Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor’s approval.

Guided Independent Study

University of Iowa Guided Independent Study is counted as resident credit and may be applied to all requirements for graduation, subject to approval by a student’s major department. Guided Independent Study courses can be taken any semester, up to four courses at a time.

Students eligible for the second-grade-only option may retake the course through Guided Independent Study for the second-grade-only option. Likewise, students eligible for the second-grade-only option in a Guided Independent Study course may retake the course on campus for the second-grade-only option.

Probation and Dismissal

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00:

• all course work taken,
• all course work taken at the University of Iowa,
• all business course work taken,
• all business course work taken at the University of Iowa,
• all course work taken to satisfy requirements for the major(s), or
• all course work taken at the University of Iowa to satisfy requirements for the major(s).
In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all course work taken to satisfy requirements for the major(s), and all course work taken at the University of Iowa to satisfy requirements for the major(s). When all of the above grade-point averages equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a term with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship may petition for permission to reregister, but usually only after one year following the end of the term in which they were dismissed.

Reinstatement

Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean, Undergraduate Program Office. Arrangements for a reinstatement interview must be made with the Undergraduate Program Office in the Tippie College of Business. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement to spring semester. Late requests are deferred to the following semester. Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

Returning for Baccalaureate Degrees

Returning for a Second Business Major

Individuals who already hold a B.B.A. degree from the University of Iowa may complete the requirements for another business major, except accounting. Those interested in earning a degree in accounting must apply for admission to the Graduate College in order to earn the Master of Accountancy degree. Students who return to the University of Iowa to complete another business major must meet the requirements for that major; they do not have to meet the residence requirement. It is their responsibility to notify the Office of the Registrar once they complete the requirements for the second major so that a notation can be placed on their permanent record. Returning students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

Returning for an Additional Bachelor's Degree in Accounting

Individuals who hold a bachelor's degree in a nonbusiness discipline from the University of Iowa or from another college or university may be considered for admission to the Tippie College of Business to earn the B.B.A. with a major in accounting. Individuals interested in this option should consult with the Department of Accounting about the B.B.A. program in accounting (undergraduate) and the Master of Accountancy graduate program. Those who already hold a B.B.A. from the University of Iowa or any business degree from another institution may not earn a major in accounting at Iowa.
Business Administration, B.B.A.

Requirements

The Bachelor of Business Administration requires a minimum of 120 s.h. of credit, including at least 48 s.h. earned in business courses and at least 60 s.h. earned in nonbusiness courses.

B.B.A. students must earn 30 s.h. in residence following admission to the Tippie College of Business. At least 24 s.h. in courses offered by the business college and at least two-thirds of the semester hours in the student's major must be earned at the University of Iowa. Nonresident instruction includes course work at colleges and universities other than the University of Iowa.

To graduate, B.B.A. students must have a cumulative g.p.a. of at least 2.00 in all college course work attempted, all college course work attempted in business, all college course work attempted in the major, all course work attempted at the University of Iowa, all business course work attempted at the University of Iowa, and all course work in the major attempted at the University of Iowa.

General Education
22-32
Prerequisites for Admission to the College
15
Prerequisites for Declaring the Business Major
9
Business Core
24
Experiential Learning Requirement (Tippie RISE)

Major Area of Study
18-25

Common B.B.A. Requirements

B.B.A. students must satisfy the following minimum common requirements or approved equivalents. For approved equivalents, consult the college's Undergraduate Program Office.

General Education
RHET:1030  Rhetoric  4
ENGL:1200  The Interpretation of Literature  3
World Languages  0-10
Natural Sciences  3
Social Sciences (excluding ECON:1100 and ECON:1200)  3
Historical Perspectives  3
Values, Society, and Diversity  3
International and Global Issues  3

Tippie College of Business students may complete the World Languages requirement using one of two options. One year of high school language study is generally equivalent to one semester of college language study.

Option one: attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college course work; or pass an achievement test or evaluation at fourth-level proficiency.

Option two: attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language

in college or an equivalent combination of high school and college course work; or pass achievement tests and/or evaluations at second-level proficiency in each language.

Students may not count courses taken to fulfill General Education Program requirements toward other requirements for the B.B.A.

Prerequisites for Admission to the College
ACCT:2100  Introduction to Financial Accounting  3
ECON:1100  Principles of Microeconomics  4
MATH:1380  Calculus and Matrix Algebra for Business  4
STAT:1030  Statistics for Business  4

Prerequisites for Declaring the Business Major
ACCT:2200  Managerial Accounting  3
ECON:1200  Principles of Macroeconomics  4
MSCI:1500  Business Computing Essentials  2

Business Core
BUS:3000  Business Communication and Protocol  3
ECON:2800  Statistics for Strategy Problems  3
FIN:3000  Introductory Financial Management  3
MGMT:2000  Introduction to Law  3
MGMT:2100  Introduction to Management  3
MKTG:3000  Introduction to Marketing Strategy  3
MSCI:3000  Operations Management  3
MSCI:3005  Information Systems  3

Experiential Learning Requirement: Tippie RISE

All Tippie College of Business students must successfully complete at least one of these experiences—research, internship, study abroad, or experiential course. Students must follow the specific criteria and procedures established for the selected experience as outlined by the Undergraduate Program Office.

Students must complete a Tippie RISE course from one of the four lists below.

Research
ACCT:4999  Honors Thesis in Accounting  3
BUS:3600  Mentored Research  arr.
BUS:4999  Honors Thesis in Business  3
ECON:4999  Honors Thesis in Economics  3
FIN:4999  Honors Thesis in Finance  3
MGMT:4999  Honors Thesis in Management and Organizations  3
MKTG:4999  Honors Thesis in Marketing  3
for admission to the B.B.A. and all of the General Education requirements. The program of study for which a student was awarded the A.A. must have included:

- a minimum of 60 s.h. (or 90 quarter hours) of credit acceptable toward graduation from the University of Iowa;
- mathematics courses comparable to MATH:0100 Basic Algebra I and MATH:0300 Basic Geometry are not accepted toward graduation;
- completion of the agreed-upon group of courses at the community college; and
- a g.p.a. of at least 2.00.

Completion of an Associate of Arts does not guarantee admission to the Tippie College of Business. See Admission Requirements in this section of the Catalog for a complete list of requirements for admission to the B.B.A.

Students who use the provisions of the articulation agreement are granted a maximum of 60 s.h. of transferable credit from two-year colleges toward the 120 s.h. required for a B.B.A. Credit earned for the A.A. beyond the 60 s.h. transferable maximum is used in computing a student's grade-point average, and it may be used to satisfy course requirements, but it does not count toward the B.B.A. Transfer credit for business courses taken during the first and second years is counted toward the B.B.A. only if such courses are usually offered as lower-division courses at the University of Iowa.

**Transfer Courses**

Students who have taken courses at another institution that are similar to those approved for the common business requirements at Iowa may request that these courses be evaluated for transfer credit. Students who transfer fewer hours than needed to meet a common business requirement may use only approved courses to complete the remainder of the requirement. Only third- and fourth-year-level courses taken at accredited four-year institutions may be used to satisfy common business course requirements numbered 3000 or above. Students must complete a minimum of 24 s.h. of business course work and at least two-thirds of the course work in the major at the University of Iowa. They also must meet the 30 s.h. residency requirement of the Tippie College of Business. Credit earned through Guided Independent Study or online courses may be counted toward all requirements for graduation, subject to approval by a student’s major department.

**Honors in Business**

Outstanding students in the college have an opportunity to undertake independent study and to work closely with faculty members and other honors students. To graduate with honors in business, students must complete an honors thesis in one of the college's departments, registering for the appropriate course from the following list.

- **ACCT:4999** Honors Thesis in Accounting 3
- **BUS:4999** Honors Thesis in Business 3
- **ECON:4999** Honors Thesis in Economics 3
- **FIN:4999** Honors Thesis in Finance 3
- **MGMT:4999** Honors Thesis in Management and Organizations 3
- **MKTG:4999** Honors Thesis in Marketing 3
To earn the B.B.A. with honors, students must successfully complete all college requirements with a g.p.a. of at least 3.50 in all courses taken at Iowa, all business courses taken at Iowa, all courses taken (including transfer courses), and all business courses taken (including transfer courses).

See Honors at Tippie on the Tippie College of Business website to learn more.

Pre-business students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the business college. Visit Honors at Iowa to learn about the University’s honors program.

**Double Majors in Business**

Students may earn the B.B.A. degree with more than one major. Students may officially declare a maximum of four programs on MyUI. Majors, minors, and certificates are considered programs. Additional programs must be declared in the Undergraduate Program Office by an advisor. The Four-Year Graduation Plan is not available to students earning more than one major. Students have access to degree audits for all of the programs they have officially declared. They also have access to all program courses, with some limitations, during early registration. A student must be in good academic standing in order to declare more than one major. See Double Majors and Joint Degree Policies on the Tippie College of Business website.

**Joint Degrees**

Undergraduate students may earn joint undergraduate degrees from the Tippie College of Business and the College of Liberal Arts and Sciences or the College of Engineering. The following rules apply to all students in joint degree programs.

- To enter a joint degree program, students must have approval from the Tippie College of Business and must be admitted to both colleges. Interested students should see an advisor in the college’s Undergraduate Program Office.
- Students in joint degree programs are allowed a combined maximum of three second-grade-only options.
- All students in joint programs must meet all requirements for both degrees, including all General Education Program requirements.
- Students are assigned two advisors (one for each major).
- Students in joint degree programs are assessed tuition only for the primary (first) major.
- First-year students in joint degree programs who are direct admission students in the Tippie College of Business must enroll in BUS:1200 Tippie College Direct Admit Seminar during their first semester at the University.

**Joint B.B.A./Liberal Arts and Sciences Degree**

The Tippie College of Business and the College of Liberal Arts and Sciences offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), or Bachelor of Music (B.M.) from the College of Liberal Arts and Sciences.

Students in the joint business/liberal arts and sciences degree program must declare the Tippie College of Business program of study as their primary (first) major.

To learn about liberal arts and sciences majors, see the College of Liberal Arts and Sciences [p. 17] section of the Catalog.

**Joint B.B.A./B.S.E.**

The Tippie College of Business and the College of Engineering offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering. Students in the joint business/engineering degree program must declare the College of Engineering program of study as their primary (first) major.

Students in the joint business/engineering degree program must enroll in appropriate mathematics and engineering courses early during their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may be able to count certain courses toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on a student’s choice of major study areas.

For information about engineering majors, see Bachelor of Science in Engineering [p. 1157] (College of Engineering) in the Catalog. To learn more about requirements for the joint business/engineering degree, consult the Undergraduate Program Office in the Tippie College of Business and the Student Development Center in the College of Engineering.

**Admission**

Students enter the Tippie College of Business in one of two ways: direct admission or standard admission. All students admitted to the Tippie College of Business must follow the Tippie College Undergraduate Honor Code. Students who meet the admission requirements may be denied admission upon evidence of postsecondary academic misconduct or other violations of the honor code. Students are required to meet with the associate dean, undergraduate program, to discuss incidents of academic misconduct.

Admission standards are set by the Undergraduate Program Committee. All admission appeals are reviewed by the Undergraduate Program Office. Prospective students must submit acceptance of admission offers and all transcripts showing course work that satisfies the Tippie College of Business admission requirements to the University's Office of Admissions by the appropriate deadline. Letters of recommendation are not accepted. For more information about application and admission, contact the Undergraduate Program Office.

**Direct Admission**

Direct admission is designed to enable highly qualified high school students to enter the college directly after high school. Applicants must have a composite ACT score of 26 or higher (or SAT equivalent) and a high school g.p.a. of 3.60 or higher (on a 4.00 scale) to qualify. Applicants who do not meet these criteria but who present a strong academic record are considered carefully.
Incoming high school students who are admitted to the College of Liberal Arts and Sciences as pre-business students may inquire about their admission decision by contacting the assistant dean and director of admission in the Tippie College of Business Undergraduate Program Office. For more information about admission requirements, see Admissions on the Tippie College of Business website.

Additional requirements for declaring a major in accounting include a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.67 (B-minus average) in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting; and a passing score on the Department of Accounting writing assessment.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The application process is competitive and is based on high school record and an application essay. Application deadline is March 1.

**Standard Admission**

University of Iowa students are eligible to apply to the Tippie College of Business through standard admission if they have completed at least 12 s.h. of course work; have completed the four prerequisite courses listed under “Common B.B.A. Requirements” in the Bachelor of Business Administration Requirements [p. 931] section with grades of C or higher; have a g.p.a. of at least 2.75 on the prerequisite courses, on all college course work completed, and on all University of Iowa course work. Transfer students who have completed the prerequisite courses and meet the grade-point average requirements also may apply through standard admission.

Requirements for declaring a major include completion of ACCT:2200 Managerial Accounting, ECON:1200 Principles of Macroeconomics, and MSCI:1500 Business Computing Essentials; see “Common B.B.A. Requirements” in the Bachelor of Business Administration Requirements [p. 931] section. Additional requirements for declaring a major in accounting include a University of Iowa g.p.a. of at least 3.00 and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.67 (B-minus average) in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting; and a passing score on the Department of Accounting writing assessment.

Applications for standard admission must be submitted online. Application deadlines are May 1 for fall admission and December 1 for spring admission; applicants should meet all admission requirements by the end of the semester in which they apply. Admission is not granted for the summer session or the three-week winter session. Students transferring from another college or university are held to the application deadlines. Grades from the three-week winter session do not count toward admission for the following spring semester, and grades from a summer session do not count toward admission for the following fall semester. Students who are denied admission may file an appeal for denial of admission to business if they can provide documentation of extenuating circumstances that affected their academic performance.

**Nondegree Admission**

Students visiting from another institution who wish to enroll in undergraduate courses in order to earn credit that they can transfer to their home institution may be granted admission as undergraduate nondegree students. Nondegree students are not guaranteed access to specific courses; they must have the approval of the department offering the course and may earn no more than 9 s.h. in nondegree status.

**Reentry Policy**

All students who have been enrolled in another college or university since leaving the University of Iowa are required to submit official transcripts along with an application for reentry. Completed application materials must be received at least two weeks before the opening of classes. Reentry students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

**Absent for 12 months or more—in good standing:** Students absent from the University of Iowa for 12 months or more who left in good standing must apply to the UI Office of Admissions as returning students and must contact the Tippie College of Business Undergraduate Program Office for advising before registration. Good standing is defined as not on probation and not dismissed for any reason.

**Absent for 12 months or more—not in good standing:** Students absent from the University of Iowa for 12 months or more who were not in good standing when they left the University must file a petition with the Tippie College of Business Undergraduate Program Office to be reinstated. If the petition is approved, the student must apply to the UI Office of Admissions as a returning student; the Undergraduate Program notifies the Office of Admissions that a student’s petition for reinstatement has been approved. The student also must schedule an appointment to see an advisor in the Tippie College of Business for advising before registration. Not in good standing is defined as being on probation or having been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at the University of Iowa or at another institution, or a violation of the Tippie College Undergraduate Honor Code. Students who have been officially dismissed follow the procedures for reinstatement.

**Absent for less than 12 months—in good standing:** Students absent for less than 12 months are not required to file an application for reentry. Students who were in good standing when they left the University of Iowa for 12 months or more who were not in good standing when they left the University must file a petition with the Tippie College of Business Undergraduate Program Office to be reinstated. The student also must schedule an appointment to see an advisor in the Tippie College of Business for advising before registration. Reentry is approved regardless of any admission requirement changes.

**Absent for less than 12 months—not in good standing:** Students absent for less than 12 months are not required to file an application for reentry. Students who were not in good standing when they left the University must contact the Tippie College of Business Undergraduate Program Office to be reinstated. Reentry is approved regardless of any admission requirement changes.
Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

The following checkpoints are designed for students who enter the University as direct admission or pre-business students. In order to stay on the plan, pre-business students must maintain the grade-point averages required for admission to the Tippie College of Business and must apply for admission to the college the semester that the four prerequisite courses will be completed, but no later than before the fifth semester begins. The Four-Year Graduation Plan is not available to students who choose to pursue a double major in the college or to those enrolled in a joint degree program.

Students must take BUS:3000 Business Communication and Protocol during their first year after admission to the Tippie College of Business, except direct admission students, who take the course during their second year.

Before the third semester begins: ECON:1100 Principles of Microeconomics, MATH:1380 Calculus and Matrix Algebra for Business, and STAT:1030 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: ACCT:2100 Introduction to Financial Accounting, ACCT:2200 Managerial Accounting, and ECON:1200 Principles of Macroeconomics, or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of course work in the major (varies by major)

During the eighth semester: all remaining course work in the major and a sufficient number of semester hours to graduate

Iowa Degree in Three

Iowa Degree in Three is designed for students who are academically prepared to complete more semester hours per term than average or who come to the university with completed college credits. It is a flexible, affordable option developed to meet the needs of highly motivated students.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

The Tippie College makes several assumptions about candidates for the Iowa Degree in Three:

- students have earned at least 15 s.h. of college credit before matriculation; and
- students are not held for more than two English as a Second Language classes.

The Iowa Degree in Three is available for any of the majors offered by the Tippie College of Business.

Career Advancement

Tippie College of Business graduates enjoy a high placement rate. Over 90 percent of students reported that they found permanent employment, were pursuing graduate degrees, or were not seeking employment six months after graduation.

Visit the Pomerantz Career Center website for more information.
Business Administration

Undergraduate minor: business administration
Website: https://tippie.uiowa.edu/

The Tippie College of Business offers a minor in business administration for non-business students. The minor in business administration is open to all University of Iowa undergraduates except those majoring in business (Tippie College of Business) and interdepartmental studies majors in the business studies track (College of Liberal Arts and Sciences).

Programs

Undergraduate Program of Study

Minor

• Minor in Business Administration [p. 937]
Business Administration, Minor

The minor in business administration is open to all University of Iowa undergraduates except those majoring in business (Tippie College of Business) and interdepartmental studies majors in the business studies track (College of Liberal Arts and Sciences).

The minor in business administration requires 36 s.h., including at least 12 s.h. taken in the Tippie College of Business. Students must maintain a g.p.a. of at least 2.00 in the minor overall and in all courses in the minor taken at the University of Iowa. Course work in the minor may not be taken pass/nonpass.

The following courses, or their equivalents, satisfy all requirements for the minor. Some of these courses have prerequisites and other requirements for registration; students must complete a course’s prerequisites and meet its registration requirements before they may register for the course; for more information, visit Minor in Business Administration on the Tippie College of Business website.

Students who will have completed all requirements for the minor when they graduate should indicate a business administration minor on the Application for Degree. Contact the Undergraduate Program Office for more information about the business administration minor.
Doctor of Philosophy

Graduate degree: Ph.D. in business administration
Website: https://tippie.uiowa.edu/future-graduate-students/phd-programs

The Doctor of Philosophy in business administration is an interdepartmental degree open to students in several Tippie College of Business departments. Basic requirements for the degree are detailed under Requirements [p. 939] in this section of the Catalog. For additional information, see graduate programs in the accounting [p. 918], finance [p. 957], management and organizations [p. 964], management sciences [p. 971], and marketing [p. 980] sections in the Catalog.

The Tippie College of Business also offers a Doctor of Philosophy in economics; see economics [p. 940] in the Catalog.

Programs

Graduate Program of Study

- Doctor of Philosophy in Business Administration [p. 939]
Business Administration, Ph.D.

Requirements
The Doctor of Philosophy in business administration requires a minimum of 72 s.h., including approved transfer credit. The program is flexible, permitting students to choose a specialization area according to their interests. Course work and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

Ph.D. course work consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual Tippie College of Business departments or visit their websites.

Core Courses
Core courses develop research competence and provide background for specialized study. Doctoral students consult with their advisors to develop a study plan that reflects the individual student's background and interests and satisfies core requirements.

Major Study Area
At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

Minor Study Area
Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

Comprehensive Examinations
Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

Dissertation
Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the student's major department. Researching and writing the dissertation typically require two years of full-time effort.

Final Examination
Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.

Admission
Applicants to the Ph.D. program in business administration must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants must take the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT) and have their scores sent to the University in order to be considered for admission. The Departments of Finance, Management and Organizations, Management Sciences, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores. Required scores on these tests and their weight in admission decisions vary by department.

