3510 State Failure in the Developing World**
State failure in the developing world, including notable cases like Somalia and Zimbabwe; causes of state failure; potential policy interventions designed to address consequences of state failure.
POLI:3511 International Law 3 s.h.
Introduction to field of international law from a political and legal perspective; history and contemporary status of international law in several areas: human rights, humanitarian (law of war), environmental law, trade; structure and areas of international law; ask if international law is or can it be an effective tool of international cooperation from a political science perspective; structure of the basic documents of international law and organizations, key cases in the field from a legal perspective. Requirements: no prior enrollment in POLI:3550 with subtitle International Law.

POLI:3512 International Conflict 3 s.h.
International conflict as the primary ingredient of international politics; sources, causes, and effects of conflict, alliance structures, power distribution, geography, arms races, deterrence.

POLI:3513 Politics of International Human Rights Law 3 s.h.
Interaction between politics and international human rights law; international law and organizations, human rights, ratification of human rights treaties; theories of international law and cooperation, exposure to tools of international relations (diplomacy, trade, aid, shaming, sanctions), the role that international and domestic civil society groups play in advocating for states to commit to human rights laws.

POLI:3514 Regional Peace and Security 3 s.h.
Analysis of the causes of peace and conflict between countries in various regions of the world; theories of zones of peace, security communities, regional security complexes.

POLI:3515 Global Communication and Politics 3 s.h.
How distance and language barriers in communication have fallen since 2000; how politics and the world are affected when such barriers to communication disappear.

POLI:3516 The Politics of International Economics 3 s.h.
Politics of international trade and financial systems, including rise of free trade in 19th century and breakdown between the two world wars, postwar trading system framed around the World Trade Organization, different types of international monetary systems, relations between rich countries and poor countries, and global environmental politics.

POLI:3517 Global Justice 3 s.h.
Introduction to normative issues in international politics (i.e., Under what conditions are wars just? When is intervention justified? Do wealthier nations owe anything to those elsewhere who are in need?); theoretical works on global justice by Rawls, Kant, Pogge, Walzer, and others; normative theories analyzed against background of empirical examples, such as recent humanitarian interventions, contemporary wars, current trade regime, global environmental problems; seminar. Requirements: no prior enrollment in POLI:3550 with subtitle Global Justice.

POLI:3518 Water Wars: Conflict and Cooperation 3 s.h.
How climate change may aggravate shortage of freshwater in water-stressed regions, producing warnings of conflict over international river basins or "water wars"; recent U.S. intelligence assessment notes that water may be used as a weapon between or within states, or to further terrorist aims in the future; management of international water resources including conflicts over cross-border rivers and maritime areas; common property resources, piracy, maritime security, peaceful and militarized conflict management of water-based conflicts, climate issues, natural disasters, United Nations Law of the Sea Convention.

POLI:3520 National Security Policy 3 s.h.
Nuclear weapons and deterrence, credible commitments, value of emphasizing sea power or land power, strategic differences between symmetric and asymmetric conflict, information and intelligence, domestic politics and use of force abroad, United Nations Security Council and international law, role of private military contractors, and integration of armed forces by race, gender, and sexual orientation.

POLI:3550 Problems of International Politics 3 s.h.
Problems in studying international system, structures, functions, behavior.

POLI:3600 Multimedia Politics 3 s.h.
How increasingly universal access to communication affects political campaigning and advocacy; the use of blogging, video, and developing communication media by citizens and candidates to talk politics.

POLI:3601 Politics of Film 3 s.h.
Issues in the popular politics of aesthetics, communication, culture, and myth, explored through analysis of films.

POLI:3602 New Media and Politics 3 s.h.
Blogging, microblogging, and video production as tools of new media (anyone can twitter and reach a large audience); how these technologies work, how they are being used in current politics, what they portend for the future, and what tools are next. Requirements: no prior enrollment in POLI:3303 with subtitle New Media and Politics.

POLI:3603 War and Film arr.
Exploration of one of the most significant political phenomena, war, as it is represented and understood through film; various film genres including classic war films, historical and historical fiction, documentary (e.g., Battle of Algiers, Triumph of the Will, Invisible War), comedy-drama (e.g., Life is Beautiful), and dark comedy or satire (e.g., The Mouse that Roared, Tropic Thunder); scholarly writings on international conflict; students discover and investigate themes related to nature of war, its underlying causes, and its consequences.

POLI:3700 Strategy in Politics 3 s.h.
How to isolate the most important elements in strategic political behavior, build models to understand them, recognize common scenarios, devise institutional resolutions to the Prisoners' Dilemma and coordination problems.
POLI:3701 Special Topics in Politics 1-2 s.h.
Presentations by distinguished lecturers on topics in the study of politics not covered in other courses. One or two weeks.

POLI:4000 Honors Seminar on the Study of Politics
3 s.h.
Selected topics in philosophy, theory, and methods for the systematic study of politics; foundations of scientific inquiry, including processes of theory building, concept formation, and hypotheses testing; political research; challenges faced when conducting good political science; questions of research design, measurement accuracy, and sample selection; application of multivariate research process. Requirements: honors standing in political science.

POLI:4050 Two Koreas: Political Economy or Regional Rivalry
3 s.h.
Introduction to the Korean peninsula; focus on nature of North and South Korean regional rivalry and its global impacts; theoretical and historical explanations; various security issues including North Korean nuclear threat, military alliances, and reunification prospects; economic issues including differential growth paths, South Korea's rapid growth, and recent economic woes in both Koreas. Same as ASIA:4050.

POLI:4100 Honors Seminar on American Politics
3 s.h.
Ideas, issues, methods in selected area. Requirements: junior or senior honors standing in political science.

POLI:4300 Honors Seminar on Political Theory
3 s.h.
Intensive study of ideas, issues, methods in an area of political theory. Requirements: junior or senior honors standing in political science.

POLI:4400 Honors Seminar on Comparative Politics
3 s.h.
Exploration of a selected topic in comparative politics, its cross-national patterns, strategies used to study it, and major debates among scholars; study of politics by comparing two or more countries or other political units; new light on how societies are divided on major issues (whether state regulation of economy or role of religion in society), how people behave politically (from voting to demonstrations to revolution), role played by political institutions (e.g., legislatures, courts, political parties). Requirements: junior or senior honors standing in political science.

POLI:4500 Honors Seminar on International Politics
3 s.h.
Ideas, issues, methods in selected area. Requirements: junior or senior honors standing in political science.

POLI:4600 Honors Research Project
3 s.h.
Special research assistance to political science faculty. Requirements: junior or senior honors standing in political science.

POLI:4601 Honors Senior Thesis
3 s.h.
Supervised research and writing. Requirements: honors standing in political science and more than one semester before graduation.

POLI:4700 Independent Study
arr.
Supervised special projects.

POLI:4701 Undergraduate Research Tutorial
3 s.h.
Individual training in applied research.

POLI:4702 Senior Research Project/Paper
3 s.h.
Supervised research and writing. Requirements: political science major and more than one semester before graduation.

POLI:4800 Senior Seminar in International Relations
3 s.h.
Completion of final research project as a culmination of student's work in the major; research supervised by a faculty member; required for international relations major. Recommendations: taken during one of student's final two semesters at the University of Iowa.

POLI:4900 Government Internship
1-3 s.h.
Undergraduate internships in state or national legislative office, executive agency, or with election campaign official.

Graduate Courses numbered 5000-6000 are graduate core courses; those numbered 7000 or above are advanced graduate courses.

POLI:5000 Introduction to Political Analysis
4 s.h.
Conceptual problems of political analysis; empirical research strategies, philosophy of science. Requirements: M.A. or Ph.D. standing in political science.

POLI:5001 Introductory Methodology
3-4 s.h.
Introduction to quantitative techniques in political science: set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: M.A. or Ph.D. standing in political science.

POLI:5003 Intermediate Methodology
4 s.h.
Techniques of data analysis; statistical models and their relationship to hypotheses tested. Requirements: doctoral standing in political science and one semester of intermediate statistics.

POLI:5100 American Politics
4 s.h.
Major literature of American politics, emphasis on comparative, systemic, behavioral studies. Requirements: M.A. or Ph.D. standing in political science.
POLI:5300 Political Theory  
Methods of political theory, epistemological and moral foundations of political inquiry; terms of political discourse (e.g., power, legitimacy, equality, ideological foundations of politics); schools of thought and current controversies in political theory. Requirements: M.A. or Ph.D. standing in political science.

POLI:5400 Comparative Politics  
Conceptual, theoretical, and methodological issues in comparative study of politics; developments in comparative politics subfield. Requirements: M.A. or Ph.D. standing in political science.

POLI:5500 International Politics  
Approaches to study of international politics. Requirements: M.A. or Ph.D. standing in political science.

POLI:5700 Introduction to Formal Models in Political Science  
Use of formal mathematical models; current modeling techniques, applications in American politics, comparative politics, international politics. Requirements: M.A. or Ph.D. standing in political science.

POLI:6632 Crossing Borders Proseminar  

POLI:6635 Crossing Borders Seminar  

POLI:7000 Writing Political Science  
Practice in planning and completing political inquiries; with emphasis on writing for scholarly publication; experience refining one's prior research projects for submission to disciplinary journals, and drafting dissertation proposals. Requirements: doctoral standing in political science.

POLI:7001 Experimental Methods  
Methods, techniques used in political science experiments.

POLI:7002 Topics Methodology  
Application of advanced statistical techniques in political science; limited dependent variable regression techniques, simulation methods, missing data techniques, history/rare event analysis and maximum likelihood, and topics tailored to students' research; focus on learning how and when to apply these techniques.

POLI:7003 Advanced Methodology  
Introduction to regression techniques for limited dependent and qualitative variables in political science; logit, probit, multinomial logit and probit, ordered logit and probit, event history models, event count models; emphasis on understanding how and when to apply these models.

POLI:7004 Qualitative Methods  
Introduction to qualitative methods in political science research; interviewing, ethnographic research, process tracing, comparative historical analysis, content and discourse analysis, fuzzy set theory.

POLI:7100 Modeling American Politics  
Exploration of how well formal models explain the real world and how the fit between models and world can be improved.

POLI:7102 The Presidency  
American chief executive: history, recruitment, behavior, roles, responsibilities, powers, relationships with other institutions.

POLI:7150 Problems in American Politics  
Problems in study of American political system; structures, functions, behavior.

POLI:7200 Legislative Behavior  
Institutions, processes, behavior in the United States, Europe, or developing countries.

POLI:7201 Political Psychology  
Political phenomena from a psychological perspective; decision making by elites and masses, evaluations of political candidates, mass mobilization, response to mass media; psychological theories used to explain these behaviors, including stereotyping, social cognition, attitude, group identification, attribution.

POLI:7202 Public Opinion and Electoral Behavior  
Political attitudes and beliefs in mass publics; voting behavior; how electoral systems function.

POLI:7350 Problems in Political Theory  
Prescriptive and explanatory political theory.

POLI:7401 European Union  
Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

POLI:7409 Democratization and Authoritarianism  
Rival understandings and practices of democracy and authoritarianism, including challenges of quantifying them for comparative analyses; major theoretical and empirical approaches to studying democratization and other forms of regime change.

POLI:7423 Comparative Parties and Elections  
Introduction to important questions and puzzles in the study of political parties; party formation and development, the role of parties in society, how parties are organized, party systems, electoral systems, party strategy and behavior, development of new parties, whether parties are still relevant, regeneration of communist parties in post-communist regimes, ethnic parties, failure of party consolidation.

POLI:7450 Problems of Comparative Politics  
4 s.h.
Problems in study of comparative political systems; structures, functions, behavior.

**POLI:7500 Foreign Policy** 4 s.h.
Foreign policy making and international behavior in relation to theories, findings from selected countries.

**POLI:7502 International Systems and Global Governance** 4 s.h.
Literature of international systems and international organization; major schools of thought in international relations theory, their utility in explaining evolution of the international system and recent developments in international organization and global governance.

**POLI:7503 International Conflict and Cooperation** 4 s.h.
Recent theoretical and empirical debates in international relations literature; emphasis on formal and quantitative research.

**POLI:7504 Theories of International Political Economy** 1-4 s.h.
Theories focusing on international system, the state, bureaucracies, interest groups, international organizations, bargaining processes, distributive norms.

**POLI:7550 Problems in International Politics** 4 s.h.
Issues of international politics, emphasis on problems of theoretical analysis.

**POLI:7701 Dynamic Models of International Politics** 2-4 s.h.
Overview of several dynamic modeling techniques used to study international relations; modeling assumptions, the kinds of information models can provide, evaluation of models.

**POLI:7900 Readings Tutorial** arr.
Independent study.

**POLI:7901 Research Tutorial** arr.
Individual training in applied research.

**POLI:7910 Ph.D. Dissertation** arr.
Psychological and Brain Sciences

Chair
- Jodie M. Plumert

Undergraduate major: psychology (B.A., B.S.)
Undergraduate minor: psychology
Graduate degrees: M.A. in psychology; Ph.D. in psychology
Faculty: http://www.psychology.uiowa.edu/people/faculty
Web site: http://www.psychology.uiowa.edu

The Department of Psychological and Brain Sciences offers an undergraduate major and minor as well as graduate degree programs. It also offers courses that undergraduate students in all majors may use to satisfy the General Education Program (p. 313) Social Sciences requirement and a First-Year Seminar designed for entering undergraduate students.

Undergraduate Programs of Study
- Major in psychology (Bachelor of Arts, Bachelor of Science)
- Minor in psychology

The major in psychology is designed to contribute to students' general liberal arts and sciences education and to provide a foundation for postbaccalaureate training in psychology and closely related disciplines as well as areas such as business, law, communication, medicine, and the allied health sciences. Students who intend to enter the job market immediately after completing an undergraduate degree should complement their psychology major with substantial preparation in another program more closely tied to the world of work (e.g., education, social work, business, journalism, nursing). Almost all vocational opportunities in psychology require advanced degrees.

The psychology major for the Bachelor of Science is intended for students who plan to pursue advanced work in psychology or in a related discipline. It requires a specific grade-point average for admission and certain courses in statistics, experimental psychology, mathematics, and natural science. The psychology major for the Bachelor of Arts has fewer specific requirements and puts less emphasis on methodology. Both programs leave time for students to supplement the psychology major with another program of study.

Students who change to a psychology major after two years of undergraduate work may find they do not have sufficient background for the B.S. program. They may wish to enrich the B.A. program with courses in experimental psychology and other advanced electives if they intend to pursue graduate work in psychology or a related field.

Students in either program begin with a general introductory course, followed by biological psychology, statistics, and methodology courses and introductory courses in several broad areas: developmental science, clinical psychology, cognitive psychology, and social psychology. These courses are followed by upper-level psychology course work selected by each student.

The department maintains excellent facilities to support teaching and research on human and animal behavior. All faculty members are directly engaged in research, and they bring to their undergraduate teaching the excitement that such activity generates. Many opportunities exist for interested and capable students to participate in current research projects in the department.

The department has an active undergraduate organization, the Iowa Students Psychology Association, which is open to all interested students. The group sponsors speakers, films, career days, and student symposia.

ADMISSION TO THE MAJOR

Admission to the psychology major for the Bachelor of Arts is open; any University of Iowa undergraduate student may enter the B.A. program.

Admission to the major for the Bachelor of Science is selective. To be eligible for admission to the B.S. program, students must have completed 30 s.h. of college course work (excluding any credit by exam) and must have a cumulative g.p.a. of 2.67 or higher. There is no limit on the number of qualified students admitted to the B.S. program. Students who do not meet the minimum admission requirements may petition the department in writing, presenting additional evidence of their qualifications.

Entering first-year and transfer students who have completed less than 30 s.h. of course work and are interested in entering the B.S. program are admitted to the B.A. program until they satisfy the admission requirements for the B.S. program. New transfer students who meet the admission requirements for the B.S. program may choose to enter the B.S. or the B.A. program.

Any student in the B.A. program may switch to the B.S. program if he or she meets admission requirements at the time of the request. Students may switch from the B.S. to the B.A. program at any time.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in psychology requires a minimum of 120 s.h., including 44-46 s.h. of work for the major, with at least 29 s.h. in psychology courses. The Bachelor of Science with a major in psychology requires a minimum of 120 s.h., including 53-55 s.h. of work for the major, with at least 36 s.h. in psychology courses. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). Transfer students must complete at least 15 s.h. of the major at the University of Iowa.

The major for the B.A. is designed for students who wish to gain considerable knowledge in psychology but do not necessarily plan a professional career in the discipline. It is appropriate for students preparing for careers in law, business, counseling, social work, or secondary school teaching (see "B.A. or B.S. with Teacher Licensure" below). It can be combined with a second major more easily than can the Bachelor of Science program.

The major for the B.S. emphasizes research methodology, so the B.S. may be the degree of choice for students...
who plan to do graduate work in psychology and related research fields. However, a Bachelor of Science is not required for graduate study in psychology.

Choice of a degree program should be dictated by a student's personal career goals. B.A. students interested in pursuing graduate study in psychology or other social sciences may enrich their program by taking courses in mathematics, statistics, research methods, and the natural sciences.

B.A. and B.S. students complete the same psychology core and psychology electives. The major for the B.A. also requires an additional statistics or computer science course plus a second concentration area, while the major for the B.S. also requires a pair of natural science courses, one semester of calculus, and an additional mathematics course.

The Department of Psychological and Brain Sciences enforces a strict regression policy. This rule applies to PSY:1001 Elementary Psychology. Students who have not previously taken PSY:1001 Elementary Psychology but have completed a course in psychology with a higher number may not take PSY:1001 Elementary Psychology for credit.

This rule also applies to students who want a second-grade-only option for the course. Students must retake PSY:1001 Elementary Psychology for a new grade before enrolling in or completing any other psychology course with a higher number. Students may not later retake the first introductory psychology course for a second grade after completing a more advanced course.

The psychology major requires the following courses or their equivalents.

### Common Requirements (B.A. and B.S.)

#### PSYCHOLOGY CORE (B.A. AND B.S.)

All psychology majors (B.A. and B.S.) complete the following course work for the psychology core.

- Psychology—all of these:
  - PSY:1001 Elementary Psychology 3 s.h.
  - PSY:2701 Biological Psychology 4 s.h.
  - PSY:2810 Research Methods in Psychology 4 s.h.

- Statistics—one of these (3-4 s.h.):
  - STAT:1020/PSQF:1020 Elementary Statistics and Inference 3 s.h.
  - STAT:1030 Statistics for Business 4 s.h.
  - STAT:3510 Biostatistics (recommended for B.S. students) 3 s.h.
  - STAT:4143/PSQF:4143 Introduction to Statistical Methods (recommended for B.S. students) 3 s.h.

#### LOWER-LEVEL PSYCHOLOGY ELECTIVES (B.A. AND B.S.)

B.A. and B.S. students take three of these (9 s.h.) after completing PSY:1001 Elementary Psychology.

- PSY:2301 Introduction to Clinical Psychology 3 s.h.
- PSY:2401 Introduction to Developmental Science 3 s.h.
- PSY:2501 Introduction to Social Psychology 3 s.h.
- PSY:2601 Introduction to Cognitive Psychology 3 s.h.

### UPPER-LEVEL PSYCHOLOGY ELECTIVES (B.A. AND B.S.)

B.A. and B.S. students take three advanced psychology courses (total of 9 s.h.) after satisfactorily completing the psychology core and other specified prerequisites. Psychological and brain sciences courses (prefix PSY) numbered 3000 or above may be used to fulfill this requirement, except those in the following list.

- PSY:3994 Research Practicum in Psychology arr.
- PSY:3995 Advanced Research Practicum 1-3 s.h.
- PSY:3996 External Practicum in Psychology 1-3 s.h.
- PSY:3997 Teaching/Advising Practicum in Psychology 1-3 s.h.
- PSY:3998 Individual Readings and Projects 1-3 s.h.
- PSY:4020 Laboratory in Psychology 4 s.h.
- PSY:4090 Psychology Seminar 3 s.h.
- PSY:4990 Honors Thesis Research 1-3 s.h.

### Additional Bachelor of Arts Requirements

#### COGNATE REQUIREMENT (B.A.)

Psychology majors earning a B.A. complete one of the following upper-level statistics or computer science courses. Students who fulfill the psychology core statistics requirement (above) with STAT:3510 Biostatistics or STAT:4143 Introduction to Statistical Methods must use a different course to fulfill the cognate requirement.

- Statistics:
  - ECON:2800 Statistics for Strategy Problems 3 s.h.
  - STAT:3120 Probability and Statistics 4 s.h.
  - STAT:3510 Biostatistics 3 s.h.
  - STAT:4143 Introduction to Statistical Methods 3 s.h.
  - STAT:6513 Intermediate Statistical Methods 4 s.h.

- Computer science:
  - CS:1020 Principles of Computing 3 s.h.
  - CS:1110 Introduction to Computer Science 3 s.h.
  - CS:1210 Computer Science I: Fundamentals 4 s.h.

### Additional Bachelor of Science Requirements

#### PSYCHOLOGY TOPICS COURSES (B.S.)

Psychology majors earning a B.S. take both of these.

- PSY:4020 Laboratory in Psychology 4 s.h.
- PSY:4090 Psychology Seminar 3 s.h.
NATURAL SCIENCE COURSES (B.S.)
B.S. students are required to complete one of the following pairs of specified natural science courses (at least 7 s.h.).
One semester each of chemistry and biology
One semester each of chemistry and physics
Two semesters of chemistry
Two semesters of physics
All of these combinations can be used to fulfill the General Education Program (p. 313) natural sciences requirement. Students should consult with their advisors concerning specific courses that satisfy these requirements.

CALCULUS AND ADDITIONAL MATHEMATICS (B.S.)
B.S. students must complete at least one semester of calculus; in most cases, students also must have completed at least one precalculus mathematics course.
One of these:
MATH:1380 Calculus and Matrix Algebra for Business 4 s.h.
MATH:1460 Calculus for the Biological Sciences 4 s.h.
MATH:1550 Engineering Mathematics I: Single Variable Calculus 4 s.h.
MATH:1850 Calculus I 4 s.h.
B.S. students also complete at least one additional course in advanced mathematics, statistics, or computer science chosen from the following lists.
Mathematics:
MATH:1560 Engineering Mathematics II: Multivariable Calculus 4 s.h.
MATH:1860 Calculus II 4 s.h.
MATH:2700 Introduction to Linear Algebra 4 s.h.
Statistics:
ECON:2800 Statistics for Strategy Problems 3 s.h.
STAT:3120 Probability and Statistics 4 s.h.
STAT:6513 Intermediate Statistical Methods 4 s.h.
Computer science:
CS:1020 Principles of Computing 3 s.h.
CS:1110 Introduction to Computer Science 3 s.h.
CS:1210 Computer Science I: Fundamentals 4 s.h.

B.A. or B.S. with Teacher Licensure
Psychology majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.
Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Joint B.A./M.P.H. with Community and Behavioral Health Subprogram
Bachelor of Arts students majoring in psychology who are interested in earning a Master of Public Health degree with community and behavioral health subprogram may apply to the joint B.A./M.P.H. program offered by the College of Liberal Arts and Sciences and the College of Public Health. The program permits students to count 12 s.h. of credit toward the requirements for both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. For information about the public health program, see "Community and Behavioral Health Subprogram" in the Master of Public Health Program (p. 1173) section of the Catalog.

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts
In addition to courses in psychology, the B.A. requires three courses in a second concentration area.
Before the third semester begins: PSY:1001 Elementary Psychology
Before the fifth semester begins: PSY:2701 Biological Psychology, statistics, and one or more lower-level electives
Before the seventh semester begins: four courses in the major (including PSY:2810 Research Methods in Psychology), one course in the second concentration area, and at least 90 s.h. earned toward the degree
Before the eighth semester begins: two additional courses in the major and an additional course in the second concentration area
During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Science
Note: The psychology major for the B.S. is open only to students who have earned 30 s.h. and have a g.p.a. of at least 2.67. Students must complete a natural science sequence, either as part of the General Education Program or in addition to it. Students also must complete a semester of calculus and an advanced math, statistics, or computer science course, which may require some preliminary work.
Before the third semester begins: PSY:1001 Elementary Psychology and PSY:2701 Biological Psychology
Before the fifth semester begins: calculus, statistics, and three additional courses in the major (including PSY:2810 Research Methods in Psychology)
Before the seventh semester begins: two more courses in the major, one course for the major's natural
science requirement, and at least 90 s.h. earned toward the degree.

**Before the eighth semester begins:** the advanced mathematics/statistics/computer science course and two more courses in the major.

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate.

**Honors in the Major**

Students majoring in psychology have the opportunity to graduate with honors in the major. Departmental honors students must complete PSY:4090 Psychology Seminar and write an honors thesis, which is based on an approved original honors research project that the student has conducted under the guidance of a faculty member. Interested students should contact the department's honors advisor.

Departmental honors students must be members of the University's honors program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33; visit Honors at Iowa to learn about the University of Iowa Honors Program.

**Minor**

The minor in psychology requires a minimum of 15 s.h., including 12 s.h. in psychological and brain sciences courses taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and all UI courses for the minor. Course work in the minor may not be taken pass/nonpass or satisfactory/fail. Before registering for a psychological and brain science course, students must complete the course's prerequisites.

A minor in psychology complements majors in a variety of disciplines. Department advisors can help students identify courses for the minor that are especially appropriate for their major.

**National Honor Society**

The department sponsors a chapter of Psi Chi, the national honor society in psychology and affiliate of the American Psychological Association. Students who have a g.p.a. of at least 3.00 overall and 3.10 in psychology course work and who have completed 9 s.h. of psychology courses may request a membership application form. Consult the department's academic coordinator for more information.

**Graduate Programs of Study**

- Master of Arts in psychology
- Doctor of Philosophy in psychology

Graduate study in psychology is designed for students seeking the Ph.D.; students enrolled in the doctoral program may elect to receive a Master of Arts when they have completed the M.A. requirements.

**Master of Arts**

The Master of Arts program in psychology requires 30 s.h. of graduate credit with thesis, and 37 s.h. of graduate credit without thesis. The department ordinarily offers the M.A. only to students enrolled in the Ph.D. program.

Thesis students must earn 24 of the required 30 s.h. at the University of Iowa. Course work for the thesis program must include a statistics course, courses outside the primary specialization area, and at least an additional 8 s.h. earned in Department of Psychological and Brain Sciences courses and seminars. Thesis students also must complete an acceptable scholarly thesis and perform successfully in an oral defense of their thesis.

Nonthesis students must earn 30 of the required 37 s.h. at the University of Iowa. Course work for the nonthesis program must include a statistics course, courses outside the primary specialization area, and at least an additional 15 s.h. earned in Department of Psychological and Brain Sciences courses and seminars. Nonthesis students also must perform successfully on an examination covering their area of specialization.

**Doctor of Philosophy**

The Doctor of Philosophy program in psychology requires a minimum of 72 s.h. of graduate credit. Students entering without previous graduate work usually require at least four years to complete the program; those entering with previous graduate training usually require three to five additional years in the department, depending on the nature of the earlier preparation.

The Ph.D. program places strong emphasis on preparation for research, teaching, and scholarly endeavor; whether in academic settings or in industrial, governmental, or medical institutions. The intent is to produce graduates who are deeply committed to the study of psychology, familiar with fundamental knowledge about psychological processes, well-trained in the methods and techniques for careful investigation of basic and applied problems, and determined to make contributions to the discipline of psychology and to society.

Graduate training is organized in six broad areas: behavioral and cognitive neuroscience, clinical psychology, cognition and perception, developmental science, health psychology, and social psychology (see "Graduate Training Areas" below). Each entering student is expected to identify one of these as his or her primary area and to follow a program that develops thorough understanding of the substantive material and methods of investigation central to that subdiscipline. While pursuing specialty training, all students must meet course requirements in statistics and research methods and in content areas other than their primary one.

The training area programs are sufficiently flexible to permit students to develop substantial competence in a second training area. Individually tailored programs are possible.

The 72 s.h. required for the Ph.D. includes at least 33 s.h. in Department of Psychological and Brain Sciences courses. All students must satisfy, through one of several options, requirements in statistics and research methods. They also must take course work outside the primary training area to develop a background in the discipline of psychology as a whole.

During each of the first two semesters, graduate students ordinarily take three courses—for example, a statistics course, a course or two in the primary training area, and/ or an outside area elective. Students also begin their research under the supervision of their advisor and with the guidance of their research advisory committee.
Near the end of the fall semester of the second year, students submit a report describing their research to date. At the beginning of the following semester, they present their research at the annual graduate research symposium.

During subsequent years, students continue selected course work in their training and interest areas and continue to develop their research programs. In addition, they develop a prospectus for the dissertation research and take the comprehensive examination, which covers material in the specialty area. The final year is devoted primarily to conducting the Ph.D. study and preparing the dissertation. In the Ph.D. final examination, students present an oral defense of their dissertation and are expected to relate the dissertation work to broader issues in the discipline of psychology.

Graduate Training Areas

Behavioral and Cognitive Neuroscience

The program in behavioral and cognitive neuroscience focuses on the analysis of learning, memory, attention, motivation, aging, sensory processing, and sleep, in both human and nonhuman subjects, through the application of behavioral and biological principles. Special faculty strengths are in classical and operant conditioning, motivation and emotion, developmental psychology, neurobiology of learning, comparative psychology, cognitive neuroscience, neuropsychology, neuroendocrinology, and neuroanatomy. Students in this program have the opportunity to learn state-of-the-art techniques in computer-controlled experimentation and electronic instrumentation as well as advanced analytic and laboratory methods in neurophysiology, nonhuman neurosurgery, histology, imaging, and assays of biochemical activity.

Faculty members in the behavioral and cognitive neuroscience area interact extensively with colleagues from other divisions in the psychology department and from several basic science and clinical departments in the Carver College of Medicine, including anatomy, anesthesia, pharmacology, internal medicine, pediatrics, and neurology. These collaborative activities provide excellent research and training opportunities for students interested in emerging interdisciplinary fields such as behavioral medicine.

Clinical Psychology

The clinical training program emphasizes a scientific approach to the understanding of psychological disorders and the influence of psychological factors on human relationships and health. The program is accredited by the Psychological Clinical Science Accreditation System (PCSAS), has been continuously accredited by the Commission on Accreditation of the American Psychological Association since 1948, and is a charter member of the Academy for Psychological Clinical Science.

The program is designed for students who are interested primarily in helping to advance scientific understanding of clinical phenomena and in acquiring the research skills necessary to do so. Faculty members and students have active research collaborations with colleagues from many departments in the University's Carver College of Medicine and College of Public Health and at the Iowa City Veterans Affairs Medical Center. Many of the program's faculty members conduct externally funded research programs that use cutting-edge behavioral science to develop improved understanding of mechanisms, processes, and interventions for mental disorders. Faculty members have strong training records, and the program's graduates have gone on to top-tier research, teaching, and clinical service positions.

The clinical psychology program provides the first-hand clinical experience and opportunities to develop clinical competence that are integral to clinical research. It closely integrates practicum experience in the Seashore Clinic with course work and supervised research experience. Advanced students have opportunities to gain additional clinical experience through placement in the Benton Neuropsychology Clinic, Women's Wellness and Counseling Service, adult and child psychiatry clinics, the Iowa City Veterans Affairs Medical Center, and other venues. After five to six years of on-campus work, including completion of all course work and most of the dissertation, students serve a one-year internship at an approved site.

Cognition and Perception

The cognition and perception training area is guided by the philosophy that understanding a specific cognitive process requires an understanding of how it interacts with other cognitive processes. The area pursues empirical rigor and theoretical development, so its research is theory driven and data tested.

Research programs of the area's laboratories overlap with each other, and most content areas are studied by multiple laboratories and with multiple methodologies. Areas of strength include categorization, computational modeling, cognitive control, language and language learning, learning and memory, visual cognition, attention, and working memory.

Students in perception and cognition take basic courses and seminars in specialty areas, but they devote most of their time to research activities. Students work closely with a faculty mentor at first and then become progressively independent as they gain knowledge and skills. The program encourages students to work with more than one faculty member, both in the program and across the department and the University. Students often combine basic work on cognition with work in areas such as neuroscience, neuropsychology, psychiatry, developmental psychology, and human factors engineering.

Developmental Science

The developmental science program focuses on understanding the processes that underlie change as each individual follows a unique developmental pathway. Students examine influences on development ranging from the level neurons to neighborhoods, and they work to understand the step-by-step accumulation of effects across these levels and over time. Students are taught a broad range of developmental theory and acquire expertise in multiple research paradigms, such as observational research, experimentation, computational methods, and neuroimaging. They also have the opportunity to study and collaborate with faculty members whose research cuts across domains such as perception, cognition, action, social processes, and basic biological mechanisms. Faculty members collaborate with their colleagues across the University, including those
in the Carver College of Medicine. These collaborations provide students with a unique breadth of training.

Students take courses in many areas of developmental science as well as in other areas of psychological and brain sciences. They also have research opportunities in early communication and social development, cognitive development in infancy and childhood, neuroimaging in toddlers and adults, and developmental psychobiology. The developmental research group meets regularly in conjunction with other members of the University of Iowa's DELTA Center, providing students and faculty members the opportunity to present and discuss their own research as well as to gain exposure to other developmental work being conducted in the department and at the University.

**Health Psychology**

The health psychology program is concerned with application of psychological theory, methods, and treatment to understanding of physical health and illness as well as understanding biobehavioral factors that contribute to disease onset and progression. The program's perspective is based on the biopsychosocial model, which posits that biological, psychological, and social processes are integrally and interactively involved in physical health and illness.

Graduate training in health psychology emphasizes the integration of knowledge about biological, psychological, and social factors. Students are involved in research whose content and methods reflect the biopsychosocial perspective. Training in health psychology is facilitated by the faculty's longstanding collaborations with medical practitioners and researchers at the University's Carver College of Medicine and University of Iowa Hospitals and Clinics. Availability of medical populations and state-of-the-art medical technologies afford a unique opportunity for doctoral students in health psychology.

Research areas of the health psychology program include stress and illness, psychoneuroimmunology, patient adherence, animal models of hypertension and heart failure, postpartum depression, women's health issues, and psycho-oncology.

Students who are interested in clinical training with a focus on health psychology should apply directly to the clinical program and indicate an interest in clinical health psychology.

**Social Psychology**

The social psychology program offers a variety of perspectives on interpersonal and intrapersonal processes. Examples of research foci of faculty and students are social-cognitive processes, attitudes, stereotyping and prejudice, social comparison, judgment and decision making, compassion and altruism, moral judgment, emotion, social motivation, parent-child relationships, temperament and individual differences in childhood, and social and emotional development.

Graduate training in the social psychology program is designed primarily to prepare students for careers in psychology research and teaching. In addition to their experiences and course work in the program and in the Department of Psychological and Brain Sciences, students can benefit from opportunities in related academic units at the University, such as the Departments of Sociology, Communication Studies, and Statistics and Actuarial Science and the Tippie College of Business. Such experience can broaden a student's training, research opportunities, and employment prospects.

**Admission**

Since the graduate program in psychology is designed primarily for students seeking the Ph.D., all applicants are considered on that basis. Occasionally, a qualified applicant who is in good standing in another UI graduate program and is interested in advanced work in psychology only through the M.A. level may be admitted to pursue a joint graduate program. Students interested in such a program should contact the department chair before filing an application.

The application deadline is December 1. For all materials to be on file by that date, applicants should take the Graduate Record Examination (GRE) General Test in October, and no later than November. The subject test in psychology is not required. Applications may be submitted any time but are considered only once each year—between December 1 and February 1—for admission the following fall. Admission decisions are based on a composite consideration of prior academic and research performance; letters of reference; scores on the verbal, quantitative, and analytic writing sections of the GRE General Test; and the applicant's statement about background and purpose. Admission materials are reviewed initially by faculty members in the applicant's primary training area.

An undergraduate major in psychology—including a laboratory course in experimental psychology, a course in statistics, and additional work in the natural sciences and in mathematics—is desirable but not required. Students who have not had such a background but are strongly qualified on other grounds may be admitted. They are expected to remedy deficiencies through special course work or independent study before embarking on the regular graduate program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Financial Support**

All students admitted to the Ph.D. program in psychology are guaranteed five years of financial support, as long as they make satisfactory progress and remain in good academic standing. Financial support is provided through fellowships, teaching assistantships, research assistantships, and traineeships, depending on merit and availability. No separate application for financial aid is required.

**Faculty**

Faculty members of the Department of Psychological and Brain Sciences are nationally and internationally renowned leaders in a variety of subdisciplines. Their research is funded by numerous federal and private research grants, their findings are documented in many publications, and their accomplishments have won many awards.

**Facilities**

The department's facilities for graduate training and research are among the finest in the country. The Kenneth W. Spence Laboratories of Psychology, adjoining space in Seashore Hall, and the newly renovated Stuit
Hall provide a variety of laboratories for human and animal studies. Facilities include animal housing areas; a histology laboratory; observation suites with remote audiovisual control and recording equipment; soundproof chambers; electrophysiological recording rooms; conditioning laboratories; the Seashore Clinic; and well-equipped electronic, mechanical, and woodworking shops. Computers are widely available. Office space for graduate students and faculty members is provided in Seashore Hall.

The research and teaching activities of the department benefit greatly from the facilities and staff of other University and local agencies, including University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, the University Counseling Service, the Center for Disabilities and Development, the Wendell Johnson Speech and Hearing Clinic, the Center for Health Policy and Research, and the School of Social Work.

Courses

Lower-Level Undergraduate

The following courses are open to first-year students who have satisfactorily completed an introductory psychology course (PSY:1001 Elementary Psychology or equivalent).

- **PSY:2301 Introduction to Clinical Psychology**
- **PSY:2401 Introduction to Developmental Science**
- **PSY:2501 Introduction to Social Psychology**
- **PSY:2601 Introduction to Cognitive Psychology**
- **PSY:2701 Biological Psychology**
- **PSY:2910 Industrial/Organizational Psychology**

**PSY:1000 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**PSY:1001 Elementary Psychology** 3 s.h.
Psychology as a behavioral science. GE: Social Sciences.

**PSY:2130 Advanced Psychology for Pre-Medical Track** 3 s.h.
Psychology as a behavioral science; elementary psychology in more depth, advanced topics. Prerequisites: PSY:1001. Requirements: non-psychology major.

**PSY:2301 Introduction to Clinical Psychology** 3 s.h.
Introduction to abnormal psychology; scientist-practitioner model, training, ethics, research methods in clinical psychology; current approaches to intellectual, personality, behavioral assessment; theories, research on treatment of psychological disorders. Prerequisites: PSY:1001. GE: Social Sciences.

**PSY:2401 Introduction to Developmental Science** 3 s.h.
Current research in developmental science; prenatal development, brain development, motor and physical development, perceptual development, language development, cognitive development, aspects of socio-emotional development; emphasis on modern theoretical approaches. Prerequisites: PSY:1001. GE: Social Sciences.

**PSY:2501 Introduction to Social Psychology** 3 s.h.
Research and theories on people's thoughts, feelings, and behaviors in social situations; attitudes, attributions, person perception, aggression, stereotypes and prejudice, attraction, relationships, social influence, group processes, altruism. Prerequisites: PSY:1001.

**PSY:2601 Introduction to Cognitive Psychology** 3 s.h.
Individual human cognition; perception, attention, memory, language, learning, problem solving, decision making, thought considered from viewpoint of information processing. Prerequisites: PSY:1001.

**PSY:2701 Biological Psychology** 4 s.h.
Biological mechanisms of behavior; comparative study of behavior, behavioral organization, animal intelligence, social behavior, communication; behavioral neuroscience, how brain systems control sensation, movement, homeostasis, emotion, learning. Prerequisites: PSY:1001.

**PSY:2810 Research Methods in Psychology** 4 s.h.
Logic of experimental and nonexperimental methods, application of methods to analysis of behavioral phenomena; skills for critical evaluation of professional and public literature dealing with scientific study of behavior: philosophy of scientific psychology, principles of research design and control, psychological testing, applications in several research areas. Prerequisites: PSY:1001 and (PSQF:1020 or PSQF:4143 or SOC:2160 or STAT:1020 or STAT:1030 or STAT:3510 or STAT:4143).

**PSY:2910 Industrial/Organizational Psychology** 3 s.h.
Applications of psychology to problems in world of work; emphasis on personnel selection, training, attitudes, motivation, measurement of job performance. Prerequisites: PSY:1001.

**PSY:2930 Abnormal Psychology: Health Professions** 3 s.h.
Introduction to psychological disorders; description of psychopathology; general issues in etiology and treatment; for non-psychology students in allied health professions. Prerequisites: PSY:1001. Requirements: non-psychology major.

Upper-Level Undergraduate and Graduate

Before enrolling in any upper-level undergraduate courses, students must complete all specified lower-level prerequisites or obtain consent of instructor.
PSY:3010 Health Psychology 3 s.h.
Psychological contributions to understanding etiology, prevention, treatment of physical illness; basic and clinical research that addresses reciprocal effects of behavior and physical health. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 or PSY:2501 or PSY:2701, and grade of C- or higher in PSY:2810.

PSY:3015 Psychology of Interpersonal Relations 3 s.h.
Theories, empirical findings, speculation from social psychology and related disciplines regarding how people form, maintain, and alter close, interpersonal relationships. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 or PSY:2501 and grade of C- or higher in PSY:2810.

PSY:3020 Mind and Behavior 3 s.h.
Theories of what it is to act and know, of what intelligence might be in animals, humans, machines; perspectives from philosophy, psychology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 or PSY:2701, grade of C- or higher in PSY:2810, and junior or senior standing.

PSY:3030 Social and Personality Development 3 s.h.
Emotional, social, and personality development from infancy to adolescence; major theories and empirical research; child temperament, parent-child relationship, and social context as contributors to individual differences. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2401 or PSY:2501 and grade of C- or higher in PSY:2810.

PSY:3040 Psychology of Learning 3 s.h.
Psychological science of acquired behavior; interests in experimental study of Pavlovian conditioning, operant conditioning, cognition in humans and nonhuman animals, relevance to behavioral adaptation. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 or PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3060 Visual Perception and Cognition 3 s.h.
Psychological and neurophysiological examination of vision. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 or PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3065 The Aging Mind and Brain 3 s.h.
Current theories and research on biological, cognitive, and emotional changes that occur during aging; methodologies for studying cognitive and brain aging. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 or PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3071 Cognition and the Brain 3 s.h.
Analysis of brain systems and neuroanatomy that underlie cognitive tasks such as vision, hearing, emotion, attention, language, decision making, learning, and memory. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 or PSY:2701, and grade of C- or higher in PSY:2810.

PSY:3085 Language Development 3 s.h.
Introduction to first language acquisition, with focus on infancy through five years; sound discrimination abilities, word learning, babbling and speech production, acquisition of grammar; perspectives from psychology, audiology, linguistics, speech pathology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2401 or PSY:2601 and grade of C- or higher in PSY:2810. Same as SLA:3401.

PSY:3090 Psychology of Workplace Behaviors 3 s.h.
Introduction to theory and research of workplace and work-related behaviors; focus on industrial and organizational psychology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 or PSY:2601, and grade of C- or higher in PSY:2810.

PSY:3095 Psychology of Relationship Violence 3 s.h.
Introduction to psychological theory and research on violence in relationships; topics will include intimate partner violence, sexual assault and rape, sexual harassment, and stalking; includes a service learning component. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 or PSY:2501 and grade of C- or higher in PSY:2810 or graduate standing.

PSY:3210 Animal Cognition 3 s.h.
Mental functions of animals, comparison to humans; intelligence, memory, communication, language, social learning, consciousness, human-animal interaction. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3220 Behavioral Neuroscience 3 s.h.
Basic concepts and techniques in neurosciences, their application to analysis of sensory processes, arousal mechanisms, motivation, learning. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3230 Psychopharmacology 3 s.h.
How drugs act to influence behavior; general principles of drug action on the nervous system; licit and illicit drugs, use/abuse, historical perspective on drug use. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3240 Motivation, Addiction, and the Brain 3 s.h.
Analysis of motivated behaviors (e.g., behaviors to obtain specific goals, such as food) and the brain processes that guide such behavior; exploration of brain processes underlying addiction. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

PSY:3250 Neuroscience of Learning and Memory 3 s.h.
Major topics in the neuroscience of learning and memory; focus on anatomical, cellular, molecular bases of various learning and memory processes. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.
**PSY:3270 Neurobiology of Stress**  
3 s.h.  
Introduction to concept of stress and physiological systems involved; factors modulating stress vulnerability versus resilience; stress interactions with other systems with health relevance; emphasis on current research on brain mechanisms. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

**PSY:3280 Introduction to Health Biopsychology**  
3 s.h.  
Physiological basis of behavior and cognition; interaction between brain and body in normal and pathological states. Requirements: grade of C- or higher in PSY:2701 and grade of C- or higher in PSY:2810.

**PSY:3320 Abnormal Psychology**  
3 s.h.  
Etiology, phenomenology, and treatment of child and adult DSM-IV psychological disorders (e.g., mood disorders, psychotic disorders, anxiety disorders, personality disorders). Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 and grade of C- or higher in PSY:2810.

**PSY:3330 Childhood Psychopathology**  
3 s.h.  
Major forms of childhood psychopathology; current theoretical approaches and methodological issues in diagnosis, conceptualization, treatment of developmental psychopathology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 and grade of C- or higher in PSY:2810.

**PSY:3340 Behavior Modification**  
3 s.h.  
Basic approaches to modification of clinically distressing behavior; learning theory principles underlying techniques, translation into procedures, experimental evaluation of effectiveness. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 and grade of C- or higher in PSY:2810.

**PSY:3350 Psychotherapies**  
3 s.h.  
Current theories and research on frequently used psychotherapeutic approaches; focus on methodology in psychotherapy research, specific types of therapy, and empirically supported therapies. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 and grade of C- or higher in PSY:2810.

**PSY:3420 Cognitive Development of Children**  
3 s.h.  
Developmental research, theory concerning children's concepts, thinking, problem solving, memory, communication. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2401 and grade of C- or higher in PSY:2810.

**PSY:3451 Infant Development**  
3 s.h.  
Physical, motor, perceptual, cognitive, and social development during first two years of life; focus on early mechanisms of change; locomotion, perceptual abilities, precursors of cognition, early language acquisition, social interaction. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2810 and grade of C- or higher in PSY:2401.

**PSY:3530 Personality**  
3 s.h.  
Classic theoretical models and contemporary empirical research in personality, including influence of heredity and environment, consistency and stability of behavior. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2301 or PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3540 Attitude Change**  
3 s.h.  
Current theoretical approaches; laboratory and field methods of research; basic processes of change considered within broader framework of psychology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3560 Psychology of Gender**  
3 s.h.  
Origins of gender roles, gender socialization in childhood, gender differences across lifespan; research on gender differences in cognition, emotions, behavior, physical and mental disorders, communication. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3570 Social Cognition**  
3 s.h.  
Research and theory on cognitive structures and processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, schemas, person perception, stereotypes, attitudes. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3580 Judgment and Decision Making**  
3 s.h.  
Processes and biases that shape judgments and decisions of various types (e.g., about other people, the future, competitions, products, medical treatments, health risks, crime suspects). Prerequisites: PSY:2701. Requirements: Grade of C- or higher in PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3590 Stigma and Prejudice**  
3 s.h.  
Research and theory on prejudice, stigmatization, stereotyping and discrimination, focusing on nature, origins, and impact of prejudice and stigma. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 and grade of C- or higher in PSY:2810.

**PSY:3620 Human Memory**  
3 s.h.  
Contemporary psychological theory and research on short-term and long-term memory, acquisition processes, related topics in cognition. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2601 and grade of C- or higher in PSY:2810.

**PSY:3660 Human Information Processing**  
3 s.h.  
Early through contemporary theory and research on human information processing; focus on human-machine interaction and ergonomics. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2501 or PSY:2601, and grade of C- or higher in PSY:2810; or graduate standing.
PSY:3670 Language Processes  3 s.h.
Psychological processes involved in using languages, including speech perception and production, the meaning of words, understanding and producing sentences, and basics of discourse and pragmatics; developmental and neural bases of language processes. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2810, and psychology major; or nonmajor and CSD:1015 or LING:3001. Same as LING:3670.

PSY:3994 Research Practicum in Psychology  arr.
Small-group participation in faculty research projects; literature review, study planning, data collection, analysis, interpretation, write-up.

PSY:3995 Advanced Research Practicum  1-3 s.h.
Individual participation in faculty research projects; significant reading and writing. Requirements: two semesters of PSY:3994 or HONR:3994.

PSY:3996 External Practicum in Psychology  1-3 s.h.
Student participation in career-related professional activities in community and University of Iowa agencies.

PSY:3997 Teaching/Advising Practicum in Psychology  1-3 s.h.
Participation in faculty teaching as undergraduate teaching assistant or the Psychology Peer Advisor Program.

PSY:3998 Individual Readings and Projects  1-3 s.h.
Requirements: psychology major and undergraduate standing.

PSY:4020 Laboratory in Psychology  4 s.h.
Laboratory study of an aspect of behavior; topics in a particular area (e.g., learning and memory, perception, social behavior, operant behavior, physiological processes). Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2810.

PSY:4090 Psychology Seminar  3 s.h.
Readings from original sources, presentations, papers, student participation. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2810, psychology B.S. enrollment, and senior standing.

PSY:4990 Honors Thesis Research  1-3 s.h.
Supervised original project; leads to written thesis, oral defense. Requirements: honors standing.

Graduate

PSY:5050 Quantitative Methods in Psychology  4 s.h.
Overview of statistical methods based on the general linear model, including ANOVA, ANCOVA, and multiple regression; how to conduct these analyses using SPSS. Requirements: first-year graduate standing in psychology.

PSY:5055 Mixed-Effects Modeling in Psychology  4 s.h.
Introduction to mixed-effects analysis of hierarchically structured and cross-classified psychological data using R. Prerequisites: PSY:5050.

PSY:5203 Fundamental Neurobiology  4 s.h.
Neurobiology from molecular/cellular to systems levels, including cell biology of neuron; membrane electrophysiology, synaptic transmission and plasticity, functional neuroanatomy, sensory systems from periphery to CNS, peripheral and central motor systems, autonomic systems emotion, memory, sleep, language, attention and cognition, development of nervous system; discussion of classic and recent journal articles. Same as BIOL:5653, NSCI:5653.

PSY:5210 Fundamentals of Behavioral Neuroscience  4 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience, sensation, motivation, emotion. Same as NSCI:5210.

PSY:5212 Foundations in Behavioral and Cognitive Neuroscience  4 s.h.
Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253 or PSY:5210 or NSCI:5210. Same as NSCI:5212.

PSY:5320 Descriptive Psychopathology  3 s.h.
Psychiatric syndromes, including description, etiology, experimental and clinical research; development, function of classification systems.

PSY:5330 Principles of Psychological Assessment  4 s.h.
Assessment theory and basic psychometric principles in test construction, evaluation, application; ethical, social, psychological, psychometric issues and controversies in assessment.

PSY:5365 Seminar: Neuropsychology and Neuroscience  arr.
Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, NSCI:5365.

PSY:5410 Proseminar in Developmental Science  3 s.h.
Introduction to developmental process and developmental science; topics organized around mechanisms of development, with cross-disciplinary focus.

PSY:5610 Proseminar in Cognition and Perception  3 s.h.
Broad overview of study of cognition, including cognitive psychology, computer science and artificial intelligence, linguistics, neuroscience, philosophy of mind.

PSY:5710 Introduction to Health and Behavioral Science  3 s.h.
Evolution of health psychology; survey of major physiological systems in which pathology is affected by behavioral processes; review of theoretical approaches, experimental paradigms from behavioral science, or they may apply to assessment of health problems; prevention, intervention, psychological adaptation to physical disease.

PSY:6050 Clinical Behavioral Medicine 3 s.h.
Biopsychosocial framework applied to study, treatment of chronic and acute physical conditions; clinical concepts, procedures.

PSY:6101 Cognitive Science of Language Proseminar I 3 s.h.
Survey of five major disciplines within language sciences: formal linguistic, communication disorders, psychological, neuroscience, and computational approaches. Requirements: graduate standing in communication sciences and disorders, linguistics, psychology, or neuroscience. Same as CSD:6101, LING:6101.

PSY:6102 Cognitive Science of Language Proseminar II 3 s.h.
Survey of five major disciplines within language sciences: formal linguistic, communication disorders, psychological, neuroscience, and computational approaches. Requirements: graduate standing in communication sciences and disorders, linguistics, psychology, or neuroscience. Same as CSD:6102, LING:6102.

PSY:6210 Behavioral Pharmacology 3 s.h.
Behavioral analysis of drug action; emphasis on physiological and biological mechanisms underlying behavioral processes in experimental animals, humans.

PSY:6230 Foundations of Learning, Memory, and Cognition 3 s.h.
Determinants of adaptive behavior in humans and animals; emphasis on behavioral analysis of learning, memory, and cognition; relevance of laboratory research to real life activities.

PSY:6265 Neuroscience Seminar 0-1 s.h.
Research presentations. Offered fall and spring semesters. Same as ACB:6265, MPB:6265, NSCI:6265, BIOL:6265.

PSY:6270 Fundamentals of Health Biopsychology 3 s.h.
Biological basis of behavior and cognition in relation to disordered regulation of body-brain systems in pathological states.

PSY:6280 Structural and Functional MRI Methods and Application 3 s.h.
Introduction to basic principles of magnetic resonance imaging and its application to psychology; imaging of brain structure; focus on functional MRI. Requirements: graduate-level introductory statistics.

PSY:6340 Psychological Therapies 3 s.h.
Historical development and current status of empirically based therapies for psychological disorders, including anxiety, depression, schizophrenia, childhood disorders; emphasis on critical evaluation of therapy techniques.

PSY:6350 Ethics and Professional Concerns arr.
Major ethical and legal issues relevant to clinical psychologists' varied roles; understanding of legal and ethical issues encountered by psychologists in varied settings, development of personal working model for resolving ethical and professional concerns.

PSY:6370 Principles of Neuropsychology 3 s.h.
Principles of human neuropsychology, including foundations (history, methods, approaches), major functional systems (vision, memory, language, spatial processing), executive functions (emotional processing and personality), and applications (experimental, clinical). Recommendations: prior course work in psychological assessment, psychopathology, and neuroanatomy.

PSY:6440 Developmental Cognitive Neuroscience 3 s.h.
Overview of current developmental cognitive neuroscience theory, research, and methods (PET, fMRI, optical imaging, EEG, ERPs); neural development, computational neuroscience, and methods.

PSY:6450 Processes of Language Acquisition 3 s.h.
Theoretical and computational approaches to the study of first language acquisition from infancy to five years, including prelinguistic sound discrimination, babbling, semantic development, categorization abilities, syntactic and grammatical development.

PSY:6460 Translating Developmental Science to Applied Problems 3 s.h.
Relationship between basic and applied research in development; individual differences work and how applied work informs theory.

PSY:6480 Computational Approaches to Development 3 s.h.
Use of computational models to understand development; model development, specific approaches, model evaluation, and hands-on model work.

PSY:6490 Dynamic Systems and Development 3 s.h.
Dynamical systems theory, its application to basic problems in developmental psychology; development of motor control, cognition, language; comparisons with other theoretical approaches in developmental psychology.

PSY:6510 Advanced Social-Personality Psychology 3 s.h.
Classic and contemporary theory, research, methodological issues in social-personality psychology.

PSY:6520 Attitudes and Persuasion 3 s.h.
Classic and current theories and findings on persuasion, the formation and measurement of attitudes.

PSY:6530 Advanced Social Cognition 3 s.h.
Research and theory on cognitive processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, counterfactual thinking, schemas, and person perception, stereotypes, attitudes.

Religious Studies

Chair
• Diana Fritz Cates

Undergraduate major: religious studies (B.A.)
Undergraduate minor: religious studies
Graduate degrees: M.A. in religious studies; Ph.D. in religious studies
Faculty: http://clas.uiowa.edu/religion/people/faculty
Web site: http://clas.uiowa.edu/religion/

The Department of Religious Studies encourages multidisciplinary inquiry into religious ideas, experiences, philosophies, cultural expressions, and social movements. It studies a rich array of traditions and paths, including South Asian religions, ancient Judaism and early Christianity, African diaspora and Native American traditions, Chinese Buddhism, modern European Christianity, various Islamic sects, popular religions in Japan, American Christianities, and new forms of religion that many people may not yet recognize as religions.

Religion has taken countless forms over the millennia, and it continues to wind its way through history. The Department of Religious Studies helps students to think clearly and creatively about the many forms that religion takes and the subtle ways in which it operates.

Students gain many benefits through the critical study of religion. They learn how people from around the world have responded to age-old questions about life, love, suffering, and death. In the process, they deepen their own engagement with life. They learn about religion's impact on global events, especially its influences on the construction of personal and communal identities, and its roles in shaping processes of social change, historically and in the contemporary, digital era.

Undergraduate Programs of Study

• Major in religious studies (Bachelor of Arts)
• Minor in religious studies

The major in religious studies helps students gain strengths they will need in an increasingly globalized world: curiosity, open-mindedness, critical thinking and effective communication skills, global cultural competency, knowledge of diverse religions and their influences, and the ability to use intelligence and creativity in addressing humanitarian concerns.

Because religious ideas inform every aspect of life, many students who major in religious studies choose to earn a second major in another discipline, such as anthropology, biology, classics, English, history, journalism and mass communication, philosophy, political science, or psychology. Religious studies students often go on to graduate school, professional study in law, medicine, or dentistry; and careers in nursing, social work, human rights, nongovernmental organizations, counseling, or business, especially in areas that involve human resource management.

Bachelor of Arts

The Bachelor of Arts with a major in religious studies requires a minimum of 120 s.h., including 30 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). A maximum of 15 s.h. of transfer credit may be counted toward the major; transfer credit is evaluated individually.

Course work for the major includes core courses and electives. Courses for the major may not be taken pass/nonpass. Students may count a maximum of three religious studies courses toward General Education Program requirements.

The major in religious studies requires the following course work.

CORE COURSES

Both of these (6 s.h.):

RELS:1015 Religions in a Global Context: The Critical Role of Religion in International Affairs 3 s.h.
RELS:4950 Senior Majors Seminar 3 s.h.

The course RELS:1015 Religions in a Global Context: The Critical Role of Religion in International Affairs provides an introduction to the study of the world’s religions; students should take it as early as possible.

The capstone course RELS:4950 Senior Majors Seminar is offered each spring semester. Ideally, students take it during their senior year, but they may take it during their junior year.

ELECTIVES

Students complete 24 s.h. of elective course work (at least eight courses) chosen from either or both of two categories: religious traditions and critical issues (listed below). Students choose courses as follows.

At least two foundation courses numbered 1000-1999 6 s.h.
At least three advanced courses numbered 2000-4999 9 s.h.
At least three courses at any level 9 s.h.

The department advises students to choose electives that will enable them to examine a variety of traditions and issues.

Religious Traditions

Courses in this category generally focus on religious traditions or movements in historical perspective, within particular geographical areas, or across regions. They may address foundational stories of creation and cosmic order, archaeological findings, the compilation and interpretation of revered texts, religious doctrines, social norms, rituals and practices, or conflicts and schisms.

RELS:1000 First-Year Seminar 1 s.h.
RELS:1001 The Judeo-Christian Tradition 3 s.h.
RELS:1070 Introduction to the Hebrew Bible/Old Testament 3 s.h.
RELS:1080 Introduction to the New Testament 3 s.h.
RELS:1113 Gateway to the Bible 3 s.h.
RELS:1130 Introduction to Islamic Civilization 3 s.h.
RELS:1225 Medieval Religion and Culture 3 s.h.
RELS:1250 Modern Religion and Culture 3 s.h.
RELS:1323 Life in the Biblical World 3 s.h.
RELS:1410 Introduction to Indian Religions 3 s.h.
Critical Issues courses generally focus on ideas, arguments, or problems, often with reference to influential texts or oral traditions. They may explore religious perspectives on the nature of reality or the meaning of human existence, and they may focus on issues of gender, sexuality, race, ethnicity, class, globalization, human rights, or law and politics.

RELS:1000 First-Year Seminar 1 s.h.
RELS:1135 Introduction to African American Religions 3 s.h.
RELS:1404 Living Religions of the East 3 s.h.
RELS:1702 Religion in America Today 3 s.h.
RELS:1810 Longing for Freedom 3 s.h.
RELS:1903 Quest for Human Destiny 3 s.h.

Critical Issues

Critical issues courses generally focus on ideas, arguments, or problems, often with reference to influential texts or oral traditions. They may explore religious perspectives on the nature of reality or the meaning of human existence, and they may focus on issues of gender, sexuality, race, ethnicity, class, globalization, human rights, or law and politics.
The minor in religious studies requires the following course work for the minor and in all UI courses for the minor. Course work for the minor may not be taken pass/nonpass. With the recommendation of the department's undergraduate committee and approval of the faculty, students may count a maximum of 3 s.h. of transfer credit toward the minor.

The minor in religious studies requires the following course work.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the fifth semester begins:** one or two courses in the major

**Before the seventh semester begins:** three to six courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** five to seven courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major**

Students majoring in religious studies have the opportunity to graduate with honors in the major. Departmental honors students must complete all requirements for the major plus an additional 3 s.h. of advanced course work, earning at least 33 s.h. for the major. They may apply 3 s.h. of RELS:4960 Individual Study: Undergraduates or RELS:4970 Honors Tutorial toward the 33 s.h. of credit required for the honors major. Honors students must take RELS:4975 Honors Essay under the supervision of a faculty advisor; copies of the completed and approved essay are submitted to the Department of Religious Studies and to the University of Iowa Honors Program.

Departmental honors students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University's honors program.

**Minor**

The minor in religious studies requires a minimum of 15 s.h. in religious studies courses, including 12 s.h. completed at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work for the minor may not be taken pass/nonpass. With the recommendation of the department's undergraduate committee and approval of the faculty, students may count a maximum of 3 s.h. of transfer credit toward the minor.

The minor in religious studies requires the following course work.

**At least two foundation courses numbered 1000-1999**

**At least two advanced courses numbered 2000-4999**

**One course at any level**

Students are encouraged to include RELS:1015 Religions in a Global Context: The Critical Role of Religion in International Affairs and RELS:4950 Senior Majors Seminar in the minor.

**Graduate Programs of Study**

- Master of Arts in religious studies
- Doctor of Philosophy in religious studies

Graduate study addresses the idea of religion and the ways in which religious traditions originate, develop, and interact over time. Students learn to identify and use multiple methods for the study of religion, including historical, philosophical, ethical, literary, linguistic, psychological, ethnographic, and digital approaches.

Graduate study is flexible. Students create individualized programs of study in consultation with their advisors and core committee members, in light of faculty expertise within the department and around the University. Programs often are developed in relation to one of the following four areas of concentration.

- Religions in the Middle East, Ancient Near East, and Mediterranean
- Religions in Asia
- Religions in the Americas and Europe
- Religion, ethics, and society

Programs also are developed across these areas or thematically in relation to the department's central focus which is religion and public life, most notably religion's impact on the construction of individual and group identities and the dynamics of social change. Included in this focus is religion's relationship to gender, race, ethnicity, and other markers of identity, and the practice and study of religion in a digital age.

Graduate study in religion can prepare a student to become a professor of religious studies. It also can provide the ability to integrate a deep and theoretically-sophisticated understanding of religion and its influences into other professions, such as medicine, nursing, law, political leadership, policy making, journalism, or counseling.

For more information about graduate study and the faculty, see Graduate Program and People on the department's web site.

**Master of Arts**

The Master of Arts program in religious studies requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. The program is designed for students who wish to advance their understanding of a particular area of religious studies or explore a variety of traditions and topics. It also is intended to prepare students to educate the public about religion and its influences, within a variety of life and career contexts.
Students must complete 24 s.h. of the credit required for the degree at the University of Iowa and must maintain a cumulative g.p.a. of at least 3.20. Requirements for languages and other research tools vary according to the student's study focus. M.A. students are supervised by a three-person committee consisting of an advisor and two additional faculty members.

All M.A. students complete the following five courses.

- RELS:5100 Teaching and Public Engagement 3 s.h.
- RELS:5200 Varieties of Religion in the Contemporary World 3 s.h.
- RELS:5300 Genealogies of Religion 3 s.h.
- RELS:5400 Methods and Theories in the Study of Religion 3 s.h.

One graduate seminar

Students select remaining course work depending on their interest area and in consultation with their core committee.

In the M.A. thesis, students demonstrate and refine their research and writing skills. They may count a maximum of 6 s.h. of thesis credit toward the degree. Students must defend their M.A. thesis. Students who do not write a thesis must pass an M.A. examination that tests their competence in completed course work.

**Doctor of Philosophy**

The Doctor of Philosophy program in religious studies requires a minimum of 72 s.h. of graduate credit. Students may transfer up to 24 s.h. of credit from another accredited graduate school.

Course requirements for the Ph.D. vary according to concentration area. However, all students must complete the following eight required courses.

- RELS:5100 Teaching and Public Engagement 3 s.h.
- RELS:5200 Varieties of Religion in the Contemporary World 3 s.h.
- RELS:5300 Genealogies of Religion 3 s.h.
- RELS:5400 Methods and Theories in the Study of Religion 3 s.h.

Four graduate seminars, including at least two in religious studies

During their fourth semester in residence, students must submit a departmental program of study, which must be approved by the religious studies faculty. To gain approval to continue in the Ph.D. program, students must complete three of the required Ph.D. courses listed above and two of the graduate seminars; show satisfactory progress toward the language and course requirements of their individual programs; demonstrate the ability to write scholarly papers at a level satisfactory for the Ph.D., as assessed by the advisor and core committee members (at least two papers must be submitted to the committee); and have a cumulative University of Iowa g.p.a. of at least 3.40 (language courses that do not count toward the Ph.D. are excluded).

Students must pass a comprehensive examination based on a bibliography that covers their main focus area within religious studies (the history, influential figures, perennial debates, and/or theoretical approaches); a secondary chosen area of focus, distinct from the dissertation topic; and an area of specialization or dissertation topic.

The comprehensive exam includes an oral defense. Students also must write a dissertation prospectus and a dissertation based on original research, both of which are defended orally. They may count a maximum of 12 s.h. of dissertation credit toward the degree.

Students working toward a Ph.D. may receive an M.A. upon completing at least 30 s.h. of course work and successfully passing the comprehensive examination.

For more detailed information on graduate programs in religious studies, contact the Department of Religious Studies or visit Graduate Program on the department's web site.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants to the M.A. program ordinarily must have a verbal reasoning score of at least 147 on the revised Graduate Record Examination (GRE) General Test (verbal reasoning score of at least 500 and quantitative reasoning score of at least 580 on the old GRE General Test) and a g.p.a. of at least 3.00.

Applicants to the Ph.D. program ordinarily must have a verbal reasoning score of at least 158 and a quantitative reasoning score of at least 147 on the revised GRE General Test (verbal reasoning score of at least 580 and quantitative reasoning score of at least 580 on the old GRE General Test) and a g.p.a. of at least 3.40.

Application materials must include an application form; a transcript of all undergraduate and graduate work (one copy must be sent to the University's Office of Admissions and a second copy must be sent to the Department of Religious Studies); an application or waiver of consideration form for graduate assistantships; three confidential letters of recommendation; and a writing sample that demonstrates the applicant's ability to engage in critical analysis. Applicants also must submit a brief personal essay that explains their objectives for graduate study and states which area of graduate study in religion will suit their objectives best. Students may indicate one of the four areas of concentration listed under “Graduate Programs of Study” above or an area that crosses the concentrations and is well supported by faculty expertise. For details, see Graduate Admission and Financial Aid on the department’s web site.

All application materials must be received by January 15 to receive full consideration for fall admission.

**Financial Support**

All Ph.D. students in religious studies receive funding. Ordinarily, no departmental funding is available for M.A. students. The department offers financial support for graduate students in the form of teaching assistantships.

The Gilmore Scholarship, for doctoral students interested in the relationship among religion, the visual arts, and humanistic values, pays up to full tuition for one year. It is awarded every few years.
Language Study at the University

The University offers a variety of modern European languages (see French and Italian (p. 291), German (p. 336), and Spanish and Portuguese (p. 596) in the Catalog) as well as Greek and Latin (see Classics (p. 149) in the Catalog); Arabic and Swahili (see French and Italian (p. 291) in the Catalog); and Chinese, Czech, Hindi-Urdu, Japanese, Korean, Russian, and Sanskrit (see Asian and Slavic Languages and Literatures (p. 100) in the Catalog).

Courses

Lower-Level Undergraduate

RELS:1000 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

RELS:1001 The Judeo-Christian Tradition 3 s.h.
Introduction to Judaism and Christianity; focus on scriptural foundation and historical development of these related traditions; texts and other forms of religious expression, especially in art, music, literature, and philosophy; readings from the Hebrew Bible and New Testament; other materials from selected Jewish and Christian thinkers. GE: Historical Perspectives.

RELS:1010 CLAS Master Class 1-3 s.h.
Exploration of a single topic in a series of lectures by faculty presenting divergent perspectives; illuminates intellectual adventure inherent in liberal arts and sciences; encourages discovery of majors and other areas of study within the College of Liberal Arts and Sciences. Same as CLAS:1001, THTR:1001, CS:1001, CSD:1001, PHIL:1001, ENGL:1001, BIOC:1001, ARTS:1001.

RELS:1015 Religions in a Global Context: The Critical Role of Religion in International Affairs 3 s.h.
Essentials of world’s religions; focus on religion’s role in national and international events, fundamentalism, millennarianism, protest movements, religion and youth culture, religion and popular culture, contact between religious communities past and present.

RELS:1021 Judaism: The Sacred and the Secular 3 s.h.
Ways in which the sacred face of Judaism (Hebrew Bible and rabbinic additions) have transformed and been transformed by historical frameworks in which Jews and Judaism have existed; special attention given to the Holocaust, modern nation-state of Israel, and experiences of Jews in modern secular nation-states. GE: Values, Society, and Diversity.

RELS:1070 Introduction to the Hebrew Bible/Old Testament 3 s.h.
History, religion, and thought of ancient Jews as recorded in their scripture. GE: Values, Society, and Diversity.

RELS:1080 Introduction to the New Testament 3 s.h.

RELS:1113 Gateway to the Bible 3 s.h.
Disagreement of Jews, Catholics, Protestants, and Eastern Orthodox Christians about the Bible, one of the most influential works in Western culture, on how it should be interpreted, what books should be included, and what versions of those books should be authoritative; introduction to issues involved in creating and interpreting the Bible; how academic study of religion seeks to provide answers.

RELS:1130 Introduction to Islamic Civilization 3 s.h.
Major areas of Islamic religious tradition: Qur’an, traditions of the Prophet, development and character of Islamic law, theology. GE: International and Global Issues; Values, Society, and Diversity. Same as HIST:1130.

RELS:1225 Medieval Religion and Culture 3 s.h.
Religion in Europe from classical antiquity to dawn of the Reformation; the religious element in traditions such as art, architecture, literature. GE: Historical Perspectives. Same as HIST:1425.

RELS:1250 Modern Religion and Culture 3 s.h.
European and American religious life from Renaissance to 21st century; focus on specific themes, such as secularism, regionalism, pluralism. GE: Historical Perspectives. Same as HIST:1450.

RELS:1323 Life in the Biblical World 3 s.h.
Examination of world depicted in Old and New Testaments of the Bible; archaeological evidence, ancient art, historical accounts, geography, and Bible text used to examine background of biblical text, shedding light on different aspects of daily life in antiquity from different points of view from Late Bronze Age through Roman period. Same as CLSA:1323.

RELS:1350 Introduction to African American Religions 3 s.h.
GE: Values, Society, and Diversity. Same as AFAM:1250.

RELS:1404 Living Religions of the East 3 s.h.
Religious beliefs, practices in India, China, Japan. GE: Values, Society, and Diversity. Same as ASIA:1040.

RELS:1410 Introduction to Indian Religions 3 s.h.
Religions with origins in the South Asian geographic region (e.g., Vedas in mid-second millennium BCE, Jainism and Buddhism from sixth to fourth centuries BCE, Sikhism in 15th century, Indian Christianity, Islam); focus on Hinduism and Buddhism; rise of varied literary forms, ritual, rise of devotional religion, Tantra, how religious practices affect indigenous medical traditions, how these traditions developed in different South Asian regions; broad changes in South Asian religion in 20th and early 21st centuries, current politicization of religion.
RELS:1502 Asian Humanities: India  
Introduction to four thousand years of South Asian civilization, through popular stories. GE: Values, Society, and Diversity. Same as SOAS:1502.

RELS:1506 Introduction to Buddhism  
Basic tenets, religious paradigms, historical phases important in the development of Buddhism; from the Buddha's life to evolution of Mahayana Buddhism; readings from India, Tibet, China, Japan, Korea, Southeast Asia. GE: Values, Society, and Diversity. Same as ASIA:1060.

RELS:1510 Gods, Buddhhas, and Ghostly Officials: The Past and Present of Chinese Religions  
History of religious beliefs and practices in China; role in modern-day Chinese society; specific case studies that illuminate current situation of religion in China and impact on Chinese society; focus on the still widespread worship of gods and ancestors, the Confucian, Buddhist and Daoist traditions, recent upsurge of Christianity in China, and emergence of new religions (e.g., the Falun gong). Same as ASIA:1110.

RELS:1610 Japanese Religions  
Religions of Japan from ancient times to the present day; elite and popular Japanese interpretations of Chinese Buddhist and Daoist traditions; the parallel development of an indigenous kami tradition; contemporary new religious movements; focus on the codification of a variety of religious (and sometimes quasi-religious) paths, including the way of tea, the way of the brush, and the way of the samurai. Same as JPN:1115.

RELS:1702 Religion in America Today  
How American men, women, and children practice their beliefs in today's society. GE: Values, Society, and Diversity.

RELS:1765 U.S. Latino Religions  
Beliefs and practices of U.S. Latinos and Latinas, ways that their beliefs and practices are unique and where they overlap with mainstream U.S. society; beliefs, symbols, and practices among U.S. Latinos and Latinas on national and local level; field visits to local churches and religious sites; class visitors share insights.

RELS:1810 Longing for Freedom  
Religious backgrounds and unique spiritualities of Maya Angelou (an African-American Christian), Black Elk (a Lakota Sioux medicine man), and the Dalai Lama (a Tibetan Buddhist monk); forms of oppression that humans can experience as obstacles to happiness, and forms of liberation that are possible (social, political, economic, mental, emotional, spiritual). GE: Values, Society, and Diversity.

RELS:1903 Quest for Human Destiny  
Quests for destiny in terms of perceived options/goals and ability to recognize, pursue, achieve them. GE: Values, Society, and Diversity.

RELS:1997 Harry Potter: The Mystery and Magic of Life  
Exploration of Harry Potter novels and films that offer millions of people an entrée into a world of wizards, witches, and muggles; this engrossing world created by J.K. Rowling invites readers and viewers to explore the power of human imagination, creates a space for asking questions of personal significance (What defines me as a person? What sort of person am I in the process of becoming? What are the most significant factors that are shaping my identity and destiny?); students read selections and view film segments while exploring these essential questions.

RELS:2064 Tricksters, Fools, and Creators: Mytical Agents of Change  
Trickster figures found all around the world in many forms, including coyote, br'er rabbit, spider, raven, and gods; how they are often depicted as bungling fools or dupes, but also as creators, transformers, or culture heroes; how they get into trouble and solve human problems; how storytellers have long entertained and educated their listeners with tales of trickster exploits; trickster figures that have been recast in comic books and on movie screens (e.g., Loki); examination of historical and contemporary trickster figures to understand how they are experienced by different cultures and how they shape and inform human behavior.

RELS:2068 Jews in Popular Culture  
Exploration of a wide variety of ways in which Jewish people represent themselves through production of cultural media.

RELS:2080 Public Life in the U.S.: Religion and Media  
Examination of how the U.S. came into being through specific communication practices, how religion has helped and hindered that process; religious roots of the idea of the U.S., intertwined histories of print media and religion, role of religion and secularism in public discourse; U.S. pride as a nation in which diversity thrives in public discourse: communicative acts that created and sustained this country and also mark sites of discord, conflict, and confusion from the very beginnings of the U.S. to today; how religion has been a source of national identity and national division. Prerequisites: (COMM:1112 or COMM:1170) and (COMM:1117 or COMM:1130) and (COMM:1168 or COMM:1174) and COMM:1301 and COMM:1305. Requirements: g.p.a. of at least 2.30, and completion of four of five Foundations of Communication courses. Same as COMM:2080.

RELS:2087 Narnia and Beyond: The Writings of C.S. Lewis  
Exploration of C.S. Lewis's use of fantasy to describe the inexpressible, his efforts to empathize with human suffering while hoping in possibility of miracles, and his jargon-free narration of Christian beliefs for a war-weary country: Lewis's works that continue to attract attention, ranging from children's literature to science fiction to autobiography and nonfiction; as a professor of medieval and renaissance Literature, Lewis's unique perspective on Christianity that led him to make use of imagery, metaphors, and narratives previously neglected by Christian thinkers.
RELS:2090 Issues in American Catholicism  3 s.h.
Major issues that have faced Catholics in America; special
attention to issues of gender, racial, and ethnic identities.

RELS:2121 The Bible and the Sacrifice of
Animals  3 s.h.
Why the biblical God permits humans to eat other
animals’ flesh; fundamental dietary differences between
humans and the beasts.

RELS:2182 Ancient Mediterranean
Religions  3 s.h.
Introduction to major religious traditions of ancient
Mediterranean world; Mesopotamia, the Levant (Hebrew
Bible), Egypt, Greece, and Rome; central aspects of
mythology, ritual, and archaeology, individually and
in comparative perspective; ancient Judaism and
Christianity considered in their various cultural contexts;
basic concepts for understanding cultural exchange;
fundamental theories in the study of religion. GE: Values,
Society, and Diversity. Same as CLSA:2482.

RELS:2225 Messianic and Apocalyptic
Prophecy in the Bible  3 s.h.
Literary, historical, and theological analysis of biblical
prophecies and their impact. Same as CLSA:2425.

RELS:2260 Hard Cases in Healthcare:
Issues of Life and Death  3 s.h.
Exploration of ethical issues that arise in real-life clinical
settings; designed for students considering a career in
healthcare and others intrigued by the way advanced
technologies are changing what it means to be human,
to live well, and to die with dignity; most cases studied
involve people for whom questions of life and death
are framed by religious beliefs or carry spiritual weight;
caring for others in a context of science with sensitivity to
matters of the human spirit.

RELS:2272 Religion and Film  3 s.h.
Religious ideas that are often explored and debated in
movies; movies that retell a particular story (Noah or
Kundun) or rework ancient themes (Little Buddha or The
Matrix); movies that go beyond mere entertainment to try
to persuade audiences to change their view of the world
and how movie watchers do not realize that this process
is taking place; analysis of movies that use ancient or
religious material to try to shape people’s minds and
imaginations today. Recommendations: some background
in religious studies helpful.

RELS:2289 Jerusalem: The Holy City  3 s.h.
Religious, political, and cultural history of Jerusalem
over three millennia as a symbolic focus of three
faiths—Judaism, Christianity, and Islam; integration of
several digital learning technologies, including digital
reconstructions and Google Earth tours of Jerusalem.
Same as CLSA:2489.

RELS:2320 Jesus and the Gospels  3 s.h.
How Jesus was depicted in the writings of the early
church; reasons for the different portrayals. Same as
CLSA:2420.

RELS:2351 Religious Thinkers of the West  3 s.h.
Augustine, Bonaventure, Fichte, Kierkegaard, Heidegger.
GE: Values, Society, and Diversity.

RELS:2353 Love: Journey of an Idea
Through Time  3 s.h.
Idea of love from influential texts of the past to various
aspects of contemporary culture and experience (e.g.,
romantic love, mystical experience, digitally-mediated
friendships, family relationships); idea of universal human
rights; cybersex.

RELS:2356 Christianity and the Enduring
Human Experience  3 s.h.
Topics in Christian history and thought; emphasis on the
relationship between communities of belief and Christian
traditions.

RELS:2361 Middle East and Mediterranean:
Alexander to Suleiman  3 s.h.
GE: Historical Perspectives. Same as HIST:2461,
CLSA:2461.

RELS:2486 Religious Coexistence and
Conflict in the Middle East  3 s.h.
Examination of coexistence and conflict in the region
that includes Iraq, Israel/Palestine, Lebanon, Syria and
Yemen; relationship between religion and politics in the
Middle East; how the region’s diverse ethnic and religious
communities coexisted in the past and what now seems
like a remarkably tolerant environment; investigation of
questions (Did Muslims, Christians, and Jews really live
together in peace? If so, how and why has that changed?);
history of communal relations in the Middle East; use of
this background to analyze how religion and ethnicity
function in contemporary politics.

RELS:2674 You Are What You Eat: Food,
Belief, and Identity  3 s.h.
Introduction to study of food and identity in a global
context.

RELS:2700 Sacred World of Native
Americans  3 s.h.
GE: Values, Society, and Diversity. Same as AINS:2700.

RELS:2720 Religious and Ethnic Conflict in
the Middle East  3 s.h.
Relationship between religion and politics in the Middle
East; examination of areas of conflict, including Lebanon,
Iraq, and Israel/Palestine.

RELS:2730 African American Islam  3 s.h.
Same as AFAM:2730.

RELS:2771 Sexual Ethics  3 s.h.
Introduction to religion and ethics; diverse secular, Jewish,
and Christian perspectives on human sexuality and sexual
activity; religious views underlying divergent attitudes
toward same-gender sexuality and abortion. Same as
GWSS:2771.

RELS:2775 The Bible and the Holocaust  3 s.h.
Religious and philosophic implications of the Holocaust
viewed through survivors’ writings.
REL5:2778 American Indian Women: Myth, Ritual, and Sacred Power 3 s.h.
Participation of women and girls in native religious traditions; obstacles to knowing and understanding native women's religious roles and experiences. Same as AINS:2078, GWSS:2778.

REL5:2791 Religion and Social Life 3 s.h.
Religion as a dimension of experience that can find diverse forms of expression, especially in social life and production of culture, not simply a social institution that is defined by a set of beliefs and practices.

REL5:2834 Philosophy of Religion 3 s.h.
Historical to contemporary treatments of central issues; nature of faith, existence and nature of God, science and religion, ethics and religion, miracles, religious experience, interpretation of religious texts. Requirements: sophomore or higher standing. Same as PHIL:2534.

REL5:2852 Women in Islam and the Middle East 3 s.h.
Women in the Islamic community and in non-Muslim Middle Eastern cultures; early rise of Islam to modern times; references to women in Qur'an and Sunnah, stories from Islamic history; women and gender issues. GE: International and Global Issues; Values, Society, and Diversity. Same as GWSS:2052.

REL5:2877 Sport and Religion in America 3 s.h.
Sport as a religion; religiosity in sports; examination of religion and sport as connected in important ways in American society. Same as SPST:2077.

REL5:2883 Science and Christianity: Conflicts and Conversations 3 s.h.
Science, technology, and religion as some of the most powerful forces in the world and their dramatic interactions; various conflicts and conversations between science and Christianity in modern Western culture beginning with Galileo; evolution, intelligent design, Big Bang, "God Particle," Human Genome Project, and spiritual implications of neuroscience. Recommendations: nontechnical knowledge of physics, biology, and psychology.

REL5:2912 The Bible in Film: Hollywood and Moses 3 s.h.
How Hollywood has interpreted the Biblical stories of Adam and Eve, Moses, and David the King.

REL5:2930 Digital Media and Religion 3 s.h.
Influences of digital media on religion and spirituality today. Requirements: for COMM:2079 — communication studies major, g.p.a. of at least 2.30, and completion of four Foundation of Communication courses chosen from COMM:1301, COMM:1305, COMM:1112 or COMM:1170, COMM:1117 or COMM:1130, and COMM:1168 or COMM:1174. Same as COMM:2079.

REL5:2947 Quest II: Sex, Love, and Death 3 s.h.
Readings from the Hebrew Bible, Sophocles' Antigone, Melville's Billy Budd, Hemingway's The Sun Also Rises, Salinger's A Perfect Day for Banana Fish, the film From Here to Eternity.

REL5:2962 Islam in the Public Sphere: Arts, Literature, Culture, and Politics 3 s.h.
Religion as exerting undeniable influence in public sphere in communities around the world; examination of ways in which religion manifests itself in public sphere; religion in the arts, politics, science, literature, sports, communication, business, education, and many other domains of public sphere.

REL5:2969 Quest III: Heroes, Lovers, and Knaves 3 s.h.
Tension between Paganism and the Bible regarding heroism and eroticism; the Song of Songs, stories of Rachel, Samson, Saul, Bathsheba; Plato's Symposium, Hemingway's The Snows of Kilimanjaro, Salinger's For Esmer with Love and Squalor; The Highlander, The Matrix, Bridget Jones' Diary; unmasking knaves to truly appreciate heroes and lovers.

REL5:2980 Religion and Contemporary Popular Culture 3 s.h.
Representation and appropriation of world religions in contemporary popular culture (film, television, music, new media); new religious movements arising within popular culture; religion in the digital age; commodification and globalization; focusing on cultural production in North America and Asia.

REL5:2986 Religion and Women 3 s.h.
Sexism and its disavowal in biblical narrative, law, wisdom texts, Gospels, epistles; contemporary impact. GE: Values, Society, and Diversity.

Upper-Level Undergraduate and Graduate

REL5:3003 Classical and Hellenistic Periods I 3 s.h.
Readings in Greek literature of the Classical and Hellenistic periods. Prerequisites: CLSG:2002. Same as CLSG:3003.

REL5:3020 Religion and Politics 3 s.h.
Major trends in Islamic religious thought since the colonial period, focusing on encounters between Islamic and the modern world; Ibn Khaldun; renewal movements; varieties of religious reform and accommodation; nationalism, socialism, and so forth. Recommendations: prior course work in content topic.

REL5:3103 Biblical Archaeology 1.3 s.h.
Contributions of Syro-Palestinian archaeological research to understanding historical, cultural backgrounds of biblical period.

REL5:3105 The World of the Old Testament 3 s.h.
Historical, intellectual background; focus on patterns of thought, religion in Near East, relation to Israelite religion.

REL5:3129 Native American Prophets and Prophecy 3 s.h.
Religious movements, effects of prophecies on followers of religious movements, and resulting tensions with Americans; powerful visions described as messages from a spirit being experienced by several 19th-century Native Americans after waking from coma-like states—wonderful prophecies of the restoration of Native American world to what it once was before American colonization, prophecies leading to religious movements that called for return to traditional practices, rejection of many elements of white American culture, and warnings of an impending destruction of the world.

RELS:3190 Traditions of Religious Reform 3 s.h.
Same as HIST:3190.

RELS:3243 Pagans and Christians: The Church from Jesus to Muhammad 3 s.h.
Introduction to history of early Christianity, from time of Jesus to rise of Islam; focus on major movements, intellectuals, institutions in this period; growth of Christianity in different geographical areas including the Middle East, Greece, Western Europe, Africa; Christian relations with Jews, pagans, Muslims; conversion; orthodoxy, heresy, making of biblical canon; martyrdom; women and gender roles; asceticism, monasticism, sexuality; church and state; theological controversy and schisms; cult of saints; the Holy Land and pilgrimage. Same as CLSA:3443.

RELS:3245 Mythology of Otherworldly Journeys 3 s.h.
Examination of mythology of otherworldly journeys from earliest religions to Hellenistic period; historical context; comparison for common themes in their evolution over time; directed readings of mythological texts dealing with otherworldly journeys; ways in which past cultures confronted larger mysteries of life and death. Same as CLSA:3445.

RELS:3247 Banned from the Bible: Pseudepigrapha and Apocrypha 3 s.h.
Introduction to biblical Pseudepigrapha and Apocrypha; writings dating from third century B.C.E. to third century C.E. fictionally attributed to characters in the Hebrew Bible and New Testament, or written as though they originated in the First or Second Temple periods, not included in Jewish or major Christian canons of scripture; English translations of documents from this period; key themes and interpretative techniques common throughout biblical texts that provide tremendous insight into the worlds that led to the development of afterlife ideology in Jewish and Christian traditions; ideas that influenced this development, particularly as related to problem of suffering. Same as CLSA:3440.

RELS:3375 Birth of the Holy Land: Art and Architecture in the Ancient Middle East 3 s.h.
Major developments in architecture, sculpture, ceramics, and mosaics in Israel, Palestine, Syria, and Arabia from death of Alexander the Great to rise of Islam (4 B.C.E. to 8 C.E.); Greek and Roman influences versus local traditions; Roman Empire; growth of churches, synagogues, and mosques; identity and religion. Same as ARTH:3375.

RELS:3385 Early Modern Catholicism 3 s.h.
Same as HIST:3485.

RELS:3389 Gender and Sexuality in Asia 3 s.h.
Conceptions of sex, gender, and sexuality in the religions of China, Korea, and Japan; asceticism and celibacy; sexual alchemy; the difference between male and female bodies and souls; intersexed persons; female saints and immortals; transgressive sexuality; gender and sexuality in colonial Asia; East Asian religions and postcolonial feminism. Same as GWSS:3131.

RELS:3448 The Allure of Krishna: Sacred Sexuality in Indian Culture 3 s.h.
For thousands of years, Krishna, the dark-skinned flute-player, has been central to the religious experience of many Hindus; his diverse roles as mischievous divine child, sensual teenage cowherd, and adult statesman, warrior, and philosopher celebrated in poetry and prose, painting and sculpture, music, dance, drama, film, and television; exploration of multiple facets of Krishna's character through literary and visual sources, performances; focus on Indian interpretations of erotic content prominent in his story and to the figure of Radha, Krishna's mistress and beloved. Same as SOAS:3448.

RELS:3450 Martyrdom and Warfare in the Western World 3 s.h.
How martyrdom evokes images of innocents who are killed for their faith and terrorists who commit suicide bombings; how these groups may appear distinct, but share a heritage that relates absolute obedience to God and (often human) sacrifice to conquest and possession of a Promised Land; development of martyrdom ideology and its uses in religious and political conflict in Western history; examination of the Crusades, Reformation, and modern religious and political conflicts beginning with works from the Bible, Greco-Roman culture, and early Jewish and Christian literature. Same as CLSA:3520.

RELS:3524 The Devil in Judaism and Christianity 3 s.h.
While known by many names, the Devil as a central figure in Western religious tradition; surprisingly, how he is not found in earliest texts in the Old Testament; the Devil as embodiment of evil that has his genesis in early Jewish and Christian sectarian conflicts; how he is used as a terrifying dragon or seductive stranger to demonize those perceived as threats to a group's existence; how the Devil is used to explain righteous suffering and create cultural boundaries throughout Western culture, from ancient texts and medieval witch trials to modern cinema and politics. Recommendations: some background in Judeo-Christian tradition. Same as CLSA:3524.
RELS:3560 Topics in Asian Religions 3 s.h.
Same as ASIA:3560.

RELS:3572 Comparative Ritual 3 s.h.
Practice and theory; rituals from religions, including Hinduism, Buddhism, Christianity, Indian religions; theories of interpretation. Same as ASIA:3890.

RELS:3575 East Meets West: The Western Reception of Eastern Religion 3 s.h.
Introduction of religious ideas and forms from India, China, and Japan into Europe and America to late 20th century, from Greeks to New Age. Same as ASIA:3775.

RELS:3580 Religion and Healing 3 s.h.

RELS:3582 Enlightenment: Cross-Cultural Experiments in Religious Realization 3 s.h.
Enlightenment as one of the most important ideas that feeds contemporary religious and spiritual imagination; exploration of this concept in contemporary religious and spiritual discourse. Same as SOAS:3920.

RELS:3645 Buddhist Philosophy 3 s.h.
Theories and arguments concerning the Buddhist path to enlightenment. Same as PHIL:3845.

RELS:3655 Zen Buddhism 3 s.h.
Prerequisites: RELS:1404 or RELS:1506 or RELS:1510. Same as ASIA:3655.

RELS:3660 Japanese Religion and Thought 3 s.h.
Same as JPNS:3660.

RELS:3666 The History of a Religious and Spiritual Practice: Yoga in Asia and Beyond 3 s.h.
Historical, textual, and anthropological readings; visual material, yoga demonstrations, discussions of yoga practices; theory underlies readings, including ritual theory and practice theory; psychology and inquiries into the nature of religious adaptation and syncretism.

RELS:3700 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MUSM:3500, SSW:3500, NURS:3595, MGMT:3500.

RELS:3701 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, NURS:3600, SSW:3600.

RELS:3704 Egyptian Art 3 s.h.
Sculpture, painting, architecture, and luxury arts from Pyramid Age to Death of Cleopatra. Same as ARTH:3320.

RELS:3714 Anthropology of Religion 3 s.h.
Approaches; religious roles; shamanism, witchcraft, curing; mythology; place of religion in social and cultural change. Same as ANTH:3114.

RELS:3716 Greek Religion and Society 3 s.h.
From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymn, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. GE: Values, Society, and Diversity. Same as CLSA:3416.

RELS:3745 Twentieth-Century African American Religion: Civil Rights to Hip-Hop 3 s.h.
Twentieth-century African American religious history; major political and cultural movements, such as civil rights, black power, black feminism/womanism, hip-hop. Same as AFAM:3245.

RELS:3808 Malcolm X, King, and Human Rights 3 s.h.
Religion and politics of Malcolm X and Martin Luther King, Jr. in the context of U.S. civil rights and international human rights in West Africa and the Muslim world; emphasis on civil rights connections to Gandhi, the Nobel Peace prize, and other international experiences that have impacted Pan Africanists, such as Stokely Carmichael, who worked on human rights. Recommendations: international studies major or undergraduate standing. Same as AFAM:3500.

RELS:3834 Arab Spring in Context: Media, Religion, and Geopolitics 3 s.h.
Protest movements that started in Tunisia in 2011 and swept across North Africa and the Middle East transforming Arab and Islamic societies in radically different ways; function of social media, satellite television, communication technology; influence of religious leaders and groups on some protest outcomes; impact of wealth and geopolitics on social fabric of Islamic societies within and outside Arab countries. Requirements: for COMM:3834 — g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as IS:3834, WLLC:3834, JMC:3146, COMM:3834.

RELS:3845 Islam in Africa 4 s.h.
African Islamic history beginning with earliest Muslim migrants from Arabia to Ethiopia in early 7th century C.E. to dawn of 21st century; focus on historical development of Islam on African continent, specific regions, and particular themes; part of Islamic Studies Virtual Curriculum and Committee on Institutional Cooperation (CIC) CourseShare Program. Same as HIST:3745, IS:3745.

RELS:3855 Human Rights and Islam 3 s.h.
Human rights in religious and secular discourse, seventh century to present; Islamic law, human rights law, religion, politics. GE: International and Global Issues. Same as IS:3855.

RELS:3972 American Indian Environmentalism 3 s.h.
Same as AINS:3276.

RELS:4001 Biblical Hebrew I 4 s.h.
RELS:4002 Biblical Hebrew II  4 s.h.

RELS:4124 Digital Archaeological Modeling  1-3 s.h.
Introduction to foundational theory, methodology, programming skills, and conceptual understanding necessary to model remains and reconstructions of archaeological sites in various three-dimensional digital modeling environments. Recommendations: background in archaeology. Same as CLSA:4131.

RELS:4133 Special Topics: Islamic and Middle Eastern Societies  3 s.h.
Recent events in Islamic world and Middle East; varied topics.

RELS:4155 Religious Conflict: Early-Modern Period  3 s.h.
Reformation of 16th century—Lutheran, Calvinist, Radical, English; readings from major representatives of each. Same as HIST:4455.

RELS:4181 Special Topics in Western Religion  3 s.h.
Examination of a specific topic of interest related to Western religious traditions. Recommendations: some background in Judaism, Christianity, or classics.

RELS:4352 The Dead Sea Scrolls  3 s.h.
Introduction to the Dead Sea Scrolls; reading of the scrolls in English translation; examination of Qumran site archaeology; survey of broader sociopolitical context of Second Temple Judaism (586 B.C.E. to 135 C.E.) out of which the scrolls emerged. Same as CLSA:4452.

RELS:4404 The Literature of Daoism  3 s.h.
Texts of philosophical, religious Daoism; Daoism in traditional Chinese political theory, literature, the arts, alchemy and medicine, sexual custom, combat. Taught in English. Same as CHIN:4204.

RELS:4660 Buddhist Poetry  3 s.h.
Poetry across the Buddhist world as a favorite form of expression for talking about things that cannot be captured in words; content and style of some major works of Buddhist poetry; theories about relationships between words and meaning that inform poems; scandalous lives of poets; opportunity to explore Buddhist poetry analytically and creatively; no prior knowledge of Asian languages required. Same as ASIA:4660.

RELS:4730 Religion and Environmental Ethics  3 s.h.
How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people's activities, how they are used by grassroots environmental movements. Requirements: junior or senior standing. Same as ANTH:4130.

RELS:4741 Varieties of American Religion  3 s.h.
Examination of varied 20th- and 21st-century American religious individuals and groups; understand and analyze unique communities. Same as HIST:4241.

RELS:4748 Religious Rhetoric: God and U.S. Politics  3 s.h.
Use of religious language by American presidents, presidential hopefuls, and their religious supporters; begins with early presidents, then majority of focus is on last 65 years. Recommendations: previous course in religious studies.

RELS:4768 Islamic Sects  3 s.h.
Nexus between key texts (i.e., the Qur’an, Hadith, Tafsir, usul, kalam, and other literatures) and the rise and development of Islamic sects and groupings, including Kharajites, Shiites, Ibadis, Salafis, and Sufis.

RELS:4870 Islamic Cultural Presence in Spain  3 s.h.
Islamic history and culture in the Iberian Peninsula from Middle Ages to present. Taught in Spanish. Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above. Same as SPAN:4870.

RELS:4893 Classical Arabic: Vocabulary, Syntax, and Grammar  1-3 s.h.

RELS:4920 Native American Women and Religious Change  3 s.h.
Native women's diverse experiences and their roles in native societies, examined through contact experiences between native and nonnative peoples; changes in women's roles in context of interactions between native people, missionaries, European colonists, and Americans; approaches to re-imaging women's early contact roles presented in cultural narratives, archaeology, history, ethnography, and missionary records. Same as AINS:4560, GWSS:4560.

RELS:4939 Controversial Religions in U.S. History  3 s.h.
Movements in North American history marked by violence (i.e., Peoples Temple, Lakota Ghost Dance, Branch Davidians, Shawnee Movement); the role of violence in expressing and shaping some religious movements.

RELS:4950 Senior Majors Seminar  3 s.h.
Issues central to academic study of religion.

RELS:4970 Honors Tutorial  2-3 s.h.

RELS:4975 Honors Essay  2-4 s.h.

Graduate

RELS:5067 Readings in Islamic Studies  arr.
Current scholarship in the field of Islamic studies; major works in areas such as modern Islamic thought, Islamic legal and philosophical traditions, religion and politics.

RELS:5100 Teaching and Public Engagement  2-3 s.h.
Critical importance of educating people about religion within increasingly globalized and digitized contexts; preparation to excel as classroom teachers and facilitators of cross-religious dialogue in public sphere.

**RELS:5200 Varieties of Religion in the Contemporary World** 3 s.h.
Limited content of multiple religious traditions from different parts of contemporary world; conversing knowledgeably about global religious diversity; preparation to design and teach a world religions course.

**RELS:5300 Genealogies of Religion** 3 s.h.
Genealogies of the idea of religion, academic study of religion, and comparative study of religions; intellectual and ideological foundations of discipline; preparation to work skillfully across traditions.

**RELS:5400 Methods and Theories in the Study of Religion** 3 s.h.
Principal methods, theories in academic study of religion.

**RELS:6040 Tiberius to Trajan** arr.
Authors and topics from the first and second centuries C.E. Same as CLSL:6013.

**RELS:6050 The Art of Reading Sacred Literature in Judaism and Islam** arr.
Ways in which Jews and Muslims in the Middle Ages interpreted sacred writ; works by al-Farabi, Averroes, Halevi, and Maimonides; tension between reason (the great attraction of these thinkers to Plato and Aristotle and their interpreters) and revelation (their faith commitment to revelation, i.e., sacred writ). Requirements: reading knowledge of Biblical Hebrew or Arabic.

**RELS:6070 Nonprofit Organizational Effectiveness I** 3 s.h.

**RELS:6075 Nonprofit Organizational Effectiveness II** 3 s.h.

**RELS:6150 Seminar: Religion in America** 3 s.h.
Religious experience in America; topics.

**RELS:6200 Seminar: Religious Ethics** 3 s.h.

**RELS:6350 Gender and Religion** 3 s.h.
What contemporary religious and spiritual groups and their members believe about sex, sexuality, and gender; how they define and redefine what it means to be a "man" and a "woman"; exploration of contemporary "conservative" and "progressive" cosmologies and theologies; underlying beliefs that construct these perspectives and the impact on individual and group practices; broader implications of individual and group beliefs and practices on national and global policies. Same as GWSS:6350.

**RELS:6475 Seminar: Reformation Culture and Theology** arr.
Culture and theology of 16th-century Europe. Same as HIST:6475.

**RELS:6520 Seminar: South Asian Religion** 3 s.h.
Topics in South Asian religions. Same as ASIA:6520.

**RELS:6580 Seminar: Religion and Society** 3 s.h.

**RELS:6723 Seminar on Islamic Law and Government** 3 s.h.
Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as LAW:9723.

**RELS:7100 Readings in American Religions** arr.

**RELS:7200 Readings in Religious Ethics** arr.

**RELS:7260 French Paleography** 1,3 s.h.
Independent study of original French writings.

**RELS:7400 Readings in Theology and Religious Thought** arr.

**RELS:7450 Readings in History of Christianity** arr.

**RELS:7500 Readings in Asian Religions** arr.

**RELS:7600 Readings in Islamic and Middle Eastern Studies** 1-3 s.h.
Advanced works and/or texts in primary languages (Arabic, Persian, etc.) in the broad field of Islamic and Middle Eastern studies. Requirements: proficiency in Modern Standard Arabic.

**RELS:7650 Readings in Ancient Near Eastern Religions** arr.
Ancient Near Eastern religious texts; focus on their place in ancient Near Eastern history and religious thought.

**RELS:7900 Individual Study: Graduates** arr.

**RELS:7950 Thesis** arr.
Rhetoric

Chair
• Steve Duck

Undergraduate minor: rhetoric and persuasion
Faculty: http://clas.uiowa.edu/rhetoric/people
Web site: http://clas.uiowa.edu/rhetoric/

The Department of Rhetoric offers undergraduate courses that fulfill the Rhetoric requirement of the different colleges at the University; see General Education Program (p. 313) in the Catalog. It also provides individual instruction in its Writing Center and Speaking Center and offers other undergraduate courses, graduate seminars, and an undergraduate minor.

Rhetoric for General Education

Rhetoric courses help students to develop skills in speaking, writing, listening, and critical reading. They also build competence in research and inquiry as well as in analysis and persuasion, starting with public controversies in their social contexts and generalizing to all forms of idea presentation, whether academic readings, everyday debates, media messages, or student papers. Writing and speaking skills are emphasized and developed.

All rhetoric classes follow specific department goals, but each instructor uses a unique set of texts and contexts to teach rhetorical concepts. Rhetoric courses are sometimes organized around a special topic, such as the STEM fields (science, technology, engineering, and mathematics), nursing, or law, but the primary emphasis is always on responsible inquiry and analysis. Some course sections involve special activities, such as service-learning components, but the workload across all sections is comparable, with a fixed number of major assignments and a department-approved library of readings.

During their first year at the University, students enroll in the rhetoric course indicated on their degree audit unless they are required to complete one or more prerequisite courses in English as a Second Language (ESL) as a result of their English proficiency evaluation. Students required to enroll in English as a Second Language (ESL) courses must complete all of their required ESL courses before they may register for any rhetoric course or use the services of the Department of Rhetoric Writing Center or Speaking Center.

Students planning to transfer to the University of Iowa should discuss rhetoric course equivalencies as soon as possible with the University of Iowa Office of Admissions. To learn more about General Education’s Rhetoric requirement, see General Education Program (p. 313) in the Catalog.

Students who undergo formal evaluation by Student Disability Services and are found to be learning disabled in reading, writing, or speaking should request reasonable accommodations in order to complete rhetoric. Accommodations may be arranged by Student Disability Services in consultation with the Department of Rhetoric and individual instructors.

Undergraduate Program of Study

• Minor in rhetoric and persuasion

The minor in rhetoric and persuasion educates students in responsible, credible, and effective methods to take active leadership roles in engaging social issues in personal, professional, and communal settings. The program empowers students to look at the world as a place open to change and receptive to influence and to view themselves as agents capable of improving the world and their place in it.

The minor aims to professionalize students—whether in their capacity as individual citizens, members of the community, or leaders in the workplace—by guiding them to understand audiences and situations, to use language responsibly and strategically, and to develop the integrity and authority of their own voice.

Minor

The minor in rhetoric and persuasion requires a minimum of 15 s.h., including 12 s.h. earned in courses taken at the University of Iowa and at least 9 s.h. earned in Department of Rhetoric courses. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. The minor requires the following course work:

Courses

Lower-Level Undergraduate

General Education

RHET:1030 Rhetoric 4-5 s.h.
Analysis and critique to discover, question, explain, and justify positions and claims made in writing and speaking; reading and listening to comprehend and assess arguments; employment of rhetorical concepts (e.g., purpose, audience); understanding research as responsible inquiry for speaking and writing; special topics, activities. Requirements: completion of any required ESL courses. GE: Rhetoric.

RHET:1040 Writing and Reading 3 s.h.
Introductory course in writing required of students who have completed a college-level public speaking course, but have not otherwise satisfied the rhetoric requirement. Requirements: completion of GE speaking requirement and any required ESL courses. GE: Rhetoric - Writing.

RHET:1060 Speaking and Reading 3 s.h.
Introductory course in speaking required of students who have completed 6 s.h. of college writing instruction, but have not completed a 3 s.h. college-level speaking course; intended to improve speaking, listening, critical, analytical, and advocacy skills. Requirements: completion of GE writing requirement and any required ESL courses. GE: Rhetoric - Speech.

Other Lower-Level Courses

RHET:1000 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

RHET:1010 Writing for Academic Success 0 s.h.
Individualized instruction in the Writing Center; in conjunction with General Education rhetoric courses.

RHET:2000 Creativity for a Lifetime 3 s.h.
Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; integration of teamwork and opportunities for individual growth that allow for personal development; identification of ways for students to be more creative in their own lives and work. Same as ARTS:2000, ASP:2000, EDTL:2000.

RHET:2031 Desire, Consent, and Sex in U.S. Culture(s): Replacing Coercion and Violence with Respect 3 s.h.
Exploration of desire, sex, consent, and sexual violence in practical and theoretical dimensions; recent demands by students to change the way sexual violence is addressed; theory and sources from popular media; lectures by scholars, activists, and professionals; sexual violence, rape culture, and sexuality-based oppression confronted with academic/therapeutic/political knowledge; real world strategies to help better understand and combat sexual violence, theories. Prerequisites: RHET:1030. Same as GWSS:2000.

RHET:2055 Persuasion and Advocacy: Developing Women's Voices 3 s.h.
History of women's rhetoric in the West and ways in which these approaches can be adapted to modern demands; strategies of prominent women rhetors analyzed from antiquity to present; how our own historical moment constrains, shapes, and enables women's public speaking and writing today; projects that take advantage of multimodal presentation platforms and apply insights from class to causes of interest to UI students; enables students from all disciplinary and professional backgrounds to improve persuasive skills relevant to their careers. Prerequisites: RHET:1030. Requirements: completion of General Education rhetoric requirement.

RHET:2065 Persuading Different Audiences 3 s.h.
Examination of ways people sway one another in different contexts; best means to impel a specific audience in a particular moment, recognizing that audiences and contexts are multiplied by technology; students critique current presentational techniques with special attention to how each succeeds or fails in its approach to relevant audiences; creation of multimodal projects for real world purposes (e.g., personal web sites, persuasive video or audio essays, promotional project for local advocacy group, public performance); formal presentations on results of inquiry-guided research. Requirements: completion of General Education rhetoric requirement.

RHET:2075 Digital Selves: Online Identities 3 s.h.
Production of a persuasive self in social media; issues of identity and performance in electronic forms. Prerequisites: RHET:1030. Requirements: completion of General Education rhetoric requirement.

RHET:2085 Speaking Skills 3 s.h.
Five basic skills of speaking (the five canons) recognized by Rhetoricians—invention, arrangement, style, memory, and delivery; development of these skills by working from their classical roots to modern times and situations; builds on previous learning in basic rhetoric; various presentations using these five skills, all relevant to persuasion and active use of rhetoric in everyday life. Requirements: completion of General Education rhetoric requirement.

RHET:2095 Fundamental Strategies of Persuasion 3 s.h.
Strategies of approaching persuasion in a variety of personal, professional, and communal contexts; fundamentals of persuasion including audience adaptation, creating reasoned and passionate appeals, conveying character, and enabling identification taught from perspective of production. Prerequisites: RHET:1030. Requirements: completion of General Education rhetoric requirement.

**RHET:2410 Rhetoric and Past Public Controversy: The Sixties**
3 s.h.
Role of rhetoric in public controversy in particular historical time periods; focus on various perspectives, diverse voices, and multiple arguments informing particular movements/issues. Requirements: for COMM:2079 — communication studies major, g.p.a. of at least 2.30, and completion of four Foundation of Communication courses chosen from COMM:1112 or COMM:1170, COMM:1117 or COMM:1130, COMM:1168 or COMM:1174, COMM:1301, and COMM:1305. Same as COMM:2058.

**RHET:2610 Acting for Success**
3 s.h.
How skills learned by actors in the theatre world can be applied to presentations and interactions in business, education, and beyond; business world reliance on technology for communication; ability to connect and communicate on a personal level with others as the x-factor to stand out as a team player and a leader; acting techniques traditionally used in theatre to open up communication in office and interviews; presentations and elevator pitches (armed with techniques to avoid stage fright); how to connect and bring authentic self to everything you do. Same as THTR:2610.

**RHET:2620 Body Language: Study of Movement and Gesture in Speaking**
3 s.h.
How to effectively analyze and perform movement and gesture in public and interpersonal speaking situations; development of skills; use of movement and gesture in many types of public speeches including academic and professional presentations, political debates, ceremonial addresses, protest demonstrations; readings from classical treatises on oratory to recent social science research on nonverbal communication. Prerequisites: RHET:1030 and RHET:1040 and RHET:1060.

**RHET:2990 The Art of Marketing Ideas Online**
3 s.h.
Principles of persuasion, marketing, and new media; forms of self-presentation, current methods of targeting audiences, dynamics of social interaction; strategies and tactics for attracting and maintaining interest for audiences; emphasis on popular forms of new media technology today (Twitter, Facebook, Linkedin, blogs); analysis of tools and techniques for presenting and interacting; formulate ideas about a product, event, fashion, social cause, or a way of life; express ideas persuasively; strategic marketing through social media sites.

**RHET:2993 Online Portfolio**
2-3 s.h.
Practical training to create an online portfolio; creation of web page through WiX that gives a comprehensive view of student's experience and aspirations to enter job market; personal and professional identity profiles (“about me”), WordPress blogs to reinforce personal/professional identity profiles, section or video with pertinent experience, résumé or a link to LinkedIn. Requirements: satisfaction of General Education rhetoric requirement prior to enrollment.

### Upper-Level Undergraduate and Graduate

**RHET:3085 Advanced Speaking Skills**
3 s.h.
Preparation for speaking as a leader; variety of speaking and public address situations relevant to academic and professional aspirations; practice speaking in settings such as video-recorded speeches (e.g., TED talks), impromptu formal and informal presentations, panel presentations, press conferences, elevator pitches, lectures, podcasts and radio broadcasts, interviews including video interviews (e.g., Skype), job talks; multimodal projects to engage with real audiences beyond the classroom.

**RHET:3140 Nature and Society: Controversies and Images**
3 s.h.
Theoretical perspectives that explain and/or interpret environmental change and human environmental interactions; conceptual tools to understand complex relationship between nature and society at multiple scales; ways in which individuals and communities have overcome economic and environmental limitations in economically developed countries and economically developing countries; critical thinking through exposure to contentious viewpoints and assessment of their strengths and weaknesses. Prerequisites: RHET:1030. Requirements: completion of General Education rhetoric requirement.

**RHET:3153 Networks, Strategies, and Tactics**
3 s.h.
Reconsidering views on the city; how infrastructural, social, and digital networks influence daily lives; array of social and spatial theories that view the city as a constantly evolving landscape of needs and desires; how space is used, how spaces variably influence people; modes of social control and resistance; opportunities and problems that tend to be missed when daily life and its design is looked at as a foregone conclusion.

**RHET:3360 Classical Techniques in Modern Speaking**
3 s.h.
Examination of public speaking in context of ancient Greece, when the shift from aristocracy to democracy made public speaking the only way to rise to a position of power; excerpts from ancient texts that demonstrate link between public speaking and democracy; strategies ancients used in public, celebratory, political, and judicial settings to make the best case for themselves; application of these strategies in modern settings for public speaking.

**RHET:3600 Issues in Rhetoric and Culture: Crafting Electronic Identities**
3 s.h.
Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Requirements: for COMM:3600 — communication studies major, g.p.a. of at least 2.30, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as COMM:3600.

**RHET:3610 Writing in the Presence of Death: Rhetoric, Narrative, and Hospice**  
3 s.h.  
Role of rhetoric in health care practice, decisions, and ethics; rhetorical production of patient and professional selves in health care; varied practices, diverse perspectives, and situated production of medical and health care knowledge. Requirements: satisfactory completion of General Education rhetoric requirement. Same as ASP:3610, GWSS:3610.

**RHET:3620 Exploring Travel Adventure Tales: Following in their Footsteps**  
3 s.h.  
Works by contemporary travelers who followed in the footsteps of previous travelers and used the first voyagers; accounts in their own narratives; works include *Chasing Che: A Motorcycle Journey in Search of the Guevara Legend; The Cruelest Journey: Six Hundred Miles to Timbuktu; In the Footsteps of Marco Polo; and Voyage of Rediscovery: Exploring the New West in the Footsteps of Lewis and Clark*; optional camping/hiking trip in the spring following in the footsteps of Lewis and Clark along the Missouri River.

**RHET:3630 Apology and the Art of Verbal Self-Defense**  
3 s.h.  
Apology as defense of actions, opinions, or personal character; how the quality of an apology can have profound effects on whether you go to jail, lose your lover, raise your grade, or get fired or promoted; different types of apologies across personal and professional life, from showing up late to an interview to making a corporate apology for an airline disaster; identifying and practicing skills of effective apologies in the interpersonal and public spheres. Requirements: satisfactory completion of General Education rhetoric requirement.

**RHET:3700 Advocacy and Sustainability: Crafting Stories of People, Place, and Resilience**  
3 s.h.  
How sustainable development and related concepts have been used to shape public opinion on a range of topics from environmental protection to economic globalization; role in discourse of public policy. Requirements: fulfillment of rhetoric requirement.

**RHET:4980 Special Projects for Undergraduates**  
arr.  
Supervised tutoring in Speaking Center involving graduate and undergraduate tutors and fellows across disciplines; providing instruction on recruitment and development of writing support teams; helping a variety of persons on campus (undergraduate, graduate, faculty) to improve their writing skills in many different areas, ranging from class or conference papers to publicity materials. Requirements: professional development program and rhetoric teaching.

**RHET:5335 Directing a Speaking Center**  
arr.  
Supervised tutoring in Speaking Center involving graduate and undergraduate tutors and fellows across disciplines; providing instruction on recruitment and development of writing support teams; helping a variety of persons on campus (undergraduate, graduate, faculty) to improve their speaking skills in many different areas, ranging from class or conference papers to publicity materials. Requirements: professional development program and rhetoric teaching.

**Graduate**

**RHET:5330 Directing a Writing Center**  
arr.  
Supervised tutoring in Writing Center involving graduate and undergraduate tutors and fellows across disciplines; providing instruction on recruitment and development of writing support teams; helping a variety of persons on campus (undergraduate, graduate, faculty) to improve their writing skills in many different areas, ranging from class or conference papers to publicity materials. Requirements: professional development program and rhetoric teaching.

**RHET:6071 Studies in Sentimentalism and Affect Theory**  
3 s.h.  
Readings in sentimentalism as literary genre, rhetorical practice, cultural mode, and psychosocial phenomenon; focus on attendant theories of affect; integration of literature and culture with work on politics of affect in postcolonial and transnational studies, critical race and ethnic studies, American studies, gender and sexuality studies. Same as ENGL:6075.
RHET:6400 Current Issues in Rhetoric 3 s.h.
Ethical, social, or cultural issues; rhetoric's role in their contemporary significance; traditional aspects of rhetoric, their pertinence to present concerns. Same as COMM:6400.

RHET:6965 Topics in Second Language Acquisition: Writing 3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as SLA:6965, SPAN:6965.

RHET:7900 Special Project for Graduate Students arr.

RHET:7920 Innovative Methods in Pedagogy: Radical Feminist Pedagogy 3 s.h.
Readings in history, theory, and practice of pedagogical innovations appropriate to composition instruction and other interdisciplinary teaching; project-based assignments that produce materials appropriate for classroom use. Same as GWSS:7920.

RHET:7930 Writing in the Disciplines arr.
Writing instruction.
Second Language Acquisition

**Director, Division of World Languages, Literatures, and Cultures**
- Russell Gamin

**Director, Second Language Acquisition**
- Paula M. Kempchinsky

**Graduate degree:** Ph.D. in second language acquisition

**Faculty:** [http://clas.uiowa.edu/dwllc/flare/affiliated-faculty](http://clas.uiowa.edu/dwllc/flare/affiliated-faculty)

**Web site:** [http://clas.uiowa.edu/dwllc/flare/second-language-acquisition-phd-program](http://clas.uiowa.edu/dwllc/flare/second-language-acquisition-phd-program)

Second language acquisition (SLA) is a multidisciplinary field whose goal is to understand the processes that underlie non-native language learning. The Second Language Acquisition Program draws from varied academic disciplines, among them linguistics, psychology, psycholinguistics, sociology, sociolinguistics, discourse analysis, conversation analysis, and education.

Second Language Acquisition is administered by the Division of World Languages, Literatures, and Cultures (p. 228).

**Graduate Program of Study**
- Doctor of Philosophy in second language acquisition

**Doctor of Philosophy**

The Doctor of Philosophy program in second language acquisition requires 72 s.h., including a maximum of 33 s.h. earned in work toward a master's degree. The program is interdisciplinary and focuses on languages other than English. Students interested in pursuing the Ph.D. must hold a master's degree in an appropriate field (e.g., linguistics, foreign language education, English as a second language) or have equivalent academic experience. Students begin the program in the fall.

Doctoral students may specialize in one of three areas: linguistics, language program direction, or technology. They may pursue their interdisciplinary interests in courses offered by the College of Liberal Arts and Sciences (p. 24) Departments of Asian and Slavic Languages and Literatures, Communication Sciences and Disorders, French and Italian, German, Linguistics, Rhetoric, and Spanish and Portuguese, and the College of Education (p. 735) Departments of Psychological and Quantitative Foundations, and Teaching and Learning.

The program is divided into foundation courses (13 courses, or 39 s.h.); specialization courses (5 courses, or 15 s.h.), and dissertation work (18 s.h.). A course may be used to fulfill only one requirement.

**FOUNDATION COURSES**

Students earn a total of 39 s.h. in foundation courses.

All of these (9 s.h.):

- SLA:6901 Second Language Acquisition Research and Theory 3 s.h.
- SLA:6902 Second Language Acquisition Research and Theory II 3 s.h.
- SLA:6920 Multimedia and Second Language Acquisition 3 s.h.

Two of these (6 s.h.):

- SLA:5973/GRMN:3540 Grammar in Second Language Teaching/Learning 3 s.h.
- SLA:6950 Topics in Second Language Acquisition: Speaking 3 s.h.
- SLA:6955 Topics in Second Language Acquisition: Listening 3 s.h.
- SLA:6965 Topics in Second Language Acquisition: Writing 3 s.h.
- SLA:6970 Cultural Curriculum 3 s.h.
- EDTL:6484 Reading in a Second Language 3 s.h.

To complete the foundation requirement, students select one course from each of the following eight areas (total of 24 s.h.), in consultation with their advisors. With the advisor's approval, a student may use courses not listed here to fulfill the requirement.

**Curriculum**

One of these:

- EDTL:5086 Curriculum Foundations 2-3 s.h.
- EDTL:6408 Designing Materials for Second Language Instruction 3 s.h.
- EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.
- EDTL:7100 Design and Organization of Curriculum 3 s.h.

**Quantitative Research Tools**

One of these:

- PSQF:6220 Quantitative Educational Research Methodologies 3 s.h.
- PSQF:6243 Intermediate Statistical Methods 4 s.h.
- PSQF:6244 Correlation and Regression 4 s.h.
- PSQF:6246 Design of Experiments 4 s.h.

**Qualitative Research Tools**

One of these:

- EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3 s.h.
- EDTL:7410 Mixed Methods Research 3 s.h.
- EPLS:7373 Qualitative Research Design and Methods 3 s.h.

**Testing, Evaluation, Measurement**

One of these:

- EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
- PSQF:4150 Introduction to Educational Measurement 3-4 s.h.
- PSQF:5165 Introduction to Program and Project Evaluation 3 s.h.
- PSQF:6255 Construction and Use of Evaluation Instruments 3 s.h.
- PSQF:6257 Educational Measurement and Evaluation 3 s.h.
- PSQF:6258 Theory and Technique in Educational Measurement 3 s.h.
- PSQF:6265 Program Evaluation 3 s.h.
One of these:

SLA:5000 Teaching and Learning Languages 3 s.h.
CHIN:7401 Teaching Chinese as a Second Language I
CHIN:7403 Teaching Chinese as a Second Language III
JPN5:401 Japanese as a Foreign Language: Practical Applications
LING:4050 Methods of Teaching English as a Second Language

**Phonetics, Phonology**

One of these:

LING:3005 Articulatory and Acoustic Phonetics 3 s.h.
LING:3020 Phonological Analysis 3 s.h.
LING:5020 Introduction to Phonology 3 s.h.
LING:6020 Phonological Theory 3 s.h.
LING:7020 Advanced Phonological Theory 3 s.h.
SPAN:4100 Introduction to Spanish Phonology 3 s.h.
SPAN:6110 Spanish Phonology 3 s.h.

**Morphology, Syntax**

One of these:

LING:3010 Syntactic Analysis 3 s.h.
LING:5010 Introduction to Syntax 3 s.h.
LING:6010 Syntactic Theory 3 s.h.
LING:7010 Advanced Syntactic Theory 3 s.h.
SPAN:4150 Introduction to Spanish Syntax 3 s.h.
SPAN:6120 Spanish Syntax 3 s.h.
SPAN:6190 Topics in Comparative Romance Linguistics 3 s.h.

**General Linguistics**

One of these:

SLA:4080 Linguistic Theory and Second Language Acquisition 3 s.h.
SLA:6403 Special Topics in Japanese Linguistics 3 s.h.
CHIN:3302 Introduction to Chinese Linguistics 3 s.h.
CHIN:7401 Teaching Chinese as a Second Language I
LING:3118 Language Acquisition 1-3 s.h.
LING:5030 First Language Acquisition 3 s.h.
LING:6080 Generative Second Language Acquisition 3 s.h.
LING:7090 Seminar: Problems in Linguistics 2-3 s.h.
SPAN:6150 Topics in Spanish Language Acquisition 3 s.h.

**SPECIALIZATION COURSES**

Each student selects one of three specialization areas—linguistics, language program direction, or technology—and takes five courses (total of 15 s.h.) in that area.

**Linguistics Specialization**

The linguistics specialization requires a three-course sequence (choice of phonology or syntax) and two additional courses.

One of these three-course sequences (group 1 or group 2):

Group 1:

LING:5020 Introduction to Phonology 3 s.h.
LING:6020 Phonological Theory 3 s.h.
LING:7020 Advanced Phonological Theory 3 s.h.

Group 2:

LING:5010 Introduction to Syntax 3 s.h.
LING:6010 Syntactic Theory 3 s.h.
LING:7010 Advanced Syntactic Theory 3 s.h.

One of these:

LING:4080 Linguistic Theory and Second Language Acquisition 3 s.h.
LING:6080 Generative Second Language Acquisition 3 s.h.

An alternate course on linguistic theory and second language acquisition

One of these:

PSY:3085 Language Development 3 s.h.
An alternate course on parsing/psycholinguistic mechanisms

**Language Program Direction Specialization**

The language program direction specialization requires five courses chosen from the lists below. The specialization may not include courses used to satisfy the foundation requirements. Some students may include an internship in their work for the specialization.

Five of these, or four of these plus internship:

SLA:5973 Grammar in Second Language Teaching/Learning 3 s.h.
SLA:6403 Special Topics in Japanese Linguistics 3 s.h.
SLA:6950 Topics in Second Language Acquisition: Speaking 3 s.h.
SLA:6955 Topics in Second Language Acquisition: Listening 3 s.h.
SLA:6965 Topics in Second Language Acquisition: Writing 3 s.h.
SLA:6970 Cultural Curriculum 3 s.h.
CHIN:7403 Teaching Chinese as a Second Language III 3 s.h.
EDTL:6402 Second Language Program Management 3 s.h.
EDTL:6403 Language Policy and Planning 3 s.h.
EDTL:6408 Designing Materials for Second Language Instruction 3 s.h.
EDTL:6480 Issues in Foreign Language Education 3 s.h.
EDTL:6483 Second Language Classroom Learning 3 s.h.
EDTL:6484 Reading in a Second Language 3 s.h.
EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture arr.
PSQF:6205 Design of Instruction 3 s.h.
PSQF:6215 Web-Based Learning 3 s.h.
Some students may count an internship experience toward the specialization.

**SLA:7000 Internship**
arr.

**Technology Specialization**

The technology specialization requires three courses in psychological and quantitative foundations and two additional courses.

Psychological and quantitative foundations—one of these:

- **PSQF:6205 Design of Instruction**
  3 s.h.
- **PSQF:6275 Constructivism and Design of Instruction**
  3 s.h.

And both of these:

- **PSQF:6208 Designing Educational Multimedia**
  3 s.h.
- **PSQF:6215 Web-Based Learning**
  3 s.h.

Remaining specialization course work—total of two courses chosen from the following lists (other courses may be approved by the student’s advisor):

- **CS:3110 Introduction to Informatics**
  3 s.h.
- **LING:4080 Linguistic Theory and Second Language Acquisition**
  3 s.h.
- **PSQF:6203 Tools and External Representations in Learning Processes**
  3 s.h.
- **SLIS:5020 Computing Foundations**
  3 s.h.
- **A practicum course**
  3 s.h.

May include one of these (if not taken for the three-course sequence in psychological and quantitative foundations, above):

- **PSQF:6205 Design of Instruction**
  3 s.h.
- **PSQF:6275 Constructivism and Design of Instruction**
  3 s.h.

May include one of these:

- **SLA:7025 Special Projects in Second Language Acquisition**
  3 s.h.
- **PSQF:6293 Individual Instruction in Psychological and Quantitative Foundations**
  3 s.h.

Before they take SLA:7025 or PSQF:6293, students should complete the core design and technology courses PSQF:6205 Design of Instruction or PSQF:6275 Constructivism and Design of Instruction, PSQF:6208 Designing Educational Multimedia, and PSQF:6215 Web-Based Learning.

**THESIS**

All candidates must complete a thesis (SLA:7030 Ph.D. Thesis), for which they may earn up to 18 s.h. of credit.

**OPTIONAL COURSE WORK**

Students may include the following optional course work in their degree programs.