International applicants who do not hold a baccalaureate or a more advanced degree from an accredited university in the United States, the United Kingdom, Canada (except French language institutions in Quebec), English-speaking Africa, Australia, or New Zealand must take the Internet-based Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS) test and have their scores sent to the University of Iowa. An IELTS total score of at least 7.0 with no subscore below 6.0 satisfies the English language requirement. Applicants who use the IELTS test are required to take the on-campus English Proficiency Evaluation.

Admission is for fall entry. Completed applications should be submitted as early as possible and no later than the following deadlines.

Accounting: January 15
Finance: January 15
Management and Organizations: January 15
Management Sciences: January 15
Marketing: January 15

Visit Ph.D. Programs on the Tippie College of Business website to learn more.

Career Advancement
The Doctor of Philosophy program prepares students for research positions in business and government or for research and teaching positions at academic institutions.
Economics

Interim Chair
• Jarjisu "Jay" Sa-Aadu

Undergraduate major: economics (B.A., B.S., B.B.A.)
Undergraduate minor: economics
Graduate degrees: M.A. in economics; Ph.D. in economics
Faculty: https://tippie.uiowa.edu/people?departments=Economics&category=75
Website: https://tippie.uiowa.edu/economics

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economists analyze incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. Economics treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and for graduate students. It also partners with the Departments of Philosophy, Political Science, and Sociology to offer the undergraduate major in ethics and public policy, an interdiscipliary program administrated by the Department of Philosophy (College of Liberal Arts and Sciences); see Ethics and Public Policy (p. 397) in the Catalog.

Undergraduate Economics Forum

Students are invited to join the undergraduate economics forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

Special Seminar

Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to the University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

Courses for Nonmajors

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program (p. 437).

The introductory courses ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics are approved for the Social Sciences area of General Education; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses ECON:3100 Intermediate Microeconomics and ECON:3150 Intermediate Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics relates to majors in many other fields. For example, political science majors could elect ECON:3650 Policy Analysis; international studies majors, ECON:3345 Global Economics and Business; environmental planning and policy majors, ECON:3625 Environmental and Natural Resource Economics; pre-law students, ECON:3790 Antitrust Economics and ECON:3800 Law and Economics; mathematics and engineering majors, ECON:3100 Intermediate Microeconomics and ECON:4190 Mathematical Economics; and statistics majors, ECON:4800 Introduction to Econometrics.

Programs

Undergraduate Programs of Study

Majors
• Major in Economics (Bachelor of Arts) (p. 944)
• Major in Economics (Bachelor of Science) (p. 946)
• Major in Economics (Bachelor of Business Administration) (p. 948)

Minor
• Minor in Economics (p. 950)

Graduate Programs of Study

Majors
• Master of Arts in Economics (p. 951)
• Doctor of Philosophy in Economics (p. 952)

Courses

Students may take ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics in either order or simultaneously. They are approved for the Social Sciences area of the College of Liberal Arts and Sciences General Education Program.

Qualified undergraduates may enroll in graduate-level courses with consent of the department chair.

Economics Courses

ECON:1100 Principles of Microeconomics 4 s.h.
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

ECON:1200 Principles of Macroeconomics 4 s.h.
National income and output, employment, and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

ECON:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
ECON:1999 Introduction to Research in Business 1 s.h.
Introduction to research in business, including scope and methods of business research, questions for which business research seeks answers, and impact of business research on society; weekly seminars include discussion and exploration and serve as preparation for engaging in mentored research. Same as BUS:1999.

ECON:2800 Statistics for Strategy Problems 3 s.h.
Continuation of STAT:1030; working knowledge of statistical techniques; scientific data-based approach to problem formulation and solution; statistical techniques in the context of real data analysis; assessment of defects in statistical analyses; using data for making business decisions; choosing appropriate statistical procedures; developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: (STAT:1030 or STAT:2010 or STAT:2020 with a minimum grade of B or STAT:3100 or STAT:3101 or STAT:3120 or STAT:3510 with a minimum grade of B or STAT:4100 or BIOS:4120 or PSQF:4143 with a minimum grade of B) and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).

ECON:3100 Intermediate Microeconomics 3 s.h.
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity; conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: ECON:1100 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).

ECON:3150 Intermediate Macroeconomics 3 s.h.
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: ECON:1200 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).

ECON:3250 American Economic History 3 s.h.
Prerequisites: (ECON:1100 and ECON:1200) or (ECON:1100 and HIST:2261). Same as HIST:3360.

ECON:3325 Personnel Economics 3 s.h.
Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions. Prerequisites: ECON:1100.

ECON:3335 Money, Banking, and Financial Markets 3 s.h.
Role of money, institutions in determination of income, employment, prices in domestic and world economy. Prerequisites: ECON:1100 and ECON:1200.

ECON:3345 Global Economics and Business 3 s.h.
Modern theories of international trade and investment; role of tariffs and other restrictions on international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: ECON:1100 and ECON:1200.

ECON:3350 Industry Analysis 3 s.h.
Structural evolution; imperfect competition; resource allocation; development of public policy on monopoly; selected industries. Prerequisites: ECON:1100.

ECON:3355 Economic and Business Forecasting 3 s.h.
How to develop and utilize forecasts; emphasis on modern statistical methods and software applied to quantitative forecasting problems; specific applications to business and economics include forecasting sales, market prices, inventories, macroeconomic factors (interest rates, exchange rates, levels of employment). Prerequisites: ECON:1100 and ECON:1200 and (ECON:2800 or ECON:4800 or STAT:3200).

ECON:3370 Household Finance 3 s.h.
Application of micro- and macro-economic theory to economic decisions of families and households; practical and theoretical issues in income generation, spending and saving decisions, risk management, and asset allocation. Prerequisites: ECON:1100 and ECON:1200.

ECON:3610 Development of Local and Regional Economies 3 s.h.
Theories, methods, and public policy in regional economic development; business and industrial locations; theories of regional growth and development; tools for regional economic analysis; technology and knowledge economy; globalization and trade; economic development finance and policy. Prerequisites: ECON:1100. Same as URP:3136.

ECON:3620 Economic Growth and Development 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: ECON:1100 and ECON:1200.

ECON:3625 Environmental and Natural Resource Economics 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100. Same as URP:3135.

ECON:3640 Regional and Urban Economics 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as URP:3134.

ECON:3650 Policy Analysis 3 s.h.
Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability. Prerequisites: ECON:1100.

ECON:3690 Sports Economics 3 s.h.
Theory and literature of economic issues in professional sports; issues such as relative advantages of large-and small-market teams, city subsidies for baseball and football stadiums, star players' true value to their teams; ideas from introductory economics (such as demand and cost curves) combined with additional economic theory, statistical evidence, and information about particular sports. Prerequisites: ECON:1100.

ECON:3750 Transportation Economics 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as GEOG:3940, URP:3350.
ECON:3760 Health Economics 3 s.h. Structure of America's health care industry; economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness; financing of medical costs; role of government. Prerequisites: ECON:1100.

ECON:3770 Urban Transportation arr. Transportation in the urban market; urban transport modes, technologies, costs, pricing, and ways to develop and analyze urban policy in order to promote city livability and sustainability; development of urban transportation and transport operations in the U.S. and worldwide; urban transport policies, plans, and policy development processes; major urban transportation issues, investigation of possible means of attacking urban transportation issues. Prerequisites: ECON:1100. Same as URP:3360.

ECON:3790 Antitrust Economics 3 s.h. Topics in federal antitrust policy; merger policy; monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics literature. Prerequisites: ECON:3100 or LAW:8146.

ECON:3800 Law and Economics 3 s.h. Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: ECON:1100.

ECON:3870 Federal Reserve Challenge 1 s.h. Experience what Federal Reserve economists do every day: study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: ECON:3100 and ECON:3150.

ECON:3999 Honors Seminar 1-3 s.h. Research topics and methods in business. Requirements: honors standing. Same as BUS:3999.

ECON:4050 Readings and Independent Study in Economics arr. Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: economics majors admitted to the College of Liberal Arts and Sciences (B.A., B.S. programs) are not required to be admitted to the Tippie College of Business and transport operations in the U.S. and worldwide; urban transport policies, plans, and policy development processes; major urban transportation issues, investigation of possible means of attacking urban transportation issues. Prerequisites: ECON:1100. Same as URP:3360.

ECON:4090 Natural Resource Economics 3 s.h. Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: ECON:3100.

ECON:4110 International Economics 3 s.h. Neoclassical model of international trade; imperfect competition and international trade and investment; role of trade barriers; regional trade agreements and the World Trade Organization. Prerequisites: ECON:3100 and ECON:3150.

ECON:4140 Labor Economics 3 s.h. Labor supply and demand; investments in human capital; compensating wage differentials; discrimination; long-term contracts; occupational choice; family decisions; unions; immigration. Prerequisites: ECON:3100.

ECON:4160 Public Sector Economics 3 s.h. Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth, and stability. Prerequisites: ECON:3100 and ECON:3150.

ECON:4170 Monetary Economics 3 s.h. Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: ECON:3100 and ECON:3150.

ECON:4180 Industrial Organization 3 s.h. Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: ECON:3100.

ECON:4190 Mathematical Economics 3 s.h. Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: ECON:3100 and ECON:3150.

ECON:4200 Game Theory 3 s.h. Basic concepts of game theory including dominance, backward induction, Nash equilibrium, evolutionary stability, commitment, credibility, asymmetric information, adverse selection, signaling; provides students with a working understanding of game theory; examples drawn from economics and politics. Prerequisites: ECON:3100 and ECON:3150 and (MATH:1380 or MATH:1850).

ECON:4700 Topics in Analytical Economics arr. Topics vary. Prerequisites: ECON:3150 and ECON:3100.

ECON:4800 Introduction to Econometrics 3 s.h. Single equation linear statistical models; estimation and hypothesis testing; serial correlation; heteroscedasticity; generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisites: STAT:3101 or STAT:3120.

ECON:4900 Academic Internship arr. Participation in approved internship program (e.g., Washington Center Internships).

ECON:4999 Honors Thesis in Economics 3 s.h. Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: economics majors admitted to the College of Liberal Arts and Sciences (B.A., B.S. programs) are not required to be admitted to the Tippie College of Business; economics majors admitted to the Tippie College of Business must be admitted to the Tippie honors program to enroll in ECON:4999.

ECON:5000 Economic Analysis I 3 s.h. Basic metric topology, convex analysis, function spaces, measure theory and integration.

ECON:5005 Real Analysis for Economics 2 s.h. Basic metric topology, convex analysis, function spaces, measure theory, and integration.

ECON:5010 Economic Analysis II 3 s.h. Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.

ECON:5015 Dynamic Programming 2 s.h. Finite- and infinite-horizon, discrete-time dynamic programming; discrete-time stochastic dynamic programming, including computational methods and some economic applications; continuous-time control theory.

ECON:5100 Microeconomics I 3 s.h. Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters.

ECON:5110 Microeconomics II 3 s.h. General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design. Offered spring semesters. Prerequisites: ECON:5100.
ECON:5115 Fundamentals of Microeconomics  2 s.h.
Consumer theory, producer theory, partial equilibrium models, expected and nonexpected utility theory.

ECON:5125 Game Theory  2 s.h.
Noncooperative and cooperative games, games of perfect and imperfect information, matching games.

ECON:5135 General Equilibrium  2 s.h.
Walrasian equilibrium and its properties, welfare economics, general equilibrium and perfect competition, general equilibrium with externalities, general equilibrium under asymmetric information.

ECON:5145 Information Economics  2 s.h.
Markets with asymmetric information, allocation mechanisms, mechanism design.

ECON:5200 Macroeconomics I  3 s.h.
Economic growth, business cycles, money and inflation. Offered fall semesters.

ECON:5210 Macroeconomics II  3 s.h.
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisites: ECON:5200.

ECON:5215 Fundamentals of Macroeconomics I  2 s.h.
Infinite horizon endowment economies; neoclassical growth models and dynamic general equilibrium.

ECON:5225 Fundamentals of Macroeconomics II  2 s.h.
Real business cycle models; overlapping generations models.

ECON:5235 Fiscal Policy and Insurance in Macroeconomics  2 s.h.
Fiscal policies, optimal taxation, and endogenous growth; uncertainty and incomplete markets, limited commitment, private information.

ECON:5245 Monetary Economics and Search Theory  2 s.h.
Introduction to monetary and financial economics; search theory and applications to labor and money markets.

ECON:5800 Econometrics  3 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisites: STAT:4101.

ECON:5805 Statistics for Economics  2 s.h.
Probability theory, transformations and expectations, common families of distributions, multiple random variables, properties of a random sample, point estimation, hypothesis testing.

ECON:5810 Applied Econometrics  3 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisites: ECON:5800.

ECON:5815 Theoretical Econometrics I  2 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests.

ECON:5825 Theoretical Econometrics II  2 s.h.
Continuation of ECON:5815.

ECON:5855 Applied Econometrics I  2 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms.
Economics, B.A.

The B.A. in economics incorporates a balance of economic theory, mathematical tools, and field applications.

Students majoring in economics choose one of three tracks: business, policy, or analytical. They complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student's choice of track.

The Bachelor of Arts degree is awarded by the College of Liberal Arts and Sciences.

### Requirements

The Bachelor of Arts with a major in economics requires a minimum of 120 s.h., including 31-32 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program [p. 437].

The B.A. program focuses on economic theory, mathematical tools, and field applications. The program provides an excellent educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The economics major for the B.A. requires a set of courses in mathematics and statistics (10-11 s.h.) and a set of courses in economic theory (6 s.h.). It also requires a set of applied field courses (15 s.h.) in one of three tracks: business, policy, or analytical.

The business track is designed for students who seek employment in the private sector or who plan to earn an M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. The analytical track is designed for students interested in a technical/analytical position in the public or private sector or who plan to earn a graduate degree in a discipline that is highly quantitative.

Students may be able to count a limited amount of transfer credit toward the major, but they are required to complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track. Course work in the major may not be taken pass/nonpass.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others. For help in developing a study plan, visit the Department of Economics website.

The economics major (B.A.) requires the following course work.

### Applied Field Courses

Students complete a total of five applied field courses (15 s.h.).

#### Business Track

Five of these:

- ECON:3325 Personnel Economics 3
- ECON:3335 Money, Banking, and Financial Markets 3
- ECON:3345 Global Economics and Business 3
- ECON:3350 Industry Analysis 3
- ECON:3355 Economic and Business Forecasting 3
- ECON:3370 Household Finance 3
- ACCT:2200 Managerial Accounting 3
- MGMT:2100 Introduction to Management 3

#### Policy Track

Four of these:

- ECON:3345 Global Economics and Business 3
- ECON:3610 Development of Local and Regional Economies 3
- ECON:3620 Economic Growth and Development 3
- ECON:3625 Environmental and Natural Resource Economics 3
- ECON:3640 Regional and Urban Economics 3
- ECON:3650 Policy Analysis 3
- ECON:3690 Sports Economics 3
- ECON:3750 Transportation Economics 3
- ECON:3760 Health Economics 3
- ECON:3790 Antitrust Economics 3
- ECON:3800 Law and Economics 3
- ECON:3875 Topics in Policy Economics 3

And:

- One additional economics course numbered from ECON:3250 through ECON:4700, excluding these three courses: ECON:3870, ECON:3999, and ECON:4050.

#### Analytical Track

Four of these:

- ECON:3345 Global Economics and Business 3
- ECON:3345 Global Economics and Business 3
- ECON:3620 Economic Growth and Development 3
- ECON:3625 Environmental and Natural Resource Economics 3
- ECON:3640 Regional and Urban Economics 3
- ECON:3650 Policy Analysis 3
- ECON:3690 Sports Economics 3
- ECON:3750 Transportation Economics 3
- ECON:3760 Health Economics 3
- ECON:3790 Antitrust Economics 3
- ECON:3800 Law and Economics 3
- ECON:3875 Topics in Policy Economics 3

And:

- One additional economics course numbered from ECON:3250 through ECON:4700, excluding these three courses: ECON:3870, ECON:3999, and ECON:4050.
### Academic Plans

#### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

**Before the seventh semester begins:** ECON:1100 Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, MATH:1380 Calculus and Matrix Algebra for Business, STAT:1020 Elementary Statistics and Inference or STAT:1030 Statistics for Business (recommended), and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and ECON:2800 Statistics for Strategy Problems

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

#### Career Advancement

The Bachelor of Arts degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit What Can I Do with a Major in Economics on the Pomerantz Career Center website.
### Economics, B.S.

The B.S. in economics incorporates a balance of economic theory, mathematical tools, and field applications, while emphasizing the development of analytical skills.

Students majoring in economics choose one of three tracks: business, policy, or analytical. They complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student’s choice of track.

The Bachelor of Science degree is awarded by the College of Liberal Arts and Sciences.

#### Requirements

The Bachelor of Science with a major in economics requires a minimum of 120 s.h., including 33-35 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program [p. 437].

The B.S. program focuses on economic theory, mathematical tools, and field applications. The program provides an excellent educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The economics major for the B.S. requires a set of courses in mathematics and statistics (15-17 s.h.) and a set of courses in economic theory (6 s.h.). It also requires a set of applied field courses (12 s.h.) in one of three tracks: business, policy, or analytical.

The business track is designed for students who seek employment in the private sector or who plan to earn an M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. The analytical track is designed for students interested in a technical/analytical position in the public or private sector or who plan to earn a graduate degree in a discipline that is highly quantitative.

Students may be able to count a limited amount of transfer credit toward the major, but they are required to complete the following courses at the University of Iowa:

- ECON:3100 Intermediate Microeconomics
- ECON:3150 Intermediate Macroeconomics
- ECON:3750 Intermediate Mathematical Economics
- ECON:3760 Stochastic Calculus

Three of these courses (12 s.h.) in one of three tracks: business, policy, or analytical.

### Mathematics and Statistics Courses

The department recommends that students planning to pursue a graduate degree in economics take STAT:3100 Introduction to Mathematical Statistics I and STAT:3101 Introduction to Mathematical Statistics II rather than STAT:3120 Probability and Statistics. It also recommends that they take additional courses in mathematics, including MATH:2700 Introduction to Linear Algebra, MATH:2850 Calculus III, and MATH:3600 Introduction to Ordinary Differential Equations.

### Applied Field Courses

Students complete a total of four applied field courses (12 s.h.).
ECON:3790  Antitrust Economics  3
ECON:3800  Law and Economics  3
ECON:3875  Topics in Policy Economics  3
And:
One additional economics course numbered from ECON:3250 through ECON:4700, excluding these three courses: ECON:3870, ECON:3999, and ECON:4050.

Analytical Track
Three of these:
ECON:4090  Natural Resource Economics  3
ECON:4110  International Economics  3
ECON:4140  Labor Economics  3
ECON:4160  Public Sector Economics  3
ECON:4170  Monetary Economics  3
ECON:4180  Industrial Organization  3
ECON:4190  Mathematical Economics  3
ECON:4200  Game Theory  3
ECON:4700  Topics in Analytical Economics  3
And:
One additional economics course numbered from ECON:3250 through ECON:4700, excluding these three courses: ECON:3870, ECON:3999, and ECON:4050.

B.S. with Teacher Licensure
Economics majors in the College of Liberal Arts and Sciences who are interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education's Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Student Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Honors in the Major
College of Liberal Arts and Sciences students majoring in economics have the opportunity to graduate with honors in the major. Departmental honors students must complete ECON:3100 Intermediate Microeconomics and ECON:3150 Intermediate Macroeconomics before their senior year. Interested students should consult the department's honors advisor by the second semester of their junior year.

Honors students in economics typically register for ECON:3999 Honors Seminar in the fall of their senior year. To graduate with honors in the major, they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in ECON:4999 Honors Thesis in Economics. They present the thesis orally to a committee of three faculty members, typically the undergraduate honors advisor, the student's research supervisor, and a third faculty member agreed upon by the student and the honors advisor.

Academic Plans

Four-Year Graduation Plan
The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the fifth semester begins: MATH:1850 Calculus I

Before the sixth semester begins: ECON:1100 Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, and MATH:1860 Calculus II

Before the seventh semester begins: ECON:3100 Intermediate Microeconomics or ECON:3150 Intermediate Macroeconomics, STAT:3100 Introduction to Mathematical Statistics I (if applicable), and at least 90 s.h. earned toward the degree

Before the eighth semester begins: ECON:3100 Intermediate Microeconomics or ECON:3150 Intermediate Macroeconomics (whichever has not already been taken), and STAT:3101 Introduction to Mathematical Statistics II or STAT:3120 Probability and Statistics (whichever is applicable)

During the eighth semester: ECON:4800 Introduction to Econometrics, and enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

Career Advancement
The Bachelor of Science degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit What Can I Do with a Major in Economics on the Pomerantz Career Center website.
Economics, B.B.A.