- **SLA:7015 Special Topics in Second Language Acquisition**
  arr.
- **SLA:7020 Readings in Second Language Acquisition**
  arr.
- **SLA:7025 Special Projects in Second Language Acquisition**
  arr.

---

**Admission**

Admission is for fall semester; students are admitted only for full-time study. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Strong applicants hold a master's degree in a related area, have a cumulative g.p.a. of at least 3.50 in master's degree work, and speak and write English and another language at a professional level. Applicants must submit a writing sample that demonstrates their ability to synthesize and analyze information using standard academic English.

**Financial Support**

Teaching assistantships are available through the Foreign Language Acquisition Research and Education Program (FLARE). Assistantships usually involve teaching elementary or intermediate language courses. FLARE also offers a limited number of research assistantships. Visit the FLARE web site for details.

**Courses**

**Upper-Level Undergraduate and Graduate**

**SLA:3302 Introduction to Chinese Linguistics**

Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as CHIN:3302, LING:3302.

**SLA:3400 Articulatory and Acoustic Phonetics**

Production and transcription of sounds in human languages; physics of sound, computer analysis of speech sounds. Offered fall semesters. Same as LING:3005.

**SLA:3401 Language Development**

Introduction to first language acquisition, with focus on infancy through five years; sound discrimination abilities, word learning, babbling and speech production, acquisition of grammar; perspectives from psychology, audiology, linguistics, speech pathology. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2401 or PSY:2601 and grade of C- or higher in PSY:2810. Same as PSY:3085.

**SLA:4080 Linguistic Theory and Second Language Acquisition**

Introduction of research results obtained by generative second language acquisition framework and their implications for classroom teaching methods; current views of language architecture; focus on inflectional morphology and linguistic interfaces, which have been proposed to be severe bottlenecks for acquisition; research findings on acquisition of syntax, phonology, semantics, linguistic pragmatics; pedagogical implications of these findings. Prerequisites: PSY:2701. Requirements: grade of C- or higher in PSY:2401 or PSY:2601 and grade of C- or higher in PSY:2810. Same as PSY:3085.

</table>
Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: (LING:3010 or LING:5010) and (LING:3020 or LING:5020). Same as LING:6080.

**SLA:6500 Issues in Foreign Language Education**  3 s.h.
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as EDTL:6480.

**SLA:6501 Reading in a Second Language**  3 s.h.
Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as EDTL:6484.

**SLA:6502 Principles of Course Design for Second Language Instruction**  3 s.h.
Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as EDTL:6497.

**SLA:6503 Fundamentals of Second Language Assessment**  3 s.h.
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as EDTL:6400.

**SLA:6504 Second Language Program Management**  3 s.h.
Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as EDTL:6402.

**SLA:6505 Designing Materials for Second Language Instruction**  3 s.h.
Critical perspective on creating and using media for second language learning and teaching; research on materials design, development of media. Prerequisites: EDTL:6483. Same as EDTL:6408.

**SLA:6506 Second Language Classroom Learning**  3 s.h.
Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as ASIA:6483, EDTL:6483.

**SLA:6901 Second Language Acquisition Research and Theory**  3 s.h.
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as FREN:6901, ASIA:6901, SPAN:6901, JPNS:6901.

**SLA:6902 Second Language Acquisition Research and Theory II**  3 s.h.
Continuation of SLA:6901. Prerequisites: SLA:6901. Same as ASIA:6903, SPAN:6902.

**SLA:6920 Multimedia and Second Language Acquisition**  3 s.h.
Foreign language multimedia in context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control; acquisition of vocabulary, grammar, and culture. Requirements: foreign language teaching methodology course. Same as FREN:6920, GRMN:6920, SPAN:6920.

**SLA:6950 Topics in Second Language Acquisition: Speaking**  3 s.h.
Theory, pedagogy, research, and assessment in second language speaking. Same as FREN:6950, SPAN:6950.

**SLA:6955 Topics in Second Language Acquisition: Listening**  3 s.h.
Theory, pedagogy, research, and assessment in second language listening. Same as ASIA:6955.

**SLA:6965 Topics in Second Language Acquisition: Writing**  3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as RHET:6965, SPAN:6965.

**SLA:6970 Cultural Curriculum**  3 s.h.
Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as EDTL:6409.

**SLA:6975 Reading in Non-Roman Scripts**  3 s.h.
Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisites: EDTL:4171 or EDTL:6484. Same as EDTL:6407.

**SLA:7000 Internship**  arr.

**SLA:7010 Practicum in CALL Software Development**  1-4 s.h.
Supervised experience in an applied setting involving development of computer-assisted language learning (CALL) software. Prerequisites: SLA:6920. Requirements: faculty sponsor.

**SLA:7015 Special Topics in Second Language Acquisition**  arr.

**SLA:7020 Readings in Second Language Acquisition**  arr.

**SLA:7025 Special Projects in Second Language Acquisition**  arr.

**SLA:7030 Ph.D. Thesis**  arr.

**SLA:7401 Advanced Syntactic Theory**  2-3 s.h.
Recent developments in syntax; comparison of theories, argumentation, and uses of data. Prerequisites: LING:6010. Same as LING:7010.
SLA:7402 Advanced Phonological Theory  2-3 s.h.
Current issues. Prerequisites: LING:6020. Same as LING:7020.

SLA:7404 Seminar: Problems in Linguistics  2-3 s.h.
Intensive study of theoretical and practical problems. Same as LING:7090.

SLA:7405 Teaching Chinese as a Second Language V  3 s.h.
Seminar on research design; for M.A. students planning to write a thesis or project, or graduate students seeking knowledge in designing qualitative or quantitative studies. Prerequisites: CHIN:7401 and PSQF:4143. Same as CHIN:7405.

SLA:7406 Teaching Chinese as a Second Language I  3 s.h.
Research, theory on acquisition of Chinese as a non-native language. Same as CHIN:7401.

SLA:7804 Teaching Chinese as a Second Language IV  3 s.h.
Overview of goals, concepts, principles, research, and issues in assessment and testing of Chinese as a second language. Same as CHIN:7404.
Social Science Analytics

Chair, Department of Political Science
• Sara Mitchell

Coordinator, Social Science Analytics
• Frederick J. Boehmke (Political Science)

Undergraduate certificate: social science analytics
The Certificate in Social Science Analytics is interdisciplinary and a number of departments collaborate to leverage distinct strengths and offer courses applicable to the certificate, including the Departments of Geographical and Sustainability Sciences (p. 323), Political Science (p. 520), Sociology (p. 585), and Statistics and Actuarial Science (p. 613). The certificate is administered by the Department of Political Science.

Undergraduate Program of Study
• Certificate in Social Science Analytics
The growth of big data and informatics calls for a new set of skills for social science students and an increased understanding of the logic of data collection and analysis. The certificate focuses on the application side of data analysis and allows focus to be on the specific research methods and quantitative skills using data-driven methods effective for more understanding in an increasingly complicated social-political world. The certificate offers an opportunity for interdisciplinary training on how data can be used to address important questions in the social sciences.

The certificate will ensure students are more competitive for careers and opportunities with political campaigns, policy analysis, public opinion firms, consulting and government agencies, and local communities.

Certificate
The Certificate in Social Science Analytics requires a minimum of 19 s.h. Students complete courses from four required content areas: core statistics; social science research design and data analysis; building skills and data science; and the applied research experience.

The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

Students majoring in computer science, geographical and sustainability sciences, political science, sociology, and statistics and actuarial science may count a maximum of 6 s.h. of course work for their major toward the certificate. Students pursuing other majors should consult with their major advisors to ascertain whether they may count certificate course work toward their majors.

Some of the certificate courses have prerequisites not included in the certificate requirements. Students should select courses for which they have met the prerequisites.

The following course work is required.

Core Statistics

Social Work

Director
• Sara Sanders

Undergraduate major: social work (B.A.)
Undergraduate minor: social work
Graduate degrees: M.S.W.; Ph.D. in social work
Faculty: http://clas.uiowa.edu/socialwork/people/faculty
Web site: http://clas.uiowa.edu/socialwork/

The School of Social Work's mission is to develop, disseminate, and integrate excellent and compelling research-based knowledge, practice, and policy, particularly that related to children, families, and older adults. The school operates from strengths-based perspectives and systems perspectives. It educates its graduates to be culturally competent scholars and practitioners who are committed to social justice and social work values and ethics, and who are prepared to serve in and have a positive impact on a broad range of family-centered and community-based practice settings throughout the State of Iowa and beyond.

The school provides a program of professional training accredited by the Council on Social Work Education at the baccalaureate and master's degree levels, aimed at developing effective intervention in multiple systems and using professional social work values and ethics. It also offers a Ph.D. program, which prepares students to conduct research that contributes to the knowledge base of social work, to be leaders in setting policy and practice, and to teach in colleges and universities.

In addition to offering undergraduate and graduate programs of study in social work, the school administers the Aging Studies Program, which offers a certificate for undergraduate and graduate students and a minor for undergraduates. The school also administers the undergraduate Certificate in Critical Cultural Competence. See Aging Studies (p. 34) and Critical Cultural Competence (p. 214) in the Catalog.

Undergraduate Programs of Study
• Major in social work (Bachelor of Arts)
• Minor in social work

The undergraduate program in social work has been accredited continuously by the Council on Social Work Education (CSWE) since 1974 and is designed to be consistent with the council's 2008 Educational Policy Statement competencies and practice behaviors. The program's goals are to:
• prepare students for culturally competent generalist social work practice with individuals, families, small groups, organizations, and communities;
• provide students with a base for continuing graduate education in social work and for lifelong learning; and
• prepare students for active engagement with issues of social justice, oppression, and social welfare in local, state, regional, national, and global goals.

The program draws on a liberal arts perspective; social and behavioral science theory; social research; social policy development, analysis, and implementation; culturally competent intervention and prevention approaches in working with individuals, families, small groups, organizations, and communities; social integration; multiple systems assessment and evaluation; and knowledge pertaining to diversity.

Consistent with CSWE standards, the program views dimensions of diversity as intersections of multiple factors, including age, class, color, culture, disability, ethnicity, gender, gender-identity and expression, immigration status, political ideology, race, religion, sex, and sexual orientation. Students learn that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim.

Knowledge and practice in social work values and ethics is also an integral part of students' education. Knowledge and skill related to the evaluation of practice are integrated throughout the curriculum, beginning in SSW:102 Social Justice and Social Welfare in the United States, continuing through practice and research courses, and culminating in the field experience and field seminar.

ADMISSION TO THE MAJOR

The School of Social Work endeavors to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives.

A limited number of students are admitted to the major each year. The application deadline is February 15. Admission to the undergraduate program in social work requires:

- completion of SSW:102 Social Justice and Social Welfare in the United States with a grade of C or higher during the sophomore year;
- a cumulative g.p.a. of at least 2.50 (exceptions may be made for persons who do not meet the grade-point average requirement if they are strong candidates on the basis of other criteria); and
- completion of application forms and statement.

Students should complete SSW:102 Social Justice and Social Welfare in the United States in their first year or in fall of their sophomore year and apply to the major during their sophomore year. Students who apply during their junior year and are admitted must expect to complete an additional summer session, or more, in order to fulfill the requirements of the major.

All of the items above are required for transfer students, except that substitution of SSW:102 Social Justice and Social Welfare in the United States is permitted with a grade of C or above in a course approved by the department, such as introduction to social work or introduction to human services. Students who have completed the equivalent of introduction to social work at another institution also must submit a completed recommendation form and transcripts. Recommendations and letters of reference will otherwise not be accepted.

The School of Social Work criteria for selective admission for a B.A. in social work is detailed in the B.A. Social Work Admissions Policy Statement and Guidelines for Application.

Meeting the admission requirements above does not guarantee admission. Admission often is limited by available instructional resources and opportunities for field
placement. The school does not grant academic credit for life experience or previous work experience.

For more information about admission policies, contact the undergraduate director or admissions director at the School of Social Work.

SOCIAL WORK INTEREST

Students who are interested in applying to the social work major may declare a social work interest at any time after they enroll at the University and before they earn more than 72 s.h. of credit, and preferably while they still will have time to enter and complete the major in a total of four years of study. Students may not declare a social work interest after they have earned 72 s.h., even if they already have declared another major.

Declaration of a social work interest qualifies students with at least sophomore standing to be advised by a senior academic advisor assigned to social work interest students. Declaration allows students to participate in the Social Work Student Association and other social work activities, but does not allow them to register for required courses in the major. They may take electives in the social work department prior to formal admission to the major.

Students may continue their social work interest standing until they are admitted to the major or until they have earned more than 72 s.h. of credit.

SOCIAL WORK COURSES IN DES MOINES

In addition to its on-campus undergraduate program in Iowa City, the School of Social Work offers social work courses for the Bachelor of Arts through its program in Des Moines. Students in the Des Moines program take courses in sequence, completing the social work courses required for the degree in a minimum of two years. Courses are offered in a classroom setting. Students may complete other requirements for the Bachelor of Arts in online and/or classroom course work. The Des Moines program is approved by the Council on Social Work Education. For more information about the social work program in Des Moines, contact the University of Iowa School of Social Work admissions director.

Bachelor of Arts

The Bachelor of Arts with a major in social work requires a minimum of 120 s.h., including at least 60-64 s.h. of work for the major (a minimum of 35-38 s.h. in social work courses, 13-14 s.h. in cognate areas, 6 s.h. in one other department or in social work courses, and 6 s.h. in social work electives). Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). Courses used to fulfill General Education Program requirements may not be used to satisfy the social work electives requirement.

Students must complete SSW:1022 Social Justice and Social Welfare in the United States (3 s.h.) to be admitted to the major and before enrolling in the remaining social work courses required for the major. Social Justice and Social Welfare in the United States [SSW:1022] also fulfills the General Education Program's Values, Society, and Diversity requirement. A transfer student may be given approval by the department to substitute this requirement if they have completed an introduction to social work or introduction to human services course at another institution, or if they complete SSW:2222 Introduction to Social Work (Guided Independent Study section EXZ), in place of SSW:1022 to be admitted to the major. SSW:2222 would not fulfill the General Education requirement. If transferring the course from another institution, a student may be able to reduce the social work credit required for the major by 3 s.h.

Many students use the major's required course BIOL:1140 Human Biology as partial fulfillment of the General Education Program's Natural Sciences requirement.

The major in social work requires the following course work.

SOCIAL WORK

All of these:

- SSW:1022 Social Justice and Social Welfare in the United States 3 s.h.
- SSW:3840 Human Behavior in the Social Environment 4 s.h.
- SSW:3841 Fundamentals of Social Work Practice 3 s.h.
- SSW:3842 Interpersonal Skills Laboratory 2 s.h.
- SSW:3844 Introduction to Social Work Research 4 s.h.
- SSW:3845 Social Work Processes 4 s.h.
- SSW:3847 Discrimination, Oppression, and Diversity 3 s.h.
- SSW:4189 Field Experience Seminar 1 s.h.
- SSW:4193 Field Experience 8-11 s.h.
- SSW:4843 Social Welfare Policy and Practice 3 s.h.

REQUIRED ELECTIVES

Students must complete a minimum of 6 s.h. of social work electives and 6 s.h. of courses in one other discipline or they can select additional course work in social work. If they opt to complete 6 s.h. from another discipline, students typically select courses in areas closely related to social work, such as accounting (prefix ACCT), African American studies (prefix AFAM), aging studies (prefix ASP), American studies (prefix AMST), anthropology (prefix ANTH), communication studies (prefix COMM), economics (prefix ECON), English (prefix ENGL), entrepreneurial management (prefix ENTR), finance (prefix FIN), health and human physiology (prefix HHP), history (prefix HIST), journalism and mass communication (prefix JMC), management and organizations (prefix MGMT), management sciences (prefix MSCI), marketing (prefix MKTG), political science (prefix POLI), psychological and brain sciences (prefix PSY), religious studies (prefix RELS), sociology (prefix SOC), Spanish (prefix SPAN), sport studies (prefix SPST), Tippie College of Business nondepartmental courses (prefix BUS), and gender, women's and sexuality studies (prefix GWSS).

Courses used to fulfill General Education Program requirements may not be applied to the elective requirements.

Students who are working on a minor or a certificate may apply up to 6 s.h. toward this requirement.

These:

- Social work electives 6 s.h.
- Electives in another discipline related to social work 6 s.h.
Or this:

Social work electives 12 s.h.

**COGNATE AREAS**

Natural and social sciences—all of these:

BIOL:1140 Human Biology 4 s.h.
POLI:1100 Introduction to American Politics 3 s.h.
PSY:1001 Elementary Psychology 3 s.h.
SOC:1010 Introduction to Sociology 3-4 s.h.

**Recommended Course Sequence**

The school recommends that students complete required course work in the following sequence. Most social work courses are offered only once each year.

**FIRST AND SECOND YEARS**

SSW:1022 Social Justice and Social Welfare in the United States 3 s.h.
BIOL:1140 Human Biology 4 s.h.
POLI:1100 Introduction to American Politics 3 s.h.
PSY:1001 Elementary Psychology 3 s.h.
SOC:1010 Introduction to Sociology 3-4 s.h.

One social work elective or an elective from another area

**THIRD YEAR**

SSW:3840 Human Behavior in the Social Environment 4 s.h.
SSW:3844 Introduction to Social Work Research 4 s.h.
SSW:3845 Social Work Processes 4 s.h.
SSW:3847 Discrimination, Oppression, and Diversity 3 s.h.

One social work elective or an elective from another area

**FOURTH YEAR**

SSW:3841 Fundamentals of Social Work Practice 3 s.h.
SSW:3842 Interpersonal Skills Laboratory 2 s.h.
SSW:4189 Field Experience Seminar 1 s.h.
SSW:4193 Field Experience 8-11 s.h.
SSW:4843 Social Welfare Policy and Practice 3 s.h.

Two social work electives or electives from another area

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Admission to the major in social work is selective. The four-year graduation plan applies only to students who are admitted by the beginning of their fifth semester.

**Before the fifth semester begins:** four courses in the major and admission to the major

**Before the seventh semester begins:** five more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** five more courses in the major and finalized field placement

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major**

Students majoring in social work have the opportunity to graduate with honors in the major. Honors students do in-depth study in areas that interest them. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 to participate in the program. Consult the School of Social Work for more information about graduating with honors in the major.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

**Minor**

A minor in social work requires a minimum of 15 s.h. in social work courses, including 12 s.h. in courses numbered 3000 or above taken at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work for the minor may not be taken pass/nonpass. The minor requires that students must take SSW:1022 Social Justice and Social Welfare in the United States or SSW:2222 Introduction to Social Work, or an equivalent course from another institution if approved by the department.

Social work courses required for the major are not available to students who are not admitted to the social work program, with the exception of SSW:3840 Human Behavior in the Social Environment (Guided Independent Study section EXW) and SSW:4843 Social Welfare Policy and Practice (Guided Independent Study section EXZ).

Consult the School of Social Work web site for minor course selection or contact the department for more information.

**Certificate in Aging Studies**

The School of Social Work administers the Aging Studies Program, which offers a certificate for undergraduate and graduate students and a minor for undergraduates; see Aging Studies (p. 34) in the Catalog.

**Certificate in Critical Cultural Competence**

The School of Social Work administers the undergraduate certificate program in critical cultural competence; see Critical Cultural Competence (p. 214) in the Catalog.

**Graduate Programs of Study**

- Master of Social Work
- Doctor of Philosophy in social work
The Master of Social Work program has been accredited by the Council on Social Work Education continuously since 1951.

**Licensure for Work in Iowa**
Licensure is mandatory for master's-level social workers in Iowa. For more information, see Iowa Board of Social Work on the Iowa Department of Public Health web site.

**School Social Work Endorsement**
The school cooperates with the College of Education and the State Department of Education to provide curricula that meet requirements for school social work endorsement in Iowa.

**Master of Social Work**
The Master of Social Work requires 60 s.h. of graduate credit; the requirement is 48 s.h. for students who hold an undergraduate degree in social work from a program accredited by the Council on Social Work Education. Beginning summer 2015, students who have earned an undergraduate degree in social work from a program accredited by the Council on Social Work Education and who meet other entrance criteria, can satisfy M.S.W. requirements with a 41 s.h. option. For further details, contact the School of Social Work.

The degree is offered with or without thesis. While students are not required to declare a field of practice, opportunities to specialize are available in fields such as aging, end-of-life care, school social work, child-welfare, trauma informed practice, social work in health and mental health settings, and many others.

The goals of the M.S.W. program are to:

- prepare students to shape the profession's future by providing education in family-based, community-based, and culturally competent practice approaches using the person-in-environment framework; and
- prepare competent professionals for autonomous practice and leadership within the professional community; autonomous practice and leadership include advanced interventions at multiple system levels, supervision, program development, program administration, training, evaluation of practice, dissemination of new models of practice, and policy development.

The school offers the M.S.W. program on the University's Iowa City campus and at three off-campus sites: Des Moines and Sioux City, Iowa, and the Quad Cities area of Iowa and Illinois (see "M.S.W. Off Campus" below). Each site provides the required structured sequence of courses and includes opportunities for students to individualize their plans of study. All sites give students access to the resources of an RU/VH Research University.

Requirements for the M.S.W. include 27 s.h. in foundation-level courses and 33 s.h. in advanced courses. All students must earn a minimum of 36 s.h. after admission to the M.S.W. program. Credit toward the M.S.W. may be applied from previous graduate course work if specific criteria are met.

All M.S.W. students follow a structured sequence of courses. They must obtain permission to revise their plan, and they must complete the degree within a maximum of four years. Students must maintain a cumulative g.p.a. of at least 3.00 and they must be in compliance with the school's student advancement policy.

The full-time M.S.W. program must be completed in five semesters, beginning in fall and including a summer session. Full-time students complete the degree in the spring semester of their second year. Students whose degree requirement is 48 s.h. may enroll full-time or part-time their first semester, following the sequenced plan.

Full-time study and a four-year part-time program are available in Iowa City and Des Moines. A three-year sequence of courses is available at all sites, although the Sioux City and Quad Cities sites admit new entering classes only on a three-year cycle.

Following is an outline of the full-time 60 s.h. program. For information about the three-year and four-year part-time sequences, contact the School of Social Work.

**First-Year: Foundation**

**Fall Semester**
- SSW:3840 Human Behavior in the Social Environment 3 s.h.
- SSW:3847 Discrimination, Oppression, and Diversity 3 s.h.
- SSW:6146 Computer Laboratory 1 s.h.
- SSW:6148 Research Practice I 3 s.h.
- SSW:6150 Social Work Practice with Individuals, Families, and Groups 3 s.h.
- SSW:6151 Social Work Practice Skills Laboratory 2 s.h.

**Spring Semester**
- SSW:4843 Social Welfare Policy and Practice 3 s.h.
- SSW:6145 Organization and Community Practice 3 s.h.
- SSW:6290 Foundation Practicum in Social Work 3 s.h.
- SSW:6291 Foundation Practicum Seminar 1 s.h.
- SSW:7270 Research Practice II 3 s.h.

**Summer Session**
- Electives (including preplacement field practice courses) 9 s.h.

**Second-Year: Concentration**

**Fall Semester**
- Elective 3 s.h.

One of these:
- SSW:7250 Family-Centered Theory and Practice I 3 s.h.
- SSW:7260 Integrated Social Work Theory and Practice I 3 s.h.

One of these:
- SSW:7292 Advanced Practicum in Family-Centered Practice I and II 5-6 s.h.
- SSW:7295 Advanced Practicum in Integrated Practice 5-6 s.h.

One of these:
- SSW:7293 Advanced Practicum Seminar in Family-Centered Practice I 1 s.h.
**FAMILY-CENTERED PRACTICE**

The family-centered practice concentration teaches knowledge and skills necessary for advanced social work practice with individuals and families. These include clinical practice methods that mobilize and develop clients' coping skills, empowering them to manage difficult situations, and culturally sensitive methods for collaborating with clients, their families, and other professionals in planning interventions. Students also learn about advocating for clients, facilitating client self-advocacy, coordinating services to meet multiple needs, and influencing social policy on behalf of clients.

The concentration prepares students to work with individuals and families at appropriate levels of intensity, mobilizing existing strengths, and enhancing coping skills. Using principles of family-centered practice, students learn to take community and larger systems into account while working in partnership with individuals and families in all aspects of assessment and intervention planning. The concentration emphasizes sensitivity to a variety of family forms and to cultural diversity within family forms. "Family" is broadly defined to include step families, single-parent families, same-sex-couple families, grandparent-as-parent families, adult parent-adult child families, and traditional forms of families.

**INTEGRATED PRACTICE**

The integrated practice concentration teaches methods of advanced practice that empower organizational and community change at multiple system levels. Students learn skills for assessment, planning, and direct intervention in larger systems such as neighborhoods, social support networks, and service delivery systems, and for policy making. They develop skills for a broad range of interventions, including direct practice, case management, community education, community development and practice, management and administration, organizational and interorganizational planning and program development, team building, organization and program evaluation, and social policy advocacy. They also learn culturally sensitive methods to collaborate with families and communities; identify strengths, assets, and challenges; and develop services and programs that will meet clients' needs.

Building on strengths and assets of organizations and communities, students learn how to mobilize community members in advocacy and change efforts—skills useful for case managers, service coordinators, supervisors, program planners and developers, and administrators. Students also learn how to apply advanced skills to advocacy, community assessment, planning and mobilizing resources, and influencing social policy.

The concentration prepares students for practice in varied settings, including hospitals and community health programs, schools, mental health centers, neighborhood and family resource centers, community- and family-based community service agencies, correctional facilities, and programs that serve the elderly, both in the community and in care facilities. In many of these settings, social workers work as interdisciplinary team members and team leaders within organizations. They also collaborate with community organizations, community residents, and service providers. Many social workers are involved in staff supervision, program development, and agency administration. Content areas include grant writing; intervention in multiple systems, including team and network building; policy practice; and design of evaluation methods for client assessment and program evaluation.

**Concentrations**

In the advanced year of the master's program, students choose one of two concentrations: family-centered practice or integrated practice. These advanced specialized curricula build on the school's liberal arts perspective and on the professional foundation. Both are based on a comprehensive eco-systemic theoretical perspective, and both apply the principles that are part of the school's mission statement, with a focus on culturally competent family-centered and community-based approaches.

**Admission**

The school seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives. Previous experience in human services and cross-cultural experiences is desirable. The school does not grant academic credit for life experience or previous work experience.

Admission to the M.S.W. 60 s.h. program requires a bachelor's degree from an accredited college or university, with a reasonable distribution of courses in the liberal arts and sciences (the humanities and the social, behavioral, and biological sciences). Admission to the M.S.W. 48 s.h. program requires a bachelor's degree in social work from a CSWE-accredited college or university. Applicants must have an undergraduate g.p.a. of 3.00 or higher, or a g.p.a. of 3.00 or higher on 12 s.h. of letter-graded graduate course work; consult the University's Office of Admissions for help in calculating grade-point average. Competence with word processing and spreadsheet application on
personal computers is required. Admission to the 41 s.h.
program requires a bachelor's degree in social work from a
CSWE-accredited program, earned within the previous five
years, with a cumulative g.p.a. of at least 3.20 and a major
g.p.a. of at least 3.50.
Applicants whose first language is not English must score
at least 100 (Internet-based) on the Test of English as a
Foreign Language (TOEFL).
Applicants must submit three letters of recommendation,
including one regarding academic abilities and one from
the applicant's most recent employer (if the employment
was social work-related); and a personal statement
addressing criteria specified by the School of Social Work.
Applicants to the 41 s.h. program must provide additional
materials.
Applications for the 48 s.h. and 60 s.h. programs are
accepted beginning September 1 and must be completed
by February 1 to be considered for the next academic
year. Applications for the 41 s.h. program are due January
4. Applicants must meet the admission requirements
of the Graduate College; see the Manual of Rules and
Regulations of the Graduate College.
For a complete statement of graduate admission policies,
contact the School of Social Work.

Financial Support
Students seeking financial assistance should apply for aid
through the University of Iowa Office of Student Financial
Aid. Students may apply for a limited number of research
and teaching assistantships available from the School of
Social Work. Application materials for research or teaching
assistantships are available from the school each spring,
or as positions become available. Aid received through the
Office of Student Financial Aid does not preclude students
from consideration for aid through the School of Social
Work.

M.S.W. Off Campus
The School of Social Work delivers the M.S.W. curriculum
to three off-campus sites: Des Moines and Sioux City, Iowa,
and the Quad Cities area of Iowa and Illinois. Each site is
administered by the School of Social Work in cooperation
with the Division of Continuing Education. Social work
faculty members teach required courses at each center
and are available for student advising. The off-campus
programs have been evaluated by the Council on Social
Work Education and the University of Iowa Graduate
Council as providing a program comparable to that
available on the Iowa City campus.
Courses at each off-campus site are taught in classrooms
by tenure-track, clinical, visiting, and adjunct faculty
members. Instructional connections between sites are
maintained through varied technologies, including
computer-based instruction.
For program entry and application dates, contact the
School of Social Work.

Des Moines Center
The John and Mary Pappajohn Education Center is located
in Des Moines, in central Iowa. It offers courses sequenced
to accommodate both part-time and full-time study.
Students may complete the entire degree program at the
Des Moines center, although they may travel to Iowa City
for selected elective courses offered during the summer.

Quad Cities Center
Students in the Quad Cities part-time program can complete	heir degree entirely off-campus with the
exception of some electives, which they can take during
summer sessions in Iowa City or at other area colleges and
universities. The School offers this part-time program to a
cohort admitted once every three years. In addition to the
part-time cohort students, there are some full- or part-time
students from Iowa City in practicum in the Quad Cities.
The Quad Cities program is located in the Davenport/
Bettendorf area on Iowa's eastern border.

Sioux City Center
The Sioux City part-time program is nearly identical to the
Quad Cities part-time program. Most courses are offered in
classroom space at Briar Cliff University in Sioux City.

Joint M.S.W./Ph.D. in Social Work
The school offers a joint Master of Social Work/Doctor
of Philosophy in social work for students who have
completed course work in research and statistics and
have postbaccalaureate experience related to social work
practice. The joint program permits students to apply a
limited amount of credit toward both graduate degrees,
reducing the time required to graduate. Individuals
interested in the joint program must apply to the M.S.W.
program and the Ph.D. program; applications are reviewed
by the admissions panels of both programs. For more
information, contact the School of Social Work.

Joint M.S.W./Degrees in Other
Disciplines
The School of Social Work collaborates with the College
of Law to offer the joint Juris Doctor/Master of Social Work.
It also collaborates with the School of Urban and Regional
Planning to offer the joint Master of Social Work/Master of
Arts or Master of Science in urban and regional planning.
Each program permits students to apply up to 12 s.h.
of graduate credit toward both degrees, reducing the
time required to graduate. Applicants must apply to each
program separately and be admitted to each one before
they may be admitted to the joint degree program. For
information about the law and planning programs, see Juris
Doctor (p. 969) (College of Law) and Urban and Regional
Planning (p. 963) (Graduate College) in the Catalog.
Similar arrangements may be made with other
departments. Academic units in which social work students
have pursued joint degrees include the Tippie College of
Business, the College of Education, the Department of
American Studies, the Department of Religious Studies,
and the School of Journalism and Mass Communication.
Social work students are encouraged to take courses in
other departments whether or not they are pursuing joint
degrees.

M.S.W. Professional Association
Graduates of accredited M.S.W. programs may be eligible
for associate membership in the American Association
for Marriage and Family Therapy (AAMFT) upon fulfilling
certain curriculum requirements at the graduate level.
Courses are not automatically accepted; graduates need
to demonstrate that specific courses meet the AAMFT's
requirements, usually by sending course outlines.
Doctor of Philosophy

The Doctor of Philosophy program in social work requires a minimum of 82 s.h. of graduate credit. The program prepares students to conduct research that contributes to the knowledge base of social work, to become leaders in the profession, and to teach social work in postsecondary educational institutions.

Doctoral students develop close working relationships with faculty members who have achieved national recognition in areas such as child welfare, diversity and cultural competence, gerontology, social policy, and mental health.

The Ph.D. offers students a coherent program of study with opportunities to pursue their own scholarly interests. Each student's program of study must be approved by his or her advisor.

Students complete required course work and research and teaching practicums; pass a comprehensive exam; and write a dissertation and defend it in an oral exam. Their work includes courses in one of four outside disciplines: sociology, psychology, public health, or education. This course work helps to prepare them for the comprehensive examination and dissertation defense.

Students who enter the program with an M.S.W. are granted credit for 30 s.h. and must complete an additional 52 s.h. for the degree. Individuals with master's degrees in related disciplines (e.g., psychology, sociology) may choose to earn a Ph.D. in social work without first earning the M.S.W. Credit from a related master's degree may be applied to the Ph.D., as determined case-by-case by the School of Social Work.

The Ph.D. in social work requires the following course work.

FOUNDATION COURSES

Doctoral students without the M.S.W. must take the following four foundation courses during their first year of study. Students may waive one or more of these courses if they can show that they have completed comparable courses and can pass an applicable exam.

</tr>
</tbody>
</table>

ADDITIONAL ELECTIVES

Students earn 6 s.h. in elective course work (in addition to electives taken for the outside discipline requirement).

Admission

Students are admitted to the Ph.D. program only for full-time study. Admission requires a master's degree in social work from a program accredited by the Council on Social Work Education (CSWE) or a master's degree in a related field. Prospective students also may apply to the M.S.W./Ph.D. program.

The school makes special efforts to recruit students from underrepresented minorities, especially Iowa residents. The program accepts up to five students each year.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants must have taken the Graduate Record Exam (GRE) General Test and should have their scores sent to the University of Iowa. A score of at least 575 on both the verbal and quantitative sections, or a composite score of 1150, is preferred for individuals who took the old GRE. A score of at least 158 on the verbal section and at least 147 on the quantitative section, or a composite score of at least 305, is preferred for those who took the revised GRE. The School of Social Work has not established a minimum analytic writing score.

Applicants also must submit a completed Graduate College application form; undergraduate transcript (an undergraduate g.p.a. of at least 3.00 and an introductory statistics course are required); graduate transcript; a personal statement of professional goals, including area of interest and reason for pursuing the Ph.D. (two to three pages); a résumé; a sample of scholarly writing (scholarly publication or research or theoretical paper); and three letters of recommendation (two must be academic references).

International applicants must have a minimum total score of 100 on the Test of English as a Foreign Language (TOEFL) IBT Test or a minimum overall band score of 7 on the International English Language Testing System (IELTS), with no IELTS subscore less than 6. A score of 26 on the speaking portion of the TOEFL is preferred. Automatic waivers of the TOEFL or IELTS requirement are granted for applicants who have completed a bachelor's degree or higher at an accredited university in the United States, United Kingdom, Canada (excluding French Quebec), English speaking Africa, Australia, or New Zealand.

Applicants must submit the application form, fee, and other materials to the University's Office of Admissions.
An application packet and list of guidelines are available from the admissions office and on the School of Social Work web site. The application is due February 1 for the following academic year.

**Financial Support**
The School of Social Work provides students with a competitive, multi-year financial package that includes full tuition, an assistantship, and a health and dental insurance allowance. The school also provides fellowships, travel awards, and dissertation awards. Students whose first language is not English must take the English Speaking Proficiency Assessment (ESPA) test in order to be considered for teaching assistantships. Assistants who hold appointments of one-quarter-time or more are assessed tuition at the resident rate, for which they receive a scholarship, and their computer fees and health insurance premiums are waived for each semester they hold an appointment during the academic year. For more information on attendance, refer to Cost on the Office of Student Financial Aid web site.

**Certificate in Aging Studies**
The School of Social Work administers the Aging Studies Program, which offers a certificate for undergraduates and graduate students and a minor for undergraduates; see Aging Studies (p. 34) in the Catalog.

**Projects, Seminars**
Students may become involved in special projects such as the National Resource Center for Family-Centered Practice and the School of Social Work’s programs in gerontology and in end-of-life care. The school also offers students the opportunity to participate in travel/study seminars. Urban, rural, national, and international seminars are available.

**Continuing Education**
Nondegree students may enroll in selected courses and workshops offered on campus and online through the Division of Continuing Education and in off-campus programs offered by the School of Social Work. Students who complete continuing education work and later enroll in a degree program may be able to apply a limited amount of their continuing education work toward their degree requirements; applicable credit is determined by the School of Social Work. See Distance and Online Education on the Division of Continuing Education web site.

**Courses**

**Lower-Level Undergraduate**

**SSW:1000 First-Year Seminar** 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**SSW:1022 Social Justice and Social Welfare in the United States** 3 s.h.

**Upper-Level Undergraduate and Graduate**

**SSW:1800 Basic Aspects of Aging** 3 s.h.

**SSW:2042 Intercultural Communication** 3 s.h.
Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Prerequisites: (COMM:1112 or COMM:1170) and (COMM:1117 or COMM:1130) and (COMM:1168 or COMM:1174) and COMM:1301 and COMM:1305. Requirements: g.p.a. of at least 2.30 and completion of four of five Foundations of Communication courses. Same as IS:2042, COMM:2042.

**SSW:2222 Introduction to Social Work** 4 s.h.
Social welfare as a social institution; settings, methodologies of social work, practice; profession of social work; historical development of American social welfare, social work; a minimum of 45 hours volunteer work. Requirements: sophomore or higher standing. Same as SOC:2222.

**Projects related to student interest carried out under direction of faculty member. Requirements: individual study contract.**

**SSW:3500 Nonprofit Organizational Effectiveness I** 3 s.h.
SSW:3501 Introduction to Nursing Homes 3 s.h.
Overview of nursing home roles in context of long-term care system, characteristics of nursing home residents. Same as ASP:3501.

SSW:3585 Travel/Study Seminar arr.
Opportunity for cross-cultural learning through U.S. or international travel; focus on social welfare issues. Prerequisites: SSW:4843.

SSW:3600 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, NURS:3600, RELS:3701.

SSW:3712 Human Sexuality, Diversity, and Society 1-3 s.h.
Physiological, psychological aspects; parameters defined by students, instructor. Same as NURS:3712.

SSW:3729 Substance Use and Abuse 3 s.h.
Chemical dependency for helping professions; etiological, physiological, psychological, legal, sociological aspects; treatment methods. Requirements: junior or higher standing.

SSW:3753 Programs and Services for Aging Adults 3 s.h.
Major gerontological programs and services, practitioners' need for basic aging-practice competence; aging network; income, employment, health maintenance programs; continuum of care (preventive and well-elderly services, in-home services, community-based services, institutional care); assessment; major elder health issues, informal care; end-of-life care. Same as ASP:3753.

SSW:3785 Social Policy and the Elderly 3 s.h.
Public social policies, their affect on well-being of elderly, including women and minorities; U.S. and other nations' policies. Prerequisites: SSW:4843. Requirements: an introductory course on aging and junior or higher standing. Same as ASP:3785.

SSW:3786 Death/Dying: Issues Across the Life Span 3-4 s.h.
Introduction to death and dying; historical, cultural, societal, personal perspectives. Same as ASP:3786.

SSW:3796 Family Violence 2-3 s.h.
Child abuse and neglect, domestic violence, elder abuse; causes, policy aspects, identification, reporting, treatment, prevention.

SSW:3797 Child Welfare Policy and Practice 3 s.h.
Public and private child welfare practice and organizations in the United States; historical and legal aspects, co-occurring issues, foster care, adoption, family preservation.

Human behavior, practice, social welfare policy.

SSW:3840 Human Behavior in the Social Environment 3-4 s.h.
Behavior and development in context of social, ecological systems and human diversity; overview of biopsychosocial dimensions, individual behavior, and development throughout lifespan; contexts of diverse family, group, community, organization, and cultural systems.

SSW:3841 Fundamentals of Social Work Practice 3 s.h.
Professional practice: functions, roles, skills, conceptual frameworks, values, ethics; focus on integrated approach to practice, including assessment, intervention, evaluation of interventions, termination with individuals, families, groups; emphasis on empirically based practice. Corequisites: SSW:3840, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

SSW:3842 Interpersonal Skills Laboratory 2 s.h.
Practice of interpersonal skills required in the helping relationship. Corequisites: SSW:3841, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

SSW:3844 Introduction to Social Work Research 4 s.h.
Scientific approach to knowledge building, with emphasis on critical use of research; quantitative and qualitative methods, evaluation of practice, computerized data analysis, ethics and diversity in social work research. Requirements: admission to social work B.A. program.

SSW:3845 Social Work Processes 4 s.h.
Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Corequisites: SSW:3840, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

SSW:3847 Discrimination, Oppression, and Diversity 3 s.h.
Theoretical and historical perspectives on racism, sexism, other forms of discrimination; applications to social work, culturally competent practice, change strategies. Requirements: admission to social work B.A. or M.S.W. program.

SSW:3904 Human Services Administration 2 s.h.
Effects of organizational structures/processes on individual performance; models of management, communication patterns, leadership styles; skill in technical writing, decision making, personnel and financial management, applied professional ethics. Requirements: completion of foundation courses.

SSW:4100 Social Work in the Criminal Justice System 3 s.h.
How social work practice intersects with different aspects of the criminal justice system; focus on integrating social work values into criminal justice field; social work's responsibility to address social justice problems (e.g., mental illness, racial disparity, gender, human rights) within criminal justice system; critical examination of past and present practices in criminal justice and implications for social work practice and policy when working with individuals in criminal justice system.
SSW:4130 Family Development Specialist Model
Use of family development specialist model of family-centered practice to facilitate improved family functioning, economic independence; relationship building, systems theory, family-centered case management, conflict management, empowerment strategies. Requirements: completion of family development specialist certification course.

SSW:4155 Treatment of Substance Use and Co-Occurring Disorders
Treatment of individuals presenting substance related issues (abuse, dependency, cooccurring disorders); etiological, physiological, psychological, legal, and sociological aspects; evaluation of current research and direct application of contemporary treatment modalities to client situations encountered as helping professionals. Recommendations: introductory course in substance abuse.

SSW:4188 Continuing Education: Honors arr.
Supervised individual research. Requirements: honors standing.

SSW:4189 Field Experience Seminar 1 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Corequisites: SSW:4193. Requirements: completion of course work in the major.

SSW:4190 Aging Studies Internship 3 s.h.
Opportunities for students in various disciplines to relate their areas of study to older adults and aging; interdisciplinary relationships, approaches to meeting needs of older adults. Same as ASP:4190.

SSW:4192 Honors in Social Work arr.
Supervised individual research. Requirements: honors standing.

SSW:4193 Field Experience arr.
Supervised experience in selected social welfare organizations; application of knowledge and skill common to generalist practice in an agency setting. Corequisites: SSW:4189. Requirements: completion of course work in the major and social work senior standing.

SSW:4216 Group Facilitation in Human Sexuality 0-3 s.h.
Principles of group dynamics, group process; leadership skills for small, task-oriented discussion groups on human sexuality. Prerequisites: SSW:3712. Same as NURS:4216.

SSW:4843 Social Welfare Policy and Practice 3 s.h.
Basic social welfare policies and programs; economic, social, ideological, and political conditions that have influenced formation and implementation of social policy, current structure of major social welfare policies.

Graduate

SSW:5194 Social Work Practice in Health Care Settings 2 s.h.
Introduction to organization, provision of social work services in health care settings; practice issues such as models of intervention, ethical questions, impact of cultural diversity on health care. Prerequisites: SSW:3841 or SSW:6150.

SSW:5200 Grief Work with Individuals and Families 2-3 s.h.
Complexity of grief and its multifaceted impact on family systems; utilizing grief theories, including Worden's Tasks of Mourning, ambiguous loss theory, several family systems models; examination of multi-generational dynamics that affect how we learn to grieve, how we experience grief, and how we live after a loss; acknowledged and unacknowledged grief and loss; generational family dynamics; difficulties and strengths passed from one generation to the next; assessing grief at individual, family, group, and community levels; how loss can affect personal well-being and professional practice, particularly when working with an interdisciplinary team. Requirements: social work graduate standing.

SSW:5219 Aging and the Family 2-3 s.h.
Research related to aging and the family; intergenerational relations, marital status in later life, diversity of older families, caregiving, elder abuse, policy issues. Same as ASP:5219.

SSW:5240 Trauma Informed Family Practice 3 s.h.
Theory, knowledge, and skills informing evidence-based assessment and intervention for traumatized children and adolescents in child welfare system, including those exposed to abuse, neglect, witnessing interpersonal crime (e.g., domestic violence, community violence); family events within their ecological context, various family forms, cultural patterns; controversial issues in child welfare, conclusions based on scholarly research, presentation of conclusions in professional oral and written form.

SSW:5254 Introductory Seminar: End-Of-Life Services in Rural Communities 2-3 s.h.
Basic principles of hospice and palliative care, rural service delivery, community assessment.

SSW:6145 Organization and Community Practice 3 s.h.
Models that underlie theories of organization, community practice; principles of macro social work and skill development in relationship building, needs assessment, decision making, planning, implementing, ethics, program and self-evaluation. Requirements: admission to M.S.W. program.

SSW:6146 Computer Laboratory 1 s.h.
Use of microcomputers in social work practice; user skill, software for a variety of applications in social service settings. Requirements: admission to M.S.W. program.
SSW:6148 Research Practice I 3 s.h.
Knowledge and skills for evaluating practice and carrying out social work research; formulation of research questions; research design and methodology; sampling techniques; protection of human subjects; descriptive statistics; computerized data analysis. Requirements: admission to M.S.W. program.

SSW:6150 Social Work Practice with Individuals, Families, and Groups 3 s.h.
Models and underlying theories of empirically based direct social work practice; emphasis on an ecosystem strengths perspective; phases of helping relationship, strengths-based assessment, change process in interpersonal helping relationships. Prerequisites: SSW:3840. Requirements: admission to M.S.W. program; for students who have completed 60 s.h., concurrent enrollment in SSW:6151, SSW:6290, and SSW:6291.

SSW:6151 Social Work Practice Skills Laboratory 2 s.h.
Interpersonal skills practice in the helping relationship; small-group format. Corequisites: SSW:6150 and SSW:6290 and SSW:6291, if not taken as prerequisites. Requirements: admission to M.S.W. program.

SSW:6220 Family Law 3 s.h.
Legal systems, rights, processes related to families; marriage, divorce, custody, protective services, reproductive rights, adoption, commitment, delinquency, education, poverty, discrimination; roles of lawyers, social workers in legal system. Prerequisites: SSW:4843.

SSW:6224 Spirituality and Ethics in Social Work 2-3 s.h.
Knowledge, values, and skills that provide a framework for spiritually sensitive social work practice; preparation for responding competently and ethically to diverse spiritual perspectives, for recognizing and reflecting on one’s own spiritual beliefs, and for identifying appropriate ways to apply personal beliefs to practice with varied populations while safeguarding client autonomy and self-determination.

SSW:6228 Theories of Personality and Psychopathology 2 s.h.
Theories and their relevance to social work practice with diverse populations. Prerequisites: SSW:3840. Requirements: social work graduate standing.

SSW:6229 Working with Groups 2 s.h.
Theory and practice of group work, group process, leadership styles and skills; fundamental theory, skills necessary to form and facilitate a small group. Requirements: completion of foundation courses.

SSW:6232 Therapy with Couples 2 s.h.
Married and other couples as social systems; theories of functional, dysfunctional systems; techniques of intervention. Requirements: completion of foundation courses.

SSW:6233 School Social Work Practice 2 s.h.
School as a social institution; activities of school social worker; theoretical, practice issues; current issues in field.

SSW:6234 Social Work Practice and Use of the Diagnostic and Statistical Manual of Mental Disorders 3 s.h.
Major categories of psychopathology, DSM-IV system of classification; individual behavior and presentation of symptoms considered through DSM-IV multiaxial approach to diagnosis; effects of culture, developmental stage, and gender on presentation of mental disorders.

SSW:6236 Interventions with Individuals 2 s.h.
Comparison of two or more intervention theories and approaches used in social work practice with individuals; attention to diverse populations and across life span. Requirements: completion of foundation courses.

SSW:6237 Social Work Practice with Children, Youth, and Families 2 s.h.
Preparation for practice in child welfare, family service agencies; family life cycle, child development, child maltreatment, problems of adolescence, social services for families and children, legal issues. Requirements: completion of foundation courses.

SSW:6238 Introduction to Play Therapy 2 s.h.
Major theories and techniques of play therapy, relevance to social work practice. Prerequisites: SSW:6150.

SSW:6247 Nonprofit Organizational Effectiveness I 3 s.h.

SSW:6248 Nonprofit Organizational Effectiveness II 3 s.h.

Topics not covered in another course; diversity, social justice and ethics issues related to a social work practice area.

SSW:6282 Grant Writing 1-2 s.h.
Same as URP:6282.

SSW:6290 Foundation Practicum in Social Work 3 s.h.
Generalist practice experience with individuals, families, small groups, organizations, communities; communication skills, change process, professional values and ethics applied at multiple system levels; students evaluate their own practice using a learning contract in an agency setting. Corequisites: SSW:3840, SSW:3847, SSW:4843, SSW:6145, SSW:6146, SSW:6150, SSW:6151, and SSW:6291; if not taken as prerequisites. Requirements: admission to M.S.W. program.

SSW:6291 Foundation Practicum Seminar 1 s.h.

SSW:7250 Family-Centered Theory and Practice I 3 s.h.
Theoretical bases for family-centered practice; comparison and analysis; skill development in analyzing problem situations, implementing change strategies. Requirements: completion of M.S.W. foundation courses.

SSW:7251 Family-Centered Theory and Practice II 3 s.h.
Techniques for assessment, intervention in family-centered practice; evaluation of practice; theoretical and clinical bases for intervention. Prerequisites: SSW:7250.

SSW:7252 Advanced Social Policy for Family Practice 3 s.h.
Systematic basis for examining social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable individuals and families. Requirements: completion of M.S.W. foundation courses.

SSW:7255 Integrative Seminar in End-of-Life Care 1 s.h.
Integration of students' knowledge, skills, and values for practice in end-of-life care and bereavement; application to case studies and advanced practicum setting. Corequisites: SSW:7292 or SSW:7295. Requirements: admission to end-of-life care area.

SSW:7260 Integrated Social Work Theory and Practice I 3 s.h.
Theories, skill development, evaluation, ethical issues in integrated social work practice; intermediate group work for culturally competent intervention; small task groups. Requirements: completion of foundation courses.

SSW:7261 Integrated Social Work Theory and Practice II 3 s.h.
Continuation of SSW:7260; theories, skills evaluation, ethical issues; advanced group work for culturally competent intervention; case management, program development, funding evaluation, large task groups. Prerequisites: SSW:7260.

SSW:7262 Advanced Social Policy for Integrated Practice 3 s.h.
Systematic basis for critical examination of social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable populations, service providers, communities. Requirements: completion of M.S.W. foundation courses.

SSW:7268 Continuing Education: Individual Study arr.
Project related to student interest; directed by faculty member. Requirements: completion of course contract.

Thesis research project.

SSW:7270 Research Practice II 2-3 s.h.
Research project relevant to social work practice that builds on knowledge and skills developed in SSW:6148; data analysis, report of results; ethical principles applied to research. Prerequisites: SSW:6148. Requirements: admission to M.S.W. program.

SSW:7271 Individual Study arr.
Project related to student interest; directed by faculty member.

SSW:7272 Thesis arr.

SSW:7292 Advanced Practicum in Family-Centered Practice I and II arr.
Family-centered practice theory and skills implemented in interventions with individuals, families; two semester field course. Corequisites: SSW:7250, SSW:7251, SSW:7252, and SSW:7270; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses, and concurrent enrollment in SSW:7293 or SSW:7294.

SSW:7293 Advanced Practicum Seminar in Family-Centered Practice I 1 s.h.
Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Corequisites: SSW:7292. Requirements: completion of M.S.W. foundation courses.

SSW:7294 Advanced Practicum Seminar in Family-Centered Practice II 1 s.h.

SSW:7295 Advanced Practicum in Integrated Practice arr.
Integrated social work theories and interventions implemented in work with individuals, families, organizations, formal and informal networks; two semester field course. Corequisites: SSW:7260, SSW:7261, SSW:7262, and SSW:7270; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses; for fall semester — concurrent enrollment in SSW:7297 or SSW:7298.

Field course; social work theories and interventions implemented in schools. Corequisites: SSW:7250 or SSW:7260, SSW:7251 or SSW:7261, and SSW:7252 or SSW:7262; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses.

**SSW:7297 Advanced Practicum Seminar in Integrated Practice I** 1 s.h.
Two-semester course; social work knowledge, skills, values, and professional identity integrated in context of advanced practice and direct multisystemic interventions. Corequisites: SSW:7295 or SSW:7296.

**SSW:7298 Advanced Practicum Seminar in Integrated Practice II** 1 s.h.

**SSW:7800 Social Work Proseminar** 1 s.h.
Orientation for new Ph.D. students to program and degree requirements; how to formulate research questions; introduction to faculty research and interests. Requirements: admission to social work doctoral program.

**SSW:7801 Knowledge Building in Social Work Practice** 3 s.h.
Epistemology of social work practice theories, importance for knowledge building; practice theories of personal and interpersonal change, family life cycle development, empowerment.

**SSW:7802 Social Policy and Poverty in the U.S.** 3 s.h.
Causes of poverty in the U.S., public policies for low-income families; arguments and evidence offered for and against a particular explanation for poverty in the U.S. or approach to anti-poverty policy; how authors construct their arguments, underlying theory, evidence the authors bring to bear, ways they explore consequences of policy proposals; role of social science theory in advancing knowledge in social policy and research interests. Requirements: admission to social work Ph.D. program.

**SSW:7803 Social Work Research Practicum** 1-4 s.h.
Student work with faculty on various phases of research process including research design, measurement, sampling, data collection, data analysis, human subjects review, and writing for publication. Requirements: admission to social work doctoral program.

**SSW:7804 Thesis Writing Seminar** 2-3 s.h.
Writing a thesis and an argument; synthesizing literature and justifying methods; development of scientific communication skills; defending ideas at proposal hearing and thesis defense.

**SSW:7806 Teaching Practicum** 2 s.h.
Development of knowledge, skills, and values needed to become effective, culturally competent social work educators through an applied teaching experience; faculty mentors provide ongoing instruction on how to teach and assess student learning. Recommendations: admission to social work doctoral program, and concurrent enrollment in or completion of teaching seminar.

**SSW:7807 Teaching Seminar** 1 s.h.
Development of knowledge and skills needed to become effective, culturally competent educators; topics may include theories of adult learning, course design, creating a learning culture that is inclusive, instructional strategies, accreditation processes, and writing a teaching philosophy.

**SSW:7815 Seminar: Human Service Organizations** 3 s.h.
Theories of organizations and applying theory to research within and about human services organizations; range of theories and their application to problems of conducting organizational research from Weber’s “bureaucracy” to contemporary "learning organization" popularized by Senge; organizational culture and climate, interorganizational networks, supervision and turnover, gender and diversity in relation to organizational research; students lead sessions and facilitate discussion of critical concepts and readings.

**SSW:7816 Psychological Trauma, Trauma-Informed Practice, and Trauma Research** 3 s.h.
Theory related to psychological trauma, trauma-informed practice, and trauma research; origins of psychological trauma; history and development of trauma theories; trauma-related mental health disorders; trauma-sensitive/trauma-informed practice; challenges associated with applying and testing theory in direct practice and research.

**SSW:7830 Ph.D. Dissertation** arr.
Sociology

Chair
- Karen V. Heimer

Undergraduate major: sociology (B.A., B.S.)
Undergraduate minor: sociology
Graduate degrees: M.A. in sociology; Ph.D. in sociology
Faculty: http://clas.uiowa.edu/sociology/people
Web site: http://clas.uiowa.edu/sociology/

The Department of Sociology offers an undergraduate major and minor as well as graduate degree programs. The department partners with the Departments of Economics, Philosophy, and Political Science to offer the undergraduate major in ethics and public policy, an interdisciplinary program administered by the Department of Philosophy; see Ethics and Public Policy (p. 286) in the Catalog. It also collaborates with the Departments of Geographical and Sustainability Sciences (p. 323), Political Science (p. 520), and Statistics and Actuarial Science (p. 613) to offer the Certificate in Social Science Analytics (p. 571). In addition, it offers courses that undergraduate students in all majors may use to fulfill General Education Program (p. 313) requirements and a First-Year Seminar designed for entering undergraduate students.

Undergraduate Programs of Study

- Major in sociology (Bachelor of Arts, Bachelor of Science)
- Minor in sociology

A bachelor's degree with a major in sociology provides a liberal arts and sciences education. Sociology provides a broad foundation for a number of careers that require a deep understanding of human interactions and behaviors. Though broad in scope, sociology can be broken down into many marketable specializations including these at the University of Iowa: criminology; family, health, and well-being; organizations, networks, and careers; social psychology; and social and political organization.

The major provides background for employment in fields such as human services, criminal justice, corrections, sales, public relations, advertising, personnel, applied social research, community organization, and teaching social science in secondary schools. It also provides a foundation for graduate or professional study in social work, urban planning, law, criminal justice, social policy, and similar areas. Finally, the major prepares students to work toward advanced degrees in sociology, which qualify them for college or university teaching and work in academic, private, and governmental research.

The department has an active undergraduate organization, The Sociology Club, which is open to all interested students. The student-run group sponsors speakers, films, and career days; conducts study groups; and facilitates group volunteerism.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in sociology requires a minimum of 120 s.h., including at least 33 s.h. of work for the major. The Bachelor of Science with a major in sociology requires a minimum of 120 s.h., including at least 45 s.h. of work for the major, with a minimum of 30 s.h. in sociology course work. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). Transfer students must earn at least 12 s.h. in sociology course work at the University of Iowa; transfer courses must be approved by a sociology advisor.

The major offers three optional tracks for both B.A. and B.S. students with an interest in one of the following concentrations: criminology; family, health, and well-being; organizations, networks, and careers.

Requirements for the major are similar for the Bachelor of Arts and the Bachelor of Science, except B.A. students take 3 s.h. of statistics and two theory and methods courses, while B.S. students take 8 s.h. of introductory calculus and four theory and methods courses. Remaining requirements (electives, the capstone course, and the graduation portfolio) are identical for B.A. and B.S. students.

Choice of a degree program should be dictated by a student's personal career goals. Though not required, students interested in pursuing a graduate program may find the additional math and methods courses helpful.

In planning to complete the major, students must take courses in the proper sequence. Introduction to Sociology [SOC:1010] is a prerequisite for all required core theory and methods courses. Statistics is prerequisite for the more advanced methods course. B.S. students are required to take calculus. These introductory courses lay the foundation for all other work in the major. The recommended sequence for the major's core requirements is SOC:1010 Introduction to Sociology, SOC:2130 Sociological Theory, the statistics requirement, and SOC:2170 Research Methods. See "Four-Year Graduation Plan" later in this section.

The major in sociology requires the following work.

**INTRODUCTORY SOCIOLOGY (B.A. AND B.S.)**

All B.A. and B.S. students take this:

SOC:1010 Introduction to Sociology 3-4 s.h.

**INTRODUCTORY STATISTICS (B.A.)**

B.A. students complete one of these:

SOC:2160 Applied Statistics for Social Scientists 3 s.h.
ECON:2800 Statistics for Strategy Problems 3 s.h.
STAT:1020/PSQF:1020 Elementary Statistics and Inference 3 s.h.
STAT:1030 Statistics for Business 4 s.h.
STAT:2010 Statistical Methods and Computing 3 s.h.
STAT:3510 Biostatistics 3 s.h.
STAT:4143/PSQF:4143 Introduction to Statistical Methods 3 s.h.

**INTRODUCTORY CALCULUS (B.S.)**

B.S. students complete one of these sequences:
MATH:1850 & MATH:1860 Calculus I-Ii 8 s.h.

THEORY AND METHODS (B.A.)
The following two theory and methods courses are required for the B.A. and should be completed as soon as possible.
SOC:2130 Sociological Theory 3 s.h.
SOC:2170 Research Methods 3 s.h.

theory and methods courses are required for the B.A. and should be completed as soon as possible.
SOC:2130 Sociological Theory 3 s.h.
SOC:2170 Research Methods 3 s.h.
STAT:3120 Probability and Statistics 4 s.h.

THEORY AND METHODS (B.S.)
The following four theory and methods courses are required for the B.S. and should be completed as soon as possible.
All of these:
SOC:2130 Sociological Theory 3 s.h.
SOC:2170 Research Methods 3 s.h.
STAT:3120 Probability and Statistics 4 s.h.

One of these:
PHIL:2603 Introduction to Symbolic Logic 3 s.h.
PHIL:3604 Introduction to Philosophy of Science 3 s.h.

ELECTIVES (B.A. AND B.S.)
B.A. and B.S. students complete 18 s.h. of elective course work in sociology (prefix SOC). Four of the required electives can be taken during any session with at least one course numbered 3000-4899. Two of the required electives must be taken after (and not concurrent with) the completion of SOC:2130 Sociological Theory, an approved course from the “Introductory Statistics (B.A.),” list above, and SOC:2170 Research Methods. These two electives must be chosen from sociology courses numbered 3000-4899, SOC:4920 Social Services Organization Internship, or SOC:4998 Honors Research. With permission, students may use graduate courses in sociology (numbered 5000 or above) to satisfy the electives requirement.
The following courses do not count toward the major and may not be used as electives.
SOC:1000 First-Year Seminar 3 s.h.
SOC:4930 Teaching Internship 3 s.h.
SOC:4990 Directed Individual Study 3 s.h.

CAPSTONE COURSE (B.A. AND B.S.)
All students complete the capstone course, which illustrates their accomplishments and includes assembling a portfolio. Students may take it as early as spring of their junior year, as long as they have completed SOC:2130 Sociological Theory, SOC:2170 Research Methods, and the statistics requirement. Students must maintain a g.p.a. of at least 2.00 in work for the major.
SOC:4910 Capstone Course in Sociology 3 s.h.

GRADUATION PORTFOLIO (B.A. AND B.S.)
During their last semester, all students enroll in the following course, in which they submit the portfolio they assembled in the capstone course.
SOC:4909 Graduation Portfolio 0 s.h.

**Criminology Track**
The criminology track requires a minimum of 18 s.h. of credit, including 15 s.h. of course work taken at the University of Iowa. It is open to sociology majors who are interested in understanding the nature of crime and who want to pursue careers in criminological research, policing, probation, parole, or the law. The criminology track teaches students about various data sources used to study the causes of crime, the dominant sociological explanations for crime and crime control, and how law as an institution affects and is affected by other institutions. It includes courses on topics such as the criminal legal system, gender and violence, and global criminology.

Criminology track students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major. Although SOC:4400 Internship in Criminal Justice and Corrections is not required for the track, students are encouraged to complete it; they may count a maximum of one registration in SOC:4400 toward track requirements.
The criminology track requires the following course work.
**Required**—one of these:
SOC:1410 Introduction to Criminology 3 s.h.
SOC:1420 Law and Society 3 s.h.
SOC:1447 Introduction to the Criminal Justice System 3 s.h.

**Electives**—15 s.h. from these:
SOC:2325 Women, Crime, and Justice 3 s.h.
SOC:2426 Deviance and Control 3 s.h.
SOC:2430 Comparative Criminal Justice Systems 3 s.h.
SOC:3171 Drugs and Society 3 s.h.
SOC:3415 Global Criminology 3 s.h.
SOC:3416 Race, Crime, and Justice 3 s.h.
SOC:3417 Community Corrections 3 s.h.
SOC:3420 Juvenile Delinquency 3 s.h.
SOC:3437 American Crime 3 s.h.
SOC:3450 Criminal Legal System 3 s.h.
SOC:4400 Internship in Criminal Justice and Corrections 1-5 s.h.
SOC:4420 Criminal Punishment 3 s.h.
SOC:4430 Interpersonal Violence in Society 3 s.h.
SOC:4440 Sociology of White-Collar Crime 3 s.h.
SOC:4450 Juvenile Justice: A Sociolegal Perspective 3 s.h.
SOC:4460 Sociology of Law 3 s.h.
SOC:4461 Gender and Violence 3 s.h.
SOC:4901 Selected Topics in Criminology, Law and Justice 3 s.h.

**Family, Health, and Well-Being Track**
The family, health, and well-being track requires a minimum of 15 s.h. of credit, including 12 s.h. of course work taken at the University of Iowa. It is open to sociology majors who are interested in understanding family structures and practices, differences between and within families, and those social institutions and forces that shape families or are shaped by them. Additionally, the
track cultivates students' understanding of the social context of health, illness, and health care. It is especially well suited for students who are interested in pursuing careers in the fields of social service and health.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The family, health, and well-being track requires the following course work.

Required—6 s.h. from these:

- SOC:1310 Gender and Society 3-4 s.h.
- SOC:3510 Medical Sociology 3 s.h.
- SOC:3710 The American Family 3 s.h.

Electives—9 s.h. from these:

- SOC:1810 Poverty, Inequality, and Public Policy 3 s.h.
- SOC:2064 Racial Inequality and the Experiences of African American Families in the U.S. 3 s.h.
- SOC:2810 Social Inequality 3 s.h.
- SOC:3220 Sociology of Mental Illness 3 s.h.
- SOC:4230 Sociology of Self-Improvement 3 s.h.
- SOC:4430 Interpersonal Violence in Society 3 s.h.
- SOC:4461 Gender and Violence 3 s.h.
- SOC:4903 Selected Topics in Family, Health, and Well-Being 3 s.h.

Or select electives from these graduate courses, with approval from instructor:

- SOC:6220 Seminar: Selected Topics in Social Psychology (when topic is life course) 3 s.h.
- SOC:6310 Gender Stratification Seminar 3 s.h.

Students also may choose the remaining required course as an elective.

**Organizations, Networks, and Careers Track**

The organizations, networks, and careers track requires a minimum of 15 s.h. of credit, including 12 s.h. of course work taken at the University of Iowa. It is open to sociology majors who are interested in understanding the macro- and micro-level processes that affect the ability to understand and manage organizations, as well as the groups and individuals that compose them. The track provides intensive training in both theoretical and empirical approaches to organizations, and combines micro-level insights into work groups with macro-level perspectives on the influence of organizations' environments. It is especially well suited for students who are interested in pursuing careers in various services-providing sectors such as business services, educational services, social assistance, or government.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The organizations, networks, and careers track requires the following course work.

Required—6 s.h. from these:

- SOC:3610 Organizations and Modern Society 3 s.h.
- SOC:3880 Introduction to Network Science 3 s.h.
- SOC:4225 The Social Psychology of Leadership 3 s.h.

Electives—9 s.h. from these:

- SOC:1810 Poverty, Inequality, and Public Policy 3 s.h.
- SOC:2810 Social Inequality 3 s.h.
- SOC:3200 International Perspectives: Xicotepec 1-3 s.h.
- SOC:3650 Education, Schools, and Society 3 s.h.
- SOC:3850 Economy and Society 3 s.h.
- SOC:4210 Small Group Analysis 3 s.h.
- SOC:4230 Sociology of Self-Improvement 3 s.h.
- SOC:4440 Sociology of White-Collar Crime 3 s.h.
- SOC:4903 Selected Topics in Organizations, Networks, and Careers 3 s.h.

Or select electives from these graduate courses, with approval from instructor:

- SOC:6610 Complex Organizations 3 s.h.
- SOC:7620 Social Network Analysis 3 s.h.
- SOC:7820 Seminar: Selected Topics in Social Stratification (when topic is social capital) 3 s.h.
- SOC:7860 Seminar: Economy and Society 3 s.h.

**Emphasis Areas**

The following elective courses are grouped by emphasis for students who may want to cluster their electives according to one of the following areas of interest. The emphasis area courses are not tracks. See "Courses" later in this Catalog for a complete listing of sociology courses.

**Social Psychology**

- SOC:2220 Principles of Social Psychology 3-4 s.h.
- SOC:3220 Sociology of Mental Illness 3 s.h.
- SOC:3225 Paranormal Society 3 s.h.
- SOC:4210 Small Group Analysis 3 s.h.
- SOC:4225 The Social Psychology of Leadership 3 s.h.
- SOC:4230 Sociology of Self-Improvement 3 s.h.

**Social and Political Organization**

- SOC:1810 Poverty, Inequality, and Public Policy 3 s.h.
- SOC:2810 Social Inequality 3 s.h.
- SOC:3520 Political Sociology 3 s.h.
- SOC:3610 Organizations and Modern Society 3 s.h.
- SOC:3850 Economy and Society 3 s.h.
- SOC:3830 Race and Ethnicity 3 s.h.
- SOC:3840 Community and Urban Sociology 3 s.h.
- SOC:3880 Introduction to Network Science 3 s.h.
- SOC:4820 Sociology of Sexuality 3 s.h.

**B.A. or B.S. with Teacher Licensure**

Sociology majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and
all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Sequencing of course work is important in meeting the four-year plan.

Bachelor of Arts

**Before the fifth semester begins:** SOC:1010 Introduction to Sociology or equivalent, and one sociology elective

**Before the seventh semester begins:** SOC:2130 Sociological Theory, a required statistics course, one more sociology elective, and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** SOC:2170 Research Methods and one more sociology elective

**During the eighth semester:** enrollment in all remaining course work in the major, including SOC:4910 Capstone Course in Sociology, SOC:4909 Graduation Portfolio, and the last two sociology electives; all remaining General Education courses; and a sufficient number of semester hours to graduate

Bachelor of Science

**Before the fifth semester begins:** SOC:1010 Introduction to Sociology or equivalent, SOC:2130 Sociological Theory, and one sociology elective

**Before the seventh semester begins:** a required statistics course, SOC:2170 Research Methods, calculus I-II, one more sociology elective, and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** STAT:3120 Probability and Statistics and one more sociology elective

**During the eighth semester:** enrollment in all remaining course work in the major, including SOC:4910 Capstone Course in Sociology, SOC:4909 Graduation Portfolio, and the last two sociology electives; all remaining General Education courses; and a sufficient number of semester hours to graduate

Honors in the Major

Students majoring in sociology have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.33 in all University of Iowa courses and in all sociology courses. In order to graduate with honors in sociology, the following course work must be completed.

SOC:4997 Honors Seminar 1 s.h.
SOC:4998 Honors Research (honors thesis) arr.

The honors thesis is prepared under faculty supervision. It gives students the opportunity to conduct sociological research in close consultation with a faculty member of the student’s choice.

Honors students also must take at least one sociology course numbered 3000 or above with honors designation, including graduate courses (honors designation requires instructor approval).

Learn more about honors in the major at Departmental Honors and Honors Courses on the University of Iowa Honors Program web site.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.

Minor

The minor in sociology requires a minimum of 15 s.h. in sociology courses, including 12 s.h. in courses taken at the University of Iowa. The minor must include SOC:2130 Sociological Theory and a minimum of 9 s.h. in courses numbered 3000 or above. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

A minor in sociology is a good complement to a number of majors, particularly other social sciences, business, elementary education, or health professions.

Certificate in Social Science Analytics

The Department of Sociology collaborates with the Departments of Geographical and Sustainability Sciences (p. 323), Political Science (p. 520), and Statistics and Actuarial Science (p. 613) to offer the undergraduate program in social science analytics; see Social Science Analytics (p. 571) in the Catalog.

National Honor Society

The department sponsors a chapter of Alpha Kappa Delta International Sociology Honor Society. Students who have a cumulative and sociology g.p.a. of at least 3.00 and have attained junior or higher standing are considered for membership. Consult the Alpha Kappa Delta faculty advisor for details.

Graduate Programs of Study

- Master of Arts in sociology
- Doctor of Philosophy in sociology

Graduate study in sociology focuses on the Doctor of Philosophy. Students are awarded the M.A. as they fulfill requirements for the Ph.D.

The Doctor of Philosophy emphasizes research and aims primarily to prepare sociologists for academic positions in colleges and universities or for research positions in academic, private, and government institutions. Opportunities for research using survey, experimental, and observational methods are readily available in the department.
Master of Arts

The Master of Arts program in sociology requires 30 s.h. of graduate credit with thesis or research paper and 38 s.h. of graduate credit without. The program without thesis is intended for students seeking a terminal degree and for whom a wider range of course content in sociology is appropriate.

All M.A. students must complete the following courses with grades of B-minus or higher.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC:5110 History of Sociological Theory</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SOC:5160 Research Design and Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SOC:6170 Introduction to Sociological Data Analysis</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SOC:6180 Linear Models in Sociological Research</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Doctor of Philosophy

The Doctor of Philosophy program in sociology requires a minimum of 72 s.h. of graduate credit. Most courses for the Ph.D. are taken in the student’s two areas of interest, but all doctoral students must complete the following courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC:6170 Introduction to Sociological Data Analysis (required for the M.A.)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SOC:6180 Linear Models in Sociological Research (required for the M.A.)</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>Two elective courses in methods/statistics numbered 5000 or above</td>
<td></td>
</tr>
<tr>
<td>One advanced theory course such as SOC:6110</td>
<td></td>
</tr>
</tbody>
</table>

Students also must pass two area examinations, write, and defend a dissertation prospectus, and write and successfully defend a dissertation.

Doctoral students take two area exams—one from list A, the other from list A or B. List A has five standing committees: crime, law, and deviance; family; political sociology; social psychology; and stratification. The list B exam, a student may propose any area that is not covered under List A and for which there is adequate faculty support.

For a detailed statement of graduate study regulations, contact the Department of Sociology. Prospective doctoral students should examine this document carefully.

Joint Ph.D./J.D.

The Department of Sociology and the College of Law offer the joint Juris Doctor/Doctor of Philosophy. The program is highly individualized, allowing students to explore varied aspects of the relationship between law and society. Joint Ph.D./J.D. students may count up to 12 s.h. of graduate credit toward both degrees, with approval from the Department of Sociology and the College of Law.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program. For information about the J.D., see the College of Law (p. 969) section of the Catalog.

Teaching Assistantship Training

All new graduate students are expected to attend a three-day orientation for teaching assistants before classes begin. In addition, SOC:7010 Teaching Sociology is required for students who wish to teach their own courses.

Admission

Admission to graduate study in sociology usually requires an undergraduate g.p.a. of at least 3.25 and a score of 300 or higher (quantitative and verbal) on the Graduate Record Examination (GRE) General Test. Students whose first language is not English should submit scores on the Test of English as a Foreign Language (TOEFL). Applicants also must complete the Graduate College application form, the supplemental sociology department application, and use the department’s personal reference forms to obtain three letters of recommendation.

All application materials for fall admission must be received by January 1. The deadline for applying for departmental financial support is January 1. Evaluation of applications begins in early January.

Admission decisions are based on consideration of prior academic performance, personal reference letters, scores on the GRE General Test, and the applicant’s statement of reasons for pursuing advanced work in sociology at the University of Iowa. The department has no specific undergraduate course requirements for admission, but a background in the social sciences with some mathematical training is useful. A foreign language is not required for admission, and there is no foreign language requirement for a graduate degree in sociology. To inquire about admission, consult the chair of the admissions committee, Department of Sociology.

Financial Support

The Department of Sociology offers teaching assistantships and research assistantships for graduate students. Students who receive one-half-time teaching or research assistantships work 20 hours each week for faculty members on either teaching or research assignments. Out-of-state students who hold assistantships are assessed tuition at the resident rate. Graduate students also may be eligible for fellowships offered by the Graduate College.

Research Centers and Facilities

Center for Asian and Pacific Studies

The Center for Asian and Pacific Studies provides excellent opportunities for studying Asia from a social science perspective. It supports related Asia studies and offers a monthly seminar that features lively discussions by scholars from many different disciplines.

Center for Criminology and Sociolegal Studies

The Center for Criminology and Sociolegal Studies is an interdisciplinary research and teaching program for the study of crime, law, deviance, social control, and mental health. It sponsors a colloquium series in crime, law, and social control, in which affiliates, graduate students, and outside speakers present their ongoing research, and a working-paper series in which members...
disseminate research papers to the academic community. The center also provides research support and a research infrastructure for faculty and graduate students and offers graduate research assistantships for interested students. Internship in Criminal Justice and Corrections [SOC:4400] is administered through the center.

**Center for the Study of Group Processes**

The Center for the Study of Group Processes has an 18-room small-group laboratory with eight computer-controlled subject rooms that provide audiovisual and psychophysiological recording capabilities, two large-group rooms with an adjoining observation room, an audiovisual control room, a sociophysiological instrumentation lab, a virtual social environment lab, and other flexible research office spaces.

**Courses**

Prerequisites for courses are stated in the course descriptions.

**Lower-Level Undergraduate**

**SOC:1000 First-Year Seminar** 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**SOC:1010 Introduction to Sociology** 3-4 s.h.
How individuals are organized into social groups, ranging from intimate groups to bureaucracies, and how these influence individual behavior; nature and interrelationships of basic social institutions (family, education, religion, economy). GE: Social Sciences.

**SOC:1020 Social Problems** 3-4 s.h.
Emergence and distribution of selected social problems; alternative solutions; may include population, inequality, female-male relationships, racism, crime. GE: Social Sciences.

**SOC:1022 Social Justice and Social Welfare in the United States** 3 s.h.
Historical development of social welfare and social justice in the United States; individual values and ethics; role and responsibilities of enhancing society; contemporary practice to address social injustices including poverty, discrimination, various forms of violence; small group discussions and debates of various issues to allow for an exchange of diverse views and perspectives; volunteer work. GE: Values, Society, and Diversity. Same as SSW:1022.

**SOC:1119 Policy Matters: Perspectives on Contemporary Problems** 3 s.h.
Examination of major social issues and challenges faced by nation, state, and communities; what government's role is in a democratic society; how we decide when, where, and how government acts in ways consistent with social goals and values; focus on pressing social issues (i.e., education, inequality, labor standards, health care); historical development of the problem or policy; ways we address social issues; effectiveness of current policies and alternative policies; ways in which social science contributes to policy design and assessment. GE: Social Sciences. Same as HIST:1119.

**SOC:1310 Gender and Society** 3-4 s.h.
Role and status of women in society; sex differences, sex role socialization, theories about origin and maintenance of sexual inequalities, changes in social life cycle of women, implications for social institutions and processes; focus on contemporary United States. GE: Values, Society, and Diversity. Same as GWS:1310.

**SOC:1410 Introduction to Criminology** 3 s.h.
Nature and causes of crime; the criminal justice process, correctional treatment, crime prevention. GE: Social Sciences.

**SOC:1420 Law and Society** 3 s.h.
Exploration of how society shapes the law and how law shapes the society; definitions and conceptualizations of law; social origins of law; roots of compliance with or deviance from law; legal consciousness and uses of law in everyday life; effect of law on social inequality and distribution of power; law as a venue and a tool for social change.

**SOC:1447 Introduction to the Criminal Justice System** 3 s.h.
Organization and function of criminal justice system in the United States; history, organization, and current practices of policing, criminal courts, and correctional system; sociological and criminological research on major subsystems comprising criminal justice systems.

**SOC:1810 Poverty, Inequality, and Public Policy** 3 s.h.
Introduction to public policymaking; historical context of current public policy responses to poverty and inequality in the United States; measurement of poverty and inequality; various experiences of poverty and inequality; efficacy of policies addressing contemporary poverty and inequality.

**SOC:2064 Racial Inequity and the Experiences of African American Families in the U.S.** 3 s.h.
Racial inequality and experiences of African American families in the U.S. during 20th and 21st centuries; historical context for contemporary research on African American family; relative impact of structural and cultural factors on various aspects of African American family life, declining marriage rates, family formation patterns; intersections of race and class in family life; research methods used to examine dynamics of African American family life, including quantitative analysis, structured qualitative interviews, and ethnography. Same as AFAM:2064.
Theoretical perspectives in sociology; construction, evaluation of sociological explanations. Prerequisites: SOC:1010.

SOC:2160 Applied Statistics for Social Scientists

Applied statistics for sociology majors: frequency distributions, graphic presentation, measures of central tendency, measures of variability, elementary probability, populations and samples, sampling distributions, estimation and confidence intervals, hypothesis testing, chi-square test, regression and correlation, analysis of variance; computer software used in data analysis; emphasis on appropriate use and interpretation of statistics in the study of sociological topics. Prerequisites: SOC:1010. Requirements: sociology major.

SOC:2170 Research Methods

Basic scientific concepts; emphasis on theoretical thinking, statement of researchable propositions, logic and meaning of proof operant in the research process; general issues in designing social research, including problems of sampling and measurement, analysis, presenting research data, interpreting research findings. Prerequisites: SOC:1010. Requirements: sociology major; and MATH:1020 or STAT:1010 or a higher-level math or statistics course.

SOC:2220 Principles of Social Psychology

Introduction to a range of theories that seek to explain behavior of people within their groups, and dynamics between groups, at various levels of society. GE: Social Sciences.

SOC:2222 Introduction to Social Work

Social welfare as a social institution; settings, methodologies of social work, practice; profession of social work; historical development of American social welfare, social work; a minimum of 45 hours volunteer work. Requirements: sophomore or higher standing. Same as SSW:2222.

SOC:2235 Women, Crime, and Justice

Overview of women’s experiences with crime and criminal justice system, with reference to experiences of men for purposes of comparison; role of race, ethnicity, and poverty in women's experiences; causes of crime, inequalities in police-citizen interactions, imprisonment, and other aspects of criminal justice system experience. Same as GWSS:2235.

SOC:2426 Deviance and Control

Behaviors considered deviant or counter-normative by groups and societies; actions of those groups and societies to try to control such behaviors; behaviors that often do not violate laws, but are viewed and treated as wrong or immoral by others, including others in positions of power or authority; importance of recognizing what is viewed as deviant changes over time and varies across groups; explanations of deviance, society’s informal and formal responses (i.e., labeling and medicalization of deviance perspectives).

SOC:2430 Comparative Criminal Justice Systems

Criminal justice systems around the world; similarities and differences in how justice is defined and operationalized in contemporary legal traditions in terms of police, courts, and corrections examined in light of cultural norms and values; emphasis on link between societal characteristics and legal traditions; differences in defendant rights guaranteed under various legal traditions.

SOC:2750 Fertility and Reproduction

Exploration of when, why, how, and with whom Americans bear children, comparison to other developed and developing countries in the world; infertility and its treatments; ethics of surrogacy; voluntary childlessness; rapid rise of nonmarital childbearing in the U.S. and other countries; politics of childbirth; declining populations; rapid aging of rich where women have basically stopped having children. Same as GWSS:2750.

SOC:2810 Social Inequality

Major theoretical perspectives for understanding inequality in economics, power, prestige; the magnitude of social inequality in the United States; sex and race inequality; trends in and causes of social mobility; selected consequences of social inequality. GE: Values, Society, and Diversity.

Upper-Level Undergraduate and Graduate

SOC:3171 Drugs and Society

How people use drugs for recreation, performance enhancement, and medical treatment; implications for drug control, treatment, and public policy.

SOC:3200 International Perspectives: Xicotepec

Interdisciplinary service-learning course; Mexican culture and history through community-based service project, assigned readings, and discussion; includes a required spring break trip to Mexico. Same as CLAS:3200.

SOC:3220 Sociology of Mental Illness

The socially constructed nature of mental illness; theoretical perspectives and research on social antecedents and social consequences of mental health. Prerequisites: SOC:1010 or SOC:1020 or SOC:2220.

SOC:3225 Paranormal Society

Sociological perspectives to investigate paranormal beliefs; popular support of paranormal claims despite being rejected by the scientific community; examination of paranormal claims, validity and voracity of popular explanations through the application of scientific process; social psychological theories to understand and decipher society's historical and growing fascination with paranormal beliefs.

SOC:3415 Global Criminology

Crime and the control of crime at the transnational and sub-national levels of analysis; focus on non-U.S. societies; consequences of economic, political, and cultural globalization.
SOC:3416 Race, Crime, and Justice 3 s.h.
Extent and nature of racial disparities in offending and victimization; interpretation of patterns using various theoretical approaches; examination of race inequalities across many stages of criminal justice process.

SOC:3417 Community Corrections 3 s.h.
Community corrections; probation, parole, intermediate sanctions (boot camps, intensive supervision, electronic monitoring); contemporary issues in community supervision of offenders.

SOC:3420 Juvenile Delinquency 3 s.h.
Theories of juvenile delinquency; individual, neighborhood, and societal explanations of delinquency; research on families, schools, peers, neighborhoods, gangs, and delinquency.

SOC:3437 American Crime 3 s.h.
Prevailing issues in criminology; extent and nature of disparities in offending and victimization, interpretation of patterns using various theoretical approaches; evaluation of crime-control policies.

SOC:3450 Criminal Legal System 3 s.h.
Discretionary decision making in U.S. criminal courts from arrest through sentencing; legal and sociological issues relevant to each stage of felony adjudication; sociological and social-psychological theories of decision making in adjudication, empirical research testing these theories.

SOC:3510 Medical Sociology 3 s.h.
Theoretical perspectives and research on social precursors and consequences of physical and mental health ailments; focus on contemporary U.S. with crosscultural comparisons; stereotypes and diagnosis, gender and racial/ethnic differences, health inequalities related to socioeconomic status.

SOC:3520 Political Sociology 3 s.h.
Sociological analysis of political behavior and belief, group conflict and political process, group consensus, political institutions, power and policy-making systems; relationship of the political system to the social system. Prerequisites: SOC:1010.

SOC:3525 Public Opinion 3 s.h.
Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as POLI:3204.

SOC:3610 Organizations and Modern Society 3 s.h.
Approaches to the sociological study of economic and noneconomic organizations; the role of power and authority within the organization, and between the organization and its environment. Prerequisites: SOC:1010 or SOC:2220.

SOC:3650 Education, Schools, and Society 3 s.h.
Overview of sociology of education; historical and current sociological perspectives on education; race, class, and gender inequality in schooling; higher education; contemporary debates in education (e.g., affirmative action, school choice). Prerequisites: SOC:1010 or SOC:1020.

SOC:3710 The American Family 3 s.h.
Structure and process; change over the life cycle; interrelations with other institutions; historical changes; variations by social class and ethnic group. Prerequisites: SOC:1010. GE: Values, Society, and Diversity.

SOC:3830 Race and Ethnicity 3 s.h.
Multidisciplinary study of intergroup relations, with emphasis on historical, sociological, and social psychological issues in the study of American minority groups. GE: Values, Society, and Diversity.

SOC:3840 Community and Urban Sociology 3 s.h.
Impact of urbanization on social life, social networks; how social forces shape patterns of urban growth; racial segregation, gentrification; consequences of the growth of suburbs; urban crises, including concentrated poverty and crime. Prerequisites: SOC:1010 or SOC:1020.

SOC:3850 Economy and Society 3 s.h.
Economic debates that faced advanced market economies in the 20th century with extensions to the developing world; development and maintenance of investment elites and labor markets, development and extension of state activity.

SOC:3880 Introduction to Network Science 3 s.h.
Introduction to the basic properties of network structure (e.g., density, mutuality, cliques); substantive insights regarding the role and consequences of networks in social life; the role of networks in job searching/hiring processes; how innovations diffuse through networks; and relationships as social resources. Prerequisites: SOC:1010 or SOC:1020.

SOC:4210 Small Group Analysis 3 s.h.
Internal processes governing small groups (e.g., friendship cliques, families, the president's cabinet, committees); how small groups relate to the larger social environment; groups' impact on their members. Prerequisites: SOC:1010 or SOC:1020.

SOC:4225 The Social Psychology of Leadership 3 s.h.
Techniques, proven by research, that enhance students' ability to know, work with, and lead people; recent research in social psychology, how it applies to practical leadership problems.

SOC:4230 Sociology of Self-Improvement 3 s.h.
How self-improvement as a cultural goal shaped development of political, business, educational, and religious institutions in the United States; history of self-improvement movement and industry; selected readings that show how much self-improvement is possible and which techniques are more useful than others.
SOC:4400 Internship in Criminal Justice and Corrections
Supervised field work in a criminal justice or correctional agency. Prerequisites: SOC:1410 or SOC:3420 or SOC:3450 or SOC:4420 or SOC:4430 or SOC:4450 or SOC:4460. Requirements: sociology major, junior standing, and consent of director of the Center for Criminology and Socio-Legal Studies.
SOC:4420 Criminal Punishment
Sociological theories and research on criminal punishment; classical and contemporary theories; research on imprisonment and capital punishment.
SOC:4430 Interpersonal Violence in Society
Extent and nature of interpersonal violence in societies, in general and for specific population subgroups; theoretical explanations for the phenomenon; alternative ways of defining and responding to violence across various social contexts; application of scientific method; relevant literatures from multiple disciplines including sociology, anthropology, criminology, psychology, and behavioral economics; types of violence defined as illegal and those which are deviant but not illegal. Prerequisites: SOC:1410. Recommendations: SOC:2170 strongly recommended before enrollment in SOC:1410.
SOC:4440 Sociology of White-Collar Crime
Critical perspectives on causes and consequences of white-collar crime; definitions and types; criminological, social-psychological, and rational-choice theories; political and economic causes of white-collar crime under capitalism and socialism; rates and patterns of white-collar criminality across different social groups (defined by racial, ethnic, class, and gender attributes); control, prevention, and criminal justice response.
SOC:4450 Juvenile Justice: A Sociolegal Perspective
Examination of social, historical, and legal foundations of juvenile justice system in the United States; adjudication processes in juvenile justice, transfer of juveniles to criminal court, contemporary juvenile court, community-based corrections programs, legalities of juvenile system; current and future directions in juvenile justice.
SOC:4460 Sociology of Law
Conceptual, historical, and theoretical issues of law and operation of the criminal justice system; theory and research on law and the criminal justice system.
SOC:4461 Gender and Violence
Extent and nature of gendered violence, interpretation of patterns using feminist theory and perspectives on masculinities and heterosexism; examination of interpersonal violence, including criminal violence committed by women and men, violence against women and men (victimization), spousal/intimate partner abuse, youth gangs, bullying in schools, sexual violence, femicide, and genocide. Same as GWSS:4461.
SOC:4540 Political Sociology and Social Movements
Social unrest; crowd behavior; social movements treated as a form of social change. Prerequisites: SOC:1010 or SOC:1020.
SOC:4820 Sociology of Sexuality
Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisites: SOC:1010 or SOC:1020. Same as GWSS:4820.
SOC:4900 Selected Topics in Sociology
Topics vary.
SOC:4901 Selected Topics in Criminology, Law and Justice
Varied topics in criminology, criminal legal system, gender and violence, global criminology.
SOC:4902 Selected Topics in Family, Health, and Well-Being
Varied topics in family structures and practices; social institutions and forces that shape or are shaped by families.
SOC:4903 Selected Topics in Organizations, Networks, and Careers
Varied topics in macro- and micro-level processes affecting ability to understand and manage organizations, including the groups and individuals that compose them.
SOC:4909 Graduation Portfolio
Submission of final graduation portfolio first assembled in capstone course required for sociology major. Corequisites: SOC:4910.
SOC:4910 Capstone Course in Sociology
Senior project illustrating student's accomplishments during his or her undergraduate career; prepared in collaboration with sociology faculty member or other experts in the student's area of sociological interest; record for student's own reflection, information for potential employers and graduate programs. Requirements: major g.p.a. of 2.00.
SOC:4920 Social Services Organization Internship
Student volunteer work with social services organizations; 48 hours of volunteer work for each semester hour of credit; final paper. Requirements: sociology major.
SOC:4930 Teaching Internship
Experience providing supervised support for instructors teaching basic courses in sociology. Requirements: appointment as sociology undergraduate teaching aide.
SOC:4990 Directed Individual Study
Topic development for senior honors projects. Offered spring semesters. Requirements: sociology honors standing.
SOC:4998 Honors Research
Research projects under faculty supervision.
Graduate

SOC:5000 Scholarly Professionalism and Integrity 2 s.h.
General introduction to department and discipline for entering graduate students; departmental and graduate college requirements, program and career planning, interaction with faculty members, consideration of student interests and concerns. Two semesters beginning in fall. Requirements: sociology graduate standing.

SOC:5110 History of Sociological Theory 3 s.h.
Ideas of major 19th- and 20th-century social thinkers (e.g., Marx, Weber, Durkheim, Simmel, Mead).

SOC:5130 Sociology of Education 3 s.h.
Effects of school and school organization on educational outcomes; course-taking patterns and tracking, desegregation, differences in school sector; focus on entire span of student's academic career; examination of school and organizational effects at the primary, secondary, and postsecondary levels of education. Same as EPLS:5130.

SOC:5160 Research Design and Methods 3 s.h.
Research designs; sampling designs and techniques; questionnaire construction, interviewing techniques; participant and nonparticipant observation; coding and preparation of data for analysis; measurement techniques, reliability, and validity. Requirements: SOC:6170 or graduate standing.

SOC:5165 Race, Class, and Gender Inequalities in Education 3 s.h.
Role of ascribed characteristics (e.g., race, class, gender) on educational opportunities and outcomes; achievement gaps, school desegregation, social and cultural capital, peer influence, family attributes, neighborhood influence, influence of significant others, course-taking patterns, and educational destinations. Same as EPLS:5131.

SOC:5310 Gender Theory 3 s.h.
Introduction to sociological analysis of gender; multiple ways that gender patterns the social world in which we live; predominant theoretical stances related to study of gender; how gender structures everyday social interaction; how social institutions (e.g., work, family) give rise to and recreate gendered meanings, expectations, structures; possibilities for interventions and change to gender system.

SOC:5680 Sociology of Higher Education 3 s.h.
Sociological approach to study of higher education; issues of inequality and stratification in higher education; focus on relationship between higher education and larger economic and demographic processes; college access, college destinations, attainment, and returns to a college degree. Same as EPLS:5142.

SOC:5810 Education and Social Change 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as EPLS:5210.

SOC:6110 Theory Construction and Analysis 3 s.h.
Contemporary theoretical issues and nature of theory, theory's place in research, strategies of theory construction. Requirements: sociology graduate standing.

SOC:6140 Seminar: Selected Topics in Sociological Theory 3 s.h.

SOC:6170 Introduction to Sociological Data Analysis 3 s.h.
Statistical measures for descriptive methods and association; logic of statistical inference, hypothesis testing; background essential to understanding linear models, models for categorical data analysis. Requirements: introductory statistics.

SOC:6175 Qualitative Methods 3 s.h.
Logic of qualitative research; basic skills necessary for a qualitative research project. Requirements: sociology graduate standing.

SOC:6180 Linear Models in Sociological Research 3 s.h.
Statistical techniques associated with general linear model; emphasis on multiple regression, its generalizations; corresponding computer programs. Requirements: SOC:6170 or graduate standing.

SOC:6210 Contemporary Approaches to Social Psychology 3 s.h.
Review and critical analysis of current theoretical approaches and systems of social psychological analysis. Recommendations: sociology graduate standing.

SOC:6220 Seminar: Selected Topics in Social Psychology 3 s.h.
Selected theoretical and methodological issues.

SOC:6264 Post-Industrial Cities 3 s.h.
Aspects of urban inequality in post-industrial cities; racial inequality, urban poverty, neighborhood inequality, and municipal bankruptcy.

SOC:6310 Gender Stratification Seminar 3 s.h.
Occupational gender segregation; gender gap in pay; role of family caregiving in women's lower pay; evaluation of caregiving work; comparable work.

SOC:6410 Seminar: Criminological Theories 3 s.h.
Theories of crime causation and their relationships to the cultures in which they have functioned.

SOC:6420 Seminar: Selected Topics in Deviance and Control 3 s.h.
Critical analysis of current research; emphasis on theoretical contributions and methodological foundations.

SOC:6610 Complex Organizations 3 s.h.
Classical and contemporary theories; current research on the causes and magnitude of inequality in economics, power, and prestige; social mobility; critical issues in stratification.
SOC:6850 Seminar: Sociology of Labor Markets  3 s.h.
Sociological and economic theories and research concerning area/regional/local labor markets, industrial sectors and the dual labor market, occupational/internal labor markets; other structural explanations of inequality.

SOC:7170 Advanced Statistical Modeling of Data  3 s.h.
Models for analysis of categorical data, including loglinear, logit, related discrete data models. Requirements: advanced graduate standing.

SOC:7180 Structural Equation Modeling  3 s.h.
Overview of structural equation models (SEMs), also known as LISREL models, covariance structure models; specific types of SEMs, such as simultaneous equations and confirmatory factor analysis; intermediate topics.

SOC:7410 Communities and Crime  3 s.h.
Distribution of crime as rooted in community-level conditions such as concentrated affluence or poverty, racial residential segregation, unemployment, family disruption, and immigration. Requirements: sociology graduate standing.

SOC:7460 Sociology of Law Seminar  3 s.h.
Relationship between law and society explored through writings and research of classical and contemporary sociologists and legal scholars. Requirements: sociology graduate standing.

SOC:7620 Social Network Analysis  3 s.h.
Relational, data-oriented approach to representing linkages or relationships among social units, and to examine the relevance of these social structures in social processes. Requirements: basic multiple regression.

SOC:7820 Seminar: Selected Topics in Social Stratification  3 s.h.
Requirements: social science graduate standing.

SOC:7860 Seminar: Economy and Society  3 s.h.
Relationships between social classes and nation-states in capitalist societies; historical experience of the United States; comparative perspective, especially regarding Western Europe.

Teaching
SOC:7010 Teaching Sociology  2-3 s.h.
Supervised preparation for teaching sociology courses; literature on teaching; course objectives, alternative teaching techniques; preparation of course syllabus, lectures, discussions, exams. Requirements: advanced sociology graduate standing.

Independent Reading and Research
SOC:6080 Master's Thesis  arr.
SOC:7030 Readings and Research Tutorial  arr.
SOC:7090 Ph.D. Dissertation  arr.
Spanish and Portuguese

Director, Division of World Languages, Literatures, and Cultures
• Russell Ganin
Chair, Department of Spanish and Portuguese
• Mercedes Niño-Murcia

Undergraduate majors: Spanish (B.A.); Portuguese (B.A.)
Undergraduate minors: Spanish; Portuguese
Graduate degrees: M.A. in Spanish; M.F.A. in Spanish creative writing; Ph.D. in Spanish
Faculty: http://clas.uiowa.edu/dwllc/spanish-portuguese/people/faculty
Web site: http://clas.uiowa.edu/dwllc/spanish-portuguese

The Department of Spanish and Portuguese offers undergraduate majors and minors, graduate degree programs, and course work for students in other disciplines. The department provides a wide selection of courses in Spanish and Portuguese, languages that are spoken in many cultures around the world and are important in the study of literature, art, film, and many other areas. Spanish and Portuguese language courses are open to any student who has satisfied the course prerequisites.

In addition to language courses, the department offers general interest courses on literature, film, and culture that are taught in English. It also participates in several study abroad programs.

Undergraduate students in all majors may satisfy the World Languages requirement of the General Education Program (p. 313) with courses in Spanish or Portuguese; see “Language for General Education” below. The department also offers other courses that are approved for General Education and are taught in English and a First-Year Seminar designed for entering undergraduates.

The Department of Spanish and Portuguese is one of the academic units in the Division of World Languages, Literatures, and Cultures (p. 228).

Undergraduate Programs of Study
• Major in Spanish (Bachelor of Arts)
• Major in Portuguese (Bachelor of Arts)
• Minor in Spanish
• Minor in Portuguese

Elementary and intermediate courses in Spanish language interrelate five performance goals—listening, reading, speaking, writing, and cultural knowledge—in a staged progression whose overall goal is to develop proficiency. The curriculum emphasizes acquisition of Spanish language skills in communicative contexts, enrichment of vocabulary through an introduction to Hispanic culture, and development of grammatical accuracy in speaking and writing.

The beginning course in Portuguese is for students without previous study or experience with the language. There also is a special Portuguese course for students who already know Spanish. Portuguese classes provide a great deal of individual attention in an informal language-learning environment. Courses emphasize speaking, comprehending, reading, and writing Brazilian Portuguese. They incorporate cultural material in the form of videos and music.

Bachelor of Arts: Spanish

The Bachelor of Arts with a major in Spanish requires a minimum of 120 s.h., including 36 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The major is built on course work in Spanish peninsular and Spanish American literature, Hispanic cultures, Hispanic linguistics, and advanced language skills. The goal of the major is twofold: to study content areas related to the Spanish language, such as literature, culture, and linguistics; and to develop proficiency in the Spanish language in all four skills—speaking, listening, reading, and writing.

Students who major in Spanish may go on to graduate study in areas such as Spanish and Spanish American literature, Hispanic linguistics, or comparative literature. They also may combine their Spanish studies with other areas to prepare for career opportunities in international business, government, travel, journalism, or communication, where knowledge of another language and other cultures is essential.

Course work for the major includes a core, which consists of one course from each of the four principal academic areas of the department (see “Required Core” below), and eight electives, which may focus on one or more of the four principal areas or may include a broad range of courses (see “Electives” below).

All courses taken for the Spanish major must be numbered SPAN:2000 or above. A minimum of one and a maximum of four courses for the major must be numbered SPAN:2000-2999. At least three courses for the major must be numbered SPAN:4000-4999. Students may count a maximum of 6 s.h. earned in courses offered by other University of Iowa departments toward the Spanish major; see “Electives” below for guidelines. A maximum of 15 s.h. of approved transfer credit may be counted toward the major.

Advanced undergraduates preparing to earn a B.A. with honors may enroll in graduate courses with the permission of their advisor and the department chair. Ordinarily, permission is granted only to students who have completed a minimum of 30 s.h. of work for the major and whose g.p.a. in the major is 3.75 or higher.

The major in Spanish requires the following course work.

REQUIRED CORE

One course in Hispanic linguistics chosen from these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN:3100</td>
<td>Structures of Spanish: Words and Sentences</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SPAN:3110</td>
<td>Spanish Sound Structure</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SPAN:3120</td>
<td>Foundations in Sociolinguistics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SPAN:3130</td>
<td>Introduction to Bilingualism</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SPAN:3150</td>
<td>Spanish Applied Linguistics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>SPAN:3170</td>
<td>Introduction to Spanish Language</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
One course in culture (peninsular or Spanish American) chosen from these:

- SPAN:2200 Introduction to Spanish American Cultures 3 s.h.
- SPAN:2800 Screening Latin America 3 s.h.
- SPAN:2900 Music of the Hispanic World 3 s.h.
- SPAN:3200 Cultures of Spanish America 3 s.h.
- SPAN:3220 Visual Culture: Colonial Spanish America 3 s.h.
- SPAN:3230 Modern Mexico 3 s.h.
- SPAN:3290 Topics in Cinema and Society 3 s.h.
- SPAN:3400 Chicano Literature and Culture 3 s.h.
- SPAN:3450 Topics in Culture of the Hispanic World 3 s.h.
- SPAN:3520 Introduction to Film Studies 3 s.h.
- SPAN:3550 Doing Business in the Spanish-Speaking World 3 s.h.
- SPAN:3600 Cultures of Spain 3 s.h.
- SPAN:3610 Hispanic Institute: Culture 3 s.h.
- SPAN:3620 Madrid 3 s.h.
- SPAN:3630 Spanish Youth Culture 3 s.h.
- SPAN:4820 Latino/a Popular Culture 3 s.h.
- SPAN:4830 The Hispanic World in the Digital Era 3 s.h.
- SPAN:4850 Topics in Cultural Studies 3 s.h.
- SPAN:4860 The Spanish Civil War 3 s.h.
- SPAN:4870 Islamic Cultural Presence in Spain 3 s.h.
- SPAN:4880 Comic Books and Graphic Novels in the Hispanic World 3 s.h.
- SPAN:4920 Topics in Film Studies 3 s.h.

One course in writing chosen from these:

- SPAN:2000 Spanish Language Skills: Writing 3 s.h.
- SPAN:2005 Writing Global Spanish 3 s.h.
- SPAN:3000 Writing Skills for Heritage Speakers 3 s.h.
- SPAN:3020 Journalistic Writing in Spanish 3 s.h.
- SPAN:3060 Introductory Workshop on Creative Writing in Spanish 3 s.h.

ELECTIVES

Seven elective courses in Spanish numbered 2000 or above 21 s.h.

Students choose elective course work according to the following guidelines.

Electives may include course work in Spanish language skills as well as more advanced language courses that focus on specialized language functions and purposes. They also may include a maximum of 6 s.h. earned in Portuguese courses numbered PORT:2500 or above or in related courses at the appropriate level offered by other University of Iowa departments and programs, such as history, anthropology, comparative literature, international studies, or linguistics. Related courses must be approved by the director of undergraduate studies; for a list of approved related courses, contact the Department of Spanish and Portuguese.

The following Spanish and Portuguese courses do not count toward the major and may not be used as elective credit: SPAN:3095 Spanish Composition and Grammar, SPAN:4095 Advanced Spanish Grammar, and PORT:2000 Accelerated Elementary Portuguese. A maximum of 3 s.h. earned in PORT:2500 Accelerated Intermediate Portuguese may be counted toward the major.

Bachelor of Arts: Portuguese

The Bachelor of Arts with a major in Portuguese requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for
the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313). Portuguese is spoken in Portugal, Brazil, Angola, Mozambique, Cape Verde, and Guine-Bissau. There are more speakers of Portuguese in South America than there are of Spanish. Knowledge of Portuguese and of Luso-Brazilian culture is extremely helpful for students interested in career opportunities in international business, government, or related fields.

All courses for the major in Portuguese must be numbered PORT:3100 or above. Students must complete the courses listed under “Prerequisites” below, or their equivalents, before they may begin fulfilling requirements for the major.

The major in Portuguese requires the following courses or their equivalents. Courses listed under “Prerequisites” do not count toward the 30 s.h. of work for the major.

### PREREQUISITES TO COURSE WORK FOR THE MAJOR

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Portuguese courses numbered above PORT:3050</td>
<td>15 s.h.</td>
</tr>
</tbody>
</table>

A maximum of 6 s.h. may be taken in approved courses in related areas (e.g., art, anthropology, comparative literature, geography, history, Latin American studies, linguistics, sociology, Spanish).

### B.A. with Teacher Licensure

Spanish majors interested in earning licensure to teach at the elementary and/or secondary level must complete the College of Education’s Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Students who plan to use a major in Portuguese or their work toward a minor in Spanish or in Portuguese as academic background for earning teacher licensure should contact the Office of Education Services about requirements.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan.

(Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

#### B.A.: Spanish

**Before the third semester begins:** Intermediate Spanish I (or equivalent second-year, first-semester competence in Spanish)

**Before the fifth semester begins:** two courses in Spanish beyond Intermediate Spanish II (or equivalent second-year, second-semester competence)

**Before the seventh semester begins:** four more courses in the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

#### B.A.: Portuguese

**Before the third semester begins:** competence in first-year Portuguese

**Before the fifth semester begins:** competence in intermediate Portuguese

**Before the seventh semester begins:** three or four additional courses for the major and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** seven courses in the major

**During the eighth semester:** enrollment in remaining major course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Honors in the Major

Students majoring in Spanish or in Portuguese have the opportunity to graduate with honors in their major. Students must have a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in their major in order to enter the departmental honors program.

To graduate with honors in the Spanish major, students must request honors designation for one course they take for the major (3 s.h.), in consultation with the department honors advisor. They also must register for 3 s.h. in SPAN:4998 Honors: Research and Thesis. To complete SPAN:4998 successfully, students must submit an honors thesis they have written in Spanish and must present it orally to a faculty committee in a meeting conducted in Spanish.

To graduate with honors in the Portuguese major, students must earn 3 s.h. in PORT:4999 Honors Research and Thesis plus 3 s.h. in a course chosen in consultation with the department honors advisor. Both courses (6 s.h.) count toward the total 30 s.h. required for the major in Portuguese. Students also must write an honors thesis and present it orally to a committee of three faculty members.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of
Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

**Minor: Spanish**

The minor in Spanish requires a minimum of 18 s.h. in Spanish courses, including at least 15 s.h. in University of Iowa Spanish courses numbered 2000 or above; UI study abroad programs may count toward the minor. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

The minor must include a minimum of 3 s.h. earned in course work on Spanish or Spanish American literature or culture, or Hispanic linguistics. One University of Iowa Spanish course taught in English may be counted toward the minor (see list below); remaining courses for the minor must be taught in Spanish, including study abroad courses. Students may not count SPAN:3095 Spanish Composition and Grammar or SPAN:4095 Advanced Spanish Grammar toward the Spanish minor.

The following Spanish courses are taught in English. Students may count a maximum of one of them toward the minor in Spanish.

- SPAN:2050 Spanish in the U.S. 3 s.h.
- SPAN:2280 Introduction to Latina/o Studies 3 s.h.
- SPAN:2700 Introduction to Latin American Studies 3 s.h.
- SPAN:3190 Psycholinguistic Aspects of Bilingualism 3-4 s.h.
- SPAN:3270 Pan-Caribbean Literary Currents 3 s.h.
- SPAN:3420 Cuban American Literature and Culture 3 s.h.
- SPAN:3440 Topics in Latino/a Literature and Culture 3 s.h.
- SPAN:4800 Chicano Cinema 3 s.h.
- SPAN:4810 Topics in Latin American Cinema 3 s.h.
- SPAN:4900 Latin American Studies Seminar 3 s.h.

**Minor: Portuguese**

The minor in Portuguese requires a minimum of 15 s.h. in Portuguese courses, including 12 s.h. in University of Iowa courses numbered PORT:3100 Composition and Conversation or above; credit earned in a University of Iowa study abroad program also may be counted toward the minor. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

The Department of Spanish and Portuguese offers course sequences that students in all majors may use to satisfy the World Languages requirement of the College of Liberal Arts and Sciences General Education Program (p. 313).

Students who have previous course work or other experience with Spanish should take the online World Languages Placement Test, which helps determine the level at which a student should begin Spanish language study at the University of Iowa. Students should take the test before they register for their first University of Iowa Spanish course. Students with experience in Portuguese may receive individual evaluations from the department.

**Related Certificates**

**International Business**

The College of Liberal Arts and Sciences and the Tippie College of Business offer the Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a language; and the art, literature, culture, and/or politics of a geographic area. For detailed information about the certificate see International Business (p. 408) in the Catalog.

**Latin American Studies**

The department plays an important role in the Latin American Studies Program, which focuses on the history, politics, social organization, economy, art, music, religion, and literature of Latin America. See Latin American Studies (p. 446) in the Catalog for detailed information about the program's undergraduate certificate and minor.

**Study Abroad**

**SPANISH**

The department participates in study abroad programs in Spain and Latin America; most of these programs offer both summer and semester or yearlong programs. The programs in Spain include the Board of Regents Hispanic Institute program in Valladolid (summer only); USAC (University Studies Abroad Consortium) programs in Alicante, Bilbao, Madrid, and San Sebastián; and CIEE
programs in Alcalá de Henares, Alicante, Barcelona, Madrid, Palma de Mallorca, and Seville.

The programs in Latin America include USAC programs in Chile (Santiago) and Costa Rica (Heredia, Puntarenas, and San Ramón); CIEE programs in Argentina (Buenos Aires), Chile (Santiago and Valparaiso), Dominican Republic (Santo Domingo), Mexico (Guadalajara), and Peru (Lima). They also include the CIC Latin America Health, Nutrition, and Environmental Issues Program in Santiago, Dominican Republic. For information on other foreign study programs in Spanish, contact International Programs Study Abroad.

Participation in a number of different programs allows the department to offer study abroad opportunities that take into account a variety of student interests and needs. Credit earned in these or other study abroad programs may be applied toward the requirements for the Spanish major or minor. The amount of credit that may be accepted varies according to the program.

Interested students should contact the department's study abroad advisor. Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 15 s.h. maximum allowed for the major and the 3 s.h. maximum allowed for the minor.

PORTUGUESE
The department offers a seven-week program in Salvador, Bahia, Brazil that includes courses in Portuguese language, culture, and literature. Contact International Programs Study Abroad for details.

Graduate Programs of Study

- Master of Arts in Spanish
- Master of Fine Arts in Spanish creative writing
- Doctor of Philosophy in Spanish

Master of Arts

The Master of Arts program in Spanish requires 30 s.h. of graduate credit. Students choose one of two emphases: literature, which provides training in literary analysis and broad knowledge of representative works in principal areas of Hispanic literature; or linguistics, which provides training in linguistic analysis and argumentation and broad knowledge of the principal subfields of Hispanic linguistics. Applicants to the M.A. program should have completed the equivalent of the undergraduate Spanish major with a g.p.a. of at least 3.00 in course work for the major.

A maximum of 9 s.h. of graduate credit in approved courses may be transferred from other institutions toward the 30 s.h. required for the M.A.

The M.A. requires the following 10 courses.

LITERATURE EMPHASIS COURSES

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN:6000</td>
<td>Foreign Language Teaching Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>WLLC:5000</td>
<td>Teaching and Learning Languages</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>One course in Spanish linguistics numbered SPAN:4000 or above</td>
<td></td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Two courses in Spanish (peninsular) literature numbered SPAN:4000 or above | 6 s.h. |
Two courses in Spanish American literature numbered SPAN:0000 or above | 6 s.h. |
One course in literary theory | 3 s.h. |
Three electives | 9 s.h. |

At least eight of the ten literature emphasis courses must be taken in Department of Spanish and Portuguese courses numbered 5000 or above. The remaining two may be taken either in the Department of Spanish and Portuguese courses numbered 4000 or above or in courses offered by related departments, subject to approval by the director of graduate studies.

LINGUISTICS EMPHASIS COURSES

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN:6000</td>
<td>Foreign Language Teaching Methods</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>WLLC:5000</td>
<td>Teaching and Learning Languages</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>One course in Spanish or Spanish American literature numbered SPAN:4000 or above</td>
<td></td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>
Two courses in syntax | 6 s.h. |
Two courses in phonetics/phonology | 6 s.h. |
One course in history of the Spanish language or language variation | 3 s.h. |
One course in applied linguistics or language acquisition | 3 s.h. |
Two electives | 6 s.h. |

At least six of the ten linguistics emphasis courses must be taken in Department of Spanish and Portuguese courses numbered 5000 or above. The remaining four may be taken in Department of Spanish and Portuguese courses numbered 4000 or above or in Department of Linguistics courses.

LANGUAGE TOOL REQUIREMENT

M.A. students must complete the equivalent of one year of college-level study of any approved second foreign language; Portuguese is highly recommended. They may satisfy this requirement either by examination or through courses taken at the University of Iowa or another accredited university; such course work does not count toward the 30 s.h. required for the M.A.

EXAMINATIONS

The M.A. comprehensive examination includes written and oral components. The written portion consists of a two-hour examination in each of three areas; an oral examination follows, usually lasting 90 minutes. The examining committee is composed of four departmental faculty members.

Students in the literature emphasis may choose to be examined in three literature areas or in two literature areas and one linguistics area. At least one literature area must be in Spanish literature and at least one must be in Spanish American literature. If three literature areas are chosen, at least one must represent literature written before 1700 (peninsular or Spanish American).

Students in the linguistics emphasis may choose to be examined in three linguistics areas or in two linguistics areas and one literature area. At least one of the
linguistics areas must be in syntax or phonology. For students in both emphases, the third examination area may be a film area.

For reading lists, contact the Department of Spanish and Portuguese.

Master of Fine Arts

The Master of Fine Arts in Spanish creative writing requires 48 s.h. of graduate credit earned over four semesters in residence at the University of Iowa. Students complete courses in writing, including several workshops, and other relevant course work. They also are required to participate in several outreach workshops in the community and to do a final public reading in the spring semester of their second year. Work toward the degree culminates in a creative thesis.

Students must enroll in SPAN:6210 Fiction Workshop, SPAN:6220 Poetry Workshop, and SPAN:6241 Creative Project Development during each year of residence in the program. Groups of 8-12 students read and critique each other's work in these courses.

Students must take one workshop course chosen from these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN:6235 Film Script/Theater Workshop</td>
<td>3</td>
</tr>
<tr>
<td>SPAN:6280 Nonfiction Workshop</td>
<td>3</td>
</tr>
</tbody>
</table>

All of these:

Four graduate-level courses offered by the Department of Spanish and Portuguese
Four additional courses offered by the Department of Spanish and Portuguese, Center for the Book, Creative Writing Program (Iowa Writers' Workshop), Comparative Literature Program, or International Writing Program

THESIS

Students submit their graduate thesis, a manuscript of substantial length, during their last semester and must enroll in SPAN:6299 Thesis: Creative Writing. The thesis committee is composed of at least three members: two faculty members in the Spanish creative writing program and a third Department of Spanish and Portuguese faculty member who is not part of the creative writing program, or a faculty member from one of the related units—Center for the Book, the Creative Writing Program (Iowa Writers’ Workshop), the Comparative Literature Program, or the International Writing Program.

Doctor of Philosophy

The Doctor of Philosophy program in Spanish requires a total of at least 72 s.h. of graduate credit. Ph.D. students choose from two programs; one is dedicated to Hispanic literatures, the other to Hispanic linguistics. The literature program trains students in textual analysis and literary history, criticism, and theory. The linguistics program provides training in linguistic analysis and theory.

The literature program requires a minimum of 66 s.h. of course work (22 courses), of which 30 s.h. may have been earned for an M.A. in Spanish at the University of Iowa or at another institution, as approved by the director of graduate studies.

The linguistics program requires a minimum of 57 s.h. of course work (19 courses), of which 30 s.h. may have been earned for an M.A. in Spanish at the University of Iowa or at another institution, as approved by the director of graduate studies.

Both programs also require 6 s.h. earned in SPAN:6999 Thesis, to complete the 72 s.h. required for the Ph.D.

Course requirements for each program are as follows.

LITERATURE TRACK: COURSES

Students must complete at least 36 s.h. (12 courses) beyond the master's degree (or 22 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN:6999 Thesis</td>
<td>3-15</td>
</tr>
<tr>
<td>Two courses in literary theory</td>
<td>6</td>
</tr>
<tr>
<td>Three courses in Spanish literature, at least one of which must be pre-1700 literature</td>
<td>9</td>
</tr>
<tr>
<td>Three courses in Spanish American literature</td>
<td></td>
</tr>
<tr>
<td>One course in cinema</td>
<td>3</td>
</tr>
<tr>
<td>Two 7000-level seminars in literary studies</td>
<td>6</td>
</tr>
<tr>
<td>One literature course in another Romance language (see “Language and Literature Tool Requirements”)</td>
<td>3</td>
</tr>
</tbody>
</table>

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student's advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be numbered 6000 or above, except the Romance literature course taken for the language tool requirement.

LITERATURE TRACK: LANGUAGE AND LITERATURE TOOL REQUIREMENTS

Before the comprehensive examination, students must complete the equivalent of three years of college-level study in another Romance language and become well acquainted with its literature in limited areas of specialization; the study of Luso-Brazilian literature is highly recommended. This requirement may be satisfied only through course work at the University of Iowa or another accredited university.

Students also must complete the equivalent of one year of college-level study of another approved foreign language. Students who do not fulfill the Romance language requirement with Portuguese must use it to satisfy this requirement. Students who will write dissertations on topics in Spanish or Portuguese literature before 1700 are strongly encouraged to select Latin, Arabic, or an Amerindian language to satisfy this requirement; students should consult specialists in their field to determine which language is most appropriate. Students may take more than two languages, earning more than the 72 s.h. required for the degree, if their literary course work permits.

Students may satisfy the language tool requirement by examination or by course work at the University of Iowa or at another accredited university; language tool course work does not count toward the 72 s.h. required for the degree. Courses taken to fulfill the language tool requirements may be taken pass/nonpass. If the language tool requirements are satisfied by examination, the exam results must be documented in the student's file. Courses
taken to fulfill the second Romance literature requirement must be taken for grades and may be counted toward the degree.

**LINGUISTICS TRACK: COURSES**

Students must earn at least 27 s.h. (9 courses) beyond the master's degree (or 19 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

<table>

One additional course in the dissertation research area

One course in historical linguistics, sociolinguistics/language variation, or language acquisition/psycholinguistics

One Hispanic linguistics seminar numbered 7000 or above

The additional course in the dissertation research area (phonology, syntax, language acquisition, language variation) must be offered by the Department of Spanish and Portuguese or the Department of Linguistics.

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student's advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be numbered 6000 or above, except for some courses offered by the Department of Linguistics and the required third-year-level course in Portuguese (see "Linguistics Track: Language Tool and Additional Requirements" below).

**LINGUISTICS TRACK: LANGUAGE TOOL AND ADDITIONAL REQUIREMENTS**

Students in the linguistics track must complete the equivalent of three years of college-level study of Portuguese, and the equivalent of one year of college-level study of each of two other languages. For students specializing in historical linguistics, one of those two languages must be Latin.

Students may satisfy the language tool requirement by examination or by course work at the University of Iowa or at another accredited university. Courses taken to fulfill the language tool requirements may be taken pass/nonpass. If the language tool requirements are satisfied by examination, the exam results must be documented in the student's file. The language tool course work does not count toward the 57 s.h. of prethesis course work required for the degree, except the third-year-level course work in Portuguese, which may be counted with the faculty advisor's approval if the student took it for a grade.

Students in the linguistics track also must write two extended research papers and give two colloquium presentations based on these papers. The first paper must be in an area distinct from the intended dissertation research; it must be approved by the student's advisory committee by the end of fall semester of the second year of Ph.D. course work in order for the student to continue in the program. The second paper must be in the dissertation research area, must be of publishable quality, and must be approved by the student's advisory committee no later than the beginning of the semester in which the student takes the comprehensive exam.

**COMPREHENSIVE EXAMINATION**

The purpose of the Ph.D. comprehensive examination is to determine whether the student has gained sufficient breadth and depth of research knowledge in Hispanic literatures or linguistics to enter the profession as a teacher-scholar. The examining committee is composed of five departmental faculty members or four departmental faculty members and a fifth faculty member from a related department.

**Literature Track**

The literature track's comprehensive exam has written and oral components.

The written component includes four elements: two broad areas, one specialized area, and one article. Each element is supervised by a different committee member.

The two broad areas comprise lists of approximately 40 readings, with each list covering an established historical period that is tied to the student's Ph.D. course work (one Peninsular, the other Spanish American). The lists must be approved by the supervisor before distribution to the rest of the committee. Each area is evaluated with a three-hour written exam, which is discussed during the student's oral exam.

The special area's reading list includes 25-40 secondary works that define the area and are related to the dissertation. The area is examined via a 15-20 page position paper, which is a critical synthesis of the secondary readings and normally becomes part of the dissertation introduction. The list and the paper must be written in consultation with a faculty supervisor and must be approved by the supervisor at least one month before the oral exam.

The article is a 20-25 page research essay, usually a revised version of a paper written for one of the two required seminars numbered 7000 or above. The article should be written in consultation with the professor who taught the seminar and with a faculty supervisor; if the professor who taught the course also supervises the area, the student must consult with at least one more professor. The article must be approved by the supervisor at least one month before the oral exam.

The oral exam lasts two hours, with approximately half devoted to the two broad areas and half to the article and the position paper.

**Linguistics Track**

The comprehensive exam for the linguistics track includes written and oral components. The written component comprises two weekend take-home exams consisting of linguistic analysis in two subdisciplines distinct from the subdiscipline of the intended dissertation research. The two-hour oral exam consists of one hour devoted to discussion of the second research paper and the other hour devoted to follow-up questions on the written exams.
DISSERTATION

After the Ph.D. comprehensive examination is completed, the candidate submits a dissertation prospectus for the dissertation committee's approval. The dissertation committee is composed of five faculty members; at least four committee members must be from the Department of Spanish and Portuguese.

All doctoral dissertations must be submitted to the Graduate College in electronic format.

The dissertation, complete and in final form, must be submitted in the required electronic format at the Graduate College office by the first-deposit deadline date of the session in which the degree is to be conferred. The final deposit of the approved dissertation in electronic format must be deposited at the office by the appropriate deadline in the student's graduation semester.

Students must adhere to the Graduate College regulations regarding preparation of the dissertation copy; consult the Graduate College. For information on the dissertation and final examinations, see the Manual of Rules and Regulations of the Graduate College.

Graduate Study Loads

Maximum course registration for all graduate students is 15 s.h. of graduate-level course work in fall or spring semesters and 12 s.h. of graduate-level work in summer sessions. Students with one-quarter-time and one-third-time teaching assistantships are permitted to register for the maximum study loads. Students who hold one-half-time assistantships are permitted to register for a maximum of 12 s.h. in fall and spring semesters and 6 s.h. in summer sessions. Students must have approval from the Graduate College to register for additional semester hours.

The minimum course registration is 2 s.h. for all graduate students. Doctoral students who have passed the comprehensive examinations typically register for 2 s.h. of thesis work to satisfy the minimum registration requirement. Students who fail to register for 36 months must apply for readmission to the Graduate College.

Financial Support

Teaching and research assistantships are available to qualified graduate students. Usually, two years of support are available for completion of the M.A. and four years beyond the receipt of the M.A. for the Ph.D. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

Facilities

The Language Media Center (LMC) provides students and faculty with a broad range of services and facilities that include a state-of-the-art audio language laboratory, individual audio recording carrels, video viewing rooms for small groups, video viewing stations for individuals, and networked microcomputer and interactive multimedia workstations. The LMC maintains a number of instructional technology classrooms that have special video, audio, and computer equipment for in-class presentations. The center's extensive collection of international media resources on audio tape, videotape, computer diskette, videodisc, and CD-ROM serves learners at many levels and in many disciplines.

Courses

Spanish and Portuguese language courses are open to all students who have satisfied the specified course prerequisites.

Basic Spanish, Lower-Level Undergraduate

Students must have permission from the chair of the Department of Spanish and Portuguese to take an elementary course for credit after having completed a higher-level course for which the elementary course or its equivalent is a prerequisite.

SPAN:1000 First-Year Seminar 1-2 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

SPAN:1001 Elementary Spanish I 5 s.h.

SPAN:1002 Elementary Spanish II 5 s.h.

SPAN:1003 Elementary Spanish Review 5 s.h.

SPAN:1501 Intermediate Spanish I 5 s.h.
Communication in speaking and writing; cultural topics. Taught in Spanish. Prerequisites: SPAN:1002 or SPAN:1003. GE: World Languages Second Level Proficiency.

SPAN:1502 Intermediate Spanish II 5 s.h.
Continuation of SPAN:1501. Prerequisites: SPAN:1501. GE: World Languages Fourth Level Proficiency.

SPAN:1503 Accelerated Intermediate Spanish 6 s.h.
Course sequence SPAN:1501 and SPAN:1502 in one semester. Prerequisites: SPAN:1002 or SPAN:1003. GE: World Languages Fourth Level Proficiency.

SPAN:1504 Spanish for Healthcare Providers 3 s.h.
Intermediate Spanish with emphasis on oral communication for health care providers. Prerequisites: SPAN:1501. GE: World Languages Fourth Level Proficiency.

SPAN:1600 Exploring Latino Culture: Music, Food, and Salsa 1 s.h.
Exploration of rich diversity of Latino culture in Iowa; may attend cultural celebrations, visit Latino resources on campus, meet Latino student leaders and faculty from the Spanish department, learn about study abroad and careers involving Spanish language skills.

SPAN:1610 Hispanic Cultural Activities 1 s.h.
Attendance at Spanish literary readings, scholarly presentations, and Hispanic cultural events on the University of Iowa campus and in Iowa City; features visiting, local, and University of Iowa writers, filmmakers, artists, and scholars.

SPAN:1700 Latino/a Literature in the U.S. 3 s.h.
Introduction to growing cultural production of varied Latino communities (e.g., Chicano, Puerto Rican American/Nuyorican, Cuban American) that have a strong presence in the United States; recent cultural production from borderland transcultural spaces with physical, cultural, economic, political, and mythical elements; visions of the United States from contemporary Latin American writers who recently have become U.S. residents. Taught in English. GE: Literary, Visual, and Performing Arts; Values, Society, and Diversity.

SPAN:1800 Contemporary Spanish American Narrative 3 s.h.
Themes and narrative techniques in major texts, 1960-present; overview of cultural, sociopolitical aspects. Taught in English, readings in English. Prerequisites: ENGL:1200. GE: Literary, Visual, and Performing Arts.

SPAN:1900 Diversity and Cultures in Spain 3 s.h.
Introduction to diversity of cultures within Spain; political, social, and economic background, cultural movements. Taught in English. GE: Values, Society, and Diversity.

Spanish Level 1, Lower-Level Undergraduate

Students should take these courses at the start of the Spanish major.

SPAN:2000 Spanish Language Skills: Writing 3 s.h.
Bridge from second-year Spanish to more advanced courses in Spanish language, linguistics, and literature; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2005 Writing Global Spanish 3 s.h.
Spanish in the digital age; linguistic varieties of Spanish spoken globally; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2010 Spanish Language Skills: Speaking 3 s.h.
Development of conversational proficiency and cultural competence through action learning; strategic role playing and creative language use based on everyday situations in Hispanic cultures; composition skills and grammar review. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2020 Hispanic Institute: Language 3 s.h.
Grammar essentials, written exercises, short compositions, conversational activities. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2030 Study of Language: Myths and Concepts 3 s.h.
How linguists look at language; basic concepts of linguistics and grammar. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2040 Spanish for Heritage Speakers 3 s.h.
Development of reading and writing skills for bilingual students who have acquired listening and speaking skills in Spanish; review of grammar and registers of use.

SPAN:2050 Spanish in the U.S. 3 s.h.
Issues related to Spanish in the United States; aspects of linguistics and sociolinguistics inherent to the existence and proliferation of Spanish in the United States. Taught in English.

SPAN:2060 Spanish Pronunciation 3 s.h.
Pronunciation as a key element of communication in a second language; self evaluation of pronunciation in Spanish; how sounds differ between English and Spanish; analysis of pronunciation; production exercises. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2090 Medical Spanish in Contemporary Society 3 s.h.
Vocabulary related to medical field; grammatical concepts; health-related cultural competence; discussion of health issues concerning Hispanic communities in the U.S. and abroad. Prerequisites: SPAN:1502 or SPAN:1503 or SPAN:1504.

SPAN:2200 Introduction to Spanish American Cultures 3 s.h.
Introduction to study of cultural history of Spanish America; topics range from precolombian times to present; for students who are just starting work on the Spanish major or minor. Prerequisites: SPAN:1502 or SPAN:1503.

SPAN:2280 Introduction to Latina/o Studies 3 s.h.
Introduction to field of Latina/o studies through interdisciplinary readings from literature, history, sociology, political science, urban studies, and anthropology; commonalities and differences among long-standing Latina/o populations (Mexican Americans, Puerto Ricans, Cuban Americans); challenges faced by newer arrivals (Dominican Americans, Salvadoran Americans, Guatemalan Americans, Central and South American immigrants). Same as HIST:2280.

SPAN:2300 Introduction to Reading Literature 3 s.h.
Close readings of literary texts from Spain and Spanish America; basic concepts of genre (narrative, poetry, theater, essay); writing about literature. Prerequisites: SPAN:1502 or SPAN:1503.

Introduction to translation theory and effective translation processes; examination of potential translation problems in specific areas of English to Spanish translation; primary focus on nonfiction. Requirements: at least one course taught in Spanish at the 2000 level or above.
Spanish and Portuguese

SPAN:3120 Foundations in Sociolinguistics 3 s.h.
Dialects, speech communities, variation, choosing a code, solidarity and politeness, language and gender, language planning. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3130 Introduction to Bilingualism 3 s.h.
Psycholinguistic and sociolinguistic aspects of bilingualism; language usage, maintenance, attitudes, shift, transfer, loss; code-switching. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3150 Spanish Applied Linguistics 3 s.h.
Concepts of linguistic analysis applied to Spanish; focus on problematic areas of Spanish grammar, lexicon, semantics; introduction to cross-cultural pragmatics; connections between language learning and technology and assessment; ideal for future teachers of Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3170 Introduction to Spanish Language Acquisition 3 s.h.
Basic principles of language acquisition theory applied to learning Spanish as a first or second language. Requirements: at least one course taught in Spanish at the 2000 level or above. Recommendations: completion of SPAN:3100.

SPAN:3190 Psycholinguistic Aspects of Bilingualism 3-4 s.h.
Interaction of two languages in a bilingual in terms of sound system, words, and grammar; different meanings of bilingualism, how bilingualism and multilingualism can change across lifespan. Requirements: linguistics or language acquisition course. Same as FREN:3190.

Spanish American Literature and Culture

SPAN:3200 Cultures of Spanish America 3 s.h.
Pre-Columbian, colonial, modern periods; socioeconomic structure, form of government, culture. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3220 Visual Culture: Colonial Spanish America 3 s.h.
Intersection between written word and visual culture in colonial Spanish America; imperialism, native culture, violence and race in codices, paintings, maps and illustrations. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3230 Modern Mexico 3 s.h.
Twentieth-century Mexican cultural history, including nationalism, gender relations, indigenous cultures, border issues, and popular culture; materials range from journalistic and literary writing to film, music, images, and television. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3270 Pan-Caribbean Literary Currents 3 s.h.
Twentieth-century fiction, film, and cultural practices in the Hispanic, Francophone, and Anglophone Caribbean; cultural essays to complement literary readings; pan-Caribbean cultural practices—music and carnival celebrations. Taught in English. Requirements: for CL:3262 — junior or senior standing; for SPAN:3270 — two literature courses. Same as CL:3262.

SPAN:3290 Topics in Cinema and Society 3 s.h.
Concept of national cultures examined through film history in one Latin American nation. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3300 Contemporary Spanish American Fiction 3 s.h.
Major 20th-century short-story writers and novelists (Borges, Cortázar, Fuentes, García-Márquez, Rulfo, etc.) through representative works. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3310 Spanish American Short Story 3 s.h.
Works by 19th- and 20th-century Spanish American writers; emphasis on reading strategies and historical, cultural, literary backgrounds. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3320 Spanish American Poetry 3 s.h.
Poetry as a literary genre, short story of its development, early forms in Spanish America, poets from Modernism to present; readings from writers including Rubén Darío, Pablo Neruda, César Vallejo, Octavio Paz, J.L. Borges. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3350 Contemporary Spanish American Literature 3 s.h.
Comprehensive view of 20th-century literature from Spanish-speaking countries in the Americas, including narrative and poetry; examination of issues related to texts and contexts through written and oral analysis. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3360 Latin American Women Writers 3 s.h.
Focus on 20th century; how Latin American women subjects view themselves through literature; textual practice specific to women; psychoanalytic approaches, contemporary feminist criticism. Requirements: at least one course taught in Spanish at the 2000 level or above. Same as GWSS:3360.

SPAN:3370 Topics in Literatures and Cultures 3 s.h.
Literature and culture of specific regions, countries, or cities of Latin America. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3400 Chicano Literature and Culture 3 s.h.
Recent fiction and poetry by Chicano and Chicana writers; readings in Spanish and English. Taught in Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above.

SPAN:3420 Cuban American Literature and Culture 3 s.h.
Experiences of Cuban exiles in the United States; emergence of a literature and culture based on sense of dispossession, marginality, and memory of island past. Taught in English. Prerequisites: ENGL:1200. GE: Values, Society, and Diversity. Same as CL:3396.

**SPAN:3440 Topics in Latino/a Literature and Culture** 3 s.h.
Examination of special topics in interdisciplinary field of Latina/o studies. Taught in English. Requirements: one course taught in Spanish at the 2000 level or above.

**SPAN:3500 Topics in Culture of the Hispanic World** 3 s.h.
Specific topics; culture of different parts of Spanish-speaking world, or cross-regional or cross-national cultural phenomenon. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3520 Introduction to Film Studies** 3 s.h.
Introduction to film analysis and theory; focus on Latin American and Spanish cinemas in context of international film history. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3550 Doing Business in the Spanish-Speaking World** 3 s.h.
Preparation for careers in business, international relations, and other professions involving business activities in international or U.S. Hispanic environments; raise awareness in domain of international business and political systems and meeting challenges of a global economy and international cooperation. Requirements: at least one course numbered SPAN:2000 or above.

**Spanish Literature and Culture**

**SPAN:3600 Cultures of Spain** 3 s.h.
Political, religious, social, economic background; important cultural, literary movements. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3610 Hispanic Institute: Culture** 3 s.h.
Overview of geography, history (political, economic, social), architecture, painting, music of Spain; readings, slides, video and audio cassettes, visits to local sites of cultural significance. Prerequisites: SPAN:1502 or SPAN:1503.

**SPAN:3620 Madrid** 3 s.h.
Contemporary Madrid as one of the premier capital cities of the European Union; history and present day reality of the city; examination of paintings, descriptions, movies, fashion, and customs from several historical periods. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3630 Spanish Youth Culture** 3 s.h.
Literary texts, films, and music produced by young people in Spain from 1939 to present; gender issues and relationships between market, popular culture, and high culture. Requirements: one course taught in Spanish at the 2000 level or above.

**SPAN:3690 Iowa Global Internship in Madrid** 3 s.h.
Intensive language and eight-week internship in Madrid through the Tippie College of Business Madrid Internship Program; writing an extensive report in Spanish. Requirements: at least two courses taught in Spanish at the 2000 level or above.

**SPAN:3700 The Cid in History and Legend** 3 s.h.
Rodrigo Diaz de Vivar, el Cid, in history and legend; changing perceptions of the Cid from the 13th century to the present. Requirements: one literature course taught in Spanish at the 2000 level or above.

**SPAN:3750 Literature in the Time of Cervantes** 3 s.h.
Introduction to literary questions of 15th to 17th centuries in Spain; understanding of literary Spanish and cultural issues of the period—end of the feudal mind, beginning of individualism, poetry, emergence of theater, crisis of empire. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3790 Hispanic Institute: Literature** 3 s.h.
Introduction to poetry, narrative, and theater in Spanish literature; textural commentary and critical interpretations of major representative works of selected historical periods. Prerequisites: SPAN:1502 or SPAN:1503.
Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3820 Modern and Contemporary Spanish Literature** 3 s.h.
Works of the last 30 years of the 19th century, up to the outbreak of the Spanish Civil War; Realism, Naturalism, generation of 1898, generation of 1913, generation of 1927. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3830 Spanish Literature of the Transition** 3 s.h.
Literary production of the transition in post-Franco Spain; works by Carmen Martin Gaite, Luis Garcia Montero, Pedro Almodovar, others. Requirements: at least one course taught in Spanish at the 2000 level or above.

**SPAN:3840 Contemporary Spanish Short Story** 3 s.h.
Contemporary short stories from 20th- and 21st-century Spain; emphasis on reading strategies and interpretation skills; focus on historical and social contexts. Requirements: at least one course taught in Spanish at the 2000 level or above.

**Spanish Level 3, Upper-Level Undergraduate and Graduate**

Undergraduates should take the following courses during their last semesters of enrollment. These courses are also open to M.A. students. All of these courses require a research paper. Prerequisites vary.

</table>
SPAN:4800 Chicano Cinema 3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Requirements: one Spanish literature or culture course numbered SPAN:3200 or above, or one film studies course numbered CL:2100 or above. Same as CINE:4690.

SPAN:4810 Topics in Latin American Cinema 3 s.h.
Taught in English. Requirements: one Spanish literature or culture course numbered above SPAN:3200 or one film studies course. Same as CINE:4678.

SPAN:4820 Latino/a Popular Culture 3 s.h.
Role of Latino/a popular culture as a site of contemporary social practice and cultural politics in both local and global contexts; specific attention to notions of citizenship, identity, and culture. Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.

SPAN:4830 The Hispanic World in the Digital Era 3 s.h.
Global digital space and construction of culture in Hispanic world; how digital data creates knowledge and ways it represents and impacts societies; power of computer technology to disseminate critical thinking, social outreach, and creative expressions; how digital realities and tools of constant communication promote change. Requirements: two literature or culture courses in Spanish, at least one of which must be numbered SPAN:3300 or above.

SPAN:4850 Topics in Cultural Studies 3 s.h.
Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.

SPAN:4860 The Spanish Civil War 3 s.h.
Exploration of literature, history, and art of the Spanish Civil War (1936-1939); ideological debates and aesthetic achievements of the period; relationships among art, politics, and propaganda. Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.

SPAN:4870 Islamic Cultural Presence in Spain 3 s.h.
Islamic history and culture in the Iberian Peninsula from Middle Ages to present. Taught in Spanish. Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above. Same as RELS:4870.

SPAN:4880 Comic Books and Graphic Novels in the Hispanic World 3 s.h.
Analysis of comics and graphic novels from Hispanic world; diverse Hispanic representational perspectives on creativity, humor, storytelling, culture, politics, nationality, and ethnicity; opportunity for students to express their own creativity with comics. Recommendations: two literature or culture courses taught in Spanish, at least one of which must be numbered SPAN:3200 or above.

SPAN:4900 Latin American Studies 3 s.h.
Interdisciplinary approach. Taught in English.

SPAN:4910 Topics in Literary Studies 3 s.h.
Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.

SPAN:4920 Topics in Film Studies 3 s.h.
Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.

SPAN:4940 Journalistic Narrative 3 s.h.
In-depth interpretative journalistic writing on a range of topics and forms, including profiles, social and political issues and controversy, cultural affairs, education. Prerequisites: SPAN:3020.

SPAN:4950 Advanced Workshop on Creative Writing in Spanish 3 s.h.
In-depth consideration of characters, dialog, conflict, setting, point of view, other fundamentals of fiction; experience writing short stories and other pieces, with class discussion; fictional texts by renowned writers, authors’ essays on their own creative process; narrative strategies of short stories, songs, painting, films. Requirements: one creative writing course in Spanish and one literature course in Spanish numbered SPAN:3300 or above, or two literature courses in Spanish numbered SPAN:3300 or above.

SPAN:4998 Honors: Research and Thesis 2-3 s.h.
Requirements: honors standing.

SPAN:4999 Special Work 1-3 s.h.

Spanish, Graduate

SPAN:5000 Teaching and Learning Languages 3 s.h.
Readings in pedagogical theory and practice, second language acquisition; experience designing activities for teaching and assessment with critiques based on current theories and approaches; development of reflective practices toward one’s language teaching. Same as WLLC:5000, SLA:5000, FREN:5000, GRMN:5001.

SPAN:5001 Introduction to Graduate Study 2 s.h.
Expectations, resources, and opportunities of graduate study; introduction to course work, development of preprofessional competencies. Same as FREN:5001.

SPAN:6000 Foreign Language Teaching Methods 3 s.h.
Readings in pedagogical theory and practice and second language acquisition; experience designing activities for teaching and assessment, with critiques based on current theories and approaches; development of reflective practices toward one’s own language teaching. Same as SLA:6300.
SPAN:6110 Spanish Phonology 3 s.h.
Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Requirements: phonology or linguistics course. Same as SLA:6303.

SPAN:6120 Spanish Syntax 3 s.h.
Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Requirements: one course in syntax. Same as SLA:6304.

SPAN:6150 Topics in Spanish Language Acquisition 3 s.h.
Theoretical linguistic approaches to monolingual, bilingual, and second language acquisition of Spanish and Portuguese; varied topics. Requirements: at least one course in linguistics (e.g., general introduction to linguistics). Same as SLA:6301.

SPAN:6180 Topics in Hispanic Linguistics 3 s.h.
Taught in Spanish or English.

SPAN:6190 Topics in Comparative Romance Linguistics 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Recommendations: additional graduate course work in linguistics. Same as LING:6190, CLSA:6990, SLA:6302.

SPAN:6210 Fiction Workshop 3 s.h.
Craft of writing short stories; underlying principles examined through lectures, readings, craft analysis, discussions, exercises, and workshops; activities linked with International Writing Program. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6220 Poetry Workshop 3 s.h.
Construction and recognition of poetic voice through readings, analysis, and exercises from different poets and by students; poetic voice in three spaces (diary of poetic prose, collection of poems, object poem). Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6230 Graphic Novel/Comic Script Workshop 3 s.h.
Basic steps to develop a comic book or a graphic novel; different styles and ways to develop scripts and characters; read authors and their graphic works; student work on possible script or group of characters. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6235 Film Script/Theater Workshop 3 s.h.
Basic steps to developing plays; different styles and ways to develop plays and characters; reading main authors and their plays; student work on a possible play. Requirements: admission to M.F.A. in Spanish Creative Writing program.

SPAN:6240 Advanced Narrative Workshop 3 s.h.
Short stories written by internationally published authors; meetings with international authors; reading and discussion of students’ short stories or sequential chapters of a novel; for students who have previously completed at least one workshop on narrative in the M.F.A. program. Requirements: admission to M.F.A. in Spanish Creative Writing program.

SPAN:6241 Creative Project Development 3 s.h.
Development of creative project. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6251 Workshop on Editing a Literary e-Journal 3 s.h.
Plan, produce, write, and edit a literary digital magazine; manage and write for Iowa Literaria. Requirements: admission to M.F.A. in Spanish Creative Writing program.

SPAN:6260 Detective Narrative Workshop 3 s.h.
Basic elements of narrative used by authors of detective novels; acclaimed short stories, novels, and theoretical essays related to the genre; write three short stories of detective fiction; written critique of classmates’ work. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6270 Children, Youth Literature 3 s.h.
Practice of writing literature for children and youth; reading literary texts in different cultural traditions; how narratives and poems for children or youth are created; using readings as springboards for thinking about ways to write for children and youth; texts for this group of readers. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6280 Nonfiction Workshop 3 s.h.
Practice of self narrative and construction of the self in literature; readings of self-narrated texts in different literary forms and cultural traditions (from autobiography to testimonial narratives); various ways in which the narrating self is formed and deformed by literary conventions that define him/her; readings as springboards for thinking on ways to write the self; series of autobiographical sketches. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6299 Thesis: Creative Writing 3 s.h.
Continuation of work on student manuscript. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6300 Colonial Spanish American Literature 3 s.h.
Chronicles of the conquest: close reading with focus on role of writing and operations of “othering”; balance between critical secondary sources and primary sources.

SPAN:6310 Spanish American Narrative: Nineteenth Century 3 s.h.
Review of narrative, with emphasis on Romanticism.

SPAN:6320 Contemporary Spanish American Narrative 3 s.h.
Narrative from mid-20th century to present; emphasis on the Boom, post-Boom.
SPAN:6330 Spanish American Narrative: Modern and Regional 3 s.h.

SPAN:6390 Topics in Spanish American Literature 3 s.h.

SPAN:6600 Medieval Spanish Literature 3 s.h.
Critical reading of canonical medieval texts in their cultural context; application of modern theory to medieval texts; works such as El Poema del Cid, El Romancero Viejo, Milagros de Nuestra Señora, El Conde Lucanor, El Libro de Buen Amor.

SPAN:6620 Spanish Renaissance and Baroque Literature 3 s.h.
Critical analysis of social, moral, political function of literature in early modern Spain; Renaissance and Baroque poetry; La Celestina; pastoral literature; Don Quijote; narratives of the court; modern subjectivity; the question of genre.

SPAN:6660 Contemporary Spanish Fiction 3 s.h.
The post-Franco novel in Spain; literary "postmodernism" and relationships between Spanish literature, politics, and society since 1975; representative significant works.

SPAN:6670 Contemporary Spanish Poetry 3 s.h.
Poetry on the Spanish literary scene circa 1968; authors' reactions to predecessors, their connections with foreign traditions, metapoetry, the aesthetics of culturalism.

SPAN:6680 Contemporary Non-Castilian Narrative Spain 3 s.h.
Readings in Spanish of novels and short stories written in another language of the Spanish state or by a member of one of Spain's non-Castilian historic nationalities.

SPAN:6690 Topics in Spanish Literature 3 s.h.

SPAN:6850 Topics in Literary Studies 3 s.h.

SPAN:6860 Topics in Cultural Studies 3 s.h.

SPAN:6901 Second Language Acquisition Research and Theory 3 s.h.
Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as FREN:6901, ASIA:6901, JPNS:6901.

SPAN:6902 Second Language Acquisition Research and Theory II 3 s.h.
Continuation of SLA:6901. Prerequisites: SLA:6901. Same as ASIA:6903, SLA:6902.

SPAN:6903 Crossing Borders Proseminar arr.

SPAN:6904 Crossing Borders Seminar 2-3 s.h.

SPAN:6905 Introduction to Contemporary Literary Theory 3 s.h.
How major theories construct literary text; structuralist, semiotic, psychoanalytic, Marxist, reader response, Derridian criticism. Taught in English. Same as CL:6105.

SPAN:6920 Multimedia and Second Language Acquisition 3 s.h.
Foreign language multimedia in context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control; acquisition of vocabulary, grammar, and culture. Requirements: foreign language teaching methodology course. Same as SLA:6920, FREN:6920, GRMN:6920.

SPAN:6950 Topics in Second Language Acquisition: Speaking 3 s.h.
Theory, pedagogy, research, and assessment in second language speaking. Same as SLA:6950, FREN:6950.

SPAN:6965 Topics in Second Language Acquisition: Writing 3 s.h.
Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as RHET:6965, SLA:6965.

SPAN:6998 Special Work arr.

SPAN:6999 Thesis arr.

SPAN:7000 Seminar: Spanish Linguistics 3 s.h.
Same as LING:7000.

SPAN:7200 Seminar: Literary Studies 3 s.h.
Specific topics on aspects of Spanish and/or Spanish American literature.

SPAN:7300 Seminar: Cultural Studies 3 s.h.
Specific topics in Spanish and/or Spanish American cultural studies.

SPAN:7505 Readings: Latin American History 3 s.h.
Same as HIST:7505.

Portuguese, Lower-Level Undergraduate

PORT:1800 Contemporary Brazilian Narrative 3 s.h.
Novels, short stories, other narrative forms, beginning with neorealists of 1930s; cultural background of different periods, innovative literary approaches of writers through films, other media. Prerequisites: ENGL:1200. GE: Literary, Visual, and Performing Arts.

PORT:2000 Accelerated Elementary Portuguese 5 s.h.
First-year course in one semester; comprehending, speaking, reading, writing modern Portuguese; emphasis on speaking. GE: World Languages Second Level Proficiency.

PORT:2500 Accelerated Intermediate Portuguese 5 s.h.
Second-year course in one semester; reading comprehension, oral and writing skills; grammar review. Prerequisites: PORT:2000. GE: World Languages Fourth Level Proficiency.

PORT:2700 Introduction to Latin American Studies 3 s.h.
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as SPAN:2700, LAS:2700, IS:2700.

PORT:2800 Topics in Cultural Studies 3 s.h.
Specific topics; interdisciplinary approaches; cultural relations of different parts of Portuguese-speaking world, cross-regional or cross-national discourses. Taught in English.

Portuguese, Upper-Level Undergraduate and Graduate
PORT:3050 Portuguese for Spanish Speakers 3 s.h.
Systematic differences and similarities between Spanish and Portuguese; emphasis on reading, writing. Requirements: nine courses numbered SPAN:2000 or above.

PORT:3100 Composition and Conversation 3 s.h.
Speaking, writing skills through discussion and oral presentations, grammar and vocabulary review, composition; materials from current Brazilian newspapers, magazines, short fiction, telenovelas and films. Prerequisites: PORT:2500 or PORT:3050.

PORT:3130 Business Portuguese 3 s.h.
Clear, concise business writing; emphasis on linguistic and cultural proficiency. Prerequisites: PORT:2500 or PORT:3050.

PORT:3150 Topics in Portuguese Language 3 s.h.
Various aspects of Portuguese language use. Prerequisites: PORT:2500 or PORT:3050.

PORT:3200 Introduction to Literary Analysis 3 s.h.
Basic concepts of genre, literary periods, narrative and literary analysis; close reading of literary texts in Portuguese; tools for improving reading and writing skills. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050.

PORT:3350 Brazilian Literature Before 1900 3 s.h.
Beginnings through end of 19th century; representative readings from all periods and genres; focus on works of major Brazilian authors such as Gonzaga, Alencar, Castro Alves, Machado de Assis, Cruz e Sousa. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050.

PORT:3400 Brazilian Literature After 1900 3 s.h.
Twentieth-century poetry, novels, short stories; modernism, regionalism, generation of 1945, concretism; works of principal figures behind these movements; focus on major writers of modern period, such as Lima Barreto, Mário de Andrade, Drummond, Jorge Amado, Cabral de Melo Neto, Guimarães Rosa, Lispector, and contemporary writers. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050.

PORT:3500 Introduction to Portuguese Literature 3 s.h.
Representative readings including Portuguese lyric and epic poetry, Renaissance theater, romantic and realist novels, 20th-century symbolist verse, neorealist prose. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050.

PORT:3800 Mapping Portuguese Cultures: Portugal and Africa 3 s.h.
Study of contemporary Portuguese society and its relations with Lusophone Africa through fictional and historiographical readings. Prerequisites: PORT:2500.

PORT:4000 Topics in Luso-Brazilian Literature 3 s.h.
Genres, themes, movements. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050. Requirements: one Portuguese or Brazilian literature course.

PORT:4100 Topics in Luso-Brazilian Culture 3 s.h.
Comparative analysis of Brazil and Portuguese-speaking countries in Africa; colonization, independence, religion, music, language. Taught in Portuguese. Prerequisites: PORT:2500 or PORT:3050.

PORT:4700 Latin American Studies Seminar 3 s.h.

PORT:4998 Special Work 1-3 s.h.

PORT:4999 Honors Research and Thesis 2-3 s.h.
Requirements: honors standing.

Portuguese, Graduate
PORT:6998 Special Work arr.
Statistics and Actuarial Science

Chair

• Joseph B. Lang

Undergraduate majors: statistics (B.S.); actuarial science (B.S.)
Undergraduate minor: statistics
Graduate degrees: M.S. in actuarial science; M.S. in statistics; Ph.D. in statistics
Faculty: http://www.stat.uiowa.edu/people
Web site: http://www.stat.uiowa.edu

The Department of Statistics and Actuarial Science offers undergraduate majors, an undergraduate minor, and graduate degree programs. The department partners with the Departments of Computer Science and Mathematics to offer the undergraduate Certificate in Large Data Analysis (p. 445) and with the Departments of Geographical and Sustainability Sciences, Political Science, and Sociology to offer the Certificate in Social Science Analytics (p. 571). It offers courses that undergraduate students in all majors may use to satisfy the General Education Program (p. 313) Quantitative or Formal Reasoning requirement.

Probability and statistics is an important scientific discipline essential to all fields of study that rely on information obtained from data. In a world bombarded with numerical information, informed decisions rely on the ability to separate fact from fiction by applying valid statistical analyses and visualizations. Statisticians can provide crucial guidance in determining what information is reliable and which predictions may be trusted. They often help search for clues to the solution of a scientific mystery and sometimes keep investigators from being misled by false impressions.

The work of a statistician may range from the theoretical (developing new methodologies and statistical theory) to the applied (working with scientists and decision makers to collect, analyze, and interpret data). Regardless of the areas in which they work, statisticians need strong mathematical, computational, and communication skills. Because uncertainty and data arise in many settings, statisticians have the opportunity to work on a variety of projects in industry, education, government, and research. Thousands of statisticians work in medicine, law, agriculture, public policy, marketing, manufacturing, engineering, and other fields in the social and natural sciences. The diversity of applications is an exciting aspect of the field and is one reason why the demand for well-trained statisticians continues to be strong.

An actuary is a business executive, professionally trained in the mathematical sciences. Actuaries specialize in the evaluation of financial risk—most often in the context of life, health, and casualty insurance, where they design, analyze, and refine varied programs to meet the insurance needs of society. Many actuaries are employed by insurance companies, where they have responsibilities for all phases of the development and maintenance of their company's products. They have considerable influence on the financial soundness of their company through work in pricing insurance policies and in compiling data for financial statements.

Many actuaries are employed as consultants. Their actuarial services are used by smaller insurance companies and by individual employers who need actuarial guidance in establishing insurance and retirement programs for their employees. A growing number of actuaries work in the areas of asset/liability management and risk management. Some of these actuaries are employed by investment and consulting firms; others are employed by insurance companies.

Actuaries have been called financial architects and social mathematicians, because their combined analytical and business skills help solve a growing variety of financial and social problems. The actuarial profession is a demanding yet rewarding career choice.

Graduates of the Department of Statistics and Actuarial Science have enjoyed great success in finding employment at all levels of the profession's fields.

Undergraduate Programs of Study

• Major in statistics (Bachelor of Science)
• Major in actuarial science (Bachelor of Science)
• Minor in statistics

Bachelor of Science: Statistics

The Bachelor of Science with a major in statistics requires a minimum of 120 s.h., including at least 47 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

Students complete 10 core courses that provide essential instruction in statistical methods, applications, and theory. In addition, they concentrate on an area of interest by completing four courses in one of the major's three emphasis tracks: statistics in business, industry, government, and research; statistical computing and data science; or mathematical statistics.

The major in statistics requires the following course work.

CORE COURSES

All students complete the following 10 core courses.

Computer science:

CSCI:1210 Computer Science I: Fundamentals 4 s.h.

Mathematics—all of these:

MATH:1850 & MATH:1860 Calculus I-Il 8 s.h.
MATH:2700 Introduction to Linear Algebra 4 s.h.
MATH:2850 Calculus III 4 s.h.

Statistics—all of these:

STAT:2010 Statistical Methods and Computing 3 s.h.
STAT:3100-STAT:3101 Introduction to Mathematical Statistics I-II 6 s.h.
STAT:3200 Applied Linear Regression 3 s.h.
STAT:3210 Experimental Design and Analysis 3 s.h.

The department recommends that well-prepared students who elect the mathematical statistics track take STAT:4100 Mathematical Statistics I and STAT:4101 Mathematical Statistics II in place of STAT:3100.

**Emphasis Tracks**

Students choose one of the following tracks and must complete at least four courses in that track.

**STATISTICS IN BUSINESS, INDUSTRY, GOVERNMENT, AND RESEARCH TRACK**

The statistics in business, industry, government, and research track emphasizes statistical applications and data analysis. It is appropriate for students interested in careers as applied statisticians.

This course:

- STAT:5810 Research Data Management 3 s.h.

Three of these:

- STAT:3620 Quality Control 3 s.h.
- STAT:4520 Bayesian Statistics 3 s.h.
- STAT:5400 Computing in Statistics 3 s.h.
- STAT:6220 Statistical Consulting 3 s.h.
- STAT:6510 Applied Generalized Regression 3 s.h.
- STAT:6530 Environmental and Spatial Statistics 3 s.h.
- STAT:6540 Applied Multivariate Analysis 3 s.h.
- STAT:6560 Applied Time Series Analysis 3 s.h.
- BIOS:5730 Biostatistical Methods in Categorical Data 3 s.h.
- BIOS:6310/STAT:6550 Introductory Longitudinal Data Analysis 3 s.h.

**STATISTICAL COMPUTING AND DATA SCIENCE TRACK**

The statistical computing and data science track emphasizes statistical applications and requires additional course work in computing. It prepares students for statistical work that requires computing expertise for data management, analysis, and reporting.

Both of these:

- STAT:5810 Research Data Management 3 s.h.
- CS:2230 Computer Science II: Data Structures 4 s.h.

Two of these:

- STAT:4520 Bayesian Statistics 3 s.h.
- STAT:5400 Computing in Statistics 3 s.h.
- STAT:6220 Statistical Consulting 3 s.h.
- STAT:6510 Applied Generalized Regression 3 s.h.
- STAT:6530 Environmental and Spatial Statistics 3 s.h.
- STAT:6540 Applied Multivariate Analysis 3 s.h.
- STAT:6560 Applied Time Series Analysis 3 s.h.
- BIOS:6310/STAT:6550 Introductory Longitudinal Data Analysis 3 s.h.

**MATHEMATICAL STATISTICS TRACK**

The mathematical statistics track provides a solid foundation in statistical theory and applications. It requires additional course work in mathematics and is good preparation for graduate study in statistics.

This course:

- MATH:3770 Fundamental Properties of Spaces and Functions I 4 s.h.

Three of these:

- STAT:4100-STAT:4101 Mathematical Statistics I-II 6 s.h.
- STAT:4520 Bayesian Statistics 3 s.h.
- STAT:6220 Statistical Consulting 3 s.h.
- STAT:6510 Applied Generalized Regression 3 s.h.
- STAT:6530 Environmental and Spatial Statistics 3 s.h.
- STAT:6540 Applied Multivariate Analysis 3 s.h.
- STAT:6560 Applied Time Series Analysis 3 s.h.

Students who use STAT:4100 Mathematical Statistics I and STAT:4101 Mathematical Statistics II to satisfy the core requirements may not use those courses to satisfy the track requirement.

**Bachelor of Science: Actuarial Science**

The Bachelor of Science with a major in actuarial science requires a minimum of 120 s.h., including 59 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The program prepares students for careers as actuaries. It also helps them learn material that is included in professional examinations administered by professional organizations such as the Society of Actuaries and the Casualty Actuarial Society.

Students take a variety of actuarial science courses. They prepare for business aspects of the actuarial profession by studying accounting, law, finance, insurance, and economics. They also complete courses that enhance important communication skills, such as writing and speaking, as part of their General Education Program requirements.

**ADMISSION TO THE MAJOR**

Due to the demanding nature of the actuarial science major and the difficulty of the professional examinations, the department maintains a selective admission program for actuarial science. Students must apply and be admitted to the major.

Students interested in becoming actuaries should declare an interest in actuarial science as their major when they enter the University of Iowa. Ordinarily, students apply for admission to the actuarial science major in the fall semester of their sophomore year, after they have taken MATH:3770 Fundamental Properties of Spaces and Functions I or MATH:2850 Calculus III, and STAT:3100 Introduction to Mathematical Statistics I. Students should apply no later than the end of the spring semester of their junior year.

Students admitted to the actuarial science major usually have completed at least 40 s.h. at the University or at
another postsecondary institution, including a three- or four-course calculus sequence, a course in linear algebra, and a calculus-based course in probability and statistics. The admission decision is based on the student's performance in these courses and other courses relevant to success in the major. The student's grades from semester to semester also are considered. ACT or SAT scores are considered in evaluating transfer students. Factors such as work ethic, enthusiasm, and commitment also may be considered. Students who do well in the prerequisite math courses tend to be the most successful in actuarial science.

For application forms and more information about selective admission, contact the Department of Statistics and Actuarial Science.

COURSES REQUIRED FOR THE MAJOR

The major in actuarial science requires the following course work. Permission to substitute course work taken at another institution for required courses at the University of Iowa is decided case by case; students should contact the department.

Computer science:
CS:1210 Computer Science I: Fundamentals 4 s.h.

Economics—both of these:
ECON:1100 Principles of Microeconomics 4 s.h.
ECON:1200 Principles of Macroeconomics 4 s.h.

Mathematics—all of these:
MATH:1850 & MATH:1860 Calculus I-II 8 s.h.
MATH:2700 Introduction to Linear Algebra 4 s.h.
MATH:2850 Calculus III 4 s.h.
MATH:3770 Fundamental Properties of Spaces and Functions I 4 s.h.

Statistics and actuarial science—all of these:
ACTS:3080 Mathematics of Finance I 3 s.h.
ACTS:4130 Quantitative Methods for Actuaries 3 s.h.
ACTS:4180 & ACTS:4280 Life Contingencies I-II 6 s.h.
ACTS:4380 Mathematics of Finance II 3 s.h.
STAT:3100-STAT:3101 Introduction to Mathematical Statistics I-II 6 s.h.

In exceptional cases, the advisor may grant permission to waive STAT:3100 Introduction to Mathematical Statistics I and/or STAT:3101 Introduction to Mathematical Statistics II.

Students may choose to complete ACTS:6580 Credibility and Survival Analysis and ACTS:6480 Loss Distributions (both courses) instead of ACTS:4380 Mathematics of Finance II, except honors students, who must complete all three courses.

Joint B.S./M.S. in Statistics

The joint Bachelor of Science/Master of Science in statistics is for eligible students who seek to complete both the B.S. and the M.S. at the University of Iowa in five years. Students in the joint program must complete all requirements for each degree. A traditional M.S. in statistics requires completion of 32 s.h. of graduate-level course work. The B.S./M.S. program permits students to count 12 s.h. of credit (four courses) toward the requirements for both degrees. To complete the M.S., an additional 20 s.h. of course work is required. The four courses that count toward both degrees must be taken during the fourth year of undergraduate study, after admission to the joint program, and must satisfy degree requirements of both the B.S. and the M.S. in statistics.

Joint B.S./M.P.H. with Quantitative Methods Subprogram

Bachelor of Science students majoring in statistics who are interested in earning a Master of Public Health degree with quantitative methods (biostatistics) subprogram may apply to the joint B.S./M.P.H. program offered by the College of Liberal Arts and Sciences and the College of Public Health. The program permits students to count 12 s.h. of credit toward the requirements for both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. For information about the public health program, see “Quantitative Methods Subprogram” in the Master of Public Health Program (p. 1173) section of the Catalog.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Much of the course work in statistics and in actuarial science is sequential, so students must begin requirements for the major as soon as possible. Individual study plans must be made carefully. Students who first enroll for a spring semester must consult their advisor to confirm a four-year plan.

B.S.: Statistics

Courses must be taken in sequence, so students must begin work early.

Before the fifth semester begins: at least four courses in the major, including MATH:1850 Calculus I, MATH:1860 Calculus II, and STAT:2010 Statistical Methods and Computing

Before the seventh semester begins: seven or eight courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: nine or ten courses in the major

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

B.S.: Actuarial Science

Before the third semester begins: MATH:1860 Calculus II and MATH:2700 Introduction to Linear Algebra

Before the fifth semester begins: MATH:2850 Calculus III, MATH:3770 Fundamental Properties of Spaces and Functions I, STAT:3100 Introduction to Mathematical

**Before the seventh semester begins:** STAT:4101 Mathematical Statistics II, ACTS:4130 Quantitative Methods for Actuaries, ACTS:4180 Life Contingencies I, ACTS:4380 Mathematics of Finance II, and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** ACTS:4280 Life Contingencies II

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors in the Major**

Students majoring in statistics or in actuarial science have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.40 in their major and a cumulative University of Iowa g.p.a. of at least 3.33.

To graduate with honors in the statistics major, students must complete an honors project or a suitable alternative. Statistics honors students should consult with the statistics honors advisor.

To graduate with honors in the actuarial science major, students must complete the following five courses in addition to all courses required for the major.

<table>
<thead>
<tr>
<th>Course</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTS:6480 Loss Distributions</td>
<td>3</td>
</tr>
<tr>
<td>ACTS:6580 Credibility and Survival Analysis</td>
<td>3</td>
</tr>
<tr>
<td>STAT:4510 Regression, Time Series, and</td>
<td>3</td>
</tr>
<tr>
<td>Forecasting (or STAT:3200 and STAT:6560)</td>
<td></td>
</tr>
<tr>
<td>MATH:3600 Introduction to Ordinary</td>
<td>3</td>
</tr>
<tr>
<td>Differential Equations</td>
<td></td>
</tr>
<tr>
<td>FIN:3300 Corporate Finance</td>
<td>3</td>
</tr>
</tbody>
</table>

Actuarial science honors students may not elect to complete ACTS:6580 Credibility and Survival Analysis and ACTS:6480 Loss Distributions instead of ACTS:4380 Mathematics of Finance II in fulfilling requirements for the actuarial science major. They must complete ACTS:4380 as part of the major, and they must complete ACTS:6580 and ACTS:6480 for honors credit.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.

**Minor: Statistics**

The minor in statistics requires a minimum of 15 s.h. in statistics courses taken at the University of Iowa. At least 12 s.h. must be taken in courses numbered 3000 or above (selected from the lists below). They must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.

The minor requires the following course work.

<table>
<thead>
<tr>
<th>Course</th>
<th>S.H.</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT:2010 Statistical Methods and Computing</td>
<td>3</td>
</tr>
<tr>
<td>STAT:4200 Statistical Methods and Computing</td>

</tbody>
</table>

**Related Certificate: Large Data Analysis**

The Certificate in Large Data Analysis can be earned in addition to a B.S. degree in statistics. The certificate focuses on handling, processing, and extracting information from large data sets. As computers have become faster and smaller, more information can be gathered and used for a large range of applications, such as for weather forecasting; identifying people and trends utilizing Facebook or other social media; understanding the genome; and searching for disease causes and cures, as well as many other areas of study. The certificate is interdisciplinary, requiring courses from three areas of study—computer science, mathematics, and statistics. Computer science teaches students how to handle large amounts of data and how to implement the algorithms to process them while statistics helps students to understand what can and cannot be legitimately inferred from the data. Mathematics focuses on algorithms and methods for connecting these important areas of data collection.

**Related Certificate in Social Science Analytics**

The Department of Statistics and Actuarial Science collaborates with the Departments of Geographical and Sustainability Sciences (p. 323), Political Science (p. 520), and Sociology (p. 585) to offer the undergraduate program in social science analytics; see Social Science Analytics (p. 571) in the Catalog.
Graduate Programs of Study

- Master of Science in statistics
- Master of Science in actuarial science
- Doctor of Philosophy in statistics

Master of Science: Statistics

The Master of Science in statistics requires 32 s.h. of graduate credit. The program prepares students for careers as professional statisticians or for entry into the Ph.D. program. It includes a solid foundation in statistical computing, statistical modeling, experimental design, and mathematical statistics plus electives in statistical methods and/or theory. Students have the opportunity to concentrate on theory or applications or a combination of the two.

In addition to required course work, students must pass the two-part graduate core examination and complete the M.S. creative component. The examination and creative component constitute the M.S. final (comprehensive) examination required by the Graduate College.

M.S. students in statistics must maintain a g.p.a. of at least 3.00 in all work toward the degree and in additional relevant course work. Students must take a computer programming proficiency test during the first semester of study; those who display inadequate programming skills are assigned activities to build their proficiency.

The Master of Science program in statistics requires the following work.

STATISTICS COURSES

All of these:

- STAT:5090 ALPHA Seminar 1 s.h.
- STAT:5100-STAT:5101 Statistical Inference I-II 6 s.h.
- STAT:5400 Computing in Statistics 3 s.h.
- STAT:6220 Statistical Consulting 3 s.h.
- STAT:6300 Probability and Stochastic Processes I 3 s.h.
- STAT:6990 Readings in Statistics (two consecutive enrollments) 2 s.h.

At least 7 s.h. from these:

- STAT:4520 Bayesian Statistics 3 s.h.
- STAT:5120 Mathematical Methods for Statistics 3 s.h.
- STAT:6301 Probability and Stochastic Processes II 3 s.h.
- STAT:6510 Applied Generalized Regression 3 s.h.
- STAT:6530 Environmental and Spatial Statistics 3 s.h.
- STAT:6540 Applied Multivariate Analysis 3 s.h.
- STAT:6547 Nonparametric Statistical Methods 3 s.h.
- STAT:6560 Applied Time Series Analysis 3 s.h.
- STAT:6970 Topics in Statistics 3 s.h.
- A Ph.D.-level course numbered 7000 or above, including seminar courses 1-3 s.h.

M.S. students planning to enter the doctoral program may wish to include STAT:5120 Mathematical Methods for Statistics in their course selections, since it is part of the required Ph.D. core.

MASTER OF SCIENCE FINAL EXAMINATION

Final examinations are offered the week before classes begin in August and in January. Study guides are available in the department office. Students who do not succeed the first time they take the exam may repeat it once.

Students must complete all requirements and be granted the Master of Science degree within one calendar year of passing the M.S. final examination; those who do not meet this deadline are required to take the exam again.

Students entering the Ph.D. program, who will choose either biostatistics, probability/mathematical statistics, or statistical modeling and computing as their concentration area, and who have already taken the equivalent of the first-year courses, may take the M.S. final examination in statistics before beginning further studies.

CREATIVE COMPONENT

Students must also complete a creative component that is related to their application and career interests. Students wishing to qualify for the Ph.D. program are encouraged to write a research-oriented creative component. The creative component entails writing an 8-15 page report on a suitable topic, under an advisor's supervision (with two consecutive 1 s.h. enrollments in STAT:6990 Readings in Statistics, normally during the fall and spring semesters of the second year). A draft of the paper should be completed by the end of the first enrollment in STAT:6990, and polished by early- to mid-semester in the second enrollment. The paper is then presented orally in a public seminar. A faculty committee, in consultation with the creative component advisor, evaluates the work and the presentation, and assigns a grade of satisfactory or unsatisfactory.

For students wishing to qualify for the Ph.D. program, the creative component represents one piece of the body of work used to determine Ph.D. qualification. The creative component must be satisfactorily completed within one calendar year of passing the M.S. final examination; failure to meet this deadline requires reexamination of the student.

Master of Science: Actuarial Science

The Master of Science program in actuarial science requires 36 s.h. of graduate credit. The program prepares students for actuarial careers by emphasizing the theory that underlies risk processes and the application of this theory to practical problems of insurance pricing and management. It also helps them learn material that is included in professional examinations administered by professional organizations such as the Society of Actuaries and the Casualty Actuarial Society.
Students in the actuarial science Master of Science program complete required courses and a M.S. final examination.

The M.S. in actuarial science requires the following course work.

One of these sequences:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT:4100</td>

<td>3 s.h.</td>
<td></td>
</tr>
</tbody>
</table>

The M.S. final examination is offered the weekend before classes begin in January. The exam covers the material presented in ACTS:6160 Topics in Actuarial Science, ACTS:4180 Life Contingencies I, ACTS:4280 Life Contingencies II, and ACTS:4380 Mathematics of Finance II. Students who do not succeed the first time they take the exam may repeat it once.

**Doctor of Philosophy**

The Doctor of Philosophy program in statistics requires a minimum of 76 s.h. of graduate credit, including work completed for the M.S. degree. The program prepares students for careers in research, applications, and teaching.

Ph.D. students complete required course work, including four courses in one of four concentration areas: biostatistics, probability/mathematical statistics, statistical modeling and computing, or actuarial science/financial mathematics (see "Concentration Areas" below for area descriptions and course lists). They may take course work or seminars in other departments to relate an area of specialization to other fields of knowledge, to acquire the ability to use electronic digital computing equipment, or to learn non-English language skills necessary for reading scientific journals and communicating with scholars in other languages.

Students enter the Ph.D. program in one of two tracks:

(Statistics) After successfully passing both the M.S. final examination in statistics and the creative component, a student who will choose either biostatistics, probability/mathematical statistics, or statistical modeling and computer as his or her concentration area, can request, by notifying the director of graduate studies, to go through the Ph.D. qualifying procedure after accumulating a larger body of work for evaluation; or the student is not admitted into the Ph.D. program.

(Actuarial Science) After successfully passing the M.S. final examination in actuarial science, a student who will choose actuarial science/financial mathematics as his or her concentration area, can request, by notifying the director of graduate studies, to go through the Ph.D. qualifying procedure. Upon this request, the faculty evaluates the student's body of work and assesses the student's potential for research. The body of work will include the M.S. final examination in actuarial science, professional examinations passed, and course work. This evaluation and assessment results in one of two decisions—the student is officially admitted into the Ph.D. program in the actuarial science/financial mathematics concentration area, or the student is not admitted into the Ph.D. program.

Students complete the program by passing the Ph.D. final (comprehensive) examination and writing and defending a dissertation. Students usually complete the program three years after earning the M.S. degree.

A program that does not conform to the requirements described below but is of high quality may be approved by the department chair.

Ph.D. students in statistics must maintain a g.p.a. of at least 3.00 in all work toward the degree and in additional relevant course work.

Each semester a Ph.D. student in statistics registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the department, excluding STAT:6990 Readings in Statistics and STAT:7990 Reading Research.

The Doctor of Philosophy in statistics requires the following work.

### STATISTICS COURSES

**Biostatistics, Probability/Mathematical Statistics, or Statistical Modeling and Computing Concentration Area**

Students in the biostatistics, probability/mathematical statistics, or statistical modeling and computing concentration area must complete the following core courses from the M.S. in statistics program.

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT:5090</td>
<td>ALPHA Seminar</td>

<td>consecutive enrollments)</td>
<td></td>
</tr>
</tbody>
</table>
Actuarial Science/Financial Mathematics Concentration Area

Students in the actuarial science/financial mathematics concentration area must complete the following core courses from the M.S. in actuarial science program.

One of these sequences:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT:4100-STAT:4101</td>
<td>Mathematical Statistics I-II</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>STAT:5100-STAT:5101</td>
<td>Statistical Inference I-II (for well-prepared students)</td>
<td>6 s.h.</td>
</tr>
</tbody>
</table>

All of these:

<table>

<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACTS:3080</td>
<td>Mathematics of Finance I</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ACTS:4130</td>
<td>Quantitative Methods for Actuaries</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ACTS:4180 &amp; ACTS:4280</td>
<td>Life Contingencies I-II</td>
<td>6 s.h.</td>
</tr>
<tr>
<td>ACTS:4380</td>
<td>Mathematics of Finance II</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ACTS:6160</td>
<td>Topics in Actuarial Science</td>
<td>arr.</td>
</tr>
<tr>
<td>ACTS:6480</td>
<td>Loss Distributions</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ACTS:6580</td>
<td>Credibility and Survival Analysis</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>STAT:4510</td>
<td>Regression, Time Series, and Forecasting</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

A course approved by the advisor 3 s.h.

All Concentration Area Courses

Additional Ph.D. core course work, regardless of concentration area—all of these:

<table>

CONCENTRATION AREAS

Students take at least four courses in one of the following concentration areas; at least two of the four courses must be at the Ph.D. level (numbered 5000 or above).

Statistical Modeling and Computing

Statistical modeling and computing emphasizes the theory and application of a broad array of statistical models, such as linear, generalized linear, nonlinear, categorical, spatial, correlated response, and nonparametric regression models. This concentration area prepares students to specify and choose appropriate models; fit the models using available statistical software; and make sound statistical conclusions and interpretive statements. It is excellent preparation for students interested in academic, industrial, or government positions that involve data modeling and analysis.

Probability/Mathematical Statistics

Probability/mathematical statistics emphasizes a broad, solid foundation in techniques and underpinnings of mathematical statistics. Its focus on breadth and depth is intended to produce well-rounded, knowledgeable scholars. It is excellent preparation for academic positions in mathematical statistics and industrial or government positions that require broadly trained statisticians with a strong understanding of statistical theory.

Biostatistics

Biostatistics emphasizes exposure to various biostatistical methods, such as survival analysis, categorical data analysis, and longitudinal data analysis. It prepares students for consulting and other positions in industry.

Actuarial Science/Financial Mathematics

Actuarial science/financial mathematics emphasizes the theory of actuarial science, finance, and risk management. It is excellent preparation for academic positions in universities that offer actuarial science programs and for positions in the insurance, pension, and financial industries. Most students who choose this concentration area are admitted after earning an M.S. in actuarial science at the University of Iowa.

PH.D. FINAL EXAMINATION

Students typically take the Ph.D. final (comprehensive) examination at the beginning of the third year of graduate study, during the week before fall classes begin. Students who do not succeed the first time they take the exam may repeat it once.

The comprehensive examination consists of a written core examination and an oral examination in two of the following four areas:

- statistical inference (topics in STAT:5100 Statistical Inference I, STAT:5101 Statistical Inference II, and STAT:7100 Advanced Inference I);
- linear models (topics in STAT:7200 Linear Models);
probability (topics in STAT:6300 Probability and Stochastic Processes I and STAT:7300 Foundations of Probability I); and

Ph.D. students in the actuarial science/financial mathematics concentration area have the option of taking only one of the four examinations listed above and an actuarial science/financial mathematics examination designed by their advisor and approved by the director of graduate studies.

**Ph.D. COMMITTEE**

Upon passing the Ph.D. final examination, the candidate chooses a committee of at least five members, which is approved by the advisor. At least four of the faculty members must be University of Iowa tenure-track faculty members. At least two of the faculty members must be from the major department (defined as faculty members who hold any appointment in the major department), and University of Iowa tenure-track faculty members.

The department may request the Graduate College dean's permission to replace one of the five committee members by a recognized scholar of professorial rank from another academic institution.

**PROSPECTUS**

Within 12 months of passing the Ph.D. final exam, the candidate presents a written and oral prospectus to the committee. The prospectus describes the problems the student is considering for the thesis, relevant background material, ideas for solving the problems, and any preliminary results.

**Financial Support**

Funds are available to help support outstanding Ph.D. applicants. Fellowships, teaching assistantships, and research assistantships provide an attractive stipend plus resident tuition status and tuition scholarships for students who are appointed at least one-quarter time. In most cases, full tuition waivers are granted.

Students who wish to be considered for financial assistance for their third year in the program should request to go through the Ph.D. qualifying process no later than the spring semester of their second year.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Facilities**

The Department of Statistics and Actuarial Science is housed in Schaeffer Hall, adjacent to Old Capitol, a National Historic Landmark and the center of campus. The department operates two computer labs in Schaeffer Hall. One, which also is used as an electronic classroom, contains 28 Windows PCs. The second houses 18 high-end UNIX workstations. Students use these labs for class work and research.

**Courses**

**Undergraduate Duplication and Regression Policy**

Undergraduate students should be aware of the duplication and regression policies concerning the following courses.

Students may earn credit for only two of these:

- STAT:1010 Statistics and Society
- STAT:1020 Elementary Statistics and Inference (same as PSQF:1020)
- STAT:1030 Statistics for Business, and

Credit for STAT:1010 Statistics and Society may be earned only if the course is taken before any of these:

- STAT:1020 Elementary Statistics and Inference (same as PSQF:1020)
- STAT:1030 Statistics for Business, or

Students may receive credit for only one course from each of these pairs:

- STAT:2010 Statistical Methods and Computing and STAT:4200 Statistical Methods and Computing
- STAT:3100 Introduction to Mathematical Statistics I and STAT:3120 Probability and Statistics, and
- STAT:3510 Biostatistics and STAT:4143 Introduction to Statistical Methods.

Students may not take STAT:3101 Introduction to Mathematical Statistics II and STAT:4101 Mathematical Statistics II at the same time and get credit for both (nor go back to STAT:3101 Introduction to Mathematical Statistics II after taking STAT:4101 Mathematical Statistics II).

**Lower-Level Undergraduate**

**Actuarial Science**

**ACTS:1001 Introductory Seminar on Actuarial Science**

1 s.h.

Introduction to actuarial science; U.S. actuarial organizations and actuarial qualification process; program requirements and tips for academic success; career center, actuarial club, and internships; actuarial career; ethics; communication; introduction to actuarial computing. Requirements: actuarial science interest major and first-year standing.

**Statistics**

**STAT:1000 First-Year Seminar**

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**STAT:1010 Statistics and Society**

3 s.h.

Statistical ideas and their relevance to public policy, business, and the social, health, and physical sciences; focus on critical approach to statistical evidence. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning.
STAT:1020 Elementary Statistics and Inference
3 s.h.
Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning. Same as PSQF:1020.

STAT:1030 Statistics for Business
4 s.h.
Descriptive statistics, graphical presentation, elementary probability, estimation and testing, regression, correlation; statistical computer packages. Prerequisites: MATH:0100. GE: Quantitative or Formal Reasoning.

STAT:2010 Statistical Methods and Computing
3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Prerequisites: MATH:1005. Recommendations: undergraduate standing. GE: Quantitative or Formal Reasoning.

STAT:2020 Probability and Statistics for the Engineering and Physical Sciences
3 s.h.
Probability, random variables, important discrete and continuous distributions, joint distributions, transformations of random variables, descriptive statistics, point and interval estimation, tests of hypotheses, regression. Prerequisites: MATH:1005.

Upper-Level Undergraduate and Graduate

Actuarial Science

ACTS:3080 Mathematics of Finance I
3 s.h.
Mathematics of compound interest; annuities certain, amortization schedules, yield rates, sinking funds, bonds; introduction to financial derivatives. Offered fall and spring semesters. Prerequisites: STAT:3100. Requirements: grade of B- or higher in STAT:3100 or graduate standing.

ACTS:3085 Introduction to Mathematics of Finance
4 s.h.
Mathematics of compound interest, including annuities certain, amortization schedules, yield rates, sinking funds, bonds, introduction to financial derivatives. Offered spring semesters. Prerequisites: STAT:3100. Requirements: grade of B- or higher in STAT:3100.

ACTS:3110 Actuarial Exam P Preparation
1 s.h.
Preparation for the Society of Actuaries exam P.

ACTS:3210 Actuarial Exam FM Preparation
1 s.h.
Preparation for the Society of Actuaries exam FM. Corequisites: ACTS:3080 or ACTS:3085, if not taken as a prerequisite.

ACTS:4110 Actuarial Exam MLC Preparation
1 s.h.

ACTS:4130 Quantitative Methods for Actuaries
3 s.h.
Survival distributions, life tables, and mathematics of derivatives. Offered fall and spring semesters. Corequisites: (ACTS:3080 or ACTS:3085) and (STAT:4100 or STAT:5100). Requirements: multivariate calculus and linear algebra.

ACTS:4180 Life Contingencies I
3 s.h.
Life insurance, life annuities, benefit premiums and reserves. Offered spring semesters. Prerequisites: ACTS:4130 and (ACTS:3080 or ACTS:3085) and (STAT:4100 or STAT:5100). Requirements: grade of C+ or higher in ACTS:4130, and grade of C+ or higher in ACTS:3080 or ACTS:3085.

ACTS:4280 Life Contingencies II
3 s.h.
Continuation of ACTS:4180; net and gross premium reserves, multistate models, universal life insurance, interest rate risk. Offered fall semesters. Prerequisites: ACTS:4180. Requirements: grade of C+ or higher in ACTS:4180.

ACTS:4380 Mathematics of Finance II
3 s.h.
Derivatives markets, options on stocks and interest rates, financial applications. Offered spring semesters. Prerequisites: ACTS:4130 and (ACTS:3080 or ACTS:3085) and (STAT:4100 or STAT:5100). Requirements: grade of C+ or higher in ACTS:4130, and grade of C+ or higher in ACTS:3080 or ACTS:3085.

Statistics

STAT:3100 Introduction to Mathematical Statistics I
3 s.h.
Descriptive statistics, probability, discrete and continuous distributions, sampling, sampling distributions. Prerequisites: MATH:1560 or MATH:1860.

STAT:3101 Introduction to Mathematical Statistics II
3 s.h.
Estimation, testing statistical hypotheses, linear models, multivariate distributions, nonparametric methods. Prerequisites: STAT:3100.

STAT:3120 Probability and Statistics
4 s.h.
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860.

STAT:3200 Applied Linear Regression
3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2010 or STAT:2020. Same as IE:3760.

STAT:3210 Experimental Design and Analysis
3 s.h.
Single- and multifactor experiments; analysis of variance; multiple comparisons; contrasts; diagnostics; fixed, random, and mixed effects models; designs with blocking and/or nesting; two-level factorials and fractions thereof; use of statistical computing packages. Prerequisites: STAT:3200.

**STAT:3510 Biostatistics** 3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Prerequisites: MATH:0100.

**STAT:3620 Quality Control** 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020. Same as IE:3600, CEE:3142.

**STAT:4100 Mathematical Statistics I** 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2700 and MATH:2850.

**STAT:4101 Mathematical Statistics II** 3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100.

**STAT:4143 Introduction to Statistical Methods** 3 s.h.
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as PSQF:4143.

**STAT:4200 Statistical Methods and Computing** 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Prerequisites: MATH:1005. Recommendations: graduate standing in non-statistics or less quantitative major.

**STAT:4510 Regression, Time Series, and Forecasting** 3 s.h.
Regression analysis, forecasting, time series methods; use of statistical computing packages. Prerequisites: STAT:4101 or STAT:5101. Requirements: grade of C+ or higher in STAT:4101 or STAT:5101.

**STAT:4520 Bayesian Statistics** 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3100 and STAT:3101) or STAT:3120 or (STAT:4100 and STAT:4101). Same as PSQF:4520.

**STAT:4740 Large Data Analysis** 3 s.h.
Current areas that deal with problem of Big Data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: CS:1210 and MATH:2700 and (STAT:2010 or STAT:2020). Same as CS:4740, MATH:4740.

**Graduate**

**Actuarial Science**

**ACTS:6160 Topics in Actuarial Science** arr.
Prerequisites: ACTS:4180 and ACTS:4380. Requirements: grades of C+ or higher in ACTS:4180 and ACTS:4380.

**ACTS:6480 Loss Distributions** 3 s.h.
Severity, frequency, and aggregate models and their modifications; risk measures; construction of empirical models. Offered spring semesters. Prerequisites: STAT:4101 or STAT:5101. Corequisites: ACTS:6580. Requirements: grade of C+ or higher in STAT:4101 or STAT:5101.

**ACTS:6580 Credibility and Survival Analysis** 3 s.h.
Construction and selection of parametric models; credibility; simulation. Offered spring semesters. Prerequisites: STAT:4101 or STAT:5101. Corequisites: ACTS:6480. Requirements: grade of C+ or higher in STAT:4101 or STAT:5101.

**ACTS:7730 Advanced Topics in Actuarial Science/Financial Mathematics** arr.

**Statistics**

**STAT:5090 ALPHA Seminar** 1 s.h.
Resources available to students, program requirements, tips for academic success, professional statistical organizations, library and career center resources, statistical computing, scientific document preparation, history of statistics. Requirements: graduate standing in statistics.

**STAT:5100 Statistical Inference I** 3 s.h.
Review of probability, distribution theory (multiple random variables, moment-generating functions, transformations, conditional distributions), sampling distributions, order statistics, convergence concepts, generating random samples. Prerequisites: MATH:2850 and STAT:3101.
STAT:5101 Statistical Inference II 3 s.h.
Continuation of STAT:5100; principles of data reduction, point estimation theory (MLE, Bayes, UMVU), hypothesis testing, interval estimation, decision theory, asymptotic evaluations. Prerequisites: STAT:5100.

STAT:5120 Mathematical Methods for Statistics 3 s.h.
Real numbers, point set theory, limit points, limits, metric spaces, continuity, sequences and series, Taylor series (multivariate), uniform convergence, Riemann-Stieltjes integrals. Requirements: statistics graduate standing.

STAT:5200 Applied Statistics I 4 s.h.
Introduction to computing environments and statistical packages, descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation). Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra.

STAT:5201 Applied Statistics II 3 s.h.
Design of experiments and analysis of designed experiments; models for fixed and random effects; mixed models; design and analysis of complex plans; sample-size methods. Prerequisites: STAT:5200.

STAT:5400 Computing in Statistics 3 s.h.
R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: STAT:3200, and STAT:3120 or STAT:3101 or STAT:4101. Corequisites: STAT:5100 and STAT:5200, if not taken as prerequisites.

STAT:5610 Design and Analysis of Biomedical Studies 3 s.h.
Simple and multiple linear regression and correlation; one- and two-way layout considerations in planning experiments; factorial experiments; multiple comparison techniques; orthogonal contrasts. Offered spring semesters. Prerequisites: BIOS:5110. Same as BIOS:5120.

STAT:5810 Research Data Management 3 s.h.
Overview of problems encountered in gathering and processing data from biomedical investigations; introduction to data management techniques useful in biomedical studies; introduction to Microsoft Access. Offered fall semesters. Requirements: Python or Java or C programming capability. Same as BIOS:5310.

STAT:6220 Statistical Consulting 3 s.h.
Realistic supervised data analysis experiences, including statistical packages, statistical graphics, writing statistical reports, dealing with complex or messy data. Offered spring semesters. Prerequisites: (STAT:3200 and STAT:3210) or (STAT:5200 and STAT:5201). Requirements: for undergraduate majors — major g.p.a. of 3.00 or above, and grades of B or higher in STAT:3200 and STAT:3210.

STAT:6300 Probability and Stochastic Processes I 3 s.h.
Conditional expectations; Markov chains, including random walks and gambler's ruin; classification of states; stationary distributions; branching processes; Poisson processes; Brownian motion. Prerequisites: STAT:4100.

STAT:6301 Probability and Stochastic Processes II 3 s.h.
Markov chains with continuous state space, Martingales, random walks, Brownian motion and other continuous-time Markov chains, simulation methods. Prerequisites: STAT:6300.

STAT:6510 Applied Generalized Regression 3 s.h.
Applications of semiparametric models, generalized linear models, nonlinear normal errors models, correlated response models; use of statistical packages, especially SAS. Requirements: introductory statistics and applied linear models.

STAT:6513 Intermediate Statistical Methods 4 s.h.

STAT:6514 Correlation and Regression 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Requirements: for PSQF:6244 — PSQF:6243; for STAT:6514 — STAT:6513. Same as PSQF:6243.

STAT:6516 Design of Experiments 4 s.h.

STAT:6530 Environmental and Spatial Statistics 3 s.h.
Methods for sampling environmental populations, sampling design, trend detection and estimation, geostatistics, kriging, variogram estimation, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:3200 and STAT:4101.

STAT:6540 Applied Multivariate Analysis 3 s.h.

STAT:6547 Nonparametric Statistical Methods 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisites: PSQF:6243 or STAT:3120. Same as PSQF:6247.

STAT:6550 Introductory Longitudinal Data Analysis 3 s.h.
Statistical models and estimation methods used to analyze correlated data (e.g., same subject measured repeatedly); emphasis on use of statistical software. Offered fall semesters of odd years. Prerequisites: STAT:3200 or STAT:6510 or BIOS:5730 or BIOS:6110. Same as BIOS:6310.

STAT:6560 Applied Time Series Analysis 3 s.h.
General stationary, nonstationary models, autocovariance autocorrelation functions; stationary, nonstationary autoregressive integrated moving average models; identification, estimation, forecasting in linear models; use of statistical computer packages. Offered spring semesters. Prerequisites: STAT:3101 and (STAT:3200 or STAT:5200).

STAT:6970 Topics in Statistics 3 s.h.

STAT:7100 Advanced Inference I 3 s.h.
Concepts of convergence, asymptotic methods including the delta method, sufficiency, asymptotic efficiency, Fisher information and information bounds for estimation, maximum likelihood estimation, the EM-algorithm, Bayes estimation, decision theory. Prerequisites: STAT:5101 and STAT:5120.

STAT:7101 Advanced Inference II 3 s.h.
Hypothesis testing, asymptotics of the likelihood ratio test, asymptotic efficiency, statistical functionals, robustness, bootstrap and jackknife, estimation with dependent data. Prerequisites: STAT:7100.

STAT:7200 Linear Models 4 s.h.
Linear spaces and selected topics in matrix algebra, multivariate normal distribution and distributions of quadratic forms, full-rank and non-full-rank linear models, estimability, least squares and best linear unbiased estimator, interval estimation, hypothesis testing, random and mixed models, best linear unbiased prediction, variance component estimation. Prerequisites: STAT:5101 and STAT:5200 and STAT:5201.

STAT:7300 Foundations of Probability I 3 s.h.
Probability theory, with emphasis on constructing rigorous proofs; measure spaces, measurable functions, random variables and induced measures, distribution functions, Lebesque integral, product measure and independence, Borel Cantelli lemma, modes of convergence. Prerequisites: STAT:5120.

STAT:7301 Foundations of Probability II 3 s.h.
Laws of large numbers, characteristic functions and properties, central limit theorem, Radon-Nikodym derivatives, conditional expected value and martingales. Prerequisites: STAT:7300.

STAT:7390 Seminar: Probability arr.

STAT:7400 Computer Intensive Statistics 3 s.h.
Computer arithmetic; random variate generation; numerical optimization; numerical linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: STAT:3101 and (STAT:5200 or BIOS:5710). Requirements: proficiency in Fortran or C or C++ or Java.

STAT:7510 Analysis of Categorical Data 3 s.h.
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: (STAT:4101 or STAT:5101) and (STAT:5200 or BIOS:5720). Same as BIOS:7410.

STAT:7520 Bayesian Analysis 3 s.h.
Decision theory, conjugate families, structure of Bayesian inference, hierarchical models, asymptotic approximations for posterior distributions, Markov chain Monte Carlo methods and convergence assessment, model adequacy and model choice. Prerequisites: STAT:5101 and STAT:5200 and STAT:5400.

STAT:7560 Time Series Analysis 3 s.h.
Stationary time series, ARIMA models, spectral representation, linear prediction inference for the spectrum, multivariate time series, state space models and processes, nonlinear time series. Prerequisites: STAT:4101 and STAT:6560.

STAT:7570 Survival Data Analysis 3 s.h.
Types of censoring and truncation; survival function estimation; life tables; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; analysis of correlated survival data. Offered fall semesters. Prerequisites: BIOS:5720 and (STAT:4101 or STAT:5101). Same as BIOS:7210.

STAT:7990 Reading Research arr.
Theatre Arts

**Director, Division of Performing Arts**
- Alan MacVey

**Chair, Department of Theatre Arts**
- Alan MacVey

**Undergraduate major:** theatre arts (B.A.)
**Undergraduate minor:** theatre arts
**Graduate degree:** M.F.A. in theatre arts
**Faculty:** http://theatre.uiowa.edu/people
**Web site:** http://theatre.uiowa.edu/

The Department of Theatre Arts offers academic programs for undergraduate and graduate students. It also stages live performances throughout the academic year and during the summer.

The department is one of three academic units in the Division of Performing Arts (p. 227). Students have the opportunity to earn a major in theatre arts and a second major in one of the other units within the division—dance or music. It also participates in offering the division's Certificate in Performing Arts Entrepreneurship (p. 498).

**Undergraduate Programs of Study**

- Major in theatre arts (Bachelor of Arts)
- Minor in theatre arts

The undergraduate program in theatre arts is based on the philosophy that the best way to develop future artists is to expose them to rigorous professional practice within the framework of a liberal arts and sciences education.

Department of Theatre Arts students take workshop courses in acting, directing, design, technical theatre, stage management, and playwriting and complement them with classes in dramatic literature, history, and criticism. Students also are encouraged to explore a range of courses throughout the University. Around 25 public productions are staged each year, providing additional opportunities to learn the theatre craft and to develop a personal artistic vision.

The department also educates students who plan to enter other fields in which understanding of the arts and experience with theatre skills are useful. Some earn a major in theatre arts, occasionally with a second major in another discipline. Others take theatre classes as nonmajors or earn a minor; see "Minor" and "Courses for Nonmajors" in this section of the Catalog.

**Bachelor of Arts**

The Bachelor of Arts with a major in theatre arts requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The curriculum for the theatre arts major listed below constitutes the basic experience for all undergraduate theatre arts students. Registration in some courses for the major requires special permission. Contact the Department of Theatre Arts for details.

Students who transfer to the University from other accredited two- or four-year institutions must demonstrate that they have successfully completed course work equivalent to the basic requirements of the Department of Theatre Arts and the University of Iowa before they may take advanced-level electives. If a student completes the courses listed for the approved 2 Plus 2 theatre arts program at Kirkwood Community College, Iowa Central Community College, or Indian Hills Community College in Iowa, those courses are automatically counted toward requirements for the theatre arts major at the University of Iowa. Consult the department's director of undergraduate studies for more information.

In planning course work, especially electives, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: students earning a B.A. or B.S. may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students majoring in theatre arts may count a maximum of 23 s.h. earned in Department of Theatre Arts elective courses (prefix THTR) toward the Bachelor of Arts. Theatre arts elective credit beyond 23 s.h. is listed on the transcript but does not count toward the 120 s.h. required for graduation.

Students must complete a course's prerequisites before registering for the course. They normally complete the following required courses (from the "Theatre Foundation Courses" list below) within their first four semesters in the major:

- THTR:2140 Acting I
- THTR:2402 Script Analysis
- THTR:2410 History of Theatre and Drama I, and
- THTR:2411 History of Theatre and Drama II

Students who complete THTR:1400 Theatre and Society: Ancients and Moderns or THTR:1401 Theatre and Society: Romantics and Rebels before declaring a major in theatre arts must consult the undergraduate director before they may register for THTR:2410 History of Theatre and Drama I or THTR:2411 History of Theatre and Drama II.

The theatre arts major requires the following course work.

**THEATRE FOUNDATION COURSES**

Student Auditions for Theatre Arts Productions

Theatre arts majors are encouraged to audition for the department’s productions in general auditions at the beginning of the fall semester. Students normally present a three-minute audition consisting of two contrasting pieces. From this audition, callback lists are posted for major productions offered during the first semester. Additional general auditions normally are scheduled in early November and in March.

Students in other majors are welcome to audition for the department’s productions, as are community members (see "Productions and Auditions" later in this section). For academic considerations, theatre arts majors are given first consideration for roles.

Materials and information about the general auditions are available from the Department of Theatre Arts office in August. Notices of auditions for all subsequent productions are posted on the department’s call board.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the fifth semester begins: three courses in the major chosen from THTR:2140 Acting I, THTR:2402 Script Analysis, THTR:2410 History of Theatre and Drama I, and THTR:2411 History of Theatre and Drama II

Before the seventh semester begins: three more courses in the major, two semesters of production credit, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: two more courses in the major and one more semester of production credit

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Iowa Degree in Three

University of Iowa majors who are strongly motivated can graduate with a degree in three years under the Iowa Degree in Three. The program is available to students who can complete more semester hours each term than they would on the Four-Year Graduation Plan.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

Students are allowed to bring Advanced Placement (AP), College Level Examination Program (CLEP), or transfer credit upon admission to reduce the number of semester hours required for their degree. They should consult their advisor about the program.

Honors in the Major

Students majoring in theatre arts have the opportunity to graduate with honors in the major. Students who wish to graduate with honors should declare their intention to the department’s honors advisor. To graduate with
honors in the major, students must maintain a g.p.a. of at least 3.33 in the major; complete at least 12 s.h. of work in Department of Theatre Arts honors courses, which must include THTR:4692 Honors Theatre Arts; and give a creative presentation or performance or write an honors thesis.

Students who elect to give a creative presentation or performance must have senior standing and must complete at least one honors course before their proposed project may be approved. They must apply to the director of theatre for approval of their project by April 1 of the year before the project is to be scheduled (projects are not guaranteed a production slot). They also must enroll in THTR:4692 Honors Theatre Arts during the semester in which they complete their presentation or performance.

For more information about theatre arts honors requirements, contact the Department of Theatre Arts office.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

### Minor

The minor in theatre arts requires a minimum of 15 s.h. in theatre arts courses, including 12 s.h. in courses considered advanced for the minor taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Students must complete all prerequisites for the courses they choose for the minor.

All theatre courses are open to students minoring in theatre arts except THTR:2140 Acting I, which is normally reserved for students earning the theatre arts major. Theatre arts minors who are interested in acting usually take THTR:1140 Basic Acting and THTR:1141 Basic Acting II. Then they may request permission to enroll in THTR:3140 Acting II. When enrollment allows, they also may request permission to take THTR:2140 Acting I.

The following courses are considered advanced for the minor.

- THTR:1141 Basic Acting II 3 s.h.
- THTR:2140 Acting I 3 s.h.
- THTR:2200 Elements of Design 3 s.h.
- THTR:2215 Theatre Technology 3 s.h.
- THTR:2301 Playwriting I 3 s.h.
- THTR:2402 Script Analysis 3 s.h.
- THTR:2410 History of Theatre and Drama I 3 s.h.
- THTR:2411 History of Theatre and Drama II 3 s.h.

Courses numbered 3000 or above, excluding THTR:3220 and THTR:3287 (some courses require special permission)

Contact the Department of Theatre Arts for more information about how to meet the requirements for the minor.

### Courses for Nonmajors

Most theatre arts courses are open to all students, regardless of their majors, and are appropriate for nonmajors interested in theatre. The following courses are designed specifically for nonmajors.

- THTR:1141 Basic Acting II 3 s.h.
- THTR:1410 Musical Theatre 3 s.h.
- THTR:1412 The Arts in Performance 3 s.h.
- THTR:2120 Movement: Special Topics 2-3 s.h.
- THTR:3150 Public Speaking 3 s.h.
- THTR:3210 Makeup Design for the Stage 3 s.h.
- THTR:3301 Playwriting II 3 s.h.
- THTR:3510 Introduction to Arts Management 3 s.h.
- THTR:3520 New Ventures in the Arts 3 s.h.
- THTR:3521 Acting for Singers and for Dancers 2 s.h.

For a complete list of theatre arts courses, see "Courses" below.

Several of the department's courses are approved for General Education; look for courses with the prefix THTR in the area lists under "Culture, Society, and the Arts" in the General Education Program (p. 313) section of the Catalog.

### Graduate Program of Study

- **Master of Fine Arts in theatre arts**

**Master of Fine Arts**

The Master of Fine Arts program in theatre arts requires 61-82 s.h. of graduate credit, depending on the student's specialty area. Students normally must complete six semesters in residence (internships may be substituted).

The graduate program is dedicated to creative development of theatre artists. Graduates have a solid background in major performance theories, dramatic literature, and practices of the past and present as well as in the craft of their chosen specialties.

Special attention is given to understanding the role and importance of live theatre in society. Interactions among the various theatre disciplines are emphasized, both in classes and through the department's extensive production program. Particular emphasis is placed on the development of new works for the theatre.

Students who demonstrate exceptional ability in acting, directing, dramaturgy, playwriting, design, or stage management may apply for admission to the program of study and production leading to the M.F.A. Admission is based on an interview, audition, and/or a portfolio of relevant work, the undergraduate record or other proof of artistic accomplishment, and letters of recommendation.

Submission of playscripts is the most important element in gaining admission to the Playwrights Workshop.
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Productions and Auditions

The Department of Theatre Arts presents around 25-30 public productions each year. These include a subscription series of five plays, a festival of new works by students, and other productions, many of them new plays.

Special attention is given to the process of developing new works and to the collaborative process that involves writers, directors, designers, dramaturgs, stage managers, and actors. Graduate and undergraduate students, faculty, and visiting guest artists work together on large and small projects throughout the year.

Auditions for Theatre Arts Productions

Auditions for theatre arts productions are open to everyone, including all University of Iowa students and members of the local community. Theatre arts students are given first priority for roles, but many roles are available throughout the year, so many students in other majors and nonstudent actors are cast each season. Occasionally, professional actors are employed.

General auditions are held at the beginning of the fall semester, and callback lists are posted during the semester. Additional general auditions usually are scheduled in early November and in March. Information about auditions is available from the Department of Theatre Arts office in August. Notices of auditions are posted on the department's call board.

Facilities

The University of Iowa has one of the finest educational theatre complexes in the country. The Theatre Building offers four theatres and up-to-date facilities for classroom, laboratory, shop, and performance work.

The E.C. Mabie Theatre, a continental-style, 457-seat proscenium playhouse, is one of the finest theatres of its type in the United States. The David Thayer Theatre is a "black box" production space; its flexible seating units accommodate from 140 to 225 people and allow modification of space and audience relationships. Theatre B, which seats 144, is an open-stage theatre dedicated primarily to the production of new and experimental works. The flexible studio theatre seats 50.

In addition to classrooms for acting and directing, several spaces are designed for teaching particular aspects of dramatic studies. The Cosmo Catalano Acting Studio is for study of movement and by acting students. The Arnie Gillette Design Studio serves as classroom and studio workshop for design students.

To support its production schedule and to provide students with an appropriate range of experience, the department maintains shops for building, painting, maintaining, and storing scenery, costumes, and properties. Using these shops, students learn to work in metal, plastics, canvas, and wood.

Courses

Lower-Level Undergraduate

THTR:1000 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

THTR:1001 CLAS Master Class 1-3 s.h.
Exploration of a single topic in a series of lectures by faculty presenting divergent perspectives; illuminates intellectual adventure inherent in liberal arts and sciences; encourages discovery of majors and other areas of study within the College of Liberal Arts and Sciences. Same as CLAS:1001, RELS:1010, CS:1001, CSD:1001, PHIL:1001, ENGL:1001, BIOL:1001, ARTS:1001.

THTR:1010 Art of the Theatre 3 s.h.

THTR:1120 Basic Acting for Language Learners 3 s.h.
Development of theatrical creativity to enhance English language skills through acting games, monologues, and scene work; exercises in concentration, relaxation, communication, imagination, observation, sensory awareness. Same as ESL:1950.

THTR:1140 Basic Acting 3 s.h.
Concentration, relaxation, imagination, observation, communication, sensory awareness; development of theatrical creativity through objectives, obstacles, action, conflict, spontaneity; development of a scene from scripts. Requirements: non-theatre arts major. GE: Literary, Visual, and Performing Arts.

THTR:1141 Basic Acting II 3 s.h.
Continuation of THTR:1140; emphasis on development of scenes. Prerequisites: THTR:1140. Requirements: non-theatre arts major.

THTR:1400 Theatre and Society: Ancients and Moderns 3 s.h.
Representative plays as performed in social contexts of ancient Egypt; classical Greece, Rome, India, and Japan; and medieval and early modern Europe. Duplicates THTR:2410. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

THTR:1401 Theatre and Society: Romantics and Rebels 3 s.h.
Representative plays as performed in social contexts of revolutionary and modern Europe and postwar United States. Duplicates THTR:2411. GE: Historical Perspectives; Literary, Visual, and Performing Arts.
THTR:1410 Musical Theatre 3 s.h.
American musical theatre’s form, function, evolution; major composers (Berlin, Gershwin, Rodgers and Hammerstein, Sondheim), lesser-known and contemporary writers; roots of the rock musical, future of musical theatre, how musicals reflect their own eras and cultural attitudes of their times; readings, recordings, videos. Ability to read music not required.

THTR:1411 Comedy and Society 3 s.h.
How comedy reflects, comments upon, and intersects with western culture, society, and identity; roots of western comedy, satire, censorship; stand-up comedians, improv and sketch troupes, satirists; race, gender and sexuality, class perception; how portrayals of African Americans in popular culture evolved from 19th century to present; videos, readings, live performances. GE: Values, Society, and Diversity.

THTR:1412 The Arts in Performance 3 s.h.

THTR:2120 Movement: Special Topics 2-3 s.h.
Specialized study in movement techniques and movement styles for body conditioning; development of yoga techniques; varied topics.

THTR:2140 Acting I 3 s.h.
Development of creativity, imagination, and openness through exercises to engage mind, body, and voice in theatrical play and scene work. Requirements: theatre arts major, or theatre arts minor and THTR:1140.

THTR:2200 Elements of Design 3 s.h.
Development of visual literacy; manipulation of line, shape, color, value, texture, form; development of designs for theatre through techniques explored in class.

THTR:2215 Theatre Technology 3 s.h.
Theatrical production; technology and backstage operations including sound, projections, lighting, scenery, costumes, stage management.

THTR:2220 Production Lab 1-3 s.h.
Practical experience in physical construction and operation of live theatre; theatre department productions provide lab experiences for applied learning in technical theatre and run crew opportunities in scenery, costumes, lighting, sound, and stage management.

THTR:2301 Playwriting I 3 s.h.
Elements of playwriting; emphasis on analysis and discussion of original student writing. GE: Literary, Visual, and Performing Arts.

THTR:2402 Script Analysis 3 s.h.
Basic skills in critical reading and close analysis of dramatic texts, with focus on dramatic structure, challenges of putting texts into production.

Role of American theatre as a complex tapestry of race, gender, sexuality, and disability; examination of plays and performance outside primarily white-male canon; contemporary social practice and cultural politics in local and national contexts. GE: Values, Society, and Diversity.

THTR:2410 History of Theatre and Drama I 3 s.h.
Major developments in Anglo-European, Indian, Asian, and African theatre and drama, 3000 B.C.E. to C.E. 1700; sociopolitical, economic, and cultural circumstances of original productions. Offered spring semesters. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

THTR:2411 History of Theatre and Drama II 3 s.h.
Continuation of THTR:2410, 1700 to 1960; revolutionary and modern European theatre and culturally diverse postwar U.S. theatre. Offered fall semesters. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

THTR:2610 Acting for Success 3 s.h.
How skills learned by actors in the theatre world can be applied to presentations and interactions in business, education, and beyond; business world reliance on technology for communication; ability to connect and communicate on a personal level with others as the x-factor to stand out as a team player and a leader; acting techniques traditionally used in theatre to open up communication in office and interviews; presentations and elevator pitches (armed with techniques to avoid stage fright); how to connect and bring authentic self to everything you do. Same as RHET:2610.

Upper-Level Undergraduate and Graduate

Acting and Directing

THTR:3070 Dance Kinesiology 3 s.h.
Body science related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; functional skeletal alignment; how individual differences may affect movement performance. Prerequisites: HHP:1100. Same as DANC:3070.

THTR:3110 Voice for the Actor 3 s.h.
Progressive development of voice and speech for theatre; physical awareness, relaxation, breathing, freeing the sound channel, resonance, articulation; application of voice work through prose, poetry, text. Prerequisites: THTR:1141 or THTR:2140.

THTR:3120 Theatre Movement 3 s.h.
The body as a tool for dramatic expression; basic principles and practices of stage movement; approaches to physical technique. Prerequisites: THTR:2140. Requirements: theatre arts major.
THTR:3130 Singing for Actors  
Skill development for healthy, effective singing in the musical theatre style; techniques of vocal production through breath management, resonance, articulation, flexibility; song interpretation and repertoire. Recommendations: for MUS:3520 — concurrent registration in MUS:1020. Same as MUS:3520.

THTR:3140 Acting II  
Extension of work begun in THTR:2140; scene study, with focus on contemporary realism and development of collaborative dynamic. Prerequisites: THTR:1141 or THTR:2140.

THTR:3150 Public Speaking  
How to be an effective and confident communicator; exercises designed to develop and improve vocal sound, vocal strength, clarity of speech; appropriate interpretation of text.

THTR:3151 Accents and Dialects  
Varied topics on a rotational basis, may include vocal study of classical text including Shakespeare, dialects, and voice in classical and contemporary comedy. Prerequisites: THTR:3110.

THTR:3160 Movement Styles  
Intensive study of a selected movement style (e.g., mask, clown, commedia dell'arte). Prerequisites: THTR:3120.

THTR:3162 Movement: Special Topics II  
Specialized study in movement techniques and movement styles for body conditioning; intermediate development of yoga techniques; varied topics. Prerequisites: THTR:2120.

THTR:3315 Standup Comedy Practicum  
Writing and performing standup comedy; emphasis less on creating a comic persona and more on pulling from and articulating personal truth; analysis of contemporary comedians and joke structure; performing original work for multiple audiences in classroom and out in community. Prerequisites: THTR:1140 or THTR:2140 or THTR:2301.

THTR:3421 Performing Autobiography  
Write and perform original pieces stemming from personal experiences and interests; readings and videos; genre of contemporary autobiographical performance as established artists have developed it; improvisational performance and writing exercises to foster deeper reflection on personal experiences; final staging of students' original work. Same as GWSS:3421.

THTR:3521 Acting for Singers and for Dancers  
Fundamentals of acting technique, with attention to demands on performers in opera, musical theater, and dance. Same as MUS:3521, DANC:3521.

THTR:3601 Theatre for Social Outreach  
Use of improvisation, storytelling, readers' theatre to explore complex social issues; participation in Darwin Turner Action Theatre; experience creating works that examine social issues, especially those related to cultural diversity; performances in Iowa schools and communities.

THTR:3520 Acting for Singers and for Dancers  
3 s.h.

THTR:3605 Inclusive Theatre  
Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations. Same as EDTL:3963.

THTR:3610 Drama in the Classroom  
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as EDTL:3180.

THTR:3850 Introduction to Laban Movement Studies  
Introduction to Bartenieff Fundamentals (BF) and Laban Movement Analysis (LMA) as methods of organizing and integrating movement to support artistic goals and expanding expressive range; BF teaches body awareness, breath support, developmental patterns, ergonomically-efficient alignment, balancing of muscular strength and stretch, and coordination; LMA teaches vocabulary of expressive movement and nonverbal communication, including effort (use of energy/dynamics for expression, stamina, stress relief) and shape (how posture and gesture communicate); quality of movement that supports individual goals in artistic expression, sound production, and wellness. Same as MUS:3850, DANC:3850, DPA:3850.

THTR:3851 Introduction to the Alexander Technique  
The Alexander Technique and "self-use"—how movement choices affect results achieved; improvement of physical skills and presence; principles in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting); application to skills in daily life, addressing underpinnings of movement; physical participation (e.g., lying down, rolling, sitting, standing, locomotion). Same as DPA:3851, MUS:3851, DANC:3851.

THTR:4144 Acting: Special Topics  
Specialized study in a specific aspect or theory of acting.

THTR:4180 Directing I  
Basic elements of stage direction; exercises in composition, emphasis, movement, rhythm, directorial analysis; director's role in production process; short scenes, projects, papers. Prerequisites: (THTR:1140 or THTR:2140) and (THTR:2402 or CINE:1601).

THTR:4182 Directing II  
Continuation of THTR:4180; practical work in stage direction culminating in a larger directing project. Prerequisites: THTR:4180.

THTR:6140 Advanced Acting  
Preprofessional training; may include psychophysical training in impulse, openness and the "mask," individual and group dynamics, improvisation, repetition, characterization and scene work, Shakespeare and style, on-camera, development of professional work habits and skills, audition and interview. Requirements: admission to M.F.A. program.
**THTR:6150 Vocal Technique** 3 s.h.
Skills training; voice and speech for the actor, phonetics, dialects, sound exploration, contemporary and classical text analysis. Requirements: admission to M.F.A. program.

**THTR:6160 Movement Technique** 3 s.h.
Fundamental principles and practices required for physical acting technique; basic stage movement, stage combat, mime technique, Lecoq-based improvisation; a new works project. Requirements: admission to M.F.A. program.

**THTR:6170 Graduate Acting: Special Topics** 3 s.h.
Specialized study in one aspect or theory of acting. Requirements: admission to M.F.A. program.

**THTR:6180 Director's Seminar** 1-3 s.h.
Preprofessional training in stage direction; the art and craft of directing; research, practical experience; development of new pieces; approaches to a variety of theatrical materials through concept, type, style. Requirements: admission to M.F.A. program.

**THTR:6525 Voice for Performers** 2 s.h.
Comparison of Kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Same as CSD:6204, MUS:6525.

**Design and Technical Theatre**

**THTR:3202 Graphic Design and Identity** 3 s.h.
Series of projects focusing on creating strong graphic design and graphic identity using Abode Creative Suite.

**THTR:3203 Computer Visualization** 3 s.h.
Creation of virtual design using Adobe Photoshop and Google SketchUp.

**THTR:3205 Concepts in Drawing** 3-4 s.h.
Intermediate-level topics; observation, theory, media, form, content; emphasis on personal direction. Prerequisites: DRAW:2310. Same as DRAW:3310.

**THTR:3206 Furniture Design I** 4 s.h.
Human interaction with interior and exterior environment. Prerequisites: TDSN:2210. Same as TDSN:3210.

**THTR:3208 Mask and Puppet Crafts** 3 s.h.
Mask and puppet design; paper mache, plaster gauze, thermal plastics, and soft sculpture techniques.

**THTR:3210 Makeup Design for the Stage** 3 s.h.
Same as DPA:3210.

**THTR:3211 Period Styles** 3 s.h.
Survey of design and motifs spanning history of western civilization through development of interior and exterior architecture, furniture, decorative themes, fashion, and fine art.

**THTR:3220 Construction Technology for New Works** 3 s.h.
Production of scenic and prop elements for the Department of Theatre Arts annual Iowa New Play Festival; basic construction and painting skills in a lab environment; weekly design and production meetings to include each student in the entire production process; run crew assignments, projects.

**THTR:3221 Technology for the Entertainment Industry** 3 s.h.
Introduction to technology skills that are at the center of the entertainment industry; programming and operating digital lighting and sound consoles, intelligent lighting systems, projection hardware and software; outdoor event rigging, metal construction, and fabrication. Same as DPA:3221.

**THTR:3223 Introduction to Lighting Technology** 3 s.h.
Training for a career as a touring or resident stage electrician in the entertainment industry; plot organization/shop orders, digital fixtures, power distribution, personal management, console configuration/ control, and electrical troubleshooting/maintenance.

**THTR:3225 Makeup Design: Body Art** 3 s.h.
Advanced techniques in stage makeup design and application through analysis of forms, research, and hands-on projects.

**THTR:3230 Scene Design I** 3 s.h.
Development of theatre scenery; how to research, conceptualize, and express ideas in 3-D models, simple sketches, and drafting. Same as ARTS:3230.

**THTR:3240 Costume Design I** 3 s.h.
Introduction to theatre costumes; how to conceptualize and express ideas through rendering and 3-D mannequin projects. May be taken after THTR:4240.

**THTR:3250 Lighting Design I** 3 s.h.
How to research, conceptualize, and express ideas through light plots, other design paperwork, and theatre lighting design projects.

**THTR:3260 Sound Design for the Theatre** 3 s.h.
Introduction to digital sound recording and live sound reinforcement techniques for a variety of entertainment venues (theatre, dance, concerts, and industrial projects); creation of soundscapes using Pro Tools software; implementation of designs through the use of SFX/QLab playback systems; documentation of sound design for theoretical or realized production. Offered every other year.

**THTR:3270 Entertainment Design** 3 s.h.
Introduction to entertainment design and technology; primary focus on contemporary approaches to design and delivery of content in entertainment industry; assignment of practical projects using media servers, projection, LED arrays, video editing software, and moving light technologies. Offered every other year.
THTR:3876 Video for Performance 4 s.h.
Introduction to making video for use in a performance; how video can unlock new artistic possibilities for performance in theater, dance, and performing arts in general; focus on acquiring basic skills necessary to shoot and edit video, and project it during a performance; practices of animation, found or archival footage work, and live performance. No previous knowledge of cameras or editing equipment required. Same as CINE:3876.

THTR:4230 Scene Design II 3 s.h.
Design and execution of increasingly complex projects in a variety of formats, including perspective sketching, detailed drafting, and color models. Prerequisites: THTR:3230.

THTR:4240 Costume Design II 3 s.h.
Conceptual and analysis skills in costuming; fashion history and dress related to individual, cultural, and artistic expression. May be taken before THTR:3240.

THTR:4250 Lighting Design II 3 s.h.
Production styles and venues; skills developed through increasingly complex light plots, more precise paperwork. Prerequisites: THTR:2402 and THTR:3250.

THTR:4270 Scenic Art 3 s.h.
Techniques in scenic art for the theatre; classical trompe l’oeil scene painting, sculpting with nontraditional materials, finishing. Offered every other year.

THTR:5200 Graduate Design Seminar arr.
Graduate design in set, lighting, and costume design; teamwork; meetings with design faculty in specific disciplines; short-term projects in the theatre department; long-term projects, including summer design work, internships, and other professional opportunities during the three-year program and beyond. Prerequisites: THTR:4230 or THTR:4240 or THTR:4250.

THTR:5230 Scene Design III 3 s.h.
Complex assignments; documentation skills, scenic design preparation. Prerequisites: THTR:3230 and THTR:4230.

THTR:5240 Costume Design III 3 s.h.
Advanced projects in costume design and portfolio development. Prerequisites: THTR:4240.

THTR:5250 Lighting Design III 3 s.h.
Advanced projects in venues such as dance, opera, industrials; preparation of lighting designs for production. Prerequisites: THTR:4250.

THTR:7260 Internship in Design 1-6 s.h.
Experience as designer or assistant designer with a professional theatre, dance, or opera company or with a professional design studio. Requirements: theatre design M.F.A. enrollment.

Stage Management and Arts Management

THTR:3501 Stage Management I 3 s.h.
Duties and procedures of stage management; focus on development of production from preparatory work through performance; role of stage manager in collaboration.

THTR:3510 Introduction to Arts Management 3 s.h.
Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as INTD:3510, DPA:3510.

THTR:3520 New Ventures in the Arts 3 s.h.

THTR:3550 Stage Management II 3 s.h.
Duties and procedures of stage management; focus on development and understanding of leadership role of stage manager; examination of stage manager’s role in a professional theatre; topics may include equity contracts and stage managing for opera. Prerequisites: THTR:3501.

THTR:4510 Arts Leadership Seminar 3 s.h.
Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or THTR:3520 or ENTR:2000. Same as ENTR:4510, INTD:4510, DPA:4510.

THTR:5500 Stage Management: Special Topics 3 s.h.
Topics in stage management, arts production, and their professional practice. Requirements: admission to M.F.A. stage management program.

THTR:5510 Production Management 3 s.h.
Organization and supervision of theatre productions; resources, procedures for successfully mounting a theatre production or season; personnel, equipment, facility and budget management, scheduling, communication. Requirements: stage management M.F.A. enrollment.

THTR:6500 Stage Management Seminar 1-2 s.h.
Practice and techniques of stage management. Requirements: graduate stage management major.

Playwriting

THTR:3300 Advanced Playwriting 3 s.h.
Continuation of THTR:3301; original student writing, extensive rewriting; may focus on specific style, genre, or approach. Prerequisites: THTR:3301.

THTR:3301 Playwriting II 3 s.h.
Application of fundamental skills learned in THTR:2301 to more advanced study of dramatic structure and style; reading of plays, weekly writing assignments; focus on writing one-act play. Prerequisites: THTR:2301.

THTR:3310 Undergraduate Playwriting Workshop 1-3 s.h.
Workshop discussion of original full-length plays, collaborative creation of new plays, work with guest artists. Prerequisites: THTR:2301 and THTR:3301. Requirements: submission of writing sample.
THTR:3320 Writing for Film 3 s.h.
Rigorous writing for film; focus on feature-length screenplay; for students with experience in dramatic writing, fiction, or screenwriting. Requirements: completion of at least 60 s.h. or graduate standing.

THTR:3403 Free-Style Writing: Poetry, Plays, and Performances 3 s.h.
Creative writing lab experience in reading, writing, and performing poetry and short plays; expansion of students' horizons of the self; arc of innovation in African American literature from Harlem Renaissance to present, with texts from Langston Hughes and Zora Neale Hurston to Saul Williams and Jill Scott; role of the artist in society and as outsider and insider; shifting perspectives on race, gender, class; musical influences and models, from blues to house music; sensuality, spirituality; artistic reflections on the cultural moment; effects of these on literary form and performance style; students create and perform a work for an audience. Same as AFAM:3840.

THTR:5300 The Collaborative Process 3 s.h.
Development of new plays, collaboratively created works.

THTR:5600 Orientation to Graduate Studies 1-2 s.h.
Requirements: theatre arts M.F.A. enrollment.

THTR:5610 Collaborative Performance 1-4 s.h.
Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as DANC:5550, DPA:5550.

THTR:6300 Guest Seminar arr.

THTR:6310 Special Topics in Playwriting 3 s.h.

THTR:7300 Playwrights Workshop 3 s.h.
Development of works by Iowa Playwrights Workshop members. Requirements: playwriting or dramaturgy M.F.A. enrollment.

Dramatic Literature, Theory, and Dramaturgy

THTR:3180 Topics in Digital Media 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3180.

THTR:3276 Medieval Drama 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3276.

THTR:3277 English Renaissance Drama 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3277.

THTR:3287 Shakespeare 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3287.

THTR:3410 African American Theatre I 3 s.h.
Works by African American playwrights and relevant historical documents, Africa through Black Renaissance; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as AFAM:3810.

THTR:3411 African American Theatre II 3 s.h.
Works by African American playwrights and relevant historical documents, Black Renaissance to present; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as AFAM:3811.

THTR:3415 Cultural Diversity and Identity 3 s.h.
Nature of personal and cultural identity within a pluralistic society; race, ethnicity, national identity, class, sexuality, and gender as categories of cultural difference. Same as GWSS:3415.

THTR:3420 Sex and Gender in Performance 3 s.h.
Relationship between sex and gender in the performing body across a range of public venues, including stage, film, athletic events, and social spaces; articles, texts, plays, films, television, and videos; attendance at live performances of theatre, sports, and other events scheduled in the University and local community; discussion format. Same as GWSS:3420.

THTR:3440 American Drama Since 1900 3 s.h.
American playwrights and plays after 1900. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. Same as ENGL:3440.

THTR:3462 African American Drama 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as ENGL:3462, AFAM:3462.

THTR:4401 American Women Playwrights: 1776-Present 3 s.h.
How women in the United States have expressed themselves in theatre since 1776; diversity of voices in works by African American, Asian American, Latina, Native American, European American, lesbian playwrights; female-authored drama and production in relation to concurrent male-authored traditions and socioeconomic, political, cultural phenomena. Same as AMST:4401.
Theatre Arts

THTR:4402 Dramas of the Spirit 3 s.h.
Western and nonwestern dramatic texts that enact or describe journeys of the human spirit; textual analysis, investigation of the notion of spirit and its relation to dramatic form. Prerequisites: THTR:2402 and THTR:2410 and THTR:2411.

THTR:4403 Studies in Drama 3 s.h.
Exploration of a specific period of dramatic literature, or the work of specific authors, or dramatic principles central to playwriting.

THTR:4410 Shakespeare the Dramatist 3 s.h.
Exploration of a number of Shakespeare's greatest works; close textual analysis supplemented with historical, theoretical, theatrical, and philosophical considerations; special attention given to Shakespeare's dramatic method and relation of his dramaturgy to profession of theater-making.

THTR:4420 Dramatic Theory 3 s.h.
Theoretical questions of interest to dramatists and philosophers in western and nonwestern traditions; metaphysics of play; theories of character, psyche, self; narrative and nonnarrative dramatic forms. Prerequisites: THTR:2402 and THTR:2410 and THTR:2411.

THTR:5420 Dramaturgy Practicum arr.
Exploration of theoretical, creative, and practical issues that arise in working dramaturgically on both established and new plays, and in a variety of collaborative processes; practical dramaturgical exercises in script reporting, dramaturgical research, educational programming, season planning, production documentation, and writing of critical and dramaturgical essays for a general audience. Requirements: admission to M.F.A. dramaturgy program.

THTR:6400 Classical to Romantic Theatre 3 s.h.
Representative plays from the Classical to the Romantic periods—in historical context of their original productions, contemporary production potential. Requirements: theatre arts M.F.A. enrollment.

THTR:6401 Modern Drama 3 s.h.
Questions of dramatic form and content examined in-depth through close readings of modern plays.

THTR:6402 Postmodern Theatre 3 s.h.
Diverse postmodern traditions; emphasis on questions of relation of text.

THTR:6403 Shakespeare 3 s.h.
Same as ENGL:6220.

Workshops, Performances, Special Studies

THTR:4630 London Performance Study 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:4172.

THTR:4690 Senior Seminar 3 s.h.
Theatre arts capstone seminar; how personal aesthetic relates one's work to great theatrical visionaries of the past and present-day practitioners; research culminating in a collaborative theatre piece. Requirements: senior standing and theatre arts major.

THTR:4691 Projects in Theatre arr.

THTR:4692 Honors Theatre Arts arr.
Development and production of a new work for film or television by writers, directors, actors.

THTR:4693 Independent Study arr.

THTR:4694 Design: Special Topics 1-3 s.h.
Specialized study in a specific aspect or theory of theatrical design.

THTR:4695 Performance Practicum 1-2 s.h.
Perform as an actor or serve as an assistant stage manager in a production of at least an hour's length, rehearsed for at least four weeks, directed by a faculty member or guest artist or graduate student, and produced by the Department of Theatre Arts.

THTR:6510 Internship in Stage Management 1-6 s.h.
Experience as stage manager or assistant stage manager with a professional theatre, dance, or opera company. Requirements: stage management M.F.A. enrollment.

THTR:6691 Projects in Theatre Advanced arr.
Create a special project under the mentorship of a faculty member; projects may include performing in a main stage production, writing, directing, or designing a play performed in the department, developing a research project that intersects production.

THTR:7601 M.F.A. Thesis 0-3 s.h.
Work related to M.F.A. thesis projects in theatre arts.
Translation

Director, Division of World Languages, Literatures, and Cultures
- Russell Ganim

Director, Translation Program
- Aron Aji (Asian and Slavic Languages and Literatures)

Graduate degree: M.F.A. in comparative literature—translation
Faculty: http://clas.uiowa.edu/dwllc/mfa-literary-translation/faculty
Web site: http://clas.uiowa.edu/dwllc/mfa-literary-translation

Translation has been an integral part of the curriculum and conversation about writing at the University of Iowa for more than 40 years. The Translation Program is committed to the idea that translation is much more than carrying work from one language to another; it also involves the linguistic, aesthetic, and ideological dimensions of works as well as the literary, cultural, and historical contexts from which those works arise.

The Translation Program enjoys close relationships with the University’s program in comparative literature; M.F.A. programs in creative writing (fiction and poetry), nonfiction writing, and playwriting; and the International Writing Program. Faculty members from departments in the Division of World Languages, Literatures, and Cultures provide resources for the Translation Program and often serve as language mentors and committee members for M.F.A. students in translation.

Graduates of the program have gone on to work in the world of professional publishing as editors and reviewers or as free-lance translators; to become university professors after earning a Ph.D.; and to pursue other careers involving cross-cultural and artistic exchange. In recent years, publishers of works by Translation Program alumni have included Greywolf, Seven Stories, Autumn Hill Books, Melville House, Word Without Borders, The Iowa Review, 91st Meridian, TWO LINES Online, Circumference, The Literary Review, Passport, Absinthe, and others.

The Translation Program is administered by the Division of World Languages, Literatures, and Cultures (p. 228).

Graduate Program of Study
- Master of Fine Arts in comparative literature—translation

Master of Fine Arts

The Master of Fine Arts program in comparative literature—translation requires 48 s.h. of graduate credit, including a thesis. Students typically complete the program and graduate in two to three years.

Translators in the program focus on creating works that can convey the timelessness of the classics or the immediacy of new poetry, fiction, and drama. Students consider ideas of literariness, style, cultural politics, authority, and how these come into play in the relationships between authors and their texts, authors and translators, translations and readers, and in the media landscapes in which these all circulate.

The core of the M.F.A. program is TRNS:7460 Translation Workshop, which every student must take at least four times (minimum of 16 s.h. of credit). Depth in the literature and culture of the source language, creative writing (translation is considered a writing art), translation theory and history, and contemporary literary theory are basic curricular requirements, supplemented with elective courses in which students may develop an area of special interest in consultation with their advisors.

During the first year, each student has an advisory committee of two faculty members: one from the translation program, who is the student’s primary advisor; and one from comparative literature, or from one of the M.F.A. writing programs, or from a department in the Division of World Languages, Literatures, and Cultures. A third member joins the committee during the second year, when the student submits his or her thesis proposal. At least one member of the committee should be competent in the student’s source language.

The M.F.A. in comparative literature—translation requires the following work.

REQUIRED COURSES
Students complete all of these (37 s.h.):

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

THESIS AND EXAMINATION
Students earn 3-6 s.h. for the thesis, which is a translated collection of poems, literary essays, short stories, a short novel, or a drama with an introduction that sets the work in appropriate context. The introduction should include a critical discussion of issues and problems related to the translation; it should present a rationale for the translator’s approach and strategies, based on interpretation, analysis of the leading features, structure, style, or authorial objectives of the source text. The source text should be a work that has not been translated previously or, at the discretion of the advisory committee, a work whose previous translation is judged to be outdated or inadequate in some respect. An oral defense of the thesis examines the student’s translation and the introductory essay in detail.
Admission

Applicants to the M.F.A. program are evaluated mainly on a writing portfolio. The portfolio should include translations, including source texts, and an original critical literary essay or literary writing in English; a statement of purpose; and three letters of recommendation. Applicants should provide evidence of advanced competence in their source language—normally at least three years of college-level work or the equivalent—and substantial preparation in English literature. Availability of faculty expertise in the applicant's source language and culture is considered in admission decisions.

All applicants must submit their scores on the Graduate Record Examination (GRE) General Test and transcripts from previous college-level study. Individuals whose first language is not English should provide scores on the Test of English as a Foreign Language (TOEFL).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

The program nominates up to two newly admitted, qualified students for the Iowa Arts Fellowship, a full-support fellowship awarded by the Graduate College each year. In addition, qualified students may receive teaching assistantships or part-time graduate assistantships. Students must apply for assistantships and other support; contact the Translation Program and the Office of Student Financial Aid for information.

Resources

Student translators in the M.F.A. program publish exchanges: a journal of literary translation. A vibrant source of international writing in translation, the journal provides hands-on editing and online publishing experience as well as an occasional venue for the editors’ own works. The M.F.A. program regularly hosts and cohosts conferences, invites speakers from around the world for readings and short-term residences, and is a constituent unit of the Virtual Writing University.

Courses

The Translation Program offers courses for undergraduates as well as graduate students. See "Courses" in the Division of World Languages, Literatures, and Cultures (p. 228) section of the Catalog for course descriptions and prerequisites for enrollment.

Translation for Global Literacy

**Director, Division of World Languages, Literatures, and Cultures**
- Russell Gamin

**Coordinator, Translation for Global Literacy**
- Aron Aji (Asian and Slavic Languages and Literatures)

**Undergraduate minor:** translation for global literacy
Literally every form of global exchange—from material goods and natural resources to knowledge, values, ideologies, and cultures—depends on translation across languages. Aided by the range of human migration, globalization has led to rich syntheses between and among cultures, languages, and sensibilities. Borders between countries have become tenuous in relation to transnational, multicultural, and multilingual realities.

The minor in translation for global literacy introduces undergraduate students to translation as a field and provides some basic course work and practice in translation from a world language to English. It encourages students to explore the topic and practice of translation as a crucial dimension of global literacy.

The minor in translation for global literacy is administered by the Division of World Languages, Literatures, and Cultures (p. 228).

**Undergraduate Program of Study**
- Minor in translation for global literacy

**Minor**

The minor in translation for global literacy requires a minimum of 18 s.h., including a minimum of 12 s.h. in courses taken at the University of Iowa. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. At least 12 s.h. of course work must be taken in courses numbered 2000 or above.

Students are encouraged to declare the minor after satisfying the General Education Program (p. 313) World Languages requirement or during more advanced language study. Most students who successfully complete the minor will need at least 6 s.h. of additional course work beyond the General Education requirement in language study. Students may count a maximum of 6 s.h. of course work taken for another major, minor, or certificate program toward the requirements for the minor.

All students can tailor their plan of study to their experience and objectives. Students interested in the minor should meet with a faculty member associated with the minor program as soon as possible to develop an individualized plan of study.

Courses listed in two or more categories may only be used toward one requirement.

The minor in translation for global literacy requires the following course work.

### CORE COURSE
This course:

- A translation and global society gateway course (consult advisor) 3 s.h.

### TRANSLATION COURSES
A total of 6 s.h. from these:

- **ENGL:3724 Writers' Seminar: Literary Translation** 2 s.h.
- **FREN:4890 Techniques of Translation** 3 s.h.
- **JPNS:3201 Workshop in Japanese Literary Translation** 3 s.h.
- **SPAN:3030 Translation Workshop: English to Spanish** 3 s.h.
- **SPAN:3050 Translation Workshop: Spanish to English** 3 s.h.
- **TRNS:2179 Undergraduate Translation Workshop** 3 s.h.
- **TRNS:3202 Workshop in Chinese Literary Translation** 3 s.h.
- **TRNS:4497 Techniques of Translation** 3 s.h.

### LANGUAGE, LINGUISTICS, LITERATURE, AND CULTURE COURSES
A total of 6 s.h. from these:

- **CL:2531 Topics in Russian, East European, and Eurasian Studies** arr.
- **CL:3203 Modern Japanese Fiction in Translation** 3 s.h.
- **FREN:3060 Introduction to Reading and Writing in Literature** 3 s.h.
- **GRMN:3501 Introduction to German Literature** 3 s.h.
- **GRMN:3550 The Politics of Remembrance in German Multicultural Literature and Film** 3 s.h.
- **JPNS:3204 Topics in Japanese Literature in Translation** 3 s.h.
- **SPAN:2300 Introduction to Reading Literature** 3 s.h.
- **TRNS:3480 Literature and Translation** 3 s.h.

Other courses approved by advisor (students can select from a wide range of options)

### CAPSTONE COURSE
This course:

- **TRNS:2499 Undergraduate Translation Seminar** 3 s.h.

A departmental capstone course in which a project on translation is completed (must be approved by advisor) 3 s.h.

Undergraduate certificate: writing
Faculty: http://magidcenter.uiowa.edu/certificate/faculty
Web site: http://magidcenter.uiowa.edu/about

The University of Iowa is known nationally and internationally for its writing programs, particularly for its top-ranked Master of Fine Arts programs in creative writing (p. 212) (Iowa Writers' Workshop) and nonfiction writing (p. 244) (Department of English). It also offers a creative writing track for undergraduate English (p. 244) majors and numerous discipline-based programs that emphasize writing. Several of the University's colleges have their own writing centers.

The undergraduate Certificate in Writing enables students in all majors to benefit from the University's wide-ranging writing programs and resources by pursuing a concentration in writing related to their majors, their career goals, or their personal interests.

Writing is one of the academic units in the Division of Interdisciplinary Programs (p. 226). The certificate is offered through the Frank N. Magid Center for Undergraduate Writing and administered by the College of Liberal Arts and Sciences (p. 24).

Learn more about the University's wealth of writing resources by visiting The Writing University web site, and read about the University's central role in Iowa City's designation as a UNESCO City of Literature.

Undergraduate Program of Study
• Certificate in Writing

Certificate in Writing students explore writing and develop their own writing skills in a wide range of genres and for varied purposes, including creative writing (fiction, nonfiction, poetry); writing for the professions, such as the arts, business, journalism, or science; writing for organizations; and writing related to personal interests.

Certificate
The Certificate in Writing requires a minimum of 21 s.h. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

Students who complete the certificate develop:
• skills in planning and using strategies to begin writing, overcome obstacles, obtain feedback, revise their work, and present their writing in public venues;
• skills in the craft of writing, such as the ability to write clearly and concisely, control of mechanics and style, and the ability to communicate with particular audiences for specific purposes; and
• competence in discussing writing.

Course work for the certificate includes a minimum of 11 s.h. in core courses, a minimum of 9 s.h. in focused electives, and a minimum of 1 s.h. in a capstone independent study course that results in a project and/or portfolio of work. Students may count a maximum of 6 s.h. earned for a major, a minor, or another certificate toward the Certificate in Writing.

Certificate students have the opportunity to participate in the Iowa City writing community through activities such as attending readings and lectures; presenting their own work in public; working with professional journals, newspapers, or other publications; and repeated registrations in WRIT:1500 Writing Commons: A Community of Writers.

The Certificate in Writing requires the following work.

CORE COURSES
Students earn a minimum of 11 s. h. in core courses.
All students complete this core course:

WRIT:1500 Writing Commons: A Community of Writers 2 s.h.

Students complete the remaining 9 s.h. in the core requirements, with courses selected from the following lists:

CNW:3632 Prose Style 3 s.h.
CW:4745 The Sentence: Strategies for Writing 3 s.h.
CW:4760 The Art of Revision: Rewriting Prose for Clarity and Impact 3 s.h.
LING:1003 English Grammar 3 s.h.
LING:3080 History of the English Language 3 s.h.

May include one of these:
CLSA:1740 Writing Strategies: Word Origins and Word Choice 3 s.h.
CLSA:3742 Word Power: Building English Vocabulary 3 s.h.
LING:1030 English Words 3 s.h.

May include this course:
WRIT:1600 Fast Fixes: Improving Your Writing in Six Short Weeks (must be taken three times for 1 s.h. each with different subtitles) 3 s.h.

FOCUSED ELECTIVES
Students earn a total of at least 9 s.h. in focused electives, which they select from courses in at least two of the following categories (maximum of 6 s.h. from any one category).

Writing for the professions
Writing and the literary arts
Writing and the media
Writing in context
Student-designated writing-intensive courses

Each focused elective course may be used to fulfill only one certificate requirement, even if the course is listed in more than one category below. Some of these courses have prerequisites and other requirements for registration; students must complete a course's prerequisites and meet...
its registration requirements before they may register for the course.

**Writing for the Professions**

**Art**
- ARTH:1080 Writing About the Visual Arts 3 s.h.
- ARTS:3400 Grant Writing in the Arts 3 s.h.

**Book Arts**
- UICB:2100 Creative Writing for Book Arts 3 s.h.

**Business**
- BUS:3000 Business Communication and Protocol 3 s.h.
- BUS:3800 Business Writing 3 s.h.
- INTD:3005/CW:3005 Professional and Creative Business Communication 3 s.h.

Business may include one of these:
- CNW:3640 Writing for Business and Industry 3 s.h.
- ENNM:3640 Writing for Business and Industry for Non-English Majors 3 s.h.

**Grant Writing**
- ARTS:3400 Grant Writing in the Arts 3 s.h.
- EALL:4130/MUSM:4150 Introduction to Grant Writing 3 s.h.

**Journalism**
- CNW:2780 The Art and Craft of Writing About Sports 3 s.h.
- CNW:2830 The Art and Craft of Immersion Journalism 3 s.h.
- JMC:2010 Journalistic Reporting and Writing 4 s.h.
- JMC:3405 Depth Reporting and Writing 4 s.h.
- JMC:3412 Strategic Communication Writing 4 s.h.
- JMC:3415 Writing Across Cultures 4 s.h.
- JMC:3470 Narrative Journalism 4 s.h.
- SPAN:3020 Journalistic Writing in Spanish 3 s.h.

**Literature, Language, and Translation**
- SPAN:2000 Spanish Language Skills: Writing 3 s.h.
- SPAN:3000 Writing Skills for Heritage Speakers 3 s.h.
- SPAN:3010 Advanced Spanish Speaking and Writing 3 s.h.
- SPAN:3030 Translation Workshop: English to Spanish 3 s.h.
- SPAN:3050 Translation Workshop: Spanish to English 3 s.h.
- SPAN:3060 Introductory Workshop on Creative Writing in Spanish 3 s.h.
- SPAN:4950 Advanced Workshop on Creative Writing in Spanish 3 s.h.
- TRNS:2179/ENGL:2810 Undergraduate Translation Workshop 3 s.h.
- TRNS:2499 Undergraduate Translation Seminar 3 s.h.
- TRNS:3480/SLAV:3480 Literature and Translation 3 s.h.

**Political Science**
- CNW:2850 The Art and Craft of Writing About Politics 3 s.h.
- POLI:3107 Writing in Political Science: Writing for "Science" and for "Politics" 3 s.h.

**Sciences**
- CNW:2730 The Art and Craft of Science Writing 3 s.h.

**Undergraduate Research**
- BUS:3999/ECON:3999 Honors Seminar 1-3 s.h.
- BUS:4999 Honors Thesis in Business 3 s.h.
- HONR:3400 Honors Writing Workshop 1-3 s.h.

An undergraduate thesis related to any undergraduate discipline

**Writing and the Literary Arts**

**Creative Writing**
- CW:3003 Writing and Reading Science Fiction 3 s.h.
- CW:3107/INTD:3107 Creative Writing for the Health Professions 3 s.h.
- CW:3215/INTD:3300 Creative Writing and Popular Culture 3 s.h.
- CW:3218/INTD:3200 Creative Writing for New Media 3 s.h.
- CW:4751 Creative Writing for the Musician 3 s.h.
- CW:4894 Undergraduate Project in Creative Writing arr.
- INTD:3005/CW:3005 Professional and Creative Business Communication 3 s.h.

Creative writing may include one of these:
- CW:1800 Creative Writing Studio Workshop 3 s.h.
- CW:2100 Creative Writing 3 s.h.

**Fiction**
- CW:2870 Fiction Writing 3 s.h.

Student-Designated Writing-Intensive Courses
Students may request permission to count a maximum of 3 s.h. earned in a course of their choice numbered 3000 or above as credit toward the focused elective requirement. They propose a writing-related project that extends the writing focus of their chosen course. They must have the approval of the faculty member teaching the course and the writing certificate advisor.

CAPSTONE: INDEPENDENT WRITING PROJECT
Each student must earn at least 1 s.h. in an independent writing project course that serves as a capstone experience and results in a substantial project and/or portfolio of the student’s own writing. Students must have a faculty mentor for the independent writing project and must register for the course. Visit the Frank N. Magid Center for Undergraduate Writing for more information related to registering for the capstone course.

Courses
WRIT:1500 Writing Commons: A Community of Writers 1-3 s.h.
Varied topics focused on building community and enhancing writing skills through generative exercises, long-form essay and hybrid assignments, workshops, sharing work in public, reading and discussing works of published authors.

WRIT:1600 Fast Fixes: Improving Your Writing in Six Short Weeks 1 s.h.
Varied topics focused on improving common writing problems or specific aspects of craft.

WRIT:2600 Science Communication I: Fundamentals of Science Communication 2 s.h.
Bringing science to varied audiences; focus on writing and presenting research story, analogies, connecting with audiences, collaborating with others from science and film/writing disciplines; first of a two-course sequence culminating in a group outreach project and print product.

WRIT:2601 Science Communication II: Science Outreach and Engagement 2 s.h.
Bringing science to varied audiences; focus on writing and presenting research story, analogies, connecting with audiences, collaborating with others from science and film/writing disciplines; second of a two-course sequence culminating in a group outreach project and print product. Prerequisites: WRIT:2600.

WRIT:3100 Writing with Purpose: Arts Outreach and Reflection with the Iowa Youth Writing Project
Service-learning course offered in coordination with Iowa Youth Writing Project (IYWP); students create lesson plans, lead creative writing workshops in area schools and after-school programs, and collaborate to publish a final chapbook of writing from their teaching sites; assigned readings on creative writing pedagogy, teaching life, community outreach, social justice; relationships between self and community enhance interdisciplinary perspectives; weekly written reflections on teaching experiences featured on IYWP blog.

WRIT:3101 Writers in the Community 1 s.h.
Experiential, hands-on learning opportunities organized by the Iowa Youth Writing Project; introduction to the community at large; fun and meaningful activities with elementary and junior high school students; designing creative writing lessons, discussion of teaching tips and tricks, leading creative writing workshops for children in the Iowa City community, writing reflective essays about experiences; for those interested in education, creative writing, volunteerism, nonprofit work, or community engagement.

WRIT:3200 Writing for the Earth and Environmental Sciences 1-3 s.h.
Practical methods of content creation across curriculum; effective communication to lay and academic audiences; methods of planning, drafting, revising, and editing everything from general articles of interest to scientific papers. Same as EES:3040.

WRIT:3900 Writing: Undergraduate Internship 1-3 s.h.
Professional and/or creative experience; students arrange faculty-approved internship. Requirements: undergraduate standing and minimum of 24 s.h. of course work with at least 12 s.h. in University of Iowa courses.

WRIT:4000 Writing: Independent Project 1-3 s.h.
Completion of writing capstone requirement for the Certificate in Writing. Requirements: junior or higher standing.

WRIT:4100 Iowa Youth Writing Project Mentorship Practicum 1-3 s.h.
Mentor new volunteers on a weekly basis at Iowa Youth Writing Project (IYWP) program sites; work one-on-one with volunteers, write and review lesson plans, provide resources and feedback for volunteers, lead workshops for children. Requirements: WRIT:3100 or completion of Iowa Youth Writing Project internship.
Tippie College of Business

Dean
• Sarah Fisher Gardial

Undergraduate major: B.B.A.
Undergraduate minor: business administration
Undergraduate certificates: entrepreneurial management; international business; risk management and insurance
Graduate degrees: M.Ac.; M.B.A.; M.S.; Ph.D.
Professional minors: finance; marketing management; strategic management of innovation; supply chain and analytics
Graduate certificate: business analytics
Web site: http://tippie.uiowa.edu/

The Henry B. Tippie College of Business is composed of six academic departments: accounting, economics, finance, management and organizations, management sciences, and marketing.

The college’s undergraduate and graduate programs are accredited by AACSB International—the Association to Advance Collegiate Schools of Business.

Research, executive development, and education activities are supported by these centers and institutes: Emmett J. Vaughan Institute of Risk Management and Insurance, Entrepreneurial Management Institute, Hawkison Institute of Business Finance, Institute for International Business, Iowa Electronic Markets Institute, John Pappajohn Entrepreneurial Center, Judith R. Frank Business Communication Center, Marketing Institute, McGladrey Institute of Accounting Education and Research, Pomerantz Career Center, Small Business Development Center, and Tippie Business Solutions Center.

HONOR CODE
Integrity and honesty are essential to success in all facets of life. The purpose of the Tippie College Undergraduate Honor Code and the Tippie MBA Honor Code is to promote honorable and ethical behavior. Students admitted to the college or enrolled in courses offered by the college are required to uphold the honor code.

Undergraduate Programs of Study
The Tippie College of Business offers the Bachelor of Business Administration (B.B.A.) with majors in accounting, business analytics and information systems, economics, finance, management (includes a distance education option), and marketing, and it collaborates with the College of Liberal Arts and Sciences to offer an undergraduate major in economics for Bachelor of Arts and Bachelor of Science students in economics. See Bachelor of Science students in economics. See Bachelor undergraduate major in economics for Bachelor of Arts and with the College of Liberal Arts and Sciences to offer an education option, and marketing, and it collaborates with accounting, business analytics and information systems, economics, finance, management (includes a distance education option), and marketing, and it collaborates with the College of Liberal Arts and Sciences to offer an undergraduate major in economics for Bachelor of Arts and Bachelor of Science students in economics. See Bachelor of Science students in economics. See Bachelor undergraduate major in economics for Bachelor of Arts and with the College of Liberal Arts and Sciences to offer an education option, and marketing, and it collaborates with accounting, business analytics and information systems, economics, finance, management (includes a distance education option), and marketing, and it collaborates with the College of Liberal Arts and Sciences to offer an undergraduate major in economics for Bachelor of Arts and Bachelor of Science students in economics. See Bachelor of Science students in economics. See Bachelor
Graduate Programs of Study

The Tippie College of Business offers five graduate degree programs: the Master of Accountancy (M.Ac.), the Master of Business Administration (M.B.A.), the Master of Science in business analytics, the Doctor of Philosophy (Ph.D.) in business administration, and the Doctor of Philosophy in economics. For information about the M.Ac. and the Ph.D. in economics, see Accounting (p. 648) and Economics (p. 664) in the Catalog.

The Certificate in Business Analytics is administered by the Department of Management Sciences. The Graduate College awards the certificate; see Business Analytics (p. 662) in the Catalog.

The M.B.A. program is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

For a description of the Ph.D. in business administration, see Doctor of Philosophy (p. 663) in the Catalog. The Ph.D. is an interdepartmental degree; programs leading to the degree are offered by the Departments of Accounting (p. 648), Finance (p. 677), Management and Organizations (p. 682), Management Sciences (p. 687), and Marketing (p. 692).

Study Abroad

CIMBA Italy offers semester and summer programs for undergraduate and graduate students in Paderno del Grappa, Italy, northwest of Venice. Students who attend the programs come from a variety of public and private universities worldwide.

At CIMBA, students immerse themselves in a wide range of rigorous courses, including innovative leadership and development programming, while living amidst the Venetian countryside in one of the most popular travel and study destinations in the world. Business and cultural immersions begin for students the minute they arrive on campus. All courses are taught by English-speaking professors from top universities throughout the United States and Europe.

Centers and Institutes

Emmett J. Vaughan Institute of Risk Management and Insurance

The Tippie College of Business, in partnership with the Iowa insurance industry, has established the Emmett J. Vaughan Institute of Risk Management and Insurance to provide innovative education and research in modern risk management and insurance.

The institute collaborates with the Department of Finance to offer the Certificate in Risk Management and Insurance. The certificate program provides undergraduate students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, underwriting, personal banking and asset management, financial analysis, claims adjustment, and auditing. See Risk Management and Insurance (p. 702) in the Catalog.

Entrepreneurial Management Institute

The Entrepreneurial Management Institute works with top entrepreneurial management track students in the B.B.A. management major and with Certificate in Entrepreneurial Management students to help them develop career advancement skills. Experienced business professionals and entrepreneurial leaders provide strategic career development training. Activities include seminars on developing professional résumés, creating extensive personal networks, networking with successful Iowa CEOs and business leaders, and making connections for internships and job placement.

Hawkinson Institute of Business Finance

The Hawkinson Institute of Business Finance facilitates career opportunities in investment banking, sales and trading, and related areas for students in the Tippie College of Business. The institute sponsors the Hawkinson Scholars Program, which trains high-achieving undergraduates for interviews, internships, and full-time jobs in the financial services industry. Criteria for admission to the institute include a strong academic record, involvement in campus and community activities, high motivation, good interpersonal skills, and demonstrated interest in business, markets, and corporate finance.