The B.B.A. in economics emphasizes the economic foundations of business fields: accounting, finance, marketing, business law, and management.

Students majoring in economics choose one of three tracks: business, policy, or analytical. In addition to the B.B.A. common requirements, students complete two sets of requirements for the major: economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student's choice of track.

The Bachelor of Business Administration degree is awarded by the Tippie College of Business.

### Requirements

The Bachelor of Business Administration with a major in economics requires a minimum of 120 s.h., including 18 s.h. of work for the major.

The B.B.A. program focuses on economic theory, mathematical tools, and field applications. The program provides an excellent educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The economics major for the B.B.A. requires a set of courses in mathematics and statistics, which students take as part of the B.B.A. common requirements, and a set of courses in economic theory (6 s.h.). It also requires a set of applied field courses (12 s.h.) in one of three tracks: business, policy, or analytical.

The business track is designed for students who seek employment in the private sector or who plan to earn an M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. The analytical track is designed for students interested in a technical/analytical position in the public or private sector or who plan to earn an applied field degree in a discipline that is highly quantitative.

Students may request permission to apply a limited amount of transfer credit toward the major, but they are required to complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track. Course work in the major may not be taken pass/nonpass.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others.

All students must complete the B.B.A. common requirements; see "Common B.B.A. Requirements" in the Bachelor of Business Administration [p. 931] section of the Catalog. The economics major (B.B.A.) requires the following course work.

| Economic Theory Courses | 6 |
| Applied Field Courses (Track) | 12 |
| Total Hours | 18 |

### Applied Field Courses

Students complete a total of four applied field courses (12 s.h.).

#### Business Track

Four of these:

<table>

---

1. BUS:3000 Business Communication and Protocol must be taken in the first semester after admission to the Tippie College of Business. Direct admits take BUS:3000 their second year.

### Career Advancement

The Bachelor of Business Administration degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit What Can I Do with a Major in Economics on the Pomerantz Career Center website.
Economics, Minor

The minor in economics requires a minimum of 15 s.h. in economics courses, including 12 s.h. taken at the University of Iowa in Department of Economics courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass.
Economics, M.A.

Requirements

The Master of Arts is offered only to students working toward a Ph.D. in economics.

The department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Application deadline for admission and financial support is January 15 for fall semester entry.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English and who do not hold a baccalaureate or advanced degree from an accredited college or university in the United States must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions.

Career Advancement

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit What Can I Do with a Major in Economics on the Pomerantz Career Center website.
Economics, Ph.D.

Requirements

The Doctor of Philosophy program in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation.

The department partners with the College of Law to offer a joint degree program; see "Joint Ph.D./J.D." below. It also participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog.

Requirements are as follows.

Core Sequence

<table>
<thead>
<tr>
<th>First Semester</th>
<th>ECON:5000</th>
<th>Economic Analysis I</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON:5100</td>
<td></td>
<td>Microeconomics I</td>
<td>3</td>
</tr>
<tr>
<td>ECON:5200</td>

<td>Econometrics</td>
<td>3</td>
</tr>
<tr>
<td>Fourth Semester</td>
<td>ECON:5810</td>
<td>Applied Econometrics</td>
<td>3</td>
</tr>
</tbody>
</table>

Qualifying Examination

The qualifying examination is normally taken the summer after the first year.

Research Paper

The research paper is normally completed the summer after the second year.

Major Field Courses

Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

Dissertation Proposal and Comprehensive Examination

Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

Dissertation

Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Joint Ph.D./J.D.

The Department of Economics and the College of Law offer a joint Doctor of Philosophy/Juris Doctor program; for information about the J.D. degree, see "Juris Doctor" in the College of Law [p. 1326] section of the Catalog. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. Application deadline for admission and financial support is January 15 for fall semester entry.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English and who do not hold a baccalaureate or advanced degree from an accredited college or university in the United States must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions.

Career Advancement

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit What Can I Do with a Major in Economics on the Pomerantz Career Center website.
Entrepreneurial Management

Executive Director
- David K. Hensley

Director
- Lynn Allendorf

Undergraduate certificate: entrepreneurial management

Faculty: http://www.iowajpec.org/about/faculty-and-staff/
Website: http://www.iowajpec.org/

The Tippie College of Business and the John Pappajohn Entrepreneurial Center (JPEC) offer the Certificate in Entrepreneurial Management. They also work with other units on campus to offer entrepreneurship programs. The college collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship [p. 1254]. The center partners with the Department of Management and Organizations (p. 964) to offer the entrepreneurial management track for Bachelor of Business Administration students majoring in management. It collaborates with the College of Liberal Arts and Sciences to offer the B.A. in Enterprise Leadership [p. 369] and the Certificate in Arts Entrepreneurship [p. 123].

The John Pappajohn Entrepreneurial Center also offers a wide variety of professional experiences designed to foster the development of entrepreneurs and future organizational leaders.

Undergraduate entrepreneurship programs at the University of Iowa combine academic course work and experiential learning with a focus on teaching entrepreneurial leadership, innovation and creativity, opportunity recognition and assessment, and strategic business planning. Several of the programs are open to all University of Iowa undergraduates. To learn more, visit the John Pappajohn Entrepreneurial Center website.

Programs

Undergraduate Program of Study

Certificate
- Certificate in Entrepreneurial Management [p. 956]

Facilities

Entrepreneurial Management Institute

The Entrepreneurial Management Institute works with top entrepreneurship students in the B.B.A. in management (entrepreneurial management track), B.A. in enterprise leadership, and certificate programs in entrepreneurial management, technological entrepreneurship, and performing arts entrepreneurship. Experienced business professionals and entrepreneurial leaders work with students to complete advanced strategic business planning projects for entrepreneurial firms. Students network with successful Iowa CEOs and business leaders, and have opportunities to enhance their professional project management, presentation, and business communication skills. Students also receive support for obtaining internships, career planning, and job placement.

Bedell Entrepreneurship Learning Laboratory

The Bedell Entrepreneurship Learning Laboratory is an applied learning environment for advanced entrepreneurship students creating a new business. The laboratory provides dedicated office space for individual students and teams, enabling them to concentrate on developing their business concepts. Students at the laboratory receive intensive mentoring and other assistance from faculty and staff associated with the John Pappajohn Entrepreneurial Center (JPEC) and the Small Business Development Center. Contact JPEC for information about applying to the laboratory.

Courses

Entrepreneurial Management Courses

ENTR:1010 Exploring Entrepreneurship 3 s.h.
Introduction to entrepreneurship, including identifying characteristics of the entrepreneur, evaluating opportunities, engaging in customer discovery, design thinking, feasibility, financing, and planning for success.

ENTR:1020 Business Innovation 3 s.h.
Overview of entrepreneurship, innovation, and project management concepts; work in teams with Science, Technology, Engineering, and Mathematics (STEM) industry mentors to develop innovative solutions to real-world problems.

ENTR:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

ENTR:1350 Foundations in Entrepreneurship 2 s.h.
Basic core business concepts faced by entrepreneurial managers in small business accounting, marketing, and business planning. Recommendations: non-business major interested in studying entrepreneurship.

ENTR:2000 Entrepreneurship and Innovation 3 s.h.

ENTR:2800 Entrepreneurial Experience 1-3 s.h.
Applied learning course designed to enhance innovation and opportunity recognition skills, develop customer discovery expertise, and foster team-building and leadership abilities.

ENTR:3000 Practicum in Entrepreneurship 1-3 s.h.
Applied, experiential learning opportunities designed to foster development of entrepreneurial leadership skills; opportunity recognition and assessment, strategic business planning, innovation and creativity, team leadership, professional communication skills, strategy development and execution.
ENTR:3100 Entrepreneurial Finance 3 s.h.
Understanding financial aspects of new and growing ventures; focus on preparing financial projections, analyzing financial performance, managing cash flow, and determining financial feasibility; detailed overview of various sources of capital available for start-up and growing ventures. Prerequisites: ENTR:3520 or THTR:3520 or ENTR:2000 or MGMT:3100.

ENTR:3200 Entrepreneurial Marketing 3 s.h.
Practical marketing concepts for evaluating the market potential for new products, services, or business opportunities; how to obtain and evaluate market data, determine customer demand, analyze the competition, design effective promotions, develop and implement effective sales strategies, and write a successful marketing plan. Prerequisites: MGMT:3100 or ENTR:2000 or ENTR:3520 or THTR:3520.

ENTR:3300 Legal Aspects of Entrepreneurship 3 s.h.
Areas of law significant to new and emerging businesses; business formation and structure, intellectual property, business agreements, legal processes. Prerequisites: ENTR:2000 or MGMT:3100 or ENTR:3520 or THTR:3520.

ENTR:3400 Strategic Management of Technology and Innovation 3 s.h.
New technology innovation and commercialization; technology innovation process, identification of commercialization strategies, feasibility analysis, intellectual property issues. Prerequisites: ENTR:2000 or ENTR:3520 or THTR:3520 or MGMT:3100.

ENTR:3500 Social Entrepreneurship 3 s.h.
Introduction to the growing field of social entrepreneurship; creation of ventures with dual missions of social benefit and return on investment; issues related to evaluating market opportunities; acquiring and managing scarce resources; sustainability; maximizing social and economic value. Prerequisites: ENTR:2000 or ENTR:3520 or THTR:3520 or MGMT:3100.

ENTR:3520 New Ventures in the Arts 3 s.h.

ENTR:3595 Nonprofit Organizational Effectiveness 3 s.h.
Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as MGMT:3500, MUSM:3500, NURS:3595, RELS:3700, SSW:3500.

ENTR:3600 E-Commerce Strategies for Entrepreneurs 3 s.h.
E-commerce opportunities and Internet business strategies for entrepreneurial ventures; how to develop effective web business strategies, latest technologies and trends in E-commerce, methods for maximizing traffic, impact of a company's website. Prerequisites: ENTR:2000 or MGMT:3100 or ENTR:3520 or THTR:3520.

ENTR:3700 Sustainable Product Innovation and Management 3 s.h.
Sustainability requirements in management of new product and process development from the perspective of the senior-level executive responsible for a firm's business and operational strategies; student teams will develop a new sustainable product or undertake applied field study projects to gain firsthand experience with sustainability practices and strategies within a company. Prerequisites: ENTR:2000 or ENTR:3520 or THTR:3520 or MGMT:3100. Requirements: 60 s.h. earned.

ENTR:4000 Seminar in Entrepreneurship 2-3 s.h.
Real estate and property issues facing the entrepreneurial venture; real estate development, legal and contractual issues, purchasing versus leasing, and basics of real estate financing and investing. Prerequisites: ENTR:2000 or MGMT:3100 or ENTR:3520 or THTR:3520.

ENTR:4050 Directed Readings in Entrepreneurship arr.
Independent study; topics and assignments approved by instructor.

ENTR:4100 International Entrepreneurship and Culture 1-3 s.h.
International entrepreneurship and business strategy, foreign exchange, tariffs and trade, micro-finance, economic conditions and culture of destination countries; students will travel abroad and have hands-on experience working with in-country entrepreneurs and will analyze international businesses; focus will be on evaluating entrepreneurial opportunities, identifying sustainable growth strategies, and understanding international business culture. Prerequisites: ENTR:2000 or MGMT:3100. Requirements: junior standing.

ENTR:4200 Entrepreneurship: Business Consulting 3 s.h.
Students provide strategic business consulting services to start-up and early-stage companies; exploration of consulting process (proposal development, data collection and analysis, team dynamics, communications with clients, developing recommendations, final report preparation and presentation); projects involving market research and analysis, financial analysis and projections, and strategic business and operations planning.

Creation and launch of a new venture; completion of a detailed business plan, creating an elevator pitch, and formal presentation of plan.

ENTR:4400 Managing the Growth Business 3 s.h.
Preparation to effectively manage employees, customers, and suppliers; leadership for a growing entrepreneurial venture; opportunities to evaluate, practice, and refine critical professional management skills. Prerequisites: ENTR:2000 or ENTR:3520 or THTR:3520 or MGMT:3100. Requirements: 75 s.h. earned.

ENTR:4450 Professional Sports Management 3 s.h.
Detailed study of professional sports management and marketing; building and managing a front office, marketing sports properties, revenue generation models, developing media relationships, and capitalizing on new opportunities in the sports industry. Prerequisites: ENTR:2000 or ENTR:3520 or THTR:3520 or MGMT:3100.
ENTR:4460 Entrepreneurship and Global Trade 3 s.h.
Complex issues of business operations in a global economy; trade transactions related to importing and exporting, logistics, and ethical issues in international trade; global business management, global marketing, global supply chain management, and trade finance; preparation for work in global marketplace and for the Certified Global Business Professional certification exam offered by the North American Small Business International Trade Educators. Prerequisites: MGMT:3100 or ENTR:2000 or ENTR:3520 or THTR:3520 or GEOG:2910.

ENTR:4510 Arts Leadership Seminar 3 s.h.
Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or ENTR:2000 or THTR:3520. Same as DPA:4510, INTD:4510, THTR:4510.

ENTR:4600 Advanced Venture Finance 3 s.h.
Examination of financing sources available to emerging and high potential ventures; special emphasis on angel investing and venture capital; preparation of pro forma financial statements, financial analysis, and determining valuations; how market, technology, and financial considerations impact capital formation; evaluation of real venture deals through experiential learning projects. Prerequisites: (FIN:3000 or ENTR:3100) and (ENTR:2000 or MGMT:3100 or ENTR:3520 or THTR:3520).

ENTR:4900 Academic Internship arr.
Professional internship experience with academic credit (e.g., paper, course work).

ENTR:6001 Introduction to Entrepreneurial Management 1 s.h.
The entrepreneurial process as it applies to new ventures and existing organizations; entrepreneurship and corporate entrepreneurship, attributes of successful entrepreneurial leaders, innovation and creativity, feasibility analysis.

ENTR:6002 Evaluating Entrepreneurial Opportunities 1 s.h.
Strategies to identify, assess, and capitalize on sustainable commercial opportunities; opportunity recognition, environmental analysis, intellectual property, strategic business planning.

ENTR:6003 Basics of Entrepreneurial Marketing 1 s.h.
Core marketing concepts facing entrepreneurial organizations; types of markets, product management, distribution, pricing, market research and analysis, market planning.

ENTR:6004 Basics of Entrepreneurial Finance 1 s.h.
Core financial concepts facing entrepreneurial organizations; accounting systems, financial statements, financial statement analysis, financial projections, sources of financing.

ENTR:9000 Developing Professional Service Business 2-3 s.h.
Use of professional skills and functional knowledge in creating a specialized service business. Same as CEE:5210.

ENTR:9100 Entrepreneurship and Innovation 3 s.h.
The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, opportunity recognition, venture screening, identification of resources, feasibility analysis.

ENTR:9400 Evaluating Innovation Opportunities 2-3 s.h.
Integrated, cross-functional perspective of how organizations identify and evaluate opportunities and develop strategies to compete in a global marketplace; innovation and creativity, opportunity recognition, venture screening, identification of resources, and strategic business planning.

ENTR:9450 Strategic Management of Technology and Innovation 3 s.h.
Role of technology in creation, growth, and survival of industries; processes, risks, and rewards of technological innovation and commercialization; successful approaches to developing technological strategy and products.

ENTR:9500 Managing the Growth Business 3 s.h.
Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth of a business; case studies, particularly in technology sector.

ENTR:9550 Commercializing New Technology 3 s.h.
Hands-on experience with the process of technology commercialization; real-world opportunity in the form of a technology developed in an academic environment or in the private sector and creation of a plan to transfer that technology to the marketplace; identifying a specific application of that technology (the product); identifying and sizing relevant market segments; determining the appropriate business and financial model; designing a business plan; presentation of business plans/opportunities to simulated venture capitalists.

ENTR:9600 Seminar in Entrepreneurship 1-3 s.h.
Topics vary; franchising, business acquisition, real estate development, e-commerce, technology transfer.

ENTR:9700 Entrepreneurship: Business Consulting 3 s.h.
Experience on teams providing consulting services to start-up and early-stage companies; the consulting process--proposal development, data collection and analysis, final report preparation and presentation; projects--marketing studies, financial projections, strategic planning.

ENTR:9800 Entrepreneurship: Advanced Business Planning 1-3 s.h.
Mentoring for individuals in final stages of preparing to launch their own business.
Entrepreneurial Management, Certificate

The Certificate in Entrepreneurial Management requires a minimum of 18 s.h. of credit. The certificate program is open to all current University of Iowa undergraduate students and to all individuals who hold a bachelor’s degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The Certificate in Entrepreneurial Management is not open to students earning the B.B.A. in management (entrepreneurship management track) or the B.A. in enterprise leadership.

The certificate program is designed to help students acquire the entrepreneurial mindset that will enable them to launch new ventures or manage growing companies. It focuses on qualities and skills essential for entrepreneurs and successful business leaders.

Entrepreneurial management students learn from a select team of faculty members and business executives distinguished by their ability to teach, model, and inspire the entrepreneurial process. They learn skills for:

• recognizing and evaluating business opportunities;
• preparing strategic business and operating plans;
• preparing financial forecasts and budgets and evaluating financial performance;
• leading, motivating, and managing teams and individuals;
• communicating and negotiating in business situations; and
• enhancing professional and interpersonal skills.

Undergraduate students must declare their intention to pursue the certificate. Business students should contact the Tippie College of Business Undergraduate Program Office. Liberal arts and sciences students should contact the Academic Programs & Student Development office.

Students earning the certificate in conjunction with the Bachelor of Applied Studies [p. 1596] (University College) or the Bachelor of Liberal Studies [p. 1599] (University College) may complete the certificate’s course work by distance education.

Students may begin working toward the Certificate in Entrepreneurial Management during their sophomore year. They may count a maximum of 6 s.h. of transfer credit toward the certificate, with approval from the entrepreneurship program director. Credit earned in entrepreneurship courses (prefix ENTR) is counted as semester hours earned in business.

The Certificate in Entrepreneurial Management requires the following course work. Many certificate courses have prerequisites and other requirements for registration; students must complete a course's prerequisites and must meet its registration requirements before they may register for the course.

Entrepreneurship Core

One of these:
- ENTR:2000 Entrepreneurship and Innovation 3
- ENTR:3520 New Ventures in the Arts 3

All of these:
- ENTR:3100 Entrepreneurial Finance 3
- ENTR:3200 Entrepreneurial Marketing 3
- ENTR:4400 Managing the Growth Business 3

Electives
Students earn an additional 6 s.h. in elective courses chosen from the following list. Students who wish to use a course not on the list must consult with the John Pappajohn Entrepreneurial Center director.

- ENTR:2800 Entrepreneurial Experience 1-3
- ENTR:3000 Practicum in Entrepreneurship 1-3
- ENTR:3300 Legal Aspects of Entrepreneurship 3
- ENTR:3400 Strategic Management of Technology and Innovation 3
- ENTR:3500 Social Entrepreneurship 3
- ENTR:3595 Nonprofit Organizational Effectiveness I 3
- ENTR:3600 E-Commerce Strategies for Entrepreneurs 3
- ENTR:3700 Sustainable Product Innovation and Management 3
- ENTR:4000 Seminar in Entrepreneurship 3
- ENTR:4050 Directed Readings in Entrepreneurship arr.
- ENTR:4100 International Entrepreneurship and Culture 1-3
- ENTR:4200 Entrepreneurship: Business Consulting 3
- ENTR:4300 Entrepreneurship: Advanced Business Planning 3
- ENTR:4450 Professional Sports Management 3
- ENTR:4460 Entrepreneurship and Global Trade 3
- ENTR:4510 Arts Leadership Seminar 3
- ENTR:4900 Academic Internship 3
- MGMT:4100 Dynamics of Negotiations 3
Finance

Chair
• Erik Lie

Undergraduate major: finance (B.B.A.)
Graduate degree: finance subprogram for the Ph.D. in business administration
Faculty: https://tippie.uiowa.edu/people?departments=Finance&category=75
Website: https://tippie.uiowa.edu/finance

The Department of Finance is committed to delivering programs of study that integrate the technology and analytics of today's global financial community. The goal is to provide students with the technical skills they need to enhance their managerial effectiveness, whether they work in large corporations, small organizations, or private consulting.