Hawkinson scholars participate in a class that is taught by former investment bankers and features guest speakers from investment banking, private equity, hedge funds, start-ups, and other sectors. Hawkinson scholars also receive intensive education in equity valuation, financial market dynamics, and more. An extensive network of dedicated Hawkinson alumni serve as mentors.

The Institute has worked to broaden entry-level employment opportunities for Iowa graduates, who land jobs at prestigious firms such as Goldman Sachs, Credit Suisse, Barclays, Merrill Lynch, JP Morgan, and UBS. Graduating Hawkinson scholars typically enjoy a placement rate of 100 percent.

Institute for International Business

The Institute for International Business (IIB) is dedicated to advancing knowledge and skills in international business and education through research, education, and consultation. Using students as consultants, IIB works in partnership with the Entrepreneurial Management Institute to provide international business consulting services to small- and medium-sized Iowa companies who wish to pursue business opportunities globally.

Iowa Electronic Markets Institute

The Iowa Electronic Markets Institute supports scholarship in prediction markets and experimental economics. It operates the Iowa Electronic Markets (IEM), online futures markets where contract payoffs are based on real-world events such as political outcomes, companies’ earnings per share, and stock price returns. Known internationally as the genesis of modern prediction markets, the Iowa Electronic Markets are used as tools for research and teaching.

John Pappajohn Entrepreneurial Center

The John Pappajohn Entrepreneurial Center (JPEC) has developed a comprehensive, interdisciplinary program that combines advanced course work with experiential learning for University of Iowa students. The program prepares students to launch new ventures, manage growing companies, and apply entrepreneurship concepts
in their careers. It is designed to empower students to accelerate their careers and pursue their dreams.

The entrepreneurship curriculum incorporates experiential learning opportunities in which students apply their knowledge and skills in their own ventures or in emerging or growing Iowa companies. JPEC's Bedell Entrepreneurship Learning Laboratory is dedicated to student entrepreneurs creating new businesses. Students also may participate in a wide variety of extracurricular programs such as business plan competitions, lecture series, conferences, workshops, a living-learning community, and the I-Envision student organization.

B.B.A. students in the Tippie College of Business who are majoring in management (p. 682) may complete the major's entrepreneurial management track, and University of Iowa students working toward a bachelor's degree may earn the Certificate in Entrepreneurial Management (p. 673). Both programs are offered on campus at the business college as well as online through the Division of Continuing Education. Graduate and professional students across the University may enroll in advanced entrepreneurship courses; see Master of Business Administration Program (p. 696) in the Catalog.

Students in the College of Liberal Arts and Sciences may earn a Bachelor of Arts degree with a major in Enterprise Leadership (p. 273). This program offers a combination of business and liberal arts approaches and allows students to hone their skills in innovation, entrepreneurship, communication, critical thinking, and leadership. The major in enterprise leadership is offered jointly by the John Pappajohn Entrepreneurial Center and the College of Liberal Arts and Sciences. The degree is awarded by the College of Liberal Arts and Sciences.

JPEC offers several programs for entrepreneurial businesses and individuals, including student field study projects, training, consulting, seminars, and conferences. In partnership with the Jacobson Institute for Youth Entrepreneurship, it provides training and a specialized curriculum to Iowa high school teachers in an effort to foster the development of innovative, creative, and entrepreneurial young Iowans. The center also partners with Iowa community colleges to deliver entrepreneurship training statewide.

**Judith R. Frank Business Communication Center**

The Judith R. Frank Business Communication Center provides one-on-one tutoring to Tippie College of Business undergraduates for writing assignments, projects, and case studies. The center's staff includes graduate students with expertise in writing and undergraduate peer tutors who have completed a semester-long peer tutor training course. Communication consultants are available on staff to help students with speech presentations or other oral communication assignments.

The center serves as a resource for the college's international students. It offers targeted programming that promotes fluency in written and spoken English. It also provides programming to support cross-cultural sensitivity and communication, including English Language Discussion Circles and sessions for staff and faculty on how to pronounce Chinese names.

The center's course-dedicated consulting program helps faculty and students plan and prepare for required writing projects. Center staff members work closely with faculty members to study assignment requirements, develop handouts and assessment rubrics, and deliver class or workshop presentations to students on how to meet the expectations of the assignment. Staff members work with departmental Ph.D. program directors to prepare second-year doctoral students for dissertation writing during the summer term. They also provide ongoing training and mentoring to the center's undergraduate peer tutors.

The Frank Business Communication Center oversees the B.B.A. core course BUS:3000 Business Communication and Protocol; the peer tutor training courses BUS:3900 Business Communication Internship I and BUS:3910 Business Communication Internship II; and the elective BUS:3800 Business Writing. In addition, the center's staff adjudicates the annual Mary Thomas Prappas Business Ethics Essay Competition and helps prepare Tippie College of Business undergraduates for national case competitions.

**Marketing Institute**

The Marketing Institute prepares students for today's diverse and competitive job market in the areas of marketing, market research, and sales. Each year, the institute invites around 15 top undergraduate students to become members. Students are selected on the basis of their academic performance, leadership, interpersonal skills, and executive potential. Field Immersion Projects are a major component of the three-semester program. In the immersion projects, students work as consultants for a variety of clients, including multimillion- or billion-dollar businesses, gaining hands-on experience in identifying and solving marketing-related issues and problems. Students are advised and mentored by an advisory board of top executives from companies such as Kraft Foods, Hormel, Pella, HON, Frank Magid & Associates, and Target. The Marketing Institute and its advisory board work together to foster internship opportunities and provide career guidance that helps students use their skills and talents to develop rewarding careers.

**Pomerantz Career Center**

Career development and on-campus recruiting services are provided by the Marvin A. and Rose Lee Pomerantz Career Center. The center's career advisors and online resources provide University undergraduate students and alumni with help on résumés, cover letters, internship and job searches, employer research, interviewing skills, negotiation of job offers, community involvement through volunteerism, and more. The center's Find Your Focus program helps students choose a major and identify careers related to specific majors. The center also presents several fall and spring semester career fairs. Campus recruitment is facilitated through HireaHawk.com. Students may participate in mock interviews and in actual on-campus interviews for full-time positions and internships during the academic year. The center also offers career-related and professional development courses such as CCP:3102 Job Search Strategies, LS:2002 Career Leadership Academy Part 1, and leadership studies courses numbered LS:2002 through LS:3002. Contact the Pomerantz Career Center for more information.

**McGladrey Institute of Accounting Education and Research**

The McGladrey Institute of Accounting Education and Research fosters educational excellence in accounting at
the University of Iowa, encourages high-quality research by Iowa accounting faculty members, and fosters the development of doctoral students in accounting. The institute sponsors varied educational initiatives and activities, including an annual national speaker series, the biennial Sidney Winter Lecture Series, and the PricewaterhouseCoopers Accounting Research Workshop.

**Small Business Development Center**

Since 1981, the University of Iowa Small Business Development Center has played an important role in helping enterprising Iowans manage or start their own successful businesses. The center provides support for small business owners and entrepreneurs. Its personnel are trained to meet the varied needs of small business management, including market, business, financial, and human resource planning; cash flow analysis; product commercialization; market research and analysis; strategic planning; international trade; and advertising and public relations.

**Tippie Business Solutions Center**

The Tippie Business Solutions Center provides M.B.A. students with opportunities to engage in strategic consulting projects with companies ranging from mid-sized firms to Fortune 500 companies in Iowa and around the world. The center brings together diverse teams possessing a variety of skills, knowledge, and experience. The teams apply rigorous business tools and techniques in order to research circumstances surrounding a business problem for a real-world client. Students meet with representatives from the client company, analyze the situation, and present recommendations and action plans for the client to pursue.

**Facilities and Resources**

The Henry B. Tippie College of Business is located in the John Pappajohn Business Building, at the heart of the campus. The Pappajohn Business Building contains seminar and conference rooms, a computer laboratory, two auditoriums, two computer classrooms, a behavioral laboratory, a restaurant (Pat's Diner), the Marvin A. Pomerantz Business Library, and a variety of classroom facilities.

The computer laboratory in the John Pappajohn Business Building serves the instructional programs of the college, and the staff maintains a current library of computational programs to accommodate users' needs. Business students also have access to the full range of services offered by the University’s Information Technology Services and the extensive research materials and other resources of the University of Iowa Libraries.

**Alumni Relations**

The Tippie College of Business alumni network numbers more than 46,000 graduates worldwide. Alumni have access to the college's wide array of resources, including the in-house Office of Alumni Relations. The college’s director of alumni relations and staff in the Undergraduate Program Office and the Tippie School of Management maintain relationships with alumni. Tippie Magazine is mailed to alumni who support the college.

The alumni office hosts individual visits, receptions, speakers, and other events on campus and in cities nationwide and around the world. Members of the Business Student Ambassadors, an undergraduate student organization, often serve as hosts and guides for alumni who visit the college, and the Young Alumni Board works to strengthen ties between the college and younger alumni.

Learn more about staying in touch at Alumni and Friends on the college’s web site.

**Nondepartmental Courses**

Most Tippie College of Business courses are offered by the college's departments and programs. They are listed and described in the corresponding Catalog sections; see the links under "Index: Academic Programs" on this page.

The college also offers the following nondepartmental courses for undergraduate students.

**Lower-Level Undergraduate**

**BUS:1200 Tippie College Direct Admit Seminar** 1 s.h.

Facilitates a more seamless transition to the University of Iowa and Tippie College of Business; weekly lectures from notable faculty and business executives, small group discussions; weekly topics include leadership, civic engagement, major and career exploration, and building a personal brand. Requirements: admitted to the direct admission program.

**BUS:2150 Tippie College Admission Writing Workshop** 0 s.h.

Development and refinement of macro-level writing skills; focus on thesis statement and topic sentence construction, paragraph organization, and precision in language choices. Requirements: application to Tippie College of Business and eligible to enroll in workshop.

**BUS:2300 Searching for Business Information** 1 s.h.

Search concepts and sources specific to business information; subscription and government online research sites.

**BUS:2450 Business and Culture in China** 3 s.h.

Business and cultural environment of China; lectures, readings, case studies, company visits, and immersion in cultural experiences; Chinese history, politics, business, economics, and culture; topics may include Chinese business culture and relationships, local companies going global, business strategies of multinational companies in Chinese market; United States-China trade relations, entrepreneurship, Chinese consumer, sustainability and social responsibility; two-week study program in China. Prerequisites: ECON:1100 and ECON:1200. Requirements: UI and cumulative g.p.a. of 2.75.

**BUS:2500 International Perspectives Program I** 0 s.h.
First in a two-course sequence; orientation to International Perspectives Program (IPP) community; introduction to the concept of an academic study map; development of an individual strategy towards academic study maps; begin foundational introduction to materials covered in BUS:2510, including an introduction to concepts of identity and culture from macro and micro perspectives; required seminar for all first-year IPP students. Requirements: admission to the International Perspectives Program.

**BUS:2510 International Perspectives** 1 s.h.
Program II
Continuation BUS:2500; exploration of concepts of identity and culture from both a macro and micro perspective; how culture and background impact how students think about and understand the world; exploration of having built-in assumptions about the world and why in some circumstances the ability to challenge those assumptions can be useful; study of cross-cultural communication. Prerequisites: BUS:2500. Requirements: admission to the International Perspectives Program.

**BUS:2520 IPP Capstone Project** 2 s.h.
Enhancement of foreign language studies and study abroad experiences; students select a topic of interest to explore an aspect of a study abroad country and culture in greater depth; creation of real-world interactions with people in host communities to utilize and develop language skills. Prerequisites: BUS:2500 and BUS:2510. Requirements: admission to the International Perspectives Program.

## Upper-Level Undergraduate and Graduate

**BUS:3000 Business Communication and Protocol** 3 s.h.
Foundation in business communication and protocol; composing business messages, organizing and reporting workplace data, developing business presentation and team-building skills, exploring issues pertaining to professional behavior. Prerequisites: RHET:1030. Requirements: admission to Tippie College of Business and 30 s.h. earned.

**BUS:3050 Business, Culture, and Society** 3 s.h.
International business environment and interpersonal traits and skills expected of successful international businessperson; interdisciplinary overview of issues related to business in Western Europe; important cultural differences, the code of business and professional etiquette, business protocol, Italian business history, cultural appreciation, and executive legal/ethical concerns in the workplace; series of lectures, workshops, speakers, plant tours, and cultural events.

**BUS:3100 Academic Internship or Cooperative Education** 0 s.h.
Participation in an internship or cooperative education; fulfills Tippie College of Business experiential learning requirement.

**BUS:3400 Business Student Ambassador Seminar** 1 s.h.
Experiences as a Business Student Ambassador providing tours of the John Pappajohn Building, acting as hosts at college functions, providing information and assistance to visiting groups, assisting student recruitment activities. Requirements: admission to Tippie College of Business and acceptance as a Business Student Ambassador.

**BUS:3500 Tippie Senate** 1 s.h.
For elected student representatives on the Tippie Senate.

**BUS:3600 Mentored Research** arr.
Business research conducted by undergraduate students under faculty supervision.

**BUS:3800 Business Writing** 3 s.h.
Series of practical projects; development of effective and persuasive business communication and analytical skills in public relations context.

**BUS:3850 Global Business Perspectives** 3 s.h.
Virtual classroom component of summer internships in London, Dublin, or Hong Kong; value of international work assignments, work as part of cross-cultural teams, skills and perspectives for living and working in a culturally diverse world; students set goals and complete professional development assignments, and analyze cultural and political environment of their internship sites.

**BUS:3900 Business Communication Internship I** 3 s.h.
Opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center.

**BUS:3910 Business Communication Internship II** 1-3 s.h.
Continuation of BUS:3900; opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Prerequisites: BUS:3900.

**BUS:3999 Honors Seminar** 1-3 s.h.

**BUS:4900 Academic Internship** arr.
Professional internship experience with associated academic content (e.g., paper, course work).

**BUS:4999 Honors Thesis in Business** 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Undergraduate major: accounting (B.B.A.)
Graduate degrees: M.Ac.; accounting subprogram for the Ph.D. in business administration
Faculty: http://tippie.uiowa.edu/accounting/faculty.cfm
Web site: http://tippie.uiowa.edu/accounting/

The Department of Accounting offers a broad education that prepares undergraduate and graduate students for careers in public accounting, private industry, government, nonprofit organizations, and academia.

PROFESSIONAL PROGRAM IN ACCOUNTING

The Professional Program in Accounting draws on curricula that provide a strong base of traditional technical subject matter and the skills needed for solving complex business problems. This framework of study enables students to continue professional growth over the entire span of their careers. The program emphasizes communication skills and provides the academic background required for leadership positions in business, government, and public accounting. It also qualifies students to take the Certified Public Accountant (CPA) examination.

The Professional Program in Accounting leads to a Bachelor of Business Administration with a major in accounting, which requires 120 s.h. of credit (see "Undergraduate Program of Study" below), and the Master of Accountancy, which requires 30 s.h. of graduate credit (see "Graduate Programs of Study" later in this section). Students are granted the B.B.A. upon successful completion of the third and fourth years of the Professional Program in Accounting; they are granted the M.Ac. after successful completion of 30 s.h. beyond the B.B.A.

Undergraduate Program of Study

- Major in accounting (Bachelor of Business Administration)

Students who wish to earn the Bachelor of Business Administration with a major in accounting must be admitted to the Professional Program in Accounting. Undergraduate accounting majors are subject to the probation and dismissal rules described in the Bachelor of Business Administration (p. 654) section of the Catalog and are governed by the Tippie College Undergraduate Honor Code.

The B.B.A. is not sufficient preparation for CPA licensure in states that have passed a 150-hour law, including Iowa.

Bachelor of Business Administration

The Bachelor of Business Administration with a major in accounting requires a minimum of 120 s.h., including at least 25 s.h. of work for the major. Students must be admitted to the Professional Program in Accounting in order to major in accounting. Course work in the program provides concentrated coverage of professional accounting subjects and closely related topics in commercial law, business, and information systems.

To enter the Professional Program in Accounting, undergraduates must be admitted to the Tippie College of Business. They must have a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.67 (B-minus average) in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting; and a passing score on the Department of Accounting writing assessment. Students who wish to declare accounting as a major but do not satisfy the automatic admission requirements may still apply to the professional program; applications are reviewed case-by-case.

Students must complete the following B.B.A. prerequisite courses before admission to the Professional Program in Accounting.

The business core requirements (FIN:3000 Introductory Financial Management, MGMT:2000 Introduction to Law, MGMT:2100 Introduction to Management, MSCI:3000 Operations Management, and MKTG:3000 Introduction to Marketing Strategy) may be taken in any sequence, preferably before the fourth year; MGMT:2000 Introduction to Law is a prerequisite to ACCT:4300 Business Law,
so it should be taken before spring semester of the fourth year. Students must complete BUS:3000 Business Communication and Protocol during their first year after admission to the Tippie College of Business.

Due to overlap in course content, accounting majors may not count ACCT:3020 Financial Accounting and Reporting toward the B.B.A. degree.

Spring Semester
ACCT:3300 Valuation of Financial Claims 3 s.h.
ACCT:3600 Applied Information Systems 3 s.h.
Two business core requirements 6 s.h.
Elective 3 s.h.

SUMMER: GMAT AND ADMISSION TO THE M.AC.
Students who intend to continue in the Professional Program in Accounting after receiving the B.B.A. should take the Graduate Management Admission Test (GMAT) during the summer before their senior year, as preparation for applying to the Master of Accountancy program.

FOURTH YEAR
Students must choose one of the following accounting electives during their fourth year.

ACCT:3500 Advanced Tax Topics (offered fall only) 3 s.h.
ACCT:4400 Advanced Financial Accounting (offered spring only) 3 s.h.

Fall Semester
ACCT:4100 Auditing 3 s.h.
One accounting elective 3 s.h.
One business core requirement 3 s.h.
Two electives 6 s.h.

Spring Semester
ACCT:4200 Accounting for Management Analysis and Control 3 s.h.
ACCT:4300 Business Law 3 s.h.
One accounting elective (if not taken fall semester) 3 s.h.
Two or three electives 6-9 s.h.

OPTIONAL ACCOUNTING ELECTIVE
All undergraduates, whether admitted to the M.Ac. program or not, may take ACCT:4900 Academic Internship for 1 s.h. in fall, spring, or summer. Department consent is required.

Graduate Programs of Study
• Master of Accountancy
• Accounting subprogram for the Doctor of Philosophy in business administration

The department collaborates with the College of Law to offer the joint M.Ac./J.D. program; see "Joint M.Ac./J.D." below. It also participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

Graduate students in accounting are subject to the probation and dismissal rules of the Graduate College and are governed by the full-time M.B.A. honor code.

Master of Accountancy
The Master of Accountancy requires 30 s.h. beyond the B.B.A. The program permits students to specialize in accounting areas according to their interests and objectives. It builds on the technical skills acquired in the undergraduate program, broadens students' perspectives on the role of accounting in organizations and decision making, and further develops written and oral communication skills.

Students from a variety of academic backgrounds enter the M.Ac. program. Those who enter with an undergraduate degree in accounting can expect to complete the degree in 12 months. Those who enter with a non-accounting undergraduate degree typically require four semesters to complete the M.Ac. Study plans are adjusted to reflect each student's particular academic background; see "Students Without Undergraduate Accounting Degrees" later in this section.

The M.Ac. is a nonthesis program. Course work focuses on the conceptual and economic foundations of accounting with applications to current and emerging problems of professional practice. M.Ac. students also have the opportunity to acquire expertise in one of four specialization areas: financial accounting/auditing, business analytics, taxation, and managerial accounting.

The 30 s.h. required for the M.Ac. must include at least 12 s.h. in graduate-level accounting courses and at least 21 s.h. in courses numbered 5000 or above. Some work for the specialization areas is cross-disciplinary, with courses from other departments as well as accounting.

The M.Ac. requires the following course work. Students complete the requirements for their chosen specialization or for the core program.

SPECIALIZATION IN FINANCIAL ACCOUNTING/AUDITING

Accounting Courses
Total of 12 s.h.
All of these:
ACCT:9040 Financial Information and Capital Markets 3 s.h.
ACCT:9130 Financial Reporting: Theory and Practice 3 s.h.
ACCT:9140 Advanced Auditing 3 s.h.
One of these:
ACCT:9050 Taxes and Business Strategy 3 s.h.
ACCT:9120 Design and Use of Cost Management Systems 3 s.h.

Business Analytics Courses
Total of 6 s.h.
MSCI:9210 Introduction to Modeling with VBA 3 s.h.
MSCI:9230 Database Systems 3 s.h.

Finance Courses
Total of 6 s.h.
MBA:8180 Managerial Finance (requires consent of M.B.A. office) 3 s.h.
One additional finance course numbered above 5000 3 s.h.

**General Electives**
Total of 6 s.h.

**SPECIALIZATION IN BUSINESS ANALYTICS**

**Accounting Courses**
Total of 12 s.h.
- ACCT:9120 Design and Use of Cost Management Systems 3 s.h.

Two of these:
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.

One of these (not already taken):
- ACCT:9040 Financial Information and Capital Markets 3 s.h.
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.
- ACCT:9150 Tax Research 3 s.h.

**Business Analytics Courses**
Total of 12 s.h.
- MSCI:9210 Introduction to Modeling with VBA 3 s.h.

Three business analytics courses (prefix CS or MSCI) numbered above 5000 9 s.h.

**General Electives**
Total of 6 s.h.

**SPECIALIZATION IN TAXATION**

**Accounting Courses**
Total of 9 s.h.
- ACCT:9120 Design and Use of Cost Management Systems 3 s.h.
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.

One of these (not already taken):
- ACCT:9040 Financial Information and Capital Markets 3 s.h.
- ACCT:9120 Design and Use of Cost Management Systems 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.
- ACCT:9150 Tax Research 3 s.h.

**Taxation Courses**
Total of 12 s.h.
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9150 Tax Research 3 s.h.

**General Electives**
Total of 9 s.h.
College of Law courses (prefix LAW) follow a different academic calendar schedule than do business courses. Some courses may require consent of instructor.

**SPECIALIZATION IN MANAGERIAL ACCOUNTING**

**Accounting Courses**
Total of 12 s.h.
- ACCT:9120 Design and Use of Cost Management Systems 3 s.h.
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.

One of these (not already taken):
- ACCT:9040 Financial Information and Capital Markets 3 s.h.
- ACCT:9050 Taxes and Business Strategy 3 s.h.
- ACCT:9140 Advanced Auditing 3 s.h.
- ACCT:9150 Tax Research 3 s.h.

**Business Analytics Courses**
Total of 6 s.h.
- MSCI:9210 Introduction to Modeling with VBA 3 s.h.
- MSCI:9230 Database Systems 3 s.h.

**Business Electives Outside Accounting**
Two business electives numbered above 5000 6 s.h.

**General Electives**
Total of 6 s.h.

**CORE PROGRAM**
Students who do not wish to pursue a specialization area must complete 30 s.h. beyond the B.B.A. At least 15 s.h. must be earned in graduate-level accounting courses and at least 21 s.h. must be earned in courses numbered 5000 or above. The following courses are required.

**Accounting Courses**
Total of 15 s.h.
- ACCT:9050 Taxes and Business Strategy (taken fall semester) 3 s.h.
- ACCT:9120 Design and Use of Cost Management Systems (taken spring semester) 3 s.h.
- ACCT:9130 Financial Reporting: Theory and Practice (taken fall semester) 3 s.h.
- ACCT:9140 Advanced Auditing (taken spring semester) 3 s.h.

One of these (not already taken):
Course work for students who enter the program with a non-accounting bachelor's degree is determined by each student's background and interest area. In addition to meeting the core program requirements for the M.Ac., students typically take a combination of undergraduate and M.B.A. courses to remove academic deficiencies in quantitative methods, business, and accounting. Students with a bachelor's degree in another area of business typically are required to take 45-51 s.h. in order to complete the M.Ac. program. Those with degrees outside of business and with no accounting courses typically are required to take 57-60 s.h.

CPA Examination and the Iowa Accountancy Act

The Iowa Accountancy Act requires individuals who wish to take the CPA examination to have a bachelor's degree, 24 s.h. of business course work, and 24 s.h. of accounting course work beyond ACCT:2100 Introduction to Financial Accounting.

Admission

Admission to the M.Ac. program is competitive. The admissions committee reviews applications individually, considering quantitative aspects (grade-point average and GMAT scores) and qualitative aspects of each applicant's background and professional experience (if applicable) to assess an applicant's potential for academic success and professional growth.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Application materials must include the following: the Application for Graduate Admission; official transcripts of all undergraduate and graduate course work submitted by each institution an applicant has attended; official scores on the Graduate Management Admission Test (GMAT); a supplemental application form with essay responses; a résumé and cover letter; and at least three letters of reference from former instructors or employers. (B.B.A. accounting students at the University of Iowa are not required to provide letters of reference.)

Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

University of Iowa undergraduate accounting students are encouraged to take the Graduate Management Admission Test (GMAT) the summer before their senior year. They may apply to the M.Ac. after December 1 of their fourth year. See "Application Deadlines" below.

For complete information about application procedures, contact the Department of Accounting.

APPLICATION DEADLINES

The Department of Accounting admissions committee reviews completed M.Ac. application files (which must include official GMAT scores) on five dates: March 1, April 15, July 15, October 1, and December 1. Applications are reviewed on these dates regardless of whether the applicant plans to begin the M.Ac. program in the fall semester (August), spring semester (January), or summer session (June). Final Graduate College application deadlines are as follows:

- Fall semester entry: July 15 (April 15 for international students)
- Spring semester entry: December 1 (October 1 for international students)
- Summer session entry: April 15 (March 1 for international students)

Students who wish to apply for a teaching assistantship must apply to the M.Ac. program no later than March 1.

Joint M.Ac./J.D.

The Department of Accounting and the College of Law offer the joint Master of Accountancy/Juris Doctor program. The joint M.Ac./J.D. requires a minimum of 18 s.h. of graduate course work in accounting. Students in the program may count up to 12 s.h. of College of Law courses as electives for the M.Ac. and up to 12 s.h. of graduate accounting courses as electives for the J.D. Separate application to each degree program is required; applicants must be admitted to each program before they may be admitted to the joint program.

For information about the J.D. degree, see the College of Law (p. 969) section of the Catalog.

Doctor of Philosophy

Graduate students in accounting may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy (p. 663) (Tippie College of Business) in the Catalog and visit the Department of Accounting web site.

Applications must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Application materials must include the applicant's score on the Graduate Management Admission Test (GMAT).

Faculty

The department's faculty members stay current in their discipline by producing and disseminating accounting-related knowledge. They keep abreast of the latest developments in the field of education and the profession by participating in educational conferences and seminars and publishing in leading academic journals.
Courses

Lower-Level Undergraduate

ACCT:1300 First-Year Seminar 1 s.h.
Small discussion class taught by faculty member; topics chosen by instructor; may include outside activities (e.g., films, readings, visits to research facilities).

ACCT:2100 Introduction to Financial Accounting 3 s.h.
Accounting and financial reporting procedures used by business and not-for-profit entities; emphasis on accounting concepts and use of accounting information in making economic decisions. Requirements: sophomore or higher standing.

ACCT:2200 Managerial Accounting 3 s.h.
Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: ACCT:2100 and ECON:1100 and MATH:1380.

Upper-Level Undergraduate and Graduate

ACCT:3020 Financial Accounting and Reporting 3 s.h.
External financial reporting practices in context of decisions by management, current and potential stockholders, financial analysts; emphasis on interpretation, use of financial statements. Prerequisites: ACCT:2200. Requirements: non-accounting major.

ACCT:3100 Professional Accounting Seminar 1 s.h.
Seminar topics, including accounting careers, curriculum, M.Ac. program, internships, CPA examination and other professional certificates, Beta Alpha Psi, ethics, and global standards. Offered fall semesters. Corequisites: ACCT:2200 or ACCT:3200.

ACCT:3200 Income Measurement and Asset Valuation 3 s.h.
Accounting rules that determine how economic events and transactions are described in published financial reports; emphasis on revenue and expense recognition, asset valuation, accrual accounting model. Corequisites: ACCT:3400. Requirements: admission to Professional Program in Accounting.

ACCT:3300 Valuation of Financial Claims 3 s.h.

ACCT:3400 Introduction to Taxation 3 s.h.
Federal income taxation of individuals and businesses, including corporations, partnerships, and sole proprietorships; emphasis on developing a broad perspective on structure, administration, and rationale of federal income tax system. Corequisites: ACCT:3200. Requirements: admission to Professional Program in Accounting.

ACCT:3450 Tax Practicum (VITA) I 1-2 s.h.
Transformative opportunity to work on real world tax problems with real clients; application of skills learned in classroom to real world problems; development of crucial accounting career soft skills including communication (explaining complicated ideas in simple language), moving out of one's comfort zone, working as a team, and having an appreciation for the importance of community service. Corequisites: ACCT:3400. Requirements: acceptance to undergraduate accounting program.

ACCT:3451 Tax Practicum (VITA) II 2 s.h.
Transformative opportunity to work on real world tax problems with real clients; application of skills learned in classroom to real world problems; development of crucial accounting career soft skills including communication (explaining complicated ideas in simple language), moving out of one's comfort zone, working as a team, and having an appreciation for importance of community service. Prerequisites: ACCT:3450.

ACCT:3500 Advanced Tax Topics 3 s.h.
Taxation of corporations and partnerships from organization through liquidation; relative merits of conducting business as C corporation, partnership, S corporation; the alternative minimum tax; introduction to tax research. Prerequisites: ACCT:3400. Requirements: senior standing.

ACCT:3550 Financial Statement Analysis 3 s.h.
How to analyze published financial statements; practical experience using financial statement information to assess accounting quality, historical performance, forecasted performance, credit risk, firm value. Prerequisites: ACCT:3020.

ACCT:3600 Applied Information Systems 3 s.h.
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations. Prerequisites: ACCT:2100 and ACCT:2200 and MSCI:3005. Same as MSCI:3100.

ACCT:4000 Special Topics in Accounting 1-3 s.h.
Independent study topics determined by faculty member.

ACCT:4001 Continuing Education: Special Topics in Accounting arr.

ACCT:4050 Directed Readings in Accounting arr.
Individual guided readings in accounting topics. Requirements: admission to Professional Program in Accounting.

ACCT:4100 Auditing 3 s.h.
General framework underlying auditing, role of audit standards in planning and conduct of audits, effect of regulation, ethics, liability on audit practices. Prerequisites: ACCT:3100 and ACCT:3300 and ECON:2800 and MSCI:3100. Requirements: senior standing.

ACCT:4200 Accounting for Management Analysis and Control 3 s.h.
Advanced topics in cost estimation, measurement, accumulation; use of cost data for decision making, performance evaluation in multi-unit organizations.
Prerequisites: ECON:2800. Requirements: admission to Professional Program in Accounting.

ACCT:4300 Business Law 3 s.h.
Contracts, sales, debtor-creditor relations, business organizations, other aspects of law applied to business.

ACCT:4400 Advanced Financial Accounting 3 s.h.
Accounting and reporting standards for business combinations, including mergers, consolidations, and multinational enterprises; accounting for partnerships, business segments, transactions denominated in foreign currency, including hedges using foreign currency derivative instruments; reporting standards for interim financial statements and fund accounting applied to government and nonprofit entities.
Prerequisites: ACCT:3300. Requirements: senior standing.

ACCT:4500 Accounting Measurement: Research and Analysis 3 s.h.
How uncertainty and risk influence accounting judgments, estimates, and forecasts that underlie reported financial statement amounts; applications drawn from familiar accounting measurement challenges and those unique to industries (e.g., airline transportation, healthcare, insurance, gaming, oil and gas exploration).

ACCT:4900 Academic Internship 1 s.h.
Professional internship experience.

ACCT:4999 Honors Thesis in Accounting 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects.
Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Graduate

ACCT:7850 Seminar in Accounting Research arr.
Forum on current research in accounting, related disciplines; faculty, student, guest papers, Ph.D. dissertation proposals. Requirements: Ph.D. enrollment.

ACCT:7900 Seminar in Selected Accounting Topics arr.
Individual study, research paper preparation. Requirements: Ph.D. enrollment.

Requirements: Ph.D. enrollment.

ACCT:9020 Strategic Cost Analysis 3 s.h.
Introduction to cost accumulation, reporting, cost management systems; managerial and divisional performance evaluation; appropriate use of cost data for short- and long-run decisions; product costing in manufacturing and service industries.
Prerequisites: MBA:8140.

ACCT:9030 Financial Accounting Standards and Analysis 3 s.h.
Accounting model, underlying measurement concepts, valuation rules for assets, liabilities, related issues of income determination; emphasis on economic substance of transactions, evaluation and interpretation of financial data.
Prerequisites: MBA:8180.

ACCT:9040 Financial Information and Capital Markets 3 s.h.
Use of corporate financial statements for investment and lending decisions; emphasis on financial analysis techniques, valuation, business analysis, cash flow projections, credit scoring, related research evidence.
Prerequisites: MBA:8180 and ((ACCT:3200 and ACCT:3300) or MBA:8140).

ACCT:9050 Taxes and Business Strategy 3 s.h.
Effect of taxes on business decisions, including investment strategies, capital structure decisions, compensation policies, international business, mergers and acquisitions, and financial reporting.
Prerequisites: ACCT:3500 or MBA:8140 or LAW:8194. Requirements: graduate standing in business.

ACCT:9120 Design and Use of Cost Management Systems 3 s.h.
Development of cost accumulation and reporting systems that complement a firm's strategy and structure; how activity-based cost management systems increase competitiveness by helping a firm manage its costs, processes, people.
Prerequisites: ACCT:4200 or ACCT:9020.

ACCT:9130 Financial Reporting: Theory and Practice 3 s.h.
Corporate accounting choices in framework of traditional accounting theory, economic consequences, firm valuation.
Prerequisites: ACCT:3300. Requirements: graduate standing in business.

ACCT:9140 Advanced Auditing 3 s.h.
Advanced issues such as ethics, internal control audits, forensic auditing, and fair value auditing.
Prerequisites: ACCT:4100. Requirements: graduate standing in business.

ACCT:9150 Tax Research 3 s.h.
Understanding the validity and use of various tax laws; performing tax research using printed and electronic tax materials; evaluation of tax law provisions and application to specific facts and circumstances; preparing tax memorandums.
Prerequisites: ACCT:3500. Requirements: admission to M.Ac. program.
Bachelor of Business Administration

Undergraduate major: B.B.A.
Web site: http://tippie.uiowa.edu/

Undergraduate Program of Study

- Bachelor of Business Administration
The Bachelor of Business Administration is offered with majors in accounting, business analytics and information systems, economics, finance, management, and marketing. The major in management with the entrepreneurial management track includes a distance education option.

This Catalog section provides information about requirements that all B.B.A. students must fulfill, regardless of their major, as well as admission information and academic rules and procedures for the B.B.A. For information about the individual majors, see Accounting (p. 648), Economics (p. 664), Finance (p. 677), Management and Organizations (p. 682), Management Sciences (p. 687), and Marketing (p. 692) in the Catalog.

Students may earn double majors in the B.B.A.; they also may earn joint degrees in the College of Engineering or the College of Liberal Arts and Sciences. See "Double Majors in Business" and "Joint Degrees" below. Many business students earn one or more certificates and minors offered in disciplines across the University; see "Minors" and "Certificates" below.

The Tippie College of Business's undergraduate and graduate programs are accredited by AACSB International—the Association to Advance Collegiate Schools of Business.

UNDERGRADUATE ADVISING

All business students are advised at the business college's Undergraduate Program Office. Pre-business students are advised at the University's Academic Advising Center or the college's Undergraduate Program Office. Assignment to the Undergraduate Program Office for advising depends on a student's grade-point average, completion of calculus and statistics, and/or the number of semester hours completed. Walk-in hours and scheduled appointments are available at both offices. For more information on advising, contact the college's Undergraduate Program Office or the UI Academic Advising Center.

HONOR CODE

Integrity and honesty are essential to success in all facets of life. The purpose of the Tippie College Undergraduate Honor Code is to promote honorable and ethical behavior. Students admitted to the college or enrolled in courses offered by the college are required to uphold the honor code.

Bachelor of Business Administration

The Bachelor of Business Administration requires a minimum of 120 s.h. of credit, including at least 48 s.h. earned in business courses and at least 60 s.h. earned in nonbusiness courses.

B.B.A. students must earn 30 s.h. in residence following admission to the Tippie College of Business. At least 24 s.h. in courses offered by the business college and at least two-thirds of the semester hours in the student's major must be earned at the University of Iowa. Nonresident instruction includes course work at colleges and universities other than the University of Iowa.

To graduate, B.B.A. students must have a cumulative g.p.a. of at least 2.00 in all college course work attempted, all college course work attempted in business, all college course work attempted in the major, all course work attempted at the University of Iowa, all business course work attempted at the University of Iowa, and all course work in the major attempted at the University of Iowa.

Common B.B.A. Requirements

B.B.A. students must satisfy the following minimum common requirements or approved equivalents. For approved equivalents, consult the college's Undergraduate Program Office.

GENERAL EDUCATION REQUIREMENTS

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rhetoric</td>
<td>4</td>
</tr>
<tr>
<td>Interpretation of Literature</td>
<td>3</td>
</tr>

<td>World Languages</td>
<td>0-10</td>
</tr>
<tr>
<td>Natural Sciences</td>
<td>3</td>
</tr>
<tr>
<td>Social Sciences, excluding ECON:1100 and ECON:1200</td>
<td>3</td>
</tr>
<tr>
<td>Historical Perspectives</td>
<td>3</td>
</tr>
<tr>
<td>Values, Society, and Diversity</td>
<td>3</td>
</tr>
<tr>
<td>International and Global Issues</td>
<td>3</td>
</tr>
</tbody>
</table>

Tippie College of Business students may complete the World Languages requirement using one of two options. One year of high school language study is generally equivalent to one semester of college language study.

Option one: attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college course work; or pass an achievement test or evaluation at fourth-level proficiency.

Option two: attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college course work; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may not count courses taken to fulfill General Education Program requirements toward other requirements for the B.B.A.

PREREQUISITES FOR ADMISSION TO THE COLLEGE

MATH:1380 Calculus and Matrix Algebra for Business
STAT:1030 Statistics for Business

**PREREQUISITES FOR DECLARING THE BUSINESS MAJOR**

ACCT:2200 Managerial Accounting 3 s.h.
ECON:1200 Principles of Macroeconomics 4 s.h.
MSCI:1500 Business Computing Essentials 2 s.h.

**BUSINESS CORE**

BUS:3000 Business Communication and Protocol 3 s.h.
ECON:2800 Statistics for Strategy Problems 3 s.h.
FIN:3000 Introductory Financial Management 3 s.h.
MGMT:2000 Introduction to Law 3 s.h.
MGMT:2100 Introduction to Management 3 s.h.
MGMT:3000 Introduction to Marketing Strategy 3 s.h.
MSCI:3000 Operations Management 3 s.h.
MSCI:3005 Information Systems 3 s.h.

**EXPERIENTIAL LEARNING REQUIREMENT: TIPPIE RISE**

All Tippie College of Business students directly admitted to the college fall 2015 or later and all students admitted through standard admission fall 2016 or later must successfully complete at least one of these experiences—research, internship, study abroad, or experiential course. Students must follow the specific criteria and procedures established for the selected experience as outlined by the undergraduate program office.

Students must complete a Tippie RISE course from one of the four lists below.

**Research**

ACCT:4999 Honors Thesis in Accounting 3 s.h.
BUS:3600 Mentored Research arr.
ECON:4999 Honors Thesis in Economics 3 s.h.
FIN:4999 Honors Thesis in Finance 3 s.h.
MGMT:4999 Honors Thesis in Management and Organizations 3 s.h.
MKTG:4999 Honors Thesis in Marketing 3 s.h.
MSCI:4999 Honors Thesis in Management Sciences 3 s.h.
URES:3995 ICRU Research Fellow 0 s.h.

**Internship**

ACCT:4900 Academic Internship 1 s.h.
BUS:3100 Academic Internship or Cooperative Education 0 s.h.
BUS:3900 Business Communication Internship I 3 s.h.
ECON:4900 Academic Internship arr.
ENTR:4900 Academic Internship arr.
FIN:4900 Academic Internship 1-3 s.h.
MGMT:4900 Academic Internship arr.
MKTG:4900 Academic Internship arr.
MSCI:4900 Academic Internship arr.
CCP:1201 Academic Internship 1-3 s.h.
CCP:2202 ISSS Academic Internship 9 s.h.
LS:3011 Leadership Certificate Internship 0,2,3 s.h.

**Study Abroad**

Any CIMBA course 3 s.h.
Any course with ABRD prefix 3 s.h.

**Experiential Course**

ACCT:3450 Tax Practicum (VITA) I 1-2 s.h.
ENTR:4200 Entrepreneurship: Business Consulting 3 s.h.
FIN:4250 Applied Equity Valuation 3 s.h.
MGTK:3701 Marketing Institute Field Studies 2 s.h.
MSCI:4250 BAIS Capstone Project 3 s.h.
LS:1024 Alternative Break Service Learning arr.
LS:3002 Career Leadership Academy Part 2 3 s.h.

**MAJOR AREA OF STUDY**

All B.B.A. students must complete a major area of study. The college offers majors in accounting (p. 648), business analytics and information systems (p. 687), economics (p. 664), finance (p. 677), management (p. 682), and marketing (p. 692). The requirements for each major are established by the department that offers the major.

**Students with Associate of Arts Degrees**

Students who have been granted an Associate of Arts (A.A.) from a community college participating in the Iowa Community College/Regents Articulation Agreement are considered to have met all high school unit requirements for admission to the B.B.A. and all of the General Education Program requirements listed under "General Education Requirements" above, except the World Languages requirement. The program of study for which a student was awarded the A.A. must have included:

- a minimum of 60 s.h. (or 90 quarter hours) of credit acceptable toward graduation from the University of Iowa; mathematics courses comparable to MATH:0100 Basic Algebra I and MATH:0300 Basic Geometry are not accepted toward graduation;
- completion of the agreed-upon group of courses at the community college; and
- a g.p.a. of at least 2.00.

Completion of an Associate of Arts does not guarantee admission to the Tippie College of Business. See "Admission" later in this section for a complete list of requirements for admission to the B.B.A.

Students who use the provisions of the articulation agreement are granted a maximum of 60 s.h. of transferable credit from two-year colleges toward the 120 s.h. required for a B.B.A. Credit earned for the A.A. beyond the 60 s.h. transferable maximum is used in computing a student's grade-point average, and it may be used to satisfy course requirements, but it does not count toward the B.B.A. Transfer credit for business courses taken during the first and second years is counted toward the B.B.A. only if such courses are usually offered as lower-division courses at the University of Iowa.
Transfer Courses

Students who have taken courses at another institution that are similar to those approved for the common business requirements at Iowa may request that these courses be evaluated for transfer credit. Students who transfer fewer hours than needed to meet a common business requirement may use only approved courses to complete the remainder of the requirement. Only third- and fourth-year-level courses taken at accredited four-year institutions may be used to satisfy common business course requirements numbered 3000 or above. Students must complete a minimum of 24 s.h. of business course work and at least two-thirds of the course work in the major at the University of Iowa. They also must meet the 30 s.h. residency requirement of the Tippie College of Business. Credit earned through Guided Independent Study or online courses may be counted toward all requirements for graduation, subject to approval by a student's major department.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Note: The following checkpoints are designed for students who enter the University as direct admission or pre-business students. In order to stay on the plan, pre-business students must maintain the grade-point averages required for admission to the Tippie College of Business and must apply for admission to the college by the established deadline. The Four-Year Graduation Plan is not available to students who choose to pursue a double major in the college or to those enrolled in a joint degree program.

Students must take BUS:3000 Business Communication and Protocol during their first year after admission to the Tippie College of Business, except direct admission students, who take the course during their second year.

Before the third semester begins: ECON:1100 Principles of Microeconomics or ECON:1200 Principles of Macroeconomics, MATH:1380 Calculus and Matrix Algebra for Business, and STAT:1030 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: ACCT:2100 Introduction to Financial Accounting, ACCT:2100 Principles of Microeconomics or ECON:1200 Principles of Macroeconomics (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of course work in the major (varies by major)

During the eighth semester: all remaining course work in the major and a sufficient number of semester hours to graduate

Honors in Business

Outstanding students in the college have an opportunity to undertake independent study and to work closely with faculty members and other honors students. To graduate with honors in business, students must complete an honors thesis in one of the college's departments, registering for the appropriate course from the following list.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT:4999</td>
<td>Honors Thesis in Accounting</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>BUS:4999</td>
<td>Honors Thesis in Business</td>
<td>3 s.h.</td>
</tr>

</tr>
</tbody>
</table>

To earn the B.B.A. with honors, students must successfully complete all college requirements with a g.p.a. of at least 3.50 in all courses taken at Iowa, all business courses taken at Iowa, all courses taken (including transfer courses), and all business courses taken (including transfer courses).

See Tippie College of Business Honors Program to learn more.

Double Majors in Business

Students may earn the B.B.A. degree with more than one major. Students may officially declare a maximum of four programs on the Iowa Student Information System (ISIS). Majors, minors, and certificates are considered separate programs. Additional programs must be declared in the Undergraduate Program Office by an advisor. The Four-Year Graduation Plan is not available to students earning more than one major. Students have access to degree audits for all of the programs they have officially declared. They also have access to all program courses, with some limitations, during early registration. A student must be in good academic standing in order to declare more than one major. See Double Majors—Policies and Procedures.

Joint Degrees

Undergraduate students may earn joint undergraduate degrees from the Tippie College of Business and the College of Liberal Arts and Sciences or the College of Engineering. The following rules apply to all students in joint degree programs.

To enter a joint degree program, students must have approval from the Tippie College of Business and must be admitted to both colleges. Interested students should see an advisor in the college's Undergraduate Program Office.

Students in joint degree programs are allowed a combined maximum of three second-grade-only options.

All students in joint programs must meet all requirements for both degrees, including all General Education Program requirements.
Students are assigned two advisors (one for each major). Students in joint degree programs are assessed tuition only for the primary (first) major.

First-year students in joint degree programs who are direct admission students in the Tippie College of Business must enroll in BUS:1200 Tippie College Direct Admit Seminar during their first semester at the University.

JOINT B.B.A./LIBERAL ARTS AND SCIENCES DEGREE

The Tippie College of Business and the College of Liberal Arts and Sciences offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), or Bachelor of Music (B.M.) from the College of Liberal Arts and Sciences.

Students in the joint business/liberal arts and sciences degree program must declare the Tippie College of Business program of study as their primary (first) major.

To learn about liberal arts and sciences majors, see "Index: Academic Programs" in the College of Liberal Arts and Sciences section of the Catalog.

JOINT B.B.A./B.S.E.

The Tippie College of Business and the College of Engineering offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering. Students in the joint business/engineering degree program must declare the College of Engineering program of study as their primary (first) major.

Students in the joint business/engineering degree program must enroll in appropriate mathematics and engineering courses early during their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may be able to count certain courses toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on a student's choice of major study areas.

For information about engineering majors, see Bachelor of Science in Engineering (p. 841) (College of Engineering) in the Catalog. To learn more about requirements for the joint business/engineering degree, consult the Undergraduate Program Office in the Tippie College of Business and Engineering Student Services in the College of Engineering.

Minors

Bachelor of Business Administration students may earn minors in a number of disciplines. For example, students interested in international business might choose to earn a minor in a second language. For a list of minors and links to the departments and programs that offer them, see Undergraduate Minors (p. 12) in the Catalog.

Students may declare a minor on ISIS. To have the minor recorded on their transcripts, they must complete the "minor" section on their Application for Degree they submit through ISIS before the session they intend to graduate.

Certificates

Bachelor of Business Administration students may earn certificates offered by the Tippie College of Business as well as by other colleges at the University. The business college offers the Certificates in Entrepreneurial Management (p. 673) and in Risk Management and Insurance (p. 702). In addition, it partners with the College of Engineering to offer the Certificate in Technological Entrepreneurship (p. 914) and with the College of Liberal Arts and Sciences to offer the Certificates in International Business (p. 408) and in Performing Arts Entrepreneurship (p. 498).

The College of Liberal Arts and Sciences, the College of Public Health, and University College offer a wide range of certificates open to all undergraduates. Many pair exceptionally well with a business major. See Undergraduate Certificates (p. 11) in the Catalog for a complete list of certificates and links to their Catalog sections.

Study Abroad

CIMBA Italy offers semester and summer programs in Paderno del Grappa, Italy, northwest of Venice. Students who attend the programs come from a variety of public and private universities worldwide. At CIMBA, students immerse themselves in a wide range of courses, including innovative leadership and development programming, while living amidst the Venetian countryside in one of the most popular travel and study destinations in the world. Business and cultural immersions begin for students the minute they arrive on campus. All courses are taught by English-speaking professors from top universities throughout the United States and Europe.

The University's Office for Study Abroad offers a wide variety of study abroad programs in more than 40 countries. Students may choose from summer, semester, academic year, and winter session programs that complement their areas of study. See Study Abroad (p. 1233) (University College) in the Catalog for a list of programs.

Admission

Students enter the Tippie College of Business in one of two ways: direct admission or standard admission. All students admitted to the College of Business must follow the Tippie College Undergraduate Honor Code. Students who meet the admission requirements may be denied admission upon evidence of postsecondary academic misconduct or other violations of the honor code. Students are required to meet with the associate dean, undergraduate program, to discuss incidents of academic misconduct.

Admission standards are set by the Undergraduate Program Committee. All admission appeals are reviewed by the Undergraduate Program Office. Prospective students must submit acceptance of admission offers and all transcripts showing course work that satisfies the Tippie College of Business admission requirements to the University's Office of Admissions by the appropriate deadline. Letters of recommendation are not accepted. For
more information about application and admission, contact the Undergraduate Program Office.

**Direct Admission**

Direct admission is designed to enable highly qualified high school students to enter the college directly after high school. Applicants must have a composite ACT score of 27 or higher (SAT critical reading and math score of 1210 or higher) and a high school g.p.a. of 3.70 or higher (on a 4.00 scale) to qualify. Applicants who do not meet these criteria but who present a strong academic record are considered carefully.

Incoming high school students who are admitted to the College of Liberal Arts and Sciences as pre-business students may inquire about their admission decision by contacting the assistant dean and director of admission in the Tippie College of Business Undergraduate Program Office. For more information about admission requirements, see Admission Policies on the Tippie College of Business web site.

Additional requirements for declaring a major in accounting include a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.67 (B-minus average) in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting; and a passing score on the Department of Accounting writing assessment.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The application process is competitive and is based on high school record and an application essay. Application deadline is March 1.

**Standard Admission**

University of Iowa students are eligible to apply to the Tippie College of Business through standard admission if they have completed at least 12 s.h. of course work; have completed the four prerequisite courses listed under "Common B.B.A. Requirements" above with grades of C or higher; have a g.p.a. of at least 2.75 on the prerequisite courses, on all college course work completed, and on all University of Iowa course work. Transfer students who have completed the prerequisite courses and meet the grade-point average requirements also may apply through standard admission.

Requirements for declaring a major include completion of ACCT:2200 Managerial Accounting, ECON:1200 Principles of Macroeconomics, and MSCI:1500 Business Computing Essentials; see "Common B.B.A. Requirements" above. Additional requirements for declaring a major in accounting include a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.67 (B-minus average) in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting; and a passing score on the Department of Accounting writing assessment.

Applications for standard admission must be submitted online. Application deadlines are March 1 for fall admission and October 1 for spring admission; applicants should meet all admission requirements by the end of the semester in which they apply. Admission is not granted for the summer session or the three-week winter session. Applicants transferring from another college or university are held to the application deadlines. Grades from the three-week winter session do not count toward admission for the following spring semester, and grades from a summer session do not count toward admission for the following fall semester. Students who are denied admission may file an Appeal for Denial of Admission to Business if they can provide documentation of extenuating circumstances that affected their academic performance.

**Nondegree Admission**

Students visiting from another institution who wish to enroll in undergraduate courses in order to earn credit that they can transfer to their home institution may be granted admission as undergraduate nondegree students. Nondegree students are not guaranteed access to specific courses; they must have the approval of the undergraduate program staff in the Tippie College of Business and may earn no more than 9 s.h. in nondegree status.

**Reentry Policy**

All students who have been enrolled in another college or university since leaving the University of Iowa are required to submit official transcripts along with an application for reentry. Completed application materials must be received at least two weeks before the opening of classes. Reentry students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

**Absent for 12 months or more—in good standing:** Students absent from the University of Iowa for 12 months or more who left in good standing must apply to the UI Office of Admissions as returning students and must contact the Tippie College of Business Undergraduate Program Office for advising before registration. Good standing is defined as not on probation and not dismissed for any reason.

**Absent for 12 months or more—not in good standing:** Students absent from the University of Iowa for 12 months or more who were not in good standing when they left the University must file a petition with the Tippie College of Business Undergraduate Program Office to be reinstated. If the petition is approved, the student must apply to the UI Office of Admissions as a returning student; the Undergraduate Program notifies the Office of Admissions that a student's petition for reinstatement has been approved. The student also must schedule an appointment to see an advisor in the Tippie College of Business for advising before registration. Not in good standing is defined as being on probation or having been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at the University of Iowa or at another institution, or a violation of the Tippie College Undergraduate Honor Code. Students who have been officially dismissed follow the procedures for reinstatement.

**Absent for less than 12 months—in good standing:** Students absent for less than 12 months are not required to file an application for reentry. Students who were in good standing when they left the University should contact the Tippie College of Business Undergraduate Program Office for advising before registration. Reentry is approved regardless of any admission requirement changes.

**Absent for less than 12 months—not in good standing:** Students absent for less than 12 months are not required to file an application for reentry. Students who were not in good standing when they left the University must consult with an advisor in the Tippie College of Business; the student may be readmitted
on probation. Readmitted students should contact the Tippie College of Business Undergraduate Program Office for advising before registration. Reentry is approved regardless of any admission requirement changes. Not in good standing is defined as being on probation or having been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at the University of Iowa or at another institution, or a violation of the Tippie College Undergraduate Honor Code. Students who have been officially dismissed follow the procedures for reinstatement.

Academic Rules and Procedures

Academic Recognition

DEAN'S LIST
Undergraduate students in the Tippie College of Business who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

PRESIDENT'S LIST
Undergraduate students in the Tippie College of Business who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded course work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

GRADUATION WITH HONORS
Graduation with honors recognizes high scholastic achievement based on grades and on completion of academic work beyond the requirements of the student’s major. To graduate with honors, students must maintain a cumulative, University of Iowa, business, and UI business g.p.a. of at least 3.50 and must successfully complete an honors project under the supervision of a faculty member. See “Honors” earlier in this Catalog section.

GRADUATION WITH DISTINCTION
Graduation with distinction recognizes high scholastic achievement based on grades. The Office of the Registrar certifies to the Tippie College of Business associate dean the names of students eligible to graduate with distinction. The college awards degrees "with highest distinction" to students in the highest five percent, a "with high distinction" to students in the next three percent, and "with distinction" to the next highest five percent. Ranking is based on students' grade-point averages for all college-level study undertaken before their final registration.

To be eligible to be considered for graduation with distinction, a student must complete 60 s.h. in residence as an undergraduate at the University of Iowa; 45 s.h. of that must be completed before the final registration.

Credit and Grading

CREDIT BY EXAMINATION
Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College-Level Examination Program (CLEP) and the Advanced Placement (AP) program of the College Board or the International Baccalaureate Program (IB). For information about when and how to take the CLEP and AP examinations, contact the University’s Evaluation and Examination Service. The Tippie College of Business Undergraduate Program Office has information on scores, credit, and course duplicates for all CLEP, Advanced Placement, and IB tests accepted by the college.

MAXIMUM SCHEDULE
During early registration, students admitted to the Tippie College of Business may register for a maximum of 16 s.h. Course schedules that exceed 16 s.h. require approval from the Undergraduate Program Office. After early registration, students may register for a maximum of 18 s.h. Course schedules of more than 18 s.h. for a fall or spring semester, more than 12 s.h. for the summer session require approval from the Undergraduate Program Office.

ADDING AND DROPPING COURSES
Students may drop courses, except College of Law courses, any time before the deadline published in the University’s academic deadline calendar. Deadlines are different for regular and off-cycle courses. See Academic Deadlines for the University of Iowa on the Office of the Registrar web site (http://www.registrar.uiowa.edu).

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

ADMINISTRATIVE DROPS FOR LACK OF PREREQUISITES
Students are responsible for making sure that they have satisfied all prerequisites for any course for which they register. Instructors and departments have the option to drop a student from a course if the student has not satisfied the required prerequisites. Administrative drops must be processed by the first eight calendar days of the semester; the first two calendar days of the winter session, each summer session, or the start of an off-cycle course. Administrative drops are made without assignment of a W (withdrawn). Students who are dropped from courses are notified. Students should not assume that they have been dropped from a course because they do not have the prerequisites.

ADMINISTRATIVE DROPS FOR NONATTENDANCE
Instructors have the option to drop a student who has missed the first two class periods of a course, unless the student has offered an acceptable reason for beginning the course late. Administrative drops must be processed by the first eight calendar days of the semester or the first two calendar days of the winter session, each summer session, or the start of an off-cycle course. Administrative drops are made without assignment of a W (withdrawn). Students who are dropped from courses are notified. Students should not assume that they have been dropped from a course because they have not attended.

PASS/NONPASS
Up to 15 s.h. of course work required for the B.B.A. may be taken pass/nonpass with the consent of an advisor and the instructor. Students must be in good academic standing to be eligible for the pass/nonpass option. A maximum of two pass/nonpass courses may be taken in one semester. Courses taken pass/nonpass may not be used to satisfy general education, prerequisite, core, or major business
requirements; major business requirements include any course that fulfills a major course requirement or is offered by the major department. Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of C-minus or higher is recorded as a P; an earned grade of D-plus or lower is recorded as an N. Pass/nonpass credit is not included in grade-point-average calculations.

Satisfactory/Fail, Satisfactory/Unsatisfactory

Certain courses are offered satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U). All students registered for these courses receive one of these marks.

Special forms are not necessary to register for S/F or S/U courses, since all students enrolled in such courses automatically receive an S, an F, or a U.

Semester hours of S or U graded course work are not used in computing grade-point averages, but hours of F graded course work are used.

Semester hours of S graded course work are counted as semester hours earned toward graduation; semester hours of F or U graded course work do not count as semester hours earned toward graduation.

A maximum of 15 s.h. of S credit from the University of Iowa is accepted toward a bachelor's degree.

Second-Grade-Only Option for Pre-Business Students

Pre-business students must follow the rules established by the College of Liberal Arts and Sciences (CLAS). Contact the CLAS Academic Programs & Student Development office or consult the CLAS Academic Policies Handbook for more information.

Second-Grade-Only Option for Students Admitted to Business

Students admitted to the Tippie College of Business may use the second-grade-only option on any course except business courses numbered above 3005 with the prefix ACCT, BUS, ECON, FIN, MSCI, MGMT, MKTG, or ENTR.

Students may apply the second-grade-only option to a maximum of three different courses while they are enrolled at the University of Iowa; any second-grade-only options used before entry to the Tippie College of Business counts toward the maximum of three second-grade-only options allowed.

Students in joint degree programs are allowed a combined maximum of three second-grade-only options.

The second-grade-only option may be used only once per course. Once placed on the record, the option may not be retracted.

A course taken at another college or university may not be repeated at the University of Iowa under the second-grade-only option.

A University of Iowa course may not be repeated at another institution under the UI second-grade-only option.

If the course was taken for a grade the first time, it must be taken for a grade the second time.

If the course was taken pass/nonpass the first time, a student may choose to take the course for a grade or as pass/nonpass the second time.

Any University of Iowa course taken in any mode of delivery—during a regular semester, a summer session, an intensive session, or through distance learning and the Division of Continuing Education—may be repeated in the same mode of delivery or in any other mode of delivery.

Students who have been awarded a degree from the University of Iowa may not use the second-grade-only option on a course taken before the degree was awarded.

Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

Students must register as usual for the course that is to be repeated.

After the session in which the course is being repeated has begun, students must request the second-grade-only option by completing the Second-Grade-Only Option Request Form.

The permanent record is adjusted by placing a pound symbol (#) next to the first grade to indicate that it is no longer being included in the grade-point-average calculation, and only the semester hours from the second registration have been counted as semester hours earned.

Incomplete Grades

Instructors may report a mark of I (incomplete) only if the unfinished part of a student’s work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if a student’s standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor’s approval.

Guided Independent Study

University of Iowa Guided Independent Study is counted as resident credit and may be applied to all requirements for graduation, subject to approval by a student’s major department. Guided Independent Study courses can be taken any semester, up to four courses at a time.

Students eligible for the second-grade-only option may retake the course through Guided Independent Study for the second-grade-only option. Likewise, students eligible for the second-grade-only option in a Guided Independent Study course may retake the course on campus for the second-grade-only option.

Probation and Dismissal

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00: all course work taken, all course work
taken at the University of Iowa, all business course work taken, all business course work taken at the University of Iowa, all course work taken to satisfy requirements for the major(s), and all course work taken at the University of Iowa to satisfy requirements for the major(s). In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all course work taken to satisfy requirements for the major(s), and all course work taken at the University of Iowa to satisfy requirements for the major(s).

When all of the above grade-point averages equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a term with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship may petition for permission to reregister, but usually only after one year following the end of the term in which they were dismissed.

REINSTATEMENT
Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean, Undergraduate Program Office. Arrangements for a reinstatement interview must be made with the Undergraduate Program Office in the Tippie College of Business. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement to spring semester. Late requests are deferred to the following semester. Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

Returning for Baccalaureate Degrees

RETURNING FOR A SECOND BUSINESS MAJOR
Individuals who already hold a B.B.A. degree from the University of Iowa may complete the requirements for another business major, except accounting. Those interested in earning a degree in accounting must apply for admission to the Graduate College in order to earn the Master of Accountancy degree. Students who return to the University of Iowa to complete another business major must meet the requirements for that major; they do not have to meet the residence requirement. It is their responsibility to notify the Office of the Registrar once they complete the requirements for the second major so that a notation can be placed on their permanent record. Returning students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

RETURNING FOR AN ADDITIONAL BACHELOR’S DEGREE
Individuals who hold a bachelor's degree from another college at the University of Iowa may return to earn the B.B.A. degree from the Tippie College of Business. They must satisfy all requirements for undergraduate admission to the business college. Once admitted, they must satisfy all requirements for the B.B.A. in their chosen major. Returning students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

RETURNING FOR AN ADDITIONAL BACHELOR’S DEGREE IN ACCOUNTING
Individuals who hold a bachelor's degree in a nonbusiness discipline from the University of Iowa or from another college or university may be considered for admission to the Tippie College of Business to earn the B.B.A. with a major in accounting. Individuals interested in this option should consult with the Department of Accounting about the B.B.A. program in accounting (undergraduate) and the Master of Accountancy graduate program. Those who already hold a B.B.A. from the University of Iowa or any business degree from another institution may not earn a major in accounting at Iowa.
Business Analytics

Chair, Department of Management Sciences
- Nick Street

Director, Business Analytics
- Nick Street

Graduate certificate: business analytics
Faculty: http://tippie.uiowa.edu/business-analytics/faculty.cfm
Web site: http://tippie.uiowa.edu/business-analytics/

The Certificate in Business Analytics is administered by the Department of Management Sciences and is described below. For specific information regarding the Master of Science in business analytics, see Management Sciences (p. 687) in the Catalog.

Graduate Program of Study
- Certificate in Business Analytics

Analytics—broadly defined as the scientific process of transforming data into insight for making better decisions—plays an increasingly critical role in business. Companies must be able to access and analyze this data intelligently. As the recognition of analytics has grown, so has the demand for analytics education.

The focus on business analytics entails a specific approach targeting the core business disciplines of business, including operations, information technology, finance, marketing, accounting, and human resources, among others.

Certificate

The certificate program is open to students who have earned an undergraduate degree. A minimum undergraduate or graduate g.p.a. of 2.50 is required for admission.

The Certificate in Business Analytics requires 15 s.h. of graduate credit, of which 9 s.h. must be unique to the certificate and cannot be counted toward the student’s major. Students may be allowed to apply up to 6 s.h. of course work from another institution toward the certificate with approval by petition to the director of the certificate program.

A cumulative g.p.a. of at least 2.75 is required in order to complete the certificate. All courses are offered in Cedar Rapids.

The Certificate in Business Analytics requires the following course work.

All of these:

Doctor of Philosophy

Graduate degree: Ph.D. in business administration
Web site: http://tippie.uiowa.edu/phd/

Graduate Program of Study

- Doctor of Philosophy in business administration
The Doctor of Philosophy in business administration is an interdepartmental degree open to students in several Tippie College of Business departments. Basic requirements for the degree are detailed below. For additional information, see “Graduate Programs” in the Accounting (p. 648), Finance (p. 677), Management and Organizations (p. 682), Management Sciences (p. 687), and Marketing (p. 692) sections of the Catalog.

The Tippie College of Business also offers a Doctor of Philosophy in economics; see Economics (p. 664) in the Catalog.

Doctor of Philosophy

The Doctor of Philosophy in business administration requires a minimum of 72 s.h., including approved transfer credit. The program prepares students for research positions in business and government or for research and teaching positions at academic institutions. It is flexible, permitting students to choose a specialization area according to their interests. Course work and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

Ph.D. course work consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual Tippie College of Business departments or visit their web sites.

CORE COURSES
Core courses develop research competence and provide background for specialized study. Doctoral students consult with their advisors to develop a study plan that reflects the individual student’s background and interests and satisfies core requirements.

MAJOR STUDY AREA
At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

MINOR STUDY AREA
Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

COMPREHENSIVE EXAMINATIONS
Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

DISSERTATION
Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the student’s major department. Researching and writing the dissertation typically require two years of full-time effort.

FINAL EXAMINATION
Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.

Admission

Applicants to the Ph.D. program in business administration must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants must take the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT) and have their scores sent to the University in order to be considered for admission. The Departments of Finance, Management and Organizations, Management Sciences, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores. Required scores on these tests and their weight in admission decisions vary by department.

International applicants who do not hold a baccalaureate or a more advanced degree from an accredited university in the United States, the United Kingdom, Canada (except French language institutions in Quebec), English-speaking Africa, Australia, or New Zealand must take the Internet-based Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS) test and have their scores sent to the University of Iowa. An IELTS total score of at least 7.0 with no subscore below 6.0 satisfies the English language requirement. Applicants who use the IELTS test are required to take the on-campus English Proficiency Evaluation.

Admission is for fall entry. Completed applications should be submitted as early as possible and no later than the following deadlines.

Accounting: January 15
Finance: January 15
Management and Organizations: January 15
Management Sciences: January 15
Marketing: January 15

Visit Ph.D. Programs on the Tippie College of Business web site to learn more.
Economics

Chair
• John L. Solow

Undergraduate major: economics (B.A., B.S., B.B.A.)
Undergraduate minor: economics
Graduate degrees: M.A. in economics; Ph.D. in economics
Faculty: http://tippie.uiowa.edu/economics/faculty.cfm
Web site: http://tippie.uiowa.edu/economics/

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economics analyzes incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. It treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and for graduate students. It also partners with the Departments of Philosophy, Political Science, and Sociology to offer the undergraduate major in ethics and public policy, an interdisciplinary program administered by the Department of Philosophy (College of Liberal Arts and Sciences); see Ethics and Public Policy (p. 286) in the Catalog.

Undergraduate Programs of Study

• Major in economics (Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration)
• Minor in economics

The Tippie College of Business and the College of Liberal Arts and Sciences offer the major in economics. Students may complete the major with their choice of three degrees. The Bachelor of Arts and Bachelor of Science are awarded by the College of Liberal Arts and Sciences; the Bachelor of Business Administration is awarded by the Tippie College of Business.

The B.A. in economics is designed to achieve a balance of economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytical tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Each program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

All students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. They complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on the student's choice of track.

Bachelor of Arts, Bachelor of Science

The Bachelor of Arts with a major in economics requires a minimum of 120 s.h., including 31-32 s.h. of work for the major. The Bachelor of Science with a major in economics requires a minimum of 120 s.h., including 33-35 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 313).

The B.A. and B.S. programs focus on economic theory, mathematical tools, and field applications; the B.S. program also includes an emphasis on developing skill using analytic tools. Both programs offer good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The economics major for the B.A. and B.S. requires a set of courses in mathematics and statistics (10-11 s.h. for B.A. students, 15-17 s.h. for B.S. students) and a set of courses in economic theory (6 s.h. for B.A. and B.S. students). It also requires a set of applied field courses (15 s.h. for B.A. students, 12 s.h. for B.S. students) in one of three tracks: business economics, policy economics, or analytical economics.

The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector. The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector.

Students may be able to count a limited amount of transfer credit toward the major, but they must complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics or ECON:3140 Advanced Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.
The economics major (B.A. or B.S.) requires the following course work.

**MATHEMATICS AND STATISTICS COURSES (B.A.)**

Students earning a B.A. complete the following mathematics and statistics course work.

Both of these:
- ECON:2800 Statistics for Strategy Problems 3 s.h.
- MATH:1380 Calculus and Matrix Algebra for Business 4 s.h.

One of these:
- STAT:1020 Elementary Statistics and Inference 3 s.h.
- STAT:1030 Statistics for Business 4 s.h.

**MATHEMATICS AND STATISTICS COURSES (B.S.)**

Students earning a B.S. complete the following mathematics and statistics course work.

All of these:
- ECON:4800 Introduction to Econometrics 3 s.h.
- MATH:1850 & MATH:1860 Calculus I-II 8 s.h.

One of these:
- STAT:3120 Probability and Statistics 4 s.h.

The department recommends that students planning to pursue a graduate degree in economics take STAT:3100-STAT:3101 rather than STAT:3120. It also recommends that they take additional courses in mathematics, including MATH:2700 Introduction to Linear Algebra, MATH:2850 Calculus III, and MATH:3600 Introduction to Ordinary Differential Equations.

**ECONOMIC THEORY COURSES (B.A. AND B.S.)**

B.A. and B.S. students complete the following economic theory course work.

One of these:
- ECON:3100 Intermediate Microeconomics 3 s.h.
- ECON:3140 Advanced Microeconomics 3 s.h.

And:
- ECON:3150 Intermediate Macroeconomics 3 s.h.

**APPLIED FIELD COURSES (B.A. AND B.S.)**

B.A. students complete a total of five applied field courses (15 s.h.) in their track; B.S. students complete a total of four applied field courses (12 s.h.) in their track.

**Analytical Economics Track (B.A. and B.S.)**

Four (B.A. students) or three (B.S. students) of these:
- ECON:4090 Natural Resource Economics 3 s.h.
- ECON:4110 International Economics 3 s.h.
- ECON:4140 Labor Economics 3 s.h.
- ECON:4160 Public Sector Economics 3 s.h.
- ECON:4170 Monetary Economics 3 s.h.
- ECON:4180 Industrial Organization 3 s.h.
- ECON:4190 Mathematical Economics 3 s.h.
- ECON:4200 Game Theory 3 s.h.
- ECON:4700 Topics in Analytical Economics 3 s.h.

And (B.A. and B.S. students):
- One additional economics course numbered from ECON:3250 through ECON:4700, excluding these five courses ECON:3870, ECON:3871, ECON:3872, ECON:3999, and ECON:4050 3 s.h.

**Business Economics Track (B.A. and B.S.)**

Five (B.A. students) or four (B.S. students) of these:
- ECON:3325 Personnel Economics 3 s.h.
- ECON:3335 Money, Banking, and Financial Markets 3 s.h.
- ECON:3345 Global Economics and Business 3 s.h.
- ECON:3350 Industry Analysis 3 s.h.
- ECON:3355 Economic and Business Forecasting 3 s.h.
- ECON:3370 Household Finance 3 s.h.
- ACCT:2200 Managerial Accounting 3 s.h.
- MGMT:2100 Introduction to Management 3 s.h.

**Policy Economics Track (B.A. and B.S.)**

Four (B.A. students) or three (B.S. students) of these:
- ECON:3345 Global Economics and Business 3 s.h.
- ECON:3610 Development of Local and Regional Economies 3 s.h.
- ECON:3620 Economic Growth and Development 3 s.h.
- ECON:3625 Environmental and Natural Resource Economics 3 s.h.
- ECON:3640 Regional and Urban Economics 3 s.h.
- ECON:3650 Policy Analysis 3 s.h.
- ECON:3690 Sports Economics 3 s.h.
- ECON:3750 Transportation Economics 3 s.h.
- ECON:3760 Health Economics 3 s.h.
- ECON:3790 Antitrust Economics 3 s.h.
- ECON:3800 Law and Economics 3 s.h.
- ECON:3875 Topics in Policy Economics 3 s.h.

And (B.A. and B.S. students):
- One additional economics course numbered from ECON:3250 through ECON:4700, excluding these five courses ECON:3870, ECON:3871, ECON:3872, ECON:3999, and ECON:4050 3 s.h.

**Prerequisites (B.A.)**

Students must complete all of a course's prerequisites before they may register for the course.

Prerequisites for ECON:2800 Statistics for Strategy Problems:
- MATH:1380 Calculus and Matrix Algebra for Business, and STAT:1020 Elementary Statistics and Inference or STAT:1030 Statistics for Business

Prerequisites for most upper-level undergraduate courses in economics:
ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics

Prerequisites for ECON:3100 Intermediate Microeconomics and ECON:3140 Advanced Microeconomics:
ECON:1100 Principles of Microeconomics and MATH:1380 Calculus and Matrix Algebra for Business

Prerequisites for ECON:3150 Intermediate Macroeconomics:
ECON:1200 Principles of Macroeconomics and MATH:1380 Calculus and Matrix Algebra for Business

Prerequisite for ECON:3355 Economic and Business Forecasting:
ECON:2800 Statistics for Strategy Problems

Prerequisites for courses numbered ECON:3790 or above:
ECON:3100 Intermediate Microeconomics or ECON:3150 Intermediate Macroeconomics, or both, depending on the course

Prerequisite for ECON:4200 Game Theory:
MATH:1380 Calculus and Matrix Algebra for Business

Prerequisites (B.S.)

Students must complete all of a course's prerequisites before they may register for the course.

Prerequisites for most upper-level undergraduate courses in economics:
ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics

Prerequisites for ECON:3100 Intermediate Microeconomics and ECON:3140 Advanced Microeconomics:
ECON:1100 Principles of Microeconomics and MATH:1850 Calculus I

Prerequisites for ECON:3150 Intermediate Macroeconomics:
ECON:1200 Principles of Macroeconomics and MATH:1850 Calculus I

Prerequisite for ECON:3355 Economic and Business Forecasting:
ECON:2800 Statistics for Strategy Problems

Prerequisites for courses numbered ECON:3790 or above:
ECON:3100 Intermediate Microeconomics or ECON:3150 Intermediate Macroeconomics, or both, depending on the course

Prerequisite for ECON:4200 Game Theory:
MATH:1850 Calculus I

Prerequisite for ECON:4800 Introduction to Econometrics:
STAT:3101 Introduction to Mathematical Statistics II or STAT:3120 Probability and Statistics

Prerequisite for MATH:1860 Calculus II:
MATH:1850 Calculus I

Prerequisite for STAT:3100 Introduction to Mathematical Statistics I:
MATH:1560 Engineering Mathematics II: Multivariable Calculus or MATH:1860 Calculus II

Prerequisite for STAT:3101 Introduction to Mathematical Statistics II:
STAT:3100 Introduction to Mathematical Statistics I

Prerequisite for STAT:3120 Probability and Statistics:
MATH:1560 Engineering Mathematics II: Multivariable Calculus or MATH:1860 Calculus II

Bachelor of Business Administration

The Bachelor of Business Administration with a major in economics requires a minimum of 120 s.h., including 18 s.h. of work for the major. The program emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management. It provides good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

All students must complete the B.B.A. common requirements: the General Education courses, the prerequisites for admission to the college, prerequisites for declaring the business major, the business core, and the experiential learning requirement; see "Common B.B.A. Requirements" in the Bachelor of Business Administration (p. 654) section of the Catalog.

The economics major for the B.B.A. requires a set of courses in mathematics and statistics, which students take as part of the B.B.A. common requirements, and a set of courses in economic theory (6 s.h.). It also requires a set of applied field courses (12 s.h.) in one of three tracks: business economics, policy economics, or analytical economics.

The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector. The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector.

Students may request permission to apply a limited amount of transfer credit or correspondence credit toward the major, but they should take the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics or ECON:3140 Advanced Microeconomics, and ECON:3150 Intermediate Macroeconomics.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major for the B.B.A. requires the following course work.

MATHEMATICS AND STATISTICS COURSES (B.B.A.)

Students take these courses as part of the B.B.A. common requirements.

ECON:2800 Statistics for Strategy Problems 3 s.h.
MATH:1380 Calculus and Matrix Algebra for Business 4 s.h.
STAT:1030 Statistics for Business 4 s.h.

ECONOMIC THEORY COURSES (B.B.A.)

One of these:

ECON:3100 Intermediate Microeconomics 3 s.h.
ECON:3140 Advanced Microeconomics 3 s.h.
Applied Field Courses (B.B.A.)

Students earning a B.B.A. complete a total of four applied field courses (12 s.h.) in their track.

Analytical Economics Track (B.B.A.)

Three of these:

- ECON:4090 Natural Resource Economics 3 s.h.
- ECON:4110 International Economics 3 s.h.
- ECON:4140 Labor Economics 3 s.h.
- ECON:4160 Public Sector Economics 3 s.h.
- ECON:4170 Monetary Economics 3 s.h.
- ECON:4180 Industrial Organization 3 s.h.
- ECON:4190 Mathematical Economics 3 s.h.
- ECON:4200 Game Theory 3 s.h.
- ECON:4700 Topics in Analytical Economics 3 s.h.

And:

One additional economics course numbered from ECON:3250 through ECON:4700, excluding these five courses ECON:3870, ECON:3871, ECON:3872, ECON:3999, and ECON:4050 3 s.h.

Business Economics Track (B.B.A.)

Four of these:

- ECON:3325 Personnel Economics 3 s.h.
- ECON:3335 Money, Banking, and Financial Markets 3 s.h.
- ECON:3345 Global Economics and Business 3 s.h.
- ECON:3350 Industry Analysis 3 s.h.
- ECON:3355 Economic and Business Forecasting 3 s.h.
- ECON:3370 Household Finance 3 s.h.

Policy Economics Track (B.B.A.)

Three of these:

- ECON:3345 Global Economics and Business 3 s.h.
- ECON:3610 Development of Local and Regional Economies 3 s.h.
- ECON:3620 Economic Growth and Development 3 s.h.
- ECON:3625 Environmental and Natural Resource Economics 3 s.h.
- ECON:3640 Regional and Urban Economics 3 s.h.
- ECON:3650 Policy Analysis 3 s.h.
- ECON:3690 Sports Economics 3 s.h.
- ECON:3750 Transportation Economics 3 s.h.
- ECON:3760 Health Economics 3 s.h.
- ECON:3790 Antitrust Economics 3 s.h.
- ECON:3800 Law and Economics 3 s.h.
- ECON:3875 Topics in Policy Economics 3 s.h.

And:

One additional economics course numbered from ECON:3250 through ECON:4700, excluding these five courses ECON:3870, ECON:3871, ECON:3872, ECON:3999, and ECON:4050 3 s.h.

Prerequisites (B.B.A.)

Students must complete all of a course’s prerequisites before they may register for the course.

Prerequisites for most upper-level undergraduate courses in economics:

ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics

Prerequisites for ECON:3100 Intermediate Microeconomics:

ECON:1100 Principles of Microeconomics and MATH:1380 Calculus and Matrix Algebra for Business

Prerequisites for ECON:3150 Intermediate Macroeconomics:

ECON:1200 Principles of Macroeconomics and MATH:1380 Calculus and Matrix Algebra for Business

Prerequisite for ECON:2800 Statistics for Strategy Problems:

STAT:1030 Statistics for Business

Prerequisites for courses numbered ECON:3790 and above:

ECON:3100 Intermediate Microeconomics or ECON:3150 Intermediate Macroeconomics, or both, depending on the course

B.A. or B.S. with Teacher Licensure

Economics majors in the College of Liberal Arts and Sciences (B.A. and B.S. students) who are interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education’s Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Education Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University’s Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Bachelor of Arts, Bachelor of Science

Before the fifth semester begins: ECON:1100 Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, and the math component of quantitative courses required for major

Before the seventh semester begins: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, one economics course numbered 3000 or above, and at least 90 s.h. earned toward the degree
Before the eighth semester begins: three economics courses numbered 3000 or above and the statistics component of the quantitative course requirement

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Bachelor of Business Administration

The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.

Pre-business students must take BUS:3000 Business Communication and Protocol during their first semester after admission to the Tippie College of Business. Students admitted to the Tippie College of Business directly from high school must take BUS:3000 during their second year.

Before the third semester begins: ECON:1100 Principles of Macroeconomics or ECON:1200 Principles of Microeconomics, MATH:1380 Calculus and Matrix Algebra for Business, and STAT:1030 Statistics for Business, or equivalent courses

Before the fifth semester begins: ACCT:2100 Introduction to Financial Accounting, ACCT:2200 Managerial Accounting, and ECON:1100 Principles of Microeconomics or ECON:1200 Principles of Macroeconomics ( whichever has not already been taken), or equivalent courses; and all General Education requirements

Before the seventh semester begins: all business core requirements, approximately half of the course work in the major (varies by major), and at least 90 s.h. earned toward the degree

During the eighth semester: all remaining course work in the major and a sufficient number of semester hours to graduate

Honors in the Major (B.A. and B.S.)

College of Liberal Arts and Sciences students majoring in economics have the opportunity to graduate with honors in the major. Departmental honors students must complete ECON:3100 Intermediate Microeconomics and ECON:3150 Intermediate Macroeconomics before their senior year.

Interested students should consult the department’s honors advisor by the second semester of their junior year.

Honors students in economics typically register for ECON:3999 Honors Seminar in the fall of their senior year. To graduate with honors in the major, they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in ECON:4999 Honors Thesis in Economics. They present the thesis orally to a committee of three faculty members; typically the undergraduate honors advisor, the student’s research supervisor, and a third faculty member agreed upon by the student and the honors advisor.

Departmental honors students must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 and to fulfill other requirements; visit Honors at Iowa to learn about the University’s honors program.

Honors in Business (B.B.A.)

Qualified B.B.A. students have the opportunity to pursue honors study in the Tippie College of Business. For more information, see “Honors in Business” in the Bachelor of Business Administration (p. 654) section of the Catalog and visit the Tippie College of Business Honors Program web site.

Minor

The minor in economics requires a minimum of 15 s.h. in economics courses, including 12 s.h. taken at the University of Iowa in Department of Economics courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor. Course work in the minor may not be taken pass/nonpass.

Courses for Nonmajors

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program (p. 313). The introductory courses ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics are approved for the Social Sciences area of General Education; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses ECON:3100 Intermediate Microeconomics and ECON:3150 Intermediate Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics relates to majors in many other fields. For example, political science majors could elect ECON:3650 Policy Analysis; international studies majors, ECON:3345 Global Economics and Business; environmental planning and policy majors, ECON:3625 Environmental and Natural Resource Economics; pre-law students, ECON:3790 Antitrust Economics and ECON:3800 Law and Economics; mathematics and engineering majors, ECON:3100 Intermediate Microeconomics and ECON:4190 Mathematical Economics; and statistics majors, ECON:4800 Introduction to Econometrics.

Undergraduate Economics Forum

Students are invited to join the undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

Graduate Programs of Study

- Master of Arts in economics
- Doctor of Philosophy in economics

The department partners with the College of Law to offer a joint degree program; see “Joint Ph.D./J.D.” later in this section. It also participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.
Master of Arts
The Master of Arts is offered only to students working toward a Ph.D. in economics.

Doctor of Philosophy
The Doctor of Philosophy program in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation. Requirements are as follows.

CORE SEQUENCE
First semester:
ECON:5000 Economic Analysis I 3 s.h.
ECON:5100 Microeconomics I 3 s.h.
ECON:5200 Macroeconomics I 3 s.h.
Second semester:
ECON:5010 Economic Analysis II 3 s.h.
ECON:5110 Microeconomics II 3 s.h.
ECON:5210 Macroeconomics II 3 s.h.
Third semester:
ECON:5800 Econometrics 3 s.h.
Fourth semester:
ECON:5810 Applied Econometrics 3 s.h.

QUALIFYING EXAMINATION
The qualifying examination is normally taken the summer after the first year.

RESEARCH PAPER
The research paper is normally completed the summer after the second year.

MAJOR FIELD COURSES
Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

DISSERTATION PROPOSAL AND COMPREHENSIVE EXAMINATION
Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

DISSERTATION
Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Admission
Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Application deadline for admission and financial support is January 15 for fall semester entry.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English and who do not hold a baccalaureate or advanced degree from an accredited college or university in the United States must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions.

Joint Ph.D./J.D.
The Department of Economics and the College of Law offer a joint Doctor of Philosophy/Juris Doctor program; for information about the J.D. degree, see "Juris Doctor" in the College of Law (p. 969) section of the Catalog. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

Special Seminar
Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to the University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses

Lower-Level Undergraduate
Students may take ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics in either order or simultaneously. They are approved for the Social Sciences area of the College of Liberal Arts and Sciences General Education Program.

ECON:1100 Principles of Microeconomics 4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

ECON:1200 Principles of Macroeconomics 4 s.h.
National income and output, employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

ECON:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

ECON:2800 Statistics for Strategy Problems 3 s.h.
Continuation of STAT:1030; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: MATH:1380 and STAT:1030.

### Upper-Level Undergraduate and Graduate

**ECON:3100 Intermediate Microeconomics** 3 s.h.
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity, conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: ECON:1100 and MATH:1380.

**ECON:3140 Advanced Microeconomics** 3 s.h.
Mathematical treatment of the economic theory of the behavior of consumers, producers, and other economic agents; the role of markets in coordinating economic activity and the conditions required by those markets for an efficient allocation of resources; market imperfections; and the strategic behavior of economic actors. Prerequisites: ECON:1100 and (MATH:1380 or MATH:1850). Recommendations: MATH:1850.

**ECON:3150 Intermediate Macroeconomics** 3 s.h.
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: ECON:1200 and MATH:1380.

**ECON:3250 American Economic History** 3 s.h.

**ECON:3325 Personnel Economics** 3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3335 Money, Banking, and Financial Markets** 3 s.h.
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3345 Global Economics and Business** 3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3350 Industry Analysis** 3 s.h.
Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3355 Economic and Business Forecasting** 3 s.h.
How to develop and utilize forecasts; emphasis on modern statistical methods and software applied to quantitative forecasting problems; specific applications to business and economics include forecasting sales, market prices, inventory, macroeconomic factors (interest rates, exchange rates, levels of employment). Prerequisites: ECON:1100 and ECON:1200 and ECON:2800.

**ECON:3370 Household Finance** 3 s.h.
Micro- and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3610 Development of Local and Regional Economies** 3 s.h.
Theories, methods, and public policy in regional economic development; business and industrial locations, theories of regional growth and development, tools for regional economic analysis, technology and knowledge economy, globalization and trade, economic development finance and policy. Recommendations: introductory microeconomics. Same as URP:3136.

**ECON:3620 Economic Growth and Development** 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: ECON:1100 and ECON:1200.

**ECON:3625 Environmental and Natural Resource Economics** 3 s.h.
Environmental and resource use problems, efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100 and ECON:1200. Same as URP:3135.

**ECON:3640 Regional and Urban Economics** 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100 and ECON:1200. Same as URP:3134.

**ECON:3650 Policy Analysis** 3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: ECON:1100 and ECON:1200.
ECON:3690 Sports Economics 3 s.h.
Theory and literature of economic issues in professional sports; issues such as relative advantages of large-and small-market teams, city subsidies for baseball and football stadiums, star players' true value to their teams; ideas from introductory economics (such as demand and cost curves) combined with additional economic theory, statistical evidence, and information about particular sports. Prerequisites: ECON:1100 and ECON:1200.

ECON:3750 Transportation Economics 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as GEOG:3940, URP:3350.

ECON:3760 Health Economics 3 s.h.
Structure of America's health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: ECON:1100 and ECON:1200.

ECON:3790 Antitrust Economics 3 s.h.
Topics in federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics literature. Prerequisites: ECON:3100 or LAW:8146.

ECON:3800 Law and Economics 3 s.h.
Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: ECON:1100.

ECON:3870 Federal Reserve Challenge 0 s.h.
Experience doing what Federal Reserve economists do every day: study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: ECON:3100 and ECON:3150.

ECON:3871 Federal Reserve Challenge II 0 s.h.
Participation in Federal Reserve Challenge after completion of ECON:3870. Prerequisites: ECON:3870.

ECON:3872 Individual Study in International Economics 1-3 s.h.
Basic economic theory used as foundation to examine international trade, macroeconomic policy, and financial market issues; focus on multinational firms that trade and/or produce across national borders and viewed within context of recent events.

ECON:3875 Topics in Policy Economics arr.
Topics vary. Prerequisites: ECON:1100 and ECON:1200.

ECON:3999 Honors Seminar 1-3 s.h.

ECON:4050 Readings and Independent Study in Economics arr.

ECON:4090 Natural Resource Economics 3 s.h.
Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: ECON:3100.

ECON:4110 International Economics 3 s.h.
Neoclassical model of international trade, imperfect competition and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Requirements: ECON:3100 and ECON:3150, or graduate standing.

ECON:4140 Labor Economics 3 s.h.
Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: ECON:3100.

ECON:4160 Public Sector Economics 3 s.h.
Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisites: ECON:3100 and ECON:3150.

ECON:4170 Monetary Economics 3 s.h.
Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: ECON:3100 and ECON:3150.

ECON:4180 Industrial Organization 3 s.h.
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: ECON:3100.

ECON:4190 Mathematical Economics 3 s.h.
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice theory. Prerequisites: ECON:3100 and ECON:3150 and MATH:1380.

ECON:4200 Game Theory 3 s.h.
Basic concepts of game theory including dominance, backward induction, Nash equilibrium, evolutionary stability, commitment, credibility, asymmetric information, adverse selection, signaling; provides students with a working understanding of game theory; examples drawn from economics and politics. Prerequisites: ECON:3100 and ECON:3150 and MATH:1380.

ECON:4700 Topics in Analytical Economics arr.
Topics vary. Prerequisites: ECON:3100 and ECON:3150.

ECON:4800 Introduction to Econometrics 3 s.h.
Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisites: STAT:3120.
ECON:4900 Academic Internship  arr.
Participation in approved internship program (e.g.,
Washington Center Internships).

ECON:4999 Honors Thesis in Economics  3 s.h.
Independent student project directed by faculty or staff
advisor; culminates in thesis that conforms to University
Honors Program guidelines; may include empirical
research, library research, applied projects. Prerequisites:
ECON:3999 or BUS:3999. Requirements: admission to the
Tippie College of Business honors program.

Graduate
Qualified undergraduates may enroll in graduate-level
courses with consent of the department chair.

ECON:5000 Economic Analysis I  3 s.h.
Basic metric topology, convex analysis, function spaces,
measure theory and integration.

ECON:5010 Economic Analysis II  3 s.h.
Behavior under uncertainty, macroeconomic models;
dynamic programming, asset pricing, saving,
consumption.

ECON:5100 Microeconomics I  3 s.h.
Consumer choice theory, producer theory, choice under
uncertainty, basic game theory. Offered fall semesters.

ECON:5110 Microeconomics II  3 s.h.
General equilibrium and welfare analysis, adverse
selection, the principal-agent problem, social choice,
mechanism design. Offered spring semesters. Prerequisites: ECON:5100.

ECON:5200 Macroeconomics I  3 s.h.
Economic growth, business cycles, money and inflation.
Offered fall semesters.

ECON:5210 Macroeconomics II  3 s.h.
Dynamic macroeconomic models; stochastic
macroeconomics; time consistency equilibrium business
cycle theory. Offered spring semesters. Prerequisites:
ECON:5200.

ECON:5800 Econometrics  3 s.h.
Statistical inference in single and multiple equation
stochastic models, models with nonindependent or
nonidentically distributed error structure, dynamic
models; OLS, GLS, IV, ML estimation; asymptotic
distribution theory; exact, asymptotic hypothesis tests.
Prerequisites: STAT:4101.

ECON:5810 Applied Econometrics  3 s.h.
Empirical problems; multiple linear regression, nonlinear
regression, maximum likelihood, hazard functions,
univariate and multivariate time series, flexible functional
forms. Prerequisites: ECON:5800.

ECON:6310 Industrial Organization  3 s.h.
The firm, monopolistic competition, oligopoly and
workable competition; industrial organization, nature of
equilibrium under uncertainty. Prerequisites: ECON:5110.

ECON:6420 Macroeconomics III  3 s.h.
Current research in macroeconomics; development
of research topics with emphasis on theoretical and
empirical analysis. Prerequisites: ECON:5110 and
ECON:5800.

ECON:6500 International Trade Theory  3 s.h.
The theory of international trade, including basic models
of international trade; capital and labor mobility and
trade; protection of international trade; the political
economy of international trade; empirical applications of
international trade.

ECON:6900 Contemporary Topics in
Economics  3 s.h.
Topics not offered in other courses.

ECON:7000 Seminar in Economic Theory  arr.

ECON:7010 Seminar in Economic Theory II  arr.

ECON:7870 Workshop in Microeconomics  1 s.h.

ECON:7880 Workshop in Macro and
Monetary Economics  1 s.h.

ECON:7950 Readings in Economics  arr.

Entrepreneurial Management

Executive director
• David K. Hensley

Director
• Lynn Allendorf

Undergraduate certificate: entrepreneurial management
Faculty: http://www.iowajpec.org/about/faculty-and-staff/
Web site: http://www.iowajpec.org/

The Tippie College of Business and the John Pappajohn Entrepreneurial Center (JPEC) offer the Certificate in Entrepreneurial Management. They also work with other units on campus to offer entrepreneurship programs. The college collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship (p. 914). The center partners with the Department of Management and Organizations (p. 682) to offer the entrepreneurial management track for Bachelor of Business Administration students majoring in management, and it collaborates with the College of Liberal Arts and Sciences to offer the Certificate in Performing Arts Entrepreneurship (p. 498) and the B.A. degree in Enterprise Leadership (p. 273).

The John Pappajohn Entrepreneurial Center also offers a wide variety of professional experiences designed to foster the development of entrepreneurs and future organizational leaders.

Undergraduate entrepreneurship programs at the University of Iowa combine academic course work and experiential learning with a focus on teaching entrepreneurial leadership, innovation and creativity, opportunity recognition and assessment, and strategic business planning. Several of the programs are open to all University of Iowa undergraduates. To learn more, visit the John Pappajohn Entrepreneurial Center web site.

Undergraduate Program of Study

Certificate

The Certificate in Entrepreneurial Management requires a minimum of 18 s.h. of credit. The certificate program is open to all current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate program is designed to help students acquire the entrepreneurial mindset that will enable them to launch new ventures or manage growing companies. It focuses on qualities and skills essential for entrepreneurs and successful business leaders.

Entrepreneurial management students learn from a select team of faculty members and business executives distinguished by their ability to teach, model, and inspire the entrepreneurial process. They learn skills for:
• recognizing and evaluating business opportunities;
• preparing strategic business and operating plans;
• preparing financial forecasts and budgets and evaluating financial performance;
• leading, motivating, and managing teams and individuals;
• communicating and negotiating in business situations; and
• enhancing professional and interpersonal skills.

Undergraduate students must declare their intention to pursue the certificate. Business students should contact the Tippie College of Business Undergraduate Program Office. Liberal arts and sciences students should contact the Academic Programs & Student Development office.

Students earning the certificate in conjunction with the Bachelor of Applied Studies (p. 1192) (University College) or the Bachelor of Liberal Studies (p. 1195) (University College) may complete the certificate's course work by distance education.

Students may begin working toward the Certificate in Entrepreneurial Management during their sophomore year. They may count a maximum of 6 s.h. of transfer credit toward the certificate, with approval from the entrepreneurship program director. Credit earned in entrepreneurship courses (prefix ENTR) is counted as semester hours earned in business.

The Certificate in Entrepreneurial Management requires the following course work. Many certificate courses have prerequisites and other requirements for registration; students must complete a course's prerequisites and meet its registration requirements before they may register for the course.

Facilities and Resources
Entrepreneurial Management Institute
The Entrepreneurial Management Institute works with top entrepreneurial management track students in the entrepreneurial management (B.B.A.) and enterprise leadership (B.A.) majors, and with entrepreneurial management certificate students to help them develop career advancement skills. Experienced business professionals and entrepreneurial leaders provide strategic career development training. Activities include seminars on developing professional résumés, creating extensive personal networks, networking with successful Iowa CEOs and business leaders, and making connections for internships and job placement.

Bedell Entrepreneurship Learning Laboratory
The Bedell Entrepreneurship Learning Laboratory is an applied learning environment for advanced entrepreneurship students creating a new business. The laboratory provides dedicated office space for individual students and teams, enabling them to concentrate on developing their business concepts. Students at the laboratory receive intensive mentoring and other assistance from faculty and staff associated with the John Pappajohn Entrepreneurial Center (JPEC) and the Small Business Development Center. Contact JPEC for information about applying to the laboratory.

Courses
Lower-Level Undergraduate

ENTR:1010 Exploring Entrepreneurship 3 s.h.
Introduction to entrepreneurship, including identifying characteristics of the entrepreneur, evaluating opportunities, engaging in customer discovery, design thinking, feasibility, financing, and planning for success.

ENTR:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

ENTR:1350 Foundations in Entrepreneurship 2 s.h.
Basic core business concepts faced by entrepreneurial managers in small business accounting, marketing, and business planning. Recommendations: non-business major interested in studying entrepreneurship.

ENTR:2000 Entrepreneurship and Innovation 3 s.h.

Upper-Level Undergraduate and Graduate

ENTR:3000 Practicum in Entrepreneurship 1-3 s.h.
Applied, experiential practicum designed to foster development of entrepreneurial leadership skills; opportunity recognition and assessment, strategic business planning, innovation and creativity, team leadership, professional communication skills, strategy development and execution.

ENTR:3100 Entrepreneurial Finance 3 s.h.
Understanding financial aspects of new and growing ventures; focus on preparing financial projections, analyzing financial performance, managing cash flow, and determining financial feasibility; detailed overview of various sources of capital available for start-up and growing ventures. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:3200 Entrepreneurial Marketing 3 s.h.
Practical marketing concepts for evaluating the market potential for new products, services, or business opportunities; how to obtain and evaluate market data, determine customer demand, analyze the competition, design effective promotions, develop and implement effective sales strategies, and write a successful marketing plan. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:3300 Legal Aspects of Entrepreneurship 3 s.h.
Areas of law significant to new and emerging businesses; business formation and structure, intellectual property, business agreements, legal processes. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:3400 Strategic Management of Technology and Innovation 3 s.h.
New technology innovation and commercialization; technology innovation process, identification of commercialization strategies, feasibility analysis, intellectual property issues. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.
ENTR:3500 Social Entrepreneurship 3 s.h.
Introduction to the growing field of social entrepreneurship; creation of ventures with dual missions of social benefit and return on investment; issues related to evaluating market opportunities; acquiring and managing scarce resources; sustainability; maximizing social and economic value. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:3520 New Ventures in the Arts 3 s.h.

ENTR:3595 Nonprofit Organizational Effectiveness I 3 s.h.

ENTR:3600 E-Commerce Strategies for Entrepreneurs 3 s.h.
E-commerce opportunities and Internet business strategies for entrepreneurial ventures; how to develop effective web business strategies, latest technologies and trends in E-commerce, methods for maximizing traffic, impact of a company's web site. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:3600 Seminar in Entrepreneurship 2-3 s.h.
Real estate and property issues facing the entrepreneurial venture; real estate development, legal and contractual issues, purchasing versus leasing, and basics of real estate financing and investing. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:4050 Directed Readings in Entrepreneurship arr.
Independent study; topics and assignments approved by instructor.

ENTR:4200 Entrepreneurship: Business Consulting 3 s.h.
Students provide strategic business consulting services to start-up and early-stage companies; exploration of consulting process (proposal development, data collection and analysis, team dynamics, communications with clients, developing recommendations, final report preparation and presentation); projects involving market research and analysis, financial analysis and projections, and strategic business and operations planning. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

Creation and launch of a new venture; completion of a detailed business plan, creating an elevator pitch, and formal presentation of plan. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:4400 Managing the Growth Business 3 s.h.
Preparation to effectively manage employees, customers, and suppliers; leadership for a growing entrepreneurial venture; opportunities to evaluate, practice, and refine critical professional management skills. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100. Requirements: 75 s.h. earned.

ENTR:4450 Professional Sports Management 3 s.h.
Detailed study of professional sports management and marketing; building and managing a front office, marketing sports properties, revenue generation models, developing media relationships, and capitalizing on new opportunities in the sports industry. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:4460 Entrepreneurship and Global Trade 3 s.h.
Complex issues of business operations in a global economy; trade transactions related to importing and exporting, logistics, and ethical issues in international trade; global business management, global marketing, global supply chain management, and trade finance; preparation for work in global marketplace and for the Certified Global Business Professional certification exam offered by the North American Small Business International Trade Educators. Prerequisites: ENTR:2000 or ENTR:3520 or MGMT:3100.

ENTR:4510 Arts Leadership Seminar 3 s.h.
Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or THTR:3520 or ENTR:2000. Same as THTR:4510, INTD:4510, DPA:4510.

ENTR:4600 Advanced Venture Finance 3 s.h.
Examination of financing sources available to emerging and high potential ventures; special emphasis on angel investing and venture capital; preparation of pro forma financial statements, financial analysis, and determining valuations; how market, technology, and financial considerations impact capital formation; evaluation of real venture deals through experiential learning projects. Prerequisites: (ENTR:2000 or ENTR:3520 or MGMT:3100) and (ENTR:3100 or FIN:3000) and (ENTR:3200 or MKTG:3000).

ENTR:4900 Academic Internship arr.
Professional internship experience with academic credit (e.g., paper, course work).

Graduate

ENTR:6001 Introduction to Entrepreneurial Management 1 s.h.
The entrepreneurial process as it applies to new ventures and existing organizations; entrepreneurship and corporate entrepreneurship, attributes of successful entrepreneurial leaders, innovation and creativity, feasibility analysis.

ENTR:6002 Evaluating Entrepreneurial Opportunities 1 s.h.
Strategies to identify, assess, and capitalize on sustainable commercial opportunities; opportunity recognition, environmental analysis, intellectual property, strategic business planning.

**ENTR:6003 Basics of Entrepreneurial Marketing** 1 s.h.
Core marketing concepts facing entrepreneurial organizations; types of markets, product management, distribution, pricing, market research and analysis, market planning.

**ENTR:6004 Basics of Entrepreneurial Finance** 1 s.h.
Core financial concepts facing entrepreneurial organizations; accounting systems, financial statements, financial statement analysis, financial projections, sources of financing.

**ENTR:9000 Developing Professional Service Business** 2-3 s.h.
Use of professional skills and functional knowledge in creating a specialized service business. Same as CEE:5210.

**ENTR:9100 Entrepreneurship and Innovation** 3 s.h.
The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, opportunity recognition, venture screening, identification of resources, feasibility analysis.

**ENTR:9400 Evaluating Innovation Opportunities** 3 s.h.
Integrated, cross-functional perspective of how organizations identify and evaluate opportunities and develop strategies to compete in a global marketplace; innovation and creativity, opportunity recognition, venture screening, identification of resources, and strategic business planning.

**ENTR:9500 Managing the Growth Business** 3 s.h.
Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth of a business; case studies, particularly in technology sector.

**ENTR:9550 Commercializing New Technology** 3 s.h.
Hands-on experience with the process of technology commercialization; real-world opportunity in the form of a technology developed in an academic environment or in the private sector and creation of a plan to transfer that technology to the marketplace; identifying a specific application of that technology (the product); identifying and sizing relevant market segments; determining the appropriate business and financial model; designing a business plan; presentation of business plans/opportunities to simulated venture capitalists.

**ENTR:9600 Seminar in Entrepreneurship** 1-3 s.h.
Topics vary; franchising, business acquisition, real estate development, e-commerce, technology transfer.

**ENTR:9700 Entrepreneurship: Business Consulting** 3 s.h.
Experience on teams providing consulting services to start-up and early-stage companies; the consulting process—proposal development, data collection and analysis, final report preparation and presentation; projects—marketing studies, financial projections, strategic planning.

**ENTR:9800 Entrepreneurship: Advanced Business Planning** 1-3 s.h.
Mentoring for individuals in final stages of preparing to launch their own business.
Finance

Chair
• Erik Lie

Undergraduate major: finance (B.B.A.)
Graduate degree: finance subprogram for the Ph.D. in business administration
Faculty: http://tippie.uiowa.edu/finance/faculty.cfm
Web site: http://tippie.uiowa.edu/finance/

The Department of Finance is committed to delivering undergraduate and graduate programs of study that integrate the technology and analytics of today's global financial community. The department's goal is to provide students with the technical skills they will need to enhance their managerial effectiveness, whether they work in large corporations, small organizations, or private consulting.

The department also partners with the Emmett J. Vaughan Institute of Risk Management and Insurance to offer the undergraduate Certificate in Risk Management and Insurance (p. 702).

Undergraduate Program of Study
• Major in finance (Bachelor of Business Administration)

Bachelor of Business Administration

The Bachelor of Business Administration with a major in finance requires a minimum of 120 s.h., including 20 s.h. of work for the major. The program provides a balance of theory, applications, and financial information technology that facilitates students' transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial market information technologies, students develop analytical abilities to interpret financial market data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

The program stresses learning by doing, partnership with industry, and internships, with the goal of enhancing students' career development. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, and venture capital.

The major in finance requires the following course work.
For B.B.A. common requirements, see Bachelor of Business Administration (p. 654) in the Catalog.

Required courses—all of these:
FIN:3100 Financial Information Technology 2 s.h.
FIN:3200 Investment Management 3 s.h.
FIN:3300 Corporate Finance 3 s.h.
ACCT:3020 Financial Accounting and Reporting 3 s.h.

Electives—a total of three courses chosen from the following two lists:
FIN:3400 Principles of Risk Management and Insurance 3 s.h.
FIN:4020 Topics in Finance 3 s.h.
FIN:4210 Futures and Options 3 s.h.
FIN:4220 Fixed Income Securities 3 s.h.
FIN:4230 Real Estate Process 3 s.h.
FIN:4240 International Finance 3 s.h.
FIN:4250 Applied Equity Valuation 3 s.h.
FIN:4310 Advanced Corporate Finance 3 s.h.
FIN:4320 Commercial Banking 3 s.h.
FIN:4330 Investment Banking 3 s.h.
FIN:4340 Wealth Management 3 s.h.
FIN:4450 Risk Modeling 3 s.h.

Students may include a maximum of one of these in their three electives:
FIN:4410 Corporate and Financial Risk Management 3 s.h.
FIN:4420 Property and Liability Insurance 3 s.h.
FIN:4430 Life and Health Insurance 3 s.h.
FIN:4440 Employee Benefit Plans 3 s.h.

Certificate in Risk Management and Insurance

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the undergraduate certificate program in risk management and insurance; see Risk Management and Insurance (p. 702) in the Catalog.

Graduate Program of Study
• Finance subprogram for the Doctor of Philosophy in business administration

In addition to offering a finance program for the Ph.D. in business administration, the department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

Doctor of Philosophy

Graduate students in finance may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy (p. 663) in the Catalog and visit the Department of Finance web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Courses

Lower-Level Undergraduate

FIN:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
Upper-Level Undergraduate and Graduate

FIN:3000 Introductory Financial Management 3 s.h.
Financial management goals and decision making; valuation of bonds and stocks, risk and return analysis, portfolio diversification, market efficiency, asset pricing, cost of capital, agency theory, capital budgeting, financial planning. Prerequisites: ACCT:2100 and ECON:1100 and ECON:1200. Requirements: 60 s.h. completed.

FIN:3100 Financial Information Technology 2 s.h.
Applications of commonly used financial software and data systems reviewed by student teams. Corequisites: FIN:3000.

FIN:3200 Investment Management 3 s.h.

FIN:3300 Corporate Finance 3 s.h.
Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:3400 Principles of Risk Management and Insurance 3 s.h.
Introduction to risk and insurance; risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk; insurance as a risk management tool. Corequisites: FIN:3000.

FIN:3500 Hawkinson Scholar Seminar 1 s.h.
Advanced skill and understanding required for pursuit of investment banking, management consulting careers; specialized résumé and interview training, industry presentations, relevant case assignments.

FIN:3510 Hawkinson Scholar Seminar: Topics in Finance 0 s.h.
Subsectors in the financial services industry, including hedge funds, investment banking, commercial banking; valuation techniques used in real-world mergers, acquisitions, equity offerings, debt financing, and so forth.

FIN:4020 Topics in Finance 3 s.h.
Contemporary issues in finance. Prerequisites: FIN:3000.

FIN:4050 Directed Readings in Finance arr.
Individually guided readings in selected topics.

FIN:4210 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial management; understanding types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisites: FIN:3200.

FIN:4220 Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:4230 Real Estate Process 3 s.h.

FIN:4240 International Finance 3 s.h.
International monetary systems, exchange rate determination, use of currency derivative in hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:4250 Applied Equity Valuation 3 s.h.
Equity valuation and portfolio management techniques by investment professionals; economic forecasting, industry analysis, financial statement analysis, spreadsheet modeling, cost of capital estimation, equity valuation and portfolio construction; students manage the University of Iowa's Krause Fund (an endowed equity portfolio that blends academic rigor with real-world portfolio management experience). Prerequisites: FIN:3000. Requirements: UI cumulative g.p.a. of at least 2.80.

FIN:4310 Advanced Corporate Finance 3 s.h.
Issues relevant to financial management, payout policy, financial distress and bankruptcy, restructuring, market for corporate control; recent research and cases from the corporate arena; other topics (e.g., bankruptcy) to broaden application and understanding of finance theory. Prerequisites: FIN:3300.

FIN:4320 Commercial Banking 3 s.h.
Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisites: FIN:3000. Corequisites: FIN:3100.
FIN:4330 Investment Banking 3 s.h.
How investment banks fill critical roles in maintaining well-functioning financial markets and provide access to capital and strategic advice to companies and governments; recent global financial crisis; how banker’s role as intermediary between companies and markets adds value and creates conflicts and risk. Prerequisites: FIN:3000 and FIN:3300.

FIN:4340 Wealth Management 3 s.h.
Financial services for client wealth management; how to make personal investment decisions and build diversified, comprehensive investment portfolios; investment theory; common behavioral biases that lead to investment pitfalls, mistakes; wealth management objectives, portfolio risk and reward, asset allocation, portfolio diversification, tax shield structures, retirement plans, wealth protection, risk management, behavioral finance, psychology of investing. Prerequisites: FIN:3000.

FIN:4410 Corporate and Financial Risk Management 3 s.h.
Analysis and treatment of pure and financial risks faced by business organizations; development and implementation of the risk management process, application of varied risk management techniques to identified exposures; how businesses manage risk and how insurance is used to manage the cost of risk; case studies. Prerequisites: FIN:3400. Corequisites: FIN:3100.

FIN:4420 Property and Liability Insurance 3 s.h.
Fundamentals of commercial property and liability insurance; commercial property and liability contracts, functions of property and liability insurers; regulation and financial analysis of property and liability insurers; marketing, underwriting, rate making, claim settlements. Prerequisites: FIN:3400.

FIN:4430 Life and Health Insurance 3 s.h.
Types of life insurance and annuity contracts and their uses; regulation of life and health insurers; development of financial plans using life insurance products; Social Security, group, and individual health insurance products, including major medical, disability income, long-term care policies; marketplace analysis; contractual provisions; determination of human life values, mathematics of life contingencies and pricing. Prerequisites: FIN:3400.

FIN:4440 Employee Benefit Plans 3 s.h.
Management of employee benefit plans (e.g., group life and health insurance, retirement programs); design, administration, and financing of employee benefits; federal administration of employee benefit plans; funding requirements, financial alternatives; funding and vesting of retirement annuities; design and management of health care plans, including “cafeteria” approach and nonqualified deferred compensation arrangements; economic effects and financing employee benefits and retirement plans in private and public sectors. Prerequisites: FIN:3400.

FIN:4450 Risk Modeling 3 s.h.
Theory used to solve real-life problems taken from a diverse set of risk management applications; varied areas where risk analysis has become important (i.e., finance, insurance, corporate risk management, personal financial planning); principles of probability theory, mathematical finance, and actuarial science developed for use in quantitative analysis of important risk management problems; spreadsheet-based course. Prerequisites: FIN:3000.

FIN:4900 Academic Internship 1-3 s.h.
Professional internship experience with associated academic content.

FIN:4999 Honors Thesis in Finance 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Graduate

FIN:7110 Finance Theory I 3 s.h.
Consumption-based models of asset pricing; arbitrage, contingent claims; market efficiency and information economics, behavioral models; emphasis on theory. Requirements: Ph.D. enrollment.

FIN:7120 Seminar in Corporate Finance 3 s.h.
Valuation (DCF and CAPM); valuation under certainty, uncertainty; financial structure, cost of capital; dividend policy; firm investment in perfect, imperfect capital markets. Requirements: Ph.D. enrollment.

FIN:7130 Finance Theory II 3 s.h.
Continuous time theories of financial markets, including connection between an arbitrage-free pricing system and martingales; pricing of contingent claims, general equilibrium and term structure theory. Requirements: Ph.D. enrollment.

FIN:7140 Advanced Empirical Finance 3 s.h.
Market efficiency and term structure theory tests; tests of asset pricing models, dividend policy and financial structure issues. Requirements: Ph.D. enrollment.

FIN:7850 Seminar in Finance 1 s.h.
Requirements: Ph.D. enrollment.

FIN:7950 Directed Reading in Finance-Ph.D. ar
Requirements: Ph.D. enrollment.

FIN:7975 Thesis in Business ar

FIN:9000 Directed Readings in Finance-M.B.A. ar

FIN:9010 Contemporary Topics in Finance ar

FIN:9150 Financial Modeling and Firm Valuation 3 s.h.
How to model firm value from a discounted cash flow perspective; identify a company’s key value drivers, create spreadsheet valuation models; projected financial valuation integrates projected pro forma accounting statements; forecasting, free cash flow estimation, industry competitive analysis. Prerequisites: MBA:8180.

**FIN:9200 Portfolio Management** 3 s.h.
Introduction to fundamental elements of modern portfolio theory, application to investment analysis; investment environment, instruments, types of investors; concepts of risk and return, broad perspective on historical risk and return of various asset classes; asset allocation decision, risk and return dynamics of a multiple securities portfolio; varied asset pricing models, how capital markets work for investors and users of capital. Prerequisites: MBA:8180.

**FIN:9210 Derivatives** 2-3 s.h.
Examination of the wide range of derivative securities that cover the financial landscape; the market place, trading, and investors; different derivative securities in existence, their relationship with the underlying securities, and pricing; applications of derivative securities to risk management and speculation; application of principles to fixed income, international finance, real estate, and securitization. Prerequisites: MBA:8180.

**FIN:9220 Fixed Income Securities** 3 s.h.
Conceptual framework and tools to undertake the valuation of fixed income securities and the management of fixed income portfolios; varied fixed income instruments and the markets in which they trade; introduction to basic building blocks of fixed income analysis, including concepts of duration, convexity, and term structure of interest rates; application of concepts in bond portfolio immunization strategies; use of interest rate derivatives in portfolio hedging applications. Prerequisites: MBA:8180.

**FIN:9230 Real Estate Finance and Investments** 2-3 s.h.
In-depth understanding of concepts and techniques of real estate financial analysis, equity investment decision making; real estate investing from analysis of developments through the securitization of mortgages; mortgage markets and pricing, real estate finance and investments, mortgage-backed securities, development process, real estate valuation, tax effects, securitized real estate, real estate cycles, application of derivative instruments, strategic asset allocation. Prerequisites: MBA:8180.

**FIN:9240 International Finance** 3 s.h.
Introduction to structure and functioning of global financial markets; currency market, international equity markets; use of derivatives in currency risk management for corporate and investment needs; corporate investment decisions in an international context. Prerequisites: MBA:8180.

**FIN:9250 Applied Securities Analysis - Henry Fund I** 3 s.h.
Manage Henry Fund portfolio, learn legal environment in which the fund operates, analyze potential investments, implement controls to monitor the fund’s performance; decisions and investment recommendations made by students; each student analyzes an economic sector and geographic region (i.e., utilities analyst and specialist in South East Asia); while the fund cannot currently invest directly in foreign listed stocks, it holds U.S. listed stocks with significant overseas interests and students are able to invest in a number of ADRs. Prerequisites: MBA:8180.

**FIN:9260 Applied Securities Analysis - Henry Fund II** 3 s.h.
Continuation of FIN:9250. Prerequisites: FIN:9250 and MBA:8180.

**FIN:9270 Security Analysis** 3 s.h.
Valuation of financial securities (primarily equities) using discounted cash flow model; industry, regulatory analysis; financial statement analysis; active portfolio management; value-based management techniques; valuation of firms outside the United States. Prerequisites: MBA:8180.

**FIN:9280 Structured Finance-Securitization** 3 s.h.
Design of debt, equity, and hybrid financing techniques to resolve issuer and investor problems that conventional methods cannot address; why and when corporations and financial institutions issue structured securities; how securities are designed and priced; how securities meet investors’ needs; securitized assets, mortgages, asset-backed securities, collateralized debt obligations, credit risk, valuation, cost of capital; legal, tax, and regulatory issues; design and implementation of structured-financed products. Prerequisites: MBA:8180.

**FIN:9290 Alternative Investments and Portfolio Strategies** 3 s.h.
Continuation of FIN:9200; alternative investments, including hedge funds, private equity funds, and venture capital vehicles; purpose of alternative investments, including the risk/return profile of alternatives and correlations with traditional asset classes; specific hedge fund styles, strategies, risk profiles; portfolio strategy topics, including diversification benefits, management of downside risk, international diversification, behavioral finance, performance measures, and performance attribution analysis. Prerequisites: FIN:9200 and MBA:8180.

**FIN:9300 Corporate Investment and Financing Decisions** 3 s.h.
Underpinnings and optimization of corporations’ investment and financing decisions; firm-wide and project-specific cost of capital, optimal capital structure decisions; in-depth capital budgeting methods, including real options techniques; corporate investment module of the class includes simulation analysis using Crystal Ball; cost of capital, valuation techniques, advanced capital budgeting, capital structure and dividend policy, option pricing models applied to corporate finance. Prerequisites: MBA:8180.
FIN:9310 Corporate Financial Strategy 2-3 s.h.
Major strategic decisions within the corporate form; risk management, including why firms engage in it, their methods for doing so, and exercises in the simulation of uncertainty; dividends and repurchases under the payout policy decision; corporate governance topics, including executive compensation, board structure, and institutional monitoring; merger and acquisitions analysis, including regulation, valuation, anti-takeover devices, payment method, and LBOs; divestitures and other restructuring topics, including corporate diversification, spin-offs, carve-outs, private workouts, and Chapter 11. Prerequisites: MBA:8180.

FIN:9350 Wealth Management 3 s.h.
Rapid growth of the field of wealth management over several decades, driven by general increase in personal wealth and increased responsibility for individuals to manage their own wealth; knowledge and tools to enter the financial services industry; financial planning industry, client characteristics, tax shield structures, insurance, asset allocation plans, estate planning, behavioral finance. Prerequisites: MBA:8180.

FIN:9390 Putting Finance into Practice 3 s.h.
Hands-on practical experience in corporate finance or investments; work in teams on a corporate finance project or an investment project for a corporate or institutional client; partner companies identify financial issues, challenges, and opportunities for students to help solve; students work with the companies and a faculty member to provide an analysis of the situation and proposals of actions to be taken. Prerequisites: MBA:8180.
Management and Organizations

Chair
- Amy L. Kristof-Brown

Undergraduate major: management (B.B.A.)
Graduate degree: management and organizations subprogram for the Ph.D. in business administration
Faculty: http://tippie.uiowa.edu/management-organizations/faculty.cfm
Web site: http://tippie.uiowa.edu/management-organizations/

The Department of Management and Organizations offers study of human resource management; individual, team, and organizational behavior; employment law and ethics; leadership and personal development; negotiations; training and development; and organizational design.

Undergraduate Program of Study
- Major in management (Bachelor of Business Administration)

The major in management has three tracks—the entrepreneurial management track offered by distance education as well as on campus, the human resource management track, and the leadership and management track. See "Bachelor of Business Administration" and "B.B.A. by Distance Education" below.

Bachelor of Business Administration

The Bachelor of Business Administration with a major in management requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program is designed to give students a thorough background in the department's study areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

All B.B.A. students majoring in management choose one of three tracks: entrepreneurial management, human resource management, or leadership and management. The entrepreneurial management track is intended for students who plan to start their own business or work in a small business. The human resource management track covers business and employment law and prepares students to pursue careers in human resources or to earn a degree in law. The leadership and management track focuses on practical skills; it is best suited for students considering consulting or management careers. Each track provides a solid background in general management principles in addition to a specialized focus.

The major in management requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration (p. 654) in the Catalog.

COMMON REQUIRED COURSES
Students in all tracks must complete the following three courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MGMT:3200</td>
<td>Individuals, Teams, and Organizations</td>
<td>3 s.h.</td>

B.B.A. by Distance Education

Students may earn the B.B.A. with a major in management, entrepreneurial management track, by distance education. The degree requires a minimum of 120 s.h. of credit. To be admitted to the program, individuals must have earned a minimum of 60 s.h. of college-level credit with a g.p.a. of at least 2.75, and they must have completed four prerequisite courses (business calculus, statistics, microeconomics, and financial accounting) with a g.p.a. of at least 2.75. Contact the Department of Management and Organizations and the Division of Continuing Education to learn more.

Graduate Program of Study

- Management and organizations subprogram for the Doctor of Philosophy in business administration

In addition to offering a management and organizations program for the Ph.D. in business administration, the department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

Doctor of Philosophy

Graduate students in management and organizations may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy (p. 663) in the Catalog and visit the Department of Management and Organizations web site.

Applicants must meet the admission requirements of the Graduate college; see the Manual of Rules and Regulations of the Graduate College.

Courses

Lower-Level Undergraduate

MGMT:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MGMT:2000 Introduction to Law 3 s.h.
General history, structure of law; law's action in guiding changing economic, social patterns. Requirements: sophomore standing.

MGMT:2100 Introduction to Management 3 s.h.
Principles of management, organizational structure, decision making, leadership, line-staff relationships, administration of organizations. Requirements: sophomore standing.

Upper-Level Undergraduate and Graduate

MGMT:3100 Entrepreneurial Strategy 3 s.h.
The synergistic effect of entrepreneurial attributes (e.g., innovation, creativity, opportunity recognition) and managerial attributes (e.g., strategic management, planning, budgeting) on profit and nonprofit organizations.

MGMT:3200 Individuals, Teams, and Organizations 3 s.h.
Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3300 Strategic Human Resource Management 3 s.h.
People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3400 Employment Law 3 s.h.
Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3450 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Requirements: junior or higher standing.

MGMT:3500 Nonprofit Organizational Effectiveness I 3 s.h.

MGMT:3600 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as NURS:3500, SSW:3600, RELS:3701.

MGMT:3900 Training and Developing Human Resources 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisites: MGMT:3200 and MGMT:3300 and MGMT:3400.

MGMT:4000 Topics in Management 1-3 s.h.
Topics not regularly offered in other courses. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:4050 Directed Readings in Management and Organizations arr.

MGMT:4100 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: 90 s.h. completed.
MGMT:4200 Staffing and Talent Management 3 s.h.
Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning; staffing activities such as internal and external recruiting, selection. Prerequisites: MGMT:3200 and MGMT:3300 and MGMT:3400.

MGMT:4300 Leadership and Personal Development 3 s.h.
Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisites: MGMT:3200 and MGMT:3300. Requirements: senior standing.

MGMT:4325 Team and Project Management 3 s.h.
Fundamentals of managing teams and group projects; emphasis on practical application, using case studies, and interactive and experiential exercises. Prerequisites: MGMT:3200 and MGMT:3300 and MGMT:3400.

MGMT:4350 Performance Management and Strategic Rewards 3 s.h.
Role of pay and other rewards on organizational objectives; compensation's impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward. Prerequisites: MGMT:3200 and MGMT:3300 and MGMT:3400.

MGMT:4900 Academic Internship 3 s.h.
Professional internship experience with associated academic content.

MGMT:4999 Honors Thesis in Management and Organizations 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Graduate

MGMT:7120 Methods for Field Research (Ph.D.) 2 s.h.
Field methods commonly used in behavioral research with emphasis on surveys; different types of field research designs; evaluation of advantages and disadvantages of different research approaches; practice generating research questions and hypotheses appropriate for field survey designs; issues related to levels of analysis; develop and administer surveys to maximize response rates; identify appropriate samples; brief introduction to statistical approaches for analyzing survey data.

MGMT:7124 Methods for Qualitative Research 2 s.h.
Qualitative methods available to researchers; role and contributions of qualitative methods in research; reasons why qualitative research papers get rejected by journals and strategies to avoiding them; work with qualitative data; philosophy of science, formulating research questions, sampling and gaining access, alternative qualitative data collection methods, ways of coding and analyzing qualitative data, building theory from qualitative data.

MGMT:7128 Methods for Experimental Research 2 s.h.
Nature of research and principles of experimental design, including laboratory and field experiments (quasi-experiments), event sampling, and methods of small-group research; analysis of variance (ANOVA), analysis of covariance (ANCOVA), multi-attribute analysis of variance (MANOVA); orthogonal, planned and unplanned comparisons, factorial experiments including repeated measures, nested-factors design, Latin square designs; analysis of data sets with SPSS.

MGMT:7140 Meta-Analysis in Behavioral Social Sciences (Ph.D.) 3 s.h.
Methods for quantitative integration of findings in behavioral and social sciences; overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.

MGMT:7160 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.) 3 s.h.
Measurement and statistical methods needed for conduct of methodologically sound, publishable research; kinds and levels of measurement; role of measurement in theory development and cumulative research knowledge; theory of measurement error; types of reliability and their estimation; corrections for bias in research results due to measurement error; basic scaling methods; criterion-related, content, and construct validity; cross-validation and shrinkage formulas; factor analysis; statistical power in research studies; introduction to meta-analysis; item analysis and scale construction; structural equation modeling. Requirements: basic statistical methods course.

MGMT:7320 Organizational Theory Ph.D. 2 s.h.
Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power, conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.

MGMT:7330 Staffing Organizations (Ph.D.) 3 s.h.
Aspects of selection, including professional and legal standards; job analysis techniques, validation strategies; criterion development; selection methods (e.g., psychological tests, interviews, biographical data, assessment centers); ethical issues.
MGMT:7340 Group Processes (Ph.D.) 3 s.h.
In-depth understanding of how work groups and teams can be made more effective in organizations; team design issues (i.e., task type, interdependence, leadership, member composition); process issues including power, influence, communications, conflict, collective memory, and intergroup relations.

MGMT:7350 Leadership (Ph.D.) 3 s.h.
Understanding and preparation for implementing leadership in organizations; focus on reading and analysis of basic research-related leadership theories; contrast "great person" theories, traditional behavioral and situational theories, and transformational leadership theory.

MGMT:7360 Motivation and Attitudes (Ph.D.) 3 s.h.
Motivational processes, attitudes, communication and interorganizational networks; emphasis on motivational antecedents and consequences, theoretical implications for models of work performance.

MGMT:7370 Reward Systems (Ph.D.) 2 s.h.
Compensation systems, government influences, equity in compensation and individual wage determination; research-based examination of performance evaluation and appraisal, theories of work performance.

MGMT:7375 Performance Management 2 s.h.
Theories and research pertaining to employee work performance and evaluation; conceptual definitions of work performance; theories concerning the determinants of work performance; theory and research explaining the effectiveness and biases of performance evaluation systems; theories and empirical research on performance feedback; areas for future theoretical and empirical investigation in performance management.

MGMT:7380 Training and Development (Ph.D.) 2 s.h.
Research-based examination of training and development programs; emphasis on processes of needs assessment, instructional design, and evaluation; integration of training with other human resource management functions; design of management development initiatives.

MGMT:7385 Social and Human Capital 2 s.h.
Theory, research, and methods for understanding social capital as a resource available to individuals resulting from the social structure which they are located; readings focus on application of social networks to various content areas at individual, team, and organizational units of analysis; examination of relationships among social and human capital on individual and team outcomes; emphasis on understanding existing theory and empirical findings; social network research in terms of study design and analysis through software programs including UCINET and R.

MGMT:7700 Mentored Research arr.
Management research conducted by doctoral students under faculty supervision; culminates in second-year research paper.

MGMT:7850 Seminar in Management 2-3 s.h.
Topics vary.

MGMT:7900 Contemporary Topics in Management and Organizations arr.
Research topics in human resources and organizational behavior.

MGMT:7950 Directed Readings in Management and Organizations arr.
Management research conducted by doctoral students under faculty supervision; culminates in dissertation.

MGMT:9090 Influence and Constructive Persuasion 3 s.h.
Exploration of methods of persuasion and the science behind why and how influence works in a contemporary business setting; leadership as a function of consensus building, convincing, and motivating in today's team-based, knowledge-centric enterprises; how leaders select from a variety of influence techniques to get others' commitment to a course of action rather than commanding others; persuasion—using solid evidence coupled with emotional appeal—as capacity to present a message in a way that leads others to support it; how persuasion, when used effectively, creates a sense of freedom—others freely choose your perspective and support it.

MGMT:9091 Corporate Social Responsibility and Sustainability 2-3 s.h.
Introduction to main corporate social responsibility (CSR) and sustainability issues; current debates; costs and benefits of CSR/sustainability; relationship between leadership, innovation, and CSR; CSR's effects on companies' ability to attract and retain good employees; numerous cases studies ranging from small to large companies from various sectors including food and agriculture, manufacturing, finance, mining, energy, retail, transportation; students read and debate articles and case studies written by leading business experts, academics, and CEOs; individual or team work on a CSR change analysis.

MGMT:9110 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: M.B.A. enrollment.

MGMT:9120 Leadership and Personal Development 2-3 s.h.
Major theories; determinants of leader effectiveness, personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness. Prerequisites: MBA:8120.

MGMT:9130 Strategic Management of Change 3 s.h.
How congruence in organizational strategy, structure and culture, job design, and employee characteristics produces effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisites: M BA:8120.

MGMT:9150 Nonprofit Organizational Effectiveness I

MGMT:9160 Nonprofit Organizational Effectiveness II

MGMT:9210 Law and Ethics
Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution.

MGMT:9220 Maximizing Team Performance
Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

MGMT:9230 Managing and Preventing Conflict
Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.

MGMT:9250 Managing Employee Performance
Concepts and practices to effectively manage, measure, and improve employee performance; establishing and communicating organizational expectations, the manager as coach and motivator, measurement methodologies, performance improvement methods. Requirements: MBA:8120 or previous course work in organizational behavior/development or management.

MGMT:9260 Strategic Employee Development
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities.
Management Sciences

Chair
  • Nick Street

Undergraduate major: business analytics and information systems (B.B.A.)
Graduate degrees: M.S. in business analytics; management sciences subprogram for the Ph.D. in business administration
Faculty: http://tippie.uiowa.edu/management-sciences/faculty.cfm
Web site: http://tippie.uiowa.edu/management-sciences/

The Department of Management Sciences specializes in using advanced computation and mathematical techniques to solve critical business problems. Its strengths in research and instruction include operations management, business analytics, information systems, and quantitative methods.

Undergraduate Program of Study
  • Major in business analytics and information systems (Bachelor of Business Administration)

Bachelor of Business Administration

The Bachelor of Business Administration with a major in business analytics and information systems requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program provides a variety of educational experiences that develop students' knowledge of managerial decision-making systems. Students acquire skill in applying this knowledge by constructing quantitative models, using computer technology, and creating database systems.

The major prepares students for career opportunities in both manufacturing and service organizations. Graduates find entry-level work as computer programmers, systems analysts, sales representatives with computer companies, and management trainees. Entry-level work in operations management is found in materials management, line supervision, purchasing, and manufacturing systems.

All B.B.A. students majoring in business analytics and information systems choose one of two tracks: business analytics or information systems.

COMMON REQUIRED COURSES
Students in both tracks must complete these three courses.

MSCI:3030 Business Process Analysis 3 s.h.
MSCI:3200 Database Management 3 s.h.
MSCI:4250 BAIS Capstone Project 3 s.h.

BUSINESS ANALYTICS TRACK
Students in the business analytics track complete all of these:

MSCI:3025 Decision Support Systems 3 s.h.
MSCI:3500 Business Intelligence 3 s.h.
MSCI:3800 Optimization and Simulation Modeling

INFORMATION SYSTEMS TRACK
Students in the information systems track complete all of these:

MSCI:3020 Business Programming 3 s.h.
MSCI:3300 Software Design and Development 3 s.h.
MSCI:3400 Data Communications 3 s.h.

ELECTIVES (BOTH TRACKS)
All students complete at least 3 s.h. from these:

MSCI:3100 Applied Information Systems 3 s.h.
MSCI:3920 Supply Chain Management 3 s.h.
MSCI:4220 Database Management and Web Services 3 s.h.
MSCI:4280 Computer Networks and Security 3 s.h.
CS:1210 Computer Science I: Fundamentals 4 s.h.
ECON:3355 Economic and Business Forecasting 3 s.h.
Any computer science course for which CS:1210 is a prerequisite 3-4 s.h.
Any course required for the nonselected track 3 s.h.

Graduate Program of Study
  • Master of Science in business analytics
  • Management sciences subprogram for the Doctor of Philosophy in business administration

The department offers a Master of Science in business analytics and administers a Certificate in Business Analytics; see Business Analytics (p. 662) in the Catalog. They also offer a management sciences program for the Ph.D. in business administration. In addition, the department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

Master of Science

The Master of Science program in business analytics requires a minimum of 30 s.h. of graduate credit, of which 24 s.h. must be unique to the M.S. degree. The 24 s.h. can include 15 s.h. earned toward the Certificate in Business Analytics; the program is designed so that students can move into the M.S. program upon completion of the certificate. No thesis is required. A cumulative g.p.a. of at least 2.75 is required in all course work.

Students may be allowed to apply up to 6 s.h. of course work from another institution toward the M.S. with approval by petition to the director of the master's program.

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College.

The digital revolution empowered by the Internet and computer technology in business and individual life during the last several decades has generated unimaginable amounts of data in the form of digital records stored in databases and file servers. The volume, velocity, and variety of these data have produced a new set of
problems and challenges for businesses and organizations in their pursuit of competitiveness, effectiveness, and efficiency. These problems and challenges also have created unprecedented opportunities for businesses and organizations to discover, model, understand, and serve their customers and partners in ways never imagined and to supply details never possible before. Businesses and organizations that are able to master this volume of data will have a tremendous competitive advantage over their competition in the marketplace.

As the need for implementing data analytic solutions grows, demand for professionals who understand and are capable of working with and exploring this data has exploded in recent years. This program addresses the growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making.

Students complete 15 s.h. in core courses, a capstone project, and 12 s.h. in elective course work. The capstone course is a group project that solves a real-world business problem. Elective course work allows students to deepen or broaden their skills.

The following course work is required.

**CORE COURSES**
All of these:
- MSCI:6070 Data Science  3 s.h.
- MSCI:9100 Business Analytics  3 s.h.
- MSCI:9110 Advanced Analytics  3 s.h.
- MSCI:9210 Introduction to Modeling with VBA  3 s.h.
- MSCI:9230 Database Systems  3 s.h.

**CAPSTONE COURSE**
This course:
- Capstone/Real-World Project  3 s.h.

**ELECTIVES**
Students select 12 s.h. from the following.
- MSCI:9180 Statistical Methods for Process Improvement  3 s.h.
- A text analytics course  3 s.h.
- A programming and databases for big data course  3 s.h.
- An operations analytics course  3 s.h.
- A health care analytics course  3 s.h.
- A marketing analytics course  3 s.h.

**Doctor of Philosophy**
Graduate students in management sciences may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy (p. 663) in the Catalog and visit the Department of Management Sciences web site.

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College.

**Courses**

**Lower-Level Undergraduate**
- **MSCI:1300 First-Year Seminar**  1 s.h.
  Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
- **MSCI:1500 Business Computing Essentials**  2 s.h.
  Basic proficiency with common business application software (word processing, spreadsheet, presentation software, database); simulation training to achieve requisite skills; additional support available via optional textbook or ebook; online, modular, self-taught course.

**Upper-Level Undergraduate and Graduate**
- **MSCI:3000 Operations Management**  3 s.h.
  Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management, operations planning and scheduling, emerging technologies in production and service management. Prerequisites: STAT:1030. Requirements: junior standing.
- **MSCI:3005 Information Systems**  3 s.h.
  Application of computing principles to solving business problems; information technology in modern organizations; focus on sound data analysis to support decision making; tools used for problem solving (spreadsheets, databases, web applications); role of information systems in organizations; components of information technology; Internet and network economy; basic data analysis and visualization; decision-making logic represented as algorithms; perform what-if analysis with data; emerging technologies. Prerequisites: MSCI:1500.
- **MSCI:3020 Business Programming**  3 s.h.
  Introduction to algorithms, data structures, and object-oriented programming constructs to solve business problems. Prerequisites: MSCI:3005.
- **MSCI:3025 Decision Support Systems**  3 s.h.
  Introduction to programming Visual Basic for Applications in Excel to develop spreadsheet-based decision-support systems. Prerequisites: MSCI:3005.
- **MSCI:3030 Business Process Analysis**  3 s.h.
  Design, management, and improvement of business processes; data-driven approach to map a value stream and analyze industrial and service-oriented business processes to identify improvement opportunities; discrete-event simulation tools utilized to model business processes and demonstrate effect of variability on process performance metrics; role of information systems to increase an organization’s efficiency; project management skills with particular emphasis on understanding issues involved in designing an information system to successfully support a business operation. Prerequisites: MSCI:3000.
MSCI:3070 Management Sciences Topics
Special topics in management sciences and information systems.

MSCI:3100 Applied Information Systems
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations. Prerequisites: ACCT:2100 and ACCT:2200 and MSCI:3005. Same as ACCT:3600.

MSCI:3200 Database Management
Design and implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisites: MSCI:3005.

MSCI:3300 Software Design and Development
Design and implementation of an information system; emphasis on programming and stages of software design life cycle, implemented using UML. Corequisites: MSCI:3020, MSCI:3030, and MSCI:3200; if not taken as prerequisites.

MSCI:3400 Data Communications
Computer communications: computer-communication system, hardware, data transmission principles; examples of existing communication networks; related managerial issues. Prerequisites: MSCI:3005.

MSCI:3500 Business Intelligence
Introduction to predictive analytics methods motivated by problems in operations, marketing, finance and accounting; data and text mining techniques, including classification, clustering, and association analysis. Prerequisites: ECON:2800.

MSCI:3800 Optimization and Simulation Modeling
How to leverage data and apply spreadsheet optimization software and Monte Carlo simulation to form optimal decision policies. Prerequisites: ECON:2800.

MSCI:3920 Supply Chain Management
Key issues in design and management of global supply chains; issues in integration of business processes across organizations that are concerned with movement of goods, delivery of services, and information flow along the supply chain in order to create value for the customer; issues in coordinating production and logistics within a firm and with outside suppliers and customers in the supply chain. Prerequisites: MSCI:3000.

MSCI:4050 Directed Readings
arr.

MSCI:4220 Database Management and Web Services
Advanced database management topics and basics of web services; how to retrieve real-world data from web services; use of SQL and PL/SQL to analyze data in relational databases. Prerequisites: MSCI:3200.

MSCI:4250 BAIS Capstone Project
Individual or team senior project incorporating track-specific knowledge and skills from BAIS curriculum; projects from real-world customer, (e.g., software system, network design/implementation or data/process analysis); outcomes include written documentation, presentation, project report. Prerequisites: MSCI:3030 and MSCI:3200 and (MSCI:3300 or MSCI:3500). Requirements: 90 s.h. completed.

MSCI:4280 Computer Networks and Security
Introduction to network management; emphasis on cost effective, reliable, and secure configuration and management of network switches, routers, clients, servers, and users in local and wide area network architectures; basic router and switch configuration options, routing protocols, VLANs, switch loop avoidance, access control lists, network access control mechanisms, encryption; Public Key Infrastructure and network user security; hands-on activities with routers and switches, Cisco networking simulators, and virtual machines using IPv4 and IPv6 protocols. Prerequisites: MSCI:3400.

MSCI:4900 Academic Internship
arr.
Professional internship experience with associated academic content.

MSCI:4999 Honors Thesis in Management Sciences
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Graduate

MSCI:6060 Data Programming in R
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; variables and data types, control structures, functions and subroutines, arrays and other simple data structures.

MSCI:6070 Data Science
Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MSCI:9100 or MBA:8150.
MSCI:6100 Text Analytics 3 s.h.
Concepts and techniques of text mining; practice of using statistical tools to automatically extract meaning and patterns from collections of text documents; topics include document representation, text classification and clustering, sentiment analysis and topic modeling. Prerequisites: MSCI:9100 and MBA:8150 and MSCI:9060.

MSCI:6190 Knowledge Management 3 s.h.
How organizations acquire, manage, and use information; knowledge management and competitive intelligence, information from inside and outside the organization; organization types, including library, corporate, and nonprofit. Same as SLIS:6190.

MSCI:6200 Database Analysis and Design 3 s.h.
Advanced topics in database management systems.

MSCI:6300 Dynamic Programming 3 s.h.
Fundamentals of discrete sequential dynamic programming with special focus on situations in which outcomes are uncertain; formulation and analysis of deterministic and stochastic dynamic programs under several objective criteria; emphasis on rapidly expanding field of approximate dynamic programming; applications including inventory control, vehicle routing, and resource allocation.

MSCI:6421 Knowledge Discovery 3 s.h.
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as CS:6421.

MSCI:6600 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as IE:6600.

MSCI:6700 Discrete Optimization 3 s.h.
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: MSCI:6600.

MSCI:6800 Web Mining 3 s.h.
Techniques for mining the web and other unstructured or semistructured, hypertextual, distributed information repositories; crawling, indexing, ranking, filtering algorithms.

MSCI:6900 Heuristic Search 3 s.h.
Design of heuristic search algorithms to find good (near-optimal) solutions to difficult (NP-hard) optimization problems that occur in many disciplines; basic heuristic concepts (local search, greedy search, problem decomposition) which serve as fundamental constructs for metaheuristics, including simulated annealing, genetic algorithms, tabu search, variable neighborhood search; introduction to various optimization problems and survey of various heuristic approaches; underlying theoretical structure of several heuristic methods; how to implement a heuristic algorithm.

MSCI:7000 Management Sciences Topics 3 s.h.

MSCI:7850 Research Seminar in Management Sciences 1 s.h.
Current research topics. Requirements: Ph.D. enrollment.

MSCI:7900 Special Topics in Management Sciences arr.

MSCI:7950 Directed Readings arr.

MSCI:7975 Thesis in Management Sciences arr.
Requirements: Ph.D. enrollment.

MSCI:9060 Data Programming in R 2 s.h.
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; variables and data types, control structures, functions and subroutines, arrays and other simple data structures. Prerequisites: MSCI:9100.

MSCI:9070 Data Science 2 s.h.
Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MSCI:9100.

MSCI:9100 Business Analytics 3 s.h.
Introduction to analytical techniques for making business decisions; utilizing Excel for application of descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

MSCI:9110 Advanced Analytics 2-3 s.h.
Development of data-driven, problem-solving skills for prediction of uncertain outcomes and prescription of business solutions; linear and nonlinear regression, Monte Carlo simulation, forecasting, data mining, and optimization utilizing spreadsheets and dedicated software packages. Prerequisites: MSCI:9110 or MBA:8150.

MSCI:9120 Supply Chain Management 3 s.h.
Design, operation, and management of a supply chain; supplier and customer contracting and partnering, inventory, transportation and logistics. Prerequisites: MBA:8190.

MSCI:9130 Seminar in Lean Practices 3 s.h.
Lean principles across the enterprise; real-world applications in manufacturing and service sectors, taught in an interactive approach using hands-on exercises and case studies. Prerequisites: MBA:8190.
MSCI:9135 Strategy Deployment and Lean Enterprise 3 s.h.
How organizations transform themselves into Lean enterprises that maximize customer value through the elimination of waste; focus on how manufacturing and service organizations successfully align their process improvement efforts to strategic goals of the organization (policy deployment); A3 thinking, strategic planning, balanced scorecard, Lean supply chain, employee engagement, and cultural transformation. Prerequisites: MBA:8190.

MSCI:9140 Rapid Continuous Improvement 3 s.h.
Hands-on experience working on rapid continuous improvement (RCI) teams sponsored by industrial affiliates of the business college involved in using RCI. Offered spring break.

MSCI:9160 Supply Chain Analytics 3 s.h.
Application of theory from classroom to real world; classroom learning from MSCI:9180 used to work on a company-sponsored Six Sigma style project to complete requirements for Six Sigma Green Belt certification. Prerequisites: MSCI:9180.

MSCI:9180 Statistical Methods for Process Improvement 3 s.h.
Strategies to improve quality of products, effectiveness of processes; managerial issues, statistical methods, quality, customer needs, customer satisfaction, quality measures and standards; understanding and reducing variability; builds on MBA:8150; data-based management, statistical process control, control charts, capability indexes, design of experiments. Prerequisites: MBA:8150.

MSCI:9185 Project Management 2-3 s.h.
Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

MSCI:9200 Business Programming 3 s.h.
Introduction to algorithms, data structures, and object-oriented programming constructs to solve business problems. Corequisites: MSCI:3005.

MSCI:9210 Introduction to Modeling with VBA 2-3 s.h.
Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting.

MSCI:9220 Introduction to Information Systems 3 s.h.
Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

MSCI:9230 Database Systems 3 s.h.
Theories and methodologies for semantic, logical, and physical database design; entity/relationship diagrams and their mapping to database schemas; normalization; languages for relational database systems, including relational algebra, Structured Query Language, query by example; query optimization and index selection; database and view creation, query and update processing; form and report design; practice with commercial DBMS products; integrity, security, concurrency control, transaction recovery.
Marketing

Chair
• Catherine A. Cole

Undergraduate major: marketing (B.B.A.)
Graduate degree: marketing subprogram for the Ph.D. in business administration
Faculty: http://tippie.uiowa.edu/marketing/faculty.cfm
Web site: http://tippie.uiowa.edu/marketing/

The Department of Marketing offers programs that follow business trends and lead business practice.

Undergraduate Program of Study
• Major in marketing (Bachelor of Business Administration)

Bachelor of Business Administration

The Bachelor of Business Administration with a major in marketing requires a minimum of 120 s.h., including 20 s.h. of work for the major. The program is designed to provide undergraduate students with an understanding of the business, social, and economic roles of marketing and to prepare them for marketing careers.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

Graduates find employment opportunities as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, and sales representatives in a variety of for-profit and nonprofit organizations.

The major in marketing requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration (p. 654) in the Catalog.

All of these:
MKTG:3050 Professional Preparation in Marketing 2 s.h.
MKTG:3100 Marketing Research 3 s.h.
MKTG:3200 Consumer Behavior 3 s.h.
MKTG:4500 Marketing Management (must be taken in senior year) 3 s.h.

Three of these:
MKTG:3300 Web Business Strategy 3 s.h.
MKTG:3400 Retail Strategies 3 s.h.
MKTG:3500 Direct Marketing Strategies 3 s.h.
MKTG:3701 Marketing Institute Field Studies 2 s.h.
MKTG:4000 Contemporary Topics in Marketing (counts once toward the major) 3 s.h.
MKTG:4100 Advertising Theory 3 s.h.
MKTG:4200 Sales Management 3 s.h.
MKTG:4250 Marketing and Sustainability 3 s.h.
MKTG:4275 Social Media Marketing 3 s.h.
MKTG:4300 International Marketing 3 s.h.
MKTG:4800 Field Studies in Marketing 3 s.h.

Iowa Degree in Three

University of Iowa majors who are strongly motivated can graduate with a degree in three years under the Iowa Degree in Three. The program is available to students who can complete more semester hours each term than they would on the Four-Year Graduation Plan.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

Students are allowed to bring Advanced Placement (AP), College Level Examination Program (CLEP), or transfer credit upon admission to reduce the number of semester hours required for their degree. They should consult their advisor about the program.

Graduate Program of Study
• Marketing subprogram for the Doctor of Philosophy in business administration

In addition to offering a marketing program for the Ph.D. in business administration, the department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program (p. 696) in the Catalog.

Doctor of Philosophy

Graduate students in marketing may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy (p. 663) in the Catalog and visit the Department of Marketing web site.

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College.

Courses

Lower-Level Undergraduate
MKTG:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

Upper-Level Undergraduate and Graduate
MKTG:3000 Introduction to Marketing Strategy 3 s.h.
Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems. Prerequisites: ECON:1100.
Requirements: junior standing.
MKTG:3050 Professional Preparation in Marketing
Overview of marketing careers; how marketing strategies are developed, evaluated, and implemented; how research on buyer behavior is used in marketing decisions; identification of research methodologies, analytical tools, and technologies for addressing marketing problems; marketing's relationship to other business and organizational functions and to the external environment. Prerequisites: MKTG:3000.

MKTG:3100 Marketing Research
3 s.h.
Marketing, research methods; role of marketing research information as a tool in management decision making. Prerequisites: ECON:2800 and MKTG:3000.

MKTG:3200 Consumer Behavior
3 s.h.
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisites: MKTG:3000.

MKTG:3300 Web Business Strategy
3 s.h.
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisites: MKTG:3000.

MKTG:3400 Retail Strategies
3 s.h.
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service; merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisites: MKTG:3000.

MKTG:3500 Direct Marketing Strategies
3 s.h.
Principles and processes of direct and database marketing; insight into the requirements for building a customer-based marketing strategy. Prerequisites: MKTG:3000.

MKTG:3700 Marketing Institute Seminar I
2 s.h.
Soft skills and professional expertise to succeed in marketing and consulting careers; resume and interview training, industry presentations, business case assignments, lectures. Prerequisites: MKTG:3000. Requirements: admission to the Marketing Institute.

MKTG:3701 Marketing Institute Field Studies
2 s.h.
Plan, design, carry out, and report on a marketing research project for a profit or nonprofit client organization; communicate with managers, apply knowledge of marketing research, meet deadlines, and convert research findings into actionable recommendations for management. Prerequisites: MKTG:3000 and MKTG:3700. Requirements: admission to the Marketing Institute.

MKTG:3702 Marketing Institute Seminar II
2 s.h.
Development of soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures; mentor students in marketing institute seminar. Prerequisites: MKTG:3000 and MKTG:3700 and MKTG:3701. Requirements: admission to the Marketing Institute.

MKTG:4000 Contemporary Topics in Marketing
3 s.h.
Topics not regularly offered in other courses. Prerequisites: MKTG:3000.

MKTG:4050 Directed Readings in Marketing
arr.

MKTG:4100 Advertising Theory
3 s.h.
Advertising as a promotional force; emphasis on theory, planning, resulting strategic and tactical decisions made by advertising executives. Prerequisites: MKTG:3000.

MKTG:4200 Sales Management
3 s.h.
Personal selling, management of sales force; emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisites: MKTG:3000.

MKTG:4250 Marketing and Sustainability
3 s.h.
Concepts for developing and implementing sustainable marketing strategies; developing more environmentally friendly products, more sustainable logistical systems, socially responsible pricing, and promoting sustainable products in a socially responsible way. Prerequisites: MKTG:3000.

MKTG:4275 Social Media Marketing
3 s.h.
Fundamentals of social media in a marketing context; establishing clear organizational goals, developing appropriate marketing strategies, and determining key campaign logistics (who, when, where); guest speakers and hands-on projects involving social media. Prerequisites: MKTG:3000.

MKTG:4300 International Marketing
3 s.h.
Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisites: MKTG:3000.

MKTG:4275 Social Media Marketing
3 s.h.
Fundamentals of social media in a marketing context; establishing clear organizational goals, developing appropriate marketing strategies, and determining key campaign logistics (who, when, where); guest speakers and hands-on projects involving social media. Prerequisites: MKTG:3000.

MKTG:4275 Social Media Marketing
3 s.h.
Fundamentals of social media in a marketing context; establishing clear organizational goals, developing appropriate marketing strategies, and determining key campaign logistics (who, when, where); guest speakers and hands-on projects involving social media. Prerequisites: MKTG:3000.

MKTG:4300 International Marketing
3 s.h.
Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisites: MKTG:3000.

MKTG:4500 Marketing Management
3 s.h.
Marketing problems of organizations; emphasis on marketing manager's role in developing, presenting goal-oriented marketing strategies; application of marketing concepts to real business situations. Prerequisites: MKTG:3000 and MKTG:3100 and MKTG:3200. Requirements: completion of 90 s.h. and one additional marketing elective, not including MKTG:3050.
MKTG:4800 Field Studies in Marketing 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: MKTG:3000 and MKTG:3100.

MKTG:4900 Academic Internship  arr.
Professional internship experience with associated academic content.

MKTG:4999 Honors Thesis in Marketing 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: BUS:3999 or ECON:3999. Requirements: admission to the Tippie College of Business honors program.

Graduate

MKTG:7800 Seminar in Consumer Behavior-Ph.D. 3 s.h.
Key facets of consumer behavior—information processing, perception, memory, learning, attitude formation, attitude change, decision making, emotion; behavioral research methods.

MKTG:7850 Seminar in Marketing Models-Ph.D. 3 s.h.
Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project.

MKTG:7900 Seminar in Research Topics-Ph.D.  arr.
Individual research topics.

MKTG:7950 Directed Readings in Marketing-Ph.D.  arr.

MKTG:7975 Thesis in Marketing  arr.

MKTG:9000 Directed Readings in Marketing  arr.

MKTG:9010 Contemporary Topics in Marketing 1-3 s.h.
Topics not regularly offered in other courses. Prerequisites: MBA:8110.

MKTG:9015 Social Media Marketing for Business 3 s.h.
Fundamentals of social media marketing; establishing clear organizational goals for engaging in social media to market a product or service, developing solid strategies for implementation, and determining other key campaign logistics. Prerequisites: MBA:8110.

MKTG:9030 Buyer Behavior 3 s.h.
Behavior of consumers and industrial buyers; research methods and findings from behavioral sciences applied to production, consumption, and marketing of products and services; application of consumer behavior concepts to managerial decision making. Prerequisites: MBA:8110.

MKTG:9110 Category Management 3 s.h.
Marketing strategy related to manufacturing product line interactions, retailer product assortment, consumer response; category definition, product line pricing and branding, cross-category promotions, channel coordination, efficient consumer response, loyalty programs, database marketing. Prerequisites: MBA:8110.

MKTG:9120 Customer Relationship Management 3 s.h.
Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying "high potential" customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisites: MBA:8110.

MKTG:9130 Product Management 3 s.h.
Techniques of new product development; idea generation, concept screening, product design, market testing, forecasting, brand management strategies within the firm. Prerequisites: MBA:8110 and MBA:8150.

MKTG:9150 Brand Management 3 s.h.
Strategies for building, leveraging, and defending brands; principles of consumer behavior, how they relate to building brand identity and equity; branding of consumer goods and services. Prerequisites: MBA:8110.

MKTG:9160 Service Marketing 3 s.h.
Production, consumption, and marketing of services; solutions to problems faced by service managers; development of an organizational marketing system for delivery of quality service. Prerequisites: MBA:8110.

MKTG:9165 Digital Marketing Strategies and Analytics 3 s.h.
Comprehensive look at how companies use digital marketing and analytics to create value for their customers; overview of current analytic tools and technologies used in digital marketing; introduction to JMP, state-of-the-art and visually stunning software; strategic applications of marketing analytics; applications using cases from B2C, B2B, and services marketing contexts. Prerequisites: MBA:8110.

MKTG:9170 Business to Business Marketing 3 s.h.
Industrial buyer behavior, buyer-seller relationships, interactive product policy and market segmentation, distribution and selling systems; skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisites: MBA:8110.
MKTG:9190 International Marketing 3 s.h.
Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisites: MBA:8110.

MKTG:9200 Field Studies in Marketing 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: MBA:8110 and MBA:8150.

MKTG:9300 Applied Marketing Research 3 s.h.
Research design, survey design, sampling, data analysis, qualitative research methods, research project management. Prerequisites: MBA:8110 and MBA:8150.

MKTG:9310 Marketing Analytics 3 s.h.
Quantitative tools to support marketing planning decisions, including forecasting, elasticity analysis, conjoint analysis, and customer LTV; analysis of syndicated data.

MKTG:9320 Strategic Brand Positioning 3 s.h.
Define market boundaries; use customer and competitor analyses to create sustainable market positions; create and manage brand identities; brand architecture, brand equity measurement. Prerequisites: MBA:8110.

MKTG:9330 Product and Pricing Decisions 2 s.h.
Create and capture value through product and service design, including stage-gate evaluation models; implement pricing strategy for new products and existing product lines. Prerequisites: MBA:8110.

MKTG:9340 Customer Analysis 2-3 s.h.
Use customer insights to support successful marketing programs; organizational, individual, and joint decision making; post sale satisfaction behaviors.

MKTG:9350 Marketing Communication and Promotions 3 s.h.
Develop effective communication programs for business and consumer markets; manage agency relationships; integrate media/vehicle platforms; track and evaluate investments in communications and promotions. Prerequisites: MBA:8110.

MKTG:9360 Category Management 3 s.h.
Manufacturer-retailer relationships, product line planning, efficient consumer response, cross-category marketing strategies, competition between national brands and store labels, retailer positioning, customer loyalty.
Master of Business Administration Program

Associate dean
- David W. Frasier

Assistant deans
- David Deyak, Colleen Downie, Dawn Kluber

Professional degree: M.B.A.
Professional minors: finance; marketing management; strategic management of innovation; supply chain and analytics
Faculty: http://tippie.uiowa.edu/people/azfaculty.cfm
Web site: http://tippie.uiowa.edu/mba/

The Henry B. Tippie School of Management offers a Master of Business Administration (M.B.A.) program that provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB International—the Association to Advance Collegiate Schools of Business, enables students to build broad-based professional portfolios of analytical skills, knowledge, leadership, and applied experiences. The curriculum is rigorous, yet learning takes place in a collaborative environment that builds teamwork skills and encourages independent problem solving.

Students in Tippie M.B.A. programs come from every region of the United States and from countries worldwide. They represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is typically required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

The Departments of Accounting, Economics, Finance, Management and Organizations, Management Sciences, and Marketing all contribute to the Master of Business Administration program through faculty participation and course work.

Professional Programs of Study
- Master of Business Administration
- Minor in finance
- Minor in marketing
- Minor in strategic management of innovation
- Minor in supply chain and analytics

The Tippie School of Management offers several M.B.A. programs: full-time M.B.A., M.B.A. for professionals and managers, an executive M.B.A., M.B.A. (in Hong Kong), and the CIMBA Program—M.B.A. (in Italy). Students in the full-time M.B.A. program have the opportunity to enroll in one of several joint degree programs, simultaneously earning an M.B.A. and a graduate or professional degree in law, medicine, or public health; see "Joint M.B.A./Graduate and Professional Degrees" below.

Full-time M.B.A.

The full-time M.B.A. program requires 60 s.h. of graduate credit, including 31 s.h. of required courses and 29 s.h. of career academy and elective course work.

Students complete business foundation (core) courses during their first semester in the program (fall) and advanced core courses, career academy courses, and electives in the remaining three semesters. M.B.A. students must complete MBA:8100 Business Acumen and Career Development, a core course that provides training and experience in and outside the classroom in career advancement, functional development, and professionalism. It also offers skill-building activities for the individual career academies. In addition, students take part in a required Global Learning Opportunity in MBA:8500 Seminar in International Business or an approved alternative in an international location to increase their understanding of the global business environment and its implications for business conduct.

The program's career academies are the framework through which students become experts in a specific business field. Each career academy provides a unique set of curricular offerings as well as academic and professional experiences that include industry projects, interactions with the business community and with alumni, and skill-building activities designed to increase each student's marketability. Before the second semester (spring), students choose one of the following career academies and concentration tracks based on their career goals.

- Business Analytics concentration
- Corporate Finance concentration
- Finance — Investment Management concentration
- Marketing Management — Managing Customers, Products, and Brands concentration
- Strategic Innovation Career Academy (two concentration tracks: strategic management of innovation concentration; supply chain and analytics; only available to students who graduate on or before May 2016)

The full-time M.B.A. program's study plan is as follows.

Accelerated Professional Track

Highly qualified undergraduate students in the University of Iowa College of Liberal Arts and Sciences, the College of Engineering, or the Tippie College of Business may be admitted to the full-time M.B.A. program's Accelerated Professional Track (APT). These students begin taking M.B.A. core courses as electives during their undergraduate programs; this permits them to earn a bachelor's degree and an M.B.A. more quickly than they would if they pursued each degree separately. APT students must complete an internship in the program.

To enter the APT program, students must complete 90 s.h. of undergraduate work, have a g.p.a. of at least 3.50, have clearly defined career goals, and indicate their intent to pursue both degree programs on a full-time basis. Students also must have a professional background similar to that of students enrolled in the M.B.A. program.

Joint M.B.A./Graduate and Professional Degrees

Joint degree programs allow students to pursue two degrees simultaneously, earning both more quickly than they would if they pursued each degree separately. The Tippie School of Management collaborates with several other University of Iowa academic units to offer joint professional or graduate degrees: an M.B.A./J.D. with the College of Law; an M.B.A./M.D. or an M.B.A./M.D. post-doctoral degree with the Carver College of Medicine; an M.B.A./M.H.A. with the College of Public Health; and an M.B.A./M.S. in Occupational Health.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

M.B.A. for Professionals and Managers

The M.B.A. for Professionals and Managers (M.B.A.-PM) program requires 45 s.h. of graduate credit. The program is tailored for working professionals building on the synergies of concurrent work and learning. It prepares graduates to be effective managers and leaders in the global marketplace. The curriculum is designed for students with varied backgrounds, undergraduate majors, and professional experience. Previous course work in business is not required.

Courses are offered each semester during evening hours or weekends at three locations in Iowa: in Cedar Rapids at the Tippie College of Business Cedar Rapids Center, in Des Moines at the John and Mary Pappajohn Education Center (JMPEC), and in the Quad Cities at the Palmer College of Chiropractic; see Program Locations on the school's web site. M.B.A.-PM students also may enroll in full-time M.B.A. courses in Iowa City when space is available.

The M.B.A.-PM program requirements include a business core of nine courses plus six business electives. The core develops competency in general management skills and key functional business areas. The electives contribute to the development of an area of expertise and foster a deeper understanding of management and business practices. Electives are offered in marketing, finance, leadership and management, and entrepreneurship, with a smaller number offered in analytics, management information systems, and operations. Students may take part in several Global Learning Opportunities in international locations to increase their understanding of the global business environment and its implications for business conduct and decision making.

Students can earn the degree in as few as two and a half years, but they may have up to 10 years to complete it. Most students earn the M.B.A. in about three years, taking two courses each fall and each spring semester and one course during the summer. Course sequencing is flexible. A sample study plan follows.

SECOND YEAR
MBA:8160 Managerial Economics 3 s.h.
MBA:8180 Managerial Finance 3 s.h.
MBA:8190 Operations Management 3 s.h.
Two business electives 6 s.h.

THIRD YEAR
MBA:8210 Global Business Strategy 3 s.h.
MBA:8300 Strategic Management and Policy 3 s.h.
Three business electives 9 s.h.

Admission
The M.B.A.-PM program admits students for summer, fall, or spring entry; applications are accepted throughout the year. Admission decisions are based on completed application materials, including quality of work experience, undergraduate grade-point average, scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) General Test, and recommendations. Applicants should have at least one and one-half years of postbaccalaureate professional work experience before admission. Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of TOEFL, the program accepts International English Testing System (IETLS) scores. For information about registering for TOEFL or IELTS and reporting scores to the University, visit English Requirements for MBA Admission on the Office of Admissions web site.

Admission decisions are made before registration begins for completed applications received by the priority application deadline. Admitted applicants who have met the priority application deadline may request registration for classes on the first registration date. The University accepts International English Testing System (IETLS) scores. For information about registering for TOEFL or IELTS and reporting scores to the University, visit English Requirements for MBA Admission on the Office of Admissions web site.

Admission decisions are made before registration begins for completed applications received by the priority application deadline. Admitted applicants who have met the priority application deadline may request registration for classes on the first registration date. The University must receive completed application materials by the following application deadlines.

Priority deadline for summer session (May): March 1
General deadline for summer session (May): April 30
Priority deadline for fall semester (August): May 1
General deadline for fall semester (August): July 30
Priority deadline for spring semester (January): October 1
General deadline for spring semester (January): December 30

Enrollment in Courses Before Formal Admission
Individuals who have not yet been admitted to the program may request pre-M.B.A. status by submitting their résumé and transcript to the Tippie School of Management for approval; they should have at least one and one-half years of postbaccalaureate professional work experience. Those granted special pre-M.B.A. status may enroll in a maximum of three M.B.A.-PM courses over 12 months, with a maximum of two courses during each 10 or 12-week session and one course during shorter sessions.

Students must take one of the following courses as their first course in pre-M.B.A. status.

Pre-M.B.A. students who begin with one course in their first semester must select that course from the list above. Those who take two courses their first semester must include one from the list above; for the second course, the program recommends a qualitative course such as MBA:8110 Marketing Management or MBA:8120 Management in Organizations.

Credit earned during pre-M.B.A. status is applied to the degree once the applicant is admitted to the program.

M.B.A. Executive Program
The M.B.A. Executive Program requires 51 s.h. of graduate credit. The executive program is conducted at the Pomerantz Center on the University's Iowa City campus and at the Pappajohn Education Center in Des Moines, Iowa. The Executive Engineer Dual Master's Degree program is offered periodically, typically at an off-campus site. See Program Locations on the school's web site.

Course work for the M.B.A. Executive Program is presented over 21-24 months. The program begins in mid-August (Iowa City) or in mid-January (Des Moines) with a five-day residency. It continues with classes one day each week on alternating Fridays and Saturdays (Iowa City) or on Friday and Saturday every other week (Des Moines). A second five-day residency is held at the beginning of the second year. Students have a four-week winter break and summers off.

Each entering class progresses through the program as a group. The curriculum includes 16 core courses, an international business seminar (10-11 days during spring of the second year), and work in small study groups throughout the program.

Admission is limited to experienced managers and executives who want to broaden their management skills without interrupting their professional careers. Applicants typically have seven or more years of postgraduate managerial experience. Previous academic work in business is not required.

The M.B.A. Executive Program requires the following course work.

FIRST YEAR
MBA:8110 Marketing Management 3 s.h.
MBA:8120 Management in Organizations 3 s.h.
MBA:8140 Corporate Financial Reporting 3 s.h.
MBA:8150 Business Analytics 3 s.h.
MBA:8160 Managerial Economics 3 s.h.
MBA:8170 International Economic Environment of the Firm 3 s.h.
MBA:8180 Managerial Finance 3 s.h.
MBA:8330 Seminar in Strategic Management I 1 s.h.
MGMT:9270 Human Resource Management 3 s.h.

SECOND YEAR
MBA:8190 Operations Management 3 s.h.
MBA:8300 Strategic Management and Policy 3 s.h.
MBA:8340 Seminar in Strategic Management II 1 s.h.
MBA:8500 Seminar in International Business 1 s.h.
ACCT:9020 Strategic Cost Analysis 3 s.h.
ACCT:9040 Financial Information and Capital Markets 3 s.h.
FIN:9300 Corporate Investment and Financing Decisions 3 s.h.
MGMT:9110 Dynamics of Negotiations 3 s.h.
MGMT:9130 Strategic Management of Change 3 s.h.
MGMT:9210 Law and Ethics 3 s.h.

M.B.A. in Hong Kong

The M.B.A. program in Hong Kong ("Hong Kong M.B.A.") requires 45 s.h. of graduate credit. The curriculum is designed for students with various backgrounds, experience, and academic majors who are living in or near Hong Kong or Taiwan. The program does not require previous course work in business.

Students complete the required courses in sequence; most complete the program in 16-20 months. Each course begins with two weeks of online course work followed by two consecutive weekends of classes in Hong Kong and an additional two weeks of online course work. Faculty from the University of Iowa travel to Hong Kong to teach the weekend classes. Some courses offer a video conference option for students living in Taiwan. Students also have the opportunity to study on campus in Iowa City for up to one semester.

Students are admitted to the program year-round. Admission decisions are based on a completed application, which includes a résumé, academic qualifications, an essay, letters of recommendation, and an interview. Applicants must have at least three years of professional-level work experience.

The M.B.A. program in Hong Kong requires the following course work.

MBA:8110 Marketing Management 3 s.h.
MBA:8120 Management in Organizations 3 s.h.
MBA:8140 Corporate Financial Reporting 3 s.h.
MBA:8150 Business Analytics 3 s.h.
MBA:8160 Managerial Economics 3 s.h.
MBA:8170 International Economic Environment of the Firm 3 s.h.
MBA:8180 Managerial Finance 3 s.h.
MBA:8190 Operations Management 3 s.h.
MBA:8300 Strategic Management and Policy 3 s.h.
ACCT:9020 Strategic Cost Analysis 3 s.h.
ENTR:9100 Entrepreneurship and Innovation 3 s.h.
FIN:9300 Corporate Investment and Financing Decisions 3 s.h.
MGMT:7850 Seminar in Management 3 s.h.
MGMT:9120 Leadership and Personal Development 3 s.h.
MSCI:9110 Advanced Analytics 3 s.h.
MSCI:9120 Supply Chain Management 3 s.h.
MSCI:9220 Introduction to Information Systems 3 s.h.
Electives 3-9 s.h.

Minor: Finance

A student pursuing the minor in finance must be enrolled in the full-time M.B.A. program.

The minor in finance requires a minimum of 6 s.h. chosen from the following.

At least one of these:

FIN:9200 Portfolio Management 3 s.h.
FIN:9300 Corporate Investment and Financing Decisions 3 s.h.

At least one of these:

FIN:9150 Financial Modeling and Firm Valuation 3 s.h.
FIN:9210 Derivatives 2 s.h.
FIN:9220 Fixed Income Securities 3 s.h.
FIN:9230 Real Estate Finance and Investments 2 s.h.
FIN:9240 International Finance 3 s.h.
FIN:9280 Structured Finance-Securitization 3 s.h.
FIN:9290 Alternative Investments and Portfolio Strategies 3 s.h.
FIN:9310 Corporate Financial Strategy 2 s.h.
MINOR: MARKETING MANAGEMENT

A student pursuing the minor in marketing management must be enrolled in the full-time M.B.A. program.

The minor requires a minimum of 6 s.h. from the following.

At least 6 s.h. from these:

- MKTG:9300 Applied Marketing Research 3 s.h.
- MKTG:9320 Strategic Brand Positioning 3 s.h.
- MKTG:9330 Product and Pricing Decisions 2 s.h.
- MKTG:9340 Customer Analysis 2 s.h.
- MKTG:9350 Marketing Communication and Promotions 3 s.h.
- MKTG:9360 Category Management 3 s.h.

MINOR: STRATEGIC MANAGEMENT OF INNOVATION

A student pursuing the minor in strategic management of innovation must be enrolled in the full-time M.B.A. program.

The minor requires a minimum of 6 s.h. from the following.

Three electives from the Business Analytics Career Academy (consult advisor) 6 s.h.

MINOR: SUPPLY CHAIN AND ANALYTICS

A student pursuing the minor in supply chain and analytics must be enrolled in the full-time M.B.A. program.

The minor requires a minimum of 6 s.h. from the following.

- MSCI:9110 Advanced Analytics 2 s.h.
- MSCI:9120 Supply Chain Management 3 s.h.
- MSCI:9140 Rapid Continuous Improvement 3 s.h.
- MSCI:9230 Database Systems 3 s.h.
- A data science course (consult advisor) 2 s.h.
- A data programming with R course (consult advisor) 2 s.h.

COURSES

See course lists in the individual Tippie College of Business departmental sections of the Catalog for descriptions of M.B.A. electives.

MBA:8000 Directed Readings-M.B.A. 1-3 s.h.

MBA:8010 M.B.A. IMPACT 0 s.h.

Introduction to the Tippie M.B.A. program and its culture; activities accentuate themes of involvement, motivation, professionalism, achievement, and challenge; week-long immersion in collaborative team-building experiences.

MBA:8100 Business Acumen and Career Development 1-2 s.h.

Career service tools to effectively market self to employers and succeed in chosen career path, communicate personal brand and vision, succeed in job search process, demonstrate professionalism in various business venues, and grow a personal sphere of influence; academy experience to build depth within chosen career field/academic track through course work and outside-of-class academy activities, academic concepts applied to business world, and exposure to relevant information important to student's major that does not clearly fit into academic course work.

MBA:8110 Marketing Management 2-3 s.h.

Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs.

MBA:8120 Management in Organizations 2-3 s.h.

How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change.

MBA:8130 Corporate Communications 2 s.h.

Effective communication to become a successful business professional and leader; strengthen ability to speak and write confidently, competently, and effectively, regardless of venue; varied team and individual presentation coaching, applied exercises.

MBA:8140 Corporate Financial Reporting 2-3 s.h.

Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings.

MBA:8150 Business Analytics 2-3 s.h.

Introduction to analytical techniques for making business decisions; utilizing Excel to apply descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

MBA:8160 Managerial Economics 1-3 s.h.

Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions.

MBA:8170 International Economic Environment of the Firm 2-3 s.h.

Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies.
MBA:8180 Managerial Finance 2-3 s.h.
Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital calculation, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Requirements: MBA:8140 or an undergraduate-level course in financial accounting or finance.

MBA:8190 Operations Management 2-3 s.h.
Planning and decision-making activities for managing an organization's operations; trade-offs associated with operations management decisions, tools and techniques for helping operations managers implement decisions and reach goals; production and service delivery strategy, capacity planning, product and process design, total quality management, demand management, production and service planning, scheduling, materials control, emerging production and service technologies. Prerequisites: MBA:8150.

MBA:8200 Strategic Business Consulting 1-6 s.h.
Plan, schedule, and deliver strategic consulting services to commercial enterprises; project definition, preparation and presentation of deliverables, client relationship management.

MBA:8210 Global Business Strategy 3 s.h.
Strategic frameworks and skills critical for success in the global marketplace; content of an economic environment; cultural, ethical, and legal issues in the conduct of international business; how companies enter foreign markets and grow international subsidiaries, succeed in mergers and acquisitions, cooperate in joint ventures and strategic alliances. Prerequisites: MBA:8120.

MBA:8220 Ethics and the Law 1-2 s.h.
Legal and ethical issues surrounding startup and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution.

MBA:8230 Introduction to Leadership 1-2 s.h.
Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

MBA:8300 Strategic Management and Policy 2-3 s.h.
Firm's competitive strategy from a manager's perspective; key strategic frameworks; integration of concepts learned throughout M.B.A. program, previous work experience. Prerequisites: MBA:8110 and MBA:8140 and MBA:8180 and MBA:8190.

MBA:8309 Consulting Project Leadership 1-2 s.h.
Student Team Leads for the Business Solution Center engage in activities to support the launch of spring consulting projects; initial client interactions, project scope, project planning documents, project arrangement letters, and detailed work plans in consultation with their client and Business Solutions Center leadership; basics of leading a team of student consultants. Prerequisites: MBA:8110 and MBA:8120 and MBA:8140 and MBA:8150 and MBA:8180 and MBA:8190 and MBA:8300. Requirements: full-time M.B.A. standing.

MBA:8310 Business Integration 1-3 s.h.
Student teams run an operational business simulation, conduct organizational/industry analysis, assess market opportunities, define strategic direction, compete for company profitability and market share. Prerequisites: MBA:8110 and MBA:8140 and MBA:8180 and MBA:8190 and MBA:8300.

MBA:8330 Seminar in Strategic Management I 1-3 s.h.
Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies.

MBA:8340 Seminar in Strategic Management II 1-3 s.h.
Strategic management integrating all aspects of business; computer simulation, lectures, case studies, readings.

MBA:8400 M.B.A. Internship 0 s.h.

MBA:8410 Application in Organizational Leadership 0-1 s.h.
Opportunity to develop leadership skills necessary for managing student organizations; class discussion, workshops, guest speakers; for M.B.A. organization treasurers and presidents.

MBA:8420 M.B.A. Case Competition 1-3 s.h.
Students represent Tippie School of Management in a case competition; internal case work, presentation and case analysis training. Requirements: M.B.A. standing.

MBA:8500 Seminar in International Business 0-6 s.h.
Issues and challenges facing organizations doing business in international markets; social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Requirements: M.B.A. enrollment.

MBA:8501 M.B.A. Coaches Program 1 s.h.
Development of coaching skills while leading a rigorous peer-to-peer mentoring program with first-year M.B.A. students; improve ability to communicate, motivate, influence, train, and develop others as well as develop high level competency in coaching in critical career development skills, such as business communications, crafting a personal brand pitch, interviewing preparation, and creating and leveraging a network; successful leaders are skilled coaches, so the benefits of this course to both coach and mentee, extend far beyond the classroom experience and time as a Tippie student.

MBA:9120 Introduction to Leadership 1 s.h.
Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

MBA:9210 Ethics II 1 s.h.
Organizational influences on ethical behavior.
Risk Management and Insurance

Director
  • Larry Hershberger
Associate director
  • Viana Rockel

Undergraduate certificate: risk management and insurance
Faculty: http://tippie.uiowa.edu/vaughan/faculty-staff.cfm
Web site: http://tippie.uiowa.edu/vaughan/

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance.

Undergraduate Program of Study
  • Certificate in Risk Management and Insurance

Certificate

The Certificate in Risk Management and Insurance requires 12-24 s.h. of credit: 12 s.h. for B.B.A. students majoring in finance, 18 s.h. for B.B.A. students majoring in business analytics and information systems, and 24 s.h. for all other students. The program is designed to provide an understanding of the many aspects of risk management and insurance (RMI). It concentrates on value creation and asset protection, including pure insurance and risk management, as well as on corporate and financial risk management. It also addresses the financial and economic characteristics of potential exposures to loss that business organizations and individuals face, and the techniques available for hedging the risks and minimizing the costs associated with these exposures.

The certificate provides students in business and other majors—particularly actuarial science, mathematics, or statistics—with a foundation for careers in financial and credit analysis, corporate risk management, risk management consulting, employee benefits management and insurance consulting, insurance brokerage, and underwriting. It also may be of value to students seeking professional designations, such as Chartered Life Underwriter (CLU) and Chartered Property and Casualty Underwriter (CPCU). Students typically find employment as financial analysts, bank compliance officers, stock exchange traders, capital and asset managers, insurance and accounting auditors, actuaries, and personal bankers as well as underwriters, claims adjusters, and insurance producers.

The certificate program is open to students earning an undergraduate degree at the University of Iowa who have reached third-year standing (completion of 60 s.h.) and have a cumulative, prerequisite, and University of Iowa g.p.a. of at least 2.75. To be awarded the certificate, students must complete all certificate requirements.

Completion of the certificate is noted on the student's transcript. A certificate is mailed to students who complete the program. Students should apply to receive the certificate when they submit their Application for Degree.

The Certificate in Risk Management and Insurance requires the following courses. Most of these courses have prerequisites or other registration requirements; students must complete prerequisites and meet registration requirements before they may register for a course. Some courses are offered only in fall or spring semesters; students should plan their course schedules carefully.

**CORE COURSES AND COREQUISITES**

Courses FIN:3000 and FIN:3400 are required for admission to the certificate program and are prerequisites for all other RMI courses. Students may take both courses during the same semester.

All certificate students must complete these (9 s.h.):
- FIN:3000 Introductory Financial Management
- FIN:3400 Principles of Risk Management and Insurance (RMI core)
- FIN:4410 Corporate and Financial Risk Management (RMI core)

Certificate students earning a B.B.A. with a major in business analytics and information systems also must complete these (additional 6 s.h.):
- FIN:4450 Risk Modeling
- MSCI:3800 Optimization and Simulation

**ELECTIVES: STUDENTS IN BUSINESS ANALYTICS AND INFORMATION SYSTEMS**

B.B.A. students majoring in business analytics and information systems complete one of these (3 s.h.):
- FIN:4420 Property and Liability Insurance
- FIN:4430 Life and Health Insurance
- FIN:4440 Employee Benefit Plans

**ELECTIVES: STUDENTS IN FINANCE AND OTHER MAJORS**

Students majoring in finance and those earning other majors choose two of these (6 s.h.):
- FIN:4420 Property and Liability Insurance (offered spring)
- FIN:4430 Life and Health Insurance (offered fall)
- FIN:4440 Employee Benefit Plans (offered fall)
- FIN:4450 Risk Modeling (offered spring)

Finance majors also choose three of these noninsurance electives (9 s.h.):
- FIN:4210 Futures and Options
- FIN:4220 Fixed Income Securities
- FIN:4230 Real Estate Process
- FIN:4240 International Finance
- FIN:4250 Applied Equity Valuation
- FIN:4320 Commercial Banking
- FIN:4340 Wealth Management
- MGMT:4100 Dynamics of Negotiations (available after early registration)
- MKTG:4200 Sales Management
- MSCI:3025 Decision Support Systems

Non-finance majors also choose three of these (9 s.h.):
- ACCT:3020 Financial Accounting and Reporting
ACCT:3200 Income Measurement and Asset Valuation (accounting majors take this instead of ACCT:3020) 3 s.h.
FIN:3200 Investment Management 3 s.h.
FIN:3300 Corporate Finance 3 s.h.
FIN:4210 Futures and Options 3 s.h.
FIN:4220 Fixed Income Securities 3 s.h.
FIN:4230 Real Estate Process 3 s.h.
FIN:4320 Commercial Banking 3 s.h.
MSCI:3025 Decision Support Systems 3 s.h.

Courses for Noncertificate Students

B.B.A. students majoring in finance may concentrate in risk management and insurance (RMI), or they may supplement their corporate finance and investment courses with one or more RMI courses. Students enrolled in other Tippie College of Business majors and College of Liberal Arts and Sciences students earning majors in statistics (p. 613), actuarial science (p. 613), or mathematics program C (p. 455) may take one or more of the RMI courses to enhance their understanding of financial services and learn about employment opportunities in the industry.

Other University of Iowa students may enroll in RMI courses after early registration if space is available and if they have completed ACCT:2200 Managerial Accounting, ECON:1100 Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, FIN:3000 Introductory Financial Management, and FIN:3400 Principles of Risk Management and Insurance.

Students not admitted to the Tippie College of Business should meet with the associate director of the Emmett J. Vaughan Institute of Risk Management and Insurance for advising before they enroll in RMI courses.

Affiliated Courses

The Department of Finance offers six courses affiliated with the Emmett J. Vaughan Institute of Risk Management and Insurance that are included in the Certificate in Risk Management and Insurance curriculum. See Finance (p. 677) in the Catalog for course descriptions and prerequisites.

FIN:3400 Principles of Risk Management and Insurance 3 s.h.
FIN:4410 Corporate and Financial Risk Management 3 s.h.
FIN:4420 Property and Liability Insurance 3 s.h.
FIN:4430 Life and Health Insurance 3 s.h.
FIN:4440 Employee Benefit Plans 3 s.h.
FIN:4450 Risk Modeling 3 s.h.
College of Dentistry

Dean
• David C. Johnsen

Executive associate dean
• Galen Schneider

Associate dean, education
• Lily Garcia

Associate dean, finance and facilities
• Scott Arneson

Associate dean, patient care
• Michael Kanellis

Associate dean, research
• Brad Amendt

Associate dean, student affairs
• Catherine Solow

Professional degree: D.D.S.
Graduate degrees: M.S.; Ph.D.
Web site: http://www.dentistry.uiowa.edu/

The College of Dentistry is an integral part of the University of Iowa and its health sciences campus. Its mission, which embraces the University's academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, D.D.S. students, and dental specialty residents provide oral health care to patients at clinics in the Dental Science Building, the Center for Disabilities and Development, and dentistry clinics at University of Iowa Hospitals and Clinics and Iowa City Veterans Affairs Medical Center. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University's five health science colleges as well as other University colleges and departments.

Dentistry at the University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. Today the college is Iowa's only provider of dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Commission on Post-Secondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Doctor of Dental Surgery program (D.D.S.), which prepares general dentists; advanced education programs in all dental specialties, each of which may lead to certification in a dental specialty; several advanced education programs in other areas of dentistry, including the oral science program, which offers M.S. and Ph.D. degrees; post-D.D.S. residency programs in general dentistry and hospital-based dentistry; and a wide variety of continuing education programs for dental and allied professions.

Professional Program of Study (D.D.S.)

The Doctor of Dental Surgery program prepares students to practice general dentistry. It requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry. See Doctor of Dental Surgery (p. 707) for a description of the program's curriculum and information about a joint bachelor's degree/D.D.S., the dentistry licensure examination, student organizations, expenses, admission, financial support, and academic rules and procedures.

Post-D.D.S. and Graduate Programs of Study

Several College of Dentistry departments offer professional certificate programs designed to prepare dentists for clinical specialty practice: Endodontics (p. 710); Operative Dentistry (p. 715); Oral Pathology, Radiology, and Medicine (p. 718); Orthodontics (p. 723); Pediatric Dentistry (p. 725); Periodontics (p. 727); and Prosthodontics (p. 732). Students who complete these programs satisfactorily are awarded a certificate. The Department of Oral and Maxillofacial Surgery (p. 716) offers a four-year residency program that culminates in a certificate. The college also offers the Certificate in Geriatric and Special Needs Dentistry (p. 713).

The College of Dentistry offers a Master of Science and a Doctor of Philosophy in oral science (p. 721). Students earning the Certificate in Endodontics or the Certificate in Prosthodontics may earn an M.S. or a Ph.D. in oral science concurrently with the certificate; those earning the Certificate in Operative Dentistry, Certificate in Oral and Maxillofacial Pathology or Certificate in Oral and Maxillofacial Radiology (Department of Oral Pathology, Radiology, and Medicine), or the Certificate in Periodontics may earn an M.S. in oral science concurrently with the certificate.

In addition, the Department of Orthodontics (p. 723) offers a Master of Science in orthodontics, and the Department of Preventive and Community Dentistry (p. 729) offers a Master of Science in Dental Public Health.

For information about post-D.D.S. and graduate programs of study, see the College of Dentistry department sections of the Catalog.

Faculty

Iowa's dental faculty is predominantly full-time. In addition, more than 100 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college's faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master's degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide
high-quality care to patients from many backgrounds. The college’s full-time faculty reflects that commitment.

**Facilities**

The College of Dentistry is located in the Dental Science Building on the University of Iowa health sciences campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals and Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 268 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The three clinical floors of the south wing are being remodeled in a sequenced four-year project that began in summer 2012. The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, educational media service, computer support services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Dows Institute for Dental Research.

A 33,000-square-foot addition that opened in fall 2011 features an ADA-compliant entrance, two floors of patient treatment areas, and one floor of space for students. The clinical spaces include 46 dental operatories in the Geriatric and Special Needs Clinic, the Endodontic Clinic, Faculty General Practice, and the Craniofacial Clinical Research Center. Student areas include a classroom that accommodates 80 people, small-group study rooms, a seminar room, a student lounge, lockers, and showers.

**Dental Education and Patient Care**

Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the health sciences campus and at several off-campus sites, including nursing homes. More than 45,600 people receive oral health care yearly in the college’s clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 167,300 patient visits each year.

**Interdisciplinary Centers**

**Dows Institute for Dental Research**

Established in 1976, the Dows Institute for Dental Research occupies the first and fourth floor of the Dental Science Building’s north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research at the institute is coordinated by the College of Dentistry. Focus areas include oral soft tissue and oral cancer; cariology and microbiology; epidemiology, behavior, health policy, and outcomes; and biomaterials, bone, and tissue engineering. Clinical and translational research is carried out at the Craniofacial Clinical Research Center.

Although research is concentrated in these program areas, one of the unit’s strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

**Craniofacial Clinical Research Center**

For more than two decades, the Office of Clinical Research has offered outpatient research support for National Institutes of Health, Food and Drug Administration, and related federally supported research grants. The office’s Craniofacial Clinical Research Center conducts protocol-based studies performed by faculty scientists and supported by oral health care industries. It also engages in translational research involving laboratory-to-clinical-research outcomes. The center is allied with the Carver College of Medicine's General Clinical Research Center and the University’s Institute for Clinical and Translational Science.

**Center for Oral and Maxillofacial Implants**

Through integrated research, education, and clinical programs, the Center for Oral and Maxillofacial Implants facilitates the development of implants and their use as a therapeutic modality in dentistry. The center integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. The center also provides vital coordination of dental specialties that participate in this treatment modality.

**Craniofacial Anomalies Research Center**

The role of the Craniofacial Anomalies Research Center is to understand the molecular mechanisms of genes and gene interactions that contribute to craniofacial anomalies and birth defects. These genetic defects arise from inherited and somatic gene mutations due to environmental effects. The center researchers use mouse, ferret and zebrafish models, human genetic material, cell lines, and molecular/biochemistry approaches to understand gene function. With the advent of human genome sequencing and the decreasing costs of genomic analyses, it has become somewhat more efficient to identify genetic defects associated with human genetic defects and diseases. The use of these genetic screening approaches provides invaluable data and resources in the search for new genes involved in human craniofacial development and associated anomalies. The center collaborators reside in the Carver College of Medicine, and the Colleges of Dentistry, Pharmacy, and Public Health.

**Courses**

Most College of Dentistry courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections; see the links under "Index: Academic Programs" on this page. The college also offers the following nondepartmental courses.
DENT:4000 Pre-Dental Academy  
Hands-on experience for undergraduate students interested in dentistry; interaction with faculty, residents, and current students in simulation clinic; didactic sessions; admissions information; changing health care environment, digital dentistry, dental esthetics, introduction to dental specialties, drilling and filling. Offered summer session.

DENT:8100 First-Year Continuing Session  
DENT:8118 Foundations for Critical Thinking I  
Problem and case-based small group sessions covering evidence-based dentistry and treatment planning integrating information taught concurrently in dental curriculum.

DENT:8119 Behavioral Science I and Ethics  
Introduction to patient-centered care, interpersonal and professional communication with patient, information exchange, preventative treatment plan formulation in patient encounters, and ethics.

DENT:8120 Second-Year Continuing Session  
DENT:8218 Foundations for Critical Thinking II  
Continuation of DENT:8118; evidence-based dentistry, critical thinking and treatment planning sessions; online and small group sessions. Prerequisites: DENT:8118.

DENT:8219 Behavioral Science II and Interprofessional Education  
Continuation of DENT:8119; assessing patient understanding of practices for improving/maintaining oral health; overview of patient challenges to effective communication; application of behavioral science principles in dentistry and behavior theories. Prerequisites: DENT:8119.

DENT:8300 Third-Year Continuing Session  
DENT:8319 Behavioral Science III  
Continuation of DENT:8219; standardized patient exercises with chairside feedback and evaluation of communication skills; participation in small group discussions regarding application of communication skills and behavioral science principles in patient encounters.

DENT:8355 Introduction to Geriatric Dentistry  
Biological, psychological, and social aspects of aging; normal aging and disease processes associated with aging; pathological changes that affect oral health treatment of dental diseases and patient management. Requirements: D.D.S. enrollment or completion of dental hygiene program. Same as ASP:8355.

DENT:8368 Applied Dental Pharmacology  
Patients’ medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.

DENT:8370 Application of Critical Thinking  
Continuation of DENT:8219; evidence-based dentistry, critical thinking, treatment planning sessions; online and small group sessions.

DENT:8371 Introduction to Quality Assurance  
Patient management, record writing skills, quality assurance concepts; students coordinate treatment, patient relations, issues of quality assurance for a group of patients; ethical, moral dilemmas in relation to dental practice.

DENT:8400 Fourth-Year Lectures and Clinics  
DENT:8485 Clinical Admissions Emergency  
Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.

DENT:8489 Advanced Topics in Quality Assurance  
Quality assurance from viewpoint of practicing dentist, dental educator, dental epidemiologist, court system; analysis of senior dental practice in relation to quality assurance criteria.

DENT:8500 Dental Student Research Honors Program  
Experience in conducting research. Requirements: D.D.S. enrollment and approval of mentor and program director.

DENT:9000 Advanced Clinical Comprehensive Dentistry  
Clinical experience for professional improvement. Requirements: dental degree.

Professional Degree

Doctor of Dental Surgery

**Professional degree:** D.D.S.

**Web site:** [http://www.dentistry.uiowa.edu/](http://www.dentistry.uiowa.edu/)

### Professional Program of Study

- **Doctor of Dental Surgery**

  The Doctor of Dental Surgery program prepares students to practice general dentistry. The D.D.S. is a professional degree awarded by the College of Dentistry. Admission requirements include 90 s.h. of undergraduate credit, including specific required courses, completed at an accredited college; see "Admission" below. Students working toward a bachelor's degree in the University of Iowa College of Liberal Arts and Sciences before being admitted to the College of Dentistry may be able to complete their bachelor's degree during their first year in dentistry; see "Joint Bachelor's Degree/D.D.S." below.

### Doctor of Dental Surgery

The Doctor of Dental Surgery requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry.

Course work during the first and second years in the College of Dentistry integrates the biomedical sciences with preclinical and clinical disciplines. The biomedical sciences include gross anatomy, biochemistry, general histology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, periodontics, prosthodontics, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient treatment situation.

Second-year dental students continue their study of biomedical sciences, take preclinical courses, have additional patient treatment experiences in restorative and preventive dentistry, and are introduced to aesthetic and implant dentistry.

Third-year dental students rotate through a series of clerkships that expose them to seven clinical disciplines: endodontology, operative dentistry, oral and maxillofacial surgery, oral pathology, pediatric dentistry, periodontics, prosthodontics, and radiology and medicine.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to varied community dentistry health programs throughout Iowa and other states that include hospitals, nursing homes, and the Special Care Clinic. They may choose to participate in the Colorado Migrant Worker Program, the Indian Health Service Program, or the Foreign Dental School Exchange Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

### Biomedical Sciences in the Dental Curriculum

The following science courses are offered by University of Iowa departments outside the College of Dentistry and are a required part of the D.D.S. curriculum.

- ACB:8120 Human Gross Anatomy for Dental Students: 6 s.h.
- ACB:8121 General Histology for Dental Students: 4 s.h.
- BIOC:8101 Biochemistry for Dental Students: 3 s.h.
- MICR:8230 Dental Microbiology: 3 s.h.
- MPB:8115 Human Physiology for Dental Students: 4 s.h.
- PATH:8133 Introduction to Human Pathology for Graduate Students: 4 s.h.
- PCOL:8240 Basic Pharmacology for Dental Students: 3 s.h.

Dentistry nondepartmental courses are listed in the College of Dentistry (p. 704) section of the Catalog. Courses offered by the college's departments are listed in each department's General Catalog section.

### Joint Bachelor's Degree/D.D.S.

The College of Liberal Arts and Sciences (CLAS) allows its students to count 30 s.h. of elective credit earned in any other University of Iowa college toward graduation with a bachelor's degree. Under this policy, CLAS students who enroll in the College of Dentistry before completing their bachelor's degree may be able to complete their degree during their first year in dentistry. Students planning to take advantage of this plan must satisfy the CLAS residence requirement in order to enroll in the College of Dentistry. They also must fulfill all requirements for the bachelor's degree, including the General Education Program (p. 313) requirements and the requirements for a major. Contact the College of Liberal Arts and Sciences for more information.

### Dentistry Licensure Examination

The State of Iowa accepts clinical examination results from the Central Regional Dental Testing Service and from the Western Regional Examination Board. Examinations are administered at several testing sites located at dental schools in the United States. A separate license application is then filed with the individual state board of dentistry.

For licensure, all states also require the National Boards, conducted by the American Dental Association. Many states, including Iowa, also require a jurisprudence examination.

### Expenses

The College of Dentistry maintains the Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A $100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

### Student Organizations

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research (Student Research Group), the American Association of Women Dentists, the American Academy of Pediatric Dentistry Student Chapter, the American...
Society for Geriatric Dentistry, the Student National Dental Association, and the Hispanic Dental Association also have local chapters.

Students who rank in the upper 12 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society.

The national dental professional fraternities Delta Sigma Delta and Psi Omega have chapters at Iowa. Both fraternities provide academic and social activities for students and their spouses.

**Admission**

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association web site (http://www.adea.org).

Applications are accepted beginning June 1 of the year before the year of entry. Completed applications must be on file at ADEA by October 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning December 1.

Prospective dental students are encouraged to embark on an educational program that leads to a standard bachelor's degree. This ensures that students receive a well-rounded education.

**Predental Studies**

The basic academic requirement for admission to the College of Dentistry is completion of at least 90 s.h. of academic study at an accredited college. No more than 60 s.h. of credit is accepted from a junior college or two-year institution. The predental program of study should include the following.

**English:** Satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor’s degree at the college attended.

**Physics:** One year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

**Chemistry:** Two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year’s study must be laboratory work.

**Biochemistry:** One semester (equivalent to 3 s.h.).

**Biological science:** One year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

**Gross anatomy:** Highly recommended.

**Electives:** Sufficient course work in the social sciences, philosophy, psychology, history, foreign languages, business, and mathematics to provide a well-rounded educational background.

**Grade-Point Average Requirement**

Applicants should have a cumulative g.p.a. of at least 3.25 on a 4.00 scale; a g.p.a. above 3.50 is preferred. The admissions committee gives special consideration to the quality of applicants’ course work in the predental sciences, in addition to the cumulative grade-point average.

**Interviews**

Personal interviews are required of applicants for admission to the College of Dentistry. Applicants are contacted to arrange an interview, after a complete AADSAS application is received by the admissions office.

**Required Dental Admission Test**

All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric Centers.

Applicants should take the test by August 1, one year before entering dental school. Test application forms are available online or by mail from the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611.

**Deposit by Accepted Applicants**

Applicants accepted before February 1 are required to submit a $500 deposit within 30 days after notification of admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

**Additional Admission Considerations**

Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. The admissions committee reviews applicants who meet the minimum requirements and selects those who appear best qualified for the study and practice of dentistry. The committee considers applicants’ academic averages, science averages, DAT scores, letters of recommendation, the interview, and other factors.

Applicants who met the admission requirements five or more years before they applied to the College of Dentistry are considered by the admissions committee only under exceptional circumstances.

**Early Admission**

The College of Dentistry’s Deferred Admit Program (DAP) allows academically motivated students who are residents of Iowa and are interested in a dental career to be conditionally admitted to the College of Dentistry as early as the end of their first year of undergraduate study. Students postpone matriculation to the College of Dentistry until they have earned the amount of credit required for their undergraduate degree. As undergraduates, they are engaged in a liberal arts and sciences curriculum that incorporates the dental prerequisite courses. Once selected for the program, students must maintain a specified level of academic achievement to assure matriculation to the College of Dentistry.
Financial Support

Financial assistance for dental students is based on need. Dental students who demonstrate need are eligible for Health Professions Loans, Perkins Loans, and Stafford/Ford Loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA). Interest on some of these loans may be deferred while the student is in school, and the loans are repayable over an extended period of time after the course of study is completed.

Short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry. Tuition scholarships are awarded each year to qualified entering dental students. The awards provide financial support up to $15,000 per year for as many as four years, if the student maintains an appropriate level of performance.

Financial assistance (grants and loans) is available to disadvantaged students who qualify under the University of Iowa’s Educational Opportunity Program and the Opportunity at Iowa Program.

Information on financial assistance for dental students is available from the University's Office of Student Financial Aid.

Academic Rules and Procedures

Promotions, Graduation

Student promotions and graduation are determined by the Collegiate Academic and Professional Performance Committee (CAPP), which is made up of individuals appointed by the dean from the biomedical, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the executive associate dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

Committee for Appeals

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, he or she may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the Collegiate Academic and Professional Performance Committee's decision. The recommendation of the appeals committee is submitted to the dean for final action.
Endodontics

Head

- Fabricio Teixeira

Professional certificate: endodontics

Faculty: http://www.dentistry.uiowa.edu/endodontics-faculty

Web site: http://www.dentistry.uiowa.edu/endodontics

The Department of Endodontics provides education and training to predoctoral students and to professional students, who may work toward a graduate degree along with their professional training. Some students participate with departmental faculty in research that contributes to the knowledge base of the specialty. Faculty and advanced students in the department also provide care to patients at the College of Dentistry.

D.D.S. Student Training

Course work and clinical experiences in endodontics are of vital importance in the overall education of Doctor of Dental Surgery students. Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periapex. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

Professional Program of Study

- Certificate in Endodontics

The Certificate in Endodontics is a clinical specialty program designed to provide qualified dentists with the scientific knowledge and clinical skills they will need to practice endodontics and/or pursue a career in dental education and research.

The program's goal is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research.

Certificate

The Certificate in Endodontics requires a minimum of 24 months of full-time formal training. The curriculum includes clinical and didactic courses. Students complete an original research project in endodontics and write a scientific paper on their research for submission to a refereed journal.

The certificate program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the program are encouraged to seek board certification. Various activities throughout the course of study prepare students for the board examination process.

Students must maintain a g.p.a. of at least 3.00 in order to receive the certificate. Students who fall below this average are allowed one semester to raise their g.p.a.

Certificate students in the Department of Endodontics may work toward a Master of Science or a Doctor of Philosophy in oral science while earning the certificate. Both graduate degree programs provide students with in-depth knowledge in a scientific training discipline as preparation for careers in academia and research.

Students normally require three years of full-time study to complete the Certificate in Endodontics and the M.S. degree, or at least four years to complete the certificate and the Ph.D. degree. Both graduate degree programs require more didactic course work than the certificate program. The M.S. requires a thesis; the Ph.D. requires a dissertation. See Oral Science (p. 721) in the Catalog.

Other graduate programs are available to endodontics certificate students, such as master's degrees in other disciplines, or a certificate in combination with a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on the candidate's experience and goals. Consult the Department of Endodontics for more information.

Admission

Applicants to the endodontics certificate program must apply through the American Dental Education Association's Postdoctoral Application Support Services (ADEA PASS). Applicants must hold a D.D.S. or D.M.D. degree or a foreign equivalent and must meet the application requirements of the Graduate College. They should take the National Board Dental Examination, part one, and part two when it is available.

Applications should include official transcripts from all undergraduate and graduate institutions, an updated curriculum vitae, three letters of recommendation, a personal statement, and a photograph (two-inch head-and-shoulders view).

The certificate program begins in summer; ADEA PASS applications should be submitted no later than August 1 for admission the following summer. Finalists for admission are asked for a personal interview in August; admission decisions are made in September.

Graduate Study

Certificate students in the Department of Endodontics may work toward a Master of Science or a Doctor of Philosophy in oral science while earning the certificate. Both graduate degree programs provide students with in-depth knowledge in a scientific training discipline as preparation for careers in academia and research.

Students normally require three years of full-time study to complete the Certificate in Endodontics and the M.S. degree, or at least four years to complete the certificate and the Ph.D. degree. Both graduate degree programs require more didactic course work than the certificate program. The M.S. requires a thesis; the Ph.D. requires a dissertation. See Oral Science (p. 721) in the Catalog.

Other graduate programs are available to endodontics certificate students, such as master's degrees in other disciplines, or a certificate in combination with a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on the candidate's experience and goals. Consult the Department of Endodontics for more information.

Financial Support

Applicants to the certificate and graduate programs must be able to support themselves financially until they complete the programs.

Prospective students should plan to pay living expenses, tuition, and costs for books, specialized equipment (e.g.,
surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and other expenses. Stipends are determined on a yearly basis and depend on availability of funding.

Courses

For D.D.S. Students

ENDO:8240 Endodontics Preclinical Didactic
Basic principles, concepts, technical procedures for treatment of pulpal problems.

ENDO:8241 Endodontics Preclinical Laboratory
Basic technical procedures for treatment of pulpal problems.

ENDO:8360 Clinical Endodontic Practice
Clinical experience in diagnosis and treatment of routine pulpal and periradicular pathology; emergency diagnosis; treatment of patients.

ENDO:8365 Clinical Endodontic Seminar
Tooth pain, anesthesia, pulpal and periradicular reactions, endodontic radiologic interpretation, trauma diagnosis and treatment, surgical endodontics, endodontic implants, bleaching, retreatment, apexification/apexigenesis.

For Certificate Students

Courses offered by the graduate programs in oral science are listed in the Oral Science (p. 721) section of the Catalog.

ENDO:5225 Endodontic Literature Review I
Current and historical research.

ENDO:5226 Endodontic Literature Review II
Continuation of ENDO:5225.

ENDO:5260 Current Literature in Endodontics
Current literature relevant to endodontics, including diagnosis or treatment of endodontic cases; dental journals with endodontic-related content; landmark research.

ENDO:5700 Endodontic Surgery Conference
Attendance at Endodontic Surgery Conference.

ENDO:5701 Advanced Clinical Endodontics
Advanced study.

ENDO:5710 Research in Endodontics
0 s.h.

ENDO:5720 Seminar in Endodontics I
First in a series of lectures in endodontics.

ENDO:5721 Seminar in Endodontics II
Continuation of ENDO:5720.

ENDO:6227 Endodontic Literature Review III
Continuation of ENDO:5226.

ENDO:6228 Endodontic Literature Review IV
Continuation of ENDO:6227.

ENDO:6701 Seminar in Endodontics III
Continuation of ENDO:5721.

ENDO:6702 Seminar in Endodontics IV
Continuation of ENDO:6701.

ENDO:9300 Endodontic Certificate Program
Advanced endodontic clinical and didactic education; nondegree program toward eligibility for board certification in endodontics.
Family Dentistry

Head

- David C. Holmes

Faculty: http://www.dentistry.uiowa.edu/family-dentistry-faculty
Web site: http://www.dentistry.uiowa.edu/family-dentistry

The Department of Family Dentistry reinforces and refines the comprehensive approach to managing patients' oral health care needs.

D.D.S. Student Training

The senior year of the Doctor of Dental Surgery program integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing patient care.

Students who complete their education in Family Dentistry should:

- conduct themselves in a professional and ethical manner;
- understand the principles of comprehensive dental treatment planning;
- know the medical, ethical, and legal issues involved in patient care;
- be able to recognize the need for specialty consultation;
- be competent in coordinating and sequencing patient treatments;
- be effective members of the dental team;
- be prepared to enter general practice;
- be educated and trained for licensure examination; and
- appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic course work builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients' needs are stressed.

The department's practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

Courses

**FAMD:8484 Dental Practice Management** 2 s.h.
Principles of dental practice management; delivery of comprehensive dental treatment in a simulated group-practice clinical setting, with chairside dental assistants.

**FAMD:8487 Clinical Experiences: Comprehensive Care**
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

**FAMD:8494 Topics in Family Dentistry** 3 s.h.
Current techniques, findings; applications for general practitioner and graduate specialty programs.

**FAMD:8495 Treatment Planning and Sequencing** 2 s.h.
Documentation of diagnostic procedures used in developing a treatment plan and sequence for selected clinical patients; student presentations.
Geriatric and Special Needs Dentistry

Coordinator
- Howard Cowen

Professional certificate: geriatric and special needs dentistry
Faculty: http://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program-faculty
Web site: http://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program

The certificate program in geriatric and special needs dentistry prepares dentists to be leaders and teachers in this critical area of practice. The multidisciplinary program incorporates medicine and psychiatry and blends clinical and didactic experiences in varied settings, such as acute, palliative, rehabilitative, and long-term care. Its goal is to provide dental professionals with the knowledge and skills they will need to provide patient-centered, sound, and realistic treatment plans for their geriatric and special needs patients.

Professional Program of Study

- Certificate in Geriatric and Special Needs Dentistry

Certificate

The Certificate in Geriatric and Special Needs Dentistry requires a minimum of one year of full-time study. The program prepares dentists to evaluate and manage the oral health problems of older adults across the spectrum of geriatric health care services as well as adults with special needs. It also prepares professionals for scholastic positions in geriatric education. Successful graduates meet the educational requirements for eligibility to take the fellowship examination of the Special Care Dentistry Association.

Certificate students have opportunities to collaborate with medical residents and other allied health care professionals in providing a holistic approach to care of patients whose dental and medical needs are complex. They gain experience in the College of Dentistry’s patient care clinics and Geriatric Mobile Dental Unit, at St. Luke’s Hospital (Cedar Rapids, Iowa), and at University of Iowa Hospitals and Clinics.

Highlights of the curriculum include advanced clinical geriatric and special needs dentistry, interdisciplinary geriatric patient assessment, geriatric dentistry case studies, outreach, and teaching practicum.

Applicants must hold a D.D.S. or D.M.D. degree from an accredited dental school, be licensed dentists, and meet the admission requirements of the Graduate College. Contact the Geriatric and Special Needs Dentistry Program to learn more.

Advanced clinical education in geriatric dentistry.
Hospital Dentistry

Head

• Kirk L. Fridrich (Oral and Maxillofacial Surgery)

Graduate program director

• Ryan W. Hill

Faculty: http://www.uihealthcare.org/docs/Profiles.aspx?id=225137

Web site: http://www.uihealthcare.org/dentistry/

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals and Clinics. The service includes divisions of general dentistry, maxillofacial prosthodontics, and oral and maxillofacial surgery, and it interacts with the college's specialties of orthodontics, periodontics, pediatric dentistry, endodontics, diagnosis, oral pathology, and prosthodontics.

The Hospital Dentistry Program offers a one-year general practice residency.

Residency Program

The general practice residency program prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association (ADA).

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients. Rotations and patient experiences are divided between University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program.

They are appointed to the hospital's house staff and have the same privileges and responsibilities as residents in other professional education programs.

Applicants must be U.S. citizens or permanent residents and must be graduates of a dental school accredited by the American Dental Association. They also must be eligible for licensure to practice dentistry in the United States. Application deadline is October 1 for the following July 1. See General Practice Residency Program for admission and application requirements.
Operative Dentistry

Head

- Steven Armstrong

Professional certificate: operative dentistry
Faculty: http://www.dentistry.uiowa.edu/operative-faculty
Web site: http://www.dentistry.uiowa.edu/operative

The Department of Operative Dentistry provides training to predoctoral and postdoctoral students.

D.D.S. Student Training

Course work and clinical experiences in operative dentistry are fundamental to the overall education of Doctor of Dental Surgery students. Operative dentistry course work covers roughly one quarter of curriculum time during the first three years of dental school as students progress toward competency in operative dentistry. The department's primary goal is to educate dental students, using best available evidence, to achieve and maintain optimal patient oral comfort, function, and aesthetics through risk-based diagnosis, prevention, and minimally-invasive treatment of caries and hard tissue lesions of the teeth.

Professional Program of Study

- Certificate in Operative Dentistry

Students must earn the Certificate in Operative Dentistry in conjunction with an M.S. or Ph.D. in oral science; see Oral Science (p. 721) in the Catalog.

Certificate

The Certificate in Operative Dentistry is a professional clinical specialty program that provides dentists with advanced training for teaching, research, and the clinical practice of operative dentistry. The operative dentistry graduate program meets the educational requirements for application to take board certification examinations of the American Board of Operative Dentistry. (The American Dental Association does not recognize operative dentistry as a specialty area.)

Applicants to the certificate program must be graduates of accredited U.S. or recognized foreign dental schools and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

Certificate students must be enrolled in the M.S. or Ph.D. program in oral science in order to earn the Certificate in Operative Dentistry. Completion of both programs requires 36 months of full-time study. The M.S. requires additional course work as well as a thesis and oral and written comprehensive exams. Students have some flexibility in their curriculum to take courses that particularly interest them. See Oral Science (p. 721) in the Catalog.

Students must provide their own financial support for the certificate and degree programs, including research and thesis expenses.

Courses

For D.D.S. Students

OPER:8120 Dental Anatomy 3 s.h.
Basic dental terminology and nomenclature, human tooth morphology, creation of tooth crowns with wax.

OPER:8122 Operative Dentistry I 6 s.h.
Principles and design of cavity preparations; placement of restorative materials using simulated patients.

OPER:8240 Operative Dentistry II 5 s.h.
Principles of caries and non-curious lesion management, design of cavity preparations, restoration of teeth, patient management, pain control; esthetic dentistry; tooth bleaching, tooth recontouring, esthetic buildups with dental composite; exercises on mannequins in simulation clinic and procedures performed on patients in operative clinic. Prerequisites: OPER:8122.

OPER:8370 Operative Dentistry III 4 s.h.
Combination of didactic and clinical aspects of operative dentistry; medical and surgical management of dental disease; emphasis on minimally invasive dentistry with advanced esthetic principles.

For Certificate Students

OPER:5126 Operative Dentistry Seminar 0-1 s.h.
Review and critical analysis of operative dentistry literature.

OPER:5140 Operative Dentistry Advanced Clinic 0-3 s.h.
Medical and surgical clinical management of dental disease; special emphasis on minimally invasive dentistry using advanced esthetic principles.

OPER:5234 Selected Applications of Operative Dentistry 0-3 s.h.
Advanced techniques completed on simulated patients.

OPER:5245 Pre-Clinical Teaching 0-3 s.h.
Teaching predoctoral dental students on simulated patients.

OPER:6246 Clinical Teaching 0,2 s.h.
Clinical teaching instruction in operative dentistry clinics.
Oral and Maxillofacial Surgery

Head
- Kirk L. Fridrich

Assistant head
- Richard G. Burton

Director, graduate studies
- Steven L. Fletcher

Professional certificate: oral and maxillofacial surgery
Faculty: http://www.dentistry.uiowa.edu/oral-maxillofacial-surgery-faculty
Web site: http://www.dentistry.uiowa.edu/oral-maxillofacial-surgery

The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its training program for predoctoral students is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals and Clinics. Its certificate program is based primarily in the Oral and Maxillofacial Surgery Residency program at University of Iowa Hospitals and Clinics.

D.D.S. Student Training

The Doctor of Dental Surgery curriculum in oral and maxillofacial surgery is designed to develop a foundation of professional knowledge and surgical skills that will enable students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in didactic courses. Theory and application of anesthesia-analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

Professional Program of Study

- Certificate in Oral and Maxillofacial Surgery

Certificate

The department offers a four-year residency program that culminates in the Certificate in Oral and Maxillofacial Surgery. The program combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.

Recommendations of the American Dental Association, the Committee on Graduate Training of the American Association of Oral and Maxillofacial Surgeons, and the American Board of Oral and Maxillofacial Surgery have been considered carefully in planning the structure and scope of training.

The residency period covers four years of hospital training, providing an orientation to hospital procedures, integration of basic and clinical sciences, acquisition of surgical principles, and familiarization with varied aspects of health services.

Competence in clinical oral and maxillofacial surgery requires knowledge of the basic medical sciences related to the specialty. In addition to hospital and clinical training, residents take advanced course work in subjects such as applied pharmacology, surgical anatomy, pathology, physiology, and microbiology. They also review closely related disciplines such as roentgenology, anesthesiology, physical diagnosis, and laboratory procedures.

The assumption of increased responsibility and the opportunity for clinical and operating room experience are important aspects of residency training.

Residents gain clinical training in anesthesia through an assigned rotation in the Department of Anesthesia (Carver College of Medicine). Previous advanced training in physical diagnosis, physiology, pharmacology, and pathology take on greater clinical significance, and increased responsibility in the operating room as first assistant and surgeon further develops surgical judgment and skills.

Development and implementation of a research project under staff supervision enhance the value of the residency training.

Senior residents may be given responsibility for major oral and maxillofacial surgical cases during rotations at University of Iowa Hospitals and Clinics. Each fourth-year resident is assigned to a rotation as a clinical and didactic coordinator and assumes responsibility to qualify for examination by the American Board of Oral and Maxillofacial Surgery. To learn more about Iowa’s program, visit the Oral and Maxillofacial Surgery Residency web site.

Admission

Students may begin the four-year certificate program only on July 1. Applicants are selected through a post-D.D.S. dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-fourth of their graduating class, and must be eligible to be licensed to practice dentistry in the United States.

Facilities

The University of Iowa health sciences campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. Appropriate environments for residency training in oral and maxillofacial surgery are provided by University of Iowa Hospitals and Clinics, the College of Dentistry, and the Carver College of Medicine.
Courses

For D.D.S. Students

OMFS:8115 Anesthesia and Pain Control I 1 s.h.
Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination; neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

OMFS:8230 Basic Oral and Maxillofacial Surgery 2 s.h.
Principles; indications, contraindications for extractions; evaluation of patient's related medical history; techniques of extraction, minor oral surgery procedures.

OMFS:8245 Anesthesia and Pain Control II 1 s.h.
Theory, application, instrumentation of nitrous oxide sedation; emphasis on cardiovascular, respiratory physiology; evaluation of patients, practical techniques for nitrous oxide sedation.

OMFS:8355 Advanced Oral and Maxillofacial Surgery 1 s.h.
History, examination, diagnosis, treatment of diseases and traumatic injuries of oral cavity.

Clinical experience at the College of Dentistry, University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

For Certificate Students

OMFS:5208 Pain and Anxiety Control 0-3 s.h.
Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.
Oral Pathology, Radiology, and Medicine

Head
• Steven D. Vincent

Professional certificates: oral and maxillofacial pathology; oral and maxillofacial radiology
Faculty: http://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine-faculty
Web site: http://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine

The Department of Oral Pathology, Radiology, and Medicine educates predoctoral students and professional students, who may pursue graduate study along with their professional training. The department has diverse curricular responsibility and a faculty with widely varied disciplinary expertise.

D.D.S. Student Training

The Department of Oral Pathology, Radiology, and Medicine teaches Doctor of Dental Surgery and other health care students about diseases that manifest in and around the oral and maxillofacial region. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic features of these diseases and about their etiology and natural history. They also study identification of systemic diseases through physical evaluation of patients.

Professional Programs of Study

• Certificate in Oral and Maxillofacial Pathology
• Certificate in Oral and Maxillofacial Radiology

Oral science involves the study of structure, function, and diseases of the oral and maxillofacial region. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The department's programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while earning a professional certificate. Students working toward one of the department's certificates may pursue a Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

Certificates

The department offers the Certificate in Oral and Maxillofacial Pathology and the Certificate in Oral and Maxillofacial Radiology. The educational requirements of each certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Accreditation of the American Dental Association, the American Board of Oral and Maxillofacial Pathology, or the American Board of Oral and Maxillofacial Radiology.

Admission

Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or a foreign equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or foreign equivalent) to be considered for admission.

International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

The department's faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview is required.

Graduate Study

Students earning one of the department's professional certificates may pursue a Master of Science in oral science while they work toward the certificate. They pursue the M.S. track that corresponds with their certificate (Certificate in Oral and Maxillofacial Pathology or Certificate in Oral and Maxillofacial Radiology). Each program combines the minimum requirements of the M.S. and the certificate; completion time usually is 36 to 48 months.

All students in the combined programs pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. They must complete the courses listed below, including the core courses and the basic science and departmental courses listed for their M.S. track. They also must prepare and submit a thesis based on the results of research conducted during their course of study. See Oral Science (p. 721) in the Catalog for additional information about requirements and admission.

CORE COURSES

OPRM:5200 Stomatology Literature Review arr.
OPRM:5226 Oral Pathology for Graduate Students arr.
OPRM:5242 Clinical Oral and Maxillofacial Radiology arr.
ORSC:5200 Seminars in Dental Research 1 s.h.
ORSC:5210 Dental Sciences Research Methodology 2 s.h.
ORSC:5212 Statistical Methods for Dental Research 3 s.h.
ORSC:5215 Research Design in Dentistry 2 s.h.
ORSC:5600 Research in Oral Science (taken for a total of 9 s.h.) 9 s.h.
OTO:8199 Basic Otolaryngologic Science 2 s.h.

ORAL AND MAXILLOFACIAL PATHOLOGY TRACK

OPRM:5227 Surgical Oral Pathology 1 s.h.
OPRM:5240 Histopathology 1 s.h.
OPRM:5256 Advanced Oral Pathology arr.
DPH:6017 Teaching Methods and Evaluation 2 s.h.
ORSC:5280 Advanced Dental Therapeutics 1 s.h.
MED:8133 Mechanisms of Health and Disease II 6 s.h.
MED:8134 Mechanisms of Health and Disease III 6 s.h.

Experience with technical maintenance of darkroom, clinical equipment; troubleshooting under supervision of radiology staff.

**OPRM:5245 Head and Neck Radiology** 0-3 s.h.
Hospital-based rotation in diagnostic radiology with participation in interpretation sessions; CT, MRI, nuclear medicine, ultrasound.

**OPRM:5246 Craniofacial Radiology** 0-3 s.h.
Hospital-based rotation in diagnostic radiology; exposure to interpretive sessions on ultrasound, CT, MRI, nuclear medicine.

**OPRM:5256 Advanced Oral Pathology** 0-1 s.h.
Diseases involving orofacial organs; emphasis on bibliographic research, biodynamic analysis of pathologic processes, diagnostic interpretation; content adapted to student interests. Requirements: graduate standing in oral pathology.

**OPRM:9300 Oral Pathology Certificate Program** 0 s.h.
Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in oral and maxillofacial pathology.

**OPRM:9301 Oral Radiology Certificate Program** 0 s.h.
Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in oral and maxillofacial radiology.
Oral Science

Director

• Christopher Squier (Oral Pathology, Radiology, and Medicine/International Programs)

Graduate degrees: M.S. in oral science; Ph.D. in oral science

Web site: http://www.dentistry.uiowa.edu/

Graduate Programs of Study

• Master of Science in oral science
• Doctor of Philosophy in oral science

Graduate programs in oral science require that students complete courses from a core curriculum and conduct independent research leading to a thesis. The programs prepare graduates for careers in teaching and research.

Students must enroll in a professional certificate program offered by a College of Dentistry department in order to enroll in the Master of Science program in oral science. The following departments offer their certificate students the opportunity to earn M.S. degrees in oral science: Endodontics (p. 710), Prosthodontics (p. 732), Operative Dentistry (p. 715), Periodontics (p. 727), and Oral Pathology, Radiology, and Medicine (p. 718).

Master of Science

The Master of Science program in oral science requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of course work, 9 s.h. of independent research leading to a thesis, and a final examination. M.S. students must spend at least two years in full-time residence at the University of Iowa.

Students pursuing the M.S. normally must be enrolled in a clinical specialty training program offered by a College of Dentistry department. Students should complete the M.S. and the clinical specialty training program in three years of study.

Doctor of Philosophy

The Doctor of Philosophy program in oral science requires a minimum of 72 s.h. of graduate credit, including advanced course work and original research that culminates in the successful defense of a dissertation. Students must pass a comprehensive examination, prepare and gain approval of a research project, and complete and successfully defend a dissertation that describes the results of their research. Completion of the program usually requires at least four years of full-time study.

Admission

Applicants to the M.S. and Ph.D. programs must meet the admission requirements of the Graduate College. Applicants whose first language is not English must score at least 550 (paper-based) or at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English. Programs normally begin July 1 each year.

Applicants to the Ph.D. program are asked to submit a statement describing past research experience and current research interests, and stating how completion of the Ph.D. program fits their career goals. A personal interview may be requested for either program.

Courses

ORSC:5200 Seminars in Dental Research 0-1 s.h.

ORSC:5210 Dental Sciences Research Methodology 0,2 s.h.

Practical, experimental procedures in dental research; literature and design; writing of research protocols. Offered summer session.

ORSC:5212 Statistical Methods for Dental Research 0,3 s.h.

Descriptive methods, elementary probability, distributions, populations and samples, methods for analyzing percentage data and paired and unpaired measurement data, regression, correlation, and analysis of variance.

ORSC:5215 Research Design in Dentistry 0,2 s.h.

Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs. Offered spring semester.

ORSC:5220 Pathophysiology of Skin and Oral Mucosa 0,2 s.h.

Biology of skin, oral mucosa; changes in behavior of the tissues in varied physiological, pathological conditions. Offered spring semesters of even years. Prerequisites: ORSC:5210.

ORSC:5240 Pathophysiology of the Pulp-Dentin Complex 0-3 s.h.

Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisites: ORSC:5210.

ORSC:5250 Current Concepts of Cariology 0,2 s.h.

Etiology of dental caries; pathogenesis, development of preventive measures. Offered spring semesters of odd years. Prerequisites: ORSC:5210.

ORSC:5260 Bone and Tooth Support Structure and Implants 0,2 s.h.

Biology of bone and periodontal structures; biologic basis for therapeutic use of dental implants. Offered fall semesters of odd years.

ORSC:5275 Oral Microbiology and Immunology 0,2 s.h.

Principles of microbiology and immunology, aspects of microbial community development in the oral cavity, basic concepts of host/parasite interactions related to development of oral diseases; biological, immunological, and clinical manifestations induced by major oral pathogens. Offered spring semesters of odd years. Requirements: microbiology, biochemistry, and biology. Recommendations: immunology.
ORSC:5280 Advanced Dental Therapeutics  0-1 s.h.
Antimicrobial, analgesic, related therapies; emphasis on drug/drug interactions, dental implications of chronic cardiovascular and central nervous system medications. Offered fall semesters.

ORSC:5600 Research in Oral Science  arr.
Thesis research. Requirements: oral science M.S. or Ph.D. candidacy.

ORSC:5610 Independent Study  0-3 s.h.
Opportunity to pursue in-depth study in a particular area of interest; students meet with faculty member to design plan of study.
Orthodontics

Head
• Thomas E. Southard

Professional certificate: orthodontics
Graduate degree: M.S. in orthodontics
Faculty: http://www.dentistry.uiowa.edu/orthodontics-faculty
Web site: http://www.dentistry.uiowa.edu/orthodontics

The Department of Orthodontics educates predoctoral, professional, and graduate students for careers as practicing dentists, orthodontists, researchers, and teachers. It delivers state-of-the-art treatment to its patients—adults, children, and adolescents with a range of orthodontic, craniofacial, and related issues. The department also conducts major research programs and receives significant funding from the National Institutes of Health.

D.D.S. Student Training

The Department of Orthodontics prepares Doctor of Dental Surgery students to competently recognize and diagnose malocclusions of the teeth. Lecture courses guide D.D.S. students in learning basic concepts of dental and facial growth as well as treatment-oriented subject matter. In a laboratory course, students take and evaluate diagnostic records and fabricate treatment appliances.

Graduate and Professional Programs of Study

• Master of Science in orthodontics
• Certificate in Orthodontics

The graduate program and the professional clinical specialty program in orthodontics prepare competent individuals to practice orthodontics and dentofacial orthopedics. The programs' objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students' research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

Master of Science and Certificate

The Master of Science program in orthodontics requires a minimum of 30 s.h. of graduate credit. Students must satisfactorily complete a thesis based on an original research project to qualify for the M.S. degree.

Satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper, also qualifies students to receive the Certificate in Orthodontics.

Admission

Applicants must have a D.D.S. degree or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University for interviews with department faculty.

Courses

For D.D.S. Students

ORDN:8215 Growth and Development 1 s.h.
Normal human growth and development; emphasis on craniofacial region.

ORDN:8235 Orthodontic Laboratory 1 s.h.
Limited care case diagnosis and treatment.

ORDN:8236 Orthodontic Treatment 1 s.h.
From patient management to use of appliances for correcting some malocclusions in the general practitioner's office.

For Graduate and Certificate Students

ORDN:5200 Control Theory and Craniofacial Morphogenetic Systems 0-1 s.h.

ORDN:5201 Orthodontic Theory: Diagnosis and Treatment Plan 0,2 s.h.
Diagnosis, treatment planning implementation.

ORDN:5202 Diagnosis and Treatment Planning 0,2 s.h.
Literature concerning orthodontic diagnosis; treatment of particular problems; case histories of patients treated in graduate clinic.

ORDN:5203 Advanced Orthodontic Technique 0-3 s.h.
Skills for treatment of disfiguring malocclusions; use of edgewise biomechanical therapy; laboratory focus on typodont exercises.

ORDN:5204 Biomechanics 0-3 s.h.

ORDN:5205 Facial Growth 0-2 s.h.
Theories, processes; use of accepted facial growth concepts in treatment of individuals with malocclusions during active growth period.

ORDN:5207 Case Analysis 0-3 s.h.
Literature on diagnosis, treatment of mixed dentition patients; case histories of patients treated by serial extraction procedure.

ORDN:5209 Orthodontic Practicum 0-3 s.h.
Clinical practice.

ORDN:5210 Orthodontic Seminar 0-3 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed orthodontic treatment.
ORDN: 5217 Cephalometrics 0-3 s.h.
Use of skull X-ray (lateral and/or postero-anterior) in formulating orthodontic diagnosis, treatment plans for malocclusions; cephalometrics as a tool for craniofacial structure research.

ORDN: 5220 Craniofacial Anatomy 0-3 s.h.
Literature on anatomy, phylogeny, ontogenesis, physiology of craniofacial structures.

ORDN: 5221 Surgical Orthodontic Seminar 0-1 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed surgical-orthodontic treatment.

ORDN: 5400 Dental Treatment of Maxillofacial Deformities 0.2 s.h.

ORDN: 5700 Orthodontics Clinic 0-1 s.h.
Clinical experience in orthodontics clinic.

ORDN: 6211 Problems: Orthodontics 0-3 s.h.

ORDN: 6212 Research: Orthodontics 0-3 s.h.

ORDN: 6215 Orthodontic Journal Club 0-3 s.h.
Current biological, technical publications.

ORDN: 6216 Practice Management 0-3 s.h.
Business management of orthodontic practice; solo practice, associateship, partnership, practice corporation.

ORDN: 9300 Orthodontic Certificate Program 0 s.h.
Clinical and didactic education toward eligibility for board certification in orthodontics.
Pediatric Dentistry

Head
• Karin Weber-Gasparoni

Professional certificate: pediatric dentistry
Faculty: http://www.dentistry.uiowa.edu/pediatric-faculty
Web site: http://www.dentistry.uiowa.edu/pediatric

The Department of Pediatric Dentistry instructs predoctoral and professional students in the prevention and treatment of dental diseases in children as well as individuals with special health care needs. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

D.D.S. Student Training

All second-year Doctor of Dental Surgery students participate in a one-semester lecture course that includes preclinical exercises in the Simulation Clinic. Third-year D.D.S. students participate in a clerkship, which includes a lecture course and a clinical course. During their fourth year, D.D.S. students participate in a rotation through the department's clinics.

Professional Program of Study

• Certificate in Pediatric Dentistry

The department's certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Certificate

The Certificate in Pediatric Dentistry is a two-year residency program that prepares students for certification by the American Board of Pediatric Dentistry. Certificate students are trained in all phases of pediatric dentistry and have career choices in private practice, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations.

Approximately 60 percent of the certificate program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 10 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students' individual interests.

Close associations with the Stead Family Department of Pediatrics in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals and Clinics permit emphasis on oral rehabilitation under general anesthesia, treatment of children with conscious sedation, instruction in physical diagnosis, and management of children with developmental disabilities.

Admission

Prospective students apply through the American Dental Education Association PASS program. Openings in the program are filled through the Postdoctoral Dental Matching Program. Applicants must meet the admission requirements of the Graduate College.

Financial Support

Stipends for the two-year program are provided by federal agencies and other sources.

Research Opportunities

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, nutrition, prevention, and access to care.

Faculty

Faculty members hold numerous professional offices at national and state levels, committee memberships, consultancies, and honors in professional organizations. They serve as reviewers for professional journals and federal granting agencies. They also participate regularly in continuing education programs for dentists and other health science personnel. Fifteen of the department's faculty members are diplomates of the American Board of Pediatric Dentistry.

Courses

For D.D.S. Students

PEDO:8240 Pediatric Dentistry Diagnosis and Treatment
3 s.h.
Growth and development, behavior management, diagnostic-preventive-restorative techniques for pediatric patients.

PEDO:8360 Clinical Pediatric Dentistry
arr.
Comprehensive clinical management of pediatric patients.

PEDO:8365 Clinical Seminar in Pediatric Dentistry
1 s.h.
Patient management, case histories, treatment philosophies, issues in contemporary dentistry for children.

For Certificate Students

PEDO:5220 Social, Cultural, and Public Health Issues in Pediatric Dentistry
1 s.h.

PEDO:5700 Advanced Didactic Pediatric Dentistry
0-1 s.h.
Lectures in advanced pediatric dentistry.

PEDO:5702 Seminar in Pediatric Dentistry
0-1 s.h.
Discussion in pediatric dentistry.

PEDO:5704 Pediatric Dentistry Grand Rounds
0-1 s.h.
Pediatric dentistry rounds.

PEDO:5706 Journal Review Practicum
0-1 s.h.
Review of journal material in pediatric dentistry.
PEDO:5720 Diagnosis and Treatment Planning
Diagnosis and treatment planning for pediatric patient.

PEDO:5722 Interdisciplinary Issues for Patients with Special Health Care Needs

PEDO:5724 Oral Health Care for People with Special Health Care Needs
Providing oral health care for individuals with disabilities.

PEDO:5730 Advanced Clinical Pediatric Dentistry
Advanced study in clinical pediatric dentistry.

PEDO:5732 Pediatric Physical Diagnosis
Pediatric physical diagnosis for dental practice.

PEDO:5734 Pediatric Medicine for Dental Practitioners
Pediatric therapy for dental practitioners.

PEDO:5736 General Anesthesia Rotation

PEDO:5738 Clinical Application of Pediatric Conscious Sedation

PEDO:6700 Research in Pediatric Dentistry

PEDO:6710 Practice Teaching in Pediatric Dentistry

PEDO:9300 Pediatric Dentistry Certificate Program
Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in pediatric dentistry.
Periodontics

Head
• Georgia K. Johnson

Professional certificate: Periodontics
Faculty: http://www.dentistry.uiowa.edu/periodontics-faculty
Web site: http://www.dentistry.uiowa.edu/periodontics

The Department of Periodontics educates predoctoral students as well as professional students, who may elect to pursue graduate study along with their professional training. The department also provides interdisciplinary care for patients with complex treatment needs; generates new knowledge through its research programs; and provides professional service and leadership at all levels, local to worldwide.

D.D.S. Student Training

The periodontal program acquaints Doctor of Dental Surgery students with the diagnosis and management of periodontal diseases. It combines didactic, laboratory, and clinical experience and applies the biological concepts of periodontology to the comprehensive clinical management of patients.

Professional Program of Study

• Certificate in Periodontics

Students working toward the Certificate in Periodontics may pursue the Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

Certificate

The Certificate in Periodontics requires 36 months of full-time study, including satisfactory completion of required didactic and clinical courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper. Opportunities are provided for experience in clinical and basic research.

The certificate program provides a sound foundation for the clinical practice of periodontics. It meets all requirements of the American Dental Association’s Commission on Dental Accreditation for advanced dental education programs in periodontics. It also meets the educational requirements for application to take board certification examinations of the American Board of Periodontology.

Certificate students must be financially prepared for uninterrupted pursuit of their program of study.

Admission

Applicants to the periodontics certificate program must have a D.D.S. degree or the equivalent and must meet the admission requirements of the Graduate College. Applicants must take the National Dental Board Examination and must interview with the department. Visit Iowa Graduate Admissions—College of Dentistry to learn more about applying to the certificate program.

Graduate Study

Students earning the Certificate in Periodontics may pursue a Master of Science in oral science concurrently while working toward certificate completion. The M.S. program requires 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations. See Oral Science (p. 721) in the Catalog.

Facilities

The department has 22 modern, well-equipped operatories devoted exclusively to periodontics. Hospital experience is available to students in the nearby University of Iowa Hospitals and Clinics.

Research facilities include collegiate laboratories in histology, microscopy, biomaterials, quantitation, tissue culture, molecular biology and biochemistry, and microbiology. Other facilities are available by arrangement with University of Iowa Hospitals and Clinics, Eckstein Medical Research Building, and Medical Laboratories.

Courses

For D.D.S. Students

PERI:8120 Periodontic Methods I 2 s.h.
Normal periodontium, periodontal diseases, diagnosis etiology, epidemiology of periodontal diseases.

PERI:8230 Periodontic Methods II 1 s.h.
Periodontal treatment planning, prognosis, initial phase of periodontal therapy, treatment of acute periodontal problems, overview of surgical procedures.

PERI:8360 Periodontics Clinic arr.
Comprehensive clinical management of periodontal patients.

PERI:8365 Periodontology Seminar 1-2 s.h.
Comprehensive concepts of periodontology, clinical management of patients.

For Certificate Students

Courses offered by the graduate programs in oral science are listed in the Oral Science (p. 721) section of the Catalog.

PERI:5212 Applied Oral Microbiology 0-3 s.h.
Role of microbial factors and host response in pathogenesis of periodontal diseases; interactions between periodontal diseases and systemic diseases/conditions.

PERI:5225 Periodontology Literature Review I: Mucogingival Therapy 0-3 s.h.
Analysis of literature relating to a range of mucogingival conditions affecting the periodontium, different procedures to address/correct them, and expected outcome from each.

PERI:5226 Periodontology Literature Review: Regenerative Therapy 0-3 s.h.
Critical evaluation of rationale, indications, and results of various regeneration procedures and materials used in periodontics.

**PERI:5227 Periodontology Literature Review: Longitudinal Studies**
Effects and effectiveness of mechanical periodontal therapy.

**PERI:5228 Periodontology Literature Review: Occlusion**
Role of occlusal trauma in periodontal diseases; occlusion, mandibular movements, and occlusal adjustment; diagnosis and management of temporomandibular disorders; occlusion related to implants.

**PERI:5229 Periodontology Literature Review: Implants**
Critical review, in-depth analysis, and discussion of classical and current implant literature involving basic and clinical science of surgical and some prosthodontic implantology.

**PERI:5230 Periodontic Literature Review: Resective**
Introduction to language and concepts for resective procedures used in patient treatment.

**PERI:5700 Advanced Periodontology**
0-1 s.h.

**PERI:5710 Case Management Seminar**
Case management seminar in periodontics.

**PERI:5720 Current Topics**
Current topics in periodontics.

**PERI:5740 Periodontal Implant Provisionalization**
0-1 s.h.

**PERI:5750 Advanced Clinical Periodontics**
0-2 s.h.

**PERI:7208 Recent Advances in Periodontics**
Review of current literature.

**PERI:7700 Practice Management**
Practice management in periodontics.

**PERI:7701 Practice Teaching in Periodontics**
0-2 s.h.
Preventive and Community Dentistry

Head
• Daniel Caplan

Graduate degree: M.S. in dental public health
Faculty: http://www.dentistry.uiowa.edu/preventive-faculty
Web site: http://www.dentistry.uiowa.edu/preventive

The Department of Preventive and Community Dentistry educates future and practicing dental and oral health professionals, preparing them to understand and recognize:
• conditions that compromise patients;
• social, cultural, community, and political influences on dental practice;
• principles of preventive dentistry for individuals, groups, and communities; and
• considerations for preventing and treating oral disease in geriatric and special needs patients.

In addition to offering educational programs, the department provides patient care at the College of Dentistry and in a variety of off-campus settings. It also is home to research that advances dental public health.

D.D.S. Student Training

Predoctoral training in preventive, community, and geriatric dentistry is designed to increase Doctor of Dental Surgery students’ awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give students opportunities to interact with health care teams and the public in Iowa and around the world. The department conducts off-site community programs statewide, nationwide, and worldwide. It also operates the Special Care Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, D.D.S. students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

Graduate Program of Study

• Master of Science in dental public health

Master of Science

The Master of Science program in dental public health requires 40 s.h. of course work and is designed to be completed in two academic years of full-time study. It prepares dentists and dental hygienists to be specialists in dental public health. The program emphasizes research and requires a research project culminating in the completion and defense of a thesis. Successful dentist graduates meet the educational requirements for eligibility to take the certifying examination of the American Board of Dental Public Health. Applicants must meet the admission requirements of the Graduate College.

Courses

For D.D.S. Students

The department offers courses in preventive and community dentistry for D.D.S. students.

PCD:8116 Fundamentals of Clinical Dentistry
Identification of health and disease in the mouth; practical methods of disease control, philosophy of preventive dentistry; patient assessment, clinical diagnosis.

PCD:8117 Cariology and Preventive Therapies
Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in prevention of caries. Prerequisites: PCD:8116.

PCD:8118 Preventive Dentistry Assessment and Patient Care
Patient oral assessment, communication, patient management skills; preventive dentistry risk assessment, oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisites: PCD:8116 and PCD:8117.

PCD:8245 Clinical Preventive Dentistry
Experience providing complete prophylaxis and preventive services for college patients; application of nutrition principles and communication skills in a clinic setting. Prerequisites: PCD:8118.

PCD:8360 The Practice of Dentistry in the Community I
Issues related to the role of the dental professional at a local and state level, including dental public health, health literacy, cultural competency, and forensic dentistry; the role of the state dental director.

PCD:8361 The Practice of Dentistry in the Community II
Factors that affect the profession and practice of dentistry, including basics of health care systems in the U.S. and in other countries; health care reform; Medicaid; dental insurance; health care delivery systems; legal and malpractice issues; dental utilization and dental workforce; quality of care.

PCD:8485 Broadlawns Medical Center
Dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments; student team experience in Des Moines.

PCD:8486 Colorado Migrant Program
Experience providing primary dental care and outreach services to a migrant population; broad understanding of needs, resources for migrant, low-socioeconomic populations.

PCD:8487 Community Health Care: Davenport
Experience providing dental care at medical-dental ambulatory health care facility serving Scott County; community-related assignments.

PCD:8488 St. Lukes Dental Health Center arr.
Experience providing clinical and outreach services for low-income children and adults with developmental disabilities at St. Luke's Hospital, Cedar Rapids; operative and behavioral dental problems, hospital protocol, special needs of low-socioeconomic clients.

PCD:8489 Geriatrics and Special Needs Program arr.
Experience in Special Care Clinic and Geriatric Mobile Dental Unit; comprehensive care for medically, physically, cognitively compromised adults, including frail elderly nursing home residents with portable equipment, other underserved populations.

PCD:8491 Private Practice Preceptorship arr.
Development of skills and knowledge necessary for day-to-day practice of dentistry; experience at selected preceptor sites in Iowa.

PCD:8494 Special Field Clinic arr.
Extramural experiences developed according to student needs, extramural opportunities.

PCD:8496 Siouxland Community Health Center arr.
Experience providing dental care at medical/dental ambulatory health care facility; community-related assignments.

PCD:8497 ADEAGies/AADR-ADCFP Fellowship 4 s.h.
Window into day-to-day experiences of dental school faculty members for oral health professional students; exposure to multifarious educational experiences at dental institutions including academics, clinical practice, and biomedical, clinical, educational research, and administration.

For Graduate Students

The department offers courses in dental public health for graduate students.

DPH:5000 Introduction to Dental Public Health 0,2 s.h.
Science, philosophy, practice of dental public health.

DPH:5001 Literature Review Methods: Dental Public Health 0,2 s.h.
Concepts and process of literature review, particularly in area of student's interest.

DPH:5005 Administration of Public Dental Programs 0,2 s.h.
Application of general management concepts; practical aspects of planning, financing, staffing, implementing, operating, evaluating dental public health programs at federal, state, local levels.

DPH:5006 Preventive Programs in Dental Public Health 0,2 s.h.
Prevention, control methods for major dental conditions, primarily dental caries, periodontal diseases; clinical efficacy, cost-effectiveness; development of comprehensive preventive oral health plan for a community.

DPC:5008 Field Experience in Dental Public Health arr.
Arranged with public and voluntary health agencies according to students' and agencies' needs.

DPC:5009 Advanced Field Experience in Dental Public Health 1-3 s.h.
Opportunity to research, develop, and implement programmatic objectives with local, state, national, and/or federal agencies and organizations on an issue that is both relevant to the student and the agency; may require off-site visits to agencies or organizations. Prerequisites: DPH:5008.

DPC:5014 Dental Care Policy and Financing 0,2 s.h.
Dental financing and policy issues: payment mechanisms for health care service providers, third-party prepayment plans, salaried and public-financed programs, Medicaid and Medicare programs, dental insurance systems, and care of the underserved.

DPC:5016 Introduction to Statistical Computing arr.
Use of statistical packages on a personal computer for data management and analysis. Offered summer session.

DPC:5031 Geriatric Care 0,2 s.h.
Issues and problems related to oral health care in older adults, especially the frail or functionally dependent.

DPC:6002 Research Protocol Seminar 0,2 s.h.
Development of a master's thesis protocol; identification of thesis topic, review of relevant literature, development of research methods, writing.

DPC:6003 Independent Study: Dental Public Health 1-3 s.h.

DPC:6004 Principles of Oral Epidemiology 0-3 s.h.
Retrospective, prospective, cohort study designs; validity and reliability; distribution and determinants of oral diseases—caries, periodontal diseases, oral cancer, malocclusion, fluorosis, HIV infection, tooth loss, edentulism.

Protocol preparation; data collection, analysis, organization; writing, defense of research.

DPC:6017 Teaching Methods and Evaluation 0,2 s.h.
Philosophies of dental education, teaching methodologies, evaluation; focus on learning to write educational objectives, writing and analyzing exam items.

DPC:6018 Clinical Teaching Practicum: Preventive Dentistry 0-3 s.h.
Teaching experience in preventive dentistry clinic setting with first-year dental students; outcomes focused on methods in clinical teaching, evaluation, and remediation.
Prosthodontics

Head

• Julie Holloway

Professional certificate: prosthodontics
Faculty: http://www.dentistry.uiowa.edu/prosthodontics-faculty
Web site: http://www.dentistry.uiowa.edu/prosthodontics

Prosthodontics is the dentistry specialty involving crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and implant prostheses.

D.D.S. Student Training

The Department of Prosthodontics instructs Doctor of Dental Surgery students in the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry. Students learn through laboratory projects and treatment of patients with differing prostodontic needs.

Professional Program of Study

• Certificate in Prosthodontics

Students working toward the Certificate in Prosthodontics must pursue the Master of Science or the Doctor of Philosophy in oral science in conjunction with the certificate; see “Graduate Study” below.

Certificate

The Certificate in Prosthodontics requires a minimum of 36 months of study. It prepares individuals for specialty clinical practice in the discipline. The curriculum includes didactic courses and clinical training in all of the disciplines that make up the broad specialty of prosthodontics, including implant prosthetics, maxillofacial prosthetics, and treatment of temporomandibular disorders. Patient care is completed in close collaboration with the other dental specialties. Clinically related basic science instruction complements the clinical curriculum.

The certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association. Successful completion of the program satisfies the formal training requirement for eligibility to take the American Board of Prosthodontics certification examination.

Admission

Applicants to the prosthodontics certificate program must meet the admission requirements of the Graduate College. They must hold a D.D.S. or a D.M.D. degree from a dental school accredited by the American Dental Association or an equivalent degree.

The certificate program begins around July 1 each year. Applications are accepted year-round; those received by August 15 are considered for admission the following July. A personal interview is required for qualified applicants.

Graduate Study

Students earning the Certificate in Prosthodontics must pursue a Master of Science or a Doctor of Philosophy in oral science while they work toward the certificate. The graduate programs prepare individuals for careers in dental education and research and for independent study and professional growth.

Both graduate programs require more courses in the biomedical sciences and research methodology than the certificate program requires. Students must prepare and defend a thesis (M.S.) or dissertation (Ph.D.) based on original research. Facilities and support personnel for research are available through the college’s Dows Institute for Dental Research. See Oral Science in the Catalog.

Facilities

Most didactic, clinical, and laboratory instruction and patient treatment takes place in the Department of Prosthodontics, which is located in the Dental Science Building. The building also houses the Doctor of Dental Surgery (D.D.S.) program, training programs in specialties recognized by the American Dental Association, and the Dows Institute for Dental Research.

The college and the department provide supporting technologies that include cone beam CT radiography, implant imaging software, laboratory CADCAM systems, laser surgery, clinical operating microscopes, and digital shade matching.

Advanced prosthodontic students spend time at University of Iowa Hospitals and Clinics, where they work closely with medical professionals in other disciplines to treat medically compromised prostodontic patients and those who require maxillofacial rehabilitation.

Courses

For D.D.S. Students

PROS:8120 Treatment of Dentulous Patients: Introduction to Occlusion Lecture
1 s.h.
Introduction to principles of occlusion and their clinical application.

PROS:8121 Treatment of Dentulous Patients: Introduction to Occlusion Lab
1 s.h.
Patient simulation exercises demonstrating principles of occlusion.

1 s.h.
Basic principles of fixed prosthodontics for single-unit anterior teeth; basic principles of tooth preparation, clinical steps, and digital procedures for fabrication of anterior single-tooth all-ceramic crowns and interim crowns. Prerequisites: PROS:8120 and PROS:8121.

PROS:8123 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Anterior Teeth Lab
1 s.h.
Patient simulation exercises in single anterior tooth preparation, and fabrication of single-unit anterior all-ceramic and interim restorations. Prerequisites: PROS:8120 and PROS:8121.

1 s.h.
Basic biomechanical principles of fixed posterior single tooth prosthodontics; diagnosis and treatment planning for dentate patients including occlusion. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.

PROS:8125 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Posterior Teeth Lab
Patient simulation exercises in single posterior tooth preparation and laboratory fabrication of single-unit posterior definitive and interim restorations. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.

PROS:8240 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Lecture
Basic biomechanical principles of fixed prosthodontics for multiple-unit fixed prostheses; diagnosis and treatment planning for partially edentulous patient, including occlusion and esthetic concerns.

PROS:8241 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Patient Simulation I
Patient simulation exercises in preparation and fabrication of a three-unit fixed partial dental prosthesis and interim restoration.

PROS:8242 Treatment of Partially Edentulous Patients: Single Tooth Implant Lecture
Principles, clinical steps, materials, and laboratory procedures necessary for single tooth fixed implant treatment. Prerequisites: PROS:8240 and PROS:8241.

PROS:8243 Treatment of Partially Edentulous Patients: Single Tooth Implant Patient Simulation
Clinical steps in laboratory procedures for single tooth implant surgical guide fabrication and restoration. Prerequisites: PROS:8240 and PROS:8241.

PROS:8244 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Lecture
Basic biomechanical principles of tooth replacement with removable partial prosthodontics; diagnosis and treatment planning for partially edentulous patients. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8245 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Patient Simulation
Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of removable partial dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8246 Treatment of Edentulous Patients: Removable Complete Prosthodontics Lecture
Fundamental principles of diagnosis and treatment planning for edentulous patients, surgical and prosthodontic protocols for oral rehabilitation of edentulism.

PROS:8247 Treatment of Edentulous Patients: Removable Complete Prosthodontics Patient Simulation
Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of complete dentures, including implant over-dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243 and PROS:8244 and PROS:8245.

PROS:8250 Clinical Readiness in Prosthodontics

PROS:8360 Prosthodontic Clinic
Experience supplemented by individual supervision, demonstration.

PROS:8365 Prosthodontic Seminar
Knowledge in biological, basic sciences and technique applied to clinical fixed and removable prosthodontics procedures.

Certificate Courses
Courses offered by the graduate programs in oral science are listed in the Oral Science (p. 721) section of the Catalog.

PROS:5700 Advanced Clinical Prosthodontics
0,2 s.h.

PROS:5710 Advanced Removable Prosthodontic Technique
0,2 s.h.

PROS:5720 Advanced Instrument Technique
0,2 s.h.

PROS:5730 Advanced Implant Techniques
0-2 s.h.

PROS:5740 Advanced Fixed Prosthodontics Technique
0,2 s.h.

PROS:5750 Clinical Issues and Treatment Planning in Prosthodontics
0-1 s.h.

PROS:6220 Fixed Prosthodontics Literature Review I
Fixed prosthodontic procedures; assigned readings, discussion of related research.

PROS:6221 Fixed Prosthodontics Literature Review II
Porcelain-fused-to-metal and ceramic restorations, color science and esthetics; assigned readings, discussion of related research.
PROS:6222 Implant Literature Review 0-4 s.h.
Implant prosthodontics; assigned readings, discussion of related research.

PROS:6223 Occlusion Seminar 0-4 s.h.
Occlusion and the temporomandibular system; assigned readings and discussion of related research.

PROS:6224 Graduate Restorative Materials 0.2 s.h.
Dental materials science; mechanical, physical, and chemical properties of restorative materials; selection and manipulation.

PROS:6225 Complete Denture Literature Review 0-4 s.h.
Complete denture prosthodontics; assigned readings, discussion of related research.

PROS:6226 RPD Literature Review 0-4 s.h.
Removable partial denture prosthodontics; assigned readings, discussion of related research.

PROS:6700 Maxillofacial Prosthodontics Seminar 0-1 s.h.

PROS:7700 Maxillofacial Prosthodontics Rotation 0-1 s.h.
The College of Education offers teacher preparation programs in elementary education and in secondary education for students earning bachelor’s degrees. It offers the major in elementary education with a Teacher Education Program (TEP) for students earning a Bachelor of Arts or a Bachelor of Science from the College of Liberal Arts and Sciences. It offers a secondary education TEP for students earning bachelor's degrees with certain majors from the College of Liberal Arts and Sciences. The college also provides a number of specialized elementary and secondary teaching endorsement programs.

Graduate and postbaccalaureate students also may complete a Teacher Education Program; see "Graduate and Postbaccalaureate Admission to TEPs" below and the Teaching and Learning (p. 793) section of the Catalog.

Preparation for special education teaching is offered primarily at the graduate level. In addition, an instructional strategist program is available as an added endorsement for undergraduate students admitted to an elementary education program.

Undergraduate students admitted to a Teacher Education Program must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program (p. 313). They must satisfy General Education's Quantitative or Formal Reasoning requirement with a college-level mathematics course.

The Office of Education Services provides information on Teacher Education Programs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office's web site.

Undergraduate Admission to TEPs
Undergraduate applicants to the University of Iowa who wish to become teachers may indicate their interest in the elementary education major or a secondary-level Teacher Education Program (TEP) on their application for admission. Application materials for Teacher Education Programs are available from the Office of Education Services or on the office's web site.

Acceptance to a Teacher Education Program is prerequisite to registration for most College of Education undergraduate courses.

APPLICATION DEADLINES
Application deadlines for all Teacher Education Programs are as follows.

- Summer session and fall semester: March 1
- Spring semester: October 1

Late applications are not accepted.

GENERAL REQUIREMENTS
Admission to Teacher Education Programs is competitive. Admission requirements may vary by program area. Faculty members in each program area review and select students to be admitted to their program. In order to be considered for admission to a Teacher Education Program, an undergraduate student must satisfy the following requirements: admission to the University of Iowa; a minimum amount of credit for college-level work; a minimum grade-point average; minimum scores on a preadmissions test; and a preadmission volunteer field experience in a regular K-12 classroom setting. There may be additional requirements. Teacher Education Program application materials and current minimum application requirements are available on the Office of Education Services web site.

New Direct Admissions Policy
Any student entering the University of Iowa who, upon graduation from high school, has a composite score equal to or greater than 27 on the ACT and a minimum high school g.p.a. of at least 3.80 will be directly admitted into the elementary Teacher Education Program.