The department offers the undergraduate major in finance and the subprogram in finance that leads to the Ph.D. in business administration. Additionally, they participate in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog. The department also partners with the Emmett J. Vaughan Institute of Risk Management and Insurance to offer the undergraduate Certificate in Risk Management and Insurance [p. 1001].

Courses

Finance Courses

FIN:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

FIN:3000 Introductory Financial Management 3 s.h.
Financial management goals and decision making; valuation of bonds and stocks, risk and return analysis, portfolio diversification, market efficiency, asset pricing, cost of capital, agency theory, capital budgeting, financial planning. Prerequisites: ECON:1200 and ACCT:2100 and ECON:1100. Requirements: 60 s.h. completed.

FIN:3020 Professional Finance Seminar 1 s.h.
Seminar topics include finance careers, curriculum, understanding of current events, internships, professional designations, ethics, and general finance acumen.

FIN:3100 Financial Information Technology 2 s.h.
Applications of commonly used financial software and data systems reviewed by student teams. Corequisites: FIN:3000.

FIN:3200 Investment Management 3 s.h.

FIN:3300 Corporate Finance 3 s.h.
Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:3400 Principles of Risk Management and Insurance 3 s.h.
Introduction to risk and insurance; risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk; insurance as a risk management tool. Prerequisites: ECON:1100 and ECON:1200.

FIN:3500 Hawkinson Scholar Seminar 1 s.h.
Advanced skill and understanding required for pursuit of investment banking, management consulting careers; specialized résumé and interview training, industry presentations, relevant case assignments.

FIN:3510 Hawkinson Scholar Seminar: Topics in Finance 0 s.h.
Subsectors in the financial services industry, including hedge funds, investment banking, commercial banking; valuation techniques used in real-world mergers, acquisitions, equity offerings, debt financing, and so forth.

FIN:4020 Topics in Finance 3 s.h.
Contemporary issues in finance. Prerequisites: FIN:3000 and FIN:3100.

FIN:4050 Directed Readings in Finance arr.
Individually guided readings in selected topics.

FIN:4210 Futures and Options 3 s.h.
Use of options, futures, and other derivative securities in financial management; understanding types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisites: FIN:3100 and FIN:3200.

FIN:4220 Fixed Income Securities 3 s.h.
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisites: FIN:3000 and FIN:3100.

FIN:4230 Real Estate Process 3 s.h.
Fundamentals of real estate finance and investments; economic base analysis, asset analysis, market analysis, mortgage markets, underwriting, alternative mortgages, mortgage-backed securities, real estate securitization, land development, valuation principles, investment analysis, tax consideration, portfolio management. Prerequisites: FIN:3000 and FIN:3100.
FIN:4240 International Finance 3 s.h.
International monetary systems, exchange rate determination, use of currency derivative in hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures. Prerequisites: FIN:3000 and FIN:3100.

FIN:4250 Applied Equity Valuation 3 s.h.
Equity valuation and portfolio management techniques by investment professionals; economic forecasting, industry analysis, financial statement analysis, spreadsheet modeling, cost of capital estimation, equity valuation and portfolio construction; students manage the University of Iowa's Krause Fund (an endowed equity portfolio that blends academic rigor with real-world portfolio management experience). Prerequisites: FIN:3100 and FIN:3000. Requirements: UI cumulative g.p.a. of at least 2.80.

FIN:4310 Advanced Corporate Finance 3 s.h.
Understanding and evaluating major corporate actions such as mergers and acquisitions, initial public offerings, spin-offs, and debt and equity issuance; introduction to venture capital and leveraged buyouts; includes a substantial experiential learning component and attempts to nudge students away from textbook-based learning towards acquiring practical skills needed to succeed in the corporate finance industry; students will be required to collect and evaluate financial information and be challenged to think beyond the lecture material presented in the classroom. Prerequisites: FIN:3100 and FIN:3300.

FIN:4320 Commercial Banking 3 s.h.
Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisites: FIN:3100 and FIN:3000.

FIN:4330 Investment Banking 3 s.h.
How investment banks fill critical roles in maintaining well-functioning financial markets and provide access to capital and strategic advice to companies and governments; recent global financial crisis; how banker's role as intermediary between companies and markets adds value and creates conflicts and risk. Prerequisites: FIN:3100 and FIN:3000.

FIN:4340 Wealth Management 3 s.h.
Financial services for client wealth management; how to make personal investment decisions and build diversified, strategic advice to companies and governments; personal financial planning); principles of probability theory, mathematical finance, and actuarial science developed for use in quantitative analysis of important risk management problems; spreadsheet-based course. Prerequisites: FIN:3000.

FIN:4900 Academic Internship 1-3 s.h.
Professional internship experience with associated academic content.

FIN:4999 Honors Thesis in Finance 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: admission to the Tippie College of Business honors program.

FIN:7110 Finance Theory I 3 s.h.
Consumption-based models of asset pricing; arbitrage, contingent claims; market efficiency and information economics, behavioral models; emphasis on theory. Requirements: Ph.D. enrollment.

FIN:7120 Seminar in Corporate Finance 3 s.h.
Valuation (DCF and CAPM); valuation under certainty, uncertainty; financial structure, cost of capital; dividend policy; firm investment in perfect, imperfect capital markets. Requirements: Ph.D. enrollment.

FIN:7130 Finance Theory II 3 s.h.
Continuous time theories of financial markets, including connection between an arbitrage-free pricing system and martingales; pricing of contingent claims, general equilibrium and term structure theory. Requirements: Ph.D. enrollment.

FIN:7140 Advanced Empirical Finance 3 s.h.
Market efficiency and term structure theory tests; tests of asset pricing models, dividend policy and financial structure issues. Requirements: Ph.D. enrollment.
FIN:9240 International Finance 2-3 s.h.
Introduction to structure and functioning of global financial markets; currency market, international equity markets; use of derivatives in currency risk management for corporate and investment needs; corporate investment decisions in an international context.

FIN:9250 Applied Securities Analysis - Henry Fund II 3 s.h.
Manage Henry Fund portfolio, learn legal environment in which the fund operates, analyze potential investments, implement controls to monitor the fund’s performance; decisions and investment recommendations made by students; each student analyzes an economic sector and geographic region (i.e., utilities analyst and specialist in South East Asia); while the fund cannot currently invest directly in foreign listed stocks, it holds U.S. listed stocks with significant overseas interests and students are able to invest in a number of ADRs. Prerequisites: MBA:8180.

FIN:9260 Applied Securities Analysis - Henry Fund II 3 s.h.
Continuation of FIN:9250. Prerequisites: FIN:9250 and MBA:8180.

FIN:9270 Security Analysis 3 s.h.
Valuation of financial securities (primarily equities) using discounted cash flow model; industry, regulatory analysis; financial statement analysis; active portfolio management; value-based management techniques; valuation of firms outside the United States. Prerequisites: MBA:8180.

FIN:9280 Structured Finance-Securitization 3 s.h.
Design of debt, equity, and hybrid financing techniques to resolve issuer and investor problems that conventional methods cannot address; why and when corporations and financial institutions issue structured securities; how securities are designed and priced; how securities meet investors’ needs; securitized assets, mortgages, asset-backed securities, collateralized debt obligations, credit risk, valuation, cost of capital; legal, tax, and regulatory issues; design and implementation of structured-financed products. Prerequisites: MBA:8180.

FIN:9290 Alternative Investments and Portfolio Strategies 3 s.h.
Continuation of FIN:9200; alternative investments, including hedge funds, private equity funds, and venture capital vehicles; purpose of alternative investments, including the risk/return profile of alternatives and correlations with traditional asset classes; specific hedge fund styles, strategies, risk profiles; portfolio strategy topics, including diversification benefits, management of downside risk, international diversification, behavioral finance, performance measures, and performance attribution analysis. Prerequisites: FIN:9200 and MBA:8180.

FIN:9300 Corporate Investment and Financing Decisions 3 s.h.
Underpinnings and optimization of corporations’ investment and financing decisions; firm-wide and project-specific cost of capital, optimal capital structure decisions; in-depth capital budgeting methods, including real options techniques; corporate investment module of the class includes simulation analysis using Crystal Ball; cost of capital, valuation techniques, advanced capital budgeting, capital structure and dividend policy, option pricing models applied to corporate finance. Prerequisites: MBA:8180.
FIN:9310 Corporate Financial Strategy 2-3 s.h.
Major strategic decisions within the corporate form; risk management, including why firms engage in it, their methods for doing so, and exercises in the simulation of uncertainty; dividends and repurchases under the payout policy decision; corporate governance topics, including executive compensation, board structure, and institutional monitoring; merger and acquisitions analysis, including regulation, valuation, anti-takeover devices, payment method, and LBOs; divestitures and other restructuring topics, including corporate diversification, spin-offs, carve-outs, private workouts, and Chapter 11. Prerequisites: MBA:8180.

FIN:9350 Wealth Management 2-3 s.h.
Rapid growth of the field of wealth management over several decades, driven by general increase in personal wealth and increased responsibility for individuals to manage their own wealth; knowledge and tools to enter the financial services industry; financial planning industry, client characteristics, tax shield structures, insurance, asset allocation plans, estate planning, behavioral finance. Prerequisites: MBA:8180.

FIN:9390 Putting Finance into Practice 3 s.h.
Hands-on practical experience in corporate finance or investments; work in teams on a corporate finance project or an investment project for a corporate or institutional client; partner companies identify financial issues, challenges, and opportunities for students to help solve; students work with the companies and a faculty member to provide an analysis of the situation and proposals of actions to be taken. Prerequisites: MBA:8180.
Finance, B.B.A.

**Requirements**

The Bachelor of Business Administration with a major in finance requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program provides a balance of theory, applications, and financial information technology that facilitates students' transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial market information technologies, students develop analytical abilities to interpret financial market data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

The program stresses learning by doing, partnership with industry, and internships, with the goal of enhancing students' career development. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

The major in finance requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration [p. 927] in the Catalog.

### Finance Common Required Courses

All of these:

- FIN:3020 Professional Finance Seminar 1
- FIN:3100 Financial Information Technology 2
- FIN:3200 Investment Management 3
- FIN:3300 Corporate Finance 3
- ACCT:3020 Financial Accounting and Reporting 3

### Finance Required Electives

A total of three courses chosen from the following two lists:

- FIN:3400 Principles of Risk Management and Insurance 3
- FIN:4020 Topics in Finance 3
- FIN:4210 Futures and Options 3
- FIN:4220 Fixed Income Securities 3
- FIN:4230 Real Estate Process 3
- FIN:4240 International Finance 3
- FIN:4250 Applied Equity Valuation 3
- FIN:4310 Advanced Corporate Finance 3
- FIN:4320 Commercial Banking 3
- FIN:4330 Investment Banking 3
- FIN:4340 Wealth Management 3
- FIN:4450 Risk Modeling 3

Students may include a maximum of one of these in their three electives:

- FIN:4410 Corporate and Financial Risk Management 3

1 BUS:3000 Business Communication and Protocol must be taken in the first semester after admission to the Tippie College of Business. Direct admits take BUS:3000 their second year.

2 Well-prepared students should consult with their advisor about an accelerated plan for the finance major.

3 Students with an interest in the Certificate in Risk Management and Insurance [p. 1002] should take FIN:3400 Principles of Risk Management and Insurance no later than the first semester of the third year for optimal scheduling.

### Career Advancement

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, and venture capital.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit What Can I Do with a Major in Finance.
Doctor of Philosophy

Graduate students in finance may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy [p. 939] (Tippie College of Business) in the Catalog and visit the Department of Finance website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.
Management and Organizations

Chair
• Amy L. Kristof-Brown

Undergraduate major: management (B.B.A.)
Graduate degree: management and organizations subprogram for the Ph.D. in business administration
Faculty: https://tippie.uiowa.edu/people?departments=Management%20and%20Organizations&category=75
Website: https://tippie.uiowa.edu/management-and-organizations

The Department of Management and Organizations offers study in managing human resources, teamwork and project management, law and ethics, leadership and personal development, negotiations, international business, and entrepreneurial management.

The department offers the undergraduate major in management and the subprogram in management and organizations that leads to the Ph.D. in business administration. Additionally, they participate in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog.

• Management and Organizations Subprogram for the Doctor of Philosophy [p. 970] in Business Administration

Courses

Management and Organizations Courses

MGMT:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MGMT:2000 Introduction to Law 3 s.h.
Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, and alternative dispute resolution. Requirements: sophomore standing.

MGMT:2100 Introduction to Management 3 s.h.
Principles of management, organizational structure, decision making, leadership, line-staff relationships, and administration of organizations; overview of the demands and challenges facing managers, behaviors of effective managers, management theory, personal effectiveness, decision making, team skills, and leadership skills. Requirements: sophomore standing.

MGMT:3050 Professional Preparation for Management 1 s.h.
Survey of career paths in the field of management through discussions with individuals working in human resources, management consulting, entrepreneurial endeavors, and more; hands-on activities for students to hone the skills required to succeed in today's workplace.

MGMT:3100 Entrepreneurial Strategy 3 s.h.
The synergistic effect of entrepreneurial attributes (e.g., innovation, creativity, opportunity recognition) and managerial attributes (e.g., strategic management, planning, budgeting) on profit and nonprofit organizations.

MGMT:3200 Individuals, Teams, and Organizations 3 s.h.
Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3300 Strategic Human Resource Management 3 s.h.
People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3400 Employment Law 3 s.h.
Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3450 International Business Environment 3 s.h.
Differences in international and domestic business; cultural, legal, political factors for managers. Requirements: junior or higher standing.

MGMT:3500 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MUSM:3500, NURS:3595, RELS:3700, SSW:3500.

MGMT:3600 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as NURS:3600, RELS:3701, SSW:3600.
MGMT:3900 Training and Developing Human Resources 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisites: MGMT:3200 and MGMT:3300 and MGMT:3400.

MGMT:4000 Topics in Management 1-3 s.h.
Topics not regularly offered in other courses. Prerequisites: MGMT:2100 and MGMT:2000.

MGMT:4050 Directed Readings in Management and Organizations arr.

MGMT:4100 Dynamics of Negotiations 3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: 90 s.h. completed.

MGMT:4200 Staffing and Talent Management 3 s.h.
Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning; staffing activities such as internal and external recruiting, selection. Prerequisites: MGMT:3300 and MGMT:3400 and MGMT:3200.

MGMT:4300 Leadership and Personal Development 3 s.h.
Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisites: MGMT:3200.

MGMT:4325 Team and Project Management 3 s.h.
Fundamentals of managing teams and group projects; emphasis on practical application, using case studies, and interactive and experiential exercises. Prerequisites: MGMT:3200 and MGMT:3300.

MGMT:4350 Performance Management and Strategic Rewards 3 s.h.
Role of pay and other rewards on organizational objectives; compensation's impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward; the role of performance management, pay, and other rewards on employee performance and organizational objectives is examined; includes performance appraisals, coaching, performance feedback, incentive systems, the mix of pay and benefits in compensation systems, and the legal environment regulating pay and benefits. Prerequisites: MGMT:3300 and MGMT:3200.

MGMT:4900 Academic Internship arr.
Professional internship experience with associated academic content.

MGMT:4999 Honors Thesis in Management and Organizations 3 s.h.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: admission to the Tippie College of Business honors program.

MGMT:7120 Methods for Field Research (Ph.D.) 2 s.h.
Field methods commonly used in behavioral research with emphasis on surveys; different types of field research designs; evaluation of advantages and disadvantages of different research approaches; practice generating research questions and hypotheses appropriate for field survey designs; issues related to levels of analysis; develop and administer surveys to maximize response rates; identify appropriate samples; brief introduction to statistical approaches for analyzing survey data.

MGMT:7124 Methods for Qualitative Research 2 s.h.
Qualitative methods available to researchers; role and contributions of qualitative methods in research; reasons why qualitative research papers get rejected by journals and strategies to avoid them; work with qualitative data; philosophy of science, formulating research questions, sampling and gaining access, alternative qualitative data collection methods, ways of coding and analyzing qualitative data, building theory from qualitative data.

MGMT:7128 Methods for Experimental Research 2 s.h.
Nature of research and principles of experimental design, including laboratory and field experiments (quasi-experiments), event sampling, and methods of small-group research; analysis of variance (ANOVA), analysis of covariance (ANCOVA), multi-attribute analysis of variance (MANOVA); orthogonal, planned and unplanned comparisons, factorial experiments including repeated measures, nested-factors design, Latin square designs; analysis of data sets with SPSS.

MGMT:7140 Meta-Analysis in Behavioral Social Sciences (Ph.D.) 3 s.h.
Methods for quantitative integration of findings in behavioral and social sciences; overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.

MGMT:7160 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.) 3 s.h.
Measurement and statistical methods needed for conduct of methodologically sound, publishable research; kinds and levels of measurement; role of measurement in theory development and cumulative research knowledge; theory of measurement error; types of reliability and their estimation; corrections for bias in research results due to measurement error; basic scaling methods; criterion-related, content, and construct validity; cross-validation and shrinkage formulas; factor analysis; statistical power in research studies; introduction to meta-analysis; item analysis and scale construction; structural equation modeling. Requirements: basic statistical methods course.

MGMT:7320 Organizational Theory Ph.D. 2 s.h.
Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power, conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.
MGMT:7323 Foundations of Organizational Theorizing  2-3 s.h.
Examination of the field of micro-organizational behavior (micro-OB); development of ability to evaluate and generate papers that make a theoretical contribution to the field; classic and contemporary research related to prevailing theories; students engage in weekly writing, including a series of theory building exercises and peer reviewing; objectives include supporting peers in generating new theoretical questions, models, and/or frameworks, and providing an overview of theoretical contributions in several important areas in organizational behavior.

MGMT:7325 Cross-Cultural and International Research in Organizational Behavior and Human Resources  2-3 s.h.
Overview of research trends and methodological challenges associated with international and cross-cultural research in human resources and organizational behavior; introduction to various typologies of societal cultural values (e.g., Hofstede, GLOBE, Schwartz); challenges and recommended practices for conducting research with cross-cultural or international samples; empirical research and trends in the cross-cultural organizational behavior discipline; empirical research and trends in the international human resources discipline.

MGMT:7330 Staffing Organizations (Ph.D.)  3 s.h.
Aspects of selection, including professional and legal standards; job analysis techniques, validation strategies; criterion development; selection methods (e.g., psychological tests, interviews, biographical data, assessment centers); ethical issues.

MGMT:7340 Group Processes (Ph.D.)  3 s.h.
In-depth understanding of how work groups and teams can be made more effective in organizations; team design issues (i.e., task type, interdependence, leadership, member composition); process issues including power, influence, communications, conflict, collective memory, and intergroup relations.

MGMT:7350 Leadership (Ph.D.)  3 s.h.
Understanding and preparation for implementing leadership in organizations; focus on reading and analysis of basic research-related leadership theories; contrast "great person" theories, traditional behavioral and situational theories, and transformational leadership theory.

MGMT:7360 Motivation and Attitudes (Ph.D.)  3 s.h.
Motivational processes, attitudes, communication and interorganizational networks; emphasis on motivational antecedents and consequences, theoretical implications for models of work performance.

MGMT:7370 Reward Systems (Ph.D.)  2 s.h.
Compensation systems, government influences, equity in compensation and individual wage determination; research-based examination of performance evaluation and appraisal, theories of work performance.

MGMT:7375 Performance Management  2 s.h.
Theories and research pertaining to employee work performance and evaluation; conceptual definitions of work performance; theories concerning the determinants of work performance; theory and research explaining the effectiveness and biases of performance evaluation systems; theories and empirical research on performance feedback; areas for future theoretical and empirical investigation in performance management.

MGMT:7380 Training and Development (Ph.D.)  2 s.h.
Research-based examination of training and development programs; emphasis on processes of needs assessment, instructional design, and evaluation; integration of training with other human resource management functions; design of management development initiatives.

MGMT:7385 Social and Human Capital  2 s.h.
Theory, research, and methods for understanding social capital as a resource available to individuals resulting from the social structure which they are located; readings focus on application of social networks to various content areas at individual, team, and organizational units of analysis; examination of relationships among social and human capital on individual and team outcomes; emphasis on understanding existing theory and empirical findings; social network research in terms of study design and analysis through software programs including UCINET and R.