Any student who, upon graduation from high school, has a high school g.p.a. of at least 3.20 and who has been accepted into a music studio will be directly admitted into the K-12 music licensure program. Admission is contingent upon submission and acceptance of official verification of a music student's high school grade-point average prior to the start of his or her first year at the University of Iowa.
Graduate and Postbaccalaureate Admission to TEPs

Students who have completed a baccalaureate degree may be admitted to a Teacher Education Program (TEP) as graduate or undergraduate students. Students must apply to the TEP and to the Graduate College or the College of Liberal Arts and Sciences. In some programs they may apply for a master's degree objective—either a Master of Arts in Teaching (M.A.T.) or in selected majors, a Master of Arts (M.A.).

Students who choose to pursue a graduate-level teacher preparation program must be eligible for admission to the Graduate College, which requires a g.p.a. of at least 3.00 in all previous college course work. They must submit an official Graduate Record Exam (GRE) General Test score report, with scores that meet the minimum score requirement. They also must submit a complete application to the Teacher Education Program; see the Iowa Graduate Admissions web site.

Students also may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this option must apply to the appropriate Teacher Education Program, following the undergraduate admissions procedure, and must meet the general requirements for undergraduate admission to the University of Iowa; see the Iowa Undergraduate Admissions web site.

Application deadlines for graduate students and postbaccalaureate students with senior standing are March 1 and October 1.

TEP Standards and Policies

Students in the Teacher Education Program must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed from the Teacher Education Program or denied admission to student teaching. For more information on standards and policies, consult the Office of Education Services.

Electronic Portfolio

Students in the Teacher Education Program document their achievement of professional standards on ePortfolio, a web-based program in which they collect instructional artifacts and performances assigned in all their courses. Students receive instruction on the ePortfolio requirement beginning with the required course EDTL:3002 Technology in the Classroom (teacher education) and EALL:4081 ePortfolio Production (educational leadership).

Student Teaching

The final phase of the Teacher Education Program (TEP) is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. The student teaching semester is a full-time, all-day, experience. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers' experiences. Transfer credit may not be used to satisfy the student teaching requirement.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Education Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 30 for students planning to student teach the following fall semester and April 30 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college's required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas.

For more information, contact the Office of Education Services.

Waivers

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

Urban Student Teaching

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Clark County, Nevada (Las Vegas area); Chicago Public Schools; Aldine, Texas (Houston area); Rialto, California (Los Angeles area); and St. Louis Park, Minnesota (Minneapolis area). These options are open to all education majors who meet the requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Education Services.

International Student Teaching

International student teaching experiences are available primarily through Global Gateway for Teachers, an Indiana University Program working in collaboration with the University of Iowa. Sites include Australia, China, Costa Rica, Ecuador, England and Wales, Greece, India, Ireland, Italy, Japan, Kenya, New Zealand, Norway, Russian Federation, Scotland, Spain, and Turkey.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching opportunities, contact the Office of Education Services.

Teacher Licensure/Certification

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the
recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Many states require some type of competency testing. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by the University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of course work applied to meet program requirements must be earned at the University of Iowa. Fingerprinting is required for all new applicants for Iowa licensure; the State of Iowa has outlined specific procedures for the fingerprinting process.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis II tests that are specific to a student’s program. The tests are required before recommendation for licensure or certification to any state.

The College of Education Office of Education Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to individuals interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

State of Iowa Requirements

All University of Iowa students seeking an Iowa teaching license must complete EPLS:4180 Human Relations for the Classroom Teacher and EdTL:4900 Foundations of Special Education, or approved substitutes. Human relations courses offered through community colleges are not accepted. In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. Applicants who have been found guilty of a felony are barred from receiving an Iowa teaching license. Appeals may be filed directly with the Iowa Board of Educational Examiners.

Undergraduate Programs of Study

Elementary Education Major

The College of Education offers the undergraduate major in elementary education for students earning a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences. See Teaching and Learning (p. 793) for details about the major.

Honors in Education

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted, based on the recommendations of faculty and/or staff members and the education honors advisor. Honors Opportunity Program students must take EHOP:4100 Honors Seminar in Education, EHOP:4101 Senior Honors Project, and complete five additional honors experiences. Successful completion of the program results in recognition of the student as a College of Education honors graduate. The Honors Opportunity Program is housed in and administered by the Belin-Blank Center.

Minors

The College of Education offers two minors for students who wish to be better informed about education: one in educational psychology and one in human relations. The minors may help support students’ future career objectives and help students prepare to be better informed as parents, as taxpayers, or as future members of local boards of education. See Psychological and Quantitative Foundations (p. 759) to learn more about the minor in educational psychology; see Rehabilitation and Counselor Education (p. 774) to learn more about the minor in human relations.

Graduate Programs of Study

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by the College of Education’s faculty. Graduate students in education register in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College.

Students admitted to Ph.D. programs in fall 2015 must satisfy their doctoral program’s new research requirements.

Degree Programs Offered

The College of Education offers the following graduate degrees and programs.

DEPARTMENT OF EDUCATIONAL POLICY AND LEADERSHIP STUDIES

DEPARTMENT OF PSYCHOLOGICAL AND QUANTITATIVE FOUNDATIONS

M.A., Ed.S., and Ph.D. in psychological and quantitative foundations; the following programs are available: Counseling psychology (offered in the Ph.D.) Educational measurement and statistics (offered in the M.A. and Ph.D.) Educational psychology (offered in the M.A. and Ph.D.) School psychology (offered in the Ed.S. and Ph.D.)

DEPARTMENT OF REHABILITATION AND COUNSELOR EDUCATION

M.A. and Ph.D. in rehabilitation and counselor education; the following programs are available:
Counselor education and supervision (offered in the Ph.D.)
Couple and family therapy (offered in the Ph.D.)
Rehabilitation and mental health counseling (offered in the M.A.)
Rehabilitation counselor education (offered in the Ph.D.)
School counseling (offered in the M.A.)

DEPARTMENT OF TEACHING AND LEARNING
M.A., M.A.T., M.S., and Ph.D. in teaching and learning; the following programs are available:
Art education (offered in the M.A.)
Developmental reading (offered in the M.A.)
English education (offered in the M.A. and M.A.T.)
Foreign language and English as a Second Language (ESL) Education (offered in the M.A., M.A.T., and Ph.D.)
Language, literacy, and culture (offered in the Ph.D.)
Mathematics education (offered in the M.A., M.A.T., and Ph.D.)
Science education (offered in the M.A.T., M.S., and Ph.D.)
Social studies education (offered in the M.A. and Ph.D.)
Special education (offered in the M.A. and Ph.D.)

Master of Arts
The College of Education offers a Master of Arts. Some of the college's M.A. programs are offered with thesis as well as without thesis. Nonthesis programs usually provide more specialized course work than do thesis programs. Although a nonthesis program is not necessarily terminal, students who expect to continue their studies in a doctoral program are urged to select a thesis program in order to gain more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under “Graduate Programs of Study” in College of Education department sections of the Catalog.

Course work completed more than 10 years before the session in which the degree is to be conferred must be evaluated to determine how much credit may be accepted toward the degree requirements. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree.

Master of Arts in Teaching
The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate programs. It is a nonthesis program with requirements that range from 45 s.h. to 67 s.h. of credit. See Teaching and Learning (p. 793) in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of English, foreign languages, and science education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student's teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

A Master of Arts program with a secondary education major in social studies leads to initial teacher licensure. See "M.A.: Social Studies Education"/Program B Requirements" in the Teaching and Learning (p. 793) section of the Catalog.

Master of Science
Thesis programs are available for M.S. students in science education. The degree requirements are similar to those for a Master of Arts.

Specialist in Education
The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master's degree, except that an Ed.S. requires students to complete 15 s.h. of resident work on campus in one 12-month period or in two summer sessions. Course work completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Not all programs offer an Ed.S. degree. For a list of programs and degrees offered, see "Graduate Programs of Study" above.

Doctor of Philosophy
The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation. Ph.D. students must complete two full-time semesters of course work after they have earned 24 s.h. of graduate credit and have been admitted to the Ph.D. program.

Certificates
The Certificate in College Teaching requires 12 s.h. of graduate credit. The certificate program is open to all University of Iowa students working toward a Ph.D. or other terminal graduate degree. The certificate program complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. It requires course work, supervised teaching experience, and preparation of a teaching portfolio. To learn more or to apply, see Graduate Certificate in College Teaching.

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to all University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students. The certificate program develops students' skills in using technology to solve instructional problems associated with distance and time. The certificate's online format uses the techniques and approaches that the program teaches. To learn more or to apply, see Certificate in Online Teaching (COT).

Professional Improvement
Students who are interested in taking courses as nondegree students should apply for nondegree status to the Graduate College. They can then be admitted by a department on a nondegree basis by contacting the department. Students must be admitted to a department
in order to complete a program objective such as teacher licensure.

Extramural Education

Through the Division of Continuing Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet residency requirements for degrees. Students who plan to complete a degree program should apply for admission to the Graduate College and satisfy all application requirements for the degree program they wish to enter.

Special regulations govern such course work. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to the University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

Support Units and Resources

Belin-Blank Center for Gifted Education and Talent Development

The Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research, training, and service in gifted education. It also gathers and disseminates information on the education of gifted students.

The center is located in the Blank Honors Center. Its programs and services include the Belin-Blank Fellowship Program in Gifted Education; the Honors Opportunity Program; Invent Iowa; Scholastic Art & Writing Awards; the Henry B. and Jocelyn Wallace National Research Symposium on Talent Development; the Wallace Assessment and Counseling Clinic, which specializes in twice-exceptionality; practicum and internship experiences; course work in gifted education (including state endorsement); academic talent searches for students in grades 2-9; a number of precollege programs for gifted students in grades 2-12; and programs for international students. The center also administers the Iowa Online Advanced Placement Academy.

The Belin-Blank Center administers three University-level student programs: the Iowa Talent Project, developed for minority students from gifted programs in Des Moines and Cedar Rapids, Iowa; the Belin-Blank STEM Academy, a highly selective early-entrance program for students who have completed their sophomore or junior year in high school; and the Hong Kong Scholars Program, an early decision program that admits selected high school seniors from Hong Kong to the University of Iowa.

The center also provides practicum and internship experiences for undergraduate and graduate students and coordinates course work for the Iowa Talented and Gifted Endorsement.

The Belin-Blank Center houses the Acceleration Institute, which is dedicated to the study of curricular acceleration for academically talented children.

For more information, contact the Belin-Blank Center.

Blommers Measurement Resources Library

The Paul Blommers Measurement Resources Library includes books, journals, research reports, and reference materials related to educational and psychological measurement, testing, assessment, and evaluation, as well as an extensive collection of published and unpublished tests. The library supports the teaching and research needs of faculty, staff, and students at the University of Iowa, primarily serving the College of Education.

Center for Advanced Studies in Measurement and Assessment

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research-based initiatives that lead to advances in the methods and practice of educational measurement and assessment. CASMA performs, promotes, fosters, and disseminates research in measurement and psychometric methodologies that respond to contemporary needs and initiatives in testing.

Currently, the center devotes considerable resources to research on equating, scaling, and generalizability theory; it also offers workshops and training sessions on those topics.

Extensive free suites of computer programs for equating are available on the CASMA web site. The site also features research reports and technical notes on measurement topics such as generalizability theory, equating methods, revolutions and evolutions in educational testing, and decision consistency with complex assessments.

Center for Disability Research and Education

The Center for Disability Research and Education (CDRE) provides a bridge between research and practice to facilitate interdisciplinary collaboration and implementation of evidence-based practices and to conduct research that meets the needs of individuals with disabilities.

Center for Evaluation and Assessment

The Center for Evaluation and Assessment (CEA) conducts evaluations, research studies, and professional development initiatives. The center's mission is to promote the sound use of assessment results, provide high-quality evaluation services to clients, create effective training activities for graduate students, improve the quality of evaluation theory and practice, and contribute to research on program evaluation and assessment.

The center conducts evaluations in a broad range of areas: clinical and translational science, minority recruitment and retention, delivery of social and human services, curriculum and instruction, professional training, and the impact of public policy on PK-12 education. The center's staff members consult with universities, school systems, and other policy-making organizations in Iowa and nationwide that use evaluation studies and assessments to make important decisions regarding individuals or organizations. The center also provides training and professional development in program evaluation and assessment.
Center for Research on Undergraduate Education

The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students' chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

Collaborative Writing Consultancy

The Collaborative Writing Consultancy provides graduate students with a writing tutor who can assist with academic writing to revise, discuss, and offer a one-to-one workshop setting as graduate students prepare papers. This is a collaborative process, requiring both student and tutor to improve the paper’s content.

Cooperating Schools Program

The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects and service-learning projects conducted by faculty, staff, and students in public schools throughout Iowa. The program provides information to help researchers obtain permission to conduct research in Iowa schools. The Cooperating Schools Program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

Education Technology Center

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. In addition to Internet access, services include collegiate file and application servers; standard office tools; specialized applications such as media production tools and qualitative and quantitative analysis programs; secure folders and directories; and electronic mailing lists for faculty, staff, and student groups. The ETC also provides web site and digital signage (kiosk) development for College of Education departments, offices, and groups.

The Education Technology Center provides faculty with technical and design support for online course management, research technologies, distance education, multimedia, and ePortfolio production.

Polycom videoconferencing, SMART Boards and SMART Podiums, and wireless access are available throughout the college. Every classroom and conference room has a digital presentation system, and five classrooms are outfitted for videoconferencing and distance education instruction.

Faculty members and students can check out wireless laptops, computer projectors, audience response systems (clickers), digital audio recorders, digital video cameras, iPads, and other devices from the center. In all, the College of Education supports more than 850 computers, laptops, PDAs, and smartphones as well as seven servers.

Grant and Research Services Center

The Grant and Research Services Center (GRSC) provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/ Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

Institute on Disability and Rehabilitation Ethics

The Institute on Disability and Rehabilitation Ethics (IDARE) is a cross-disciplinary, cross-institutional online community of scholars. Its goal is to use research, education, and consultation to improve the quality of ethical practice experienced by people with disabilities who receive services from rehabilitation, health, mental health, and social service professionals. IDARE works to influence disability policy and practice development nationally and locally and to influence professional organizations’ consideration of ethical issues that affect people with disabilities and other marginalized populations.

Iowa Center for Assistive Technology Education and Research

The Iowa Center for Assistive Technology Education and Research (ICATER) helps to ensure equal access and opportunities for persons with disabilities by advancing assistive technology through research, education, and service. The center collaborates with University and community programs to provide technical assistance that enhances the services and resources available to educators, service providers, and persons with disabilities. It also sponsors workshops and education programs. The center's assistive technology laboratory is available for student use, demonstrations, consultations, and research.

Iowa Testing Programs

Iowa Testing Programs (ITP) provides assessment expertise to schools in the State of Iowa and consultation to the Iowa Department of Education and to area education agencies. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Assessments, for use in elementary and secondary schools, as well as other assessment tools to support instruction and learning. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting and in-service training to educators and school systems, and provides training experience for graduate students in educational measurement and evaluation.

Libraries

University of Iowa Libraries provides a wide variety of resources in print and online. Course reserve materials are available at the Main Library, just across the street from the College of Education; at the Hardin Library for the Health Sciences, on the health sciences campus; and at the Science Library, near the center of campus. An education librarian, whose office is in the College of Education, is available to help students with their research projects and assist faculty members and teaching assistants with their research and instructional needs.

Office of Graduate Teaching Excellence

The Office of Graduate Teaching Excellence (OGTE) is dedicated to excellence in college teaching and the preparation of future faculty. The office facilitates opportunities for research, teaching, and service. Through
the Iowa Education Fellows Program (i-fellows), OGTE develops and conducts workshops and seminars that address the developmental needs of College of Education doctoral students, from their first semester on campus through completion of their degrees. The office also guides graduate students through the process of earning a Graduate College Certificate in College Teaching.

Office of Education Services
The Office of Education Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state. A variety of application and information materials are available at the office and on its web site.

Statistics Outreach Center
The Statistics Outreach Center (SOC), a service of the College of Education and Iowa Testing Programs, helps the college's faculty, staff, and students use quantitative statistical methods to produce high-quality research. The center offers short-term consulting on statistical data analysis and grant proposals to the College of Education at no charge and provides services to departments and grants outside the college on a fee basis.

Teacher Leader Center
The Teacher Leader Center (TLC) helps students in the Teacher Education Program realize their career and professional goals and become leaders as 21st-century teachers. The center provides students with access to key individuals in the Teacher Education Program (TEP) and offers core student support in one central location. Its technology-enhanced Learning Commons has collaborative work spaces for students, faculty, and staff. The facility models new innovative technologies in education and supports seminars, workshops, and presentations. Community partnerships with area education agencies, community organizations, and schools provide access to classrooms where future teachers can innovate, improve, collaborate, develop, and discover their identities as teacher leaders.

UI Helping Professional Workshops
The UI Helping Professionals Workshops (IHELP) program provides affordable workshops intended to enhance the personal and professional development of helping professionals. The program offers Continuing Education Units (CEU’s) for community, agency, and education practitioners working with or interested in individuals, groups, families, and organizations.

Financial Support
College of Education students may be eligible for scholarships, awards, or graduate assistantships. Information about financial support for students is available at Graduate Student Grants & Assistantships on the college's web site. The Graduate College posts a list of open assistantships on its web site; see Graduate Assistant Job Postings.

Students interested in employment opportunities in the college's support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at the University of Iowa.

Graduate Assistantships
Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the director of the program in which the student believes he or she can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

Special Graduate Research Assistantships in Education
The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Applicants must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Exam (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs director. Application deadline is late February.

Scholarships and Awards
The College of Education presents a number of awards funded by donors; recipients must meet the criteria established by the donors for their awards. Recipients are presented with their award at a spring semester luncheon. For more information, see Scholarships and Awards on the college's web site.

Duane D. Anderson Memorial Scholarship: awarded to a transfer student from an Iowa community college who is currently enrolled in a program in the College of Education.

Jack Bagford Elementary Education Scholarship: presented to an undergraduate or graduate student in elementary education who will be student teaching during the academic year following the award; recipient must be a resident of Iowa.

David and Connie Belin Honors Award: presented to graduating seniors who have completed all requirements for the Honors Opportunity Program.

Blommers-Hieronymus-Feldt Fellowship: presented to doctoral students in educational measurement and statistics.

Lowell Brandt Rehabilitation Counseling Award: presented to graduate students pursuing a master's degree in the rehabilitation counseling program.
Barry Bratton Award for Achievement in Design of Instructional Processes: presented to graduate students who have completed course work that reflects a commitment to the systemic design and improvement of instructional processes and materials.

Dr. Bettye M. Caldwell and Dr. Fred T. Caldwell Scholarship: presented to undergraduate students interested in pursuing careers in early childhood development including the fields of education, sociology, psychology, and other related academic programs.

Jake and Kimberly Chung Scholarship: presented to a teacher education student for their student teaching semester.

Debra Clausen Memorial Scholarship: presented to a graduate student in the College of Education who will work at the Hospital School (now the Center for Disabilities and Development) to evaluate and develop learning programs for students with mental disabilities, including Down’s Syndrome, or to students pursuing careers in special education.

T. Anne Cleary Psychological Research Scholarship: presented to students in the Department of Psychological and Quantitative Foundations.

John Leonard Davies Scholarship: presented to a student who is a first- or second-semester senior in the Department of Teaching and Learning who is viewed as being creative and having outstanding potential for success in the field of K-12 education.

Harvey H. Davis Memorial Scholarship: presented to outstanding graduate students in educational leadership with preference given to students interested in the financing of education.

Dr. Mary Agnella Gunn Memorial Scholarship: presented to worthy undergraduate or graduate students in education.

John H. Haefner Memorial Scholarship: presented to a student who will be student teaching in the area of social studies.

Gladys and Margaret Harvey Education Scholarship: presented to students who show financial need and are enrolled in the College of Education.

Thelma Grandia Scholarship: presented to undergraduate or graduate teacher education students based on financial need.

Emma E. Holmes Education Scholarship: presented to an outstanding undergraduate or graduate student in any program in the College of Education; based on merit and need, the recipient must be a U.S. citizen with first preference for a student in the top 20 percent of their class, second preference for a student with demonstrated financial need.

Albert Hood Promising Scholar Award: presented to a doctoral student in the Department of Rehabilitation and Counselor Education and a student in the higher education and student affairs program with an approved prospectus.

H.D. Hoover Fund for Excellence: presented to a graduate student working on mathematics achievement testing in the elementary grades.

Howard R. Jones Achievement Award: presented to worthy undergraduate or graduate students in education.

Kyle C. and Eula B. Jones Scholarship: presented to undergraduate and graduate students planning careers in elementary and secondary education and administration.

Charlotte and Ruby Junge Scholarship: presented to undergraduate or graduate students in elementary or secondary education who will be student teaching for a full semester.

Daniel G. Loetscher Memorial Science Education Scholarship: presented to students pursuing secondary education with an emphasis in the sciences, with preference given to those pursuing an emphasis in chemistry.

Perry Eugene McClennahan Memorial Scholarship: presented to an outstanding graduate student in educational administration.

Sheila E. McFarland Memorial Scholarship: presented to a student who will be student teaching for a full semester in the area of elementary education, preference for this award will be given to an Iowa resident.

Leonard A. Miller Memorial Scholarship: presented to an outstanding first-year M.A. student in rehabilitation counseling.

Minority Student Award: presented to undergraduate or graduate students of color.

Helen Mackin Nichol Memorial Scholarship: presented to students from Iowa who are in secondary education and plan to teach and work with mentally and emotionally disturbed children.

Melvin R. Novick Award in Educational Measurement and Statistics: presented to a third- or fourth-year doctoral student in educational measurement and statistics who has at least a year of study remaining.

Paul Opstad Scholarship: presented to a full- or part-time graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students.

Margaret P. Park Scholarship: presented to deserving students in the College of Education with preference given to students from St. Louis County, Minnesota; Rock Island County, Illinois; or Iowa.

Guy and Gladys Peterson Scholarship: presented to students admitted to the Teacher Education Program who have completed at least 12 s.h. of education course work.

Betty Piercy Award: presented to a deserving student in the field of reading.

Ann Ramsey and Richard E. Posey Scholarship: presented to a student who is a junior pursuing a career in teaching or education.

Rolland Ray Award: presented to doctoral students completing a dissertation concerned with measurement in mathematics education, science education, social studies education, or English education.

Mary Maxine Redmond Scholarship: presented to undergraduate students from Iowa enrolled in the College of Education.

Judith Young Saunders Scholarship: presented to an undergraduate or graduate student who is pursuing a degree in teacher education, with preference given to students with severe visual impairments.
**Judy Skalsky Memorial Scholarship**: presented to an undergraduate or graduate student majoring in art education.

**Margaret A. Sloan Scholarship**: presented to undergraduate or graduate students in the College of Education, preference will be given to Iowa residents enrolled in elementary education.

**Lloyd Smith Scholarship**: presented to students in elementary social studies.

**Franklin D. Stone and Louise P. Stone International Scholarship**: presented to an outstanding international student pursuing a Ph.D. in the College of Education.

**James and Coretta Stroud Fellowship**: presented to an outstanding graduate student in educational psychology.

**Grace Phelps Stucker Scholarship**: presented to an undergraduate or graduate teacher education student.

**Edgar M. and Evelyn Benzler Tanruther Scholarship**: presented to undergraduate and/or graduate students in elementary education.

**University High School Innovative Development in Education Award (IDEA)**: presented to students during their secondary student teaching experience.

**Emily C. Wagner Scholarship**: presented to an undergraduate student in secondary education with an English education teaching degree who will be student teaching in the academic year following the award, preference for students who are residents of Iowa with a g.p.a. of at least 3.00 and demonstrated financial need.

**Erwin and Louise Wasta International Scholarship**: presented to an international student in the College of Education.

**Faculty**

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

**Courses**

Most College of Education courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections; see the links under "Index: Academic Programs" toward the top right on this page. The college also offers the following interdepartmental courses.

**Education Interdepartmental, Graduate**

**EALL:4130 Introduction to Grant Writing** 3 s.h. Comprehensive training in grant proposal writing; basics of project development and management; core principles for writing small and large proposals to public and private funding sources; finer points of grant writing to increase competitiveness of future proposals and applications; for students with limited grant writing experience. Same as MUSM:4150.

**EALL:5150 Introduction to Educational Research** 3 s.h. Principles of empirical educational research; logic of inquiry for both quantitative and qualitative research methodologies.

**Education Interdepartmental, Graduate**

**EALL:7387 Introduction to Online Post-Secondary Course Design and Facilitation** 3 s.h. Knowledge of distance learning and teaching at the post-secondary level; instructional design principles relevant to development of online courses.

**EALL:7475 Ph.D. ePortfolio in College Teaching** 3 s.h. Framework for connecting authentic evidence of scholarly work and teaching competencies; use of advanced web and multimedia technologies to link artifacts to ePortfolio templates.

**Education Honors Opportunity Program, Upper-Level Undergraduate and Graduate**

**EHOP:4100 Honors Seminar in Education** 2 s.h. Research in education and related professions in collaboration with a College of Education faculty member of student's choice; preparation for senior honors project.

**EHOP:4101 Senior Honors Project** 1-2 s.h. Collaboration with a faculty member on research project; written report. Prerequisites: EHOP:4100.

**Departments**

Educational Policy and Leadership Studies (p. 744)
Psychological and Quantitative Foundations (p. 759)
Rehabilitation and Counselor Education (p. 774)
Teaching and Learning (p. 793)

**Majors Offered with Other Colleges**

Science Education (p. 788)

**Certificate Programs**

Multicultural Education and Culturally Competent Practice (p. 757)
Online Teaching (p. 758)
UI REACH (p. 826)
Educational Policy and Leadership Studies

Chair
• Debora L. Liddell

Program coordinator, educational leadership
• Liz Hollingworth

Program coordinator, higher education and student affairs
• Jodi Linley

Program coordinator, schools, culture, and society
• Christine A. Ogren

Graduate degrees: M.A. in educational policy and leadership studies; Ed.S. in educational policy and leadership studies; Ph.D. in educational policy and leadership studies

Faculty: http://www.education.uiowa.edu/epls/people

Web site: http://www.education.uiowa.edu/epls/

The Department of Educational Policy and Leadership Studies offers academic programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational leadership, higher education and student affairs, and schools, culture, and society. The department also offers joint programs with other College of Education departments and with other University of Iowa colleges.

Graduate Study Areas

Educational Leadership
Study in educational leadership prepares individuals for leadership positions. In addition to graduate degree programs, the area includes principal licensure and superintendent endorsement.

Licensure
To be eligible for recommendation by the University of Iowa for licensure in Iowa as a principal or superintendent/area education agency administrator, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Education Services.

Students who hold an M.A. must satisfy all core requirements and must complete at the University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative license has specific requirements, candidates are required to plan their programs with their advisors’ approval.

Superintendent Endorsement
The superintendent endorsement curriculum is designed to prepare individuals for licensure as a school superintendent (pre-K-12) as well as for other school district leadership positions; for the chief administrator position in Iowa’s area education agencies (AEA) as well as other AEA leadership positions; and for leadership positions in state or federal departments of education and related agencies.

The superintendent endorsement requires a total of 30 s.h. of credit.

Higher Education and Student Affairs
Advanced study in higher education and student affairs draws upon diverse perspectives from varied disciplines and professional fields to analyze critical issues and policies and their effects on students, faculty, administrators, staff, and other members of the higher education community. It also explores the complex interactive relationships among institutions of higher education, the external environment, and society at large.

Graduate degree programs in higher education and student affairs prepare professionals and scholar practitioners to serve as administrators, researchers, educators, and analysts in institutions of higher and postsecondary education and in related public and private agencies. The programs provide opportunities for concentrated study in student affairs administration; higher education policy and leadership; teaching, learning, and curriculum; and cultural foundations of higher education.

Schools, Culture, and Society
Schools, culture, and society is an interdisciplinary area that enhances students’ ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in the formal social enterprise of education.

M.A.: Educational Leadership
The Master of Arts program in educational leadership requires a minimum of 36 s.h. of graduate credit and is
offered without thesis. The program prepares individuals for appointments as school principals and for positions in area education agencies and state departments of education.

**CORE REQUIREMENTS**

With the aid of an advisor, each M.A. student prepares a plan of study that includes the following core requirements.

**EDLS:6201 Foundations of School Administration** 3 s.h.
**EDLS:6236 Administration of Students with Special Needs** 3 s.h.
**EDLS:6242 Research for Effective School Leaders** 3 s.h.
**EDLS:6260 Contemporary Management Strategies for the Pre-K-12 Principal** 3 s.h.
**EDLS:6285 School and Community Relationships** 3 s.h.
**EDLS:6298 Legal Aspects of School Personnel** 3 s.h.
**EDLS:6381 Analysis and Appraisal of Curriculum** 3 s.h.
**EDLS:6383 Supervision and Evaluation** 3 s.h.

For Iowa licensure as a principal, students must meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and the following required clinical courses.

**EDLS:6400 Early Childhood Leadership Clinical** 3 s.h.
**EDLS:6401 Elementary Leadership Clinical** 3 s.h.
**EDLS:6402 Secondary Leadership Clinical** 3 s.h.
**EDLS:6403 Special Education Leadership Clinical** 3 s.h.

Students earning an M.A. without principal licensure are not required to complete the clinical courses. Instead, they complete a series of electives approved by their advisors.

**COMPREHENSIVE EXAMINATION**

The M.A. comprehensive examination for students earning principal licensure consists of a three-hour examination. Students earning an M.A. without licensure complete a six-hour comprehensive examination consisting of two three-hour written exams. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

**ADMISSION**

Applicants to the M.A. program in educational leadership must meet the admission requirements of the Graduate College and of the educational leadership program. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores, three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

**Ed.S.: Educational Leadership**

The Specialist in Education program in educational leadership requires 36 s.h. of graduate credit. The program prepares candidates to be superintendents in Iowa or to hold other district-level leadership positions in K-12 school districts. It also prepares them for appointments as area education agency chief administrators and for jobs in state or federal departments of education.

Students in the Ed.S. program must have an Iowa administration license. They obtain the superintendent endorsement (State of Iowa endorsement 171) upon completing the required Ed.S. course work.

Ed.S. students must complete 26 s.h. of course work. Many educational leadership courses are offered by distance education; see ISIS for information about courses offered during current semesters. They also must complete 10 s.h. of clinical work and must maintain an ePortfolio. The Ed.S. program culminates with the student’s presentation of the ePortfolio to his or her committee.

**ADMISSION**

Applicants to the Ed.S. program in educational leadership must meet the admission requirements of the Graduate College and of the educational leadership program. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores, three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

**Ph.D.: Educational Leadership**

The Doctor of Philosophy program in educational leadership requires a minimum of 90 s.h. of graduate credit. The program prepares scholarly professionals for leadership positions in a wide range of educational and public sector settings. Ph.D. students acquire strong backgrounds in leadership, policy, and research. They equip themselves to discover, integrate, and apply knowledge as transformational leaders.

The Ph.D. in educational leadership requires the following work.

| Common courses | 12 s.h. |
| Cognates | 9 s.h. |
| Electives | 29 s.h. |
| Concentration area courses | 12 s.h. |
| Research | 18 s.h. |

Students also complete the comprehensive examination and a dissertation, described below.

Many educational leadership courses are offered by distance education; see ISIS for information about courses offered during current semesters.

**REQUIRED RESEARCH COURSES**

All educational leadership Ph.D. students must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete a minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed at Ph.D. Research Requirements.

**COMPREHENSIVE EXAMINATION**

Ph.D. students must satisfactorily complete a written take-home comprehensive examination consisting of three parts. The first part covers the student’s major area of study, and the second covers two additional concentration areas. The third is on the student’s outside area of
study and is prepared by faculty members outside the Department of Educational Policy and Leadership Studies. The written exams are followed by an oral examination.

**DISSERTATION**

All students must write a dissertation based on an original research project in an area of educational leadership. Students must earn 10 s.h. of credit for dissertation research. The doctoral program culminates with a final oral defense of the dissertation. Students must be registered at the University of Iowa during the session in which they graduate.

**ADMISSION**

Applicants to the Ph.D. program in educational leadership must meet the admission requirements of the Graduate College and of the educational leadership program. They also must satisfy the residency requirement of two full-time (at least 9 s.h.) registrations. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores, three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

**Ed.S.: School Curriculum and Assessment Policy**

The Specialist in Education program in school curriculum and assessment policy requires 36 s.h. of graduate credit beyond the master's degree (required credit may vary depending on the student's academic background, experiences, needs, and interests).

The interdisciplinary program trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation. The program offers concentrations in policy, measurement and statistics, and curriculum and draws on course work from across the College of Education. Graduates are qualified to serve as educational leaders in the areas of school policy, assessment, and curriculum at federal, state, and district levels.

For more information on the educational leadership programs, see Department of Educational Policy and Leadership Studies.

**M.A.: Higher Education and Student Affairs**

The Master of Arts program in higher education and student affairs requires a minimum of 40 s.h. of graduate credit. The program prepares graduates for entry-level and midlevel positions in two- and four-year institutions.

Students choose one of two tracks when they apply to the program: the student affairs track or the higher education policy/administration track. Through these two tracks, the program prepares individuals for positions in advising, programming, administration, assessment, management, and policy in higher education settings.

**EXAMINATION**

Students complete a take-home written examination based on the program core and their chosen track.

**ADMISSION**

Applicants to the M.A. program in higher education and student affairs must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Examination (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, a résumé or curriculum vita, three letters of recommendation, and a statement of educational goals are required. Application deadline is December 15 for admission the following fall. Applicants who are recommended for admission are invited to come to campus on spring Campus Visit Day, during which they interview for assistantships. Full-time M.A. students must be employed at an approved site.

**Ed.S.: Higher Education and Student Affairs**

The Specialist in Education program in higher education and student affairs requires 60 s.h. of graduate credit. The program provides advanced graduate study in administration, policy studies, and specializations developed in consultation with an advisor. The Ed.S. also may be awarded upon completion of a joint program of graduate work in higher education and an academic field, or upon completion of a higher education sequence following a master's degree program in a different field. Students must meet the Graduate College residency requirement.

**REQUARED COURSES**

The Ed.S. program of study must include the following:

- at least 18 s.h. in professional education and related fields;
- at least 28 s.h. in the student's specialization area;
- 10 s.h. of electives, all approved by a student's advisor; and
- 4 s.h. of research credit in EPLS:7395 Educational Specialist Research.

Depending on the student's career goals, the program may include an appropriate structured and supervised internship, determined in consultation with the advisor.

**COMPREHENSIVE EXAMINATION**

A culminating experience is required of all students, the nature of which will be contracted with the advisor. An oral examination of the culminating experience may be required.

**RELATED FIELD**

Students majoring in another field who want to complete a related field in higher education and student affairs should consult with a higher education and student affairs faculty member early in their study. Plans of study are developed individually.

**ADMISSION**

Applicants to the Ed.S. program in higher education and student affairs must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Exam (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.
Ph.D.: Higher Education and Student Affairs

The Doctor of Philosophy program in higher education and student affairs requires 90 s.h. of graduate credit. The program prepares faculty and scholar practitioners for leadership positions in student affairs and academic administration and for positions as graduate faculty members, leaders in conducting research about college students and higher education, policy analysts in postsecondary institutions and in public or private agencies, and teachers and academic leaders at two-year and four-year colleges.

The program integrates the academic experience with the cocurricular learning experiences of students and studies the outcomes of both. The curriculum is organized around three core areas: higher education administration and policy; teaching, learning, and the college experience; and diversity, equity, and foundations of higher education. Students take courses in each area and specialize in one.

The higher education administration and policy area studies organizational policy, leadership, and change. It helps administrators develop expertise in planning, evidence-based decision making, and effective leadership and organizational management. Individuals interested in enrollment management and institutional research should find this area appealing.

The teaching, learning, and the college experience area studies college teaching and learning and the ways in which college affects students. It enables educators to become more effective in designing, implementing, and evaluating powerful curricular and cocurricular initiatives. It should appeal to teaching faculty, institutional researchers, faculty development professionals, and leaders of student success initiatives.

The diversity, equity, and foundations of higher education area helps educators prepare to lead social change within their organizations and to facilitate difficult dialogues designed for interpersonal growth and development. It should appeal to chief diversity officers and other administrators called upon to develop curricula around social justice and to individuals interested in the empirical study of diversity in higher education.

The 90 s.h. required for the Ph.D. includes a substantive common core (24 s.h.), a research core (18 s.h.); a specialization (12 s.h.); graduate electives, including transfer course work (24 s.h.); and dissertation research (12 s.h.).

To fulfill the Graduate College residency requirement, doctoral students must enroll for a minimum of 9 s.h. in each of two semesters or a minimum of 6 s.h. in each of three semesters.

SUBSTANTIVE COMMON CORE

The substantive common core provides foundational understanding of higher education and general knowledge that all students must master, regardless of their career goals and interests. All courses in the core (24 s.h.) must be completed at the University of Iowa.

- EPLS:6216 Finance in Higher Education 3 s.h.
- EPLS:6220 History of Higher Education 3 s.h.
- EPLS:6221 The College Curriculum 3 s.h.

RESEARCH CORE

The research core (18 s.h.) assures that the student achieves scholarly autonomy and initiative.

Basic Research Methods (6 s.h.)

This course is required.

- EPLS:6206 Research Process and Design 3 s.h.

One of these:

- EPLS:7373 Qualitative Research Design and Methods (strongly recommended)
- EDTL:7070 Introduction to Qualitative Methods in Literacy Research
- PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods)
- RCE:7338 Essentials of Qualitative Inquiry 3 s.h.

Statistics/Linear Regression (9 s.h.)

All of these (taken in this order):

- EPLS:5240 Topics in Education (when topic is data coding and management) 2 s.h.
- PSQF:6243 Intermediate Statistical Methods 4 s.h.
- EPLS:6370 Quantitative Methods for Policy Analysis 3 s.h.

Advanced/Specialized Research Methods (3 s.h.)

Students should work with their advisor to choose one course appropriate to their dissertation design.

Qualitative Methods

- EPLS:5240 Topics in Education (when topic is introduction to historical methodology) 3 s.h.
- EPLS:7392 Mixed Methods Research 3 s.h.
- EDTL:7071 Critical Discourse Analysis in Educational Research 3 s.h.
- EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3 s.h.
- EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h.
- RCE:7444 Qualitative Research in the Multicultural Context 3 s.h.

Another comparable research methods course approved by advisor and higher education and student affairs program

Quantitative Methods

- EPLS:5240 Topics in Education (when topic is multilevel modeling) 3 s.h.
- EPLS:6209 Survey Research and Design 3 s.h.
- POLI:7003 Advanced Methodology 4 s.h.
- PSQF:6246 Design of Experiments 4 s.h.
SPECIALIZATION AREA
The specialization gives students the opportunity to develop expertise in one area. Most students complete the common core before declaring one of the following three specializations: higher education administration and policy; teaching, learning, and the college experience; or diversity, equity, and foundations of higher education. Each specialization has its own course requirements and options.

GRADUATE ELECTIVES
Students choose 24 s.h. of elective graduate course work in consultation with their advisors. A student and his or her advisor may determine that some of the graduate elective work may be drawn from appropriate previous graduate course work that complements other aspects of the student's doctoral program.

COMPREHENSIVE EXAMINATION
The Ph.D. comprehensive examination consists of a set of take-home questions with a limited time to respond. Questions are based on the substantive core and a student's concentration. The written examination is followed by an oral examination.

DISSERTATION
The dissertation is a major research study planned in collaboration with the student's advisor. Students must write a formal dissertation proposal and submit it for approval, first to their advisor and then to the members of their doctoral committee. Students and their advisors determine when the proposal is complete. Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation.

Students must be registered at the University of Iowa each fall and spring semester from the semester in which they complete their comprehensive examination through the semester in which they defend their dissertation and graduate.

ADMISSION
Applicants to the Ph.D. program in higher education and student affairs must meet the admission requirements of the Graduate College. Each applicant must submit a personal statement explaining his or her professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; a résumé or curriculum vita, and scores on the Graduate Record Exam (GRE) General Test. Application deadline is December 1 for admission the following fall.

For more information on higher education and student affairs programs, see Department of Educational Policy and Leadership Studies.

M.A.: Schools, Culture, and Society
The Master of Arts program in schools, culture, and society requires a minimum of 32 s.h. of graduate credit and is offered without thesis. The program develops students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in education.

M.A. students complete at least 24 s.h. in schools, culture, and society courses in three disciplinary areas: philosophy, history, and sociology. They earn 12 s.h. in one of the disciplinary areas and 6 s.h. in each of the other two areas. The remaining 8 s.h. of course work must be in a concentration area appropriate to the student's career and academic goals.

Students must satisfactorily complete a six-hour comprehensive examination covering the program's three disciplinary areas and the student's concentration area. The examining committee may elect to hold an oral examination after the exam.

ADMISSION
Applicants to the M.A. program in schools, culture, and society must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful. Each applicant must submit a personal statement explaining his or her professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; a résumé; and scores on the Graduate Record Exam (GRE) General Test. Application deadline is February 15 for admission the following fall.

Ph.D.: Schools, Culture, and Society
The Doctor of Philosophy program in schools, culture, and society requires a minimum of 90 s.h. of graduate credit. The program develops students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in education.

Ph.D. students complete a common core (12 s.h.), a disciplinary foundation (12 s.h.), an interdisciplinary focus (9 s.h.), cognate courses (27 s.h.), research tools (18 s.h.), and a dissertation (12 s.h.).

COMMON CORE
All Ph.D. students in schools, culture, and society must complete all four courses in the common core (12 s.h.).

EPLS:5102 History of American Education 3 s.h.
EPLS:5126 Twentieth-Century Educational Movements 3 s.h.
EPLS:5130 Sociology of Education 3 s.h.
EPLS:5156 Philosophies of Education 3 s.h.
DISCIPLINARY FOUNDATION
Students choose one of three disciplinary foundation areas: sociology, history, or philosophy. They complete 12 s.h. in the area by taking three courses offered by the Department of Educational Policy and Leadership Studies (prefix EPLS) and one course offered by the corresponding department in the College of Liberal Arts and Sciences: sociology (prefix SOC), history (prefix HIST), or philosophy (prefix PHIL). The following lists provide examples of courses appropriate for the three disciplinary foundation areas.

Sociology
- EPLS:5131 Race, Class, and Gender Inequalities in Education 3 s.h.
- EPLS:5134 Education and the World of Work 2-3 s.h.
- EPLS:5142 Sociology of Higher Education 3 s.h.
- EPLS:5210 Education and Social Change 2-3 s.h.
- EPLS:5240 Topics in Education (when topic is sociology of education) arr.

History
- EPLS:5123 History of Ethnic/Minority Education 2-3 s.h.
- EPLS:5240 Topics in Education (when topic is history of education) arr.
- EPLS:6220 History of Higher Education 3 s.h.
- EPLS:6237 History of the Teaching Profession 3 s.h.
- EPLS:6238 Gender and Education in Historical Perspective 3 s.h.

Philosophy
- EPLS:5155 Critical Thinking 3 s.h.
- EPLS:5157 Ethics in Education 3 s.h.
- EPLS:5158 John Dewey and Education 2-3 s.h.
- EPLS:5240 Topics in Education (when topic is philosophy of education) arr.
- EPLS:6358 Seminar in the Philosophy of John Dewey 3 s.h.

INTERDISCIPLINARY FOCUS
Students choose one of two interdisciplinary focus areas: diversity and equity, or policy contexts. They take three courses in that area (total of 9 s.h.) chosen from the corresponding list below. At least two of the courses (6 s.h.) must be from outside their disciplinary foundation area (see "Disciplinary Foundation" above).

Diversity and Equity
- EPLS:5104 Education in the Third World 2-3 s.h.
- EPLS:5123 History of Ethnic/Minority Education 2-3 s.h.
- EPLS:5154 Education, Race, and Ethnicity 2-3 s.h.
- EPLS:5157 Ethics in Education 3 s.h.
- EPLS:6237 History of the Teaching Profession 3 s.h.
- EPLS:6238 Gender and Education in Historical Perspective 3 s.h.
- EPLS:6275 Diversity and Equity in Higher Education 3 s.h.

A relevant course from another department, with advisor’s approval

Policy Contexts
- EPLS:5134 Education and the World of Work 2-3 s.h.
- EPLS:5157 Ethics in Education 3 s.h.
- EPLS:5210 Education and Social Change 2-3 s.h.
- EPLS:6225 Introduction to Public Policymaking 3 s.h.
- EPLS:6228 Policy Design and Implementation 2-3 s.h.
- EPLS:6237 History of the Teaching Profession 3 s.h.
- EPLS:6270 Policy and Politics of Leadership 3 s.h.

One relevant course from another department, with advisor’s approval

COGNATE COURSES
Students must complete at least 27 s.h. of additional graduate-level course work in a field or fields that are relevant to their scholarly and professional goals. Students commonly complete some or all of the 27 s.h. with relevant graduate-level course work from other University of Iowa programs or with approved transfer credit from other institutions. A student’s advisor, in consultation with other faculty members in the program, determine which course work to accept.

RESEARCH TOOLS
Students who have taken courses that may be equivalent to EPLS:6206 Research Process and Design, EPLS:7373 Qualitative Research Design and Methods, PSQF:6243 Intermediate Statistical Methods, or SOC:6170 Introduction to Sociological Data Analysis may submit the course syllabus to their advisor. The advisor will share the syllabus with a committee of the schools, culture, and society faculty, who will determine whether the alternate course work meets the benchmarks of the required course. If so, the student may substitute an advanced and/or specialized course for the basic or intermediate course.

All students must take at least 18 s.h. in research methods as part of their schools, culture and society Ph.D. program. Basic Research Methods (6 s.h.)
This course is required.
- EPLS:6206 Research Process and Design 3 s.h.

One of these:
- EPLS:7373 Qualitative Research Design and Methods (strongly recommended) 3 s.h.
- EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3 s.h.
- PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods) 3 s.h.
- RCE:7338 Essentials of Qualitative Inquiry 3 s.h.

Intermediate Statistics and Linear Regression (9 s.h.)
All of these:
- EPLS:5240 Topics in Education (when topic is data coding and management) 2 s.h.
- EPLS:6370 Quantitative Methods for Policy Analysis 3 s.h.
- PSQF:6243 Intermediate Statistical Methods 4 s.h.

Advanced and/or Specialized Research Methods (3 s.h.)
Students choose one course appropriate to their dissertation design in consultation with their advisor.
the dissertation is successfully defended and the Ph.D. is awarded.

**ADMISSION**

Applicants to the Ph.D. program in schools, culture, and society must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful. Each applicant must submit a personal statement explaining his or her professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; and scores on the Graduate Record Exam (GRE) General Test. Admission is for fall semester entry. Application deadline is January 15 for admission the following fall.

For more information on schools, culture, and society programs, see Department of Educational Policy and Leadership Studies.

### Courses

#### Lower-Level Undergraduate

**EPLS:1029 First-Year Seminar**
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**EPLS:2098 The Student Affairs Profession**
3 s.h.
Introduction to field of student affairs in context of higher education; focus on foundations of profession, including a brief history of field, professional associations, institutional differences, professional and ethical standards, functional areas in higher education, student learning and developmental theory, overview of graduate preparation, and current topics.

#### Upper-Level Undergraduate and Graduate

**EPLS:3000 Foundations of Education**
3 s.h.
Overview of American education, preschool through secondary; aims, history, philosophy of education; professional ethics, legal responsibilities; school curriculum, organization, finance, school law, political and social issues.

**EPLS:4081 ePortfolio Production**
1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as PSQF:4081, EALL:4081, EDTL:4081, RCE:4081.

**EPLS:4110 Administration and Policy in Gifted Education**
2 s.h.

---

Students that want to enroll in a course that is not listed above, and wish to receive credit toward their program requirements, must obtain prior approval from their advisor and from the schools, culture, and society program.

### COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three take-home exams, each with a maximum of 12 pages. The first exam covers the common core, the second covers the student's interdisciplinary focus area, and the third covers the student's disciplinary foundation area.

### DISSERTATION

After completing the comprehensive examination, Ph.D. students write a formal dissertation prospectus and submit it for approval first to their dissertation advisor and then to the members of their dissertation committee. The dissertation prospectus must be formally approved by the dissertation advisor and the dissertation committee before a student may begin his or her dissertation research.

Students must earn 12 s.h. of dissertation research credit. The dissertation process culminates with a final oral defense of the dissertation. Students must register at the University of Iowa each fall and spring semester until
Policy, administrative, evaluation issues in developing and maintaining gifted programs in a school setting; participants develop gifted program and policies for a school; for school executives and coordinators of gifted programs.

EPLS:4111 Evaluation of Gifted Programs 1 s.h.
Fundamentals of program evaluation essential for exemplary gifted programs.

EPLS:4113 Staff Development for Gifted Programs 1 s.h.
Planning, content, and delivery of staff development regarding gifted students and their needs.

EPLS:4150 Leadership and Public Service I 3 s.h.
Preparation for providing public service to a local community; leadership skills for effective mentoring of children in grades 6-10.

EPLS:4151 Leadership and Public Service II 2 s.h.
Preparation to provide leadership and public service to a local community agency; being a leader and a public servant in the context of societal oppressions such as racism, sexism, able-bodiedism; part of the human relations minor. Prerequisites: EPLS:4150.

EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
Influence of social factors such as discrimination, diversity, equity, racism, sexism, and ethnic and socioeconomic pluralism on American schools and classrooms; for teacher education candidates. GE: Values, Society, and Diversity.

Graduate

EPLS:5100 Issues and Policies in Higher Education 3 s.h.
Development of the idea of a university; selected functions, issues, policies of American higher education.

EPLS:5102 History of American Education 3 s.h.
Purposes of public education, diversity, and control of schooling from a historical perspective; emphasis on conflicting interpretations of pivotal events and educational movements; connections between educational policies and larger historical developments.

EPLS:5104 Education in the Third World 2-3 s.h.
Educational implications of various development issues, including role of media, and multinational corporations and foreign aid; educational dilemmas currently facing Third World governments.

EPLS:5116 Characteristics of Effective Instruction: Assessment for Learning 3 s.h.
Professional development sequence designed for practicing teachers to develop conceptual knowledge and understanding of Assessment for Learning Implementation and practice, a key component of effective instruction; training modules are aligned with the Iowa Department of Education’s "Characteristics of Effective Instruction," with videos of best practice across the state.

EPLS:5123 History of Ethnic/Minority Education 2-3 s.h.
Educational histories of American ethnic and minority groups; comprehensive understanding of American educational history, context for contemporary educational policy discussions.

EPLS:5126 Twentieth-Century Educational Movements 2-3 s.h.
Current educational policy debates concerning diversity and equity, historical roots of these policies; historical context for 20th-century equal education opportunity movements.

EPLS:5130 Sociology of Education 3 s.h.
Effects of school and school organization on educational outcomes; course-taking patterns and tracking, desegregation, differences in school sector; focus on entire span of student's academic career; examination of school and organizational effects at the primary, secondary, and postsecondary levels of education. Same as SOC:5130.

EPLS:5131 Race, Class, and Gender Inequalities in Education 3 s.h.
Role of ascribed characteristics (e.g., race, class, gender) on educational opportunities and outcomes; achievement gaps, school desegregation, social and cultural capital, peer influence, family attributes, neighborhood influence, influence of significant others, course-taking patterns, and educational destinations. Same as SOC:5165.

EPLS:5134 Education and the World of Work 2-3 s.h.
Relationship between education and work in individual and organizational behavior, and between educational and economic systems; economics, psychology, sociology, education.

EPLS:5142 Sociology of Higher Education 3 s.h.
Sociological approach to study of higher education; issues of inequality and stratification in higher education; focus on relationship between higher education and larger economic and demographic processes; college access, college destinations, attainment, and returns to a college degree. Same as SOC:5680.

EPLS:5154 Education, Race, and Ethnicity 2-3 s.h.
Role of education in ethnic and racial groups in contemporary and/or historical context. GE: Values, Society, and Diversity.

EPLS:5155 Critical Thinking 3 s.h.
Formal and informal logic and probabilistic reasoning; focus on construction and critical analysis of arguments; introduction for students planning research in social foundations.

EPLS:5156 Philosophies of Education 2,3,5 s.h.
Principal educational philosophers and philosophies that have influenced Western education; emphasis on how philosophical ideas and conflicts have shaped the educational scene.

EPLS:5157 Ethics in Education 3 s.h.
Major theories of the nature of ethical action and of value judgment; theoretical accounts related to the practical decision making contexts of teaching.
EPLS:5158 John Dewey and Education 2-3 s.h.
Dewey's philosophy of instrumentalism, with emphasis on his theories of knowledge, valuation, aesthetics, especially as applied to educational theory and practice.

EPLS:5165 Introduction to Program and Project Evaluation 3 s.h.
Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as PSQF:5165.

EPLS:5176 Demographic Techniques for Educational Research 3 s.h.
Basic demographic concepts, techniques, resources; life table analysis, enrollment projections, demographic measurement, shift-share analysis.

EPLS:5195 Research in Cross-Cultural Settings 3 s.h.
Cultural, psychological, logistical issues in conducting research in foreign settings; development of a research plan, recent debates in ethnographic research literature.

EPLS:5210 Education and Social Change 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as SOC:5810.

EPLS:5230 Alternative Models of Schooling 2-3 s.h.
Popular alternatives to K-12 and postsecondary education; homeschooling, boarding schools, charter schools, magnet schools; construction of a conceptual framework for understanding alternatives.

EPLS:5240 Topics in Education arr.
Seminar for intensive study of one problem, issue, or work field.

EPLS:5245 The American Professoriate 3 s.h.
Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.

EPLS:5247 Multiculturalism in Higher Education 3 s.h.
Theory and application of multicultural competency in higher education.

EPLS:5250 Introduction to Student Affairs 3 s.h.
Foundations of student affairs work; overview of institutional cultures, legal issues, ethical principles, standards of practice in student affairs.

EPLS:5251 College Students and Their Environments 3 s.h.
Characteristics of college students and issues they face; students' institutional, social, cultural environments; impact of environments on student learning, development.

EPLS:5252 Administration of Higher Education and Student Affairs 3 s.h.
Administrative structures and processes in higher education settings. Requirements: higher education and student affairs major.

EPLS:5253 Assessment in Higher Education and Student Affairs 3 s.h.
Theories, practices, and issues relevant to assessment of student outcomes and institutional effectiveness in higher education; basic overview of research, assessment, and evaluation; elements of assessment design, including methods for data collection and analysis; relevant ethical and political dilemmas; practical assessment activities. Requirements: M.A. standing in higher education and student affairs program.

EPLS:5278 Helping Skills in Student Affairs Work 3 s.h.
Development of ability to identify, understand, and intentionally apply the active attending and influencing skills; readings and class presentations.

EPLS:6201 Foundations of School Administration 3 s.h.
Organization and administration of American public education; principles and concepts of leadership and organizations; socioeconomic, political, and professional factors relating to education and school administration.

EPLS:6202 Information Resources 3 s.h.
Research strategies, information literacy skills, University of Iowa Libraries and other sources for research.

EPLS:6206 Research Process and Design 3 s.h.
Research process, with emphasis on fundamentals of experimental design, internal and external validity, correlational designs, and statistical inference.

EPLS:6209 Survey Research and Design 3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: EPLS:6206 or PSQF:4143. Same as PSQF:6209.

EPLS:6216 Finance in Higher Education 3 s.h.
Theory, research, policy, and practice related to public and private funding of higher and postsecondary education.

EPLS:6217 Theory and Practice of Leadership 2-3 s.h.
Theory-based literature and critiques of leadership as applied to educational institutions.

EPLS:6218 The Law and Higher Education 3 s.h.
The role of law as it affects postsecondary institutions; analysis of case law in specific areas of concern to administrators, faculty, staff, students.

EPLS:6220 History of Higher Education 3 s.h.
History of postsecondary education in the United States; emphasis on conflicting interpretations of pivotal developments; consideration of access, curriculum, student life, academic freedom, role of universities in society, and balance of teaching, research and service from a historical perspective.

Facilitate connections of students and families to health and social services that support a focus on learning as a district level leader in a school district; collaboratively establish a culture that welcomes and honors families and community and seeks ways to engage them in students learning; AEA structure, compliance and regulatory functions including special education.

**EPLS:6329 Legislative Summit**
1 s.h.
Collaborate with families and community members, respond to diverse community interests and needs, and mobilize community resources as a district level leader in a school district; work with legislators, build advocacy groups in a community, engage stakeholders, how to lobby legislators and meet with local senate and house representatives to participate in lobbying.

**EPLS:6332 College Student Psychosocial and Identity Development**
3 s.h.
Theoretical models of psychosocial and identity development in college students; applications to student affairs work.

**EPLS:6333 Practicum**
arr.
Small-scale research projects; supervised experience in planning, design, management, analysis, reporting of research activities; assignments to current and personal faculty research projects; student assumes major responsibility.

**EPLS:6334 College Student Learning, Cognitive, and Moral Development**
3 s.h.
Learning and development of college students; theoretical models of learning, cognitive development, moral development; applications to student affairs work.

**EPLS:6336 Impact of College on Students**
3 s.h.
Introduction to literature; career and economic returns, values and attitudes, learning and cognitive development, assessment and methodological issues of studying college outcomes. Prerequisites: EPLS:6206.

**EPLS:6358 Seminar in the Philosophy of John Dewey**
3 s.h.
John Dewey and education; extensive reading of the works of Dewey and of contemporary authors who comment on, interpret, or employ Deweyan philosophy. Prerequisites: EPLS:5158.

**EPLS:6370 Quantitative Methods for Policy Analysis**
3 s.h.
Methodological strategies for quantitative research; analysis of secondary data to investigate educational issues and policies; recoding variables, summation scaling and factor analysis, missing data, sample design and survey estimation, model building; implementation of linear and binary regression, regression diagnostics; hands-on experience conducting statistical analysis of social data. Prerequisites: PSQF:4143 and PSQF:6243.

**EPLS:6381 Analysis and Appraisal of Curriculum**
3 s.h.
Comprehensive investigation of systematic procedures and resources for identifying and evaluating essential features and constituent elements of a given school district's curricular offering; state and federal requirements of the curricular program; for persons in administration, curriculum, and supervision programs or positions.

**EPLS:6383 Supervision and Evaluation** 3 s.h.
Data collection and management skills; data-driven leadership; coaching and feedback techniques; teacher quality legislation; research and best practice regarding teacher evaluation, supervision; teaching standards.

**EPLS:6400 Early Childhood Leadership Clinical** 3 s.h.
Classroom instruction and supervised experience with problems in early childhood educational administration; organization, planning, evaluation, decision making.

**EPLS:6401 Elementary Leadership Clinical** 3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

**EPLS:6402 Secondary Leadership Clinical** 3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

**EPLS:6403 Special Education Leadership Clinical** 3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

**EPLS:6404 Central Administration Clinical** 3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

**EPLS:6415 Orientation to the Superintendency: Clinical** 2 s.h.
Clinical experience aligned with course topics and assignments in the human resources leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

**EPLS:6417 Operational Leadership Clinical** 1 s.h.
Clinical experience aligned with course topics and assignments in the operational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

**EPLS:6419 Human Resources Leadership Clinical** 2 s.h.
Clinical experience aligned with course topics and assignments in the human resources leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

**EPLS:6425 Organizational and Educational Leadership Clinical** 1 s.h.
Clinical experience aligned with course topics and assignments in the organizational and educational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

**EPLS:7291 Administration of Educational Programs and Personnel** 3 s.h.
Personnel and program planning examined against statements of educational purpose; interrelationships and internal consistencies of program and staff administration from perspectives of philosophy, psychology, learning theory, sociology, curriculum theory.

**EPLS:7367 Seminar: Current Issues in Special Education Administration** arr.
New developments in administration; new content each year. Prerequisites: EPLS:6236.

**EPLS:7373 Qualitative Research Design and Methods** 3 s.h.
Theory and practice of qualitative research design and methodology; exploratory field experience in collection and analysis of data; individual and focus group interviews, participant observation. Requirements: Ph.D. standing.

**EPLS:7380 Practicum in College Teaching** arr.
Supervised college teaching experience in courses related to major academic areas; collaboration with faculty course instructors.

**EPLS:7385 Teaching and Learning in Higher Education** 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as PSQF:7385, GRAD:7385, EDTL:7385, RCE:7385.
EPLS:7392 Mixed Methods Research  3 s.h.
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research; extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EDTL:7410.

EPLS:7395 Educational Specialist Research  arr.
Individual instruction in the design, research, and writing of a research project of significant quality for upper-level graduate work.

EPLS:7431 Seminar: Research on College Students  3 s.h.
College student learning and development, outcomes, persistence. Requirements: enrollment in educational policy and leadership studies Ph.D. program.

EPLS:7432 Multicultural Initiatives  3 s.h.
Impact of culture, race, ethnicity, and intersection of identity in higher education, student affairs, and community agency settings; knowledge, skills, and competencies needed by teachers, student affairs professionals, social workers, counselors, and educational administrators to facilitate individual empowerment through relationships; focus on different ways to design multicultural initiatives to various professional work settings to promote diversity. Requirements: Ph.D. standing or advanced-level M.A. standing. Recommendations: introductory course on issues of race, culture, gender and/or any course on sociopolitical issues or structural oppression strongly recommended.

EPLS:7433 Current Issues in Higher Education and Student Affairs  3 s.h.
Current issues related to higher education; opportunity to clarify perspectives; review of literature in a particular area of interest; readings, class discussions, independent research, consultations with professionals in the field, student presentations. Requirements: higher education and student affairs Ph.D. standing.

EPLS:7444 Advanced Practicum in Student Affairs  arr.
Supervised work experience in student affairs settings.

Supervision of research, design, and writing of Ph.D. thesis; individual instruction.
Multicultural Education and Culturally Competent Practice

Academic coordinator
- Diana Sproles

Graduate certificate: multicultural education and culturally competent practice
Web site: http://ogi.grad.uiowa.edu/me-ccp-information

The certificate program in multicultural education and culturally competent practice helps students develop culturally competent practice as they continue in their academic and professional careers. The program raises awareness of how worldview, values, beliefs, and biases shape the ways in which individuals and groups interact, interpret, and learn from each other. It is based on the need for a proactive and sustained approach to educational reform, advocacy, and social justice.

Graduate Program of Study
- Certificate in Multicultural Education and Culturally Competent Practice

Certificate
The Certificate in Multicultural Education and Culturally Competent Practice requires a minimum of 15 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 in all University of Iowa course work for the certificate. Students may count 6 s.h. of work for their major program of study toward the certificate.

The certificate program is open to students who are enrolled in the University of Iowa Graduate College or who hold an undergraduate degree. Students must register on the certificate web site.

The Certificate in Multicultural Education and Culturally Competent Practice requires the following course work.

Online Teaching

Coordinator

• Kathy L. Schuh

Graduate certificate: online teaching
The growth of online teaching presents a need to address course quality, instructor training, assessment of teaching effectiveness and student learning, and retention. The Certificate in Online Teaching is an online graduate program designed to prepare students for the realities of online teaching and to help them expand their career options.

Graduate Program of Study

• Certificate in Online Teaching

The Certificate in Online Teaching is administered by the Department of Psychological and Quantitative Foundations (p. 759) and is granted by the Graduate College.

Certificate

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.

The certificate program develops students' skills in using technology to solve instructional problems associated with distance and time. The certificate's online format uses the techniques and approaches that the program teaches.

The certificate requires the following course work.

Psychological and Quantitative Foundations

Chair
- Timothy N. Ansley

Undergraduate minor: educational psychology
Graduate degrees: M.A. in psychological and quantitative foundations; Ed.S. in psychological and quantitative foundations; Ph.D. in psychological and quantitative foundations

Faculty: http://www.education.uiowa.edu/pq/people
Web site: http://www.education.uiowa.edu/pq

The Department of Psychological and Quantitative Foundations offers programs in four areas: counseling psychology, educational measurement and statistics, educational psychology, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills necessary to function effectively in settings that require the application of psychological and quantitative principles; and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The department's degree programs incorporate both goals, but the Master of Arts and Specialist in Education programs emphasize the first goal, and the Doctor of Philosophy programs emphasize the second.

Undergraduate Program of Study
- Minor in educational psychology

In addition to offering a minor for undergraduates, the department offers a course that is approved for the Quantitative or Formal Reasoning area of the College of Liberal Arts and Sciences General Education Program (p. 313), PSQF:1020 Elementary Statistics and Inference.

Minor

The minor in educational psychology is open to all College of Liberal Arts and Sciences students enrolled in an undergraduate degree program. The minor provides an enriched background in educational psychology, education testing, and research methods in education. It does not lead to certification for public school teaching. Students earning the minor select a department advisor, who helps them choose appropriate course work.

The minor in educational psychology requires 15 s.h., including 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit must be approved in order to count toward the minor.

Course work for the minor must include 15 s.h. selected from the following list.

- PSQF:1075 Educational Psychology and Measurement 3 s.h.
- PSQF:4106 Child Development 3 s.h.
- PSQF:4111 Human Motivation 3 s.h.
- PSQF:4120 Psychology of Giftedness 3 s.h.
- PSQF:4130 Early Adolescent Development 3 s.h.
- PSQF:4133 The Adolescent and Young Adult 3 s.h.
- PSQF:4134 Parent-Teacher Communication 1-3 s.h.
- PSQF:4143 Introduction to Statistical Methods 3 s.h.
- PSQF:4150 Introduction to Educational Measurement 3-4 s.h.
- PSQF:5165 Introduction to Program and Project Evaluation 3 s.h.
- PSQF:6203 Tools and External Representations in Learning Processes 3 s.h.
- PSQF:6205 Design of Instruction 3 s.h.

Contact the Office of Education Services for more information about the minor.

Graduate Programs of Study
- Master of Arts in psychological and quantitative foundations
- Specialist in Education in psychological and quantitative foundations
- Doctor of Philosophy in psychological and quantitative foundations

The department offers graduate degree programs in four major areas within psychological and quantitative foundations:

- Counseling psychology (offered in the M.A. and Ph.D.);
- Educational measurement and statistics (offered in the M.A. and Ph.D.);
- Educational psychology (offered in the M.A. and Ph.D.); and
- School psychology (offered in the Ed.S. and Ph.D.).

Each program is described below.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

M.A.: Counseling Psychology

(Hong Kong)

The Master of Arts in counseling psychology program is held in Hong Kong. It provides students with education in the theories, research, and scholarship about the principles and foundational knowledge in counseling psychology. Students learn relevant psychological interventions, strategies, and remediation to work with people in order to effectively solve problems, respond to client situations, and plan for the future. Since there is no supervised practicum component to this degree, students who graduate with the M.A. are not eligible to practice counseling psychology or be licensed in the United States. However, students will be qualified to apply for doctoral programs in professional psychology and counseling fields, such as clinical counseling, school psychology, counselor education, rehabilitation counseling, and school counseling.

The M.A. in counseling psychology requires a minimum of 34 s.h. of graduate credit with no thesis. Prerequisites for some of the required courses may mean that students will need to complete additional course work. Students are expected to maintain a minimum g.p.a. of 2.75 in all work for the degree. Courses are taught year round, and each course covers one month of instruction and one month of
no instruction. Students can complete their M.A. in at least 24 months.

The following course work is required.

</tbody>
</table>

**ADMISSION**

Students with interest in the program must have a minimum g.p.a. of 3.00 on previous college course work and a Test of English as a Foreign Language (TOEFL) score of 81 (Internet-based test) or 550 or higher on the paper-based test.

All students must submit an application for admission through the Office of Admissions, two letters of recommendation, a professional résumé (CV), a personal statement detailing the reasons for seeking admission to the program, and a writing sample.

Faculty in the counseling psychology program will review applications and make the decisions on who is admitted to the program. Students are admitted to the program in the fall, spring, and summer sessions.

**Ph.D.: Counseling Psychology**

The Doctor of Philosophy program in counseling psychology requires the following work.

**RESEARCH REQUIREMENT**

The following courses are required.

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSQF:6243</td>
<td>Intermediate Statistical Methods</td>
<td>4 s.h.</td>

</table>

**BASIC PSYCHOLOGY**

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

**COUNSELING PSYCHOLOGY CORE**

The following courses are required.

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>

<td>3 s.h.</td>
</tr>
</tbody>
</table>

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum’s site is typically University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling
psychology faculty. Students must successfully complete one semester of PSQF:6299 M.A. Project: The Portfolio before enrolling in PSQF:7453 Advanced Practicum in Counseling Psychology.

ELECTIVES
Elective courses are determined in collaboration with the major advisor.

INTERNISHIP
Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all or almost all required course work, satisfactory progress toward completion of the portfolio requirement, and successful completion of practicum requirements. Internships usually require geographic relocation.

COMPREHENSIVE EXAM AND DISSERTATION
Comprehensive examinations are written in counseling psychology ethics and issues. The comprehensive examination is structured as a component of the portfolio review. For more information, contact the program coordinator.

The dissertation research study is planned in collaboration with the doctoral student's major advisor. Dissertation credit ranges from 12 to 15 s.h.

ADMISSION
Applicants to the Ph.D. program in counseling psychology must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial course work in psychology; a Graduate Record Examination (GRE) General Test verbal score of 152 or higher, quantitative score of 151 or higher, and analytical writing score of 3.5 or higher; and previous research and counseling experience.

Application materials must include a Graduate College application form; official transcripts of all previous college work; an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required); a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology; and three letters of recommendation from individuals qualified to assess the applicant's potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between five and eight students each year.

Students begin the program in fall. Application deadline is December 1; admission decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection.

M.A.: Educational Measurement and Statistics
The Master of Arts program in educational measurement and statistics requires a minimum of 30 s.h. of graduate credit with thesis and 32 s.h. of graduate credit without thesis. The program provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.

All M.A. students must complete a core of courses (approximately 26 s.h.) that includes a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

Thesis students complete 2 s.h. of additional course work beyond the core and earn 2-4 s.h. of thesis credit. Nonthesis students complete 6 s.h. of additional course work beyond the core.

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

ADMISSION
Applicants to the M.A. program in educational measurement and statistics must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

Ph.D.: Educational Measurement and Statistics
The Doctor of Philosophy program in educational measurement and statistics requires a minimum of 90 s.h. of graduate credit. The program prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.

During the first year of graduate study, a student and his or her advisor plan a program of study appropriate for the student's interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research
methodology, and educational psychology. Work in other University of Iowa departments is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education.

All students are required to develop familiarity with computer programming techniques and equipment.

Students who enter the program without completing an M.A. thesis must complete a substitute project before taking the Ph.D. comprehensive examinations.

After completing most of their course work, students take the comprehensive examination, which typically consists of three 3-hour written examinations on educational measurement, applied statistics, and program evaluation, or approved substitute areas, such as educational psychology or mathematical statistics, in which a student has completed at least 9 s.h. of course work. In place of one written examination, the student’s committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Work for the Ph.D. concludes with the dissertation, which is included in the 90 s.h. required for the degree.

**RESEARCH REQUIREMENT**

One of these:

- **PSQF:6220 Quantitative Educational Research** 3 s.h. Methodologies
  An equivalent course comparable in content and level of rigor, such as EALL:5150

**Quantitative Requirements**

This course:

- **PSQF:6243 Intermediate Statistical Methods** 4 s.h.

Two of these:

- **PSQF:6244 Correlation and Regression** 4 s.h.
- **PSQF:6246 Design of Experiments** 4 s.h.
- **PSQF:6247 Nonparametric Statistical Methods** 3 s.h.
- **PSQF:6249 Factor Analysis and Structural Equation Models** 3 s.h.
- **PSQF:6252 Introduction to Multivariate Statistical Methods** 3 s.h.
- **EPLS:5176 Demographic Techniques for Educational Research** 3 s.h.
- **EPLS:6206 Research Process and Design** 3 s.h.
- **EPLS:6209 Survey Research and Design** 3 s.h.
- **EPLS:6370 Quantitative Methods for Policy Analysis** 3 s.h.

**Qualitative Requirements**

The following course may be taken on a non-graded basis with approval of a student’s program and advisor.

One of these:

- **PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods)** 3 s.h.
- **EDTL:7070 Introduction to Qualitative Methods in Literacy Research** 3 s.h.
- **EPLS:7373 Qualitative Research Design and Methods** 3 s.h.
- **RCE:7338 Essentials of Qualitative Inquiry** 3 s.h.
  An equivalent course comparable in content and level of rigor

One of these:

- **PSQF:5165 Introduction to Program and Project Evaluation** 3 s.h.
- **PSQF:6265 Program Evaluation** 3 s.h.
- **PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is conducting research online)** 3 s.h.
- **CNW:6654 Forms of the Essay (when topic is the ethnographic essay)** arr.
- **EDTL:6267 Seminar: Current Issues in Art Education (when topic is qualitative methods)** 3-4 s.h.
- **EDTL:7071 Critical Discourse Analysis in Educational Research** 3 s.h.
- **EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting** 3 s.h.
- **EDTL:7073 Ethnographic Methods, Theories, and Texts** 3 s.h.
- **EDTL:7410 Mixed Methods Research** 3 s.h.
- **EDTL:7751 Advanced Qualitative Data Analysis** 3 s.h.
- **EDTL:7774 Qualitative Research with Computer-Aided Qualitative Data Analysis Software** 3 s.h.
- **EDTL:7953 Seminar: Single Subject Design Research** 3 s.h.
- **EPLS:5195 Research in Cross-Cultural Settings** 3 s.h.
- **EPLS:5240 Topics in Education (when topic is introduction to historical methodology)** arr.
- **HIST:7197 The Art and Craft of Historical Writing** arr.
- **HIST:7199 History Workshop: Theory and Interpretation** arr.
- **RCE:7438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education** 3 s.h.
- **RCE:7444 Qualitative Research in the Multicultural Context** 3 s.h.

**ADMISSION**

Applicants to the Ph.D. program in educational measurement and statistics must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test and must hold an M.A. from an accredited institution. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus. Applicants who do not meet these requirements
but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

**M.A.: Educational Psychology**

The Master of Arts in educational psychology is designed to help students become more effective practitioners by enhancing their ability to make responsible and creative decisions about how to help all of their students learn. By providing an evidence-based perspective on instructional approaches that work, it also addresses the emphasis on teachers’ accountability for choosing empirically supported approaches.

The M.A. in educational psychology is designed for working educators. Many of the program courses are offered in late afternoons, evenings, and summers. Each student’s progress is evaluated by the faculty after one academic year (two semesters) of study and during subsequent years.

The M.A. in educational psychology requires a minimum of 30 s.h. of graduate credit. A thesis is not required. Students develop a program of study in consultation with their advisors.

Students complete a required common core, select educational psychology courses and electives appropriate to their professional goals, and complete a capstone portfolio project. The two core courses, which are taken during the first year, prepare students for the M.A. program. Educational Psychology (PSQF:6200) introduces them to a broad sampling of topics in educational psychology (e.g., development, cognition, motivation). Also during the first year, students begin their portfolios, which they continue to build throughout the program and complete during their final M.A. semester.

Full-time M.A. students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time M.A. students take 3-6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply to substitute equivalent course work from another institution or department for required or recommended courses.

**CORE COURSES**

The following courses are required (9 s.h.).

Both of these:

- PSQF:6200 Educational Psychology 3 s.h.
- EALL:5150 Introduction to Educational Research 3 s.h.

One of these options:

- PSQF:6299 M.A. Project: The Portfolio 3 s.h.
- Comprehensive exam and an additional educational psychology course 3 s.h.

**CONTENT COURSES**

Educational psychology—15-21 s.h. from these:

<table>

</table>

Students may request permission to substitute other courses with consent of their advisor.

**ELECTIVES**

Students select two electives (6 s.h.) based on their interests and in consultation with their advisors. Electives typically are chosen from areas outside educational psychology.

**PORTFOLIO PROJECT**

The program’s capstone project is a portfolio. Students enroll in PSQF:6299 M.A. Project: The Portfolio (3 s.h.) during their final M.A. semester.

The portfolio is a creative and highly individual project. Each student’s portfolio reflects his or her own unique learning and synthesis of knowledge. Students begin building the portfolio during their first year, making an entry as they complete each course throughout the M.A. program. Portfolio entries vary widely. For example, the entry for a technology course might include a website a student developed for the course, while the entry for a development course might detail an intervention program the student constructed to address problems of student aggression.

During enrollment in PSQF:6299, a student revises and reflects on the portfolio contents and then presents the portfolio as the culmination of his or her work throughout the program. The portfolio’s goal is to show how understanding and practical application of educational psychology can help the student become a more effective educator.

This course:

PSQF:6299 M.A. Project: The Portfolio 3 s.h.

**ADMISSION**

Applicants to the M.A. program in educational psychology must meet the admission requirements of the Graduate College, including the minimum grade-point average. Viable applicants have a verbal score of at least 146 and a quantitative score of at least 149 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Teaching experience is desirable but not required.
Application deadline for fall semester entry is February 1 with review beginning soon after. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 are committed not to solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association’s Board of Educational Affairs.

**Ph.D.: Educational Psychology**

Educational psychology is characterized by empirical research and theory typical of the social and behavioral sciences. The Doctor of Philosophy program in educational psychology requires a minimum of 72 s.h. of graduate credit. It is designed to help students master the core content and methods of educational psychology and acquire the depth of knowledge and methodological sophistication necessary for original research that contributes to the discipline.

Students work closely with their advisor to define a program that matches their goals and interests. They develop a plan of study in consultation with their advisors. Those who begin the program after earning a master’s degree or with course work from another program may be able to waive some of the Ph.D. program’s requirements. Students who enter the program without completion of a M.A. thesis are required to complete a research practicum in which students assist with and later design and carry out original research during their first or second year. Students who have completed an empirical M.A. thesis acceptable to the faculty may omit the second-year project.

The program of study includes substantive areas within educational psychology and the learning sciences, including courses in cognition, development, learning theory, and the design of instruction, learning environments, and learning technologies. Other learning opportunities include a research practicum in which students assist with and eventually design and carry out original research, a slate of research courses that meet the College of Education’s research requirements, a minor area of the student’s choice, and a dissertation in the student’s area of interest.

**RESEARCH REQUIREMENT**

The heart of educational psychology as a field is the creation, dissemination, and use of rigorous research to better understand and address educational issues. While many of the required courses address various aspects of the guiding principles set out by the National Research Council, students engage in the following course work and research-related activities.

**Required Course Work**

Quantitative and qualitative research methods—both of these:

- **PSQF:6220 Quantitative Educational Research Methodologies** 3 s.h.
- **PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods)**

Central to understanding research in the field is the understanding and use of statistical methods.

Statistics—this course:

- **PSQF:6243 Intermediate Statistical Methods** 4 s.h.

Based on the types of questions encountered in the field, students benefit from additional exposure to quantitative methods.

Quantitative methods—one of these:

- **PSQF:6244 Correlation and Regression** 4 s.h.
- **PSQF:6246 Design of Experiments** 4 s.h.
- **PSQF:6247 Nonparametric Statistical Methods** 3 s.h.
- **PSQF:6252 Introduction to Multivariate Statistical Methods** 3 s.h.

**Research Project**

In consultation with a faculty member, students design, implement, and present an original second-year research study. This experience provides the opportunity to conduct a pilot study that will strengthen their thesis in terms of methods, instruments, theoretical grounding, or focus of research question. Student presentations of their research are open to the public. Students are encouraged to submit their study results for broader dissemination at a local, regional, or national conference.

- **PSQF:6230 Research in Educational Psychology** 3 s.h.

**Additional Course Work**

To develop specific competencies that are related to research, doctoral students in educational psychology are encouraged to select from the following elective courses.

- **PSQF:6245 Applied Multivariate Analysis** 3 s.h.
- **PSQF:6257 Educational Measurement and Evaluation** 3 s.h.
- **PSQF:6265 Program Evaluation** 3 s.h.
- **PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is research writing in education or conducting research online; 3 s.h. each)**

Advanced qualitative course (consult with advisor)

Mixed methods course (consult with advisor)

**Research-Related Activities**

Students are encouraged to participate in research experiences beyond their course work. They are encouraged to

- attend research conferences as a presenter or audience member;
- become members of professional research organizations such as the American Educational Research Association;
- volunteer as proposal reviewers for conferences in their areas of expertise later in their program of study; and
- work with faculty members on faculty research projects.
REQUIRED COURSES
All of these:
PSQF:6200 Educational Psychology 3 s.h.
PSQF:6205 Design of Instruction 3 s.h.
PSQF:6281 Cognitive Theories of Learning 3 s.h.
PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations (minimum requirement) 10 s.h.

CORE COURSES
Selection of courses depend on the student's area of specialization.
At least 15 s.h. from these:
PSQF:6203 Tools and External Representations in Learning Processes 3 s.h.
PSQF:6204 Foundations of the Learning Sciences 3 s.h.
PSQF:6206 Advanced Child Development 3 s.h.
PSQF:6208 Designing Educational Multimedia 3 s.h.
PSQF:6215 Web-Based Learning 3 s.h.
PSQF:6275 Constructivism and Design of Instruction 3 s.h.
PSQF:7331 Seminar: Educational Psychology I—Current Topics (topics vary; may be repeated if content is related to educational psychology) arr.

ELECTIVES
Students may take up to 9 s.h. of elective course work.
Students can take PSQF:6217 Seminar in College Teaching and/or additional research courses. See "Research Requirement" above. Other courses may be included in consultation with the advisor.

MINOR AREA
Students must complete a minimum of 12 s.h. that constitute a coherent program of course work outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline such as psychology or in another area of education such as mathematics education, educational philosophy, or program evaluation. Courses must be numbered 5000 or above, can span across departments and colleges, and must be consistent with a plan approved by a student's advisor.

COMPREHENSIVE EXAMINATION
The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of the examining committee, composed of five faculty members and does not necessarily include the same faculty members as the dissertation committee. The options are a review article, an extended research activity, or a traditional comprehensive examination. For details of each option's requirements, contact the Department of Psychological and Quantitative Foundations.

ADMISSION
Applicants to the Ph.D. program in educational psychology must meet the admission requirements of the Graduate College, including the minimum grade-point average. They must have a verbal score of at least 150 and a quantitative score of at least 152 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.

Admission is for fall entry. Application deadline is February 1; late applications might not be considered. Review of applications begins soon after, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication Graduate Study in Psychology and Associated Fields. This policy is consistent with standards set by the association's Board of Educational Affairs.

Ed.S.: School Psychology
The school psychology program admits students at either the Specialist in Education (Ed.S.) or Doctor of Philosophy (Ph.D.) levels. Also, students in the doctoral program may be granted an Ed.S. once they complete the requirements.

The educational specialist program in school psychology requires a minimum of 66 s.h. of graduate credit. The program provides course work and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as a school psychologist (State of Iowa Endorsement 236).

The curriculum includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a written portfolio and a project paper prepared in conjunction with PSQF:7342 Research Project in School Psychology.

The plan of study is as follows.

FALL SEMESTER, FIRST YEAR
All of these:
PSQF:5218 Foundations of School Psychology 4 s.h.
PSQF:6251 Individual Intelligence Testing 3 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EDTL:7953 Seminar: Single Subject Design Research Pre-practicum

SPRING SEMESTER, FIRST YEAR
All of these:
PSQF:6206 Advanced Child Development 3 s.h.
PSQF:6238 Assessment of Learning Differences 3 s.h.
PSQF:6263 Consultation Theory and Practice 3 s.h.
PSQF:7237 Beginning Practicum in School Psychological Service 3 s.h.
PSQF:7342 Research Project in School Psychology (Ed.S. project) 1 s.h.

**SUMMER SESSION, FIRST YEAR**
One of these:
PSQF:6235 Multicultural Counseling 3 s.h.
RCE:5202 Introduction to Group Counseling 3 s.h.
RCE:5222 Counseling Children and Adolescents in Schools 3 s.h.
Both of these:
PSQF:7237 Beginning Practicum in School Psychological Service (community practicum) 2 s.h.
PSQF:7342 Research Project in School Psychology (Ed.S. project) 1 s.h.

**FALL SEMESTER, SECOND YEAR**
All of these:
PSQF:7313 Psychopathology in Childhood 3 s.h.
PSQF:7337 Advanced Practicum in School Psychology (schools) 3 s.h.
PSQF:7342 Research Project in School Psychology (Ed.S. project) 1 s.h.
PSQF:7345 Academic Interventions 3 s.h.
PSQF:7466 Psychological Services to Children, Adolescents, and Families: Legal and Ethical Standards (ethics) 3 s.h.

**SPRING SEMESTER, SECOND YEAR**
All of these:
PSQF:6243 Intermediate Statistical Methods 4 s.h.
PSQF:6244 Correlation and Regression 4 s.h.
PSQF:6246 Design of Experiments 4 s.h.
PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods) 3 s.h.

To receive credit for additional courses, students must obtain prior approval from their advisor and the school psychology program.

**RESEARCH REQUIREMENT**
All of these:
PSQF:6238 Assessment of Learning Differences (taken with PSQF:7237) 3-4 s.h.
PSQF:6251 Individual Intelligence Testing (taken with PSQF:7237) 3 s.h.
PSQF:6263 Consultation Theory and Practice (taken with PSQF:7337) 3 s.h.
PSQF:7224 Introduction to School Psychology Practice 3 s.h.
PSQF:7237 Beginning Practicum in School Psychological Service (minimum of 150 hours required) 3 s.h.
PSQF:7313 Psychopathology in Childhood 3 s.h.
PSQF:7315 Social and Emotional Assessment of Children and Adolescents 3 s.h.
PSQF:7337 Advanced Practicum in School Psychology (minimum of 750 hours required) 12 s.h.
PSQF:7352 Seminar: Behavioral Assessment and Evaluation 3 s.h.
PSQF:7367 Social Psychology and Social Systems 3 s.h.
PSQF:7380 Practicum in College Teaching (optional) 1-3 s.h.
PSQF:7390 Supervision of School Psychology Practicum/Internship 1 s.h.

**PROGRAM CORE**
The following courses are required.
All of these:
PSQF:7437 Internship in School Psychology (paid Ed.S. field experience; each 1 s.h.)

**Ph.D.: School Psychology**
The Doctor of Philosophy program in school psychology requires a minimum of 125 s.h. of graduate credit. The program is fully accredited by the American Psychological Association.

The program’s goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners.

Ph.D. students develop a plan of study in consultation with their academic advisors. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

Students are required to complete yearly portfolio reviews, which include oral examinations; carry out a preliminary dissertation research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations.

**PSQF:7437 Internship in School Psychology (paid Ed.S. field experience; each 1 s.h.)**

---

**SUMMER SESSION, SECOND YEAR**
One of these:
PSQF:6235 Multicultural Counseling 3 s.h.
RCE:5202 Introduction to Group Counseling 3 s.h.
RCE:5222 Counseling Children and Adolescents in Schools 3 s.h.
This course:
PSQF:7347 Home/School/Community: System Interventions 3 s.h.

**FALL AND SPRING SEMESTERS, THIRD YEAR**
PSQF:7437 Internship in School Psychology (paid Ed.S. field experience; each 1 s.h.)

---

**Ph.D.: School Psychology**
The Doctor of Philosophy program in school psychology requires a minimum of 125 s.h. of graduate credit. The program is fully accredited by the American Psychological Association.

The program’s goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners.

Ph.D. students develop a plan of study in consultation with their academic advisors. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

Students are required to complete yearly portfolio reviews, which include oral examinations; carry out a preliminary dissertation research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations.

**RESEARCH REQUIREMENT**
All of these:
PSQF:6243 Intermediate Statistical Methods 4 s.h.
PSQF:6244 Correlation and Regression 4 s.h.
PSQF:6246 Design of Experiments 4 s.h.
PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods) 3 s.h.

To receive credit for additional courses, students must obtain prior approval from their advisor and the school psychology program.

**PROGRAM CORE**
The following courses are required.
All of these:
PSQF:6238 Assessment of Learning Differences (taken with PSQF:7237) 3-4 s.h.
PSQF:6251 Individual Intelligence Testing (taken with PSQF:7237) 3 s.h.
PSQF:6263 Consultation Theory and Practice (taken with PSQF:7337) 3 s.h.
PSQF:7224 Introduction to School Psychology Practice 3 s.h.
PSQF:7237 Beginning Practicum in School Psychological Service (minimum of 150 hours required) 3 s.h.
PSQF:7313 Psychopathology in Childhood 3 s.h.
PSQF:7315 Social and Emotional Assessment of Children and Adolescents 3 s.h.
PSQF:7337 Advanced Practicum in School Psychology (minimum of 750 hours required) 12 s.h.
PSQF:7352 Seminar: Behavioral Assessment and Evaluation 3 s.h.
PSQF:7367 Social Psychology and Social Systems 3 s.h.
PSQF:7380 Practicum in College Teaching (optional) 1-3 s.h.
PSQF:7390 Supervision of School Psychology Practicum/Internship 1 s.h.
PSQF:7437 Internship in School Psychology  3 s.h.  
(one year full-time or two years half-time; total of 1800 hours required)

Program course work in evaluation

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of PSQF:7237 Beginning Practicum in School Psychological Service before enrolling in PSQF:7337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

ADMISSION

Applicants to the Ph.D. program in school psychology must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education and a g.p.a. above 3.00. A combined verbal and quantitative score of 308 or higher and an analytic writing score of 4 or higher on the Graduate Record Examination (GRE) General Test are recommended but not required. The faculty also encourages applications from individuals with an M.A. or Ed.S. and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall entry. Admission decisions are usually made by March 15. The program admits from six to eight students each year.

Courses

Lower-Level Undergraduate

Students may receive credit for only two of these three courses: STAT:1010 Statistics and Society, STAT:1020 Elementary Statistics and Inference (same as PSQF:1020 Elementary Statistics and Inference), and STAT:1030 Statistics for Business. Credit for STAT:1010 Statistics and Society is given only if the course is taken before STAT:1020 Elementary Statistics and Inference (same as PSQF:1020 Elementary Statistics and Inference) or STAT:1030 Statistics for Business.

PSQF:1020 Elementary Statistics and Inference  3 s.h.
Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning. Same as STAT:1020.

PSQF:1026 Mindfulness: Being Here With It All  2 s.h.
Training in Mindfulness-Based Stress Reduction; application to dealing with life changes (i.e., transition to University life); navigating daily life (academics, roommates, schedules); improving academic skills; self-regulation of emotions; questions of meaning and purpose.

PSQF:1027 Mindfulness Foundations in the Helping Professions  3 s.h.
Training in Mindfulness-Based Practices; application to personal and professional life.

PSQF:1029 First-Year Seminar  1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

PSQF:1075 Educational Psychology and Measurement  3 s.h.
Principles and classroom applications of cognitive and social development, learning and cognition, motivation, and assessment.

PSQF:2115 Introduction to Counseling Psychology  3 s.h.
Historical and philosophical foundations of counseling psychology; theories, application, and work of counseling psychologists.

PSQF:2116 Applied Child and Adolescent Psychology  3 s.h.
Overview of child and adolescent development, psychopathology, and basic-level intervention; foundation for working in applied child and adolescent mental health settings; typical areas of psychological difficulty, including developmental disorders, ADHD, depression, anxiety, substance use; contextual and environmental factors; including abuse, poverty, neglect.

Upper-Level Undergraduate and Graduate

Exploration of research-based implications for teaching, learning, and daily living; skillful engagement of demands educators face in personal and professional lives; mindfulness as paying attention in present moment and relating wisely to what is occurring; specific mindfulness practices that integrate awareness into daily living; how research and program evaluations throughout the world document that consistent practice of mindfulness improves attention and concentration; ability to respond skillfully to stress, self-regulation of emotion, physical and mental health, communication, life satisfaction.

PSQF:3103 Early Childhood Guidance  4 s.h.
Effective communication, understanding child development and behavior, appropriate limits and rules, structuring problem solving and consequences, fostering self control, organizing classroom environment and curriculum to support child behavior, methods to address persistent and challenging behaviors; nurturance and child guidance via parenting, child rearing practices, and child-family relations.

PSQF:3104 Multicultural Issues in Counseling and Psychology  3 s.h.
Introduction to multicultural competencies and its importance to counseling, psychology, and helping professions; psychological concepts and research pertaining to privilege; racism, race, culture, sexual orientation, social class and classism, and their application in culturally adapted psychotherapy interventions; how these matters and other cultural identities and constructs are handled and used in applied psychology and counseling; focus on intersection of research and practice.

**PSQF:4081 ePortfolio Production**  
1-2 s.h.  
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, RCE:4081, EPLS:4081.

**PSQF:4106 Child Development**  
3 s.h.  
Theories and research findings about typical course of child development, differences in development. Requirements: junior standing.

**PSQF:4111 Human Motivation**  
3 s.h.  
Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students. Requirements: junior standing.

**PSQF:4120 Psychology of Giftedness**  
3 s.h.  
Theories of learning, child development, motivation; issues unique to gifted education. Same as RCE:4120.

**PSQF:4121 Identification of Students for Gifted Programs**  
3 s.h.  
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as RCE:4121.

**PSQF:4122 Math Programming for High Ability Students**  
1 s.h.  
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as EDTL:4022.

**PSQF:4123 Academic Acceleration: Providing Excellence and Equity in Education for High Ability Students**  
Arr.  
Acceleration as an effective curricular intervention for high-ability students; forms of acceleration, research evidence for acceleration, and process of implementing acceleration; reasons for persistent negative attitudes about acceleration; advocacy for acceleration; skills for effective practice and implementation. Requirements: computer with internet access, sound card, Adobe Reader, and Adobe Flash Player.

**PSQF:4125 Counseling and Psychological Needs of the Gifted**  
1 s.h.  
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as RCE:4125.

**PSQF:4126 Cognitive and Affective Needs of Underachieving Gifted**  
1 s.h.  
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as RCE:4126.

**PSQF:4127 Research and Theory in Talent/Giftedness**  
1 s.h.  
Biennial research symposium. Same as RCE:4127.

**PSQF:4128 Neuroscientific Implications for Gifted**  
1 s.h.  
Neurology of behavior and neurodegenerative disease; the psychology of learning and memory, its application to gifted education.

**PSQF:4129 Creativity: Issues and Applications in Gifted Education**  
1 s.h.  
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as RCE:4129.

**PSQF:4130 Early Adolescent Development**  
3 s.h.  
Psychological growth and development of the early adolescent (ages 10-14), including the physical, cognitive, social, emotional, and sexual development of the middle-school aged child.

**PSQF:4133 The Adolescent and Young Adult**  
3 s.h.  
Psychological and social aspects of adolescence and young adulthood; emphasis on theory, research, and practical applications.

**PSQF:4134 Parent-Teacher Communication**  
1-3 s.h.  
Realities of working with parents; interpersonal skills; options for parent support services. Same as EDTL:4934.

**PSQF:4136 Home/School/Community Partnerships**  
3 s.h.  
Issues related to collaboration among families, educators, community members in implementing school programs. Same as EDTL:4936.

**PSQF:4143 Introduction to Statistical Methods**  
3 s.h.  
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as STAT:4143.

**PSQF:4150 Introduction to Educational Measurement**  
3-4 s.h.  
Test development procedures, reliability, validity, item writing, evaluation of item and test characteristics; classroom assessment methods; interpretation of scores from standardized achievement and aptitude tests; no background in statistics assumed.
PSQF:6204 Foundations of the Learning Sciences
3 s.h.
Foundations of Interdisciplinary science of learning; theory and method of study of cognition in sociocultural context; design-based approaches to research on learning.

PSQF:6205 Design of Instruction
3 s.h.
Introduction to processes used to design, develop, implement, and evaluate effective instruction; projects.

PSQF:6206 Advanced Child Development
3 s.h.
Theories of social and cognitive development; in-depth study of several current controversies in the field.

PSQF:6208 Designing Educational Multimedia
3 s.h.
Theory, design, and evaluation of instructional software.

PSQF:6209 Survey Research and Design
3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: EPLS:6206 or PSQF:4143. Same as EPLS:6209.

PSQF:6211 Universal Design and Accessibility for Online Instruction
3 s.h.
Universal Design for Learning (UDL) framework; introduction to accessibility for online learning environment; use of UDL with any curriculum to provide more students with access to learning, including online learning environment.

PSQF:6215 Web-Based Learning
3 s.h.
Theory and practice of designing web sites to support or deliver instruction; student team project to create an instructional web site that integrates the theory and principles from class readings.

PSQF:6216 Tools and Utilities for Online Teaching
3 s.h.
Guidance for future online teachers in making well-informed decisions on what technologies need to be adopted and applied for high quality, successful online educational programming in a variety of environments (e.g., K-12, higher education, business and industry); choosing, learning, evaluating, and using different types of technologies to produce online instruction; how to learn; initiating and managing learning and professional development for effective online teaching. Corequisites: PSQF:6205, if not taken as a prerequisite.

PSQF:6217 Seminar in College Teaching
1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as RCE:6217.

PSQF:6220 Quantitative Educational Research Methodologies
3 s.h.
Procedures for planning, conducting, and reporting research; evaluation of current methods in educational research; quantitative designs and methods. Prerequisites: PSQF:4143 or STAT:4143.

PSQF:6223 Introduction to Counseling Psychology Practice/Research I
3 s.h.
Historical, theoretical, professional, scientific traditions associated with counseling psychology; professional ethical principles.

PSQF:6225 Introduction to Counseling Psychology Practice/Research II
3 s.h.

Learning and performance of basic helping skills; integration of these skills with counseling theories, broader counseling strategies; laboratory-based.

**PSQF:6230 Research in Educational Psychology** 1-3 s.h.
Design, implementation, and presentation of an educational psychology empirical research project. Requirements: graduate standing in educational psychology.

**PSQF:6231 Concepts and Principles of Behavior Analysis** 3 s.h.
Comprehensive review of psychological principles of learning derived from experimental research and empirical studies; types of behavior, motivational influences on behavior, respondent behavior and operant conditioning, stimulus control, schedule influences on behavior, observational learning, verbal behavior, rule-governed behavior, and behavioral accounts of language and cognition.

**PSQF:6232 Functional Behavior Assessment and Analysis** 3 s.h.
Understanding the purpose of assessments of behavior, developing assessments based on the presenting problems of behavior, conducting assessments to understand the purpose of behavior, and develop an effective behavior intervention plan; advanced coverage of special topics, including preference assessments and verbal behavior.

**PSQF:6233 Ethics for Behavioral Psychologists** 1 s.h.
Ethics that are unique to applied behavior analysis; ethical considerations.

**PSQF:6235 Multicultural Counseling** 3 s.h.
Theoretical and practical aspects of the cultural adaptation process; implications for interventions in diverse populations; issues. Requirements: counseling skills introductory course.

**PSQF:6236 Counseling and Psychotherapy for Persons with Disabilities** 3 s.h.
Preparation for future psychologists and counselors to work with persons with disabilities throughout the lifespan; examination of disability issues within the context of present and past theoretical constructs. Requirements: enrollment in psychological and quantitative foundations or rehabilitation and counselor education. Same as RCE:6236.

**PSQF:6238 Assessment of Learning Differences** 3-4 s.h.

**PSQF:6242 Selected Applications of Statistics** 3 s.h.
Application and interpretation of correlation techniques, chi-square, t- and f-tests, interval estimation, simple cases of analysis of variance. Prerequisites: PSQF:4143.

**PSQF:6243 Intermediate Statistical Methods** 4 s.h.

**PSQF:6244 Correlation and Regression** 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Requirements: for PSQF:6244 — PSQF:6243; for STAT:6514 — STAT:6513. Same as STAT:6514.

**PSQF:6245 Applied Multivariate Analysis** 3 s.h.

**PSQF:6246 Design of Experiments** 4 s.h.

**PSQF:6247 Nonparametric Statistical Methods** 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisites: PSQF:6243 or STAT:3120. Same as STAT:6547.

**PSQF:6249 Factor Analysis and Structural Equation Models** 3 s.h.
Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL; assumptions and limitations of alternative approaches. Prerequisites: PSQF:6244 and PSQF:6246.

**PSQF:6250 Computer Packages for Statistical Analysis** 1-3 s.h.
Computer programs and systems designed to execute statistical analysis (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: PSQF:6243. Requirements: elementary knowledge of computer programming.

**PSQF:6251 Individual Intelligence Testing** 3 s.h.
Administration of individual intelligence tests; interpretation of test results; issues in psychological testing; factors that influence performance. Prerequisites: PSQF:4143 or PSQF:4150.
PSQF:6252 Introduction to Multivariate Statistical Methods
3 s.h.
Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisites: PSQF:6244 and PSQF:6246.

PSQF:6255 Construction and Use of Evaluation Instruments
3 s.h.
Design and construction of measures used in educational evaluation: achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: PSQF:4143 and PSQF:6257.

PSQF:6257 Educational Measurement and Evaluation
3 s.h.
Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data; interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisites: PSQF:4143.

PSQF:6258 Theory and Technique in Educational Measurement
3 s.h.
Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:6259 Scaling Methods
3 s.h.
Unidimensional and multidimensional scaling techniques; item response theory with a focus on polytomous models; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisites: PSQF:6262. Corequisites: PSQF:6249 and PSQF:6252.

PSQF:6262 Item Response Theory
3 s.h.
Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:6263 Consultation Theory and Practice
3 s.h.
Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as RCE:6263.

PSQF:6265 Program Evaluation
3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization. Same as EPLS:6266.

PSQF:6275 Constructivism and Design of Instruction
3 s.h.
Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.

PSQF:6281 Cognitive Theories of Learning
3 s.h.
Theories of learning and cognition as they relate to education; development of expertise, transfer of learning, design of learning environments, use of learning technologies. Prerequisites: PSQF:6200.

PSQF:6292 Supervised Research in Educational Psychology
1-3 s.h.
Identification of research problems, development of research designs and materials, conducting of research studies; faculty-guided activity or seminars.

PSQF:6293 Individual Instruction in Psychological and Quantitative Foundations
arr.

PSQF:6299 M.A. Project: The Portfolio
3 s.h.
Individual portfolio project; reflection, revision, and presentation of educational psychology portfolio.

PSQF:6301 Human Abilities
3 s.h.
Psychology of abilities required by or developed through schooling; theories of cognitive abilities, age, sex, ethnic differences; cultivation of intelligence through schooling. Prerequisites: PSQF:4143.

PSQF:6312 Psychopathology Across the Lifespan
3 s.h.
DSM IV categories, related diagnostic issues.

PSQF:7201 Counseling Psychology Research Writing
3 s.h.
How to write scientifically in counseling psychology; qualitative and quantitative research writing, literature reviews, methodologies, discussions; APA style.

PSQF:7224 Introduction to School Psychology Practice
1-3 s.h.
Introduction to the practice of school psychology; framework for understanding role and function, legal and ethical boundaries, professional requirements; preparation for practicum.

PSQF:7237 Beginning Practicum in School Psychological Service
arr.
Supervised practicum in psychological and educational evaluation in school settings. Prerequisites: PSQF:6238 and PSQF:6251.

PSQF:7245 Evaluation of Children with ADHD and LD
arr.
Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as PEDS:7245.

PSQF:7305 Psychotherapy I: Dynamic and Phenomenological Approaches
3 s.h.
Major psychodynamic and existential-phenomenological theories of personality; emphasis on implications for psychotherapy.
PSQF:7306 Psychotherapy III: Work Psychology and Career Interventions 3 s.h.
Foundations of career interventions; emphasis on major assessment instruments (vocational interests, values, abilities/skills, personality) and career counseling processes, skills, techniques.

PSQF:7309 Personality Assessment 3 s.h.
Standardized and projective techniques for personality assessment; preparation for competent administration and interpretation of varied tests and measures.

PSQF:7310 Intelligence Assessment 3 s.h.
Standardized intelligence testing; preparation to administer and interpret intelligence tests for children and adults.

PSQF:7311 Practicum in Counseling and Psychological Services for Gifted Students 1-6 s.h.
Prerequisites: RCE:4178. Requirements: course work in counseling education, counseling psychology, school psychology, educational psychology, or related fields. Same as RCE:7311.

PSQF:7313 Psychopathology in Childhood 3 s.h.
Current theories regarding the development of psychopathology in children and adolescents; current approaches to treatment for disorders in children and adolescents.

PSQF:7315 Social and Emotional Assessment of Children and Adolescents 3 s.h.
Link between personality theory, child and adolescent assessment; interpretation, integration of assessment information; record reviews, interviews, objective tests, projective techniques. Prerequisites: PSQF:6238 and PSQF:6251.

PSQF:7320 History and Systems of Psychology 3 s.h.
Philosophical underpinnings of psychology, early systems in psychology, developments in the 20th century.

PSQF:7331 Seminar: Educational Psychology I—Current Topics arr.
Intensive investigation of a specific research topic.

Supervised experience in psychological interventions, consultation, counseling in school and clinic settings. Prerequisites: PSQF:6238 and PSQF:6251 and PSQF:7237.

Experience in research facilities on campus; writing research questions, planning a research study, writing a research article.

PSQF:7345 Academic Interventions 3 s.h.
Interventions used by school and support system personnel to address academic skill deficits among children, adolescents; instructional design and delivery problems associated with deficits.

PSQF:7346 Behavioral Interventions 3 s.h.
Interventions used by school and support system personnel to address behavioral and social/emotional status of children, adolescents.

PSQF:7347 Home/School/Community: System Interventions 3 s.h.
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as RCE:7347.

PSQF:7350 Seminar in Evaluation 2-3 s.h.
In-depth examination of selected topics. Prerequisites: PSQF:6265. Requirements: two courses in program evaluation.

PSQF:7352 Seminar: Behavioral Assessment and Evaluation 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as EDTL:7952.

PSQF:7354 Seminar: Experimental Approaches in Counseling Research arr.
Application of experimental methodology to study of counseling and vocational phenomena.

Critical examination of current issues and problems of the professional worker in the field of educational measurement and evaluation as reflected in research literature, other professional communication media.

PSQF:7356 Process and Outcomes in Counseling Psychotherapy 3 s.h.
Advanced knowledge of the state of process and outcome research on psychotherapeutic procedures. Requirements: Ph.D. candidacy in appropriate field.

PSQF:7358 Equating and Scaling of Educational Tests 3 s.h.
Designs and methods, including linear, equipercentile, and item response theory methods; emphasis on concepts, applications to testing programs, research. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:7365 Psychotherapy II: Cognitive and Behavioral Approaches 3 s.h.
Major cognitive and behavioral theories of personality and psychotherapy; emphasis on implications for clinical practice.

PSQF:7367 Social Psychology and Social Systems 3 s.h.
Social aspects of behavior in organizations; behavioral science theory and research on organizations, system change, transformation, leadership.

PSQF:7375 Topics in Educational Measurement and Statistics 1-3 s.h.
PSQF:7380 Practicum in College Teaching  
Supervised college teaching experience in courses related to major academic areas, in collaboration with faculty course instructors.

PSQF:7385 Teaching and Learning in Higher Education  
3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EPLS:7385, GRAD:7385, EDTL:7385, RCE:7385.

PSQF:7390 Supervision of School Psychology Practicum/Internship  
arr.
Experience supervising school psychology practicum or internship students. Requirements: Ph.D. standing.

PSQF:7393 M.A. Thesis in Psychological and Quantitative Foundations  
arr.

PSQF:7394 Supervised Research in Counseling Psychology  
1-3 s.h.

PSQF:7434 Practicum in Counseling Psychology  
3 s.h.
Supervised practice in counseling services. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7437 Internship in School Psychology  
arr.
Supervised internship for Ph.D. students in school psychology. Requirements: completion of required courses.

PSQF:7450 Practicum in Program Evaluation  
arr.
Supervised experience in designing and implementing components of program evaluations. Prerequisites: PSQF:6265. Requirements: two courses in program evaluation.

PSQF:7452 Leadership, Consultation, and Supervision  
3 s.h.
Overview of intervention modalities other than individual and group therapy, especially those that pertain to leadership within organizations, consultation with organizations and communities, and supervision of the work of others; capstone course in counseling psychology sequence. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7453 Advanced Practicum in Counseling Psychology  
1-3 s.h.
Supervised work in counseling services. Prerequisites: PSQF:7434.

PSQF:7455 Generalizability Theory  
3 s.h.
Analysis of variance methods applied to estimation of components of various types of measurement error variance; basic concepts, mathematical foundations, models, assumptions, designs, applications; relationships with other measurement theories. Prerequisites: PSQF:6246 and PSQF:6258.

PSQF:7457 Advanced Group Leadership Experience  
3 s.h.
Practice working in a psychotherapy group; review major theories on group psychotherapy processes, integrate empirical research on effectiveness of group work; multicultural considerations in group psychotherapy; didactic and experiential format. Prerequisites: RCE:7357.

PSQF:7458 Internship in Counseling Psychology  
arr.
Supervised work in internship setting. Prerequisites: PSQF:7434 and PSQF:7453. Requirements: Ph.D. standing in counseling psychology and completion of all requirements except dissertation.

PSQF:7465 Issues and Ethics in Professional Psychology  
3 s.h.
Professional ethics; issues in professional practice of psychology.

PSQF:7466 Psychological Services to Children, Adolescents, and Families: Legal and Ethical Standards  
3 s.h.
Review of laws at state and federal level which are related to child, adolescent, and family functioning; emphasis on APA and NASP ethical standards, application of these standards, and ethical decision making models. Recommendations: graduate student who will provide services to children, adolescents, and families.

PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations  
arr.
Rehabilitation and Counselor Education

Chair
• Vilia M. Tarvydas

Undergraduate minor: human relations
Graduate degrees: M.A. in rehabilitation and counselor education; Ph.D. in rehabilitation and counselor education
Faculty: http://www.education.uiowa.edu/rce/people
Web site: http://www.education.uiowa.edu/rce

The Department of Rehabilitation and Counselor Education prepares students to facilitate human development across the life span, to advocate for clients and students, and to serve local, national, and international communities through the delivery and creation of state-of-the-art counseling services. The department achieves these goals by advancing knowledge, skills, and attitudes appropriate for effective and ethical professional counseling practice and by conducting and disseminating related research.

The department prepares practitioners and scholars primarily at the graduate level, through degree programs in counselor education and supervision, couple and family counseling, rehabilitation and mental health counseling, rehabilitation counselor education, and school counseling. It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs. In addition, it offers an undergraduate minor in human relations.

Undergraduate Program of Study

• Minor in human relations

Minor

The minor in human relations is open to all University of Iowa students enrolled in undergraduate degree programs.

The minor in human relations requires a minimum of 15 s.h. of credit, including 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass, but may count toward the minor if offered as S/U or S/F. Transfer credit must be approved by the chair of the Department of Rehabilitation and Counselor Education in order to count toward the minor.

The minor in human relations requires the following course work.

This course:

RCE:4199 Counseling for Related Professions 3 s.h.

At least 12 s.h. chosen from these:

RCE:2081 Making a Vocational-Educational Choice 2-3 s.h.
RCE:4110 Psychology of Food and Mood 3 s.h.
RCE:4111 Relationships and Workplace Dynamics: Keys to a Successful Career 3 s.h.
RCE:4130 Human Sexuality 3 s.h.
RCE:4131 Loss, Death, and Bereavement 3 s.h.
RCE:4132 Introduction to Addictions and Impulse Control Disorders 3 s.h.
RCE:4137 Introduction to Educating Gifted Students 3 s.h.
RCE:4140 Foundations of Leadership for Community Agencies 3 s.h.
RCE:4145 Marriage and Family Interaction 3 s.h.
RCE:4162 Introduction to Couple and Family Therapy 3 s.h.
RCE:4173 Trauma Across the Lifespan 3 s.h.
RCE:4174 Positive Psychology 3 s.h.
RCE:4175 Motivational Interviewing 3 s.h.
RCE:4176 Child Abuse: Assessment, Intervention, and Advocacy 3 s.h.
RCE:4177 Life After Service: Veterans in College 3 s.h.
RCE:4178 Microcounseling 1-3 s.h.
RCE:4179 Sexuality Within the Helping Professions 3 s.h.
RCE:4180 Topical Seminar for Helping Professionals 3 s.h.
RCE:4185 Introduction to Substance Abuse 3 s.h.
RCE:4187 Introduction to Assistive Technology 3 s.h.
RCE:4190 Group Processes for Related Professions 3 s.h.
RCE:4191 Advocacy: Awareness, Assertiveness, and Activism arr.
RCE:4192 Group Leadership in Human Sexuality 0-3 s.h.
RCE:4193 Individual Instruction—Undergraduate arr.
RCE:4194 Interpersonal Effectiveness 3 s.h.
RCE:4195 Ethics in Human Relations and Counseling 3 s.h.
RCE:4197 Citizenship in a Multicultural Society 3 s.h.
EALL:4130 Introduction to Grant Writing 3 s.h.
EPLS:4150 Leadership and Public Service I 3 s.h.
EPLS:4151 Leadership and Public Service II 2 s.h.
EPLS:4180 Human Relations for the Classroom Teacher (requires special permission for students not enrolled in TEP) 3 s.h.
PSQF:1027 Mindfulness Foundations in the Helping Professions 3 s.h.
PSQF:2115 Introduction to Counseling Psychology 3 s.h.
PSQF:2116 Applied Child and Adolescent Psychology 3 s.h.

Contact the Department of Rehabilitation and Counselor Education for more information about the minor.

Graduate Programs of Study

• Master of Arts in rehabilitation and counselor education
• Doctor of Philosophy in rehabilitation and counselor education

The department offers graduate degree programs in five major areas within rehabilitation and counselor education:

Counselor education and supervision (offered in the Ph.D.);
Couple and family therapy (offered in the Ph.D.);
Rehabilitation and mental health counseling (offered in the M.A.);
Rehabilitation counselor education (offered in the Ph.D.); and
School counseling (offered in the M.A.).
Each degree program is described below.
Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in the following areas:
- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multiculturally competent helping professional;
- integration of feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student;
- a personal plan for future practice in the field regarding multicultural relationships.
Prospective students must meet admission requirements for the individual programs as well as the department's general admission requirements (see "Admission" toward the end of this section). Criminal background checks may be required. Applicants also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Ph.D.: Counselor Education and Supervision

The Doctor of Philosophy program in counselor education and supervision (CES) requires 96 s.h. of graduate credit. The program provides students with knowledge and skills related to general counseling (including mental health and school counseling), teaching, consulting, supervising counselors, and conducting research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations. Students may choose an emphasis in an area agreed upon by faculty advisors.

Counselor education and supervision graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors, perform counseling interventions with individuals and groups, and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners, educators, and policy makers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA) and the Association for Counselor Education and Supervision (ACES) are the professional organizations most related to program activities.

The Ph.D. curriculum includes required courses in counseling and in research tools and applications, a minor outside the department, and a dissertation.

Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master's degree program approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) may need to remedy deficiencies by taking appropriate course work at the master's degree level.

The Ph.D. program in counselor education and supervision requires the following work.

REQUIRED COURSES

All of these:

- RCE:7255 Advanced Career Development and Counseling (or equivalent) 3 s.h.
- RCE:7347 Home/School/Community: System Interventions 3 s.h.
- RCE:7353 Advanced Counseling and Psychotherapy 3 s.h.
- RCE:7357 Advanced Group Counseling and Psychotherapy 3 s.h.
- RCE:7360 Advanced Practicum in Counseling (section 2) 3 s.h.
- RCE:7380 Practicum in College Teaching 3 s.h.
- RCE:7385 Teaching and Learning in Higher Education 3 s.h.
- RCE:7400 Seminar: Ethics and Issues in Counseling 3 s.h.
- RCE:7448 Integrated Developmental Theory and Counseling 3 s.h.
- RCE:7451 Advanced Multiculturalism 3 s.h.
- RCE:7454 Supervision Theory and Practice 3 s.h.
- RCE:7455 Practicum in Clinical Supervision 3 s.h.
- RCE:7457 Seminar: Professional Orientation to Counselor Education and Supervision 3 s.h.
- RCE:7458 Seminar: Current Issues and Trends in Counselor Education and Supervision 4 s.h.
- RCE:7459 Seminar: Leadership and Advocacy in Counselor Education and Supervision 3 s.h.
- RCE:7465 Internship in Counselor Education (at least 240 hours) 3 s.h.
- At least one advanced course in psychological or educational measurement 3 s.h.

REQUIRED PH.D. RESEARCH COURSES

Students must complete a specific sequence of research courses which include distributed course work in both qualitative and quantitative areas. They select from doctoral research courses listed at RCE Doctoral Research Requirements.

MINOR AREA

Students take a series of courses (typically a minimum of three) in an area of study outside the Department of Rehabilitation and Counselor Education. They select course work in collaboration with their minor area advisor and their major advisor.

MASTER'S THESIS PROJECT OR EQUIVALENT

Students are required to submit a previously conducted master's thesis for faculty review and approval or to complete a new supervised experiential research project before taking comprehensive exams.

Students without an approved M.A./M.S. thesis enroll in the following.

- RCE:6394 M.A. Equivalency Research 1-3 s.h.
COMPREHENSIVE EXAMINATION
The comprehensive examination consists of an oral defense of a student's portfolio, which covers six professional competency domains in counselor education, and an exam on the minor area. The examination may be taken during a student's final semester of course work, which typically includes an internship.

DISSERTATION
The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h. The dissertation committee must include at least two counselor education and supervision faculty members.

RCE:7493 Ph.D. Thesis 10-15 s.h.

ADMISSION
Applicants to any of the department's graduate programs must meet the department's general admission requirements; see "Admission" toward the end of this Catalog section. In addition, applicants to the Ph.D. program in counselor education and supervision must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Students may be admitted for fall, spring, or summer entry, but the department strongly advises application for fall entry. Consideration of applications begins January 15 for fall entry; all application materials should be received at the University by this date.

Ph.D.: Couple and Family Therapy
The Doctor of Philosophy program in couple and family therapy (CFT) requires a minimum of 80 s.h. of graduate credit. The program prepares professionals for couple and family therapy/marriage and family therapy leadership roles in academic and research settings, administration and supervision, and clinical delivery systems. It provides couple and family therapists the opportunity to master cutting-edge theoretical knowledge; research competencies at the most innovative levels; and advanced clinical, teaching, and supervisory skills.

Ph.D. students focus on three areas of advanced training: clinical practice, quantitative and qualitative research methods, and teaching and supervision. The program is designed to meet the accreditation standards of the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) of the American Association for Marriage and Family Therapy. Ph.D. graduates are expected to have sufficient knowledge and skill to teach and conduct research at colleges and universities; supervise other professionals; and provide clinical services to individuals, couples, and families. They also should have competencies to engage in and evaluate theory-based qualitative and/or quantitative research.

Credit for the Ph.D. program may include credit for relevant course work completed for a COAMFTE-accredited master's degree program in couple and family therapy/marriage and family therapy or the equivalent.

Each student is required to submit a curriculum plan during the first two years of the program, before completing the comprehensive examination. The CFT faculty reviews each student annually; students must fulfill departmental requirements in order to continue in the program.

Work for the Ph.D. includes course work, a comprehensive exam, a clinical or academic internship, and a dissertation. Most students complete the program's required course work in two or three years and take one or two years to complete the internship and dissertation.

The Ph.D. program in couple and family therapy requires the following work.

DEPARTMENT CORE
All of these:

RCE:7353 Advanced Counseling and Psychotherapy 3 s.h.
RCE:7357 Advanced Group Counseling and Psychotherapy 3 s.h.
RCE:7400 Seminar: Ethics and Issues in Counseling 3 s.h.
RCE:7451 Advanced Multiculturalism 3 s.h.

REQUIRED PH.D. RESEARCH COURSES
Students must complete a specific sequence of research courses which include distributed course work in both qualitative and quantitative areas. They select from doctoral research courses listed at RCE Doctoral Research Requirements.

PROGRAM REQUIREMENTS

RCE:5262 Advanced Couple and Family Therapy 3 s.h.
RCE:7361 Advanced Practicum in Couple and Family Therapy (must enroll multiple times for total of 9 s.h.) 9 s.h.
RCE:7389 Seminar in Couple Intervention Research 3 s.h.
RCE:7399 Supervision in Couple and Family Therapy 3 s.h.
RCE:7404 Seminar in Child and Adolescent Intervention Research 3 s.h.
RCE:7465 Internship in Counselor Education 3 s.h.

MINOR AREA
In collaboration with the advisor and the curriculum plan committee, each student plans a minor area and selects a minimum of 9 s.h. of course work for it.

COMPREHENSIVE EXAMINATION
The comprehensive examination consists of a portfolio a student has compiled during the program and its oral defense once course work has been completed.

INTERNSHIP
Students must complete a clinical or academic internship.

RCE:7465 Internship in Counselor Education 3 s.h.
DISSECTIOM
Work for the doctoral dissertation employs a student's independent skills in conducting original research. The dissertation process is supervised by a student's advisor. Depending on a student's research questions, the dissertation may require quantitative, qualitative, or mixed methods and may involve data collection or the secondary analysis of an existing data set. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee.

RCE:7493 Ph.D. Thesis 10-15 s.h.

ADMISSION
Applicants to any of the department's graduate programs must meet the department's general admission requirements; see "Admission" toward the end of this Catalog section.

Applicants should have a graduate g.p.a. of at least 3.00 and a Graduate Record Exam (GRE) General Test combined verbal and quantitative score of at least 300 on the revised test or at least 1,100 on the old test. They also must hold a master's degree in couple and family therapy/marriage and family therapy from a Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE)-accredited program or the equivalent.

Students are admitted for fall entry. All application materials should be received at the University on or before December 31, when the faculty begins evaluating applications. The program requires an interview with the faculty, in person or by telephone. Generally, the interview is scheduled once complete application materials have been received.

M.A.: Rehabilitation and Mental Health Counseling
The program prepares professional counselors to provide assistance in psychological wellness, employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their own functional needs. It also prepares counselors in mental health counseling/psychiatric rehabilitation to obtain licensure as professionals who provide services in mental health settings.

Rehabilitation and mental health counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans Affairs vocational rehabilitation programs; independent living centers; community-based rehabilitation centers and supported employment; community mental health centers; psychiatric rehabilitation programs; and private for-profit worker's compensation and insurance rehabilitation agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate an individual's needs. Assessment, personal and vocational counseling, development of rehabilitation and treatment plans, case management, service coordination, psychosocial adjustment, job development, placement, and follow-up are typical services that rehabilitation and mental health counselors provide.

The M.A. program in rehabilitation and mental health counseling is accredited by the Council on Rehabilitation Education (CORE) and the Council for Accreditation of Counseling and Related Educational Programs (CACREP) in clinical mental health counseling.

Graduates of the M.A. program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRCC) and the National Board for Certified Counselors. By completing the program's course work, students also complete the courses they must take in order to apply for licensure as mental health counselors in Iowa.

The Master of Arts program in rehabilitation and mental health counseling requires a minimum of 60 s.h. of graduate credit. Full-time students can complete the program in approximately 21 months (four semesters plus two summer sessions).

The M.A. curriculum blends academic work with supervised clinical experiences. Students take three semesters of practicum concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to rehabilitation and community mental health agencies or facilities that meet CORE and CACREP accreditation standards and that have programs or clientele who match a student's interests and educational objectives. Clinical placements require criminal background checks.

Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

The M.A. program in rehabilitation and mental health counseling requires the following work.

DEPARTMENT REQUIREMENTS
All of these:

RCE:5202 Introduction to Group Counseling 3 s.h.
RCE:5221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
RCE:5250 Multiculturalism in Helping Professions (or equivalent) 3 s.h.
RCE:5270 Issues and Ethics in Counseling 3 s.h.
RCE:5276 Research in Rehabilitation and Mental Health Counseling 3 s.h.
RCE:5278 Applied Microcounseling 3 s.h.

PROGRAM REQUIREMENTS
All of these:

RCE:5210 Rehabilitation Client Assessment 3 s.h.
RCE:5241 Introduction to Rehabilitation and Mental Health Counseling 3 s.h.
RCE:5247 Medical Aspects of Disability 3 s.h.
RCE:5248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation 3 s.h.
RCE:5249 Psychiatric Disorders and Interventions 3 s.h.
RCE:6341 Job Development Placement and Follow-up 3 s.h.
RCE:6342 Psychosocial and Developmental Aspects 3 s.h.

CLINICAL PRACTICE
All of these:
Ph.D.: Rehabilitation Counselor Education

The Doctor of Philosophy program in rehabilitation counselor education requires a minimum of 90 s.h. of graduate credit. The program prepares professionals for leadership roles in rehabilitation counselor education, research, administration, and service delivery systems. It provides rehabilitation counselors the opportunity to master knowledge; clinical, teaching, and supervisory skills; and research competencies at the most advanced levels.

Ph.D. students focus on three areas of advanced development: rehabilitation counselor education and supervision, research, and professional practice. The program is flexible, permitting students to pursue individualized plans of study within the required curriculum. Ph.D. graduates are expected to have sufficient knowledge and skill to teach at colleges and universities, supervise other professionals, and provide clinical services to clients. They also should have competencies to engage in and evaluate theoretical, qualitative, and quantitative research.

Each student is required to submit a curriculum plan. The rehabilitation counseling faculty reviews each student annually. Students must meet the department’s requirements in order to continue in the program.

The 90 s.h. required for the degree may include credit for relevant course work completed for a master’s degree. This combination of master’s and doctoral course work ensures exposure to vocational and psychiatric rehabilitation as well as to independent living rehabilitation and community-based counseling processes, concepts, programs, and services.

Students who are not eligible for certification by the Commission on Rehabilitation Counselor Certification (CRCC) may be required to take courses to become eligible.

Most students complete their course work and comprehensive exam in three years and take a fourth year to complete the dissertation.

The Ph.D. program in rehabilitation counselor education requires the following work.

DEPARTMENT CORE
All of these:
- RCE:7255 Advanced Career Development and Counseling (or equivalent)
- RCE:7353 Advanced Counseling and Psychotherapy
- RCE:7357 Advanced Group Counseling and Psychotherapy
- RCE:7400 Seminar: Ethics and Issues in Counseling

PROGRAM REQUIREMENTS
Students are expected to have completed core rehabilitation counseling requirements during master’s degree work (see “M.A.: Rehabilitation and Mental Health Counseling” above). The advisor and program faculty determine which master’s-level courses must be taken to correct deficiencies. Students also must complete the following.

RCE:7360 Advanced Practicum in Counseling (section 1) 3 s.h.
RCE:7369 Advanced Seminar in Rehabilitation Counseling 3 s.h.
RCE:7380 Practicum in College Teaching 1-3 s.h.
RCE:7385 Teaching and Learning in Higher Education 3 s.h.
RCE:7450 Advanced Social Psychology of Disability 3 s.h.
RCE:7454 Supervision Theory and Practice 3 s.h.
RCE:7455 Practicum in Clinical Supervision 3 s.h.
RCE:7462 Advanced Practicum in Clinical Teaching 3 s.h.
PSQF:6217 Seminar in College Teaching 1-3 s.h.
REQUIRED PH.D. RESEARCH COURSES
Students must complete a specific sequence of research courses which include distributed course work in both qualitative and quantitative areas. They select from doctoral research courses listed at RCE Doctoral Research Requirements.

MINOR AREA
Students plan a minor area in collaboration with their major advisor and curriculum plan committee. The minor area must be outside the department. Students select a minimum of 9 s.h. of course work in the minor area, in collaboration with their minor advisor and with the approval of their curriculum plan committee.

COMPREHENSIVE EXAMINATION
The comprehensive examination consists of three exams that total nine hours. They cover the department core (three hours), rehabilitation counseling—theory, practice, and research (three hours), and the minor area (three hours).

DISSERTATION
The dissertation is a major research study planned in collaboration with a student’s major advisor. At least two rehabilitation counseling faculty members serve on the dissertation committee; one of them chairs or co-chairs the committee.

RCE:7493 Ph.D. Thesis 10-15 s.h.

ADMISSION
Applicants to any of the department's graduate programs must meet the department's general admission requirements; see "Admission" toward the end of this Catalog section.

Applicants to the Ph.D. program in rehabilitation counselor education should have a master's degree in rehabilitation counseling or a related area and a graduate g.p.a. of 3.00 or higher. One year of full-time work experience in rehabilitation or a related field is strongly encouraged. Applicants should submit a written statement of purpose for pursuing the Ph.D. in rehabilitation counselor education and a statement of personal career objectives, official score on the Graduate Record Exam (GRE) General Test, and three letters of recommendation. A personal interview is required.

Applications are accepted for fall, spring, or summer entry; fall entry is strongly advised. Faculty consideration of applications begins January 15 for fall entry, November 15 for spring entry, and April 1 for summer entry.

M.A.: School Counseling
The Master of Arts program in school counseling requires a minimum of 54 s.h. of graduate credit. The program prepares individuals to work effectively as counselors in K-12 school settings. It is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Successful graduates are eligible for K-12 school counselor licensure in Iowa. Students may apply to the National Board for Certified Counselors at the completion of their programs. They also may earn an endorsement in talented and gifted education or a certificate from the Belin-Blank Center for Gifted Education by taking additional course work.

During the first few semesters, students take core cognate courses, including course work on gifted education, and the microcounseling clinical skills laboratory. Then they enter a counseling practicum followed by an internship. Students who enter without teaching licensure are required to take additional course work in education —EPLS:3000 Foundations of Education, EDTL:4900 Foundations of Special Education, and PSQF:6200 Educational Psychology or equivalent—to meet school counselor licensure standards. Students are expected to complete at least 100 clock hours in practicum and 600 clock hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students must complete program and department core courses as outlined on the Department of Rehabilitation and Counselor Education web site before enrolling in RCE:6300 Practicum in School Counseling for the spring semester of their second year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student’s progress is reviewed periodically by the major advisor. Students who have successfully completed all prerequisites for RCE:6300 Practicum in School Counseling are reviewed in the semester before they take the practicum course, to assure that they are prepared for it. During the summer, students are evaluated to assure their readiness for the internship RCE:6321 Internship in Elementary School Counseling or RCE:6322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

The M.A. program in school counseling requires the following work.

REQUIRED COURSES
The following schedule of required courses reflects a three-year program of study. Students who do not have teacher licensure are required to complete at least three additional courses in education before the third year of classes.

RCE:4137 Introduction to Educating Gifted Students 3 s.h.
RCE:5200 Professional School Counselor 3 s.h.
RCE:5202 Introduction to Group Counseling 3 s.h.
RCE:5203 Career Development 3 s.h.
RCE:5204 School Culture and Classroom Management for School Counselors 3 s.h.
RCE:5221 Theories of Counseling and Human Development Across the Life Span 3 s.h.
RCE:5222 Counseling Children and Adolescents in Schools 3 s.h.
RCE:5223 Counseling Gifted and Talented Students 3 s.h.
RCE:5230 School Counseling Program Leadership and Management 3 s.h.
RCE:5250 Multiculturalism in Helping Professions 3 s.h.
RCE:5254 Assessment and Appraisal 3 s.h.
RCE:5256 Action Research: School-Based Field Research 3 s.h.
should have an undergraduate g.p.a. of at least 3.00. 

3.00; those who have not been granted a graduate degree Ph.D. applicants should have a graduate g.p.a. of at least 

least 3.00. M.A. applicants should have an undergraduate g.p.a. of at 

individual program admission decisions. The following admission standards are considered for 

interview. The department may request a personal or telephone 

Applicants must submit the following: 

Regulations of the Graduate College. 

Applicants also must meet the admission requirements 

must satisfy the following admission requirements. Applicants to any of the department's degree programs 

should be submitted by January 25th. Applications are accepted for summer and fall entry and 

statement. Graduate Record Exam (GRE) General Test 

or adolescents, which they must document in a written 

prefer that applicants have one year of teaching experience or successful experiences with children and/ 

undergraduate g.p.a. of 3.00 or higher. The department 

the M.A. program in school counseling should have an 

comprehensive exam in the departmental core and school counseling. An oral exam also is required 

unless waived by the comprehensive exam committee. 

ADMISSION 

Applicants to any of the department's graduate programs must meet the department's general admission 

requirements; see "Admission" below. Applicants to the M.A. program in school counseling should have an undergraduate g.p.a. of 3.00 or higher. The department 

The criteria listed above are minimum standards for admission. Final admission decisions are made by 

Some of the department's degree programs have additional admission requirements; see the 

students enrolled in a counseling graduate program, or the AAMFT Code of Ethics (American Association for Marriage and Family Therapy) for graduate students in couples and family therapy, and 

the AAMFT Code of Ethics (American Counseling Association) for students enrolled in a counseling graduate 

maintain professional behavior consistent with the ACA Code of Ethics (American Counseling Association) for students enrolled in a counseling graduate 

demonstrate progress toward the degree through successful completion of semester hours specified 

in the curriculum plan and active registration each session (exceptions may be approved by the advisor). Each student's academic and professional progress is reviewed annually. A written report is provided to the 

M.A. and Ph.D. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are
notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, a student may be removed from the program. Each student is allowed one probational status during his or her program of study.

Financial Support

Students in the department may apply for a wide variety of graduate assistantships. For example, many of the University's student service units award graduate assistantships. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

Facilities

An on-campus counseling suite serves as a laboratory for training. In addition, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed at approved sites nationwide.

Courses

Lower-Level Undergraduate

RCE:1029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

RCE:1030 Belin-Blank Center Seminar 1 s.h.
Presentations and discussions by University resource experts and Belin-Blank Center for Gifted Education staff. Requirements: Belin-Blank Center student.

RCE:2081 Making a Vocational-Educational Choice 2-3 s.h.
Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.

Upper-Level Undergraduate and Graduate

RCE:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as PSQF:4081, EALL:4081, EDL:4081, EPLS:4081.

RCE:4110 Psychology of Food and Mood 3 s.h.
Neurobehavioral and psychological determinants of food preference, behavior, and mood management; cultural meanings of food in North America, obesity, dieting, disordered eating; how we use food as a means of managing or damaging our food and health.

RCE:4111 Relationships and Workplace Dynamics: Keys to a Successful Career 3 s.h.
Examination of human relations, workplace organizational structures, and workplace expectations of team work, diversity, conflict, conflict resolution and communication; leadership, employees' effect on leadership, individual self-awareness, team structures, leadership habits, behaviors and organizational influences.

RCE:4119 Family Issues in Giftedness 1 s.h.
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/family relationships.

RCE:4120 Psychology of Giftedness 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as PSQF:4120.

RCE:4121 Identification of Students for Gifted Programs 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as PSQF:4121.

RCE:4123 Gender Issues and Giftedness 1 s.h.
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.

RCE:4124 Ethnic and Cultural Issues and Giftedness 1 s.h.
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.

RCE:4125 Counseling and Psychological Needs of the Gifted 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as PSQF:4125.

RCE:4126 Cognitive and Affective Needs of Underachieving Gifted 1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as PSQF:4126.

RCE:4127 Research and Theory in Talent/Giftedness 1 s.h.
Biennial research symposium. Same as PSQF:4127.

RCE:4128 Advanced Leadership Seminar in Gifted Education 1 s.h.
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.

RCE:4129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as PSQF:4129.

RCE:4130 Human Sexuality 3 s.h.
How young adults experience, discuss, and engage in sex; short essays.

RCE:4131 Loss, Death, and Bereavement 3 s.h.
Psychological study of death, grief, loss, bereavement, and coping from a multidimensional and multidisciplinary perspective; loss and grief as natural experiences that are not often explicitly discussed; overview of topics relating to death, including multicultural attitudes toward death, death practices, theories on loss and bereavement, and grieving throughout the life cycle; hospice and palliative care, suicide, and making meaning of life out of death; development of critical thinking skills by engaging in empirically-based discussions.

RCE:4132 Introduction to Addictions and Impulse Control Disorders 3 s.h.
Exploration of addictions and impulse control disorders; legal, social, physical, and emotional issues related to addictions and impulse control disorders.

RCE:4137 Introduction to Educating Gifted Students 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as EDTL:4137.

RCE:4140 Foundations of Leadership for Community Agencies 3 s.h.
Preparation to become effective employees and leaders; emphasis on leadership roles in clinical and other human service or health care settings; how leadership transcends job title associated with high work performance; experiential activities that illustrate key didactic concepts and didactic lecture review, written assignments, experiential assignment, in-depth discussions illustrating key concepts.

RCE:4145 Marriage and Family Interaction 3 s.h.
Contemporary American marriage, family relationships; mate selection.

RCE:4162 Introduction to Couple and Family Therapy 3 s.h.
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques.

RCE:4173 Trauma Across the Lifespan 3 s.h.
Current theory and practice models related to trauma and crisis intervention; overview of multi-system level definitions of trauma experience (historical, individual, interpersonal, family, organizational, community, global); various approaches to trauma response theory; unique contributions that counselors offer (strength, resiliency, coping); commitments to multicultural and systems factors; macro- to micro-level understanding of trauma.

RCE:4174 Positive Psychology 3 s.h.
Promotion of human potential as a focus for counseling professionals that provides a supplement to diagnosis and treatment of pathology; how to achieve happiness, resilience, wellness, and life satisfaction through enhancement of human strengths and virtues.

RCE:4175 Motivational Interviewing 3 s.h.
Motivational Interviewing (Miller & Rollnick) and the stages of change model.

RCE:4176 Child Abuse: Assessment, Intervention, and Advocacy 3 s.h.
Preparation for work involving abused children or child abuse issues; appropriate for careers in counseling, education, health sciences, law, psychology, social work, and so forth; interactive approach.

RCE:4177 Life After Service: Veterans in College 3 s.h.
Introduction to various resources on campus related to increasing student veterans’ success as college students; topics and assignments specifically tailored to military service-connected students (e.g., ROTC students, national guard or reserve military members, active duty veterans); topics include vocational rehabilitation, GI Bill, current events, and health care (sleep, TBI, traumatic stress responses, substance abuse); development of academic skills for writing, more effective studying, improved reading and note taking.

RCE:4178 Microcounseling 1,3 s.h.
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.

RCE:4179 Sexuality Within the Helping Professions 3 s.h.
Relationship between sexuality and mental health; varied ethical and professional issues in sex therapy.

RCE:4180 Topical Seminar for Helping Professionals arr.
Topics for the continuing education of counselors and related professionals.

RCE:4185 Introduction to Substance Abuse 3 s.h.
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.

RCE:4187 Introduction to Assistive Technology 3 s.h.
How assistive technology can be used for attainment of goals in education or work. Same as EDTL:4987.
RCE:4188 Practicum in Teaching and Curriculum Development in Gifted Education
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as EDTL:4188.

RCE:4190 Group Processes for Related Professions
Small-group procedures for personal and organizational development in educational settings; discussions of theoretical and ethical issues, multicultural considerations, and research findings supplemented with demonstrations; participation in a personal growth group.

RCE:4191 Advocacy: Awareness, Assertiveness, and Activism
Introduction to advocacy skills—communicate, convey, negotiate or assert interests, desires, needs, and rights for self or others; opportunity to design and implement a plan of change; ecological model of human interaction that suggests a person must be viewed within context of his or her environment(s); how having power on a personal and social level impacts one's environment and is central to a person's well-being; advocacy as a central function of helping professions.

RCE:4192 Group Leadership in Human Sexuality
How to teach human sexuality; how to help students achieve an open-minded yet responsible attitude toward their own and others' sexuality. Prerequisites: RCE:4130.

RCE:4193 Individual Instruction—Undergraduate

RCE:4194 Interpersonal Effectiveness
Paradigms and techniques that enhance interpersonal relationship skills.

RCE:4195 Ethics in Human Relations and Counseling
Morality and ethics; ethical issues; models and techniques for effective ethical decision making in personal and professional interactions.

RCE:4197 Citizenship in a Multicultural Society
Human relationships in the context of societal oppressions such as racism, sexism, able-bodiedism, and heterosexism.

RCE:4199 Counseling for Related Professions
Counseling theories and techniques; ethical and multicultural considerations; small-group discussions, demonstrations, lectures.

Graduate

RCE:5200 Professional School Counselor
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues. Requirements: admission to school counseling program.

RCE:5202 Introduction to Group Counseling

RCE:5203 Career Development
Preparation for counselors and student affairs professionals; career development concepts and theories, family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Requirements: rehabilitation and counselor education enrollment.

RCE:5204 School Culture and Classroom Management for School Counselors
American public elementary and secondary schools and the school counselor's role; classroom management for school counselors.

RCE:5210 Rehabilitation Client Assessment
Process and practice of assessing persons with disabilities for rehabilitation plan development and decision making; multicultural and ethical considerations.

RCE:5221 Theories of Counseling and Human Development Across the Life Span

RCE:5222 Counseling Children and Adolescents in Schools
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisites: RCE:5221 or RCE:5278.

RCE:5223 Counseling Gifted and Talented Students
Learning theories and best practices related to school counseling of gifted and talented students; academic, career, and personal/social development. Prerequisites: RCE:4137.

RCE:5226 Assessment of Giftedness
Training and practice in assessment of gifted children. Same as PSQF:5226.

RCE:5230 School Counseling Program Leadership and Management
Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability; behavioral consultation and collaboration; ethical, multicultural, family considerations. Corequisites: RCE:6321 or RCE:6322.

RCE:5237 Seminar in Gifted Education
Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Requirements: work as teacher with Belin Fellowship.

RCE:5238 Advanced Seminar in Gifted Education
Supervisory, administrative, and research issues; fellowships for seminar participants. Prerequisites: RCE:5237.

**RCE:5241 Introduction to Rehabilitation and Mental Health Counseling** 3 s.h.

Historical, philosophical, legislative, societal, and multicultural overview of rehabilitation and mental health process and practice in community-based settings; roles of rehabilitation and mental health professionals, nature of agencies, resources, contemporary issues and ethics.

**RCE:5247 Medical Aspects of Disability** 3 s.h.

Medical evaluation as part of the rehabilitation process; body systems, medical terminology, medical description of disabilities; functional limitations; projection of potential for rehabilitation and mental health applied to planning and placement.

**RCE:5248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation** 3 s.h.

Psychiatric conditions, their diagnostic criteria using the DSM-IV-TR, treatment planning considerations; medical and psychiatric rehabilitation models, interrelationship in providing services to persons with psychiatric disabilities; functional assessment and client-driven rehabilitation planning for community reintegration. Requirements: rehabilitation and counselor education enrollment.

**RCE:5249 Psychiatric Disorders and Interventions** 3 s.h.

Description, classification, and theoretical perspectives related to psychiatric disorders; models of intervention in community-based settings.

**RCE:5250 Multiculturalism in Helping Professions** 3 s.h.

Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of a multiculturally diverse society; knowledge, skill, self-awareness components relevant for helping practitioners. Requirements: rehabilitation and counselor education enrollment.

**RCE:5254 Assessment and Appraisal** 3 s.h.

Didactic experiences related to individual and group assessment and appraisal; for school professionals.

**RCE:5256 Action Research: School-Based Field Research** 3 s.h.

Field-based research experiences in school settings; students conceptualize, design, conduct, and articulate school-based research findings. Prerequisites: RCE:5254.

**RCE:5262 Advanced Couple and Family Therapy** 3 s.h.

Introduction to couple and family therapy, theory, ethics, and techniques as applied to problems of marriage and family over life span; multicultural considerations. Requirements: advanced graduate standing. Recommendations: RCE:4162.

**RCE:5270 Issues and Ethics in Counseling** 3 s.h.

Ethical standards and decision making; current issues; ethical, legal, and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

**RCE:5276 Research in Rehabilitation and Mental Health Counseling** 3 s.h.

Current state of counseling practice and emphasis on accountability as a professional quality; need for counselors to be knowledgeable and skillful in identifying and using “what works” in counseling endeavors; introduction to major principles, concepts, and practices in social science research, including program evaluation; preparing counselors-in-training as future research consumers. Recommendations: rehabilitation and mental health counseling major.

**RCE:5278 Applied Microcounseling** 3 s.h.

Development of basic and advanced counseling skills; preparation for work in education and community settings.

**RCE:5280 Topical Seminar in RCE** arr.

Special topics dealing with contemporary problems of concern to counselors in specific settings.

**RCE:6236 Counseling and Psychotherapy for Persons with Disabilities** 3 s.h.

Preparation for future psychologists and counselors to work with persons with disabilities throughout the lifespan; examination of disability issues within the context of present and past theoretical constructs. Requirements: enrollment in psychological and quantitative foundations or rehabilitation and counselor education. Same as PSQF:6236.

**RCE:6263 Consultation Theory and Practice** 3 s.h.

Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as PSQF:6263.

**RCE:6293 Individual Instruction--Graduate** arr.

**RCE:6300 Practicum in School Counseling** 3 s.h.

Supervised experience counseling and consulting in elementary and secondary school settings. Requirements: completion of school counseling core courses.

**RCE:6321 Internship in Elementary School Counseling** 3 s.h.

Supervised placement in an elementary school setting; performance of tasks, responsibilities of an elementary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

**RCE:6322 Internship in Secondary School Counseling** 3 s.h.

Supervised placement in a secondary school setting; performance of tasks, responsibilities of a secondary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

**RCE:6323 Internship in Middle School Counseling** 3 s.h.
Supervised placement in a middle school setting; performance of tasks and responsibilities of a middle school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

**RCE:6341 Job Development Placement and Follow-up**  
3 s.h.  
Obtaining appropriate jobs for individuals with disabilities who have received rehabilitation services; client, counselor, employer, job specifications.

**RCE:6342 Psychosocial and Developmental Aspects**  
3 s.h.  
Dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

**RCE:6348 Prepracticum in Rehabilitation and Mental Health Counseling**  
3 s.h.  
Counseling laboratory to promote knowledge, skills, and awareness of effective and ethical counseling methods, and fundamentals of helping relationships and case management. Prerequisites: RCE:5221. Corequisites: RCE:5278.

**RCE:6349 Practicum in Rehabilitation and Mental Health Counseling**  
arr.  
Experience in a community agency serving individuals with disabilities and mental health disorders, supervised by a certified rehabilitation counselor in an approved site. Prerequisites: RCE:6348.

**RCE:6350 Internship I: Rehabilitation and Mental Health Counseling**  
3-6 s.h.  
Experience to enhance competency in agencies and with persons represented in student’s specialty area. Prerequisites: RCE:6349.

**RCE:6352 Internship II: Rehabilitation and Mental Health Counseling**  
arr.  
Full-time clinical experience in rehabilitation and mental health settings; training in wide range of rehabilitation and mental health functions under supervision of a qualified M.A. counselor with appropriate credentials. Prerequisites: RCE:6350.

**RCE:6393 M.A. Thesis**  
arr.

**RCE:6394 M.A. Equivalency Research**  
1-3 s.h.  
Preparation for comprehensive examination.

**RCE:7255 Advanced Career Development and Counseling**  
3 s.h.  
Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.

**RCE:7311 Practicum in Counseling and Psychological Services for Gifted Students**  
1-6 s.h.  
Prerequisites: RCE:4178. Requirements: course work in counseling education, counseling psychology, school psychology, educational psychology, or related fields. Same as PSQF:7311.

**RCE:7338 Essentials of Qualitative Inquiry**  
3 s.h.  
Principles, processes of qualitative research in education; methods of design, data collection and analysis, interpretation, trustworthiness. Requirements: Ph.D. enrollment and introductory research course.

**RCE:7347 Home/School/Community: System Interventions**  
3 s.h.  
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as PSQF:7347.

**RCE:7353 Advanced Counseling and Psychotherapy**  
3 s.h.  
Theories, techniques, and ethics of counseling clients with personal and interpersonal problems; ethical and multicultural considerations.

**RCE:7357 Advanced Group Counseling and Psychotherapy**  
3 s.h.  
Theories and techniques of group counseling and psychotherapy; integration of theory, experience, and research in group counseling; ethical and multicultural considerations.

**RCE:7360 Advanced Practicum in Counseling**  
arr.  
Supervised practice in counseling; intensive analysis of counselor ethics, styles, methods. Advanced graduate standing in counselor education and consent of instructor required. Prerequisites: RCE:5221. Requirements: Ph.D. enrollment, advanced graduate standing in counselor education, and counseling introductory practicum; and concurrent enrollment in RCE:5249 for rehabilitation counselor education student.

**RCE:7361 Advanced Practicum in Couple and Family Therapy**  
1-3 s.h.  
Opportunity to accumulate client contact and supervision hours towards graduation and licensure; conceptual and executive skills, observational skills and abilities to work as a member of a therapeutic team, awareness of how personal growth and development as a therapist impacts work with clients, comfort and motivation to learn multiple training levels provided, creation of collaborative and supportive atmosphere on all practicum levels. Requirements: enrollment in couple and family therapy program.

**RCE:7369 Advanced Seminar in Rehabilitation Counseling**  
3 s.h.  
Philosophy, theory, research base, practice of rehabilitation counseling, psychology; ethical and multicultural considerations; relationship to disability studies; psychological aspects of disability, client assessment, history, systems, contemporary issues.

**RCE:7380 Practicum in College Teaching**  
arr.  
Supervised college teaching experience in counselor education courses; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations.

**RCE:7385 Teaching and Learning in Higher Education**  
3 s.h.  
...
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as PSQF:7385, EPLS:7385, GRAD:7385, EDTL:7385.

RCE:7388 Family Development 3 s.h.
Overview of research relating to family development, family structure, and cultural/ethnic diversity; how research can be applied to clinical practice; focus on strengths and challenges of families with varying structures, cultural dimensions in family functioning, developmental perspectives on family functioning, and how these factors can advance family systems based on research and practice.

RCE:7389 Seminar in Couple Intervention Research 3 s.h.
Overview of couple intervention and outcome research; focus on evidence-based couple therapies (i.e., Emotionally Focused Couple Therapy, Behavioral Couple Therapy, work of John Gottman); research addressing effectiveness and efficiency of couple interventions in treatment of couple distress issues highly comorbid with distress, including review of mental and physical health problems; research addressing factors associated with treatment outcomes.

RCE:7399 Supervision in Couple and Family Therapy 3 s.h.
Supervision of Master's-level couple and family therapy students; mentoring supervision received from supervision instructor; assignments reflect requirements for AAMFT Approved Supervisor designation; fulfills didactic requirement for AAMFT Approved Supervisor status. Requirements: enrollment in couple and family therapy program.

RCE:7400 Seminar: Ethics and Issues in Counseling 3 s.h.
Ethical, professional, and contemporary issues in counseling practice, education, and research. Requirements: rehabilitation and counselor education Ph.D. enrollment.

RCE:7404 Seminar in Child and Adolescent Intervention Research 3 s.h.
Review and analysis of pertinent literature in area of child and adolescent intervention research; stage 1-3 clinical trials and federal funding process of intervention research in family therapy and family psychology fields; focus on published outcome studies in areas of childhood disorders, Filial Therapy, Functional Family Therapy, Multisystemic Therapy, and Multi-Dimensional Family Therapy; published and unpublished outcome studies of six research groups within the last ten years and their federally funded research projects. Prerequisites: RCE:5262.

RCE:7438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education 3 s.h.
Exploration of qualitative research at advanced theoretical, practical, and technical level, inside and outside a typical classroom environment; scholarly discussions. Prerequisites: RCE:7338.

RCE:7440 Seminar in Family-Based Play Therapy Interventions 3 s.h.
Inclusion of children in family therapy sessions; varied therapeutic strategies to effectively work with young children and their parents; employment of developmental lens (therapeutic techniques largely depend on children's age and developmental stage) and theoretical lens (many techniques are linked to certain theoretical approaches); development of therapeutic skills with application of varied therapeutic approaches in clinical work; does not train students to become play therapists and/or child therapists. Prerequisites: RCE:5262.

RCE:7444 Qualitative Research in the Multicultural Context 3 s.h.
Exploration of qualitative research in multicultural context; application of knowledge gained in introductory qualitative courses; utilization of qualitative skill sets for completion of a multicultural-focused project; multicultural field research project which may involve travel or virtual connections outside of regular class time; field experience projects with online problem-based learning activities, consultation, and virtual supervised small group work. Prerequisites: PSQF:6235 or RCE:5250 or RCE:7338.

RCE:7448 Integrated Developmental Theory and Counseling 3 s.h.
Advanced issues, theoretical perspectives, and research in human development across the life span; influential theories in human development; related implications for counseling, supervision, and research; integrated understanding of perspectives through position papers, reflection papers, and research proposal project. Requirements: graduate standing in rehabilitation and counselor education.

RCE:7450 Advanced Social Psychology of Disability 3 s.h.
Disability issues from individual and societal perspectives; psychosocial aspects of disability and disability studies; seminar. Requirements: Ph.D. enrollment.

RCE:7451 Advanced Multiculturalism 3 s.h.
Impact of culture, race, ethnicity, and intersections of identity on counseling in higher education and student affairs settings. Prerequisites: RCE:5250.

RCE:7454 Supervision Theory and Practice 3 s.h.
Conceptual models, ethics, multicultural considerations, research, and program design for counselor supervision and consultation.

RCE:7455 Practicum in Clinical Supervision arr.
Supervision of students enrolled in counseling practicum. Prerequisites: RCE:7454.

RCE:7457 Seminar: Professional Orientation to Counselor Education and Supervision 3 s.h.
Professional orientation issues in counselor education and supervision; related documents, bylaws, professional expectations.

RCE:7458 Seminar: Current Issues and Trends in Counselor Education and Supervision 4 s.h.
Recent trends, including debates and findings in literature related to best practices for the profession.
RCE:7459 Seminar: Leadership and Advocacy in Counselor Education and Supervision
3 s.h.
Leadership principles and theories, including applications to counselor education; student leadership potential and skills explored through self-reflective model.

RCE:7460 Seminar: Research in Counseling
3 s.h.
Methods, examples, ethics, multicultural issues, problems of counseling research. Requirements: Ph.D. enrollment.

RCE:7461 Practicum in Research
arr.
Experience designing and implementing research relevant to student's plan of study, under supervision of rehabilitation and counselor education faculty member.

RCE:7462 Advanced Practicum in Clinical Teaching
1-3 s.h.
Preparation for doctoral students to conduct didactic and experiential learning opportunities with counselors in training. Prerequisites: RCE:7454.

RCE:7465 Internship in Counselor Education
1-3 s.h.
Supervised experience in professional counseling, counselor supervision, consultation, teaching counseling; field placement and seminar.

RCE:7493 Ph.D. Thesis
arr.
Science Education

Chair, Department of Teaching and Learning
• John Hosp

Coordinator, Science Education
• Soonhye Park

Undergraduate major: science education (B.S.)
Graduate degrees: M.A.T. in science education; M.S. in science education; Ph.D. in science education
Faculty: http://www.education.uiowa.edu/teach/science/people
Web site: http://www.education.uiowa.edu/teach/science/home

The Science Education Program provides preparation in
more than one discipline of science; a consideration of
science from a philosophical, historical, and sociological
perspective; an introduction to applied science
(technology); and an education sequence.

Program planning in science education requires the
cooperation and involvement of a variety of University
departments and colleges. Most of the program's
requirements are drawn from courses offered by these
varied academic units.

Undergraduate Program of Study
• Major in science education (Bachelor of Science)
The major in science education is interdisciplinary. It is
intended for students interested in education; it is not
intended to prepare students for advanced study in one
area of science. When graduates of the Science Education
Program elect to pursue graduate study in a specific area
of science, they often must complete additional course
work in that discipline after they are admitted to the
Graduate College.

Students majoring in science education earn a Bachelor of
Science degree, which is awarded by the College of Liberal
Arts and Sciences.

SPECIAL RULES
The Science Education Program may involve many faculty
advisors and more than one college or department.
Consequently, the following special rules apply to science
education students.

At least 10 s.h. of graded credit in science must be
earned at the University of Iowa.

No credit from the CLEP Natural Science General
Examination may be applied toward the major in
science education.

Courses for the major may not be taken pass/
nonpass. Grades from all courses applied toward the
science education major are used in computing a
student's grade-point average in the major, both at
the University of Iowa and overall.

Since mathematics forms an integral part of so many
aspects of modern science, all-science emphasis area
education students are urged to complete appropriate
advanced courses in both pure and applied mathematics
(including statistics and computer science) so that they
may be qualified to do graduate work and quantitative
research later.

Bachelor of Science
The Bachelor of Science with a major in science education
requires a minimum of 120 s.h., including at least 48-50
s.h. of work for the major. Students must maintain a
g.p.a. of at least 2.70 in all courses for the major and in
all UI courses for the major. They also must complete the
College of Liberal Arts and Sciences General Education
Program (p. 313).

The science education curriculum includes courses offered
by science departments in the College of Liberal Arts and
Sciences, science applications courses, and courses in the
history, philosophy, and sociology of science. Students
who complete the major gain:

• knowledge in two or more areas of science;
• a specified proficiency in mathematics as a tool of
science (with more mathematics study required for
the physical science emphases than for the biological
ones);
• a view of science from a historical/philosophical/
cultural perspective; and
• experience with the application of scientific knowledge.

The major offers five emphasis areas: all-science, biology,
chemistry, earth science, and physics.

The all-science emphasis area is open only to students
who will earn teacher licensure and would like equal
preparation in biology, chemistry, earth science, and
physics. Students who complete the all-science emphasis
area do not choose a secondary emphasis area. They must
complete all requirements for teacher licensure in order to
graduate in the all-science emphasis area.

Students who do not choose the all-science emphasis area
may elect whether or not to earn teacher licensure. They
choose a primary and a secondary emphasis area from
biology, chemistry, earth science, and physics; acquiring
depth in the primary emphasis area equivalent to six
semesters of sequential study and preparation in the
secondary area equivalent to four semesters of sequential
study.

All science education students must complete the
requirements for their emphasis area(s) plus the broad
field science block. Those who wish to earn teacher
licensure also must complete the College of Education's
Teacher Education Program (TEP), including the 48 s.h.
professional education sequence; see "B.S. with Teacher
Licensure" later in this section.

The major in science education requires the following
course work.

ALL-SCIENCE EMPHASIS AREA
Students who choose the all-science emphasis area do
not choose a secondary emphasis area. They complete a
minimum of 48 s.h. for the major, including at least 36 s.h.
in the following course work (at least 9 s.h. in each of the
four science disciplines—biology, chemistry, earth science,
and physics), plus 12 s.h. in the broad field science block.
They also must complete all requirements for teacher
licensure (see "B.S. with Teacher Licensure" below).

Biology—at least 9 s.h. from these:
BIOL:1411 Foundations of Biology 4 s.h.
BIOL:1412 Diversity of Form and Function 4 s.h.
BIOL:2211 Genes, Genomes, and the Human Condition 3 s.h.
BIOL:2673 Ecology 3-4 s.h.
BIOL:3172 Evolution 4 s.h.
HHP:3500 Human Physiology 3 s.h.

Chemistry—at least 9 s.h. from these:
CHEM:1110 Principles of Chemistry I 4 s.h.
CHEM:1120 Principles of Chemistry II 4 s.h.
CHEM:2021 Basic Measurements 3 s.h.
CHEM:2210 Organic Chemistry I 3 s.h.
CHEM:2220 Organic Chemistry II 3 s.h.

Earth science—at least 9 s.h. from these:
EES:1030 Introduction to Earth Science 3-4 s.h.
EES:1040 Evolution and the History of Life 3-4 s.h.
EES:1050 Introduction to Geology 4 s.h.
EES:1080 Introduction to Environmental Science 3-4 s.h.
EES:2831 Geologic Field Methods 3 s.h.
EES:3070 Marine Ecosystems and Conservation 3 s.h.

Physics—at least 9 s.h. chosen as follows.
At least one of these:
ASTR:1070 Stars, Galaxies, and the Universe 3-4 s.h.
PHYS:1200 Physics of Everyday Experience 3 s.h.

No more than one of these:
PHYS:1511 College Physics I 4 s.h.
PHYS:1611 Introductory Physics I 4 s.h.
PHYS:1701 Physics I 4 s.h.

No more than one of these:
PHYS:1512 College Physics II 4 s.h.
PHYS:1612 Introductory Physics II 3-4 s.h.
PHYS:1702 Physics II 4 s.h.

Additional requirements for the major:
Course work listed under "Broad Field Science Block" below 12 s.h.

**BIOLOGY EMPHASIS AREA**

Students who choose biology as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23-25 s.h. in the following biology course work plus at least 15 s.h. in a secondary emphasis area (chemistry, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

This sequence:

BIOL:1411-BIOL:1412 Foundations of Biology - Diversity of Form and Function 8 s.h.

One of these:

BIOL:1311 Human Genetics in the Twenty-First Century 3 s.h.
BIOL:2512 Fundamental Genetics 4 s.h.

One of these:

BIOL:2374 Biogeography 3 s.h.
BIOL:2673 Ecology 3 s.h.

One of these:

BIOL:1370 Understanding Evolution 3 s.h.
BIOL:3172 Evolution 4 s.h.

One of these:

BIOL:3343 Animal Physiology 3 s.h.
HHP:3500 Human Physiology 3 s.h.

One of these:

BIOC:3110 Biochemistry 3 s.h.
BIOC:2723 Cell Biology 3 s.h.
BIOC:3233 Introduction to Developmental Biology 3 s.h.
BIOC:3363 Plant Developmental Biology 3 s.h.

Additional requirements for the major:
Course work in a secondary emphasis area (chemistry, earth science, or physics) 15 s.h.
Course work listed under "Broad Field Science Block" below 12 s.h.

**CHEMISTRY EMPHASIS AREA**

Students who choose chemistry as their primary emphasis area complete a minimum of 49 s.h. for the major, including 22 s.h. in the following chemistry course work plus at least 15 s.h. in a secondary emphasis area (biology, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

All of these:

CHEM:1110 & CHEM:1120 Principles of Chemistry I-II 8 s.h.
CHEM:2210 Organic Chemistry I 3 s.h.
CHEM:2220 Organic Chemistry II 3 s.h.
CHEM:2410 Organic Chemistry Laboratory 3 s.h.
CHEM:3250 Inorganic Chemistry (spring) 2 s.h.

One of these:

BIOC:3110 Biochemistry 3 s.h.
CHEM:3110 Analytical Chemistry I 3 s.h.
CHEM:4431 Physical Chemistry I 3 s.h.

Additional requirements for the major:
Course work in a secondary emphasis area (chemistry, earth science, or physics) 15 s.h.
Course work listed under "Broad Field Science Block" below 12 s.h.

**EARTH SCIENCE EMPHASIS AREA**

Students who choose earth science as their primary emphasis area complete a minimum of 48 s.h. for the major, including at least 21 s.h. in the following earth science course work plus at least 15 s.h. in a secondary
emphasis area (biology, chemistry, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Both of these:
- **EES:1040 Evolution and the History of Life** 4 s.h.
- **EES:1080 Introduction to Environmental Science** 4 s.h.

One of these:
- **EES:1030 Introduction to Earth Science** 3-4 s.h.
- **EES:1050 Introduction to Geology** 4 s.h.

One of these:
- **EES:2831 Geologic Field Methods** 3 s.h.
- **EES:3000 Geologic Training Assignment** 1-3 s.h.
- **EES:3300 Sedimentary Geology** 4 s.h.
- **EES:3840 Structural Geology** 4 s.h.

One of these:
- **EES:3020 Earth Surface Processes** 3 s.h.
- **EES:3210 Principles of Paleontology** 3 s.h.
- **EES:3360 Soil Genesis and Geomorphology** 3 s.h.

One of these:
- **EES:1290 Energy and the Environment** 3 s.h.
- **GEOG:1050 Foundations of GIS** 3 s.h.
- **GEOG:4010 Field Methods in Physical Geography** 3 s.h.

One of these:
- **EES:3070 Marine Ecosystems and Conservation** 3 s.h.
- **EES:3080 Introduction to Oceanography** 2 s.h.

Additional requirements for the major:
- Course work in a secondary emphasis area (biology, chemistry, or earth science) 15 s.h.
- Course work listed under "Broad Field Science Block" below 12 s.h.

**PHYSICS EMPHASIS AREA**

Students who choose physics as their primary emphasis area complete a minimum of 47 s.h. for the major, including at least 20 s.h. in the following physics course work plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or earth science) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

One of these sequences:
- **PHYS:1511-PHYS:1512 College Physics I-II (if physics is a secondary emphasis area)** 8 s.h.
- **PHYS:1611-PHYS:1612 Introductory Physics I-II** 8 s.h.
- **PHYS:1701-PHYS:1702 Physics I-II** 8 s.h.

One of these:
- **PHYS:2703 Physics III** 4 s.h.
- **PHYS:3710 Intermediate Mechanics** 3 s.h.

One of these:
- **ASTR:1070 Stars, Galaxies, and the Universe** 3-4 s.h.
- **ASTR:1080 Exploration of the Solar System (if physics is a secondary emphasis area)** 3-4 s.h.
- **ASTR:1771 General Astronomy I** 4 s.h.

One of these:
- **PHYS:3811 Electricity and Magnetism I** 3 s.h.
- **PHYS:3850 Electronics** 4 s.h.

One of these:
- **PHYS:1200 Physics of Everyday Experience (if physics is a secondary emphasis area)** 3 s.h.
- **PHYS:1410 Physics of Sound** 3-4 s.h.

Additional requirements for the major:
- Course work in a secondary emphasis area (biology, chemistry, or earth science) 15 s.h.
- Course work listed under "Broad Field Science Block" below 12 s.h.

**BROAD FIELD SCIENCE BLOCK**

All science education students must complete the following broad field science block course work (12 s.h.) in addition to the requirements for their emphasis area(s).

This course:
- **SIED:4135 The Nature of Science** 4 s.h.

One of these:
- **SIED:4102 Societal and Educational Applications of Earth Science and Environmental** 4 s.h.
- **SIED:4103 Societal and Educational Applications of Biological Sciences** 4 s.h.

One of these:
- **SIED:4105 Societal and Educational Applications of Physical Sciences** 4 s.h.
- **SIED:4106 Societal and Educational Applications of Chemical Concepts** 4 s.h.

**B.S. with Teacher Licensure**

In order to earn licensure to teach in elementary and/or secondary schools, students must satisfy all requirements for the science education major and for graduation and must complete the College of Education's Teacher Education Program (TEP).

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

In order to be considered for admission to the TEP, students must have completed a minimum of 30 s.h. of course work with a cumulative g.p.a. of at least 3.00. Admission decisions are based on grade-point averages in science courses and other criteria relevant to teaching. A limited number of applicants are accepted to the TEP, so having the required grade-point average does not ensure admission. Contact the Office of Education Services for information about applying to the TEP.

The TEP requires the following professional education courses, which total a minimum of 48 s.h.
EDTL:3002 Technology in the Classroom 2-3 s.h.
EDTL:3071 Secondary Classroom Management 2 s.h.
EDTL:3090 Orientation to Secondary Education 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas 1 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EPLS:3000 Foundations of Education 3 s.h.
EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
PSQF:1075 Educational Psychology and Measurement 3 s.h.

These taken in sequence:
EDTL:4751 Science Teaching and Practice with Early Learners 2 s.h.
EDTL:4752 Methods of Teaching Science 3 s.h.
EDTL:4753 Instructional Issues in Teaching Science 3 s.h.
EDTL:4757 Assessment in the Science Classroom 2 s.h.
EDTL:4779 Secondary School Science Practicum (taken with EDTL:4753) 2 s.h.

These three taken concurrently:
EDTL:4087 Seminar: Curriculum and Student Teaching (section 91) 3 s.h.
EDTL:4091 Observation and Laboratory Practice in the Secondary School 6 s.h.
EDTL:4092 Observation and Laboratory Practice in the Secondary School 6 s.h.

And:
One college-level math course, excluding MATH:0100, MATH:0300, and MATH:1005

Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in science education.

Honors in the Major

The Science Education Program offers outstanding students the opportunity to graduate with honors in the major. Honors students in science education must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and fulfill other requirements; contact the Science Education Program for more information about graduating with honors in the science education major.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.

Graduate Programs of Study

- Master of Arts in Teaching in science education
- Master of Science in science education
- Doctor of Philosophy in science education

For information about graduate programs in science education, see Teaching and Learning (p. 793) (College of Education) in the Catalog. The M.A.T., M.S., and Ph.D. are described under "Graduate Programs: Secondary Education."

Research

Each faculty member in science education is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science education.

Science education faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.

International students enrich the opportunities for graduate studies in Science Education. New international collaborative efforts are under way each year.

Courses

SIED:3001 Introduction to Museum Studies 3 s.h.
Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum.

SIED:4102 Societal and Educational Applications of Earth Science and Environmental arr.
Major ideas and principles of earth and environmental sciences; emphasis on common applications in today’s world.

SIED:4103 Societal and Educational Applications of Biological Sciences arr.
Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.

SIED:4105 Societal and Educational Applications of Physical Sciences arr.
Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.

SIED:4106 Societal and Educational Applications of Chemical Concepts arr.
Principles of chemistry as applied in industry, communication, daily living.

SIED:4115 Directed Study arr.
SIED:4135 The Nature of Science  3-4 s.h.
Ideas on understanding and ways of thinking that are essential in a world shaped by science, technology, engineering, and mathematics; focus on increasing science literacy by examining the nature of science; comparison of characteristics specific to individual science disciplines; identification of great episodes and debates in history of science and habits that are essential for science literacy; scope and sequence of content and process skills for K-12 curriculum, instruction, and assessment.
Teaching and Learning

Interim chair

- David B. Bills

Undergraduate major: elementary education (B.A., B.S., granted by the College of Liberal Arts and Sciences)
Graduate degrees: M.A.T. in science education; M.S. in science education; Ph.D. in science education; M.A. in teaching and learning; M.A.T. in teaching and learning; Ph.D. in teaching and learning

Faculty: http://www.education.uiowa.edu/teach/people
Web site: http://www.education.uiowa.edu/teach

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinic settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education. Undergraduate students pursuing a major in elementary education must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Arts or Bachelor of Science; see the CLAS Academic Policies Handbook.

Teacher Education Program and Licensure/Certification

Undergraduate students must be admitted to the Teacher Education Program (TEP) before they may take required professional education courses. The application for admission should be submitted to the College of Education Office of Education Services. Deadlines for application are March 1 and October 1 for admission to restricted course work in the following semester. Each program reviews applications and chooses a limited number of students for admission.

In order to be considered for admission, students must complete a minimum of 30 s.h. of earned college credit and must have a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00. Some subject areas have additional admission criteria. A limited number of applicants are accepted into each Teacher Education Program, so a 3.00 g.p.a. does not ensure admission. Admission decisions are based on grade-point average in the major and other criteria relevant to teaching success.

The application process includes submission of an application form, a writing sample, two letters of recommendation, and an Iowa criminal history check request form. Applicants are required to submit PRAXIS I test scores in mathematics, reading, and writing. Scores from either the PRAXIS computer-based tests (C-PPST) or the PRAXIS Pre-Professional Skills Tests (PPST) are accepted. Applicants must have a Designated Institution Score Report with a minimum composite score of at least 522 and a minimum score of 170 on any single portion of the test; or a Praxis Core Test Designated Institution Score Report with minimum scores of 156 in reading, 162 in writing, and 150 in mathematics. Applicants also must provide verification that they have completed a 10-hour volunteer experience in a K-12 classroom setting.

If at any time after admission a student’s University of Iowa and/or cumulative g.p.a. falls below 2.70, he or she is placed on probation for one semester. Students who do not attain a 2.70 g.p.a. during the probationary semester are dropped from the TEP. Students should consult a College of Education advisor in their program area or contact the Office of Education Services for more information on admission criteria.

Graduate students who apply to the Graduate College for a teacher licensure program must apply separately for admission to the Teacher Education Program. Deadlines for application to either program are October 1 or March 1 for admission to restricted course work in the following semester. Graduate and postbaccalaureate students may submit scores on the Graduate Record Exam (GRE) General Test instead of PRAXIS I scores. Applicants must have a verbal reasoning and quantitative reasoning composite score of at least 300 on the revised GRE (at least 1080 on the old GRE) and an analytical writing score of at least 3.0.

A limited number of applicants are accepted into each Teacher Education Program, so meeting the Graduate College admission requirements does not ensure admission. Admission decisions are based on grade-point average in the undergraduate major and other criteria relevant to teaching. Upon admission to the TEP, students are assigned an education advisor.

Admission to Student Teaching

Admission to the student teaching semester requires a separate application. Applications must be submitted one year before the student teaching semester. Applicants' credentials and academic and professional progress are reviewed to ensure that a student is qualified for placement in the profession. Verification that a student meets all specific program area requirements is made when the student applies for student teaching.

Consult a College of Education advisor or the Office of Education Services for information about admission and requirements for student teaching in specific licensure programs.

TEP: Elementary Education (Undergraduate)

- Major in elementary education (Bachelor of Arts, Bachelor of Science)

The College of Education offers the undergraduate major in elementary education for students earning a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences. The program prepares students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The Bachelor of Arts or Bachelor of Science with a major in elementary education requires a minimum of 120 s.h., including at least 77 s.h. of credit for the major. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program (p. 313). They also must complete all requirements for the elementary education major and the Teacher Education Program (TEP), including student teaching.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for PRAXIS II tests that are specific to a student's program. The
tests are required before recommendation for licensure or certification to any state.

The major in elementary education (B.A. or B.S.) requires the following work.

**FOUNDATION COURSES**

Students may complete the foundation courses before being admitted to the major in elementary education, but the courses are not prerequisite to admission to the major.

- EDTL:3122 Creativity, Imagination, Play, and Human Development through the Arts 3 s.h.
- EDTL:4900 Foundations of Special Education 3 s.h.
- EPLS:3000 Foundations of Education 3 s.h.
- MATH:1120 Logic of Arithmetic 4 s.h.
- PSQF:1075 Educational Psychology and Measurement 3 s.h.

**COURSES FOR THE MAJOR**

**First Semester**

- EDTL:3002 Technology in the Classroom 2-3 s.h.
- EDTL:3103 Assessment for Instructional Planning and Practice 3 s.h.
- EDTL:3123 Reading and Responding to Children's Literature 3 s.h.
- EDTL:3127 Methods and Materials: Physical Education, Health, and Wellness 2-3 s.h.
- EDTL:3190 Orientation to Elementary Education 1-2 s.h.

**Second Semester**

- EDTL:3160 Literacy Learning and Teaching I 3 s.h.
- EDTL:3163 Methods: Elementary School Mathematics 2-3 s.h.
- EDTL:3170 Elementary Classroom Management 1-3 s.h.
- EDTL:3174 Elementary Math Practicum arr.
- EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.

**Third Semester**

One of these:

- EDTL:3154 Teaching and Learning in the Earth Sciences 3 s.h.
- EDTL:3158 Teaching and Learning in the Biological Sciences 3 s.h.
- EDTL:3159 Teaching and Learning in the Chemical/Physical Sciences 3 s.h.

All of these:

- EDTL:3120 Methods and Materials: Music for the Classroom Teacher 2 s.h.
- EDTL:3161 Social Studies for the Elementary Classroom Teacher 3 s.h.
- EDTL:3164 Literacy Learning and Teaching II 3 s.h.
- MATH:1140 Mathematical Basis of Elementary Geometry 3 s.h.

**Fourth Semester**

One of these:

- EDTL:3154 Teaching and Learning in the Earth Sciences 3 s.h.
- EDTL:3158 Teaching and Learning in the Biological Sciences 3 s.h.
- EDTL:3159 Teaching and Learning in the Chemical/Physical Sciences 3 s.h.

All of these:

- EDTL:3172 Elementary Reading Practicum 3-4 s.h.
- EDTL:4171 Literacy Learning and Teaching III 3 s.h.
- STAT:1010 Statistics and Society 3 s.h.

**STUDENT TEACHING**

Students seeking initial licensure must complete a minimum of 14 s.h. of student teaching.

- EDTL:4190 Supervised Teaching in the Elementary School: Interactive Phase 7 s.h.
- EDTL:4191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase 7 s.h.

**ENDORSEMENTS**

Students have the option of completing an endorsement in one of the following areas: art, English language arts, English as a Second Language (ESL), hearing impaired, mathematics, middle school, music, physical education, reading, science, social sciences (history, social studies), special education (Instructional Strategist I: Mild/Moderate), and speech communication/theatre. Courses in the endorsement area may be taken pass/nonpass if they are offered with the pass/nonpass option. Requirement lists for each endorsement area are available from the Department of Teaching and Learning.

The University of Iowa also offers an added endorsement in talented and gifted education.

**TRANSFER STUDENTS**

Before they student teach, transfer students must complete the following courses at the University of Iowa.

All of these:

- EDTL:3002 Technology in the Classroom 2 s.h.
- EDTL:3190 Orientation to Elementary Education 1-2 s.h.
- A practicum

Two of these:

- EDTL:3123 Reading and Responding to Children's Literature 3 s.h.
- EDTL:3160 Literacy Learning and Teaching I 3 s.h.
- EDTL:3161 Social Studies for the Elementary Classroom Teacher 3 s.h.
- EDTL:3163 Methods: Elementary School Mathematics 2-3 s.h.
- EDTL:3164 Literacy Learning and Teaching II 3 s.h.

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Education Services to contact all institutions where they have done professional preparatory work.
TEP: Secondary Education (Undergraduate and Graduate)

The College of Education offers the Teacher Education Program in secondary education for undergraduate students in the College of Liberal Arts and Sciences. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program (p. 313) and the requirements for their majors (see College of Liberal Arts and Sciences (p. 24) in the Catalog). They also must complete all requirements of the College of Education’s Teacher Education Program.

Graduate students may be admitted to a program leading to teacher licensure/certification as “certification only” candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in English education, foreign language education, or science education, or an M.A. in social studies (program B).

Licensure/certification requires a major of at least 30 s.h. of course work in one of the secondary school subject areas listed below. Licensure/certification course requirements for each major are available from the Department of Teaching and Learning office. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis II tests that are specific to a student’s program. The tests are required before recommendation for licensure or certification to any state.

The College of Education offers secondary school teacher preparation programs in the following areas.

Art
*Coaching
English
*English as a second language
*Hearing impaired
*Journalism
Mathematics
*Middle school
Music
*Reading
Science, including *physical science, biology, chemistry,*
*general science, physics, earth science, and 9-12 all science
Social science, including anthropology, economics, geography, history, political science, psychology, and sociology
*All social sciences
*Talented and gifted
World languages—Chinese, French, German, Italian, Japanese, Latin, Spanish
*Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-8. This K-8 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an advisor, contact the Department of Teaching and Learning.

Requirements

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements in addition to the requirements of their major. All course work must be completed before student teaching.

One introduction and practicum course in the major field
2-3 s.h.
EDTL:3002 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
EDTL:3071 Secondary Classroom Management (required for art, mathematics, science, social studies education) 2 s.h.
EDTL:3090 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EPLS:3000 Foundations of Education 3 s.h.
EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
PSQF:1075 Educational Psychology and Measurement 3 s.h.
One or more methods of teaching courses in the major field 3-9 s.h.
One college-level mathematics course, except MATH:0100, MATH:0300, and MATH:1005 Student teaching 12 s.h.

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area); Adams County, Colorado (Denver area); Rialto, California; and Clark County, Nevada (Las Vegas area). In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Education Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.
TRANSFER STUDENTS
Transfer students must complete the following work before they student teach.
EDTL:3002 Technology in the Classroom 2-3 s.h.
EDTL:3090 Orientation to Secondary Education 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas 1 s.h.
Appropriate methods courses
A practicum at the University of Iowa
All course work in the major

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Education Services to contact all institutions where they have done professional preparatory work.

Graduate Programs of Study:
Overview
• Master of Arts in Teaching in science education
• Master of Science in science education
• Doctor of Philosophy in science education
• Master of Arts in teaching and learning
• Master of Arts in Teaching in teaching and learning
• Doctor of Philosophy in teaching and learning

The department offers graduate degree programs in three major areas: elementary education, secondary education, and special education.

Elementary education programs:
Developmental reading (offered in the M.A. in teaching and learning); and Language, literacy, and culture (offered in the Ph.D. in teaching and learning).

Secondary education programs:
Art education (offered in the M.A. in teaching and learning);
Developmental reading (offered in the M.A. in teaching and learning);
English education (offered in the M.A. and M.A.T. in teaching and learning);
Foreign language and English as a Second Language (ESL) education (offered in the M.A., M.A.T., and Ph.D. in teaching and learning);
Language, literacy, and culture (offered in the Ph.D. in teaching and learning);
Mathematics education (offered in the M.A., M.A.T., and Ph.D. in teaching and learning);
Science education (offered in the M.A., M.A.T., and Ph.D. in science education); and Social studies education (offered in the M.A. and Ph.D. in teaching and learning).

The secondary education area also collaborates with the College of Liberal Arts and Sciences to offer an education option for graduate students earning an M.S. in mathematics; an M.A. and Ph.D. in music with a concentration in music education; and a joint B.A./M.A.T. in science education for undergraduates majoring in biology, chemistry, environmental sciences, or physics. In addition, the area offers an ESL endorsement for individuals who are enrolled in a Department of Teaching and Learning graduate degree program or who are licensed in-service teachers.

Special education:
Special education (offered in the M.A. and Ph.D. in teaching and learning).

Each degree program is described below.
Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

REQUIRED PH.D. RESEARCH COURSES
Students admitted to doctoral programs must complete the program's research requirements.

REQUIRED PH.D. CORE COURSES
All Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses, depending upon program requirements.
EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7033 Seminar on Teacher Education 3 s.h.

REQUIRED PH.D. COGNATES
All Ph.D. students in the Department of Teaching and Learning must complete two approved cognate areas as part of their doctoral study plan. Most comprehensive exams in the department are designed to cover the student's core area plus two cognate areas, so selection of cognate areas is important. Cognates also may enhance students' employment possibilities, since they represent a minor area of study.

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list, or they may customize their own cognate areas in consultation with their advisors.

Curriculum Theory and Development
Three of these:
EDTL:4876 Advanced Methods for Teaching and Learning in a Culturally Responsive Classroom 3 s.h.
EDTL:5086 Curriculum Foundations 2-3 s.h.
EDTL:6570 Foundation of School Mathematics Curriculum 3 s.h.
EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7075 Educational Ethnography 3 s.h.
EDTL:7100 Design and Organization of Curriculum 3 s.h.
EPLS:6265 Standards-Based Education and Accountability 3 s.h.
EPLS:6381 Analysis and Appraisal of Curriculum 3 s.h.
PSQF:6255 Construction and Use of Evaluation Instruments 3 s.h.

Foreign Language and ESL Education
Both of these:
EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
EDTL:6483 Second Language Classroom Learning 3 s.h.
One of these, chosen in consultation with faculty:
EDTL:6403 Language Policy and Planning 3 s.h.
EDTL:6480 Issues in Foreign Language Education 3 s.h.
EDTL:6484 Reading in a Second Language 3 s.h.
EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.

Gifted Education

Administrative strand—two of these, chosen in consultation with faculty:
EPLS:4110 Administration and Policy in Gifted Education 2 s.h.
EPLS:4111 Evaluation of Gifted Programs 1 s.h.
EPLS:4113 Staff Development for Gifted Programs 1 s.h.
RCE:4127 Research and Theory in Talent/Giftedness 1 s.h.

Programming strand:
EDTL:4066 Curriculum Concepts in Gifted Education 3 s.h.
EDTL:4199 Program Models in Gifted Education 3 s.h.

Psychology strand—two of these, chosen in consultation with faculty:
RCE:4120 Psychology of Giftedness 3 s.h.
RCE:4121 Identification of Students for Gifted Programs 3 s.h.
RCE:4137 Introduction to Educating Gifted Students 3 s.h.
RCE:5226 Assessment of Giftedness 3 s.h.
RCE:5237 Seminar in Gifted Education 2-3 s.h.

Global Education

All of these:
EDTL:6841 Infusing a Global Perspective into the Curriculum 3 s.h.
EPLS:5104 Education in the Third World 2-3 s.h.
EPLS:5195 Research in Cross-Cultural Settings 3 s.h.

Language, Literacy, and Culture

Both of these:
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture arr.
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture (topic chosen in consultation with advisor) arr.

General emphasis—one of these:
EDTL:7008 Seminar: Research and Current Issues arr.
EDTL:7008 Seminar: Research and Current Issues (topic chosen in consultation with advisor) arr.

Elementary emphasis—one of these:
EDTL:6104 Literature for Children II 3 s.h.
EDTL:6164 Early Literacy Development and Instruction 2-3 s.h.
EDTL:6165 Reading and Writing Across Intermediate Grades 3 s.h.

Secondary emphasis—one of these:
EDTL:3393 Reading and Teaching Adolescent Literature 3 s.h.
EDTL:6315 M.A. Seminar: English Education arr.

Mathematics Education

Both of these:
EDTL:5535 Current Issues in Mathematics Education 1-3 s.h.
EDTL:7535 Seminar: Research in Mathematics Education arr.

Two of these:
EDTL:6530 Workshop in School Mathematics 1-3 s.h.
EDTL:6531 Technology in School Mathematics 2-3 s.h.
EDTL:6534 Foundations of Mathematics Education 2-3 s.h.
EDTL:6536 Teaching of Geometry 2-3 s.h.
EDTL:6539 Teaching of Algebra 2-3 s.h.

Science Education

All of these:
EDTL:6755 Practices of Inquiry in Science Learning Environments 3 s.h.
EDTL:6757 Learning in the Science Classroom 2-3 s.h.
EDTL:6759 Advanced Pedagogy 3 s.h.

Special Education

Three or four of these, depending on requirements of the major program:
EDTL:7040 Advanced Topics in Teaching and Learning arr.
EDTL:7945 Current Issues and Trends in Learning Disabilities 3 s.h.
EDTL:7948 Contemporary Research in Behavioral Disorders 3 s.h.
EDTL:7953 Seminar: Single Subject Design Research 3 s.h.

Graduate Programs of Study

The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education; developmental reading; English education; foreign language, second language, and English as a Second Language education; language, literacy, and culture; mathematics education; music education; science education; social studies education; and special education.

M.A.: Art Education

The Master of Arts program in art education requires a minimum of 38 s.h. of graduate credit. The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong
academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

**REQUIREMENTS**

The M.A. plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in EDTL:6267 Seminar: Current Issues in Art Education; and a total of 12 s.h. in additional course work, specified after a student begins the program.

M.A. students also must complete a studio thesis or a written thesis.

**ADMISSION**

Applicants to the M.A. program in art education must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum course work in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight slide reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper. Deficiencies in undergraduate art or courses recommended for teacher licensure/certification are evaluated following admission so that students can make up required course work concurrent with work for the degree.

**M.A.: Developmental Reading**

The Master of Arts program in developmental reading requires a minimum of 33 s.h. of graduate credit with thesis and a minimum of 35 s.h. of graduate credit without thesis. The program prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required course work develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies a student for certification as a reading specialist.

The M.A. program in developmental reading requires the following work.

**REQUIRED COURSES**

All of these:

- EDTL:4171 Literacy Learning and Teaching III 3 s.h.
- EDTL:4394 Methods: Secondary Reading 2-3 s.h.
- EDTL:6164 Early Literacy Development and Instruction 2-3 s.h.
- EDTL:6165 Reading and Writing Across Intermediate Grades 3 s.h.
- EDTL:6171 Advanced Reading Clinic Techniques 2-3 s.h.
- EDTL:6172 Advanced Reading Clinic Practicum 2-3 s.h.
- EDTL:7008 Seminar: Research and Current Issues (Reading) 3 s.h.

One of these:

- PSQF:4106 Child Development 3 s.h.
- PSQF:4130 Early Adolescent Development 3 s.h.
- PSQF:4133 The Adolescent and Young Adult 3 s.h.
- PSQF:6200 Educational Psychology 3 s.h.

Students who have completed educational psychology and/or human growth and development course work relating only to grades K-8 should choose PSQF:4130, PSQF:4133, or PSQF:6200 from the list above. Those who have completed work relating only to grades 5-12 should choose PSQF:4106 or PSQF:6200.

One of these:

- EDTL:3938 Assessment of Learning Problems 3 s.h.
- PSQF:4150 Introduction to Educational Measurement
- An approved literacy assessment course

One of these:

- EDTL:5086 Curriculum Foundations 2-3 s.h.
- EDTL:6167 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.
- EDTL:7100 Design and Organization of Curriculum 3 s.h.

One of these:

- EPLS:6383 Supervision and Evaluation 3 s.h.
- EDTL:7165 Reading Clinic: Supervision Thesis (required for thesis option):
- EDTL:6393 Master's Thesis 2 s.h.

**ELECTIVES**

Students, in consultation with their advisors, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of two three-hour exams. Each three-hour exam is based on an aspect of reading or literacy. With agreement of a student's advisor and committee, a comprehensive project may be substituted for the written examination in one or both areas.

**ADMISSION**

Applicants to the M.A. program in developmental reading must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

**M.A.: English Education**

The Master of Arts program in English education requires a minimum of 30 s.h. of graduate credit. The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.

M.A. students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or
a literary area. Students and their advisors plan the program of study together. The only required course is EDTL:6315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s), or they may choose to write a thesis.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

ADMISSION

Applicants to the M.A. program in English education must meet the admission requirements of the Graduate College. They should have taken extensive course work in English and should have taught English for at least two years. Application should be made to the College of Education.

M.A.T.: English Education

The Master of Arts in Teaching program in English education requires a minimum of 45 s.h. of graduate credit. The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

The M.A.T. program in English education requires the following work.

ENGLISH

All of these:

- EDTL:6315/ENGL:6315 M.A. Seminar: English Education arr.
- CNW:4355 Approaches to Teaching Writing 3 s.h.
- ENGL:3190 Language and Learning 2-3 s.h.
- ENGL:3191 Reading and Teaching Adolescent Literature 3 s.h.

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program.

- A course in Shakespeare
- Three courses in American literature
- A course in British literature
- A course in nonfiction or creative writing, in addition to CNW:4355

EDUCATION

All of these:

- EDTL:3002 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
- EDTL:3090 Orientation to Secondary Education 1 s.h.
- EDTL:4087 Seminar: Curriculum and Student Teaching 1-3 s.h.
- EDTL:4091 Observation and Laboratory Practice in the Secondary School arr.
- EDTL:4092 Observation and Laboratory Practice in the Secondary School arr.
- EDTL:4314 Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394) 3 s.h.
- EDTL:4315 Methods: Secondary English 3 s.h.

- EDTL:4394 Methods: Secondary Reading 2-3 s.h.
- EDTL:4900 Foundations of Special Education 3 s.h.
- EPLS:3000 Foundations of Education 3 s.h.
- EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
- PSQF:6200 Educational Psychology 3 s.h.

COMPREHENSIVE EXAMINATION

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

ADMISSION

Applicants to the M.A.T. program in English education must meet the admission requirements of the Graduate College. They must have been granted a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must take the Graduate Record Exam and meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of course work in professional education courses before admission.

ESL Endorsement

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a Teacher Education Program (TEP) or licensed in-service teachers.

ADMISSION

Each applicant to the ESL endorsement program must submit a one-page essay explaining why he or she wishes to teach ESL; a transcript of all university-level course work; and evidence of having completed two semesters of foreign language beyond the language component of the College of Liberal Arts and Sciences General Education Program (p. 313) or a documented score of "advanced plus" on the oral proficiency interview (OPI) given in the language department. Applicants whose first language is not English must provide evidence of scoring 55 or higher on the Test of Spoken English (TSE) or 26 (Internet-based) on the speaking section of the Test of English as a Foreign Language (TOEFL).

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 1 and March 1.

M.A.: Foreign Language and ESL Education

The Master of Arts program in foreign language and English as a Second Language (ESL) education requires a minimum of 33-36 s.h. of graduate credit. The program is designed for students who would like to pursue a foreign language and ESL education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in foreign language pedagogical...
Teaching and Learning

knowledge for practicing teachers. Students may design programs with a special focus.

The program offers three specializations: second languages and ESL education; a target language area (may include language, linguistics, literature, history, geography, or civilization); and a cognate area. The cognate area may be teacher education, reading, instructional design, measurement and statistics, or another area selected in consultation with their advisor.

Students take at least 15 s.h. in second language education course work, 9 s.h. in graduate language or linguistics, and 9 s.h. in the cognate area. They must earn 9 s.h. in courses numbered 5000 or above. Students also must complete a capstone project in consultation with their advisor.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master’s degree is reevaluated annually.

The M.A. program in foreign language and ESL education requires the following work, including these suggested courses.

FOREIGN AND SECOND LANGUAGES EDUCATION

Total of 15 s.h.

EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
EDTL:6483 Second Language Classroom Learning 3 s.h.
EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.

At least 6 s.h. from these:

EDTL:6402 Second Language Program Management 3 s.h.
EDTL:6403 Language Policy and Planning 3 s.h.
EDTL:6407 Reading in Non-Roman Scripts 3 s.h.
EDTL:6408 Designing Materials for Second Language Instruction 3 s.h.
EDTL:6409 Cultural Curriculum 3 s.h.
EDTL:6480 Issues in Foreign Language Education 3 s.h.
EDTL:6484 Reading in a Second Language 3 s.h.

TARGET LANGUAGE

In consultation with their advisor, students select at least 9 s.h. of graduate language courses in their area of interest.

COGNATE AREA

Students complete at least 9 s.h. of course work chosen in consultation with their advisor.

MASTER’S EXAMINATION

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from foreign language education. The candidate and his or her advisor discuss and formalize the exam’s content and process eight months before the exam.

ADMISSION

Applicants to the M.A. program in foreign language and ESL education must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and must have earned at least 20 s.h. in undergraduate, upper-division foreign language course work. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate course work and some experience living, working, and/or studying in the culture of the applicant’s chosen target language are preferred. International applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

M.A.T.: Foreign Language and ESL Education

The Master of Arts in Teaching program in foreign language and English as a Second Language (ESL) education requires a minimum of 67 s.h. of graduate credit. The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, and Spanish.

M.A.T. students must complete at least 18 s.h. in graduate course work in the collaborating foreign language department in addition to professional education courses.

The M.A.T. in foreign language and ESL education requires the following work.

PROFESSIONAL EDUCATION

All of these:

EDTL:3002 Technology in the Classroom (must be taken during student’s first semester in the college) 2 s.h.
EDTL:3090 Orientation to Secondary Education (must be taken during student’s first semester in the college) 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas (must be taken during student’s first semester in the college) 1 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EPLS:3000 Foundations of Education 3 s.h.
EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
PSQF:6200 Educational Psychology 3 s.h.

FOREIGN LANGUAGE TEACHING

All of these:

EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
EDTL:6483 Second Language Classroom Learning 3 s.h.
EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.

Total of 21-27 s.h. from these:

EDTL:4087 Seminar: Curriculum and Student Teaching 1 s.h.
EDTL:4091 Observation and Laboratory Practice in the Secondary School arr.
EDTL:4092 Observation and Laboratory Practice in the Secondary School arr.
EDTL:4406 Foreign Language Education Practicum I 3 s.h.
EDTL:4407 Foreign Language Education Practicum II 3 s.h.
EDTL:4416 Learning to Teach Second Languages I 3 s.h.
EDTL:4417 Learning to Teach Second Languages II 3 s.h.

K-12 LICENSURE
The K-12 licensure option requires the following course.
EDTL:4089 Elementary School Special Subject Area Student Teaching 1-4 s.h.

COMPREHENSIVE EXAMINATION
A comprehensive examination is required. The examination reflects candidate's depth and breadth of knowledge in foreign language and ESL education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and his or her advisor discuss the exam's content and format eight months before the exam.

ADMISSION
Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements.

Ph.D.: Foreign Language and ESL Education
The Doctor of Philosophy program in foreign language and English as a Second Language (ESL) education requires a minimum of 80 s.h. of graduate credit. The program provides students with the necessary content-area knowledge and research skills for independent research, program administration, and varied leadership positions in foreign language and ESL education. It is designed for individuals who have demonstrated success in foreign language and ESL teaching and who wish to prepare for positions in academia, government, or the private sector where in-depth knowledge of foreign language educational issues is required.

Most courses for the Ph.D. should be numbered 5000 or above. At least 30 s.h. must be taken in the core area of foreign language education. A student and his or her advisor discuss core area course work and cognate area specializations. A student's progress toward the degree and his or her scholarship development is reviewed by the program's faculty and discussed by the student and his or her advisor each year.

The Ph.D. program in foreign language and ESL education requires the following work. Students may be able to count some courses completed for the master's degree toward the 80 s.h. required for the Ph.D.

REQUIRED COURSES
The program in foreign language and ESL education requires 16 s.h. of course work in research methods. Three courses must be taken from the First Tier requirements, and two courses must be taken from the Second Tier requirements. Students who have little experience with social/behavioral sciences research methods when they enter the program may be advised to take remedial course work in research methods, which will not count toward the 16 s.h. requirement.

FIRST TIER REQUIREMENTS
These courses should be taken in the first two years of study (10 s.h.).

- Both of these:
  - EDTL:7405 Research Methods in Second Language Teaching and Learning 3 s.h.
  - PSQF:6243 Intermediate Statistical Methods 4 s.h.

- One of these:
  - EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3 s.h.
  - EPLS:7373 Qualitative Research Design and Methods 3 s.h.
  - PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research methods) 3 s.h.
  - RCE:7338 Essentials of Qualitative Inquiry 3 s.h.

SECOND TIER REQUIREMENTS
Two courses from the following, to be chosen in consultation with a student's advisor. These courses should be taken after the First Tier courses have been completed (6 s.h.):

Advanced Qualitative Courses

- EDTL:7071 Critical Discourse Analysis in Educational Research 3 s.h.
- EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3 s.h.
- EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h.
- EDTL:7075 Educational Ethnography 3 s.h.
- EDTL:7751 Advanced Qualitative Data Analysis 3 s.h.

Advanced Research Design Courses

- EDTL:7410 Mixed Methods Research 3 s.h.
- PSQF:6265 Program Evaluation 3 s.h.
- PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is conducting research online) arr.

Advanced Quantitative Courses

- EPLS:6206 Research Process and Design 3 s.h.
- EPLS:6209 Survey Research and Design 3 s.h.
- EPLS:6370 Quantitative Methods for Policy Analysis 3 s.h.
- PSQF:6244 Correlation and Regression 4 s.h.
- PSQF:6246 Design of Experiments 4 s.h.
- PSQF:6247 Nonparametric Statistical Methods 3 s.h.
In order to qualify to take the comprehensive examination, students must successfully complete the required course work and research activities. After passing the comprehensive examination, students consult with their advisor to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts research under the primary guidance of the advisor.

ADMISSION

Applicants to the Ph.D. program in foreign language and ESL education must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching foreign language or ESL and should hold a master's degree or have completed a significant amount of graduate course work in a foreign language or foreign language education. Applicants must have a g.p.a. of at least 3.00 in graduate course work. International applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

Application materials should include a statement of purpose explaining the applicant's professional goals, transcripts of all undergraduate and graduate work, Graduate Record Exam (GRE) General Test scores, a sample of academic writing, and three letters of recommendation.

Ph.D.: Language, Literacy, and Culture

The Doctor of Philosophy program in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. The program brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides a broad background in relevant theoretical and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

REQUIRED COURSES

Ph.D. students complete an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; approved cognate areas (see "Required Ph.D. Cognates" under "Graduate Programs of Study: Overview" above); and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning with 6 s.h. of those outside the College of Education. Students also earn 10-12 s.h. of dissertation credit.

Students in the Language, Literacy, and Culture Ph.D. program are required to take at least 18 s.h. in research course work.

Both of these:

EDTL:7070 Introduction to Qualitative Methods 3 s.h.
PSQF:6243 Intermediate Statistical Methods 4 s.h.

Additional credit hours as outlined below (12 s.h.):

• A sequence of courses that meets the specific research interests of a student, to be selected in consultation

REMEDIAL COURSE WORK

These courses may be required if a student is not familiar with research methods in the social/behavioral sciences.

EALL:5150 Introduction to Educational Research 3 s.h.
PSQF:4143 Introduction to Statistical Methods 3 s.h.

All Ph.D. students in the foreign language and ESL education must complete both of the following Ph.D. core courses.

EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7033 Seminar on Teacher Education 3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Required Ph.D. Cognates" under "Graduate Programs of Study: Overview" above.

FOREIGN LANGUAGE EDUCATION CORE

All students must complete these (21 s.h.):

EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
EDTL:6403 Language Policy and Planning 3 s.h.
EDTL:6409 Cultural Curriculum 3 s.h.
EDTL:6483 Second Language Classroom Learning 3 s.h.
EDTL:6484 Reading in a Second Language 3 s.h.
EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.
EDTL:7406 Proposal Writing for Second Language Research 3 s.h.

CORE ELECTIVES

Students may take the following courses in addition to, but not instead of, the courses listed under "Foreign Language Education Core" above. Students must have their advisor's consent to substitute other courses as electives.

EDTL:6402 Second Language Program Management 3 s.h.
EDTL:6407 Reading in Non-Roman Scripts 3 s.h.
EDTL:6408 Designing Materials for Second Language Instruction 3 s.h.
EDTL:6480 Issues in Foreign Language Education 3 s.h.
SLA:6920 Multimedia and Second Language Acquisition 3 s.h.

COMPREHENSIVE EXAMINATION

In order to qualify to take the comprehensive examination, completion of the required course work and research activities does not guarantee advancement to the examination.

After passing the comprehensive examination, students consult with their advisor to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts research under the primary guidance of the advisor.
with an adviser and the language, literacy, and culture faculty.

- Credits may be taken in any combination of qualitative, quantitative or other relevant research paradigms.
- Courses may be taken either within or outside of the College of Education.
- It is recommended that students take EALL:5150 Introduction to Educational Research (3 s.h.) early in their programs of study.

In addition, all language, literacy, and culture students must complete one of the following Department of Teaching and Learning core courses.

EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7033 Seminar on Teacher Education 3 s.h.

COMPREHENSIVE EXAMINATION AND DISSERTATION

As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for three forms of written and oral exams: they answer take-home questions in two areas of literacy; they submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest; and they design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. program in language, literacy, and culture, see Our Programs on the Department of Teaching and Learning web site.

ADMISSION

Applicants to the Ph.D. program in language, literacy, and culture must meet the admission requirements of the Graduate College. They should have at least three years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master's degree in a literacy-related field. Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed December 1 each year.

M.A.: Mathematics Education

The Master of Arts program in mathematics education requires a minimum of 32 s.h. of graduate credit. The program provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

REQUIRED COURSES

M.A. students take a minimum of 9 s.h. of course work in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education, which must include EDTL:5535 Current Issues in Mathematics Education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from their cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

COMPREHENSIVE EXAMINATION

Students take three two-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

M.S.: Mathematics with Education Option

The Master of Science in mathematics with education option requires a minimum of 32 s.h. of graduate credit. The program prepares licensed/certified teachers with advanced specialization in mathematics and mathematics education. It is administered by the Department of Mathematics (p. 455) (College of Liberal Arts and Sciences).

M.S. students must earn a minimum of 24 s.h. in the Department of Mathematics, including the core master's program for either pure mathematics or applied mathematics as described below. They also must complete two courses in mathematics education.

PURE MATHEMATICS

One of these sequences:

MATH:5200 & MATH:5210 Introduction to Analysis I-II 8 s.h.
MATH:6200 & MATH:6210 Analysis I-II 6 s.h.

One of these sequences:

MATH:5000 & MATH:5010 Abstract Algebra I-II 8 s.h.
MATH:6000 & MATH:6010 Introduction to Algebra I-II 6 s.h.

And:

MATH:5400 General Topology 4 s.h.
APPLIED MATHEMATICS
All of these:
MATH:4060 Discrete Mathematical Models 3 s.h.
MATH:4610 Continuous Mathematical Models 3 s.h.
MATH:4820 Optimization Techniques 3 s.h.
MATH:5600 Nonlinear Dynamics with Numerical Methods 4 s.h.
MATH:5700 Partial Differential Equations with Numerical Methods 4 s.h.
MATH:5800 Numerical Analysis: Nonlinear Equations and Approximation Theory 4 s.h.
MATH:5810 Numerical Analysis: Differential Equations and Linear Algebra 4 s.h.

COMPREHENSIVE EXAMINATION
Students take a comprehensive examination of six hours over the required courses in either pure mathematics or applied mathematics, and education. The examination assesses the candidate's knowledge of mathematics and the relevance of specific concepts in teaching secondary school mathematics.

ADMISSION
Application should be made to the Department of Mathematics.

M.A.T.: Mathematics Education
The Master of Arts in Teaching program in mathematics education requires a minimum of 49 s.h. of graduate credit. The program is designed primarily for students who decide they would like to become teachers and have already completed a B.S. or B.A. in mathematics. It features advanced work in mathematics along with the courses required for certification. This degree program assumes a student has completed a baccalaureate degree in mathematics equivalent to one that would be completed at the University of Iowa, but has no previous course work in education. More course work may be advised if there are mathematics courses a student has not taken as part of his or her undergraduate mathematics baccalaureate degree program to render their degree equivalent to one from the University of Iowa.

The M.A.T. program in mathematics education requires the following work.

EDUCATION
The first three courses should be taken during the first semester of registration.
EDTL:3002 Technology in the Classroom 2-3 s.h.
EDTL:3090 Orientation to Secondary Education 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas 1 s.h.
All of these:
EDTL:3071 Secondary Classroom Management 2-3 s.h.
EDTL:3532 Introduction and Practicum: Mathematics 3 s.h.
EDTL:3534 Methods: Middle School Mathematics 3 s.h.
EDTL:4535 Methods: High School Mathematics 3 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EPLS:3000 Foundations of Education 3 s.h.
EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
PSQF:6200 Educational Psychology 3 s.h.
The following courses are taken concurrently and constitute the student teaching semester:
EDTL:4087 Seminar: Curriculum and Student Teaching 1-3 s.h.
EDTL:4091 Observation and Laboratory Practice in the Secondary School
EDTL:4092 Observation and Laboratory Practice in the Secondary School

And:
One additional graduate-level mathematics education course in consultation with an advisor

GRADUATE MATHEMATICS REQUIREMENTS
If necessary, courses fulfilling the University of Iowa mathematics major with at least one additional mathematics graduate course (one of the following).
MATH:4050 Introduction to Discrete Mathematics 3 s.h.
MATH:4060 Discrete Mathematical Models 3 s.h.
MATH:4120 History of Mathematics 3 s.h.

COMPREHENSIVE EXAMINATION
The comprehensive exam includes a required two-part Master's level exam in mathematics and mathematics education. At the discretion of the examining committee, this exam may consist of two parts and is both written and oral. The mathematics and mathematics education comprehensive examinations will not duplicate course examinations, but will assess both mathematics education and the mathematics specialization area chosen by a student.

ADMISSION
Applicants to the M.A.T. program in mathematics education must meet the admission requirements of the Graduate College. They also must take the Graduate Record Exam (GRE) General Test and meet all Teacher Education Program (TEP) application requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate g.p.a. of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

Joint B.A./M.A.T. Mathematics Education
The College of Liberal Arts & Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in Math plus a Master's degree in Education in as little as five years.
The Combined B.A./M.A.T. (4+1) program provides a seamless process whereby students can progress from undergraduate to graduate status. The usual period of study for both the Bachelor of Arts and the Master's degree is six years. Through careful planning, many of
the courses required for the M.A.T. program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements. A sample plan of study is available on the College of Education's web site at Sample B.A./M.A.T. Mathematics Education Schedule.

**ADMISSION**

Students are eligible to apply to the 4+1 program during their sophomore or junior year if they have a cumulative g.p.a. of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP); two recommendations from University of Iowa faculty; a career plan describing how this program will enhance the student’s scholarly and/or career goals; and an unofficial transcript of student’s prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum g.p.a. must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form; a letter of application/statement of purpose; one additional letter of recommendation from a faculty member in the science major; Graduate Record Exam (GRE) General Test scores; and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students will be granted undergraduate/graduate credit for course work during the seventh semester; they begin paying graduate tuition during the eighth semester until completion of the program. The baccalaureate degree must be conferred at the end of the eighth semester or in the program’s fourth year.

**Ph.D.: Mathematics Education**

The Doctor of Philosophy program in mathematics education requires a minimum of 80-90 s.h. of graduate credit. The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education.

The Ph.D. program in mathematics education requires the following work. Students must update graduate course work done more than 10 years before admission to the program.

**REQUIRED COURSES**

All Ph.D. students in math education must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed at Ph.D. Research Requirements.

All doctoral students in mathematics education must complete one of the following Ph.D. core courses.

EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7033 Seminar on Teacher Education 3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Additional Requirements" below.

Ph.D. students in mathematics education must complete a minimum of 24 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional course work in mathematics at the University of Iowa, chosen with advisor approval.

Students also must complete at least six courses in mathematics education, including EDTL:5535 Current Issues in Mathematics Education and EDTL:7535 Seminar: Research in Mathematics Education.

**ADDITIONAL REQUIREMENTS**

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the course work listed above. All Ph.D. students must complete an approved cognate area; a partial list of potential cognate areas is available from the M.A. program in mathematics education.

Upon completing the program, a student must have a cumulative g.p.a. of 3.00 or higher on all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

**COMPREHENSIVE EXAMINATION**

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.

**DISSERTATION**

Students must earn 10 s.h. of dissertation credit in EDTL:7493 Ph.D. Thesis. Each candidate completes a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before the candidate undertakes the study. Upon completion of the dissertation, the candidate defends the dissertation in an oral examination.

**ADMISSION**

Applicants to the Ph.D. program in mathematics education must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent; a current teaching license/certificate and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.
M.A.: Music Education

The Master of Arts in music with concentration in music education provides students with deeper insights into music, the theory and practice of music education, and the role of music in the school curriculum. The degree requires 33 s.h. of graduate credit and is offered with or without thesis.

The program is administered by the School of Music (p. 473) (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application should be made to the School of Music.

Ph.D.: Music Education

The Doctor of Philosophy in music with concentration in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs.

The program is administered by the School of Music (p. 473) (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application should be made to the School of Music.

M.A.T.: Science Education

The Master of Arts in Teaching program in science education requires a minimum of 48 s.h. of graduate credit. The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time.

The program assumes students have completed considerable course work in science (at least 56 s.h.) as undergraduates, but no previous course work in education. Students' science course work should be equivalent to that required by the University of Iowa Science Education (p. 788) Program.

The M.A.T. program in science education requires the following work.

PROFESSIONAL EDUCATION FOUNDATION SEQUENCE

All of these:

EDTL:3002 Technology in the Classroom (must be taken during student's first semester in the college) 2 s.h.
EDTL:3071 Secondary Classroom Management 2 s.h.
EDTL:3090 Orientation to Secondary Education (must be taken during student's first semester in the college) 1 s.h.
EDTL:3095 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) 1 s.h.
EDTL:4900 Foundations of Special Education 3 s.h.
EPLS:3000 Foundations of Education 3 s.h.
EDTL:4751 Science Teaching and Practice with Early Learners 2 s.h.
EDTL:4752 Methods of Teaching Science 3 s.h.
EDTL:4757 Assessment in the Science Classroom 2 s.h.

Science education courses are taken in the following sequence.

ELECTIVES

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science course work listed above must take additional science course work to meet the minimum requirement of 48 s.h.

COMPREHENSIVE EXAMINATION

Students complete comprehensive examinations before their student teaching semester. Two comprehensive exams, one in science education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas. The science education exam, under the guidance and supervision of the examining committee, consists of two parts, written and oral. Detailed requirements for the science education comprehensive examination are available from the Department of Teaching and Learning office.

ADMISSION

Applicants to the M.A.T. program in science education must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all Teacher Education Program (TEP) application requirements.

Joint B.A./M.A.T.: Science Education

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree with a major in biology, chemistry, environmental sciences, or physics may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. The joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate
study and by counting up to 18 s.h. of qualifying credit toward both degrees.

B.A. students are admitted to the joint program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the joint program. Students take 30 s.h. of course work during the fifth year and must complete all remaining requirements for both degrees that year.

**SCIENCE SPECIALIZATION (BROAD FIELD SCIENCE BLOCK)**

The following courses are required for the undergraduate degree in science education at the University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

**SIED:4135 The Nature of Science** 4 s.h.

Two of these (unless completed during undergraduate study):

- **SIED:4102 Societal and Educational Applications of Earth Science and Environmental** 3 s.h.
- **SIED:4103 Societal and Educational Applications of Biological Sciences** 3 s.h.
- **SIED:4105 Societal and Educational Applications of Physical Sciences** 3 s.h.
- **SIED:4106 Societal and Educational Applications of Chemical Concepts** 3 s.h.

Education courses required for the joint program are listed under "M.A.T.: Science Education" above. Requirements for the B.A. degree are listed under Biology (p. 119), Chemistry (p. 135), Environmental Sciences (p. 278), and Physics and Astronomy (p. 507) (College of Liberal Arts and Sciences) in the Catalog.

**M.S.: Science Education**

The Master of Science program in science education requires a minimum of 38 s.h. of graduate credit. The program is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field.

M.S. students complete course work in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The M.S. program in science education requires the following work.

**REQUIRED COURSES**

All of these:

- **EDTL:6755 Practices of Inquiry in Science Learning Environments** (no substitute for this course) 3 s.h.
- **EDTL:6757 Learning in the Science Classroom** (no substitute for this course) 3 s.h.

EDTL:6759 Advanced Pedagogy (no substitute for this course) 3 s.h.

EDTL:7755 Independent Study in Science Education Research (taken twice for 3 s.h. each) 6 s.h.

Two science content courses chosen with the advisor 6 s.h.

A minimum of 13 s.h. chosen from these:

- **EDTL:6756 Science Education: The Nature of Science** 3 s.h.
- **EDTL:6758 Writing in the Science Classroom** 3 s.h.
- **EDTL:7100 Design and Organization of Curriculum** 3 s.h.
- **PSQF:4143 Introduction to Statistical Methods** 3 s.h.
- **PSQF:6200 Educational Psychology** 3 s.h.
- **PSQF:6220 Quantitative Educational Research Methodologies** 3 s.h.
- **PSQF:6275 Constructivism and Design of Instruction** 3 s.h.
- **RCE:7338 Essentials of Qualitative Inquiry** 3 s.h.

One additional qualitative or quantitative research methods course chosen in consultation with the advisor

May include one of these:

- **EDTL:7004 Schooling in the United States** 3 s.h.
- **EDTL:7033 Seminar on Teacher Education** 3 s.h.

**MASTER OF SCIENCE EXAMINATION**

Students must complete a thesis (EDTL:6393 Master's Thesis), for which they earn 2-4 s.h. of credit. A final oral examination is administered on campus in which the candidate defends his or her thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

**ADMISSION**

Applicants to the M.S. program in science education must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching license/certification unless they are preparing for careers in allied health, museums, or community colleges.

**Ph.D.: Science Education**

The Doctor of Philosophy program in science education requires a minimum of 85 s.h. of graduate credit. The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.
The Ph.D. program in science education requires the following work.

**REQUIRED COURSES**
All Ph.D. students in science education must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed at Ph.D. Research Requirements. Course selections must be consistent with other requirements for the degree.

All doctoral students in science education must complete one or both of the following Ph.D. core courses. Students may not substitute other courses for these.

- EDTL:7004 Schooling in the United States 3 s.h.
- EDTL:7033 Seminar on Teacher Education 3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Required Ph.D. Cognates" under "Graduate Programs of Study: Overview" above.

**SCIENCE EDUCATION**
All of these (15 s.h.):

- EDTL:6754 Theory and Research on Curriculum Materials in Science (no substitute for this course) 3 s.h.
- EDTL:6757 Learning in the Science Classroom 3 s.h.
- EDTL:6759 Advanced Pedagogy 3 s.h.
- Graduate-level science education courses chosen in consultation with advisor 6 s.h.

**EDUCATION**
All of these (12 s.h.):

- EDTL:7100 Design and Organization of Curriculum 3 s.h.
- EALL:5150 Introduction to Educational Research 3 s.h.
- PSQF:6200 Educational Psychology 3 s.h.
- PSQF:6275 Constructivism and Design of Instruction 3 s.h.

**RESEARCH IN SCIENCE EDUCATION**
Both of these (21 s.h.):

- EDTL:7750 Seminar: Science Education (taken three times for 1 s.h. each) 3 s.h.
- EDTL:7755 Independent Study in Science Education Research (taken six times for 3 s.h. each) 18 s.h.

**SCIENCE AREA**
Students complete a family of courses (total of 12 s.h.) in a major science area.

**DISSERTATION**
Ph.D. students earn 10 s.h. of thesis credit in EDTL:7493 Ph.D. Thesis.

**ADMISSION**
Applicants to the Ph.D. program in science education must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 1000 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test. Applicants must submit three letters of recommendation; a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study; and an example of their academic writing.

**M.A.: Social Studies Education**
The Master of Arts program in social studies education requires 38 s.h. of graduate credit. The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Students choose one of two programs. Program A provides interdisciplinary study in education, history, social science, or related areas for classroom teachers or others interested in advancing their competence in instruction and their subject area. Program B is for individuals who have a bachelor's degree in history or a social science and who wish to obtain a teaching license/certificate while earning the M.A. degree. Program B students must apply to both the Graduate College and the College of Education.

**PROGRAM A REQUIREMENTS**
Program A students distribute the program's required 38 s.h. among three concentration fields in history and social sciences (or related areas), social studies education, and general education, with at least 9 s.h. in each of three fields. They must earn at least 9 s.h. in courses numbered 5000 or above distributed among the three concentration fields.

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigative in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

**PROGRAM A COMPREHENSIVE EXAMINATION**
The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

**PROGRAM B REQUIREMENTS**
Program B students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education's Teacher Education Program for secondary education in social studies may not apply credit they have earned in required licensure courses to the 38 s.h. required for the M.A., even though the credit counts toward state teaching licensure.

Program B students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the M.A. program and immediately before student
teaching. Required teaching licensure course work completed at other colleges or universities is reviewed on a case-by-case basis.

Program B students who were accepted to the undergraduate Teacher Education Program before they received a baccalaureate must complete a college-level math course.

For licensure, students admitted to the M.A. in social studies education must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level course work. Required professional education course work not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate course work may apply.

Students must complete all of the following professional education courses, unless they completed some of them as part of their bachelor’s degree. In such cases, the semester-hour requirement for Program B is reduced accordingly, but it never falls below 38 s.h. All students must take the course work required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

Subject area specialization courses: a minimum of 9 s.h. of course work in history or a social science is required; students should take at least one course taught by the instructor who will serve on the examining committee.

**PROGRAM B COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of three two-hour exams: one on the subject area specialization, one on general professional education, and one on social studies education.

**ADMISSION**

Applicants to the M.A. program in social studies education must meet the admission requirements of the Graduate College. They should have a bachelor’s degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

After declaring a social studies education major, M.A. students must maintain a g.p.a. of at least 3.00.

**Ph.D.: Social Studies Education**

The Doctor of Philosophy program in social studies education requires a minimum of 90 s.h. of graduate credit. The program prepares secondary department chairs, supervisors, curriculum directors, teacher education personnel, and college instructors in the social sciences and in social studies education.

The required 90 s.h. of credit includes course work and the dissertation (10 s.h.).

**REQUIRED COURSES**

All doctoral students in the social studies education program are required to complete 18 s.h. of course work focused on research methodology.

Both of these:

- EALL:5150 Introduction to Educational Research 3 s.h.
- PSQF:6243 Intermediate Statistical Methods 4 s.h.

One of these:

- EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3 s.h.
- PSQF:7331 Seminar: Educational Psychology I—Current Topics (when topic is qualitative educational research requirements) arr.

In consultation with an advisor, students can fulfill the remaining 8 s.h. of research methodology course work by completing any of the following courses:

**Qualitative Methodology**

- EDTL:7071 Critical Discourse Analysis in Educational Research 3 s.h.
- EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h.
- EDTL:7410 Mixed Methods Research 3 s.h.
- EDTL:7751 Advanced Qualitative Data Analysis 3 s.h.
- EDTL:7774 Qualitative Research with Computer-Aided Qualitative Data Analysis Software 3 s.h.
Information on courses and programs is accurate as of the Fall 2017 term. Course offerings may change from semester to semester, and many courses do not meet every semester. Check the current catalog for the most up-to-date list of courses.

EDTL:7953 Seminar: Single Subject Design Research 3 s.h.
EDLS:5195 Research in Cross-Cultural Settings 3 s.h.
EDLS:5240 Topics in Education (when topic is introduction to historical methodology) arr.
HIST:7197 The Art and Craft of Historical Writing arr.
HIST:7199 History Workshop: Theory and Interpretation arr.
PSQF:6265 Program Evaluation 3 s.h.
RCE:7444 Qualitative Research in the Multicultural Context 3 s.h.

Quantitative Methodology
EDLS:5176 Demographic Techniques for Educational Research 3 s.h.
EDLS:6206 Research Process and Design 3 s.h.
EDLS:6209 Survey Research and Design 3 s.h.
PSQF:6220 Quantitative Educational Research Methodologies 3 s.h.
PSQF:6244 Correlation and Regression 4 s.h.
PSQF:6246 Design of Experiments 4 s.h.
PSQF:6247 Nonparametric Statistical Methods 3 s.h.
PSQF:6249 Factor Analysis and Structural Equation Models 3 s.h.
PSQF:6252 Introduction to Multivariate Statistical Methods 3 s.h.

Students that want to take a course that is not listed above to receive credit toward their program requirements must obtain prior approval from their advisor and from the social studies education program.

In addition, all Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses.

EDTL:7004 Schooling in the United States 3 s.h.
EDTL:7033 Seminar on Teacher Education 3 s.h.

Seminars and courses numbered 5000 or above are required in each of the study areas that constitute the major. Students must take 9 s.h. of required courses in social studies education, including EDTL:6833 History and Foundations of Social Studies Education, EDTL:6841 Infusing a Global Perspective into the Curriculum, and EDTL:6877 Seminar: Social Studies Education.

The remaining course work must be distributed among approved cognate areas (see "Required Ph.D. Cognates" under "Graduate Programs of Study: Overview" above), history, social sciences or related areas, and professional education, depending on a student’s background and goals.

COMPREHENSIVE EXAMINATION
Students take three three-hour examinations, one in each of the study areas. Depending on the distribution of course work, the nine hours of written examinations may be rearranged. The Ph.D. examining committee consists of five members, who are selected according to the nature of the student’s Ph.D. program and distribution of course work. An oral examination is conducted by the committee following the written exam.

DISSertation
Ph.D. candidates must complete a dissertation on a research problem in social studies education. The candidate must present a prospectus of the proposed research to the dissertation committee before undertaking the study. Upon completion, the candidate defends the dissertation in an oral exam.

ADMISSION
Applicants to the Ph.D. program in social studies education must meet the admission requirements of the Graduate College. They must have a bachelor’s degree in history, the social sciences, or education; a master’s degree in history, the social sciences, or education; a cumulative g.p.a. of at least 3.00; and a combined verbal and quantitative score of at least 310 on the Graduate Record Exam (GRE) General Test. At least two years of teaching experience is strongly preferred. Applicants who did not write a thesis as part of their M.A. must submit seminar papers or field research as equivalents.

M.A.: Special Education
Special education programs are offered in K-8 and 5-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.

The Master of Arts in special education requires a minimum of 32 s.h. of graduate credit. The program prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master’s degree and special education certification may request admission in order to obtain an additional area of special education licensure/certification (i.e., professional improvement). Students typically receive licensure/certification in at least one area upon completing the program. Contact the Department of Teaching and Learning for specific program requirements.

ADMISSION
Applicants to the M.A. program in special education must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 (and/or at least 3.00 on a minimum of 12 s.h. of graduate course work). A combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test is preferred. Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Exam (GRE) General Test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.
Ph.D.: Special Education

The Doctor of Philosophy program in special education requires a minimum of 90 s.h. of graduate credit. The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

The Ph.D. curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area (see "Required Ph.D. Cognates" under "Graduate Programs of Study: Overview" above), and at least one specialization area.

REQUIRED COURSES

All doctoral students in special education must take EALL:5150 Introduction to Educational Research in addition to the following research requirements:

Quantitative Research Requirements (13 s.h.)
Both of these:
- PSQF:4143 Introduction to Statistical Methods 3 s.h.
- PSQF:6243 Intermediate Statistical Methods 4 s.h.

Two of these:
- EPLS:6206 Research Process and Design 3 s.h.
- PSQF:6220 Quantitative Educational Research Methodologies 3 s.h.
- PSQF:6244 Correlation and Regression 4 s.h.
- PSQF:6246 Design of Experiments 4 s.h.
- PSQF:6247 Nonparametric Statistical Methods 3 s.h.
- PSQF:6249 Factor Analysis and Structural Equation Models 3 s.h.
- PSQF:6252 Introduction to Multivariate Statistical Methods 3 s.h.

Qualitative Research Requirements (6 s.h.)
This course:
- EDTL:7953 Seminar: Single Subject Design Research 3 s.h.

One of these:
- EDTL:7410 Mixed Methods Research 3 s.h.
- EPLS:7373 Qualitative Research Design and Methods 3 s.h.

In addition, all doctoral students in special education must complete one of the following Ph.D. core courses.

- EDTL:7004 Schooling in the United States 3 s.h.
- EDTL:7033 Seminar on Teacher Education 3 s.h.

All Ph.D. students in special education must complete the following courses.

- EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education 3 s.h.
- EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II 3 s.h.

Students also must complete an interdisciplinary minor in a discipline outside of special education (minimum of 12 s.h.). In addition, they are required to write the comprehensive examination and complete a doctoral dissertation, earning a minimum of 10 s.h. in EDTL:7493 Ph.D. Thesis.

ADMISSION

Applicants to the Ph.D. program in special education must meet the admission requirements of the Graduate College. They must have major's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Exam (GRE) General Test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

Financial Support

A limited number of teaching assistantships are available for graduate students. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; some involve teaching sections of undergraduate methods courses and supervising student teachers; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. of credit per semester. Graduate assistants must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships, consult the College of Education advisor in the appropriate field.

Courses

Elementary Education, Lower-Level Undergraduate

EDTL:1050 Opportunities in Education 2 s.h.
Introduction for underrepresented students to the teaching profession and its widely varied opportunities; faculty, students, recipients of awards in education; tours of Iowa City schools; reflection on and personal integration of class learning experiences, consideration of future plans.

EDTL:1129 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
EDTL:2000 Creativity for a Lifetime  3 s.h.
Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; integration of teamwork and opportunities for individual growth that allow for personal development; identification of ways for students to be more creative in their own lives and work. Same as ARTS:2000, ASP:2000, RHET:2000.

EDTL:2821 Oral Interpretation  3 s.h.
Weekly performances to develop and define communication skills for professional careers in teaching and business; poetry, prose, monologue, storytelling, duo interpretation, reader's theatre, and demonstration speeches. Requirements: for COMM:2821 — g.p.a. of at least 2.30 and minimum 30 s.h. of credit. Same as COMM:2821.

Elementary Education, Upper-Level Undergraduate and Graduate

EDTL:3002 Technology in the Classroom  2-3 s.h.

EDTL:3103 Assessment for Instructional Planning and Practice  3 s.h.
Fundamentals of using assessment data to make instructional planning decisions that preservice educators need in their advanced course work and classrooms; practical application with curriculum-based procedures; emphasis on classroom-based procedures used to make educational decisions to plan instruction for students, particularly those who are experiencing academic difficulty. Requirements: admission to TEP.

EDTL:3114 Parent-Child Relationships  3 s.h.
Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children's development, abilities.

EDTL:3120 Methods and Materials: Music for the Classroom Teacher  2 s.h.
Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Requirements: admission to TEP.

EDTL:3121 Creativity, Imagination, Play, and Human Development through the Arts  3 s.h.
Different theories related to human development and visual arts; use of visual arts to make meaning out of experience from the time people began making symbolic marks; ways to integrate visual arts into everyday life; cognitive and physical processes involved in making, understanding, and looking at visual art through studio experiences; theories of cognitive development; role of visual art in education; introduction to art production, art history, art criticism, and aesthetics.

EDTL:3123 Reading and Responding to Children's Literature  3 s.h.
Reading and teaching of children's literature; becoming more knowledgeable readers of children's literature; using children's literature in elementary classroom for aesthetic, personal, social, and critical purposes; wide range of literary texts in different genres and multiple ways readers might experience these texts given particular teaching approaches; ways in which readers interact with texts and with each other to make meaning as they read and discuss literature. Requirements: admission to elementary TEP.

EDTL:3127 Methods and Materials: Physical Education, Health, and Wellness  2-3 s.h.
Methods, curriculum. Requirements: admission to TEP.

EDTL:3130 Adaptive Physical Education for the Elementary Classroom Teacher  2 s.h.
Create and deliver quality, inclusive physical education for students with mental, physical, or emotional disabilities; identify and evaluate the needs of disabled students, plan units and lessons with appropriate modifications for all learners, write an IEP, comply with IDEA in a physical education setting. Prerequisites: EDTL:3127.

EDTL:3131 Movement Education  2 s.h.
Movement education as a basis for psychomotor and cognitive development in children; summary of basic growth and motor development; in-depth instruction on theory and application of movement education curriculum, and practice on design and execution of movement education lessons. Prerequisites: EDTL:3127.

EDTL:3139 American Government and Civics for the Elementary Classroom Teacher  3 s.h.
Foundations and processes of American government as related to development of civic literacy in elementary students and their teachers; founding documents, legal precedents, social and economic changes throughout American history; research-based teaching and learning processes from social studies education. Requirements: admission to TEP.

EDTL:3141 Elementary School Mathematics: Number and Operations  3 s.h.
Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen number and operations content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing number and operations concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3142 Elementary School Mathematics: Geometry and Measurement
Problem-solving approach to current trends in math education; current math content knowledge assessed at start and end of course; opportunities to strengthen geometry and measurement content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing geometry and measurement concepts and skills; research-based pedagogical strategies that help children in elementary school develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3143 Methods of Art Education in Elementary Schools 3-4 s.h.
Application of studio methods to teaching children in Saturday Children's Art Class Program. Same as ARTE:3143.

EDTL:3146 Elementary School Mathematics: Data/Probability and Algebra 3 s.h.
Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen data analysis/probability and algebra content knowledge; how grade K-5 children think about and learn math; core ideas of learning, teaching, planning, and assessing data/probability and algebra concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3154 Teaching and Learning in the Earth Sciences 3 s.h.
Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of earth sciences; essential concepts in earth sciences; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EPLS:3000 and EDTL:3103 and EDTL:3190 and PSQF:1075. Requirements: admission to TEP.

EDTL:3158 Teaching and Learning in the Biological Sciences 3 s.h.
Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of biological sciences; essential concepts in biological sciences; instruction to promote learning of essential concepts; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EPLS:3000 and EDTL:3103 and EDTL:3190 and PSQF:1075. Requirements: admission to TEP.

EDTL:3159 Teaching and Learning in the Chemical/Physical Sciences 3 s.h.
Meaningful and practical learning experiences that foster elementary science learning environments and engage learners in scientific practices and understanding of physical sciences; essential concepts in physical sciences; instruction to promote student learning of essential concepts; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075. Requirements: admission to TEP.

EDTL:3160 Literacy Learning and Teaching I 3 s.h.
Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades K-3; for preservice elementary teachers. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075. Requirements: admission to elementary TEP.

EDTL:3161 Social Studies for the Elementary Classroom Teacher 3 s.h.
Individual growth and change due to environment, economy, and technology; focus on developing teacher's understanding of social and behavioral sciences and how they relate to geography, history, and government in student's growth toward democratic citizenship; emphasis on need to develop intellectually stimulating curricula based on Iowa Core in behavioral science; lesson and curriculum development from research-based best practices in teaching social studies and driven by Iowa Core goals and objectives; technology as a teaching tool and focus of investigation in today's society. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075. Requirements: admission to elementary TEP.

EDTL:3163 Methods: Elementary School Mathematics 2-3 s.h.

EDTL:3164 Literacy Learning and Teaching II 3 s.h.
Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades 3-6; for preservice elementary teachers. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075. Requirements: admission to elementary TEP.

EDTL:3168 History for the Elementary Classroom Teacher 3 s.h.
Development of historical literacy in elementary students and their teachers; connecting children to the past using family histories; interactions and patterns in world history; diverse perspectives in U.S. history; using primary sources to investigate state and local history. Requirements: admission to TEP.

EDTL:3170 Elementary Classroom Management 1-3 s.h.
EDTL:3172 Elementary Reading Practicum 3-4 s.h.
Experience in teaching literacy to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075.

EDTL:3174 Elementary Math Practicum arr.
Experience in teaching mathematics to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075. Corequisites: EDTL:3163 and EDTL:3170.

EDTL:3175 Elementary Social Studies/Science Practicum 2 s.h.
Experience in teaching social studies and science to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; mentoring and support from supervisor with classroom experience at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; assignments designed to enrich and augment onsite experiences and tied to student's current methods courses; for preservice teachers. Requirements: admission to TEP.

EDTL:3176 Teaching Elementary School Science 3 s.h.
Advanced science methods for elementary education majors seeking a science specialization.

EDTL:3180 Drama in the Classroom 3 s.h.
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as THTR:3610.

EDTL:3190 Orientation to Elementary Education 1-2 s.h.
Overview of elementary education expectations, including options for student teaching; classroom observation, lesson planning, performance indicators, INTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics.

EDTL:3620 Methods and Materials: General Music 3 s.h.
Methods for teaching general music in elementary and secondary schools. Prerequisites: EDTL:3002 and EDTL:3090 and EDTL:3610.

EDTL:4024 Differentiating Projects with Technology 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio.

EDTL:4026 Reading for High-Ability Students 1 s.h.
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students.

EDTL:4028 Differentiating through Advanced Technology 1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development.

EDTL:4029 Developing Leadership Skills for Gifted and Talented Students, K-12 1 s.h.

EDTL:4065 Social Studies for High-Ability Learners 1-2 s.h.
Intersection of unique challenges presented by talented students and challenges of designing, implementing, and assessing quality inquiry-based social studies instruction; background in social studies or social studies education not required.

EDTL:4066 Curriculum Concepts in Gifted Education 3 s.h.
Analyzing and refining understanding of curriculum in context of: needs of gifted and talented students, rationale for and implementation of curriculum differentiation, and curriculum principles for and applications to gifted and talented; designed for preservice and inservice educators, as well as those interested in curriculum development, design, and delivery.

EDTL:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as PSQF:4081, EALL:4081, RCE:4081, EPLS:4081.

EDTL:4085 Current Readings and Research in Gifted Education 1 s.h.
Research in the field of gifted education and talent development; applications of research to ensure best practices in providing services and programs for high-ability learners.

EDTL:4096 Topics in Teaching and Learning arr.

EDTL:4153 Gifted and General Education Collaboration 1 s.h.
Need for differentiated learning experiences throughout the school day for gifted students; how classroom teachers and gifted/talented resource teacher collaborate to provide appropriate instructional services to gifted students; collaborative models, planning process, and recommendations for both direct and indirect services. Requirements: access to the Internet.

**EDTL:4171 Literacy Learning and Teaching III** 3 s.h.
Elaborates on content from EDTL:3160 and EDTL:3164; issues in theoretically sound reading and writing assessment, instruction in K-8 classrooms where local, state, and national goals play increasing roles; reading and writing processes; teaching and learning of reading and writing; focus on role of language and conversation in learning, content area reading instructional strategies, classroom-based reading and writing assessment, special issues in teaching, and learning with textbooks. Prerequisites: EDTL:3002 and EDTL:3103 and EDTL:3190 and EPLS:3000 and PSQF:1075.

**EDTL:4190 Supervised Teaching in the Elementary School: Interactive Phase** arr.
Student teaching at the elementary level (K-9). Corequisites: EDTL:4091. Requirements: application to the Office of Teacher Education and Student Services.

**EDTL:4191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase** arr.

**EDTL:4192 Special Area Student Teaching** arr.
Supervised teaching and observation in specific areas of elementary curriculum (see ISIS for areas offered).

**EDTL:4193 Independent Study** arr.
Requirements: senior standing.

**EDTL:4199 Program Models in Gifted Education** 3 s.h.
Development and refinement of preservice and inservice educators' understanding of academic programs; needs of gifted and talented students, including diverse and often underrepresented groups of students; rationale for and implementation of a comprehensive program model for gifted students. Requirements: Internet access.

**EDTL:5104 Language Disorders in School-Aged Children** 3 s.h.
Emphasis on elementary grades; usually taken in conjunction with EDTL:4192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors. Same as CSD:5104.

**EDTL:6104 Literature for Children II** 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as ENGL:6104.

**EDTL:6164 Early Literacy Development and Instruction** 2-3 s.h.
Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

**EDTL:6165 Reading and Writing Across Intermediate Grades** 3 s.h.
Issues in teaching, learning, and assessment of students grades 4-9; fostering positive literate identities, literacy engagement, strategies for reading, writing, and critically responding to texts in a range of genres and formats and across content areas.

**EDTL:6167 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms** 3 s.h.
Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

**EDTL:6171 Advanced Reading Clinic Techniques** 2-3 s.h.
Instructional procedures for children and early adolescents with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Corequisites: EDTL:6172.

**EDTL:6172 Advanced Reading Clinic Practicum** 2-3 s.h.
Practice in selecting and using instructional procedures that address the needs and interests of struggling literacy learners, with emphasis on teaching to students' strengths; how to fit clinical teaching techniques into an overall literacy instructional program. Corequisites: EDTL:6171.

**EDTL:6293 Individual Instruction** arr.

**EDTL:6534 Foundations of Mathematics Education** 2-3 s.h.
History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity; research literature.

**EDTL:6955 Social and Behavioral Interventions** 3 s.h.
Design, implementation, and evaluation of function-based interventions for students with significant behavioral challenges; functional behavior assessment, multi-component intervention design, and single-subject methodology to test effects of intervention in a K-12 school.

**EDTL:7004 Schooling in the United States** 3 s.h.
Governance, finance, and policy structures that have influenced teaching and learning in public schools.

**EDTL:7008 Seminar: Research and Current Issues** arr.
Review of literature, critical analysis of reported research, and study of current issues and problems for a specific curricular area; topics vary.

EDTL:7040 Advanced Topics in Teaching and Learning
Topics vary.

EDTL:7092 Field Service Project
Individual field service project in a specific curricular area; for advanced students.

EDTL:7093 Research Project
Individual research projects in a specific curricular area; for advanced students.

EDTL:7100 Design and Organization of Curriculum
Major issues, modern selection, sequential arrangement, organization of content; relationship of time allotments to implementation; utilization of instructional equipment; appraisal procedures; staff participation in curriculum development.

EDTL:7165 Reading Clinic: Supervision
Supervised experience in guiding and improving teacher performance in clinical practicums.

Secondary Education, Upper-Level Undergraduate and Graduate

EDTL:3001 Introduction to Museum Studies
Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as SIED:3001, ANTH:3001, MUSM:3001.

EDTL:3010 Learning in Museums
Exploration of the methodology of museum education; institutional objectives that facilitate learning in museum setting; exhibition and program development, didactic materials, and funding strategies. Prerequisites: MUSM:3001. Recommendations: good writing skills. Same as MUSM:3110.

EDTL:3026 Workshop for Secondary School Journalism/Communication Teachers
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as JMC:3210.

EDTL:3060 Pre-Intern Fall
First course in the Regents collaborative Iowa Teacher Intern License Pathway program. Requirements: admission to the ITILP program.

EDTL:3061 Pre-Intern Spring

EDTL:3062 Pre-Intern Summer I
Third course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: EDTL:3060 and EDTL:3061.

EDTL:3063 Pre-Intern Summer II
Fourth course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: EDTL:3060 and EDTL:3061 and EDTL:3062.

EDTL:3064 Intern Year
Fifth course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: EDTL:3060 and EDTL:3061 and EDTL:3062.

EDTL:3071 Secondary Classroom Management
Characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers. Prerequisites: EDTL:3090. Requirements: admission to TEP.

EDTL:3090 Orientation to Secondary Education
Overview, including options for student teaching, classroom observation, lesson planning, classroom management, performance indicators, INTASC standards, blood borne pathogens, professional ethics.

EDTL:3095 Teaching Reading in Secondary Content Areas
Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

EDTL:3204 Art Education Studio
Art training related to processes of elementary, secondary school art teaching; studio methods applied to teaching children, adolescents. Requirements: concurrent enrollment in EDTL:3290 for Teacher Education Program student.

EDTL:3205 Methods of Art Education in Secondary Schools
Art education theory and methods at secondary levels; art curriculum, unit, and lesson planning; evaluation, motivation, instructional materials; observational techniques.

EDTL:3290 Introduction and Practicum: Art
Practice of learning from an experienced art teacher in an art classroom and setting; observations in an art classroom side-by-side with experience and insight gained through participating and teaching in the Saturday Art Workshop Program. Requirements: admission to TEP.
EDTL:3382 Language and Learning  
2-3 s.h.
How language reflects and constructs learners' identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3190.

EDTL:3393 Reading and Teaching Adolescent Literature  
3 s.h.
Reading and evaluation of literature suitable for junior and senior high school students. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3191.

EDTL:3532 Introduction and Practicum: Mathematics  
3 s.h.
Experience designing and teaching lessons with varied instructional intent and use of multiple instructional strategies; study and practice methods of managing classroom learning environment; significant time spent in cooperating schools, on-campus meetings. Requirements: admission to TEP.

EDTL:3534 Methods: Middle School Mathematics  
3 s.h.
Subject matter content, teaching and assessment techniques for grades 5-9 math; how students learn mathematics; mathematics curricular planning for all students.

EDTL:3605 Instrumental Techniques  
2 s.h.
Same as MUS:3605.

EDTL:3610 Introduction and Practicum: Music  
2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; six hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:3630 Band Methods and Materials  
3 s.h.
High school and elementary school music methods required for teaching certificate; for instrumental music education majors. Same as MUS:3630.

EDTL:3635 Instrumental Conducting  
3 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: MUS:3625. Same as MUS:3635.

EDTL:3640 Choral Methods  
3 s.h.
Organization, implementation of effective choral music programs for all ages. Same as MUS:3640.

EDTL:3645 Choral Conducting and Literature  
3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under EDTL:3645. Prerequisites: EDTL:3640 and MUS:3625. Same as MUS:3645.

EDTL:3660 String Methods and Materials  
3 s.h.
Methods for teaching bands in schools. Offered fall semesters. Same as MUS:3660.

EDTL:4021 Science for High Ability Students  
1 s.h.
Unique challenges and opportunities confronted by teachers of students with above average ability and interest in science; theory and practice; development of program outlines for science programs.

EDTL:4022 Math Programming for High Ability Students  
1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as PSQF:4122.

EDTL:4025 Differentiated Instruction for the Gifted  
1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials.

EDTL:4032 Middle School Curriculum and Methods  
3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Requirements: admission to TEP.

EDTL:4072 Thinking Skills  
1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

EDTL:4073 Programming/Curriculum for High Ability Students  
1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.

EDTL:4074 Differentiation at the Secondary Level  
1 s.h.
Importance of differentiation for gifted learners in middle school and high school; differentiation through advanced placement programs as well as broader perspectives on differentiation; essentials for differentiation understood and applied to a lesson that will be implemented with students.

EDTL:4087 Seminar: Curriculum and Student Teaching  
1-3 s.h.
Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants' student teaching experiences. Requirements: student teaching.

EDTL:4089 Elementary School Special Subject Area Student Teaching  
arr.
Supervised teaching experience in a single subject in grades 1-6.
EDTL:4091 Observation and Laboratory Practice in the Secondary School
Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools.

EDTL:4092 Observation and Laboratory Practice in the Secondary School
Continuation of EDTL:4091.

EDTL:4314 Introduction and Practicum: Secondary English
Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

EDTL:4315 Methods: Secondary English
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisites: EDTL:4314. Same as ENGL:4810.

EDTL:4355 Approaches to Teaching Writing
Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. Same as CNW:4355.

EDTL:4394 Methods: Secondary Reading
Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisites: EDTL:4314.

EDTL:4406 Foreign Language Education Practicum I
Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4416.

EDTL:4407 Foreign Language Education Practicum II
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4417.

EDTL:4410 Teaching K-12 Second Language Learners
Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Requirements: admission to TEP.

EDTL:4416 Learning to Teach Second Languages I
Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisites: EDTL:4406.

EDTL:4417 Learning to Teach Second Languages II
Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisites: EDTL:4410 or EDTL:4407. Corequisites: EDTL:4407.

EDTL:4418 ESL Practicum I
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers.

EDTL:4467 Methods for Teaching English to Speakers of Other Languages in K-12 Settings
Exploration of approaches, methods, and practices in teaching English to speakers of other languages in K-12 school settings; communicative and content-based approaches to language learning with practical application of theory and research; issues concerning linguistically diverse learners covered with pedagogical implications; skills in teaching approaches for English language learners; lesson and unit planning, materials evaluation and adaptation, and assessment for placement, diagnosis, exit, and evaluation of English language learners.

EDTL:4468 Instruction of English Language Learners for K-12 Classrooms
Preparation to work with English Learners (ELLs) in K-12 settings; dramatic increase in this population over recent decade; need for teachers to understand sociocultural and linguistic challenges faced by ELLs and their families; proficiency in instructional and differentiation strategies for instructing ELLs; ELL variation and cultural considerations, English language development standards, second language teaching and learning, differentiation for ELLs, effective practice for ELL instruction and assessment; for students in teacher preparation program.

EDTL:4498 Language Structure for Teaching English Language Learners
Exploration of approaches, methods, and practices in teaching English to speakers of other languages in K-12 settings; focus on working with English language learners from a variety of first language backgrounds in educational settings; principles of discourse, phonology, morphology, syntax, pragmatics, and semantics that build a framework for discussion of applications and analysis of student and teacher language; address English language learners' development in P-12 settings; strategies to evaluate learner language; increase awareness of language challenges for English language learners that can occur in spoken and written educational instruction and materials. Requirements: admission to TEP.

EDTL:4535 Methods: High School Mathematics
Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curricular planning for all students. Prerequisites: EDTL:3534.

EDTL:4630 Psychology of Music
Cognition of music, affective response, aesthetic response, musical ability. Same as MUS:4630.

EDTL:4640 Introduction to Music Research
Preparation for conducting research on music behavior.
EDTL:4751 Science Teaching and Practice with Early Learners  2 s.h.
Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.

EDTL:4752 Methods of Teaching Science  3 s.h.
Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisites: EDTL:4751.

EDTL:4753 Instructional Issues in Teaching Science  3 s.h.
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisites: EDTL:4752. Corequisites: EDTL:4779.

EDTL:4757 Assessment in the Science Classroom  2 s.h.
Exploration of ways in which students are assessed in science classrooms; methods used to assess student learning and theoretical backgrounds; formative/summative assessment techniques, including technology-based assessment; development of assessment around three guiding questions: Where are you trying to go? Where are you now? How can you get there?; ways in which assessment theories guide teaching and learning. Requirements: admission to TEP.

Supervised teaching experience in a single subject; secondary school setting.

EDTL:4811 Introduction and Practicum: Secondary Social Studies  3 s.h.
Experience observing and assisting social studies teachers and students in secondary schools; nine hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:4870 Methods: Secondary Social Studies  3 s.h.
Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

EDTL:4876 Advanced Methods for Teaching and Learning in a Culturally Responsive Classroom  3 s.h.
Multiculturalism and equity issues in education that support development of resources and lesson activities to appeal to a diverse student body; asynchronous online course for educators in all disciplines who are pursuing licensure or currently teaching in a K-12 classroom, advanced technological literacy not required. Eight weeks. Requirements: successful completion of a methods course in K-12 licensure program.

EDTL:5080 Workshop: Teacher Training for Advanced Placement Courses  1-2 s.h.
Focus on a particular academic content area.

EDTL:5086 Curriculum Foundations  2-3 s.h.
Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as SLA:5501.

EDTL:5535 Current Issues in Mathematics Education  1-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs.

EDTL:5600 Graduate Music Education Workshop  1 s.h.
For inservice music teachers; topics vary. Same as MUS:5600.

EDTL:5601 Graduate Music Education Workshop II  1 s.h.
Varied topics; for inservice music teachers. Same as MUS:5601.

EDTL:5610 Foundations of Music Education Curricula  3 s.h.
Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

Secondary Education, Graduate

EDTL:6267 Seminar: Current Issues in Art Education  3-4 s.h.
Analysis of literature in art education and related disciplines. Same as ARTE:6267.

EDTL:6315 M.A. Seminar: English Education  arr.
Significant developments in English education; primary and collateral readings. Same as ENGL:6315.

EDTL:6393 Master's Thesis  arr.

EDTL:6400 Fundamentals of Second Language Assessment  3 s.h.
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as SLA:6503.

EDTL:6402 Second Language Program Management  3 s.h.
Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as SLA:6504.
EDTL:6403 Language Policy and Planning 3 s.h.
Sociology and politics of national policies involving language, internationally; development of a research-based policy perspective on language issues in the country in which the student intends to teach.

EDTL:6407 Reading in Non-Roman Scripts 3 s.h.
Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisites: EDTL:4171 or EDTL:6484. Same as SLA:6975.

EDTL:6408 Designing Materials for Second Language Instruction 3 s.h.
Critical perspective on creating and using media for second language learning and teaching; research on materials design, development of media. Prerequisites: EDTL:6483. Same as SLA:6505.

EDTL:6409 Cultural Curriculum 3 s.h.
Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as SLA:6970.

EDTL:6480 Issues in Foreign Language Education 3 s.h.
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as SLA:6500.

EDTL:6483 Second Language Classroom Learning 3 s.h.
Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as ASIA:6483, SLA:6506.

EDTL:6484 Reading in a Second Language 3 s.h.
Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as SLA:6501.

EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.
Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as SLA:6502.

EDTL:6530 Workshop in School Mathematics 0-3 s.h.
Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience.

EDTL:6531 Technology in School Mathematics 2-3 s.h.
Methods, materials, issues, pedagogy, assessment; use, evaluation of technology for mathematics teaching and learning; implications for organization, development of course content.

EDTL:6536 Teaching of Geometry 2-3 s.h.
Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

EDTL:6539 Teaching of Algebra 2-3 s.h.
Current developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of technologies, implications of current research for the algebra classroom.

EDTL:6570 Foundation of School Mathematics Curriculum 3 s.h.
Elementary and secondary background developments in school and mathematics curriculum; definitions, historical perspective, reform, theories of knowledge, implementation, evaluation, international perspectives, issues in mathematics curriculum.

EDTL:6600 Individual Projects in Music Education 1-2 s.h.
Projects of special concern to individual music teachers in public schools.

EDTL:6754 Theory and Research on Curriculum Materials in Science 3 s.h.
Theoretical perspectives and empirical research on design and use of science curriculum materials; contemporary theoretical assumptions about active and participatory relationships between curriculum materials, teachers, and students in particular institutional contexts; exploration of heuristics for development of effective science curriculum materials and recent research on how elementary, middle, and secondary teachers evaluate, adapt, and enact them through professional practice; for students with research and/or development interests based in K-16 contexts.

EDTL:6755 Practices of Inquiry in Science Learning Environments 3 s.h.
Contemporary perspectives on inquiry-based science teaching and learning, implications for theory and research; readings, discussions, presentations, and writing to examine and build upon policy-level science education reform discourse, sociological and organizational theory, empirical research in science education.

EDTL:6756 Science Education: The Nature of Science 3 s.h.
Relationship between scientists' work and current theoretical and practical portrayals of the nature of science in K-16 education.

EDTL:6757 Learning in the Science Classroom 2-3 s.h.
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented.

EDTL:6758 Writing in the Science Classroom 3 s.h.
Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning.

**EDTL:6759 Advanced Pedagogy** 3 s.h.
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers.

**EDTL:6833 History and Foundations of Social Studies Education** 3 s.h.
Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals.

**EDTL:6840 Theories and Perspectives in Global Education** 3 s.h.
Examination of theories and perspectives within global education that help to understand historical and contemporary social, political, economic, and cultural issues; relationship to international studies, international education, global cultures, human rights, social justice, and other areas; interaction with global educators who conduct research and/or teach in institutes of higher education around the world.

**EDTL:6841 Infusing a Global Perspective into the Curriculum** 2-3 s.h.
Rationales, conceptualizations, and themes in global perspectives in education, implications for curriculum change; elements of perspective consciousness, cultural universals, cultural diversity, cross-cultural awareness, global systems, global history, global issues; application and evaluation of ideas within fields of study and varied teaching situations.

**EDTL:6877 Seminar: Social Studies Education** 3 s.h.
Periodical literature, trends, curricular developments, research in various aspects of social studies education; for master’s and doctoral candidates in social studies education.

**EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture** 3 s.h.
Historical, recent research and theory in literacy education; topics vary.

**EDTL:7033 Seminar on Teacher Education** 3 s.h.
History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.

**EDTL:7070 Introduction to Qualitative Methods in Literacy Research** 3 s.h.
Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing.

**EDTL:7071 Critical Discourse Analysis in Educational Research** 3 s.h.
Critical discourse analysis (CDA) as theory and method; social and power relations, identities, and knowledge through written, visual, and spoken texts in social settings, such as schools, families, communities; theoretical and methodological traditions of CDA in educational research; critical approaches to analyzing spoken, written, and visual texts. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

**EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting** 3 s.h.
Advanced course in traditional and contemporary qualitative data analysis methods and varied forms of reporting to understand, critique, and conduct research about literacy learning and teaching. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

**EDTL:7073 Ethnographic Methods, Theories, and Texts** 3 s.h.
Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student’s choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer’s techniques to develop an ethnographic portfolio. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

**EDTL:7075 Educational Ethnography** 3 s.h.
Study of culture and social organization; how ethnographers become participant-observers of varying degrees in the social setting they study; opportunities to explore ethnographic research methods; focus on ethnography in educational settings; methods used in a variety of contexts including communities, businesses, families, and other social organizations; ethnography committed to social justice; social theory, issues of power and privilege, unequal access to socioeconomic and educational opportunities.

**EDTL:7380 Practicum in College Teaching** arr.

**EDTL:7385 Teaching and Learning in Higher Education** 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as PSQF:7385, EPLS:7385, GRAD:7385, RCE:7385.

**EDTL:7405 Research Methods in Second Language Teaching and Learning** 3 s.h.
Overview of common research methods used to study second language (L2) teaching and learning and related fields; variety of readings from current L2 publications, presentations, video testimonials by active L2 researchers, discussions of readings, and activities designed to process and apply concepts; field research methods; designing rigorous research study on topic of student’s choice; speaking and writing with confidence about research methods used in other studies.
EDTL:7406 Proposal Writing for Second Language Research
3 s.h.
Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning.

EDTL:7410 Mixed Methods Research
3 s.h.
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research; extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EPLS:7392.

EDTL:7414 Ph.D. Thesis
arr.

EDTL:7535 Seminar: Research in Mathematics Education
3 s.h.
Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary.

EDTL:7600 Seminar: Current Topics in Music Education
2-3 s.h.
Major areas of professional and research interest.

EDTL:7640 Advanced Research in Music Education
3 s.h.
Design, performance, analysis, and reporting of music research.

EDTL:7707 Research: Science Education
arr.
Planning of individual research projects by M.S. and Ph.D. students.

EDTL:7750 Seminar: Science Education
0-2 s.h.
Discussion of completed faculty and doctoral candidates' research, national issues, program features.

EDTL:7751 Advanced Qualitative Data Analysis
3 s.h.
Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7755 Independent Study in Science Education Research
2-3 s.h.