MGMT:7700 Mentored Research  arr.
Management research conducted by doctoral students under faculty supervision; culminates in second-year research paper.

MGMT:7850 Seminar in Management  2-3 s.h.
Topics vary.

MGMT:7900 Contemporary Topics in Management and Organizations  arr.
Research topics in human resources and organizational behavior.

MGMT:7950 Directed Readings in Management and Organizations  arr.
Management research conducted by doctoral students under faculty supervision; culminates in dissertation.

MGMT:9091 Corporate Social Responsibility and Sustainability  3 s.h.
Introduction to main corporate social responsibility (CSR) and sustainability issues; current debates; costs and benefits of CSR/sustainability; relationship between leadership, innovation, and CSR; CSR's effects on companies' ability to attract and retain good employees; numerous cases studies ranging from small to large companies from various sectors including food and agriculture, manufacturing, finance, mining, energy, retail, transportation; students read and debate articles and case studies written by leading business experts, academics, and CEOs; individual or team work on a CSR change analysis.
MGMT:9092 Effective Managerial Communication 2-3 s.h.
Decisive personal and organizational skills for business leaders and entrepreneurs; at individual level, students will refresh writing, listening, speaking, and interpersonal skills for business settings; at the organizational level, course provides crucial managerial skills—how to conduct an effective meeting, questioning skills for employment selection, engaging in small talk, and communication during a crisis.

MGMT:9110 Dynamics of Negotiations 2-3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: M.B.A. enrollment.

MGMT:9120 Leadership and Personal Development 2-3 s.h.
Major theories; determinants of leader effectiveness, personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness.

MGMT:9130 Strategic Management of Change 3 s.h.
How congruence in organizational strategy, structure and culture, job design, and employee characteristics produces effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisites: MBA:8120.

MGMT:9150 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, LAW:8751, RELS:6070, SPST:6010, SSW:6247, URP:6278.

MGMT:9160 Nonprofit Organizational Effectiveness II 3 s.h.

MGMT:9170 Human Resource Management 3 s.h.
Systematic approach to managing human resources through practices consistent with validated theories and empirical research; human resources practices and business strategies; human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation.

MGMT:9150 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, LAW:8751, RELS:6070, SPST:6010, SSW:6247, URP:6278.

MGMT:9160 Nonprofit Organizational Effectiveness II 3 s.h.

MGMT:9170 Human Resource Management 3 s.h.
Systematic approach to managing human resources through practices consistent with validated theories and empirical research; human resources practices and business strategies; human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation.

MGMT:9200 Maximizing Team Performance 3 s.h.
Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

MGMT:9230 Managing and Preventing Conflict 3 s.h.
Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.
Management, B.B.A.

Requirements

The Bachelor of Business Administration with a major in management requires a minimum of 120 s.h., including 22 s.h. of work for the major. The program is designed to give students a thorough background in the department's study areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

All B.B.A. students majoring in management choose one of three tracks: entrepreneurial management, human resource management, or leadership and management. The entrepreneurial management track is intended for students who plan to start their own business or work in a small business. The human resource management track covers business and employment law and prepares students to pursue careers in human resources or to earn a degree in law. The leadership and management track focuses on practical skills; it is best suited for students considering consulting or management careers. Each track provides a solid background in general management principles in addition to a specialized focus.

The major in management requires the following course work.

For B.B.A. common requirements, see Bachelor of Business Administration [p. 927] in the Catalog.

B.B.A. by Distance Education

Students may earn the B.B.A. with a major in management (entrepreneurial management track) by distance education. The degree requires a minimum of 120 s.h. of credit. To be admitted to the program, individuals must have earned a minimum of 60 s.h. of college-level credit with a g.p.a. of at least 2.75, and they must have completed the following four prerequisite courses with a g.p.a. of at least 2.75: MATH:1380 Calculus and Matrix Algebra for Business, STAT:1030 Statistics for Business, ECON:1100 Principles of Microeconomics, and ACCT:2100 Introduction to Financial Accounting. Contact the Department of Management and Organizations [p. 964] and the Division of Continuing Education to learn more.

1 BUS:3000 Business Communication and Protocol must be taken in the first semester after admission to the Tippie College of Business or the second year for direct admits.

Career Advancement

Recent business graduates have found jobs in government agencies, nonprofit organizations, public policy groups, banking, employee relations, business consulting, transportation planning, education, and entrepreneurial endeavors.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment six months after graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more career information, visit What Can I Do with a Major in Management.
Doctor of Philosophy

Graduate students in management and organizations may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy [p. 939] in the Catalog and visit the Department of Management and Organizations [p. 964] website.

Applicants must meet the admission requirements of the Graduate college; see the Manual of Rules and Regulations of the Graduate College.
Management Sciences

Chair
• Nick Street

Undergraduate major: business analytics and information systems (B.B.A.)
Graduate degrees: M.S. in business analytics; management sciences subprogram for the Ph.D. in business administration
Graduate certificate: business analytics

Faculty: https://tippie.uiowa.edu/people?keywords=&department=174&category=75
Website: https://tippie.uiowa.edu/management-sciences

The Department of Management Sciences specializes in using advanced computation and mathematical techniques to solve critical business problems. Its strengths in research and instruction include operations management, business analytics, information systems, and quantitative methods.

The department offers the undergraduate major in business analytics and information systems, with tracks in business analytics and information systems. Off-campus offerings include the Master of Science in business analytics, a graduate Certificate in Business Analytics, and the subprogram in management sciences that leads to the Doctor of Philosophy in business administration. In addition, the department administers the Business Analytics Career Academy in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog.

Programs

Undergraduate Program of Study

Major
• Major in Business Analytics and Information Systems (Bachelor of Business Administration) [p. 975]

Graduate Programs of Study

Majors
• Master of Science in Business Analytics [p. 977]
• Management Sciences Subprogram for the Doctor of Philosophy [p. 978] in Business Administration

Certificate
• Certificate in Business Analytics [p. 979]

Courses

Management Sciences Courses

MSCI:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MSCI:1500 Business Computing Essentials 2 s.h.
Basic proficiency with common business application software (word processing, spreadsheet, presentation software, database); simulation training to achieve requisite skills; additional support available via optional textbook or ebook; online, modular, self-taught course.

MSCI:3000 Operations Management 3 s.h.
Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management, operations planning and scheduling, emerging technologies in production and service management. Prerequisites: STAT:2010 or STAT:3120 or STAT:3101 or STAT:2020 with a minimum grade of B or STAT:3510 with a minimum grade of B or BIOS:4120 or STAT:3100 or PSQF:4143 with a minimum grade of B or STAT:1030 or STAT:4110. Requirements: junior standing.

MSCI:3005 Information Systems 3 s.h.
Application of computing principles to solving business problems; information technology in modern organizations; focus on sound data analysis to support decision making; tools used for problem solving (spreadsheets, databases, web applications); role of information systems in organizations; components of information technology; Internet and network economy; basic data analysis and visualization; decision-making logic represented as algorithms; perform what-if analysis with data; emerging technologies. Prerequisites: MSCI:1500 or CS:1020.

MSCI:3020 Business Programming 3 s.h.
Introduction to algorithms, data structures, and object-oriented programming constructs to solve business problems. Prerequisites: MSCI:3005 or CS:2110.

MSCI:3025 VBA Spreadsheet Programming 3 s.h.
Introduction to programming Visual Basic for Applications in Excel to develop spreadsheet-based, decision-support systems. Prerequisites: MSCI:3005 or CS:2110.

MSCI:3030 Business Process Analysis 3 s.h.
Design, management, and improvement of business processes; data-driven approach to map a value stream and analyze industrial and service-oriented business processes to identify improvement opportunities; discrete-event simulation tools utilized to model business processes and demonstrate effect of variability on process performance metrics; role of information systems to increase an organization's efficiency; project management skills with particular emphasis on understanding issues involved in designing an information system to successfully support a business operation. Prerequisites: MSCI:3000.

MSCI:3070 Management Sciences Topics arr.
Special topics in management sciences and information systems.

MSCI:3100 Accounting Information Systems 3 s.h.
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations. Prerequisites: MSCI:3005 or CS:2110 and ACCT:2200 and ACCT:2100. Same as ACCT:3600.

MSCI:3200 Database Management 3 s.h.
Design and implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisites: CS:2110 or MSCI:3005.

MSCI:3250 Analyzing Data for Business Intelligence 3 s.h.
Introduction to methods and tools of processing, manipulating, analyzing, and visualizing data for descriptive analytics and insights that can aid business decision making. Prerequisites: MSCI:3200.
MSCI:3300 Software Design and Development 3 s.h.  
Design and implementation of an information system; emphasis on programming and stages of software design life cycle, implemented using UML. Corequisites: MSCI:3020, MSCI:3030, and MSCI:3200; if not taken as prerequisites.

MSCI:3400 Data Communications 3 s.h.  
Computer communications: computer-communication system, hardware, data transmission principles; examples of existing communication networks; related managerial issues. Prerequisites: MSCI:3005 or CS:2110.

MSCI:3500 Data Mining 3 s.h.  
Introduction to predictive analytics methods motivated by problems in operations, marketing, finance and accounting; data and text mining techniques, including classification, clustering, and association analysis. Prerequisites: STAT:2020 with a minimum grade of B or ECON:2800 or ECON:4800.

MSCI:3800 Optimization and Simulation Modeling 3 s.h.  
How to leverage data and apply spreadsheet optimization software and Monte Carlo simulation to form optimal decision policies. Prerequisites: STAT:2010 or ECON:4800 or ECON:2800 or STAT:2020 with a minimum grade of B.

MSCI:3920 Supply Chain Management 3 s.h.  
Key issues in design and management of global supply chains; issues in integration of business processes across organizations that are concerned with movement of goods, delivery of services, and information flow along the supply chain in order to create value for the customer; issues in coordinating production and logistics within a firm and with outside suppliers and customers in the supply chain. Prerequisites: MSCI:3000.

MSCI:4020 Android Development 3 s.h.  
Building mobile applications for the Google Android platform; topics include history and architecture of the Android operating system, Android SDK Tools and best practices; creating Android applications using the Java programming language, and packaging the applications for deployment in the Android marketplace. Prerequisites: MSCI:3020 or CS:3210 or CS:1210 or CS:2110.

MSCI:4050 Directed Readings arr.  
MSCI:4220 Database Management and Web Services 3 s.h.  
Advanced database management topics and basics of web services; how to retrieve real-world data from web services; use of SQL and PL/SQL to analyze data in relational databases. Prerequisites: MSCI:3200.

MSCI:4250 BAIS Capstone Project 3 s.h.  
Individual or team senior project incorporating track-specific knowledge and skills from BAIS curriculum; projects from real-world customer, (e.g., software system, network design/implementation or data/process analysis); outcomes include written documentation, presentation, project report. Prerequisites: MSCI:3030 and (MSCI:3500 or MSCI:3300) and MSCI:3200. Requirements: 90 s.h. completed.

MSCI:4280 Data Security 3 s.h.  
Introduction to network management; emphasis on cost effective, reliable, and secure configuration and management of network switches, routers, clients, servers, and users in local and wide area network architectures; basic router and switch configuration options, routing protocols, VLANs, switch loop avoidance, access control lists, network access control mechanisms, encryption; Public Key Infrastructure and network user security; hands-on activities with routers and switches, Cisco networking simulators, and virtual machines using IPv4 and IPv6 protocols. Prerequisites: MSCI:3400.

MSCI:4480 Knowledge Discovery 3 s.h.  
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as CS:4480.

MSCI:4900 Academic Internship arr.  
MSCI:4999 Honors Thesis in Management Sciences 3 s.h.  
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: admission to the Tippie College of Business honors program.

MSCI:6060 Data Programming in R 3 s.h.  
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; variables and data types, control structures, functions and subroutines, arrays and other simple data structures.

MSCI:6070 Data Science 3 s.h.  
Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MSCI:9100 or MBA:8150.

MSCI:6100 Text Analytics 3 s.h.  
Concepts and techniques of text mining; practice of using statistical tools to automatically extract meaning and patterns from collections of text documents; topics include document representation, text classification and clustering, sentiment analysis and topic modeling. Prerequisites: (MSCI:9100 or MBA:8150) and MSCI:9110 and (MSCI:9060 or MSCI:6060).

MSCI:6110 Big Data Management and Analytics 3 s.h.  
Introduction to advanced techniques for managing and analyzing "big" data; non-relational data models, such as semi-structured (e.g., XML) and unstructured (e.g., key-value) data; state-of-the-art big data tools for non-relational data management, such as NoSQL databases and distributed databases (e.g., Hadoop); query languages such as Hive; design and implementation of data analysis methods on these platforms; through exercises and course projects, students will be trained to use the tools introduced to implement analysis tasks on big data sets. Prerequisites: MSCI:9230.
MSCI:6120 Analytics Experience 3 s.h.
Working in groups to complete semester-long projects pertaining to business analytics; all project stages will be addressed, including problem definition, data cleaning, analysis, and final presentation; appropriate tools from required courses will be used throughout. Requirements: all CER courses and at least one master’s course.

MSCI:6130 Applied Optimization 3 s.h.
Use of optimization (also called prescriptive analytics or mathematical programming) to make tactical and strategic decisions; advanced optimization skills including data collection and preparation, logical modeling, and solution interpretation and implementation within a software environment; applications in the various functional areas of business are discussed throughout. Prerequisites: (MSCI:9100 or MBA:8150) and MSCI:9110 and (MSCI:9060 or MSCI:6060).

MSCI:6140 Information Visualization 3 s.h.
Instruments for reasoning about quantitative information; analyzing and communicating statistical information; main typologies of data graphics (data-maps, time-series, spacetime narrative, relational diagrams, graphs and methods for dimensionality reduction); language for discussing data visualizations combined with knowledge of human perception of visual objects; how to visualize information effectively by using statistical methods, knowledge of human perception, and basics of data graphics. Prerequisites: MSCI:6060 and MSCI:9100.

MSCI:6300 Dynamic Programming 3 s.h.
Fundamentals of discrete sequential dynamic programming with special focus on situations in which outcomes are uncertain; formulation and analysis of deterministic and stochastic dynamic programs under several objective criteria; emphasis on rapidly expanding field of approximate dynamic programming; applications including inventory control, vehicle routing, and resource allocation.

MSCI:6600 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as IE:6600.

MSCI:6700 Discrete Optimization 3 s.h.
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: MSCI:6600.

MSCI:6800 Web Mining 3 s.h.
Techniques for mining the web and other unstructured or semistructured, hypertextual, distributed information repositories; crawling, indexing, ranking, filtering algorithms.

MSCI:6900 Heuristic Search 3 s.h.
Design of heuristic search algorithms to find good (near-optimal) solutions to difficult (NP-hard) optimization problems that occur in many disciplines; basic heuristic concepts (local search, greedy search, problem decomposition) which serve as fundamental constructs for metaheuristics, including simulated annealing, genetic algorithms, tabu search, variable neighborhood search; introduction to various optimization problems and survey of various heuristic approaches; underlying theoretical structure of several heuristic methods; how to implement a heuristic algorithm.

MSCI:7000 Management Sciences Topics 3 s.h.
MSCI:7850 Research Seminar in Management Sciences 1 s.h.
Current research topics. Requirements: Ph.D. enrollment.

MSCI:7900 Special Topics in Management Sciences arr.
MSCI:7950 Directed Readings arr.
MSCI:7975 Thesis in Management Sciences arr.
Requirements: Ph.D. enrollment.

MSCI:9060 Data Programming in R 2 s.h.
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; includes topics such as variables and data types, control structures, functions and subroutines, arrays and other simple data structures. Prerequisites: MBA:8150 or MSCI:9100.

MSCI:9070 Data Science 2 s.h.
Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MBA:8150 or MSCI:9100.

MSCI:9080 Business Analytics in Practice 3 s.h.
Application of theory from classroom to real world context through an experiential learning project; company-sponsored project applying analytics to solve problems in a variety of contacts; including supply chain and operations, marketing, finance, or health care. Prerequisites: MSCI:9230 and MSCI:9060 and MSCI:9070.

MSCI:9100 Business Analytics 3 s.h.
Introduction to analytical techniques for making business decisions; utilizing Excel for application of descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

MSCI:9110 Advanced Analytics 2-3 s.h.
Development of data-driven, problem-solving skills for prediction of uncertain outcomes and prescription of business solutions; linear and nonlinear regression, Monte Carlo simulation, forecasting, data mining, and optimization utilizing spreadsheets and dedicated software packages. Prerequisites: MSCI:9100 or MBA:8150.

MSCI:9120 Managing the Supply Chain 2-3 s.h.
Design, operation, and management of a supply chain; supplier and customer partnerships, supply base management, transportation and logistics, supply chain innovation, supply chain sustainability; supply chain risk management and performance metrics. Prerequisites: MBA:8190 or MBA:8240.

MSCI:9130 Lean Process Improvement 3 s.h.
Lean principles across the enterprise; real-world applications and case studies in manufacturing and service sectors. Prerequisites: MBA:8190 or MBA:8240.
MSCI:9135 Strategy Deployment and Lean Enterprise 3 s.h.
How organizations transform themselves into Lean enterprises that maximize customer value through the elimination of waste; focus on how manufacturing and service organizations successfully align their process improvement efforts to strategic goals of the organization (policy deployment); A3 thinking, strategic planning, balanced scorecard, Lean supply chain, employee engagement, and cultural transformation. Prerequisites: MBA:8190 or MBA:8240.

MSCI:9140 Rapid Continuous Improvement 3 s.h.
Hands-on experience working on rapid continuous improvement (RCI) teams sponsored by industrial affiliates of the business college involved in using RCI. Offered spring break.

MSCI:9160 Supply Chain Analytics 2-3 s.h.
Supply chain analytics applications for decision making, including demand forecasting, inventory management, capacity planning, and supply chain coordination. Prerequisites: MSCI:9180.

MSCI:9180 Statistical Methods for Process Improvement 3 s.h.
Strategies to improve quality of products, effectiveness of processes; managerial issues, statistical methods, quality, customer needs, customer satisfaction, quality measures and standards; understanding and reducing variability; builds on MBA:8150; data-based management, statistical process control, control charts, capability indexes, design of experiments. Prerequisites: MBA:8150.

MSCI:9185 Project Management 2-3 s.h.
Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

MSCI:9190 Advanced Project Management 3 s.h.
Expands on the study of project management by examining why 70 percent of all projects fail to meet established requirements and what project managers can do to ensure success; elements of the Project Management Institute's Guide to the Project Management Body of Knowledge are reviewed including the 47 key processes; concepts are presented for improving project outcomes, including thinking well through creative and innovative methods, developing an organizational environment for successful projects, and using alternative methodologies such as Agile. Prerequisites: MSCI:9185.

MSCI:9200 Business Programming 3 s.h.
Introduction to algorithms, data structures, and object-oriented programming constructs to solve business problems. Corequisites: MSCI:3005.

MSCI:9210 Introduction to Modeling with VBA 2-3 s.h.
Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting.

MSCI:9220 Introduction to Information Systems 3 s.h.
Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

MSCI:9230 Database Systems 2-3 s.h.
Theories and methodologies for semantic, logical, and physical database design; entity/relationship diagrams and their mapping to database schemas; normalization; languages for relational database systems, including relational algebra, Structured Query Language, query by example; query optimization and index selection; database and view creation, query and update processing; form and report design; practice with commercial DBMS products; integrity, security, concurrency control, transaction recovery.
# Business Analytics and Information Systems, B.B.A.

## Requirements

The Bachelor of Business Administration with a major in business analytics and information systems requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program provides a variety of educational experiences that develop students' knowledge of managerial decision-making systems. Students acquire skill in applying this knowledge by constructing quantitative models, using computer technology, and creating database systems.

All B.B.A. students majoring in business analytics and information systems choose one of two tracks: business analytics or information systems.

The major in business analytics and information systems requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration [p. 927] in the Catalog.

### Major Common Required Courses

Students in both tracks must complete these three courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3030</td>
<td>Business Process Analysis</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3200</td>
<td>Database Management</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:4250</td>
<td>BAIS Capstone Project</td>
<td>3</td>
</tr>
</tbody>
</table>

### Required Track Courses

Students complete the requirements from one of the two tracks below.

#### Business Analytics Track

Students in the business analytics track complete all of these.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3250</td>
<td>Analyzing Data for Business Intelligence</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3500</td>
<td>Data Mining</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3800</td>
<td>Optimization and Simulation Modeling</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Information Systems Track

Students in the information systems track complete all of these.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3020</td>
<td>Business Programming</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3300</td>
<td>Software Design and Development</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3400</td>
<td>Data Communications</td>
<td>3</td>
</tr>
</tbody>
</table>

### Electives (Both Tracks)

All students complete at least 3 s.h. from these.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3025</td>
<td>VBA Spreadsheet Programming</td>
<td>3</td>
</tr>
</tbody>
</table>

### Academic Plans

#### Sample Plan of Study

**Business Analytics and Information Systems (B.B.A.)**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3100</td>
<td>Accounting Information Systems</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:3920</td>
<td>Supply Chain Management</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:4220</td>
<td>Database Management and Web Services</td>
<td>3</td>
</tr>
<tr>
<td>MSCI:4280</td>
<td>Data Security</td>
<td>3</td>
</tr>
<tr>
<td>CS:1210</td>
<td>Computer Science I: Fundamentals</td>
<td>4</td>
</tr>
<tr>
<td>ECON:3355</td>
<td>Economic and Business Forecasting</td>
<td>3</td>
</tr>
</tbody>
</table>

Any computer science course for which CS:1210 is a prerequisite.

Any course required for the nonselected track.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSCI:3025</td>
<td>VBA Spreadsheet Programming</td>
<td>3</td>
</tr>
<tr>

BUS:3000 Business Communication and Protocol must be taken in the first semester after admission to the Tippie College of Business. Direct admits take BUS:3000 their second year.

**Career Advancement**

The business analytics and information systems major prepares students for careers in data mining, supply chain management, and the design and management of information technology. The major prepares students for career opportunities in both manufacturing and service organizations. Graduates find entry-level work as computer programmers, systems analysts, sales representatives with computer companies, and management trainees. Entry-level work in operations management is found in materials management, line supervision, purchasing, and manufacturing systems.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit What Can I Do with a Major in Business Analytics and Information Systems.
Business Analytics, M.S.

The digital revolution empowered by the Internet and computer technology in business and individual life during the last several decades has generated unimaginable amounts of data in the form of digital records stored in databases and file servers. The volume, velocity, and variety of these data have produced a new set of problems and challenges for businesses and organizations in their pursuit of competitiveness, effectiveness, and efficiency. These problems and challenges also have created unprecedented opportunities for businesses and organizations to discover, model, understand, and serve their customers and partners in ways never imagined and to supply details never possible before. Businesses and organizations that are able to master this volume of data will have a tremendous competitive advantage over their competition in the marketplace.

As the need for implementing data analytic solutions grows, demand for professionals who understand and are capable of working with and exploring this data has exploded in recent years. This program addresses the growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making.

Requirements

The Master of Science program in business analytics requires a minimum of 30 s.h. of graduate credit, of which 24 s.h. must be unique to the M.S. degree. The 24 s.h. can include 15 s.h. earned toward the Certificate in Business Analytics; the program is designed so that students can move into the M.S. program upon completion of the certificate. No thesis is required. A cumulative g.p.a. of at least 2.75 is required in all course work.

Students may be allowed to apply up to 6 s.h. of course work from another institution toward the M.S. with approval by petition to the director of the master's program.

The following course work is required.

<table>
<thead>
<tr>

Core Courses

All of these:
- MSCI:6060 Data Programming in R 3
- MSCI:6070 Data Science 3
- MSCI:9100 Business Analytics 3
- MSCI:9110 Advanced Analytics 3
- MSCI:9230 Database Systems 3

Experience Course/Project

The experience course consists of a group project that solves a semester-long business problem.

Experience course/project 3

Electives

Elective course work allows students to deepen or broaden their skills. Students select 12 s.h. from the following.

| MSCI:6100 Text Analytics | 3 |

Admission

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College.
Doctor of Philosophy

Graduate students in management sciences may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy [p. 939] in the Catalog and visit the Department of Management Sciences website.
Business Analytics, Graduate Certificate

Analytics—broadly defined as the scientific process of transforming data into insight for making better decisions—plays an increasingly critical role in business. Companies must be able to access and analyze this data intelligently. As the recognition of analytics has grown, so has the demand for analytics education.

The focus on business analytics entails a specific approach targeting the core business disciplines of business, including operations, information technology, finance, marketing, accounting, and human resources, among others.

The graduate certificate program is open to students who have earned an undergraduate degree. A minimum undergraduate or graduate g.p.a. of 2.50 is required for admission.

The Certificate in Business Analytics requires 15 s.h. of graduate credit, of which 9 s.h. must be unique to the certificate and cannot be counted toward the student’s major. Students may be allowed to apply up to 6 s.h. of course work from another institution toward the certificate with approval by petition to the director of the certificate program.

A cumulative g.p.a. of at least 2.75 is required in order to complete the certificate. All courses are offered off-campus.

The Certificate in Business Analytics requires the following course work.

Marketing

Chair
• Catherine A. Cole

Undergraduate major: marketing (B.B.A.)

Graduate degree: marketing subprogram for the Ph.D. in business administration

Faculty: https://tippie.uiowa.edu/people?departments=Marketing&category=75

Website: https://tippie.uiowa.edu/marketing

The study of marketing concerns itself with all activities related to the marketing and distribution of goods and services, from producers to consumers. The goal of the department is to make strong contributions to marketing practice and marketing theory with innovative teaching, cutting-edge research, and active community outreach.

The marketing curriculum provides a broad foundation in marketing concepts along with opportunities to specialize in areas of vocational interests. The department utilizes multiple teaching methods, including experiential learning, research experiences, case analyses, online and face-to-face classroom training to prepare students to solve a variety of marketing problems that arise in our increasingly complex global economy.

The Department of Marketing offers the undergraduate major in marketing and the subprogram in marketing that leads to the Ph.D. in business administration. Additionally, the department participates in the M.B.A. program, which is offered by the Tippie School of Management; see Master of Business Administration Program [p. 987] in the Catalog.

Related Certificate: Event Planning

The Department of Marketing (Tippie College of Business), the Departments of Communication Studies and Health and Human Physiology, and the School of Journalism and Mass Communication (College of Liberal Arts and Sciences) collaborate to offer the undergraduate Certificate in Event Planning. Students who earn the certificate will know and be able to demonstrate the basic principles of organizing a successful event. They will gain a robust understanding of the diverse field of event planning and careers in the event planning industry. For information about the certificate, see Event Planning [p. 402] in the Catalog.

Programs

Undergraduate Program of Study

Major
• Major in Marketing (Bachelor of Business Administration) [p. 984]

Graduate Program of Study

Major
• Marketing Subprogram for the Doctor of Philosophy [p. 986] in Business Administration

Courses

Marketing Courses

MKTG:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MKTG:3000 Introduction to Marketing Strategy 3 s.h.
Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems. Prerequisites: ECON:1100. Requirements: junior standing.

MKTG:3050 Professional Preparation in Marketing Management 2 s.h.
Overview of alternative marketing careers and the required skills and personal characteristics that drives success in these fields; hard and soft skills required in major types of marketing careers; developing a professional brand identity and a strategy for finding marketing internships and permanent employment opportunities; marketing's relationship to other business and organizational functions and to the external environment. Corequisites: MKTG:3050.

MKTG:3051 Career Preparation for Marketing Management 1 s.h.
Finding and successfully competing for career opportunities in marketing management; includes online exercises, interactions with marketing executives, and participation in one of the national organizations representing marketing management professionals. Prerequisites: MKTG:3000 and MKTG:3050.

MKTG:3052 Career Preparation for Retailing 1 s.h.
Finding and successfully competing for career opportunities in retailing; online exercises, interactions with retailing executives, and participation in one of the national organizations representing retailing professionals. Prerequisites: MKTG:3050 and MKTG:3000.

MKTG:3053 Career Preparation for Professional Sales 1 s.h.
Finding and successfully competing for career opportunities in professional sales; online exercises, interactions with sales executives, and participation in one of the national organizations representing sales professionals. Prerequisites: MKTG:3050 and MKTG:3000.

MKTG:3054 Career Preparation for Market Analytics 1 s.h.
Finding and successfully competing for career opportunities in market analytics; online exercises, interactions with market research executives, and participation in one of the national organizations representing market research professionals. Prerequisites: MKTG:3050 and MKTG:3000.

MKTG:3100 Marketing Research 3 s.h.
Marketing, research methods; role of marketing research information as a tool in management decision making. Prerequisites: MKTG:3000 and (ECON:2800 or STAT:2020 with a minimum grade of B or ECON:4800 or STAT:4101).
MKTG:3101 Marketing Metrics 3 s.h.
Identifying and measuring key metrics that are the focus for marketing plans and the backbone for evaluating marketing performance (e.g., penetration, share of requirements, customer satisfaction, churn rates, click-through rates, and customer lifetime value); relationship between conceptual models of business-to-business and business-to-consumer behaviors and the selection of appropriate metrics; emphasis on use of metrics as basic inputs for goal setting, marketing decision making, and evaluation. Prerequisites: MKTG:3100 and MKTG:3000.

MKTG:3102 Marketing Analytics 3 s.h.
Marketing science models used in strategic and tactical marketing decisions; application of consumer behavior in the development of quantitative models that inform marketing mix decisions (advertising, pricing, and salesforce effort), new product development, product line management, and category management; topics may include product mapping, latent class (segmentation) analysis, conjoint analysis, choice modeling (binary and multinomial logic), diffusion models (word-of-mouth), decision-calculus (“models and manager” technology), churn analysis and web analytics. Prerequisites: MKTG:3000 and MKTG:3100.

MKTG:3103 Advanced Marketing Research 3 s.h.
Traditional and nontraditional research techniques to address business problems that have a relationship to basic research; primary focus on hands-on experience and peer-based learning. Prerequisites: MKTG:3000.

MKTG:3200 Consumer Behavior 3 s.h.
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisites: MKTG:3000.

MKTG:3300 Web Business Strategy 3 s.h.
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisites: MKTG:3000.

MKTG:3400 Retail Strategies 3 s.h.
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service; merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisites: MKTG:3000.

MKTG:3401 Merchandise Management 3 s.h.
Merchandise and service mix strategies for alternative retail concepts, including various store and online formats; topics include national brands versus private label, multi-channel distribution, logistics, replenishment strategies, pricing, promotion, product assortment, store layout, and point-of-sale and in-store merchandising. Prerequisites: MKTG:3000.

MKTG:3500 Direct Marketing Strategies 3 s.h.
Principles and processes of direct and database marketing; insight into the requirements for building a customer-based marketing strategy. Prerequisites: MKTG:3000.

MKTG:3700 Marketing Institute Seminar I 2 s.h.
Soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures. Prerequisites: MKTG:3000. Requirements: admission to the Marketing Institute.

MKTG:3701 Marketing Institute Field Studies 2 s.h.
Plan, design, carry out, and report on a marketing research project for a profit or nonprofit client organization; communicate with managers, apply knowledge of marketing research, meet deadlines, and convert research findings into actionable recommendations for management. Prerequisites: MKTG:3700 and MKTG:3000. Requirements: admission to the Marketing Institute.

MKTG:3702 Marketing Institute Seminar II 2 s.h.
Development of soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures; mentor students in marketing institute seminar. Prerequisites: MKTG:3000 and MKTG:3701 and MKTG:3700. Requirements: admission to the Marketing Institute.

MKTG:4000 Contemporary Topics in Marketing 3 s.h.
Topics not regularly offered in other courses. Prerequisites: MKTG:3000.

MKTG:4050 Directed Readings in Marketing arr.

MKTG:4100 Advertising Theory 3 s.h.
Advertising as a promotional force; emphasis on theory, planning, resulting strategic and tactical decisions made by advertising executives. Prerequisites: MKTG:3000.

MKTG:4101 Integrated Marketing Communications 3 s.h.
Making marketing communication decisions and understanding how marketing communications work; planning and evaluation of marketing communications; theories, models, and tools to make better marketing communication decisions; course uses an Integrated Marketing Communications perspective, which involves understanding the role of the different promotional mix elements and coordinating them to develop effective marketing communication programs. Prerequisites: MKTG:3000.

MKTG:4200 Sales Management 3 s.h.
Personal selling, management of sales force; emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisites: MKTG:3000.

MKTG:4201 Professional Selling 3 s.h.
Personal selling function in overall business strategy and professional selling process that underlies successful sales careers; emphasis on hands-on experiences in developing practical skills in sales strategy, analytics, and communications skills; students develop and make sales presentations, engage in role-playing exercises, and complete applied selling exercises as individuals or in sales teams; focus is on professional selling in a business environment, but students will also apply course concepts in other interpersonal business communications settings. Prerequisites: MKTG:3000.

MKTG:4250 Marketing and Sustainability 3 s.h.
Concepts for developing and implementing sustainable marketing strategies; developing more environmentally friendly products, more sustainable logistical systems, socially responsible pricing, and promoting sustainable products in a socially responsible way. Prerequisites: MKTG:3000.

MKTG:4275 Social Media Marketing 3 s.h.
Fundamentals of social media in a marketing context; establishing clear organizational goals, developing appropriate marketing strategies, and determining key campaign logistics (who, when, where); guest speakers and hands-on projects involving social media. Prerequisites: MKTG:3000.
**MKTG:4300 International Marketing** 3 s.h. Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisites: MKTG:3000.

**MKTG:4500 Marketing Management** 3 s.h. Marketing problems of organizations; emphasis on marketing manager’s role in developing, presenting goal-oriented marketing strategies; application of marketing concepts to real business situations. Prerequisites: MKTG:3000 and MKTG:3050 and MKTG:3100 and MKTG:3200 and (MKTG:3300 or MKTG:3101 or MKTG:3102 or MKTG:3103 or MKTG:3400 or MKTG:3401 or MKTG:3701 or MKTG:4000 or MKTG:4101 or MKTG:4200 or MKTG:4201 or MKTG:4250 or MKTG:4275 or MKTG:4300 or MKTG:4800). Requirements: completion of 90 s.h.

**MKTG:4800 Field Studies in Marketing** 3 s.h. Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: MKTG:3000 and MKTG:3100.

**MKTG:4900 Academic Internship** arr. Professional internship experience with associated academic content.

**MKTG:4999 Honors Thesis in Marketing** 3 s.h. Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Requirements: admission to the Tippie College of Business honors program.

**MKTG:7800 Seminar in Consumer Behavior-Ph.D.** 3 s.h. Key facets of consumer behavior—information processing, perception, memory, learning, attitude formation, attitude change, decision making, emotion; behavioral research methods.

**MKTG:7850 Seminar in Marketing Models-Ph.D.** 3 s.h. Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project.

**MKTG:7900 Seminar in Research Topics-Ph.D.** arr. Individual research topics.

**MKTG:7950 Directed Readings in Marketing-Ph.D.** arr.

**MKTG:7975 Thesis in Marketing** arr.

**MKTG:9000 Directed Readings in Marketing** arr.

**MKTG:9010 Contemporary Topics in Marketing** 1-3 s.h. Topics not regularly offered in other courses. Prerequisites: MBA:8110 and MBA:8150.

**MKTG:9015 Social Media Marketing for Business** 3 s.h. Fundamentals of social media marketing; establishing clear organizational goals for engaging in social media to market a product or service, developing solid strategies for implementation, and determining other key campaign logistics. Prerequisites: MBA:8110.

**MKTG:9110 Category Management** 3 s.h. Marketing strategy related to manufacturing product line interactions, retailer product assortment, consumer response; category definition, product line pricing and branding, cross-category promotions, channel coordination, efficient consumer response, loyalty programs, database marketing. Prerequisites: MBA:8110.

**MKTG:9120 Customer Relationship Management** 3 s.h. Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying “high potential” customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisites: MBA:8110.

**MKTG:9130 Product Management** 3 s.h. Techniques of new product development; idea generation, concept screening, product design, market testing, forecasting, brand management strategies within the firm. Prerequisites: MBA:8110 and MBA:8150.

**MKTG:9150 Brand Management** 3 s.h. Strategies for building, leveraging, and defending brands; principles of consumer behavior, how they relate to building brand identity and equity; branding of consumer goods and services. Prerequisites: MBA:8110.

**MKTG:9160 Service Marketing** 3 s.h. Production, consumption, and marketing of services; solutions to problems faced by service managers; development of an organizational marketing system for delivery of quality service. Prerequisites: MBA:8110.

**MKTG:9165 Digital Marketing Strategies and Analytics** 3 s.h. Comprehensive look at how companies use digital marketing and analytics to create value for their customers; overview of current analytic tools and technologies used in digital marketing; introduction to JMP, state-of-the-art and visually stunning software; strategic applications of marketing analytics; applications using cases from B2C, B2B, and services marketing contexts. Prerequisites: MBA:8150 and MBA:8110.

**MKTG:9170 Business to Business Marketing** 3 s.h. Industrial buyer behavior, buyer-seller relationships, interactive product policy and market segmentation, distribution and selling systems; skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisites: MBA:8110.

**MKTG:9190 International Marketing** 3 s.h. Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisites: MBA:8110.

Marketing, B.B.A.

Requirements

The Bachelor of Business Administration with a major in marketing requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program is designed to provide undergraduate students with an understanding of the business, social, and economic roles of marketing and to prepare them for marketing careers.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

All students complete the common required courses and select one of the four marketing tracks: marketing management, retail management, professional sales and management, and marketing analytics.

The major in marketing requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration [p. 927] in the Catalog.

---

1 BUS:3000 Business Communication and Protocol must be taken in the first semester after admission to the Tippie College of Business. Direct admits take BUS:3000 their second year.

2 MKTG:4500 Marketing Management must be taken at Iowa. Students should pay close attention to the prerequisites: MKTG:3100 Marketing Research, MKTG:3200 Consumer Behavior, one additional MKTG course numbered above MKTG:3100, and 90 s.h. earned.

### Career Advancement

The Bachelor of Business Administration (BBA) program in marketing prepares students for positions in sales, market research, retailing, purchasing, or advertising. Employment opportunities exist for positions as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, consultants, and sales representatives in a variety of for-profit and nonprofit organizations.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit What Can I Do with a Major in Marketing.
Doctor of Philosophy

Graduate students in marketing may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see Doctor of Philosophy [p. 939] in the Catalog and visit the Department of Marketing website.

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College.
Master of Business Administration Program

**Associate Dean**
- David W. Frasier

**Assistant Deans**
- David Deyak, Colleen Downie, Dawn Kluber

**Professional degree:** M.B.A.
**Professional certificates:** business fundamentals; finance; leadership; marketing
**Professional minors:** business analytics; finance; marketing

**Faculty:** https://tippie.uiowa.edu/people?departments=MBA
**Website:** https://tippie.uiowa.edu/future-graduate-students/mba-programs

The Master of Business Administration (M.B.A.) program provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB International—the Association to Advance Collegiate Schools of Business, enables students to build broad-based professional portfolios of analytical skills, knowledge, leadership, and applied experiences. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is typically required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

Students in Iowa's M.B.A. programs come from every region of the United States and from countries worldwide. They represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is typically required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

The Departments of Accounting, Economics, Finance, Management and Organizations, Management Sciences, and Marketing all contribute to the Master of Business Administration program through faculty participation and course work.

- Certificate in Finance [p. 998]
- Certificate in Leadership [p. 999]
- Certificate in Marketing [p. 1000]

### Courses

See course lists in the individual Tippie College of Business departmental sections of the Catalog for descriptions of M.B.A. electives.

#### School of Management (M.B.A. Program) Courses

**MBA:8000 Directed Readings-M.B.A.** 1-3 s.h.
**MBA:8010 M.B.A. IMPACT** 0 s.h.
Introduction to the Tippie M.B.A. program and its culture; activities accentuate themes of involvement, motivation, professionalism, achievement, and challenge; week-long immersion in collaborative team-building experiences.

**MBA:8100 Business Acumen and Career Development** 1-2 s.h.
Career service tools to effectively market self to employers and succeed in chosen career path, communicate personal brand and vision, succeed in job search process, demonstrate professionalism in various business venues, and grow a personal sphere of influence; academy experience to build depth within chosen career field/academic track through course work and outside-of-class academy activities, academic concepts applied to business world, and exposure to relevant information important to student's major that does not clearly fit into academic course work.