EDTL:7756 Research Apprenticeship in Science Education
3 s.h.
Practical experiences in science education research in a collaborative, team-oriented environment; apprenticeship model of instruction in which students' participation in authentic tasks and their learning are mutually constitutive; engagement in actual research practices to produce an empirically-based product; development of expertise with some aspect of research methodology determined by instructor; for graduate students with interests in research or development based in K-16 contexts.

EDTL:7774 Qualitative Research with Computer-Aided Qualitative Data Analysis Software
3 s.h.
Qualitative data analysis using computer-aided qualitative data analysis software (CAQDAS); emphasis on methodological approaches to data analysis, and practical and experiential aspects of using CAQDAS to conduct these stages of analysis; opportunity to work with ATLAS.ti, NVivo, Dedoose, and the Coding Analysis Toolkit (CAT); capstone product is a research report based upon qualitative analysis; students strongly encouraged to analyze data from their own research.

Special Education, Upper-Level Undergraduate and Graduate Courses

Courses at the 3000 level are open to students in education and related disciplines.

EDTL:3905 Teaching Deaf and Hard of Hearing Students
3-4 s.h.
Issues in deaf education; management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in English and/or American Sign Language. Requirements: for 4 s.h. option — concurrent enrollment in ASL:2002, if not taken as a prerequisite. Same as ASLE:3905.

EDTL:3915 Introduction: Strategist I (Elementary)
1-2 s.h.
Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming; students complete a practicum with an elementary special education teacher. Requirements: admission to TEP.

EDTL:3933 The Culturally Different in Diverse Settings
3 s.h.
Diversity in society; laws—past and present, experiences, incidents, how they affect society.

EDTL:3938 Assessment of Learning Problems
3 s.h.
Effective use of varied formal and informal assessment techniques for students with learning and behavior problems; techniques that inform teaching decisions. Requirements: admission to TEP and Elementary Strategist I program.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDTL:3963</td>
<td>Inclusive Theatre</td>
</tr>
<tr>
<td></td>
<td>Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations. Same as THTR:3605.</td>
</tr>
<tr>
<td>EDTL:3976</td>
<td>Reading Intervention for Students At Risk</td>
</tr>
<tr>
<td></td>
<td>Reading instructional approaches for students at risk for, or with reading disabilities: students enrolled in lab apply content while working with a reading disability student; use of effective teaching principles and research-based practices for designing and delivering instruction in reading (including oral and silent reading), vocabulary development, reading fluency, comprehension. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:4137</td>
<td>Introduction to Educating Gifted Students</td>
</tr>
<tr>
<td></td>
<td>Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as RCE:4137.</td>
</tr>
<tr>
<td>EDTL:4188</td>
<td>Practicum in Teaching and Curriculum Development in Gifted Education</td>
</tr>
<tr>
<td></td>
<td>Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as RCE:4188.</td>
</tr>
<tr>
<td>EDTL:4189</td>
<td>Practicum in Gifted/Talented Education</td>
</tr>
<tr>
<td></td>
<td>Experience developing course materials for classes offered through the Belin-Blank Center for Gifted Education.</td>
</tr>
<tr>
<td>EDTL:4900</td>
<td>Foundations of Special Education</td>
</tr>
<tr>
<td></td>
<td>Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems.</td>
</tr>
<tr>
<td>EDTL:4921</td>
<td>Transition and Related Issues</td>
</tr>
<tr>
<td></td>
<td>Curriculums, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.</td>
</tr>
<tr>
<td>EDTL:4922</td>
<td>Supervised Teaching: Elementary Strategist I</td>
</tr>
<tr>
<td></td>
<td>Student teaching at the elementary level in a program for students with mild to moderate disabilities. Requirements: elementary education major.</td>
</tr>
<tr>
<td>EDTL:4934</td>
<td>Parent-Teacher Communication</td>
</tr>
<tr>
<td></td>
<td>Realities of working with parents; interpersonal skills; options for parent support services. Same as PSQF:4134.</td>
</tr>
<tr>
<td>EDTL:4936</td>
<td>Home/School/Community Partnerships</td>
</tr>
<tr>
<td></td>
<td>Issues related to collaboration among families, educators, community members in implementing school programs. Same as PSQF:4136.</td>
</tr>
<tr>
<td>EDTL:4940</td>
<td>Characteristics of Disabilities</td>
</tr>
<tr>
<td></td>
<td>Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.</td>
</tr>
<tr>
<td>EDTL:4950</td>
<td>Behavioral and Social Interventions</td>
</tr>
<tr>
<td></td>
<td>Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.</td>
</tr>
<tr>
<td>EDTL:4967</td>
<td>Integrated Disability Studies Practicum</td>
</tr>
<tr>
<td></td>
<td>Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities; four whole-group classroom sessions and required attendance at one UI REACH course.</td>
</tr>
<tr>
<td>EDTL:4969</td>
<td>Diversity, Career Exploration, and Transition II</td>
</tr>
<tr>
<td></td>
<td>Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities, and assist them with transitioning into the workplace; three whole-group classroom sessions and required attendance in one of two REACH courses (internship prep or job search strategies).</td>
</tr>
<tr>
<td>EDTL:4982</td>
<td>Instructional Decision Making in Education</td>
</tr>
<tr>
<td></td>
<td>Overview of and practical application with curriculum-based procedures for assessment and evaluation; classroom-based measures to make educational decisions for instruction of students, particularly those experiencing academic difficulty.</td>
</tr>
<tr>
<td>EDTL:4983</td>
<td>Academic and Behavioral Strategies for Students with Learning Disabiliences and Behavioral Disorders</td>
</tr>
<tr>
<td></td>
<td>Merge theory and practices for assessing, planning interventions, delivering instruction, and monitoring progress for individuals who have learning disabilities and emotional/behavioral disorders.</td>
</tr>
<tr>
<td>EDTL:4984</td>
<td>Academic Skills for Students with Special Needs</td>
</tr>
<tr>
<td></td>
<td>Introduction to appropriate methodology for teaching academic skills to students with significant learning difficulties; how to teach students effectively regardless of the label that might be applied to them or the setting to which they might be assigned; effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching academic skills to education students with special needs.</td>
</tr>
<tr>
<td>EDTL:4987</td>
<td>Introduction to Assistive Technology</td>
</tr>
<tr>
<td></td>
<td>How assistive technology can be used for attainment of goals in education or work. Same as RCE:4187.</td>
</tr>
<tr>
<td>EDTL:4990</td>
<td>Interdisciplinary Issues in Disabilities</td>
</tr>
</tbody>
</table>
|             | 1-3 s.h. **University of Iowa 2015-16 General Catalog** 823
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.

EDTL:5961 Foundation of Applied Behavior Analysis 3 s.h.
Foundation knowledge and basic principles of behavior analysis in philosophical assumptions of behavior analysis, behavioral terminologies, verbal operants, and measurement concepts; first in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst (BCaBA) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Corequisites: EDTL:7953.

EDTL:5962 Function of Behaviors and Interventions 4 s.h.
Functional assessment/analysis and interventions designed to change behaviors; describing and implementing components of functional behavioral assessment; using results of a functional assessment to develop a program to teach appropriate behavior and/or decrease inappropriate behaviors; development of an instructional program to teach desired behaviors; third in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst (BCaBA) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Prerequisites: EDTL:5961 and EDTL:7953.

EDTL:5963 Ethics and Professional Conduct of Behavior Analysts 2 s.h.
Issues related to ethical and professional conduct of behavior analysts when working with clients according to BACB Professional and Ethical Standards and Guidelines for Responsible Conduct for Behavior Analysts; responsible conduct of a behavior analyst, behavior analyst's responsibility to client, assessing behavior, behavior analyst and individual behavior change program; fourth in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst (BCaBA) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Prerequisites: EDTL:5961 and EDTL:5962 and EDTL:7953.

EDTL:5964 Behavior Analyst Practicum 1-4 s.h.
Development, implementation, and evaluation of techniques that produce behavior changes in clients; discussion of key issues related to techniques of applied behavior analysis; review of various theoretical, conceptual, historical, legal, and practical aspects of behavior analysis; provides a portion of the supervisory component as required by the Behavior Analyst Certification Board (BACB).

Special Education, Graduate

EDTL:6906 Practicum with Exceptional Persons arr.
Practicum experience with students with disabilities; experiences differ depending upon student's program of study.

EDTL:6909 Seminar: Graduate Supervised Teaching 1 s.h.
For students enrolled in graduate student teaching practicum. Requirements: special education major.

EDTL:6936 Administration of Students with Special Needs 3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective special education administrative personnel. Same as EPLS:6236.

EDTL:6950 Strategist I Student Teaching: Elementary arr.
Student teaching in an elementary mild and moderate special education program.

EDTL:6951 Strategist I Student Teaching: Secondary arr.
Student teaching in a secondary mild and moderate special education program.

EDTL:6953 Strategist II Student Teaching: Elementary arr.
Student teaching in K–8 learning disabilities or behavior disorders.

EDTL:6954 Strategist II Student Teaching: Secondary arr.
Student teaching in secondary learning disabilities or behavior disorders.

EDTL:6975 Explicit Instruction 3 s.h.
Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

EDTL:7932 Field Service Project in Special Education Internship arr.
Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education.

EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education 2-3 s.h.
Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills.

EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II 2-3 s.h.
Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisites: EDTL:7943.

EDTL:7945 Current Issues and Trends in Learning Disabilities 3 s.h.
Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

EDTL:7948 Contemporary Research in Behavioral Disorders 3 s.h.
In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.
EDTL:7952 Seminar: Behavioral Assessment and Evaluation
3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as PSQF:7352.

EDTL:7953 Seminar: Single Subject Design Research
3 s.h.
Reviews of single subject research, development of student proposals; focus on special education, applied research.
UI REACH

Director

• Pamela Ries (Teaching and Learning)

Faculty: http://www.education.uiowa.edu/services/reach/faculty-staff

Web site: http://www.education.uiowa.edu/services/reach/

Postsecondary Program of Study

UI REACH (Realizing Educational and Career Hopes) is a two-year transition certificate program at the University of Iowa for students with multiple intellectual, cognitive, and learning disabilities. UI REACH provides a campus experience that empowers young adults to become independent, engaged members of the community. Courses, campus life, and career preparation assist students to reach their full potential. UI REACH strives to maintain periodic contact with alumni to encourage them to become independent adults by utilizing the independent living and career-related skills they acquired in the program.

UI REACH offers courses on academic skill building, career preparation, student and community life skills, and socialization. Courses are taught by College of Education instructors.

UI REACH students live in a University of Iowa residence hall, where they receive support from specially trained undergraduate resident assistants. A fully inclusive college environment provides students with age-appropriate community opportunities and interactions with other University of Iowa students.

A limited number of UI REACH alumni may be selected to participate in the program's third-year option. Participation during the third year involves full-time course work; emphasis is on additional courses and internships that promote self-sufficiency, independent living, and self-determination.

For more information, visit the UI REACH web site.

Courses

READIUS:0001 Academic Success 2 s.h.
Tools that help students succeed in academic courses; basic organization, efficient note taking, study and test-taking skills; participation in activities that increase awareness of classroom dynamics; solutions for test anxiety; ways to approach diverse learning experiences; how class content relates to study hall and residential facilities; seminar.

READIUS:0010 Social Skills I 2 s.h.
Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

READIUS:0020 Computers and Technology I 2 s.h.
Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

READIUS:0021 Computers and Technology II 2 s.h.
Builds on READIUS:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

READIUS:0030 Health and Wellness I--Exploration 2 s.h.
Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face—nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.

READIUS:0031 Health and Wellness II--Healthy Lifestyles 2 s.h.
Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

READIUS:0040 Personal Finance and Math I 2 s.h.
Understanding of numbers, operations, and managing personal finances; computation strategies, problem-solving strategies, skills for good consumers; opportunity to practice math skills in the community and the workplace; first in a series.

READIUS:0041 Personal Finance and Math II 2 s.h.
Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

READIUS:0050 Lifetime Reading and Writing 2 s.h.
Enhancement of leisure reading; library visit to discover interesting genres, activities to review books, discussion of components (e.g., plot, characters); techniques of good readers; writing tools for success in daily living; writing forms including short organizational forms (e.g., to-do lists, grocery lists), family correspondence, business letters; observation and demonstration of writing techniques; use of writing as a form of self-expression, organization, and communication with others.
**REA:0051 Practical Writing** 1 s.h.
Writing tools for success in daily living; experience with a range of writing forms, beginning with short organizational forms such as to-do and grocery lists and progressing to family correspondence and business letters; observation and demonstration of writing techniques in group activities; help with self-expression in written formats, with focus on organization and communication with others; students practice writing techniques in class, in their residence halls, and in the community; seminar.

**REA:0060 Tools for Life I: Critical Thinking and Decision Making** 1 s.h.
Introduction to strategies, key elements, and resources for critical thinking; problem-solving and critical-thinking strategies and skills for responsible, independent decision making in personal, university, career, and community contexts; small-group discussion, case studies, role-playing, and applied practice in real-world situations related to daily, personal, academic, and career decisions.

**REA:0061 Tools for Life II: Problem Solving** 1 s.h.
Introduction to strategies and methods of problem solving; evaluation of scenarios from academic, social, and work environments; discussion of students' personal and current experiences; focus on development of interpersonal communication skills, relationship building, independence, career selection.

**REA:0062 Social Skills II** 2 s.h.
Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

**REA:0070 Life Skills I--Transitions** 2 s.h.
Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.

**REA:0071 Life Skills II--Community Life** 2 s.h.
Review of previously learned skills for making the transition to independent living in the college environment; use of a personal planner for managing daily routines and schedules, planning for independent living after graduation; classroom activities, practical experiences on campus and in the community.

**REA:0072 Life Skills III--On Your Own** 2 s.h.
Goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; skills required for finding and managing a home or apartment, using community resources and agencies, and meeting basic needs; how to be interdependent and independent in the community.

**REA:0073 Life Skills IV--Transition Planning** 2 s.h.
Work on transition plan during spring semester of final year—goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; using community resources and agencies; meeting basic needs; how to be interdependent and independent in student's home community; identification of transition team members; plan and lead transition meeting.

**REA:0074 Household Management II** 3 s.h.
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.

**REA:0075 Household Management I** 3 s.h.
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.

**REA:0076 Community Leisure and Advocacy** 1 s.h.
Utilizing community resources while promoting self-advocacy and leadership; student support for transitioning from a university setting to community living; exploration of community resources related to recreation, entertainment, and independent living using multiple media sources for information gathering; field trips to investigate local resources; research related resources within students' home communities. Requirements: enrollment in UI REACH Program.

**REA:0078 Historical Documentary Making** 2 s.h.
History of disabilities (learning and physical disabilities); ground work for making a historical documentary; desktop documentary software used by student teams to produce documentaries on history of disability rights movement. Requirements: enrollment in REACH program.

**REA:0079 Service Learning** 2 s.h.
Classroom-based learning combined with community service; available resources and ways to better a community; assessment of community needs, research volunteer organizations, service-learning opportunities within the community.

**REA:0080 Exploring Issues in Society** 1 s.h.
Diversity and social justice issues; some social implications of being a person with a disability (e.g., negative treatment from others due to stigma, ignorance, stereotypes); guidance toward empowerment in self-advocacy at work, at school, and in community life; overview of cognitive and learning disabilities, Americans with Disabilities Act and other legislation that promotes equality, history of the disability rights movement, current social trends affecting people with disabilities; perspectives from America's history of social, cultural, and religious unity, celebration, and conflict.
REA:0081 Personal Leadership 1 s.h.
Builds on concepts learned in REA:0080; self-advocacy and awareness of individual strengths as empowerment for leadership roles in the community; qualities of a leader, value of mentors, importance of community service; elements of work-life balance; opportunities to participate in life-long service learning and leadership.

REA:0090 Current Events 1 s.h.
Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, Internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.

REA:0091 Psychology 1 s.h.
Basic concepts of psychology, with focus on daily life and understanding behavior; situations encountered as persons with an intellectual disability; differences between a psychologist, psychiatrist, and counselor; role of professionals; individual differences and social influences on behavior; introduction to scientific method, conducting basic experiments.

REA:0094 Introduction to Spanish: Language and Culture 2 s.h.
Introduction to Spanish language and culture; emphasis on basic conversational phrases, functional vocabulary, and cultural awareness; diversity of 21st-century Spanish-speaking world.

REA:0100 Career Exploration 4 s.h.
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.

REA:0101 Job Search Strategies 2 s.h.
Fundamental tools and techniques for getting a job; students create a résumé, including references and updated work history; interview techniques, information gathering, thank-you letters, work-related vocabulary, appropriate behaviors and attitudes for a successful job search; role playing, demonstrations, real-world practice.

REA:0102 Entrepreneurism 2 s.h.
Characteristics, advantages, and disadvantages of self-employment; legal aspects of forming a business, marketing, acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; students write a business plan.

REA:0103 Job Search Strategies II 2 s.h.
Continuation of REA:0101; update résumés, references, and cover pages; appropriate behaviors and attitudes for successful job search; seek and apply for jobs with assistance from instructor.

REA:0200 Business Support Seminar 1 s.h.
Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.

REA:0201 Creative Arts Seminar 2 s.h.
Aspects of careers in creative arts; availability of employment, professional association memberships, vocabulary used in the creative arts work environment.

REA:0202 Education Career Seminar 1 s.h.
Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.

REA:0203 Health Services Seminar 1 s.h.
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.

REA:0204 Hospitality Seminar 1 s.h.
Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.

REA:0205 Human Services Seminar 1 s.h.
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.

REA:0207 Marketing/Sales Seminar 1 s.h.
Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

REA:0208 Parks and Natural Resources Seminar 1 s.h.
Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.

REA:0209 Skilled Trades Seminar 1 s.h.
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.

REA:0210 Information/Technology Seminar 1 s.h.
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.

REA:0211 Culinary Arts Seminar 2 s.h.
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in REACH program.
REA:0212 Community College Prep Seminar
Preparation to continue education at a community college after UI REACH; application and admission testing requirements, how to access the services offered at Student Disability Services; exploration of associate degree and certificate; area of study requirements and courses offered.

REA:0250 Academics and Life Skills Exploration I
Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.

REA:0251 Academics and Life Skills Exploration II
Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.

REA:0252 Academics and Life Skills Enrichment I
Broaden and diversify academic and student life experiences; address specific interest areas of students; focus on communication, relationships, academics, and independent life; individualize, extend, and provide depth to student's current level of knowledge and skills.

REA:0253 Academics and Life Skills Enrichment II
Builds on extended and diversified learning opportunities provided in REA:0252; transfer of skills and knowledge to new situations and environments encountered as students transition to workplace and home communities.

REA:0254 Social Skills for Work
Learning opportunities to develop appropriate social skills in the workplace.

REA:0300 Internship I—Prep
Introduction to functional skills, job expectations, environments of the workplace; students venture out into the community and see first-hand what a specific career or job entails; role of the influencer; small groups, job shadowing, tryouts—depending on individual needs and abilities; create a résumé; summer job searching skills; preparation for Internship II—applications, interviews, contacting employers.

REA:0301 Internship II
Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.

REA:0302 Internship III
Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.

REA:0303 Internship IV
Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and e-mailing weekly journals; students, instructors, and employers evaluate student's work performance.

REA:0304 Internship V
Continuation of REA:0303; community work experiences with periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.

REA:0305 Advanced Internship
Development of advanced workplace skills in time management, communication, problem solving, and performance; one or more internships individualized to meet needs for further workplace soft skill development; observation in workplace by instructors, employers and mentors; journaling and discussion of experience with UI REACH staff; tracking time via method that works for individual needs; internship experiences and classroom seminars; emphasis on work skills in any career area and soft skills needed to be an independent worker. Requirements: UI REACH fourth year enrollment.

REA:0325 Computer and Technology Literacy I
Self-paced course to improve personal, academic, and career computer literacy and skills; online learning modules and computer-based programs to increase computer skills; email and Internet searching, online learning options, online banking and purchasing, Microsoft Office programs, and online career resources.

REA:0326 Computer and Technology Literacy II
Self-paced course builds on skills learned in REA:0325; extends and provides depth to student's current level of skill; course work focuses on enhancing personal, academic, and career computer literacy; group discussion, demonstration, independent exploration, and practice to further develop computer skills; email, online career resources, Google Drive, social networking, and budgeting.

REA:0327 Social Networking
Management of student's social network space; instruction and practice to increase access to people online while encouraging safe practices in social media communication; types of personal information that should not be revealed online; risks of meeting strangers online; constructing online personal space by engaging in use of appropriate messages, photos, and privacy settings.
**REA:0400 Independent Study**
Independent study coordinated with the student's UI REACH advisor.

**REA:0501 Special Topics**
Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.
College of Engineering

Dean
• Alec B. Scranton

Associate dean, research and graduate studies
• Milan Sonka

Associate dean, academic programs
• Keri C. Hornbuckle

Associate dean, diversity and outreach
• Tonya L. Peeples

Director, Center for Bioinformatics and Computational Biology
• Tom Casavant

Director, Center for Computer-Aided Design
• Karim Abdel-Malek

Director, Iowa Institute for Biomedical Imaging
• Milan Sonka

Director, IIHR—Hydroscience and Engineering
• Larry Weber

Undergraduate major: B.S.E.
Undergraduate certificates: technological entrepreneurship; wind energy
Graduate degrees: M.S.; Ph.D.
Web site: http://www.engineering.uiowa.edu/

Engineering is defined by the Accreditation Board for Engineering and Technology as that profession in which knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to use, economically, the materials and forces of nature for the benefit of mankind.

In short, engineering is the application of science and mathematics to solve problems for society.

The major aim of engineering is the creation of a new process, product, material, or system. This activity demands a high degree of creativity and problem solving ability coupled with a full understanding of engineering fundamentals, good judgment, and a practical sense of economics.

The College of Engineering prepares men and women for one or more of the many career opportunities in the engineering profession. Such opportunities include positions in design, production, development, research, management, and consulting. Engineers are employed in industrial organizations, governmental agencies, and private practice.

The College of Engineering’s mission is to develop, disseminate, transfer, and preserve technical knowledge that improves people’s lives. The college endeavors to:
• conduct high-quality research in selected areas, enabling faculty members and students to keep pace with new developments and ensuring that the newest concepts are taught in its courses; and
• serve the needs of the University, industry, government, and the general populace by making its facilities and faculty expertise accessible.

COLLEGE ORGANIZATION
The College of Engineering has five departments and four research units. The Department of Biomedical Engineering, Department of Chemical and Biochemical Engineering, Department of Civil and Environmental Engineering, Department of Electrical and Computer Engineering, and Department of Mechanical and Industrial Engineering offer a total of six undergraduate programs of study and many graduate programs of study.

The research units are the Center for Bioinformatics and Computational Biology, the Center for Computer-Aided Design, the Iowa Institute for Biomedical Imaging, and IIHR—Hydroscience and Engineering.

DIVERSITY AND INCLUSION IN THE COLLEGE OF ENGINEERING
The College of Engineering is committed to developing an inclusive community of learning and scholarship with the sustainable support systems that enable participants of all ages (pre-K-12, college, graduate students, staff, and faculty) to succeed. This welcoming extends beyond the college to the wider University of Iowa community and to national venues. Inclusion efforts are led by the Outreach, Admissions, Scholarship and Inclusion Services (OASIS) team. Diversity programs offered by the Ethnic Inclusion Effort for Iowa engineering (eI2) and by Women in Science and Engineering (WiSE) help to nourish the college community. Project Lead the Way (PLTW) and FIRST Tech Challenge (FTC), as well as general pre-engineering summer camps, engage K-12 students and teachers in the Midwest expanding inclusion practices to broaden participation of underrepresented groups in science and engineering disciplines. These programs enjoy the support from several international engineering and manufacturing firms, federal agencies, and private foundations. The associate dean for diversity and outreach manages these efforts and further serves to increase recruitment and retention of diverse undergraduate and graduate students, faculty, and staff within the college.

Undergraduate Programs of Study
The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) with majors in biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. All six B.S.E. programs of study are accredited by the Engineering Accreditation Commission of ABET. Each has its own set of articulated program educational objectives, and all are designed to ensure that graduates possess the following general attributes:
• ability to apply knowledge of mathematics, science, and engineering;
• ability to design and conduct experiments as well as to analyze and interpret data;
• ability to design a system, component, or process to meet desired needs;
• ability to function on multidisciplinary teams;
• ability to identify, formulate, and solve engineering problems;
• understanding of professional and ethical responsibility;
• ability to communicate effectively in oral, written, and graphical forms;
• a broad education necessary to understand the impact of engineering solutions in a global and societal context;
• recognition of the need to engage in lifelong learning and the ability to do so;
• knowledge of contemporary issues; and
• ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs of study distinguish the College of Engineering from other engineering colleges in the region. They draw on the University's recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

See Bachelor of Science in Engineering (p. 841) in the Catalog for detailed information about the B.S.E., including requirements, admission, and academic rules and procedures. For information about each B.S.E. major, see the Catalog's College of Engineering department sections: Biomedical Engineering (p. 851), Chemical and Biochemical Engineering (p. 861), Civil and Environmental Engineering (p. 871), Electrical and Computer Engineering (p. 884), and Mechanical and Industrial Engineering (p. 894).

The college also offers joint undergraduate degrees with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a joint bachelor's/master's degree program in each engineering discipline; and a joint bachelor's/master's degree with the School of Urban and Regional Planning. See "Joint and Dual Degrees" in the Bachelor of Science in Engineering (p. 841) section of the Catalog. In addition, the College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship (p. 914) for undergraduate engineering students. The College of Engineering also teams with the College of Liberal Arts and Sciences to offer the Certificate in Wind Energy (p. 915), which is open to all University of Iowa undergraduates.

Graduate Programs of Study

The College of Engineering offers the Master of Science and Doctor of Philosophy in biomedical engineering, chemical and biochemical engineering, civil and environmental engineering, electrical and computer engineering, industrial engineering, and mechanical engineering. For information about principal research and study areas, degree requirements, admission, and financial support for individual graduate programs, see the Catalog's College of Engineering department sections: Biomedical Engineering (p. 851), Chemical and Biochemical Engineering (p. 861), Civil and Environmental Engineering (p. 871), Electrical and Computer Engineering (p. 884), and Mechanical and Industrial Engineering (p. 894).

Diversity and Inclusion in Graduate Programs

Diversity programs have served to build and nourish the graduate community within the College of Engineering. The college is active in recruiting graduate students of diverse backgrounds and provides mentoring, networking, professional development, and financial support for many graduate students. The success in mentoring underrepresented students in engineering has been built on strong collaboration with other campus units and has been supported through private, state, and federal funding.

Signature programs within the College of Engineering which support graduate students include the Ethnic Inclusion Effort for Iowa Engineering and Women in Science and Engineering which provide opportunities for graduate professional development. In addition, the college is a diversity leader as a part of the University Center for Exemplary Mentoring, supported by the Alfred P. Sloan foundation, and as a member of The National GEM Consortium.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Professional Licensure

Licensure as a professional engineer is governed by the laws of each state. Most states' minimum requirements include graduation from an accredited engineering curriculum of at least four years, followed by at least four years of practical experience and successful completion of two major examinations.

The agency that controls and monitors the licensing procedure in Iowa is the Iowa Engineering and Land Surveying Examining Board. The first step in the procedure for students enrolled in an accredited program is to pass an examination on engineering fundamentals given near the time of graduation. Following graduation and the successful completion of the engineering fundamentals exam, graduates receive an Engineer-in-Training (EIT) certificate. The final step in the procedure is to pass the principles and practice exam in a specialty area following a minimum of four years of approved professional experience. At this point, the graduate engineer becomes a licensed Professional Engineer.

Student Organizations

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college. The organization also acts on collegewide matters of general student interest.

Several engineering professional societies have University of Iowa student chapters: American Institute of Chemical Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Biomedical Engineering
Student Society, Institute of Electrical and Electronics Engineers, and Institute of Industrial Engineers.

The following student organizations are multidisciplinary and are open to all engineering students:

- the American Institute of Aeronautics and Astronautics is a professional organization affiliated with the field of aerospace engineering;
- the American Wind Energy Association focuses on career development, research, and advocacy for wind energy;
- the Engineering Sales Club helps engineering students develop the professional skills required for sales careers;
- Engineering World Health, Continental Crossings, U.S. Green Building Council, and Engineers Without Borders work to reduce poverty and improve global sustainability;
- the Human Factors and Ergonomics Society raises awareness of human factors issues;
- the Society of American Military Engineers promotes and facilitates engineering support for national security;
- the Society of Automotive Engineers is a professional and technical organization; and
- a local chapter of Theta Tau, a national professional engineering fraternity, is active in service to the college.

The University chapter of Tau Beta Pi, a national honorary society for students in all engineering fields, gives special recognition to superior students in their junior and senior years. The work of students who are outstanding in specific engineering disciplines is recognized by Alpha Eta Mu Beta (biomedical engineering), Omega Chi Epsilon (chemical engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Alpha Pi Mu (industrial engineering), and Pi Tau Sigma (mechanical engineering).

Student organizations that support the enrollment of women and members of minority populations in the college include the Multi-Ethnic Engineering Student Association, the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers, the National Society of Black Engineers, the Society of Automotive Engineers, the Society of Women Engineers, and Women in Science and Engineering.

For more information, visit Engineering Student Organizations on the college's web site.

**Research Centers**

The College of Engineering has four major research centers. College of Engineering researchers also collaborate with researchers from outside the college in several interdisciplinary research units.

**College of Engineering Research Centers**

**CENTER FOR BIOINFORMATICS AND COMPUTATIONAL BIOLOGY**

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to high performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blindness, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB has been at the cutting edge of high throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, to which the CBCB plays a central role in partnership with labs, centers, and institutes across the University’s Carver College of Medicine and basic science programs across campus. The CBCB also has been a nexus for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

**CENTER FOR COMPUTER-AIDED DESIGN**

The Center for Computer-Aided Design (CCAD) conducts basic and applied research in six units: the Operator Performance Laboratory (research in human performance); the Virtual Soldier Research program (research in human modeling and simulation); the Cognitive Systems Laboratory (research in human factors in transportation and human computer interaction); the Reliability and Sensory Prognostic Systems program; the National Advanced Driving Simulator (research in human factors and simulation for ground transportation); the Musculoskeletal Imaging, Modeling, and Experimentation Program (computational modeling of anatomic structures); and Advanced Manufacturing Technology (design, modeling, and fabrication of tissue replacement parts, tissue scaffolds, medical devices, and cell and organ printing; testing of manufacturability, design effectiveness, virtual performance, and reliability of polychlorinated biphenyls—PCBs).

**IOWA INSTITUTE FOR BIOMEDICAL IMAGING**

The Iowa Institute for Biomedical Imaging (IIBI) conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound), medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); and virtual surgery planning (augmented reality for liver resection surgery). The institute is sponsored jointly by the College of Engineering and the University's Carver College of Medicine.

**IIHR—HYDROSCIENCE & ENGINEERING**

IIHR—Hydroscience & Engineering is one of the nation's premier and oldest fluids research and engineering laboratories. Its activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (hydraulics structures, river mechanics, hydraulic structures, ice mechanics, cold regions engineering, fisheries engineering, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water quality monitoring); and water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology,
hydrometeorology, remote sensing, water resources and basin-scale processes).

**Interdisciplinary Research Units**

**CENTER FOR BIOCATALYSIS AND BIOPROCESSING**
The Center for Biocatalysis and Bioprocessing (CBB) concentrates on biocatalysis and bioprocessing education, research, and technology transfer. Its research includes fermentation; bioprocessing of small molecules, peptides, proteins and biocatalysis; pilot-scale technology transfer; structural biology of biocatalysts; biocatalyst screening and discovery; bioremediation; cloning of genes and optimization of protein expression in microorganisms; and GMP operations for producing clinical-grade biotherapeutics.

**CENTER FOR GLOBAL AND REGIONAL ENVIRONMENTAL RESEARCH**
The Center for Global and Regional Environmental Research (CGRER) is devoted to studying and bettering the environment. Its focus includes multiple aspects of global environmental change, including regional effects on nature ecosystems, environments, and resources on human health, culture, and social systems. The center helps Iowa's agencies, industries, and people prepare for accelerated environmental change.

**CENTER FOR HEALTH EFFECTS OF ENVIRONMENTAL CONTAMINATION**
The Center for Health Effects of Environmental Contamination (CHEEC) is a multidisciplinary environmental health research center dedicated to supporting and conducting research to identify, measure, and prevent adverse health outcomes related to exposure to environmental toxins, particularly water contaminants. The center also conducts educational programs on environmental health and works with environmental database design, development, and systems support for environmental health research.

**CENTER FOR INTERNATIONAL RURAL AND ENVIRONMENTAL HEALTH**
The Center for International Rural and Environmental Health (CIREH) promotes understanding and awareness of the causes, consequences, and prevention of communicable, chronic, environmental, and occupational diseases in all regions of the world. The center focuses its education, training, and research on nations with substantial agrarian economies.

**ENVIRONMENTAL HEALTH SCIENCES RESEARCH CENTER**
The Environmental Health Sciences Research Center (EHSRC) researches the adverse health effects of environmental contaminants among rural and agricultural populations. The center is at the forefront of research on rural environmental health problems such as pesticide-induced cancers and birth defects, community and occupational exposures to airborne hazards from concentrated livestock operations, asthma among rural children, and remediation of rural hazardous waste sites. It also trains scientists to characterize mechanisms that underlie environmental disease and approaches to their prevention.

**INJURY PREVENTION RESEARCH CENTER**
The Injury Prevention Research Center (IPRC) is a multidisciplinary unit whose focus includes injury prevention, acute care, biomechanics, and surveillance activities. The center's current work involves examining different types of residential smoke detectors, using simulation technology to study driving safety among persons with sleep apnea and persons on antiseizure medication, using bicycling simulation to study risk taking in children, and studying the effect of interpersonal violence on women's health.

**OPTICAL SCIENCE AND TECHNOLOGY CENTER**
The Optical Science and Technology Center (OSTC) involves researchers from the College of Engineering and the College of Liberal Arts and Sciences. The center's objective is to catalyze research in the optical sciences by establishing an environment that promotes collaborative science and the development of innovative technology. Broad areas of interest include development of novel semiconductor materials with unique electronic and optical properties; design, fabrication, and characterization of nanostructures and nanomaterials; photopolymerization processes; exploration of environmental science; and application of novel optical devices in the biosciences.

**ORTHOPAEDIC BIOMECHANICS LABORATORY**
The Orthopaedic Biomechanics Laboratory researches the application of advanced innovative computational formulations and novel experimental approaches to clinically-oriented problems across the spectrum of musculoskeletal biomechanical research, including total joint replacement (hip, spine, knee, ankle) posttraumatic arthritis, osteonecrosis of the hip, high-energy limb trauma, carpal tunnel syndrome, and articular contact stresses as they relate to joint degeneration.

**PHOTOPOLYMERIZATIONS CENTER**
The Photopolymerizations Center (IUCRC) works to advance the fundamental understanding of the kinetics and mechanisms of photopolymerizations; to establish a venue for active discussions and collaborations among industrial and academic researchers; to explore high-risk, cutting-edge research on photopolymerization processes that could lead to technological innovations; and to promote and/or develop novel applications that exploit the unique set of advantages offered by photopolymerizations.

**PUBLIC POLICY CENTER**
The Public Policy Center (PPC) facilitates interdisciplinary academic research on policy related to health, human factors and vehicle safety, crime and justice, housing, the environment, and transportation. It works to provide policy makers with information they can use to help communities and individuals thrive in sustainable ways.

**Facilities and Resources**

**Seamans Center for the Engineering Arts and Sciences**
The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. Dedicated in 2001, the Seamans Center combines new construction with extensive renovation of the former Engineering Building to provide space for learning, teaching, research, and
collaboration that anticipates the needs of 21st-century engineering.

The building's Student Commons and John Deere Plaza Lobby offer welcoming space for students to work individually or together on homework and projects. Both facilities provide wireless computer connections. Additional work rooms and conference areas join the Seamans Center's expanded classrooms and flexible research space in an environment designed to serve the needs of the college's students, faculty, and staff.

All five of the college's departments have headquarters in the Seamans Center, and most faculty offices are located there.

**Engineering Student Services**
The professional staff of Engineering Student Services administers student services for the College of Engineering, including admission, advising, tutoring, and student records and scholarship. It also is the administrative home of Engineering Professional Development and the Hanson Center for Technical Communication.

**Engineering Professional Development**
Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. EPD's professional staff coordinates the College of Engineering's co-op and internship programs and opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. EPD offers individual advising and class presentations on résumé and cover letter preparation and interviewing skills. It also provides instruction on finding professional engineering positions and networking as well as evaluating and negotiating job offers. EPD recruits employers and organizations interested in hiring engineering students, and it partners with the Pomerantz Career Center to facilitate on-campus interviewing.

**Global Engineering**
Global opportunities for students are becoming increasingly important, as it is very likely that, regardless of discipline, engineering graduates will interact with customers and colleagues across the globe.

Engineering students have numerous opportunities to study abroad. Choices abound in terms of location and duration of stay. There are multiple study abroad opportunities where students can immerse themselves in another culture while taking required engineering courses in English.

In addition to studying abroad, engineering students can volunteer abroad, conduct research in other countries, and complete global internships.

For global opportunities related to a specific major, visit International Programs.

**Lichtenberger Engineering Library**
The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collections include more than 140,000 volumes and electronic full-text access to over 5,000 engineering and scientific journals. It offers electronic access to primary engineering and scientific indexes and abstracts, and full-text access to standards and U.S. patents. The library also maintains a substantial collection of publications from major engineering societies and a collection of national and international standards. Tools also are available for check out to students and faculty in order to allow for more hands-on projects and use in class assignments. Example tools include screwdrivers, scales, and light meters. The library provides 35 computer workstations with specialized software packages and a significant amount of study space for students. The study spaces allow for individual as well as group study. The library features individual study carrels, group tables, lounge chairs, a collaborative work station, and movable whiteboards. Library personnel are available to assist with specialized engineering-related reference and informational questions. Personnel also provide course- and topic-specific instructional programs to further critical thinking and life-long learning skills.

**Hanson Center for Technical Communication**
The Hanson Center for Technical Communication (HCTC) assists undergraduate engineering students develop and polish their communication skills. The center's director and assistant director supervise a staff of professional writing consultants and peer consultants.

HCTC writing consultants are professional instructors who work in teams to help engineering faculty members present and evaluate writing-intensive assignments. They also provide individual feedback and assessment of students' work throughout the writing process.

HCTC peer consultants are engineering students who have strong communication skills. Peer consultants conduct one-on-one tutoring sessions at the center, helping their fellow students develop skills for organization and audience analysis and for creating precise technical descriptions and persuasive, logical narratives.

**Engineering Computer Services**
Engineering Computer Services (ECS) provides information technology administration for curricular, administrative, and research computing at the College of Engineering. The college has three drop-in computer labs with 180 high-end Linux and Windows computer workstations, 24-seat and a 45-seat computer classrooms and labs, and a 250-seat virtual computer lab with graphics support that students can access on the Internet. Numerous public domain applications and commercial engineering applications support the full range of engineering classes. Software is upgraded annually, and hardware is upgraded every four years. The college's computer labs are open 24 hours a day, every day of the year.

**Engineering Electronics Shop**
The Engineering Electronics Shop (EES) is a full-service electronics facility that supports sales and service for the College of Engineering and the University. EES provides design, construction, repair, calibration, and preventive maintenance services for teaching and research laboratories and maintains more than 100,000 parts in stock. The shop has laser cutting and etching equipment and a fully functional printed circuit board production facility. EES also maintains a large set of rental lockers for students.
Engineering Machine Shop

The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports curricular, research, and operational needs of the College of Engineering and the University. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a variety of manufacturing equipment. The shop has its own six-seat computer instruction classroom, a high resolution 3-D scanner, and several high resolution 3-D printers. EMS also supports College of Engineering clubs with its projects support facility.

Course Numbering System

Each College of Engineering course is listed in the General Catalog section of the department that offers it; see the links under "Index: Academic Programs" at the top of this page. Core engineering courses are listed in the College of Engineering section; see "Core Engineering Courses" below. Engineering students may enroll in any course in the College of Engineering if they meet the course prerequisite and corequisite requirements.

Students who have not taken the University of Iowa prerequisite but who have earned credit in equivalent course work from another institution should consult the course instructor if they have questions concerning their preparation for the course. They must obtain the instructor's consent before registering for the course.

Undergraduates from other colleges must contact Engineering Student Services for policies and procedures. Consent for enrollment in an engineering course is based on space available as well as on whether a student has the mathematics, science, and engineering background considered necessary to undertake the course work.

Course numbers consist of an alphabetical prefix (up to four letters) and a four-digit numerical suffix separated by a colon. Each course's prefix corresponds to the academic program in the College of Engineering that offers the course, as follows.

- BME: biomedical engineering
- CBE: chemical and biochemical engineering
- CEE: civil and environmental engineering
- ECE: electrical and computer engineering
- IE: industrial engineering
- ME: mechanical engineering
- ENGR: core and Project Lead the Way

The four-digit numerical suffix identifies the course's level and type, according to the following guidelines.

- 0000–0999: noncredit courses and courses offered to nonmatriculated students.
- 1000–1999: introductory, elementary, and general education courses appropriate for first-year students and for other students with no special background; they require few or no prerequisites.
- 2000–2999: lower-level undergraduate courses usually taken by second-year students and sometimes by third-year students; they may build on materials from 1000–1999 prefix courses and may require prerequisites.
- 3000–3999: upper-level undergraduate courses such as courses for majors and courses that require prerequisites; although these courses are for undergraduates, graduate students earn graduate credit for courses at this level.
- 4000–4999: advanced upper-level undergraduate courses such as senior seminars, advanced independent study courses, or honors thesis work; although these courses are for undergraduates, graduate students earn graduate credit for courses at this level.
- 5000–5999: introductory or first-year graduate courses; although these are graduate courses, undergraduates may register for these courses without special permission, on the advice of their advisors.
- 6000–6999: lower-level and intermediate graduate courses; undergraduates must have special permission to register for these courses.
- 7000–7999: advanced graduate courses; undergraduates must have special permission to register for these courses.
- 8000–9999: courses for professional degree programs offered by the professional colleges.

Core Engineering Courses

Most College of Engineering courses are offered by the college's departments. They are listed and described in the departments' General Catalog sections; see the links under "Index: Academic Programs" at the top of this page.

The college's individual undergraduate programs and course requirements for each engineering major also are described in the Catalog's College of Engineering department sections. Each undergraduate program builds upon a core program (see Bachelor of Science in Engineering (p. 841) in the Catalog). The following core program courses are offered by the college. Not all core courses are required for each engineering major.

Core program courses are intended for College of Engineering students. Undergraduates in other disciplines who wish to register for core program courses should contact Engineering Student Services.

ENGINEERING CORE

**ENGR:1000 Engineering Success for First-Year Students** 1 s.h.
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills. Requirements: first-semester standing.

**ENGR:1100 Engineering Problem Solving I** 3 s.h.
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.
ENGR:1300 Engineering Problem Solving II 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

ENGR:2110 Engineering Fundamentals I: Statics 2-3 s.h.
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: MATH:1550. Corequisites: MATH:1560 and PHYS:1611.

ENGR:2120 Engineering Fundamentals II: Electrical Circuits 3 s.h.
Kirchhoff’s laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

ENGR:2130 Engineering Fundamentals III: Thermodynamics 3 s.h.
Basic elements of classical thermodynamics, including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles; psychrometrics. Prerequisites: CHEM:1110 and PHYS:1611. Corequisites: MATH:1560.

CROSS DISCIPLINARY CORE
ENGR:0000 Cooperative Education Training Assignment: Engineering 0 s.h.
For engineering majors participating in the Cooperative Education and Internship Program.

ENGR:0002 Half-time Co-op Ed Training Assign Engineering 0 s.h.
Registration for work assignment periods; for students participating in the Cooperative Education Program.

ENGR:0004 Academic Co-op Ed Training Assign Engineering arr.
Academic credit for full-time co-op/internship employment in the College of Engineering. Requirements: for international students — F-1 or J-1 visa, engineering undergraduate standing, minimum 3.50 g.p.a., full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved 3 s.h. distance education or evening course, and preapproval of internship by Engineering Professional Development; non-international students may be eligible on case-by-case basis.

ENGR:1029 First-Year Seminar arr.
Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

ENGR:1500 Robots and Society: The Second Machine Age 2 s.h.
Impact of second machine age (the digital age) including its immense bounty and access to cultural items that enrich lives; identification of best strategies for thriving in a changing world; first machine age—known as the Industrial Revolution (1760-1840)—that resulted in a major change from hand production to using machines for production; fundamental characteristics of second machine age; invention of digital technology with machines everywhere; economic consequences, methods of intervention, effective implementation to allow people and communities to thrive.

ENGR:2013 Introduction to Sustainability arr.
Introduction to sustainability knowledge, skills, and habits as a means to shape one vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; exploration of sustainability knowledge areas via increasing levels of democratic dialoguing and attention to increasing larger system sizes; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, livable environments).

ENGR:2510 Fluid Mechanics 4 s.h.
Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similarity; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: ENGR:2710 and MATH:2560. Corequisites: ENGR:2130.

ENGR:2710 Dynamics 3 s.h.
Vector calculus, Newton’s laws, 3-D motion of particles and multiparticle systems, 2-D motion of rigid bodies applications. Prerequisites: ENGR:2110 and MATH:1550.

ENGR:2720 Materials Science 3 s.h.
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material’s suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

ENGR:2730 Computers in Engineering 2-3 s.h.
Introduction to digital systems and engineering applications of microprocessor-based computers; C programming language; serial and parallel I/O; analog-to-digital and digital-to-analog conversion; system control using polling and interrupts; lab arranged. Prerequisites: ENGR:1300.

ENGR:2750 Mechanics of Deformable Bodies 3 s.h.
Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beams. Prerequisites: ENGR:2110. Corequisites: MATH:2560.

**ENGR:2760 Design for Manufacturing** 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: ENGR:2720.

**ENGR:4000 Engineering Honors Seminar** 1 s.h.
Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

**ENGR:4001 Leadership Seminar: Mediocrity is Not an Option** 1 s.h.
Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.

**ENGR:5100 Sustainability Explorations: Costa Rica** 1 s.h.
Societal, economic, and environmental interactions as applied to informed consumerism, eco-economies, and livable environments in United States and Costa Rica; intensive spring break learning experience at the University of Georgia Costa Rica campus embedded in course curriculum; satisfies 1 s.h. of project work for University of Iowa sustainability certificate.

**ENGR:5101 Sustainability Explorations: Brazil and Colombia** 1 s.h.
Societal, economic, and environmental interactions applied to informed consumerism, eco-economies, and livable environments in the United States and Brazil; intensive spring break learning experience at the Instituto Nacional de Pesquisas da Amazonia in Manaus embedded in course curriculum; satisfies 1 s.h. of project work for University of Iowa sustainability certificate.

**ENGR:5200 COE Fellows Seminar** 1 s.h.
Aspects of professional development for academic research, including applications for graduate fellowships, types of student aid, stewardship of discretionary accounts, identifying and meeting milestones in the Ph.D. process, integrating into the research team, teaching in a variety of academic settings, writing research articles, developing a curriculum vitae, networking in professional organizations, preparing research presentations, critical thinking, creating inclusive laboratory and classroom environments, and the impact of engineering on sustainability.

**ENGR:7270 Engineering Ethics** 1 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.

**ENGR:7604 Engineering Ethics for Post Docs** 0 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.

### Project Lead The Way

Project Lead The Way (PLTW) is a four-year high school sequence taught in conjunction with traditional math and science courses. The program's curriculum emphasizes critical thinking, creativity, innovation, and real-world problem solving. PLTW courses provide students with in-depth, hands-on knowledge of engineering and technology-based careers.

**ENGR:1430 Introduction to Engineering Design** 3 s.h.
Problem-solving skills taught through a design-development process; use of solid-modeling computer design software to create, analyze, and communicate models of product solutions. Requirements: Project Lead The Way high school student.

**ENGR:1431 Principles of Engineering** 3 s.h.
Introduction to engineering and engineering technology; exploration of varied technology systems and manufacturing processes to show how engineers and technicians use math, science, and technology to solve engineering problems and help people; concerns about social and political consequences of technological change. Requirements: Project Lead The Way high school student.

**ENGR:1432 Digital Electronics** 3 s.h.
Applied logic, with focus on application of electronic circuits and devices; use of computer simulation software to design and test digital circuitry before circuits and devices are built. Requirements: Project Lead the Way high school student.

**ENGR:1433 Computer Integrated Manufacturing** 3 s.h.
Builds on computer solid modeling skills developed in ENGR:1430 on of robotics and automation principles; robotics in automated manufacturing, design analysis; students use CNC equipment to produce models of their 3-D designs. Requirements: Project Lead the Way high school student.
ENGR:1434 Civil Engineering and Architecture 3 s.h.
Overview of civil engineering and architecture; interrelationship and dependence of each field on the other; roles of civil engineers and architects, project planning, site planning, building design, project documentation and presentation; students use state-of-the-art software to solve real-world problems and provide solutions for projects and activities. Requirements: Project Lead the Way high school student.

ENGR:1435 Aerospace Engineering 3 s.h.
Experience applying scientific and engineering concepts to design materials and processes for aeronautics and flight; aerospace information systems, star sailing or astronautics rocketry, propulsion, physics of space science, space life sciences; habitat and crew systems with life support, biology of space science, principles of aeronautics, structures and materials, systems engineering. Requirements: Project Lead the Way high school student.

ENGR:1436 Biotechnical Engineering 3 s.h.
Experiences from the fields of biotechnology, bioengineering, biomedical engineering, and biomolecular engineering; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics. Requirements: Project Lead the Way high school student.

ENGR:1437 Computer Science and Software Engineering (CSE) 3 s.h.
Implementation of the College Board's 2013 Computer Science Principles framework; development of computational thinking, career paths that utilize computing, professional tools to foster creativity and collaboration; use of Python as a primary tool; incorporation of multiple platforms and languages for computation; development of programming expertise, exploration of Internet workings; projects and problems including app development, visualization of data, cybersecurity, robotics, simulation. Requirements: enrollment in Project Lead the Way program and consent of UIL Project Lead the Way director.

ENGR:1440 Environmental Sustainability 3 s.h.
Investigation and design of solutions in response to real-world challenges related to clean and abundant drinking water, food supply issues, and renewable energy; application of knowledge through hands-on activities and simulations. Requirements: Project Lead the Way high school student.

ENGR:6431 Concepts of Physical Science and Principles of Engineering 5 s.h.
Understanding the field of engineering and engineering technology; technology systems and manufacturing processes explored to learn how engineers and technicians use math, science, and technology to solve engineering problems and benefit people; concerns about social and political consequences of technological change. Requirements: Project Lead the Way high school teacher.

ENGR:6433 Concepts in Physical Science with Computer Integrated Manufacturing Applications 5 s.h.
Introduction to high-tech, innovative nature of modern manufacturing; opportunities related to understanding manufacturing; manufacturing processes, product design, robotics, automation; students may earn a virtual manufacturing badge recognized by the National Manufacturing Badge system; proper paradigm for relating these concepts to secondary level students. Requirements: Project Lead the Way teacher.

ENGR:6434 Concepts of Physical Science with Civil Engineering Applications 5 s.h.
Civil engineering and architecture field experience; proper paradigm for relating concepts to secondary-level students, history of civil engineering, architectural design, surveying, cost and efficiency analysis, sustainable design, soil testing, site evaluation and layout. Requirements: Project Lead the Way high school teacher.

ENGR:6436 Concepts of Physical Science with Biotechnical Engineering Applications 3 s.h.
Experiences from biotechnology, bioengineering, biomedical engineering, and biomolecular engineering, and how to relate them to secondary students; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics. Requirements: Project Lead the Way high school teacher.

ENGR:6437 Concepts of Physical Science with Computer Engineering 5 s.h.
Field of computer science and software engineering; exploration of pedagogy to learn how engineers and technicians use math, science, and technology to solve engineering problems and benefit people; concerns about social and political consequences of technological change. Requirements: Project Lead the Way high school teacher.

ENGR:6438 Concepts of Physical Science with Medical Detectives Training 2 s.h.
Field of medical testing and forensics, exploration of pedagogy; how medical personnel use math, science, and technology to solve problems and benefit people; solving medical mysteries through hands-on projects and labs; how to measure and interpret vital signs; how systems of human body work together to maintain health. Requirements: Project Lead the Way high school or middle school teacher.

ENGR:6439 Concepts of Physical Science with Engineering Design and Development 5 s.h.
Experiences from engineering design and development fields; proper paradigm for relating concepts to secondary-level students; team work to design and develop an original solution to a technical problem by applying engineering design process; research to choose, validate, and justify a technical problem; teams design, build, and test solutions, then present and defend original solution to an outside panel; developed by Project Lead the Way.

ENGR:6440 Concepts in Physical Science with Environmental Sustainability Applications 1.5 s.h.
Investigation and design of solutions in response to real-world challenges related to clean and abundant drinking water, food supply issues, and renewable energy; proper paradigm for relating these concepts to secondary level students; application of knowledge through hands-on activities and simulations. Requirements: Project Lead the way teacher.

**ENGR:6450 Concepts in Physical Science with K-5 STEM Launch Applications**  
1 s.h.  
Introduction to Project Lead the Way (PLTW) launch curriculum; 24 modules (K-5 grade level) that align to Common Core State Standards for math and English language arts, Next Generation Science Standards, and other national and state standards; 10-hour modules presented in pairs that combine to create a thematic unit; flexibility of teachers and schools to introduce modules that they want, when they want, and at the grade level they want; proper paradigm for relating these concepts to elementary (K-5) students, training other elementary teachers. Requirements: Project Lead the Way teacher.

**ENGR:6451 Concepts in Physical Science with Introduction to Computer Science**  
2 s.h.  
Preparation for teaching beginning computer science course; creation of simple applications for mobile devices using MIT App Inventor; impact of computing on society, application of computing across career paths, skill building and awareness of digital citizenship and cybersecurity; transfer of programming skills gained in MIT App Inventor to text-based programming in Python to create strategy games; proper paradigm for relating these concepts to secondary students.

**Interdepartmental Degree**  
Bachelor of Science in Engineering (p. 841)

**Departments**  
Biomedical Engineering (p. 851)  
Chemical and Biochemical Engineering (p. 861)  
Civil and Environmental Engineering (p. 871)  
Electrical and Computer Engineering (p. 884)  
Mechanical and Industrial Engineering (p. 894)

**Certificate Programs**  
Technological Entrepreneurship (p. 914)  
Wind Energy (p. 915)
Bachelor of Science in Engineering

Undergraduate major: B.S.E.
Web site: http://www.engineering.uiowa.edu/

Undergraduate Program of Study

- Bachelor of Science in Engineering

The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) with majors in biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. The undergraduate majors are designed to attract the best and brightest students and prepare them to be engineers who will succeed in a workplace filled with diverse people, attitudes, and ideas; to compete in the global marketplace; to work effectively in multidisciplinary teams; and to confidently understand, use, and develop modern technology.

All six B.S.E. programs of study are accredited by the Engineering Accreditation Commission of ABET. Each has its own set of articulated program educational objectives, and all are designed to ensure that graduates possess the following general attributes:

- ability to apply knowledge of mathematics, science, and engineering;
- ability to design and conduct experiments as well as to analyze and interpret data;
- ability to design a system, component, or process to meet desired needs;
- ability to function on multidisciplinary teams;
- ability to identify, formulate, and solve engineering problems;
- understanding of professional and ethical responsibility;
- ability to communicate effectively in oral, written, and graphical forms;
- a broad education necessary to understand the impact of engineering solutions in a global and societal context;
- recognition of the need to engage in lifelong learning and the ability to do so;
- knowledge of contemporary issues; and
- ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs of study distinguish the College of Engineering from other engineering colleges in the region. They draw on the University's recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All build on the University’s research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives (e.g., engineering practice, project management, research and development).

This Catalog section provides information about requirements that all B.S.E. students must fulfill, regardless of their engineering major, as well as admission information and academic rules and procedures; see "Bachelor of Science in Engineering" below.

Engineering students may earn more than one B.S.E. degree. They also may earn joint undergraduate degrees in the College of Liberal Arts and Sciences or the Tippie College of Business, a joint B.S.E./master's degree in urban and regional planning, or a joint B.S.E./M.S. in engineering; see "Joint and Dual Degrees" later in this section.

The undergraduate Certificate in Technological Entrepreneurship (p. 914) is tailored specifically for engineering students who intend to start and operate their own businesses or who would like to understand and learn about managing innovation in business environments. The undergraduate Certificate in Wind Energy (p. 915) introduces students to a developing field that has a growing need for professionals with knowledge of wind energy fundamentals. The University offers a wealth of other certificates and minors in a wide range of disciplines that are open to all undergraduate students; see "Minors" and "Certificates" below.

DIVERSITY AND INCLUSION IN THE COLLEGE OF ENGINEERING

The College of Engineering strives to be a national leader in including women and men of all races and ethnic groups in its student body and providing a model for other institutions that are interested in strengthening inclusion of all peoples in engineering. The Ethnic Inclusion Effort for Iowa Engineering develops integrative programs and activities which serve to build and nourish the engineering community. This includes support of diversity programming and diversity in student organizations. Women in Science and Engineering (WISE) offers a variety of services for undergraduate students including the WISE Peer Mentoring Program and the Be-WISE Women in Science and Engineering Living-Learning Community (LLC). The Be-WISE-LLC is the University of Iowa’s longest continuously running living-learning community that provides academic and social support programming, as well as a positive community of scholars, for women majoring in STEM fields. To learn more, see Diversity at the UI College of Engineering on the college’s web site.

Bachelor of Science in Engineering

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the UI College of Engineering for the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

Engineering students earn the B.S.E. degree in one of six undergraduate programs of study (majors): biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, or mechanical engineering.

All students complete a core of common B.S.E. requirements, usually during their first three semesters;
see "Core Requirements" below. They also must complete a curriculum—a set of required and elective courses—designed specifically for their major program. The curriculum prepares students to practice engineering in that program's field of engineering. It is designed by the program's faculty members according to guidelines provided by the national accrediting body of ABET.

Each program's curriculum is divided into four major stems: mathematics and basic sciences; engineering topics; an elective focus area; and the general education component (humanities and social sciences). All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem. See "Curriculum Stems" below.

Courses below the level of the beginning courses in each program's curriculum count toward students' overall grade-point averages and are recorded on their transcripts, but they do not count toward requirements for the B.S.E. degree.

Core Requirements
All B.S.E. students must complete a core of courses that constitute approximately one-third of the courses required for the degree. They complete most of the core during their first three semesters, so most students may postpone making a decision about which engineering major to pursue or may change their engineering major during their first three semesters with little or no loss of time or credit.

The core includes RHET:1030 Rhetoric, a first-year course in writing, speaking, and critical reading; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II, which cover a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming; and courses in chemistry, engineering mathematics and fundamentals, and physics. Students must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

Students should complete the core requirements according to the following three-semester plan. Those who do not follow this plan may encounter a delay in graduation because of scheduling problems for courses that must be taken in a specific sequence or that are offered only once a year.

First Semester
All of these:

ENGR:1000 Engineering Success for First-Year Students (all majors; credit does not count toward B.S.E. degree) 1 s.h.
ENGR:1100 Engineering Problem Solving I (all majors) 3 s.h.
CHEM:1110 Principles of Chemistry I (all majors) 4 s.h.
MATH:1550 Engineering Mathematics I: Single Variable Calculus (all majors) 4 s.h.
RHET:1030 Rhetoric (all majors) 4 s.h.

Second Semester
One of these:

CHEM:1120 Principles of Chemistry II (biomedical, chemical, and environmental majors) 4 s.h.
General education component (civil, electrical, industrial, and mechanical majors) 3 s.h.

All of these:

ENGR:1300 Engineering Problem Solving II (all majors) 3 s.h.
MATH:1560 Engineering Mathematics II: Multivariable Calculus (all majors) 4 s.h.
MATH:2550 Engineering Mathematics III: Matrix Algebra (all majors) 2 s.h.
PHYS:1611 Introductory Physics I (all majors) 4 s.h.

Third Semester
One of these:

PHYS:1612 Introductory Physics II (biomedical, civil, electrical, industrial, and mechanical majors) 3-4 s.h.
General education component (optional, chemical and environmental majors) 3 s.h.

All of these:

ENGR:2110 Engineering Fundamentals I: Statics (all majors) 2 s.h.
ENGR:2120 Engineering Fundamentals II: Electrical Circuits (all majors) 3 s.h.
ENGR:2130 Engineering Fundamentals III: Thermodynamics (all majors) 3 s.h.
MATH:2560 Engineering Mathematics IV: Differential Equations (all majors) 3 s.h.

Requirements for Each Engineering Major
The curriculum for each B.S.E. major is described in that program's departmental Catalog section; see Biomedical Engineering (p. 851), Chemical and Biochemical Engineering (p. 861), Civil and Environmental Engineering (p. 871), Electrical and Computer Engineering (p. 884), or Mechanical and Industrial Engineering (p. 894).

Each program's curriculum is divided into four major stems, which are described below.

CURRICULUM STEMS
The curriculum for each B.S.E. program of study is divided into major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (humanities and social sciences). All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem.

Mathematics and Basic Sciences
The mathematics and basic sciences stem provides the foundation upon which the engineering courses for each engineering major are based. It includes a minimum of five courses in mathematics and statistics and one each in chemistry and physics. The faculty of each engineering program has specified at least one additional chemistry or physics course and other additional mathematics or
science courses beyond these minimum requirements to provide a base appropriate for the program's major.

**Engineering Topics (Science and Design)**

The engineering topics stem builds upon the math and science stem, providing a bridge from fundamental principles to applications and creative practice.

The stem's engineering science courses use the underlying principles learned in the mathematics and basic sciences stem to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits, as well as other engineering courses relevant to each major.

The stem's engineering design courses focus on the process of devising a system, component, or process to meet a stated objective. Engineering design integrates decision making and the optimal application of basic sciences, mathematics, and engineering sciences to reach a desired outcome. Elements of the design process include the establishment of objectives and criteria, synthesis, analysis, construction, testing, evaluation, and consideration of realistic constraints such as economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact.

**Elective Focus Area**

The elective focus area stem provides a set amount of credit that students use to build strength in a technical focus area by completing a minor, earning a certificate, or pursuing a tailored program of study.

Students choose elective focus area courses consistent with traditional career goals or nontraditional career goals. Their choice of degree plan and courses may affect the number and type of employment opportunities available to them after graduation. Program advisors help students develop coherent, well-focused plans that fit their goals.

Students who pursue a traditional focus area may replace up to 21 s.h. of traditional technical electives with course work toward a minor or certificate. Students who choose nontraditional focus areas work closely with an advisor to build a rigorous, well-focused program. They must define and justify their career goals; provide a detailed plan of study and obtain their B.S.E. program's approval for the plan before beginning the plan's course work; and complete the plan as approved.

Each B.S.E. program is responsible for approving proposed plans of study, ensuring that the program's ABET accreditation criteria are met, and that students' choices are consistent with their career aspirations and with the college's educational mission.

Guidelines for elective focus areas vary by program. For details, see Engineering Curriculum Guides on the college's web site.

**General Education Component**

The general education component stem promotes understanding of and appreciation for community, culture, and learning through course work. All summer 2015 incoming students and those admitted later are held to the following requirements.

Students earn 15 s.h. in courses chosen from approved departments and programs as outlined below.

Completion of at least 3 s.h. from the "Be Creative: course list as follows.

</tbody>
</table>
Completion of at least 3 s.h. from one of the following CLAS GE categories below. (Industrial engineering students must complete this requirement with PSY:1001 Elementary Psychology.)

- Interpretation of Literature
- World Languages
- Historical Perspectives
- International and Global Issues
- Literary, Visual, and Performing Arts
- Values, Society, and Diversity
- Social Sciences

Completion of at least 9 s.h. as follows. The remaining GE courses can be selected from the "Be Creative" list, from courses in the seven CLAS GE lists above, or from the College of Engineering approved course subject list. See General Education Component for departments and programs that offer approved courses. Most general education component courses are offered by the College of Liberal Arts and Sciences (CLAS).

Credit may be earned by examination; see "Academic Rules and Procedures"/"Academic Standards"/"Credit by Examination" later in this section.

Students who enter the College of Engineering with a B.A. or B.S. are considered to have satisfied the general education component requirement.

Students who enroll in a joint degree program in the College of Engineering and the College of Liberal Arts and Sciences or the Tippie College of Business are considered to have satisfied the College of Engineering's general education requirement once they have completed all requirements for the liberal arts and sciences degree or the business degree.

**Honors in Engineering**

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a B.S.E. with honors, which is noted on the student's transcript. See the College of Engineering Honors Education Opportunities web page for details.

In addition to honors in engineering, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

**Second B.S.E. Degree**

Current College of Engineering students and recent graduates may earn a second Bachelor of Science in Engineering. The second degree must include all courses required by the second engineering degree program, including the senior-level design course sequence and any specific social science elective requirements. Elective focus area courses selected for the second B.S.E. must be of a variety and level that permit students to meet at least the minimal level of competence usually expected of graduates of that program.

Students must file an academic study plan, which must be approved by the faculty of the second degree program, submitted to the Student Development Center, and placed in a student's permanent file before a student may begin course work in the second B.S.E. The study plan should include a list of the courses to be taken in the second program along with a list of the courses already completed and yet to be completed for the first engineering degree program. Any changes in the plan must be approved by a student's faculty advisor in the second program and by the department chair of that program (the college petition form may be used for this purpose), submitted to the Student Development Center, and placed in a student's permanent file.

**Joint and Dual Degrees**

**Joint B.B.A./B.S.E.**

The College of Engineering and the Tippie College of Business offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the joint program must complete all requirements for both degrees, including all General Education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on a student's choice of major study areas.

Students in the joint B.B.A./B.S.E. program should consult with their advisors about whether the second-grade option is available to them.

Students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the joint degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact Engineering Student Services.

For information about the B.B.A., including requirements for the degree, see Bachelor of Business Administration (p. 654) (Tippie College of Business) in the Catalog.

**Joint B.S.E./Liberal Arts and Sciences Degree**

Students may earn two University of Iowa bachelor’s degrees in a joint program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A.
(Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in joint degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences General Education Program (p. 313) and the College of Engineering general education component.

Students in the joint program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the joint degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the joint degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the joint degree program. Joint degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to his or her engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact Engineering Student Services for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences (p. 24) in the Catalog and select majors in departments from the college index.

**B.S./B.S.E. Dual Degree with Northern Iowa**

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all course work and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of course work at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the General Education requirements. Credit for courses passed with a grade of C or higher is transferred to the University of Iowa as credit for equivalent courses there.

At the University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Course work completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the University's established deadlines.

**Joint B.S.E./M.S. in Engineering**

Engineering students may be eligible to enroll in one of the College of Engineering's joint B.S.E./M.S. programs, which allow students to begin working toward a master's degree in engineering while they are completing the bachelor's degree. The joint programs, which are offered by each of the college's departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See "Joint B.S.E./M.S." in each College of Engineering department section of the Catalog.

**Joint B.S.E./M.A. or M.S. in Urban and Regional Planning**

The College of Engineering and the School of Urban and Regional Planning offer the joint Bachelor of Science in Engineering/Master of Arts or Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the joint program has two advisors, one in engineering and one in urban and regional planning. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their B.S.E. program during the first two years and begin adding courses from the urban and regional planning program during the third year. Successful students receive a B.S.E. at the end of the fourth year and an M.A. or M.S. in urban and regional planning at the end of the fifth year.

Students in the joint program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.A. or M.S. in urban and regional planning.

See Urban and Regional Planning (p. 963) (Graduate College) in the Catalog for information about the graduate degree. Contact Engineering Student Services for information about applying to the joint program.

**Minors**

Engineering students may complete minors in a number of disciplines. For instance, students interested in heading an engineering firm might choose to earn a minor in business administration. For a list of minors and links to the departments and programs that offer them, see Undergraduate Minors (p. 12) in the Catalog.
B.S.E. programs generally allow students to satisfy their elective focus area requirement by completing a minor. Students who choose this option must work closely with program advisors to ensure that the minor is compatible with their engineering career aspirations.

In order to have the minor noted on their transcript, students must designate that they have fulfilled a minor’s requirements when they apply for degree on ISIS. See “Academic Rules and Procedures”/”Application for Degree” later in this section.

**Certificates**

Engineering students may earn certificates offered by colleges across the University. The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship (p. 914), which is tailored specifically for engineering students who intend to start and operate their own business or who would like to understand and learn about managing innovation in business environments. The College of Engineering also teams with the College of Liberal Arts and Sciences to offer the undergraduate Certificate in Wind Energy (p. 915), which introduces students to a developing field that has a growing need for professionals with knowledge of wind energy. Other certificates of particular interest to engineering students include the Certificate in International Business (p. 408) and the Certificate in Sustainability (p. 1248).

See Undergraduate Certificates (p. 11) in the Catalog for a complete list of certificates and links to their individual Catalog sections.

**Cooperative Education and Internship Program**

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional practice while they are still students. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of the day-to-day life of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation. A portion of registered co-op and/or internship experience before graduation can be credited toward the experience requirements for professional licensure in Iowa and some other states.

Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half time while taking at least 6 s.h. of classes. The co-op experience may cover one to three semesters, a series of summer placements, or a single summer. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. Interested students and employers or organizations must register with the College of Engineering director of professional development. For details, see Engineering Professional Development.

**Admission**

Applicants for admission to the College of Engineering as first-year students must have successfully completed at least four years of English/language arts; four years of mathematics, which must include at least two years of algebra, one year of geometry, and one year of higher mathematics (trigonometry, analysis, calculus); two years of a single foreign language; three years of natural science, which must include at least one year of chemistry and at least one year of physics; and at least two years of social studies. A high school computer programming course is recommended but not required.

Applicants are guaranteed admission to the College of Engineering if they have no high school unit deficiencies, an ACT composite score of 25 or higher, an ACT math score of 25 or higher, and a Regent Admission Index score of at least 265. Students who do not meet these requirements, or who attend a high school that does not rank its students, are encouraged to send recommendations from math and science teachers and a personal statement, which will be considered in an individual review by the College of Engineering.

Students who are admitted through the individual review process may be required to make up deficiencies by taking a lower-level course in their area of deficiency before enrolling in the first required course in that area. For example, students who have high math grades and standardized test scores, but who are deficient by one unit in mathematics, may be required to complete a course such as MATH:1020 Elementary Functions before enrolling in the first engineering calculus course.

Incoming first-year and transfer students who do not meet the foreign language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level foreign language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Information about admission to the College of Engineering is available on the college’s web site.

**Transfer Applicants**

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed calculus I and the equivalent of either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors, or the first semester of calculus-based physics). Overall grade-point average also is considered in transfer applications.

Information about admission requirements for transfer students is available on the college's web site.

**Academic Rules and Procedures**

**Academic Advising**

Undeclared engineering students and declared first-year students are advised by the staff of Engineering Student Services. After the first year, engineering students who have declared an academic program are
advised by faculty advisors assigned to that program. Students may request a change of advisor when it is deemed appropriate. All students are required to have a conference with their advisors before registering for classes each semester.

Application for Degree

Students who wish to be considered for graduation must submit an Application for Degree through ISIS the session before they are eligible to graduate or before the deadline date during the session in which their degree is to be conferred.

Students who do not graduate in the session they submitted their Application for Degree must submit another application through ISIS for the next applicable session. Students do not need to be registered to apply for a degree.

See Apply for Degree on the Office of the Registrar website.

Academic Recognition

GRADUATION WITH HONORS

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment. To be eligible for graduation with honors, students must be approved by a selected honors committee and the director of the honors program, and they must complete honors requirements. See “Honors in Engineering” earlier in this Catalog section.

GRADUATION WITH DISTINCTION

Graduation with distinction recognizes high academic achievement based on grades. The college awards degrees "with highest distinction" to students in the highest 2 percent of their graduating class, "with high distinction" to students in the next-highest 3 percent, and "with distinction" to students in the next-highest 5 percent. Ranking is based on students' grade-point average for all college-level study taken up to their final registration.

To be eligible to be considered for graduation with distinction, students must complete their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration. Students in the combined engineering/liberal arts and sciences program are eligible to graduate with distinction regardless of the college in which they complete their residency requirement.

DEAN’S LIST

Undergraduate students in the Colleges of Liberal Arts and Sciences and Engineering and the Tippie College of Business who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

PRESIDENT’S LIST

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded course work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Academic Standards

MAXIMUM SCHEDULE

Course schedules of more than 19 s.h. for a semester, 12 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in Engineering Student Services. The Permission to Register for Additional Hours form is available online.

CLASSIFICATION OF STUDENTS

Students in the College of Engineering are classified by the number of semester hours of credit they have earned toward the Bachelor of Science in Engineering.

First-year: 0-29 s.h. earned toward the B.S.E.
Sophomore: 30-59 s.h. earned toward the B.S.E.
Junior: 60-89 s.h. earned toward the B.S.E.
Senior: 90 s.h. or more earned toward the B.S.E.

GRADING SYSTEM

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numerical Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A (superior)</td>
<td>4.00</td>
</tr>
<tr>
<td>A-minus</td>
<td>3.67</td>
</tr>
<tr>
<td>B-plus</td>
<td>3.33</td>
</tr>
<tr>
<td>B (above average)</td>
<td>3.00</td>
</tr>
<tr>
<td>B-minus</td>
<td>2.67</td>
</tr>
<tr>
<td>C-plus</td>
<td>2.33</td>
</tr>
<tr>
<td>C (average)</td>
<td>2.00</td>
</tr>
<tr>
<td>C-minus</td>
<td>1.67</td>
</tr>
<tr>
<td>D-plus</td>
<td>1.33</td>
</tr>
<tr>
<td>D (below average)</td>
<td>1.00</td>
</tr>
<tr>
<td>D-minus</td>
<td>0.67</td>
</tr>
<tr>
<td>F (failing)</td>
<td>0</td>
</tr>
</tbody>
</table>

This grading system is used for all students in both undergraduate and graduate engineering courses. Grades of D-minus are passing grades; that is, courses completed with grades of D-minus or higher count toward collegiate requirements, with the exception of MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus, which have a minimum grade requirement of C-minus or higher.

ACADEMIC PROBATION AND DISMISSAL

Students who do not achieve or surpass University of Iowa cumulative and semester minimum grade-point averages of 2.00 are placed on academic probation.

Students on academic probation are restored to good standing when they successfully complete an additional 9 s.h. toward an engineering degree, either in one semester or cumulatively, and their University of Iowa cumulative and semester grade-point averages equal or exceed 2.00.
The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters. Students on academic probation are not permitted to continue their enrollment without written expectations for their future performance.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one calendar year. A written appeal for reinstatement must be submitted to the Appeals Committee at the Student Development Center. Appeals must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details, see Academic Policies and Appeal Procedures under Current Students on the college's web site.

**DROPPING AND ADDING COURSES**

Courses may be added with permission of the advisor and the instructor during the first two weeks of the semester or first one-and-one-half weeks of the summer session.

Courses may be dropped with permission of the advisor and the instructor at any time during the first 10 weeks of the semester. Only under compelling circumstances may courses be dropped after the 10th week, in which case special approval must be granted by the advisor, the course instructor, and the dean's office. Under no circumstance are students permitted to drop after the beginning of the scheduled final examination period.

**LIMITS ON WITHDRAWING FROM COURSES**

Undergraduates receive the mark of W for any course dropped after the second week of the semester or the first one-and-one-half weeks of the summer session. Students may not drop the same course with a mark of W more than twice. Special courses that may be repeated are exempt from this rule.

Students who have a legitimate reason for dropping a course (e.g., disabling illness, death of an immediate family member) and can document that reason are permitted to exclude that drop from the maximum, but the W is not removed from the record. Requests for such exclusions are made at Engineering Student Services.

**WITHDRAWAL OF REGISTRATION**

Students who withdraw their entire registration must consult the staff at Engineering Student Services. A student on scholastic probation who withdraws registration at any time without good cause may not be permitted to enroll for the following semester without specific approval from Engineering Student Services staff. Withdrawal forms for students enrolled in the college are signed by the associate dean for academic programs.

**PASS/NONPASS OPTION**

A maximum of two courses taken pass/nonpass (P/N) may be applied toward satisfaction of the general education (humanities and social sciences) requirement. P/N registration must be approved by the student's advisor and the instructor of the course and must be completed during the first 10 days of a semester or the first two weeks of a summer session. P/N registration may not be changed after the deadline for adding courses. The pass/nonpass option may not be used for courses taken to satisfy the rhetoric requirement. Guided Independent Study courses taken for humanities or social science credit may not be taken P/N.

Students enrolled in courses taught in the College of Engineering may choose to be graded pass/nonpass under the following conditions:

- the signatures of the advisor and instructor must be obtained on the proper form, and the completed form must be submitted to the registrar's service center by the student within the time period established by University policy;
- the mark of P (pass) is awarded where the final course grade earned was C-minus or higher; the mark of N (nonpass) is given for grades of D-plus or below; marks of P and N are not used in computing the grade-point average, and the mark of N does not count as earned credit.

No course work taken in the College of Engineering on the pass/nonpass option may be used to satisfy requirements for an engineering degree.

**SECOND-GRADE-ONLY OPTION**

A student may elect to repeat a course with only the new grade being counted in his or her grade-point average. The option may be applied to no more than three courses, and it may be applied only once to a particular course. Transfer students may apply the option on a prorated basis.

A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully.

To exercise the second-grade-only option, students register as usual for the course that is to be repeated, then they complete a Second Grade Option form at Engineering Student Services. The Second Grade Option form is available online. Students must complete the form during the session in which they repeat the course, within the first 12 weeks of the fall or spring semester or the first six weeks of the summer session. Students must follow this procedure or both grades will be counted in their University of Iowa grade-point average.

Under the second-grade-only option, the registrar marks the permanent record to show that a particular course has been repeated. Both grades remain on the permanent record, but only the second is used in calculating the grade-point average and semester hours earned. The course must be taken the second time under the same circumstances and with the same grade option as it was taken the first time.

The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual way.
manner. A student who holds a degree from the University of Iowa may not apply the second-grade-only option to a course taken before the degree was conferred.

**SATISFACTORY/FAIL COURSES**
The noncredit professional seminar courses required in each of the professional programs are offered only satisfactory/fail (S/F). No other engineering courses are offered on this basis. An F (fail) grade earned for such a class does not satisfy any portion of the professional seminar requirement.

**INCOMPLETE AND NO REPORT GRADES**
A mark of I (incomplete) that is not replaced by a final grade will automatically be converted to an F at the end of the next fall or spring semester (summer and winter sessions excluded), even if a student does not enroll after the session the incomplete was posted.

A mark of O (no grade reported) will remain on a student's permanent record until a valid grade is submitted.

**CREDIT BY EXAMINATION**
Students who have acquired knowledge in subject areas from sources other than formal course registrations may be granted credit toward graduation by examination, under the following conditions and limitations.

No more than 32 s.h. of credit by examination may be applied toward B.S.E. degree requirements.

College-Level Examination Program (CLEP) credit may be counted toward the lower-level general education (humanities and social science) requirements. CLEP credit earned in natural science areas does not count toward the engineering degree. Credit also may be earned through Advanced Placement (AP) Exams. For details about CLEP and AP credit, see Credit by Exam Options on the Office of Admissions web site.

Engineering students may earn credit for equivalent experience or former course work in any of the required common core courses through successful completion of examinations prepared and graded by the core course committees. Students who fail a core course are not permitted to earn credit by examination for the failed course. Students who wish to earn credit for core courses by examination must obtain approval from the associate dean for academic programs.

With approval of the departmental faculty, credit in three or fewer courses (totaling no more than 6 s.h.) may be awarded upon successful completion of final examinations in program elective courses.

**LANGUAGE INCENTIVE PROGRAM**
The University's Furthering Language Incentive Program (FLIP) gives entering engineering students two options for earning college credit for study of a world language.

**Option 1:** Entering students who place into a fifth-semester language course and complete the course with a grade of B-minus or higher receive 4 s.h. of exam credit for the fourth-semester course. The credit is ungraded but may be counted toward the hours required for graduation. Incentive credit is not granted for college course work for which credit has been received.

Students are eligible for incentive credit only during their first and second registrations at the University of Iowa.

**Option 2:** Students may receive 2 s.h. of exam credit for earning a grade of B-minus or higher in a first-semester-level course in a language different from the language used to satisfy their world languages requirement. They may earn another 2 s.h. for completing the second-semester-level course in that language for a grade of B-minus or higher.

Visit the college's web site for more information about FLIP credit. For more information on eligibility and restrictions, consult Engineering Student Services.

**CREDIT FROM OTHER COLLEGES**
Course requirements in engineering may be satisfied with credit earned in courses taken in other University of Iowa colleges or at other accredited colleges or universities. When students apply for admission to the College of Engineering, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the Student Development Center either before or during the student's first semester of enrollment in the college.

Satisfaction of engineering course requirements by transfer course work may be approved by the Student Development Center if, course-by-course, there is a match in the content and level of the transfer courses, and if the grades earned for such courses are C-minus or higher. Students who want to satisfy the engineering General Education Component (social sciences and humanities) requirements or the University of Iowa rhetoric requirement by transfer work must follow the College of Engineering transfer credit guidelines.

Students planning to attend a two- or four-year institution before transferring to the College of Engineering should discuss the planned transfer with officials at both schools before embarking on a transfer program. The College of Engineering has recommended transfer course lists for most Iowa community colleges and some four-year colleges. Once students are enrolled in the College of Engineering, they must have prior approval for course work taken at other institutions.

Contact Engineering Student Services for more information.

By policy of the Board of Regents, State of Iowa, a student may apply a maximum of 64 s.h. of transfer credit earned at a two-year college toward the minimum 128 s.h. required for the B.S.E. However, transfer credit from a two-year school in excess of 64 s.h. is used in computing grade-point average and may be used to satisfy course requirements, even though the semester hours cannot be counted toward the total required for graduation. A grade of C-minus or higher is required in order for transfer credit to be applied toward a degree requirement.

**COURSE SUBSTITUTIONS**
For students in the College of Engineering, the substitution of an alternate course for a required course requires the approval of a petition. The Petition for Course Substitution form is available on the college's web site or at Engineering Student Services. The form must be completed by a student and must be approved by a student's advisor and by the chair of the engineering program in which a student is majoring.
If the petition involves a required engineering core course or a General Education Component (social sciences or humanities) course, then it also must be approved by Engineering Student Services. Substitutions for required engineering core courses should be made infrequently and only under compelling circumstances. Substitutions of courses that are required by a student's program are governed by the faculty of that program; approval of these course substitutions is needed only from the faculty advisor and the department chair. All petitions must be forwarded to Engineering Student Services for inclusion in a student's permanent file.

AUDITING COURSES

Students in the College of Engineering may register for a course for zero credit (audit) with the permission of the course instructor and the advisor. The mark of AUS (audit successful) is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a drop-add form is used. These changes must be made during the first three weeks of a semester or the first one-and-one-half weeks of a summer session.

Misconduct, Complaints

STUDENT ACADEMIC MISCONDUCT

Policies regarding cases of cheating or plagiarism are outlined on the College of Engineering web site; see Academic Misconduct. In cases of cheating on an exam or a quiz, the policy recommends that the instructor reduce a student's grade, including the assignment of F for the course. When a course grade has been reduced to an F, a student may not drop the course or use the second-grade-only option to eliminate the failing grade.

At the beginning of each semester, course instructors individually announce and explain their policies on acceptable levels of collaboration between students on graded work, which includes homework assignments and lab or design projects. When a policy is violated, a zero is assigned for the total portion of the course grade allocated to the requirement in which the violation occurs. The instructor sends a written report of any disciplinary action to the office of the dean and the report is placed in a student's file. Students are notified by the office of the dean of reported disciplinary action and are informed of appeal procedures.

STUDENT COMPLAINTS CONCERNING FACULTY ACTIONS

In cases where complaints do not involve alleged student academic misconduct, students with complaints against engineering faculty members should attempt to resolve the issue with the faculty member first; see Faculty Complaints on the college's web site. Lacking a satisfactory outcome, a student should discuss the matter with the chair of the faculty member's department.

Students who are uncomfortable dealing directly with a faculty member or a department chair may seek assistance from the engineering faculty ombudsperson when attempting to resolve a complaint related to an engineering course. Students taking non-engineering courses should seek assistance from the University ombudsperson. However, grievances generally can be satisfactorily resolved most expeditiously at the faculty or chair level. If students are not satisfied with the outcome of this procedure, they should discuss their complaints with the dean of engineering.

Student Organizations

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college, including the electronic newsletter E-Week. Several engineering professional societies have student chapters at the University, as do a number of engineering honor societies. In addition, students may join a wide variety of engineering student organizations. See "Student Organizations" in the College of Engineering (p. 831) section of the Catalog or visit Student Organizations on the college's web site.
Biomedical Engineering

Chair

- Joseph M. Reinhardt

Undergraduate major: biomedical engineering (B.S.E.)
Graduate degrees: M.S. in biomedical engineering; Ph.D. in biomedical engineering
Faculty: http://www.engineering.uiowa.edu/bme/people/faculty-bme
Web site: http://www.engineering.uiowa.edu/bme

The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.

The Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department’s facilities and faculty expertise accessible.

Several faculty members have joint appointments in biomedical engineering and in the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

Undergraduate Program of Study

- Major in biomedical engineering (Bachelor of Science in Engineering)

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- contribute to the biomedical field through the responsible design of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- advance to leadership positions in their chosen field.

Students who complete the program may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life-support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law.

Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in biomedical engineering builds on the foundation provided by the B.S.E. core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate (p. 916) College. Students whose choice of electives includes a three-course sequence in organic chemistry, an additional biology course, and a biochemistry course may satisfy entrance requirements of the Carver College of Medicine (p. 1005), the College of Dentistry (p. 704), or the allied health sciences.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, and engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering (p. 841) in the Catalog.

Biomedical engineering students must choose a track, which constitutes the elective focus area for the biomedical engineering major. They may choose one of seven preapproved tracks—bioinformatics and computational biology, bioimaging, biomaterials, cardiovascular biomechanics, cellular engineering, musculoskeletal biomechanics, or pre-medicine—or they may propose a track that they have tailored to their own individual biomedical engineering interests. Each approved track has a group of four required courses and a list of suggested electives. For details about tracks and their requirements, visit Tracks on the department's web site.

The following study plan includes the B.S.E core requirements and the curriculum for the biomedical engineering major. Some courses in this plan are prerequisites for others. Students must complete a course’s prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

FIRST YEAR

First Semester

BME:2210 Biomaging and Bioinformatics 4 s.h.
BME:2500 Biomaterials and Biomechanics 4 s.h.
One of these:
BIOS:4120 Introduction to Biostatistics 3 s.h.
STAT:3510 Biostatistics 3 s.h.

THIRD YEAR
First Semester
BME:2110 Cell Biology for Engineers 3 s.h.
BME:3010 Leadership and Resourcefulness 1 s.h.
PHYS:1612 Introductory Physics II (with laboratory) 3-4 s.h.
General education component courses 6 s.h.
Required track course 3 s.h.

Second Semester
BME:4010 Biomedical Engineering Design Seminar 1 s.h.
General education courses 6 s.h.
Required track course 3 s.h.
Track electives 6 s.h.

FOURTH YEAR
First Semester
BME:4910 Biomedical Engineering Senior Design I 4 s.h.
Required track courses 6 s.h.
Track electives 6 s.h.

Second Semester
BME:4920 Biomedical Engineering Senior Design II 4 s.h.
General education component course 3 s.h.
Track electives 9 s.h.

Joint B.S.E./M.S.
The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn an M.S. in biomedical engineering. This program allows students to count 12 s.h. toward the undergraduate and graduate degree and begin work on a master’s thesis or research project while they are still undergraduates. Once students complete the requirements for the bachelor’s degree, they are granted the B.S.E., and they normally complete the M.S. in their fifth year of study.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.50, and must submit a letter of application to the chair of the Department of Biomedical Engineering stating the intended area of specialization and a letter of support from the proposed M.S. advisor.

Joint B.S.E./M.S. in Occupational and Environmental Health
B.S.E. students majoring in biomedical engineering (musculoskeletal biomechanics track) who are interested in earning a Master of Science in occupational and environmental health (industrial hygiene subprogram) may apply to the joint B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The joint program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor’s degree. For information about the M.S. program, see Occupational and Environmental Health (p. 1180) (College of Public Health) in the Catalog.

Graduate Programs of Study
• Master of Science in biomedical engineering
• Doctor of Philosophy in biomedical engineering
Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student’s course of study is based on individual background and career objectives, and sound academic practice. Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. M.S. students who
want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments of the College of Engineering and the University.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate course work and research topic.

**Master of Science**

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. The M.S. may be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. A student's plan of study is reviewed by the committee before the student has completed 18 s.h. of course work. The plan of study then is submitted for review to the department chair.

M.S. students must fulfill the grade-point-average requirements of the Graduate College on a minimum of 30 s.h. of graduate work and must successfully complete the final examination administered by their committee.

M.S. students (thesis or nontesis) must complete the following courses or their equivalents.

<table>
<thead>
<tr>
<th>Course</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS:5110 Introduction to Biostatistics</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ENGR:7270 Engineering Ethics</td>
<td>1 s.h.</td>
</tr>
<tr>
<td>HHP:3500 Human Physiology</td>
<td>3 s.h.</td>
</tr>
<tr>
<td>ME:5113 Mathematical Methods in Engineering (or equivalent math course numbered 3000 or above)</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Individual study plans should include as much advanced work as individual aptitude and previous preparation permit.

**Doctor of Philosophy**

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal course work taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and the thesis. Students who enter with an M.S. may count a maximum of 33 s.h. of approved transfer credit toward the Ph.D., but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least 12 s.h. for research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal course work to strengthen perceived areas of weakness.

Ph.D. students must complete the following courses or their equivalents.

<table>

<td>ME:5113 Mathematical Methods in Engineering (or equivalent math course numbered 3000 or above)</td>
<td>3 s.h.</td>
</tr>
</tbody>
</table>

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the course work specified in the plan of study and with the required grade-point average and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences, with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 310 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the Master of Science program in biomedical engineering. Students with a lower grade-point average or GRE General Test scores may be considered for conditional admission; they must achieve regular standing within 8 s.h. of their initial registration by attaining the minimum grade-point average required by the Graduate College and regular acceptance by the department faculty. Students who do not meet these requirements are subject to dismissal.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

**Financial Support**

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

**Facilities and Laboratories**

**Undergraduate Teaching Laboratories**

Five dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: Biomaterials Laboratory, Biomeasurements and Biosystems Laboratory, Biomechanics Laboratory, Cell Biology for Engineers Laboratory, and Senior Design Laboratory.

**BIOMATERIALS**

The Biomaterials Laboratory is equipped to test varied properties of biomaterials, including hard and soft tissues.
and prostheses. The laboratory is used for biomaterials courses, senior design projects, and BME:5421 Cell Material Interactions.

**BIOMEASUREMENTS AND BIOSYSTEMS**

The Biomeasurements and Biosystems Laboratory is equipped to measure biomedical variables of clinical and physiological interest, design and build electronic instrumentation, and conduct modeling experiments in physiology. It is used for BME:2200 Systems, Instrumentation, and Data Acquisition, BME:2210 Bioimaging and Bioinformatics, elective courses in biomeasurements and biological systems analysis, senior design projects, and demonstrations in BME:2110 Cell Biology for Engineers.

**BIOMECHANICS**

The Biomechanics Laboratory is equipped to perform experiments relating to the cardiovascular and human musculoskeletal systems. The laboratory houses a cone and plate viscometer; compact stress-strain devices; blood pressure and flow measurement devices; digital still, video, and motion caption cameras for kinematic analysis; goniometers; a ski binding tester; a drop tower for impact testing; a dual mode amplifier system; two 3-D printers; and a table-top material testing machine. The laboratory is used for BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and skeletal biomechanics, other elective courses, and senior design projects.

**CELL BIOLOGY FOR ENGINEERS**

The Cell Biology for Engineers Laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future studies in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, adenovirus-mediated gene transfer techniques, microarray and analysis, and polymerase chain reaction (PCR) analysis of nucleic acids. They also are introduced to bioinformatics techniques used in cell biology. Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and varied support apparatuses used in cell-based studies. The lab is used for BME:2110 Cell Biology for Engineers, BME:4120 Advanced Cell Biology for Engineers, and BME:5421 Cell Material Interactions.

**SENIOR DESIGN**

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

**Research Facilities and Laboratories**

**BIOINFORMATICS AND COMPUTATIONAL BIOLOGY LABORATORY**

The Bioinformatics and Computational Biology Laboratory is wired for high-speed networking (10- and 100-megabit and gigabit ethernet, hardwired and wireless, and ATM). It includes five dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 100 gigabytes of RAM, and 2.5 terabytes of disk space.

Computer resources include a dedicated computer server cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet—18 Dual AMD MP-2400 (2.2 GHz, 2 GB memory, 40 GB disk each); second dedicated computer server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet—12 Dual Pentium III (500 MHz, 1 GB memory, 9 GB disk each), and four Dual Pentium III (500 MHz, 2 GB memory, 9 GB disk each); and third dedicated computer cluster of nine Linux systems (18 CPUs) connected with a dedicated 2.4 GB multistage intranet—eight Dual Pentium III (866 MHz, 5 GB memory, 45 GB disk each), and one Dual Pentium III (866 MHz, 1 GB memory, 45 GB disk each).

There are two additional clusters: an 8-node cluster of Pentium II class machines and a 12-system heterogeneous cluster of various SUNs, HPs, and SGI systems; four dedicated, dual fiber channel, redundant disk storage systems (RAID) with 412 GB usable each. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

**CARDIOVASCULAR BIOMECHANICS LABORATORY**

The Cardiovascular Biomechanics Laboratory houses an EMS Whitest uniaxial tension/compression testing system, a pulse-duplicating apparatus with flow loop, a spectrophotometer, silicone prototype fabrication utilities, high-speed/high-resolution cameras, a Sun Solaris workstation, and personal computers. The lab is equipped for soft tissue tensile/compression testing and viscoelastic creep/relaxation testing; simulation of flow through fabricated, anatomically realistic, patient-specific models of vasculature and heart valves; quantification of protein content in soft tissues; fabrication of realistic, compliant prototypes of human organs; and computational modeling of hemodynamics and tissue mechanics of normal and pathological cardiovascular organs.

**IOWA SPINE RESEARCH CENTER BIOMECHANICS LABORATORY**

The Iowa Spine Research Center Biomechanics Laboratory is fully equipped to perform studies of tissue and/or specimen response to mechanical loads. An MTS Bionix servohydraulic testing machine (with extended columns) permits application of uniaxial tension or compression in concert with axial torsion under displacement (rotation) or load control. A spine simulator consisting of an upper and lower gimbals permits kinematic studies of the spinal column (flexion-extension, lateral bending, and axial rotation). The laboratory also has a two-sensor (six-camera) 3-D motion capture system. These devices are used to test mechanical properties of biomechanical joints and tissues and for biomechanical evaluation of surgical treatment modalities. The center is located at the University of Iowa Research Park.

**JOLT/VIBRATION/SEATING LABORATORY**

The Jolt/Vibration/Seating Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to low back pain due to the interaction between people and equipment in jolt (impact) and
vibration environments. Three shakers are available to simulate impact and vibration environments. Human responses are measured using equipment including load cells, electromyography, accelerometry, position sensors, and pressure pads. Portable sensors and data recorders are used to evaluate impact and vibration environments in the field and compare them to domestic and international guidelines and standards.

MULTISCALE MODELING, MECHANOBIOLOGY, AND TISSUE ENGINEERING LABORATORY

The Multiscale Modeling, Mechanobiology, and Tissue Engineering Laboratory is equipped for computational and experimental investigations centered on the role of physical forces in directing cell-material interactions that govern biological phenomena across multiple scales. A 650-square-foot core lab has equipment for isolating, culturing, maintaining, and analyzing cells, including a Nu-Aire two-chamber incubator, lab refrigerator and freezer, and a Thermo Scientific 1300 Series class II, type A2 biological safety cabinet. A 120-square-foot microscopy room houses an ADMET BioTense top-mounted perfusion bioreactor that integrates with a Nikon Ti-E inverted microscope, a system equipped to simultaneously record force values and acquire images of cell-to-extracellular matrix interactions in 3-D environments (e.g., a collagen gel) at high magnification over long periods of time and under a suite of mechanical testing protocols. The MTESTQuattro material testing system and accompanying software controls the bioreactor temperature, drives the actuator, and records force. The system can be operated in load or displacement control, supplying monotonic, cyclic, or segmented control profiles. Both the microscope and bioreactor are interfaced with an HP Z210 convertible minitower base model workstation.

ORTHOPAEDIC BIOMECHANICS LABORATORY

The Orthopaedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopaedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

REGENERATIVE ENGINEERING LABORATORY

The Regenerative Engineering Laboratory inhabits over 1000 square feet of the new Pappajohn Biomedical Discovery Building. The laboratory is fully equipped to support research at the interface of materials, engineering, and cell biology. The BSL2 cell culture room in the lab has two Panasonic cell culture incubators, two thermo biological safety cabinets, a fluorescent microscope, 37°C bead bath, and centrifuges. A separate 4-color fluorescence microscope also is available. The fully automated Leica DMi6000 captures 4-color fluorescence images at up to 63X magnification. A built-in z-motor and post-acquisition analysis software allows for the capture and analysis of three dimensional z-stacks.

The chemistry part of the lab is equipped for biodegradable particle synthesis and analysis. In addition to a fume hood, sink, and laboratory counters, the lab has an analytical grade Mettler Toledo XS64 balance, water bath sonicator, homogenizer, syringe pumps, and a LabConco -86°C Cascade Lyophilizer. To support long term storage of the reagents required for the molecular biology and chemistry portions of the lab, a variety of cold storage options are available including 4°C, -20°C, -80°C, and -130°C.

SPINE BIOMECHANICS AND ERGONOMICS LABORATORY

Located at University of Iowa Hospitals and Clinics, the Spine Biomechanics and Ergonomics Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to production and treatment of low back pain. For example, electromyography equipment, accelerometry, a motion capture system, and a force plate are used to study response to sudden loads. A stadiometer is used to evaluate how varied activities affect shrinkage (creep) in the spine. A pressure pad is used to study interface pressures between people and chairs or beds.

SPINE RESEARCH LABORATORY

The Spine Research Laboratory is equipped for interdisciplinary research. The laboratory’s MTS Bionix servohydraulic testing equipment (with extended columns) permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The laboratory also has a fully automated 3-D motion measuring system. These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., LVDTs, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture, in order to investigate the disc’s biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

TISSUE ENGINEERING LABORATORY

The Tissue Engineering Laboratory is outfitted with a fume hood, sink, laboratory counters, tables, and major tissue culture equipment, including a Baker SG3 laminar flow hood, a NuAir water jacked incubator, an autoclave, a vacuum pump, a Zeiss Axiosvert S-100 phase contrast and bright field microscope with a computer interface, computer-controlled peristaltic pumps, a computer-controlled water bath, and a refrigerator and freezer.

The inverted microscope has an image capture system interfaced to a computer workstation with image processing software. A variety of sensors for performing temperature, pressure, and flow measurements also are available. The laboratory’s computers are equipped with software for graphical, numerical, image analysis, word processing, and symbolic computation. Liquid nitrogen dewars, and CO2 and N2 tanks have been installed. An
Ussing chamber with electrodes and a high impedance Keithley electrometer also are available.

Courses

Special Topics

**BME:0000 Cooperative Education Training Assignment: Biomedical Engineering**

0 s.h.

Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**BME:0002 Half-time Cooperative Education Training Assignment: Biomedical Engineering**

0 s.h.

Registration for work assignment periods; for students participating in the Cooperative Education Program.

**BME:1010 First-Year Forum**

1 s.h.

Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

**BME:2010 Professional Seminar: Biomedical Engineering**

1 s.h.

Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.

**BME:2110 Cell Biology for Engineers**

3 s.h.

Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411.

**BME:2200 Systems, Instrumentation, and Data Acquisition**

4 s.h.

Introduction to linear system theory and application, including convolution, Laplace Transform, transient analysis, sinusoidal steady-state analysis, and Fourier analysis; patient safety; acquisition and analysis of data collected from living systems, including concepts of analog circuit design with emphasis on operational amplifiers, active filters, clinical circuits, Nyquist concepts and digital conversion, and interface to computers; physics, acquisition, and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems. Prerequisites: ENGR:2120. Corequisites: HHP:3500.

**BME:2210 Bioimaging and Bioinformatics**

4 s.h.

Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: BIOL:1411 and ENGR:1300.

**BME:2500 Biomaterials and Biomechanics**

4 s.h.

Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: HHP:3500.

**BME:2710 Engineering Drawing, Design, and Solid Modeling**

3 s.h.

Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3-D CAD software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3-D solid parametric design for assembly and 3-D drawing documentation; creation of 3-D assemblies and detailed drawings from art of design to part, utilization of solid modeling techniques.

**BME:3010 Leadership and Resourcefulness**

1 s.h.

Development of leadership skills and resourcefulness for real-world professional work and life. Requirements: completion of BME:1010 and two semesters of BME:2010.

**BME:3998 Individual Investigations: Biomedical Engineering**

arr.

Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

**BME:4010 Biomedical Engineering Design Seminar**

1 s.h.

Information and presentations about possible projects; mentors available for senior design projects. Requirements: junior standing.

**BME:4110 Principles of Regenerative Bioengineering**

arr.
Embryonic, fetal, and adult sources, human and nonhuman “stemness” of cells; references to biomaterials (i.e., those designed to direct organization, growth, and differentiation of cells in process of forming functional tissue by providing physical and chemical cues); biomarkers and nano-medicine; promises of bioinformatics in support tissue engineering, gene and protein sequencing, gene expression analysis, protein expression, and interaction analysis. Prerequisites: BIOL:1411. Corequisites: HHP:3500. Recommendations: BME:2110.

**BME:4111 Fundamentals of NanoScale Technologies in Regenerative Bioengineering**

1 s.h.

Nanotechnology as an emerging field in the quest to better and more affordable health care; experimentation and development of new materials that benefit regenerative medicine; targeted drug delivery and enhanced tissue engineering as a priority in pursuit of new approaches in tissue and organ transplantation; state-of-the-art new technologies applied to role of stem cells and biomedical engineering in future health care; seminar with reading and comments of significant journal articles in the field. Prerequisites: BME:4110.

**BME:4112 Methods in Regenerative Bioengineering and NanoScale Technology**

3 s.h.

Nanotechnology as an emerging field in the quest to better and more affordable health care; experimentation and development of new materials that benefit regenerative medicine; targeted drug delivery and enhanced tissue engineering as a priority in pursuit of new approaches in tissue and organ transplantation; state-of-the-art new technologies applied to role of stem cells and biomedical engineering in future health care. Prerequisites: BME:4110.

**BME:4120 Advanced Cell Biology for Engineers**

3 s.h.

Introduction to techniques and quantitative analysis used in cell biology and taught from cell engineering perspective; focus on isolation, intracellular localization, and determination of mRNA levels of specific cellular proteins; analysis of resulting data and interpret reliability of results; laboratory course. Prerequisites: BME:2110.

**BME:4310 Computational Biochemistry**

3 s.h.

Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: CHEM:1120 and (MATH:1560 or MATH:1860). Recommendations: BIOC:3110 or BIOC:3120.

**BME:4910 Biomedical Engineering Senior Design I**

4 s.h.

Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Requirements: senior standing.

**BME:4920 Biomedical Engineering Senior Design II**

Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.

**BME:5020 Seminar in Bioinformatics**

1 s.h.

Forum for research presentations by scientists with national and international prominence; broad range of research topics in bioinformatics, genomics, and high-throughput biology; sponsored by the NIH T32 Bioinformatics Predoctoral Training Program at the University of Iowa.

**BME:5220 Bioinformatics Techniques**

3 s.h.

Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and ENGR:1300. Same as ECE:5210.

**BME:5250 Introduction to Systems Biology**

3 s.h.

How higher-level properties of complex biological systems arise from the interactions among their parts; fundamentals of biological network analysis with focus on protein-protein interaction, regulatory, and genetic interaction networks; principles of systems biology and biological networks; experimental methods and analytical approaches for specific networks; current emerging research areas in the field of systems biology; didactic lectures and case-study projects. Prerequisites: BIOL:4213 or BME:5320 or GENE:6170) and BME:5330. Recommendations: senior standing, or graduate standing with background in biology, computer science, applied mathematics, statistics, physics, or engineering.

**BME:5320 Computational Genomics**

3 s.h.

Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: BME:5320 and CS:3110 and (BIOS:4120 or STAT:3510). Same as BIOL:5320, GENE:5173, ECE:5220.

**BME:5340 Contemporary Topics in Biomedical Engineering**

3 s.h.

New and emerging areas of biomedical engineering and related fields; specific content varies.
BME:5430 Biotransport 3 s.h.
Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications.

BME:5710 Digital Human Modeling and Simulation 3 s.h.
Fundamentals of using computational methods in modeling, simulating, and animating articulated kinematic chains such as robots and humans; underlying mathematics, introductory concepts in kinematics and dynamics, serial chain kinematics and multibody dynamics; methods from kinematics and dynamics, coupled with biomechanical concepts, provide an integrated approach to predicting and analyzing serial link motion (e.g., human and robotic manipulator motion). Prerequisites: ENGR:2710. Same as ME:5130.

BME:5910 Fast-Track Biomedical Engineering Design 1-A 3 s.h.
Part A of first semester of year-long senior capstone design project; individual or group design project involving biomedical engineering problems. Corequisites: BME:5911. Requirements: senior standing.

BME:5911 Fast-Track Biomedical Engineering Design 1-B 1 s.h.
Part B of first semester of year-long senior capstone design project; individual or group project involving biomedical engineering problems. Corequisites: BME:5910. Requirements: senior standing.

BME:5920 Fast-Track Biomedical Engineering Design 2-A 3 s.h.

BME:5921 Fast-Track Biomedical Engineering Design 2-B 1 s.h.

BME:6120 Advanced Topics in Regenerative Bioengineering and NanoScale Biotechnology 3 s.h.
Continuation of BME:4110 with in-depth examples and approaches; development of organs through stem cells maturation and differentiation complemented by biomedical applications; fundamental concepts of stem cell biology applied to modern technology; reference to biomaterials (those designed to direct organization, growth, and differentiation of cells); concept of biomarkers and nanomedicine based on the notion that new materials can be engineered to not interfere with normal biological conditions and unique enough to be detected non-invasively with modern diagnostic instruments (CT, MRI, Echo). Prerequisites: BME:2110 or BME:4110.

BME:6310 Contemporary Topics in Bioinformatics 3 s.h.
Next-generation sequencing technology and design, next-generation sequencing analysis and algorithms, contemporary topics in bioinformatics, genetics of disease (visual system as a model) and genetic engineering; grant writing. Recommendations: BME:5320 or advanced programming skills and understanding of DNA.

Biomaterials
BME:5401 Biomaterials and Implant Design 3 s.h.
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopaedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites: BME:2500 and ENGR:2750.

BME:5415 Polymer Fundamentals 1 s.h.
Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as CBE:5309.

BME:5421 Cell Material Interactions 3 s.h.
Current thought in the engineering and assessment of biomaterials. Prerequisites: BME:2110.

BME:6110 Mechanics of Cells and Cellular Systems 3 s.h.
Mechanics of cells; focus on cellular mechanical properties, responses to mechanical stimuli, cellular forces and measurement, and computational tools; cellular environment considered with implications to disease pathologies and medical device design considerations.

Biomechanics/Biofluids
BME:5510 Cardiac and Vascular Mechanics 3 s.h.
Bio-solid mechanics of the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; design of artificial organs, prostheses. Prerequisites: BME:2500 and ENGR:2750.

BME:5520 Cardiovascular Fluid Mechanics 3 s.h.

BME:5530 Design of Circulatory Implants and Artificial Organs 3 s.h.
Exploration of current innovations and new technologies; examination of various devices currently on the market from a standpoint of design variables and objectives (i.e., stents, heart valves, dialyzers, VADs, artificial organs); biomedical engineers' vital role in design and improvement of these implants. Prerequisites: BME:2500.
**BME:5610 Musculoskeletal Biomechanics** 3 s.h.
Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: BME:2500 and ENGR:2750.

**BME:5620 Introduction to Applied Biomedical Finite Element Modeling** 3 s.h.
Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisites: BME:2500 and ENGR:2750.

**BME:5630 Kinetics of Musculoskeletal Systems** 3 s.h.
Principles of kinematics; kinetics applied to analytical and experimental investigation of musculoskeletal systems; mathematical foundations for kinematic and kinetic analyses; examples of mathematical modeling of human movements. Prerequisites: ENGR:2710.

**BME:5640 Ergonomics of Occupational Injuries** 3 s.h.
Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500 and ENGR:2750.

**BME:5660 Intermediate Mechanics of Deformable Bodies** 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540, ME:5150.

**BME:6415 Advanced Biomechanics and Modeling of Soft Tissues** 3 s.h.
Application of continuum mechanics and modeling to study of biological tissues and biomaterials.

**BME:6515 Advanced Biological Soft Tissue Mechanics** 3 s.h.
Topics in vascular solid mechanics; study of vascular tissue from theoretical (constitutive modeling), experimental, and computational perspectives.

**BME:6520 Advanced Biofluid Mechanics** 3 s.h.
Hemodynamic theories of atherogenesis, Womersley models, steady and unsteady flows in curvature, bifurcation and branching arterial segments, flow dynamics past prosthetic implants, experimental and computational models, particulate and mass transport simulations in human circulation. Prerequisites: BME:5520.

**BME:6610 Spine Mechanics** 3 s.h.
Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisites: BME:5610.

**BME:6630 Human Response to Vibration** 3 s.h.
Exploration of the human body, a complex mechanism exposed to mechanical shock and vibration from many sources, under many conditions; interactions and applicable exposure standards, effects of whole-body and hand-arm vibration. Requirements: graduate standing in College of Engineering or College of Public Health.

**Bioelectrical Engineering**

**BME:5200 Biomedical Signal Processing** 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab.

**BME:5210 Medical Imaging Physics** 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210.

**BME:5220 Digital Image Processing** 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: BME:2200 or ECE:2400. Same as ECE:5480.

**BME:5230 Multidimensional Medical Imaging Process** 3 s.h.
Algorithms developed to process and analyze large volumetric data sets; physics of CT, MRI, ultrasound, 3-D convolution and filtering, geometric transformations, shape features, surface segmentation, regional segmentation, surface tiling, surface reconstruction, volumetric registration. Third in a medical imaging sequence. Prerequisites: ENGR:1300.

**BME:5250 Advanced Biosystems** 3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200.

**BME:5252 Health Informatics II** 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as RSNM:5301, IE:5870, IGPI:5210.
Graduate Seminars, Advanced Topics, Research

BME:5010 Seminar in Biomedical Engineering
0 s.h.
Presentation of recent advances in biomedical engineering. Requirements: graduate standing.

BME:5998 Individual Investigations: Biomedical Engineering
arr.
Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

BME:5999 Research: Biomedical Engineering M.S. Thesis
arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Requirements: graduate standing.

BME:7998 Advanced Individual Investigations in Biomedical Engineering
arr.
Advanced individual projects such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

BME:7999 Research: Biomedical Engineering Ph.D. Dissertation
arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering.
Chemical and Biochemical Engineering

Chair

• C. Allan Guymon

Undergraduate major: chemical engineering (B.S.E.)
Graduate degrees: M.S. in chemical and biochemical engineering; Ph.D. in chemical and biochemical engineering
Faculty: http://www.engineering.uiowa.edu/cbe/people/faculty-cbe
Web site: http://www.engineering.uiowa.edu/cbe/

Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences—chemistry, the biological sciences, and physics—to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and biorenewable fuels (e.g., biodiesel or ethanol) fall within the realm of chemical engineering. Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products. Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa's curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions.

Undergraduate Program of Study

• Major in chemical engineering (Bachelor of Science in Engineering)

The undergraduate program in chemical engineering produces graduates who have a strong foundation of scientific and technical knowledge and are equipped with problem solving, teamwork, and communication skills that will serve them throughout their careers, consistent with the following educational objectives.

Within a few years of graduation, the program's graduates will:

• attain careers as practicing chemical engineers in fields such as pharmaceuticals, microelectronics, chemicals, polymers/advanced materials, food processing, energy, biotechnology, and environmental engineering;
• attain advanced studies in disciplines such as chemical engineering, environmental engineering, medicine, law, and business; and
• assume professional leadership roles.

The undergraduate program in chemical engineering uses the following methods and strategies to achieve its educational objectives:

• foster a personalized, supportive environment for all students by taking advantage of the unique combination of a small college atmosphere in a major research university;
• enrich the undergraduate experience through cultural diversity and international opportunities or experiential learning;
• provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
• provide students with experience in learning and applying tools (e.g., computer skills) to solve theoretical and open-ended chemical engineering problems;
• provide students with opportunities to participate in multidisciplinary teams and to develop and practice written and oral communication skills, both within the team and to a broader audience;
• provide students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints; and
• provide a contemporary grounding in professional responsibility, including ethics, the global and societal impact of engineering decisions, and the need for lifelong learning.

Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in chemical engineering provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component.
(15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering (p. 841) in the Catalog.

Seminars do not count toward the 128 s.h. required for the degree.

For chemical engineering students, the sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, engineering flow and heat exchange, chemical engineering thermodynamics, mass transfer and separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship (p. 914), or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of science, engineering, humanities, and social science electives. Several preapproved elective focus areas may help students define potential careers.

Students must select elective focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. See "Elective Focus Area" after the following curriculum list.

The following study plan includes the B.S.E. core requirements and the curriculum for the chemical engineering major. Some courses in this plan are prerequisites for others. Students must complete a course's prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

General education component course 3 s.h.
Advanced chemical science electives 6 s.h.
Elective focus area course 3 s.h.

Elective Focus Area
The elective focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved elective focus areas in biochemical engineering, pharmaceuticals, chemical process engineering, polymers, energy and environment, sustainability, pre-medicine, business, and entrepreneurship.

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department’s curriculum committee. See Chemical Engineering Curriculum on the Department of Chemical and Biochemical Engineering website for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

Joint B.S.E./M.S.
The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn an M.S. in chemical and biochemical engineering. B.S.E./M.S. students may count 12 s.h. of course work (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor’s degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application and statement of purpose to the chair of the Department of Chemical and Biochemical Engineering. Visit B.S./M.S. Programs on the department’s web site to learn more.

Graduate Programs of Study
- Master of Science in chemical and biochemical engineering
- Doctor of Philosophy in chemical and biochemical engineering

Graduate students in the Department of Chemical and Biochemical Engineering gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas
Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials and medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

**BIOCHEMICAL ENGINEERING**
Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Carbon dioxide accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth. The department’s researchers are investigating the corresponding effect on insect cell growth and the baculovirus infection process.

The department works to design technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are underway. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The department also conducts research in structural enzymology, molecular mechanisms of host-pathogen interactions, and biocatalysis. The laboratory uses biophysical, structural, and molecular biology techniques to understand the details of enzyme action. This information is used to design and engineer biocatalysts for the production of chiral compounds. Work also is underway on cellular recognition and signaling processing during infection and inflammation. Knowledge gained from these studies aids the design of drugs and biological sensors for bacterial presence.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry and Biology (College of Liberal Arts and Sciences); the Departments of Biochemistry and Microbiology and the Free Radical and Radiation Biology Program (Carver College of Medicine); and the College
of Pharmacy. This focus includes involvement in the University’s Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

**BIOMEDICAL RESEARCH**

The department's research involves a multidisciplinary approach to solving problems in the medical field, particularly in drug delivery and biomaterials. Researchers are working to develop safe delivery systems that target drugs precisely in the human body and avoid premature metabolism or elimination. To treat respiratory infections, micron-sized particles are being engineered with properties that enhance aerodynamic performance, particle stability, and targeting within the respiratory tract. Polymeric vehicles are being designed to provide sustained protection and prevention against cancers by kick-starting the immune system. Finally, work is under way to overcome barriers to efficient delivery of DNA, with the potential to provide cures for genetic disorders such as cystic fibrosis and X-Linked Severe Combined Immunodeficiency (X-SCID). This work brings together collaborators from the Carver College of Medicine, the Colleges of Dentistry and Pharmacy, and the Departments of Chemistry and Biomedical Engineering.

In the biomaterials realm, new materials are being developed that can interact with the human body to perform certain functions while maintaining compatibility. A project with the Department of Ophthalmology and Visual Sciences involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology—Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells to improve cochlear implants. Current research in the tissue engineering field applies microfabrication techniques to develop scaffolds that are biodegradable and biocompatible with cell-interactive properties, and that directly incorporate controlled-release functionality within the scaffold.

The department also conducts research that is focused on self-assembling systems, rational design of novel drug and gene delivery systems, and development of sophisticated scaffolds for tissue-specific regeneration. In tissue engineering, microfabrication techniques are applied to novel biomaterials to provide spatial control over tissue formation and to integrate minimally invasive scaffold delivery strategies. In drug and gene delivery, researchers are exploring the synergistic application of degradable particle technology, CpG oligonucleotides, and heat-shock protein therapy for generating sustained, stronger immune responses against carcinomas.

Students involved in animal research have access to the University’s Office of Animal Resources, which is adjacent to the University of Iowa Hospitals and Clinics.

**ENERGY AND ENVIRONMENT**

Chemical engineers are well-suited to make major contributions toward meeting challenges for the environment, energy, and sustainable development. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO2 fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves three centers and institutes on campus. The Center for Global and Regional Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center’s chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IHRC—Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience and Nanotechnology Institute provides an interdisciplinary home for chemical and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

**PHOTOPOLYMERIZATION**

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department's research in this area focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

Chemical and biochemical engineering researchers are members of the Photopolymerization Center, an industry/university cooperative center on fundamentals and applications of photopolymerization. The center brings together experts from the University of Iowa, the University of Colorado, and member companies such as 3M, DSM, and Boeing. In addition, interdisciplinary collaborations are fostered on campus through the Optical Science and Technology Center, which oversees a seminar series, an annual symposium, training at the
Microfabrication Facility, and equipment use in shared facilities.

Master of Science

The Master of Science program in chemical and biochemical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. All M.S. students must earn at least 24 s.h. in approved graduate-level course work; courses numbered below 3000 do not count toward this requirement. Thesis students earn 6 s.h. in CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved course work and are required to complete four core courses with a g.p.a. above 3.25 for those courses.

M.S. students must maintain a graduate g.p.a. of at least 3.00. Each thesis student must pass a final M.S. examination.

There is no world languages requirement.

Graduate students who receive assistantships, fellowships, or other financial support awarded with the understanding that they will pursue an advanced degree with thesis may not elect the nonthesis option.

Graduate students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the graduate admissions committee. If approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they were newly admitted graduate students. For a detailed description of program requirements, see CBE Graduate Program on the Department of Chemical and Biochemical Engineering web site.

Doctor of Philosophy

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Candidates usually are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree.

All candidates must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course on design and equipment use in shared facilities, and a thermodynamics course, as well as six additional courses (total of 30 s.h.). There is no world languages requirement.

Ph.D. candidates must maintain a graduate g.p.a. of at least 3.25.

All doctoral students are required to satisfy a qualifying requirement and pass a comprehensive examination before they can become candidates for the degree. The Ph.D. comprehensive examination is the presentation and defense of the candidate's Ph.D. research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College. A final examination, which is a defense of the thesis, completes the doctoral program. For a detailed description of program requirements, see CBE Graduate Program on the Department of Chemical and Biochemical Engineering web site.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants should have a B.S. in chemical engineering or related discipline, with satisfactory grades, from a recognized college or university in the United States, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair's approval. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their applications.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. or the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.

Financial Support

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, chemical and biochemical engineering students interact with students and faculty members from biochemistry, biology, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology.

Facilities and Laboratories

Undergraduate Core

MATERIALS SCIENCE LABORATORY

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

Required Undergraduate Laboratories

CHEMICAL ENGINEERING LABORATORY

The Chemical Engineering Laboratory provides instruction for undergraduate students in CBE:3150 Thermodynamics/
Transport Laboratory and CBE:3155 Chemical Reaction Engineering/Separations Laboratory. It is equipped for experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. The laboratory includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, fluid friction apparatus, and heat conduction apparatus. Analytical equipment includes gas chromatographs, UV/visible spectrophotometers, polarimeters, and refractometers.

The laboratory is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

CHEMICAL PROCESS SAFETY LABORATORY

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. It is equipped with two Miniflash automatic flash point tester (closed cap), an advanced reactive system screening tool (ARSSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, a modified Hartmann tube, a Hartmann bomb, a liquid conductivity apparatus, a powder changeability apparatus, a powder volume resistivity apparatus, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

BIOCHEMICAL ENGINEERING LABORATORY

The Biochemical Engineering Laboratory is an integral part of CBE:5205 Introduction to Biochemical Engineering. It is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, three New Brunswick C76 Water Bath Shakers, a UV/visible spectrometer, a Thermo Scientific Nanodrop 3300 fluorospectrometer, and a YSI 2700 Select Biochemistry Analyzer. This equipment is used to study the growth and metabolism of microorganisms and recombinant protein production.

PROCESS CONTROL LABORATORY

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to CBE:4105 Process Dynamics and Control in Design. The laboratory consists of computer control of a shell-and-tube heat exchanger, and a level-and-flow control process rig with state-of-the art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment.

Additional laboratories provide instruction in the use of process simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and, mult-capacitance processes; approximations of mult-capacitance systems as first-order and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the laboratory are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

AIR POLLUTION COMPUTATIONAL, FIELD, AND LABORATORY STUDIES

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of laboratory and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center’s computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including Arc/Info, Arcview, NCAR Graphics, Matlab, S-Plus, and Vis5d, as well as geographical information software. The ESRI software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizers for aerosols from 3 nm to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for RH and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through Labview.

Selected instruments are field deployable in a custom air-conditioned trailer. Through collaboration with the IIHR—Hydroscience & Engineering, access to micrometeorology sensors, 1-D and 2-D elastic and Raman LIDAR, and gas sensors is available, including multichannel ammonia monitors.
BIOCHEMICAL ENGINEERING
Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for PCR amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high-performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules. In addition, the lab has multiple extremophile cultivation systems including a high-pressure (0.1-100 MPa) cell cultivation system, several continuous cultivation systems, and high-temperature oil bath shakers for physiological studies of extremophic microbes. Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

BIOMEDICAL ENGINEERING
The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high-performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories. Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

COMPUTER FACILITIES
The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college’s Engineering Computer Services, which maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University’s central research facility in high-speed vector computation. This facility has SGI Power Challenger minisupercomputers and provides nodes for external links for access to supercomputers.

FUNDAMENTALS AND APPLICATIONS OF PHOTOPOLYMERIZATION
The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction; characterization of high-speed propagation and termination kinetics that lead to the polymer structure; and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

Courses

General Topics

CBE:0000 Cooperative Education Training Assignment: Chemical Engineering 0 s.h.
Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

CBE:0002 Half-time Cooperative Education Training Assignment: Chemical Engineering 0 s.h.
Registration for work assignment periods; for students participating in the Cooperative Education Program.

CBE:1000 CBE Departmental Seminar 1 s.h.
Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

CBE:1180 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

CBE:2030 Energy and Society 3 s.h.
History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.
### Chemical Engineering

**CBE:2105 Process Calculations**  
Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

**CBE:3000 Professional Seminar: Chemical Engineering**  
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: CBE:2105. Requirements: sophomore standing.

**CBE:3105 Chemical Engineering Thermodynamics**  
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.

**CBE:3120 Chemical Reaction Engineering**  
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis: transport in porous catalysts. Prerequisites: CBE:3115.

**CBE:3150 Thermodynamics/Transport Laboratory**  

**CBE:3155 Chemical Reaction Engineering/ Separations Laboratory**  
Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3115 and CBE:3150. Corequisites: CBE:3120.

**CBE:3998 Individual Investigations: Chemical Engineering**  
Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

**CBE:4195 Senior Enriching Activities Seminar**  
Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110.

**CBE:4410 Sustainable Systems**  
New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

**CBE:5104 Introduction to Literature Review and Technical Writing**  
Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.

**CBE:5105 Introduction to Literature Review and Proposal Writing**  
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.

**CBE:5110 Intermediate Thermodynamics**  
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as ME:5210.

**CBE:5140 Mathematical Methods in Engineering**  

**CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering**  
Research techniques for graduate students in chemical and biochemical engineering. Requirements: graduate standing.

**CBE:5240 CEBC Colloquium**  
Sustainable development issues addressed by guest speakers from chemical industries; process economics, environmental impact assessment.

**CBE:5390 Photopolymerization Topics**  
Seminars presented by faculty members, research assistants, students.

### Biochemical Engineering

**CBE:5205 Introduction to Biochemical Engineering**  
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:3120.
CBE:5210 Bioseparations  3 s.h.
Unit operations used to isolate and purify biologically-derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.

CBE:5215 Advanced Biochemical Engineering  3 s.h.
Advanced concepts regarding behavior of biological systems used in modern technologies (e.g., food processing, pharmaceutical production, environmental remediation, chemical synthesis); principles of biochemical engineering applied to design, development, and analysis of processes that use biocatalysts; second in series addressing engineering aspects of biotechnology. Recommendations: CBE:5205.

CBE:5250 Introduction to Biocatalysis  3 s.h.
Applications of biological catalysis in varied industries; potential of biological catalysis to address future challenges in science and engineering.

CBE:5875 Perspectives in Biocatalysis  1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CHEM:5875, PHAR:5875, CEE:5875, MICR:5875, BIOC:5875.

CBE:6210 Biotechnology of Extremophiles  3 s.h.
Evolution and engineering of biocatalysis under extreme conditions; physiological, kinetic, and molecular behavior of systems that perform under extremes of temperature, pH, salinity, pressure, solvent concentrations.

Environmental Engineering

CBE:3160 Engineering Analysis of Alternative Energy Systems  3 s.h.
Engineering and sustainability analyses of conventional and emerging energy technologies; alternative energy sources, including biomass, wind, solar, geothermal; alternative energy carriers (transportation fuels), including varied biofuels, hydrogen, natural gas, ammonia. Prerequisites: ENGR:2130.

CBE:4459 Air Pollution Control Technology  3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: CEE:2150. Same as CEE:4159.

CBE:5152 Environmental Chemistry I  3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:5152.

CBE:5405 Green Chemical and Energy Technologies  3 s.h.
Strategies for pollution prevention for chemical processes studied at the macroscale (industrial sector), the mesoscale (unit operations), and the microscale (molecular level); case studies. Prerequisites: CBE:2105.

CBE:5425 Atmospheric Chemistry and Physics  3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources and removal processes. Corequisites: CBE:3120. Same as CEE:5115.

Transport Phenomena

CBE:3110 Engineering Flow and Heat Exchange  3 s.h.
Fundamentals of fluid flow and heat transfer; fluid rheology, boundary layer theory, potential flow, dimensional analysis, laminar and turbulent flow in pipes, flow through packed beds, fluidized beds, pumps, flow measurement, filtration, heat exchanger design, and conductive, convective, and radiative heat transfer. Corequisites: CBE:2105.

CBE:3115 Mass Transfer and Separations  3 s.h.
Mechanisms of diffusional mass transfer; solution of industrial problems, including the design of distillation, extraction, absorption, adsorption, drying, membrane processes; mechanical separations. Prerequisites: CBE:3105 and CBE:3110.

CBE:5115 Transport Phenomena I  3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

CBE:6145 Diffusive Transport  3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

Materials Science