**MBA:8110 Marketing Management** 2-3 s.h.
Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs.

**MBA:8120 Management in Organizations** 2-3 s.h.
How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change.

**MBA:8130 Corporate Communications** 2 s.h.
Effective communication to become a successful business professional and leader; strengthen ability to speak and write confidently, competently, and effectively, regardless of venue; varied team and individual presentation coaching, applied exercises.

**MBA:8140 Corporate Financial Reporting** 2-3 s.h.
Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings.

**MBA:8150 Business Analytics** 2-3 s.h.
Introduction to analytical techniques for making business decisions; utilizing Excel to apply descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

**MBA:8160 Managerial Economics** 1-3 s.h.
Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions.
MBA:8170 International Economic Environment of the Firm 2-3 s.h.
Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies.

MBA:8180 Managerial Finance 2-3 s.h.
Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital calculation, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Requirements: MBA:8140 or an undergraduate-level course in financial accounting or finance.

MBA:8190 Operations Management 2-3 s.h.
Planning and decision-making activities for managing an organization's operations; trade-offs associated with operations management decisions, tools and techniques for helping operations managers implement decisions and reach goals; production and service delivery strategy, capacity planning, product and process design, total quality management, demand management, production and service planning, scheduling, materials control, emerging production and service technologies. Prerequisites: MBA:8150.

MBA:8200 Strategic Business Consulting 1-6 s.h.
Plan, schedule, and deliver strategic consulting services to commercial enterprises; project definition, preparation and presentation of deliverables, client relationship management.

MBA:8210 Global Business Strategy 3 s.h.
Strategic frameworks and skills critical for success in the global marketplace; content of an economic environment; cultural, ethical, and legal issues in the conduct of international business; how companies enter foreign markets and grow international subsidiaries, succeed in mergers and acquisitions, cooperate in joint ventures and strategic alliances.

MBA:8220 Ethics and the Law 1-2 s.h.
Legal and ethical issues surrounding startup and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution.

MBA:8230 Introduction to Leadership 1-2 s.h.
Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

MBA:8240 Operations and Supply Chain 2-3 s.h.
Planning and decision-making activities for managing an organization's operations in both manufacturing and services, with an emphasis on production and service delivery strategy, process design, capacity planning, process analytics, queuing, and an introduction to supply chain management including supply chain design and coordination. Prerequisites: MBA:8150.

MBA:8300 Strategic Management and Policy 2-3 s.h.
Firm's competitive strategy from a manager's perspective; key strategic frameworks; integration of concepts learned throughout M.B.A. program, previous work experience. Prerequisites: MBA:8110 and MBA:8140 and MBA:8180 and (MBA:8190 or MBA:8240).

MBA:8309 Consulting Project Leadership 1-2 s.h.
Student Team Leads for the Business Solution Center engage in activities to support the launch of spring consulting projects; initial client interactions, project scope, project planning documents, project arrangement letters, and detailed work plans in consultation with their client and Business Solutions Center leadership; basics of leading a team of student consultants. Prerequisites: MBA:8110 and MBA:8120 and MBA:8140 and MBA:8150 and MBA:8180 and MBA:8190 and MBA:8300. Requirements: full-time M.B.A. standing.

MBA:8310 Business Integration 1-3 s.h.
Student teams run an operational business simulation, conduct organizational/industry analysis, assess market opportunities, define strategic direction, compete for company profitability and market share. Prerequisites: MBA:8110 and MBA:8140 and MBA:8150 and MBA:8180 and (MBA:8190 or MBA:8240).

MBA:8330 Seminar in Strategic Management I 1-3 s.h.
Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies.

MBA:8340 Seminar in Strategic Management II 1-3 s.h.
Strategic management integrating all aspects of business; computer simulation, lectures, case studies, readings.

MBA:8400 M.B.A. Internship 0 s.h.

MBA:8410 Application in Organizational Leadership 0-1 s.h.
Opportunity to develop leadership skills necessary for managing student organizations; class discussion, workshops, guest speakers; for M.B.A. organization treasurers and presidents.

MBA:8420 M.B.A. Case Competition 1-3 s.h.
Students represent Tippie School of Management in a case competition; internal case work, presentation and case analysis training. Requirements: M.B.A. standing.

MBA:8500 Seminar in International Business 0-6 s.h.
Issues and challenges facing organizations doing business in international markets; social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Requirements: M.B.A. enrollment.

MBA:8501 M.B.A. Coaches Program 1 s.h.
Development of coaching skills while leading a rigorous peer-to-peer mentoring program with first-year M.B.A. students; improve ability to communicate, motivate, influence, train, and develop others as well as develop high level competency in coaching in critical career development skills, such as business communications, crafting a personal brand pitch, interviewing preparation, and creating and leveraging a network; successful leaders are skilled coaches, so the benefits of this course to both coach and mentee extend far beyond the classroom experience and time as a Tippie student.

MBA:9120 Introduction to Leadership 1 s.h.
Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

MBA:9210 Ethics II 1 s.h.
Organizational influences on ethical behavior.
Master of Business Administration, M.B.A.

The Tippie School of Management offers several M.B.A. programs: full-time M.B.A., professional M.B.A., executive M.B.A., M.B.A. in Hong Kong, and the M.B.A. in Italy ("CIMBA M.B.A."). Students in the full-time M.B.A. program have the opportunity to enroll in one of several joint degree programs, simultaneously earning an M.B.A. and a graduate or professional degree in law, medicine, pharmacy, or public health; see "Joint M.B.A./Graduate and Professional Degrees" below.

Joint M.B.A./Graduate and Professional Degrees

Joint degree programs allow students to pursue two degrees simultaneously, earning both more quickly than they would if they pursued each degree separately. The Tippie School of Management collaborates with several other University of Iowa academic units to offer joint professional or graduate degrees: an M.B.A./J.D. with the College of Law; [p. 1326] an M.B.A./M.D. or an M.B.A./M.D. post-doctoral degree with the Carver College of Medicine [p. 1348]; an M.B.A./M.H.A. with the College of Public Health [p. 1520], and an M.B.A./Pharm.D. with the College of Pharmacy.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

Full-time M.B.A.

The full-time M.B.A. program requires 60 s.h. of graduate credit, including 31 s.h. of required courses and 29 s.h. of career academy and elective course work. Students complete business foundation (core) courses during their first semester in the program (fall) and advanced core courses, career academy courses, and electives in the remaining three semesters. M.B.A. students must complete MBA:8100 Business Acumen and Career Development, a core course that provides training and experience in and outside the classroom in career advancement, functional development, and professionalism. It also offers skill-building activities for the individual career academies. In addition, students take part in a required Global Learning Opportunity in MBA:8500 Seminar in International Business or an approved alternative in an international location to increase their understanding of the global business environment and its implications for business conduct.

The program's career academies are the framework through which students become experts in a specific business field. Each career academy provides a unique set of curricular offerings as well as academic and professional experiences that include industry projects, interactions with the business community and with alumni, and skill-building activities designed to increase each student's marketability. Before the second semester (spring), students choose one of the following career academies and concentration tracks based on their career goals.

- Business Analytics concentration
- Corporate Finance concentration
- Finance—Investment Management concentration

Business Analytics Concentration

Students can elect to complete the business analytics concentration. In addition to the required M.B.A. courses, students take the following course work (minimum of 29 s.h.).

Admission

Applicants to the M.B.A. program must submit a complete application file, including the following:

- a completed Tippie School of Management application form and fee;
- official transcripts of all undergraduate and graduate course work, which must be submitted to the Office of Admissions by each institution attended;
- official scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) General Test;
- the completed supplemental application form with essay responses, a résumé, and a cover letter; and
- the names of three people who can provide recommendations.

Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). In place of TOEFL, the program accepts International English Testing System (IELTS) scores. For information about registering for TOEFL or IELTS and reporting scores to the University, visit English Requirements for MBA Admission on the Office of Admissions website.

The full-time M.B.A. program admits students only for fall entry. Application deadlines are as follows.

- International applicants: April 15
- U.S. citizens and permanent residents (priority deadline): April 15
- U.S. citizens and permanent residents: July 30

Applications received after April 15 are considered on a space-available basis.

M.B.A. Executive Program

The M.B.A. Executive Program requires 52 s.h. of graduate credit. The executive program is conducted at the Pomerantz Center on the University’s Iowa City campus and at the Pappajohn Education Center in Des Moines, Iowa; see Program Locations on the school’s website.

Course work for the M.B.A. Executive Program is presented over four semesters. The program begins in mid-August (Iowa City) or in mid-January (Des Moines) with a five-day residency. It continues with classes one day each week on alternating Fridays and Saturdays (Iowa City) or on Friday and Saturday every other week (Des Moines). A second five-day residency is held at the beginning of the second year. Students have a four-week winter break and summers off.

Each entering class progresses through the program as a group. The curriculum includes 16 courses, an international business seminar (11 days during first semester of the second year), and work in study groups that persist throughout the program.

Admission is limited to experienced managers and executives who want to broaden their management skills without interrupting their professional careers. Applicants typically have seven or more years of postgraduate managerial
experience. Previous academic work in business is not required.

The M.B.A. Executive Program requires the following course work.

Admission

The PMBA program admits students for entry in summer, fall, or spring; applications are accepted throughout the year. Admission decisions are based on completed application materials, including quality of work experience, undergraduate grade-point average, scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) General Test, and recommendations. Applicants should have at least one and one-half years of postbaccalaureate professional work experience before admission.

Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of TOEFL, the program accepts International English Testing System (IELTS) scores. For information about registering for TOEFL or IELTS and reporting scores to the University, visit English Requirements for MBA Admission on the Office of Admissions website.

Admission decisions are made before registration begins for completed applications received by the priority application deadline. Admitted applicants who have met the priority application deadline may request registration for classes on the first registration date. The University must receive the completed application materials by the following application deadlines.

- Summer session (May): April 30
- Fall semester (August): July 30
- Spring semester (January): December 30

Enrollment in Courses Before Formal Admission

Individuals who have not yet been formally admitted to the program may request pre-M.B.A. status by submitting their résumé and transcript to the Tippie School of Management for approval. Applicants should have at least one and one-half years of postbaccalaureate professional work experience. Those granted pre-M.B.A. status may enroll in a maximum of three PMBA courses over 12 months, with a maximum of two courses during each 10- or 12-week session and one course during shorter sessions.

Students must take one of the following courses sometime during pre-M.B.A. status.

<table>

Credit earned during pre-M.B.A. status is applied to the requirements for the degree once the applicant is admitted to the program.

M.B.A. in Hong Kong

The M.B.A. program in Hong Kong (“Hong Kong M.B.A.”) requires 45 s.h. of graduate credit. The curriculum is designed for students with various backgrounds, experience, and academic majors who are living in or near Hong Kong or Taiwan. The program does not require previous course work in business.

Students complete the required courses in sequence; most complete the program in 16-20 months. Each course begins with two weeks of online course work followed by two consecutive weekends of classes in Hong Kong and an additional two weeks of online course work. Faculty from the University of Iowa travel to Hong Kong to teach the weekend classes. Some courses offer a video conference option for students living in Taiwan. Students also have the opportunity to study on campus in Iowa City for up to one semester.

Students are admitted to the program year-round. Admission decisions are based on a completed application, which includes a résumé, academic qualifications, an essay, letters of recommendation, and an interview. Applicants must have at least three years of professional-level work experience.

The M.B.A. program in Hong Kong requires the following course work.

Total Hours 45

M.B.A. in Italy

The M.B.A. program in Italy (“CIMBA M.B.A.”) requires 52-55 s.h. of graduate credit. The 11-month full-time program is held primarily at the CIMBA campus in Paderno del Grappa, Italy, but the final course is completed on the University of Iowa campus in Iowa City. A two-year part-time program also is available for working professionals living in Italy.

The program focuses on personal leadership development and emphasizes strategic management, consulting, and international business. Students apply what they learn through a consulting project with local and international companies. In addition to the M.B.A. degree, students earn certificates in Kepner-Tregoe problem solving and decision making and Kepner-Tregoe project management. The program draws its faculty from the University of Iowa and from institutions across the United States and Europe.

The full-time program admits students only for fall semester entry. Part-time applicants typically start in the fall but may be permitted to begin the program at other times. Admission decisions are based on an applicant’s completed application, which includes a résumé, academic qualifications, essays, an interview, and scores on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) General Test. Applicants must have at least two years of professional work experience.

The CIMBA M.B.A. requires the following course work.

Business Fundamentals, Certificate

The Certificate in Business Fundamentals is open to most University of Iowa graduate students. The certificate is not available to students who are admitted to the pre-M.B.A. or Professional M.B.A. Program. However, students who have completed the business fundamentals certificate may use the certificate courses to fulfill degree requirements once admitted to the Professional M.B.A. Program. Students interested in applying to the Professional M.B.A. Program should do so before they complete certificate requirements; they must meet admission requirements of the Professional M.B.A. Program.

The certificate is designed to introduce students to the core principles of business. Course work covers select disciplines within business—accounting, analytics, finance, managing organizations, marketing, and strategy. Students gain knowledge and develop skills that will immediately strengthen their performance as employees and managers. The certificate is comprised of Professional M.B.A. Program courses, allowing students to benefit from the same course work and faculty members as M.B.A. students.

The certificate requires 15 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 3.00 in work for the certificate. If students have completed one or more of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

The Certificate in Business Fundamentals requires the following course work.

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MBA:8110</td>
<td>Marketing Management</td>
<td>3</td>

</thead>
<tbody>
<tr>
<td>MBA:8150</td>
<td>Business Analytics</td>
<td>3</td>
</tr>
<tr>
<td>MBA:8210</td>
<td>Global Business Strategy</td>
<td>3</td>
</tr>
</tbody>
</table>

Admission

Admission decisions are based upon completed application materials, including academic performance and quality and quantity of work experience. Applicants must have an undergraduate or prior graduate cumulative g.p.a. of at least 2.75 and a minimum of 18 months of professional work experience after completion of their baccalaureate degree.

Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of TOEFL, the certificate program accepts satisfactory International English Language Testing System (IELTS) scores. See English Requirements for MBA Admission on the Office of Admissions website.

Students can be admitted to only one of the four certificate programs at a time. Students must have earned a cumulative g.p.a. of at least 3.00 in previous certificate course work in order to be admitted to a subsequent certificate program.
Finance, Certificate

The Certificate in Finance is open to individuals who are fully employed and desire to complete the certificate to build their skills or to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional course work.

The certificate is ideal for students who wish to gain specialized knowledge of financial concepts. Students can select courses in order to focus their study in specific areas of finance such as corporate finance, investments, portfolio management, and wealth management.

The certificate requires 15 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 3.00 in work for the certificate. If students have completed one or more of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

Students can be admitted to only one of the four certificate programs at a time. Students must have earned a cumulative g.p.a. of at least 3.00 in previous certificate course work in order to be admitted to a subsequent certificate program.

Applications are accepted throughout the year; admission is for summer, fall, or spring entry.
Leadership, Certificate

The Certificate in Leadership is open to individuals who are fully employed and desire to complete the certificate to build their skills or to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional course work.

Modern-day leadership is about facilitating change, maximizing team and employee performance, influencing others, and leading companies and people to greatness. Students who pursue the leadership certificate learn the skills to effectively lead others. The certificate is appropriate for working professionals in all business functions and industries.

The certificate requires 15 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 3.00 in work for the certificate. If students have completed one or more of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

Marketing, Certificate

The Certificate in Marketing is open to individuals who are fully employed and desire to complete the certificate to build their skills or to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional course work.

The study of marketing includes the activities and processes for creating, communicating, and delivering products and services that add value for customers. Students learn the foundations of marketing and build specialized skills in a diversity of marketing functions, including the newest concepts and tools in digital and social marketing.

The certificate requires 15 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 3.00 in work for the certificate. If students have completed one or more of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

Risk Management and Insurance

Director
• Thomas R. Berry-Stoelzle

Undergraduate certificate: risk management and insurance

Faculty: https://tippie.uiowa.edu/about-tippie/centers-institutes/vaughan-institute/contacts
Website: https://tippie.uiowa.edu/about-tippie/centers-institutes/vaughan-institute

The undergraduate Certificate in Risk Management and Insurance is designed to provide an understanding of the many aspects of risk management and insurance (RMI). It concentrates on value creation and asset protection, including pure insurance and risk management, and corporate and financial risk management. The program also addresses the financial and economic characteristics of potential exposures to loss that business organizations and individuals face, as well as the techniques available for hedging the risks and minimizing the costs associated with these exposures.

The certificate provides students in business and other majors—particularly actuarial science, mathematics, or statistics—with a foundation for careers in financial and credit analysis, corporate risk management, risk management consulting, employee benefits management and insurance consulting, insurance brokerage, and underwriting. It also may be of value to students seeking professional designations, such as chartered life underwriter (CLU) and chartered property and casualty underwriter (CPCU).

In addition, RMI courses benefit a student's personal life by imparting knowledge about the risks that are insurable and types of insurance (property, liability, life and health). Through elective courses, students learn about employee benefit plans, wealth management, real estate, banking, among others.

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance.

Programs

Undergraduate Program of Study

Certificate
• Certificate in Risk Management and Insurance [p. 1002]

Career Advancement

Risk management and insurance (RMI) is a growing field in most industries, as all industries are beginning to recognize the need to manage risks across the enterprise. It is estimated that 400,000 industry positions in the industry will be open by 2020. Six of every ten RMI professionals will retire in the next decade.

Most RMI students find internships and most students take their first full-time job with the company where they intern. All of the May 2015 RMI graduates who took internships accepted a full-time position by February 2015.

Popular careers include those in analysis (finance, investments, credit, portfolio, risk), underwriting, auditing, working for brokers or agencies, actuarial and consulting work, corporate finance, marketing, investment banking, management, sales, and as entrepreneurs.

Graduates work for various industries, including banking, insurance, manufacturing, consulting, education, and health care and nonprofit agencies. Many attend graduate school; law and finance graduate programs are prevalent among those.

The Institute has awarded 273 certificates. While most graduates remain in the Midwest (72 percent), RMI graduates are working in 24 states and four countries. RMI graduates are employed in 14 different industries and by 150 different companies. Nearly 40 percent work for insurance companies, brokers, and agencies.
Risk Management and Insurance, Certificate

The Certificate in Risk Management and Insurance (RMI) requires at least 26-35 s.h. of credit: 35 s.h. for B.B.A. students with a major in finance, 34-35 s.h. for students with a major in mathematics (specialization in risk management and insurance or in finance), 23 s.h. for actuarial science majors, and 26 s.h. for other majors. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a graduate or professional degree program.

Students must declare their intent to earn the certificate with the RMI advisor. Some courses have prerequisites; students must complete prerequisites before they may register for a course. For more information, see Risk Management and Insurance Certificate on the Emmett J. Vaughan Institute of Risk Management and Insurance website.

The purpose of the certificate program is to prepare undergraduate students, regardless of their chosen major, for a career in risk management and insurance. The curriculum offers students the opportunity to develop necessary knowledge and skills. Risk management is a growing field as industries are recognizing the need to manage risks across the enterprise, and insurance is the most common tool to manage pure risks.

The Certificate in Risk Management and Insurance requires the following course work.

Foundation Courses
All students complete the following (11 s.h.).

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT:2100</td>
<td>Introduction to Financial Accounting (not required for actuarial science majors)</td>
<td>3</td>
</tr>
<tr>
<td>ECON:1100</td>
<td>Principles of Microeconomics</td>
<td>4</td>
</tr>
<tr>
<td>ECON:1200</td>
<td>Principles of Macroeconomics</td>
<td>4</td>
</tr>
</tbody>
</table>

RMI Courses
All students complete the following (15 s.h.).

One of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN:3000</td>
<td>Introductory Financial Management</td>
<td>3</td>
</tr>
<tr>
<td>FIN:3300</td>
<td>Corporate Finance (for actuarial science majors)</td>
<td>3</td>
</tr>
<tr>
<td>IE:2500</td>
<td>Engineering Economy (for engineering majors)</td>
<td>3</td>
</tr>
</tbody>
</table>

Both of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN:3400</td>
<td>Principles of Risk Management and Insurance (with grade of C or better)</td>
<td>3</td>
</tr>
<tr>
<td>FIN:4410</td>
<td>Corporate and Financial Risk Management</td>
<td>3</td>
</tr>
</tbody>
</table>

Two of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIN:4420</td>
<td>Property and Liability Insurance</td>
<td>3</td>

Professional degree: D.D.S.
Graduate degrees: M.S.; Ph.D.
Website: https://www.dentistry.uiowa.edu/

The College of Dentistry is an integral part of the University of Iowa and its health sciences campus. Its mission, which embraces the University’s academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, D.D.S. students, and dental specialty residents provide oral health care to patients at clinics in the Dental Science Building, the Center for Disabilities and Development, and dentistry clinics at University of Iowa Hospitals and Clinics and Iowa City Veterans Affairs Medical Center. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University’s five health science colleges as well as other University colleges and departments.

Dentistry at the University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. Today the college is Iowa’s only provider of dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Commission on Post-Secondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Doctor of Dental Surgery program (D.D.S.), which prepares general dentists; advanced education programs in all dental specialties, each of which may lead to certification in a dental specialty; several advanced education programs in other areas of dentistry, including the oral science program, which offers M.S. and Ph.D. degrees; post-D.D.S. residency programs in general dentistry and hospital-based dentistry; and a wide variety of continuing education programs for dental and allied professions.

Faculty

Iowa’s dental faculty is predominantly full-time. In addition, more than 100 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college’s faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master’s degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide high-quality care to patients from many backgrounds. The college’s full-time faculty reflects that commitment.

Programs

Professional Program of Study (D.D.S.)

The Doctor of Dental Surgery program prepares students to practice general dentistry. It requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry. See Doctor of Dental Surgery [p. 1006] for a description of the program’s curriculum and information about a joint bachelor’s degree/D.D.S., the dentistry licensure examination, student organizations, expenses, admission, financial support, and academic rules and procedures.

Post-D.D.S. and Graduate Programs of Study

Several College of Dentistry departments offer professional certificate programs designed to prepare dentists for clinical specialty practice: Endodontics [p. 1009]; Operative Dentistry [p. 1015]; Oral Pathology, Radiology, and Medicine [p. 1019]; Orthodontics [p. 1026]; Pediatric Dentistry [p. 1029]; Periodontics [p. 1031]; and Prosthodontics [p. 1036]. Students who complete these programs satisfactorily are awarded a certificate. The Department of Oral and Maxillofacial Surgery [p. 1017] offers a four-year residency program that culminates in a certificate. The college also offers the Certificate in Geriatric and Special Needs Dentistry [p. 1012].

The College of Dentistry offers a Master of Science and a Doctor of Philosophy in oral science [p. 1023]. Students earning the Certificate in Endodontics or the Certificate in Prosthodontics may earn an M.S. or a Ph.D. in oral science concurrently with the certificate; those earning the Certificate in Operative Dentistry, Certificate in Oral and Maxillofacial Pathology or Certificate in Oral and Maxillofacial Radiology (Department of Oral Pathology, Radiology, and Medicine), or the Certificate in Periodontics may earn an M.S. in oral science concurrently with the certificate.

In addition, the Department of Orthodontics [p. 1026] offers a Master of Science in orthodontics, and the Department of Preventive and Community Dentistry [p. 1033] offers a Master of Science in Dental Public Health.

For information about post-D.D.S. and graduate programs of study, see the College of Dentistry department sections of the Catalog.
The College of Dentistry is located in the Dental Science Building on the University of Iowa health sciences campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals and Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 268 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The three clinical floors of the south wing are in the final stage of remodeling in a sequenced four-year project that began in summer 2012. The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, educational media service, computer support services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Dows Institute for Dental Research.

A 33,000-square-foot addition that opened in fall 2011 features an ADA-compliant entrance, two floors of patient treatment areas, and one floor of space for students. The clinical spaces include 46 dental operatories in the Geriatric and Special Needs Clinic, the Endodontic Clinic, Faculty General Practice, and the Craniofacial Clinical Research Center. Student areas include a classroom that accommodates 80 people, small-group study rooms, a seminar room, a student lounge, lockers, and showers.

Dental Education and Patient Care

Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the health sciences campus and at several off-campus sites, including nursing homes. More than 45,600 people receive oral health care yearly in the college’s clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 167,300 patient visits each year.

Interdisciplinary Centers

Dows Institute for Dental Research

Established in 1976, the Dows Institute for Dental Research occupies the first and fourth floor of the Dental Science Building’s north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research at the institute is coordinated by the College of Dentistry. Focus areas include oral soft tissue and oral cancer; cariology and microbiology; epidemiology, behavior, health policy, and outcomes; and biomaterials, bone, and tissue engineering. Clinical and translational research is carried out at the Craniofacial Clinical Research Center.

Although research is concentrated in these program areas, one of the unit’s strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

Craniofacial Clinical Research Center

For more than two decades, the Office of Clinical Research has offered outpatient research support for National Institutes of Health, Food and Drug Administration, and related federally supported research grants. The office’s Craniofacial Clinical Research Center conducts protocol-based studies performed by faculty scientists and supported by oral health care industries. It also engages in translational research involving laboratory-to-clinical-outcomes. The center is allied with the University’s Institute for Clinical and Translational Science.

Center for Oral and Maxillofacial Implants

Through integrated research, education, and clinical programs, the Center for Oral and Maxillofacial Implants facilitates the development of implants and their use as a therapeutic modality in dentistry. The center integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. The center also provides vital coordination of dental specialties that participate in this treatment modality.

Craniofacial Anomalies Research Center

The role of the Craniofacial Anomalies Research Center is to understand the molecular mechanisms of genes and gene interactions that contribute to craniofacial anomalies and birth defects. These genetic defects arise from inherited and somatic gene mutations due to environmental effects. The center researchers use mouse, ferret and zebrafish models, human genetic material, cell lines, and molecular/biochemistry approaches to understand gene function. With the advent of human genome sequencing and the decreasing costs of genomic analyses, it has become somewhat more efficient to identify genetic defects associated with human genetic defects and diseases. The use of these genetic screening approaches provides invaluable data and resources in the search for new genes involved in human craniofacial development and associated anomalies. The center collaborators reside in the Carver College of Medicine, and the Colleges of Dentistry, Pharmacy, and Public Health.

Courses

Most College of Dentistry courses are offered by the college’s departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

College of Dentistry Courses

DENT:8371 Introduction to Quality Assurance 2 s.h.
Patient management, record writing skills, quality assurance concepts; students coordinate treatment, patient relations, issues of quality assurance for a group of patients; ethical, moral dilemmas in relation to dental practice.

DENT:8400 Fourth-Year Lectures and Clinics arr.

DENT:8485 Clinical Admissions Emergency 1 s.h.
Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.

DENT:8489 Advanced Topics in Quality Assurance 2 s.h.
Quality assurance from viewpoint of practicing dentist, dental educator, dental epidemiologist, court system; analysis of senior dental practice in relation to quality assurance criteria.

DENT:9000 Advanced Clinical Comprehensive Dentistry 0 s.h.
Clinical experience for professional improvement. Requirements: dental degree.
Doctor of Dental Surgery

**Professional degree:** D.D.S.

**Website:** [https://www.dentistry.uiowa.edu/](https://www.dentistry.uiowa.edu/)

The Doctor of Dental Surgery program prepares students to practice general dentistry. The D.D.S. is a professional degree awarded by the College of Dentistry.

### Dentistry Licensure Examination

The State of Iowa accepts clinical examination results from the Central Regional Dental Testing Service. Examinations are administered at several testing sites located at dental schools in the United States. A separate license application is then filed with the individual state board of dentistry.

For licensure, all states also require the National Boards, conducted by the American Dental Association. Many states, including Iowa, also require a jurisprudence examination.

### Student Organizations

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research (Student Research Group), the American Association of Women Dentists, the American Academy of Pediatric Dentistry Student Chapter, the American Society for Geriatric Dentistry, the Student National Dental Association, and the Hispanic Dental Association also have local chapters.

Students who rank in the upper 12 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society.

The national dental professional fraternities Delta Sigma Delta and Psi Omega have chapters at Iowa. Both fraternities provide academic and social activities for students and their spouses.

### Programs

#### Professional Program of Study

**Major**

- Doctor of Dental Surgery [p. 1007]

### Academic Rules and Procedures

#### Promotions, Graduation

Student promotions and graduation are determined by the Collegiate Academic and Professional Performance Committee (CAPP), which is made up of individuals appointed by the dean from the biomedical, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the executive associate dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

#### Committee for Appeals

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, the student may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the Collegiate Academic and Professional Performance Committee's decision. The recommendation of the appeals committee is submitted to the dean for final action.
Doctor of Dental Surgery, D.D.S.

The Doctor of Dental Surgery (D.D.S.) is a professional degree awarded by the College of Dentistry. Admission requirements include 90 s.h. of undergraduate credit, including specific required courses, completed at an accredited college; see Admission [p. 1007].

Students working toward a bachelor’s degree in the University of Iowa College of Liberal Arts and Sciences before being admitted to the College of Dentistry may be able to complete their bachelor's degree during their first year in dentistry; see “Joint Bachelor’s Degree/D.D.S.” under Requirements [p. 1007].

Requirements

The Doctor of Dental Surgery requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry.

Course work during the first and second years in the College of Dentistry integrates the biomedical sciences with preclinical and clinical disciplines. The biomedical sciences include gross anatomy, biochemistry, general histology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, periodontics, prosthodontics, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient treatment situation.

Second-year dental students continue their study of biomedical sciences, take preclinical courses, have additional patient treatment experiences in restorative and preventive dentistry, and are introduced to aesthetic and implant dentistry.

Third-year dental students rotate through a series of clerkships that expose them to seven clinical disciplines: endodontics, operative dentistry, oral and maxillofacial surgery, oral pathology, pediatric dentistry, periodontics, prosthodontics, and radiology and medicine.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to varied community dentistry health programs throughout Iowa and other states that include hospitals, nursing homes, and the Special Care Clinic. They may choose to participate in the Colorado Migrant Worker Program, the Indian Health Service Program, or the Foreign Dental School Exchange Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

Biomedical Sciences in the Dental Curriculum

The following science courses are offered by University of Iowa departments outside the College of Dentistry and are a required part of the D.D.S. curriculum.

Dentistry nondepartmental courses are listed under Courses [p. 1004] in the College of Dentistry section of the Catalog. Courses offered by the college’s departments are listed in each department’s General Catalog section.

Joint Bachelor’s Degree/D.D.S.

The College of Liberal Arts and Sciences (CLAS) allows its students to count 30 s.h. of elective credit earned in any other University of Iowa college toward graduation with a bachelor’s degree. Under this policy, CLAS students who enroll in the College of Dentistry before completing their bachelor’s degree may be able to complete their degree during their first year in dentistry. Students planning to take advantage of this plan must satisfy the CLAS residence requirement in order to enroll in the College of Dentistry. They also must fulfill all requirements for the bachelor’s degree, including the General Education Program [p. 437] requirements and the requirements for a major. Contact the College of Liberal Arts and Sciences for more information.

Admission

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association website (http://www.adea.org).

Applications are accepted beginning June 1 of the year before the year of entry. Completed applications must be on file at ADEA by October 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning December 1.

Prospective dental students are encouraged to embark on an educational program that leads to a standard bachelor’s degree. This ensures that students receive a well-rounded education.

Predental Studies

The basic academic requirement for admission to the College of Dentistry is completion of at least 90 s.h. of academic study at an accredited college. No more than 60 s.h. of credit is accepted from a junior college or two-year institution. The predental program of study should include the following.

English: satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor's degree at the college attended.

Physics: one year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

Chemistry: two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year’s study must be laboratory work.
**Biochemistry:** one semester (equivalent to 3 s.h.).

**Biological science:** one year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

**Gross anatomy:** highly recommended.

**Electives:** sufficient course work in the social sciences, philosophy, psychology, history, foreign languages, business, and mathematics to provide a well-rounded educational background.

### Grade-Point Average Requirement

Applicants should have a cumulative g.p.a. of at least 3.25 on a 4.00 scale; a g.p.a. above 3.50 is preferred. The admissions committee gives special consideration to the quality of applicants' course work in the predental sciences, in addition to the cumulative grade-point average.

### Interviews

Personal interviews are required of applicants for admission to the College of Dentistry. Applicants are contacted to arrange an interview, after a complete AADSAS application is received by the admissions office.

### Required Dental Admission Test

All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric Centers.

Applicants should take the test by August 1, one year before entering dental school. Test application forms are available online or by mail from the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611.

### Deposit by Accepted Applicants

Applicants accepted before February 1 are required to submit a $500 deposit within 30 days after notification of admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

### Additional Admission Considerations

Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. The admissions committee reviews applicants who meet the minimum requirements and selects those who appear best qualified for the study and practice of dentistry. The committee considers applicants' academic averages, science averages, DAT scores, letters of recommendation, the interview, and other factors.

Applicants who met the admission requirements five or more years before they applied to the College of Dentistry are considered by the admissions committee only under exceptional circumstances.

### Early Admission

The College of Dentistry's Deferred Admit Program (DAP) allows academically motivated students who are residents of Iowa and are interested in a dental career to be conditionally admitted to the College of Dentistry as early as the end of their first year of undergraduate study. Students postpone matriculation to the College of Dentistry until they have earned the amount of credit required for their undergraduate degree. As undergraduates, they are engaged in a liberal arts and sciences curriculum that incorporates the dental prerequisite courses. Once selected for the program, students must maintain a specified level of academic achievement to assure matriculation to the College of Dentistry.

### Financial Support

Financial assistance for dental students is based on need. Dental students who demonstrate need are eligible for Health Professions Loans, Perkins Loans, and Stafford/Ford Loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA). Interest on some of these loans may be deferred while the student is in school, and the loans are repayable over an extended period of time after the course of study is completed.

Short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry.

Tuition scholarships are awarded each year to qualified entering dental students. The awards provide financial support up to $15,000 per year for as many as four years, if the student maintains an appropriate level of performance.

Financial assistance (grants and loans) is available to disadvantaged students who qualify under the University of Iowa’s Educational Opportunity Program and the Opportunity at Iowa Program.

Information on financial assistance for dental students is available from the University's Office of Student Financial Aid.

### Expenses

The College of Dentistry maintains the Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A $100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

### Career Advancement

The Doctor of Dental Surgery program prepares students to practice general dentistry.
Endodontics

Head
• Fabricio Teixeira

Director, Graduate Program
• Anne Williamson

Professional certificate: endodontics
Faculty: http://www.dentistry.uiowa.edu/endodontics-faculty
Website: http://www.dentistry.uiowa.edu/endodontics

The Department of Endodontics provides education and training to predoctoral students and to professional students, who may work toward a graduate degree along with their professional training. Some students participate with departmental faculty in research that contributes to the knowledge base of the specialty. Faculty and advanced students in the department also provide care to patients at the College of Dentistry.

D.D.S. Student Training

Course work and clinical experiences in endodontics are of vital importance in the overall education of Doctor of Dental Surgery students. Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periapex. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

Programs

Professional Program of Study

Certificate
• Certificate in Endodontics [p. 1010]

Facilities

The Department of Endodontics is located in the west section (third floor) of the Dental Science Building (DSB). The Endodontic Clinic is adjacent to the west entrance.

Courses

Endodontics Courses

ENDO:5201 Update in Endodontics 0-1 s.h.
Recommended for second year certificate students.

ENDO:5225 Endodontic Literature Review I 0-2 s.h.
Current and historical research.

ENDO:5226 Endodontic Literature Review II 0-2 s.h.
Continuation of END:5225.

ENDO:5260 Current Literature in Endodontics 0-1 s.h.
Current literature relevant to endodontics, including diagnosis or treatment of endodontic cases; dental journals with endodontic-related content; landmark research.

ENDO:5700 Endodontic Surgery Conference 0-2 s.h.
Attendance at Endodontic Surgery Conference.

ENDO:5701 Advanced Clinical Endodontics 0-3 s.h.
Advanced study.

ENDO:5710 Research in Endodontics 0 s.h.

ENDO:5720 Seminar in Endodontics I 0-2 s.h.
First in a series of lectures in endodontics.

ENDO:5721 Seminar in Endodontics II 0-2 s.h.
Continuation of END:5720.

ENDO:6227 Endodontic Literature Review III 0-2 s.h.
Continuation of END:5226.

ENDO:6228 Endodontic Literature Review IV 0-2 s.h.
Continuation of END:6227.

ENDO:6701 Seminar in Endodontics III 0-2 s.h.
Continuation of END:5721.

ENDO:6702 Seminar in Endodontics IV 0-2 s.h.
Continuation of END:6701.

ENDO:8240 Endodontics Preclinical Didactic 1 s.h.
Basic principles, concepts, technical procedures for treatment of pulpal problems.

ENDO:8241 Endodontics Preclinical Laboratory 1 s.h.
Basic technical procedures for treatment of pulpal problems.

ENDO:8360 Clinical Endodontic Practice arr.
Clinical experience in diagnosis and treatment of routine pulpal and periradicular pathology; emergency diagnosis; treatment of patients.

ENDO:8365 Clinical Endodontic Seminar 1 s.h.
Tooth pain, anesthesia, pulpal and periradicular reactions, endodontic radiologic interpretation, trauma diagnosis and treatment, surgical endodontics, endodontic implants, bleaching, retreatment, apexification/apexigenesis.
Endodontics, Certificate

The Certificate in Endodontics is a clinical specialty program designed to provide qualified dentists with the scientific knowledge and clinical skills they need to practice endodontics and/or pursue a career in dental education and research.

The program's goal is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research.

Certificate

The Certificate in Endodontics requires a minimum of 24 months of full-time formal training. The curriculum includes clinical and didactic courses. Students complete an original research project in endodontics and write a scientific paper on their research for submission to a refereed journal.

The certificate program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the program are encouraged to seek board certification. Various activities throughout the course of study prepare students for the board examination process.

Students must maintain a g.p.a. of at least 3.00 in order to receive the certificate. Students who fall below this average are allowed one semester to raise their g.p.a. to at least 3.00. The circumstances of the grade-point average deficiency receive careful consideration.

Once students enroll in the certificate program, they are not permitted to involve themselves in private dental practice enterprises outside the college. Failure to adhere to this policy may result in dismissal from the program.

Whenever possible, students should complete the certificate program without interruption. Students who demonstrate a need to discontinue the program temporarily should limit their time away to a maximum of one calendar year. Students must have permission from the endodontics graduate program director in order to interrupt their study.

Admission

Applicants to the endodontics certificate program must apply through the American Dental Education Association’s Postdoctoral Application Support Services (ADEA PASS). Applicants must hold a D.D.S. or D.M.D. degree or a foreign equivalent and must meet the application requirements of the Graduate College. They should take the National Board Dental Examination, part one, and part two when it is available.

Applications should include official transcripts from all undergraduate and graduate institutions, an updated curriculum vitae, three letters of recommendation, a personal statement, and a photograph (two-inch head-and-shoulders view).

The certificate program begins July 1; ADEA PASS applications should be submitted no later than July 1 for admission the following summer. Finalists for admission are asked for a personal interview in July; admission decisions are made in August.

Graduate Study

Certificate students in the Department of Endodontics may work toward a Master of Science or a Doctor of Philosophy in oral science while earning the certificate. Both graduate degree programs provide students with in-depth knowledge in a scientific training discipline as preparation for careers in academia and research.

Students normally require three years of full-time study to complete the Certificate in Endodontics and the M.S. degree, or at least four years to complete the certificate and the Ph.D. degree. Both graduate degree programs require more didactic course work than the certificate program. The M.S. requires a thesis; the Ph.D. requires a dissertation. See Oral Science [p. 1023] in the Catalog.

Other graduate programs are available to endodontics certificate students, such as master's degrees in other disciplines, or a certificate in combination with a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on a candidate's experience and goals. Consult the Department of Endodontics for more information.

Financial Support

Applicants to the certificate and graduate programs must be able to support themselves financially until they complete the programs.

Prospective students should plan to pay living expenses, tuition, and costs for books, specialized equipment (e.g., surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and other expenses.
Family Dentistry

Head
- David C. Holmes

Faculty: http://www.dentistry.uiowa.edu/family-dentistry-faculty
Website: http://www.dentistry.uiowa.edu/family-dentistry

The Department of Family Dentistry reinforces and refines the comprehensive approach to managing patients' oral health care needs.

D.D.S. Student Training

The senior year of the Doctor of Dental Surgery program integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing patient care.

Students who complete their education in Family Dentistry should:
- conduct themselves in a professional and ethical manner;
- understand the principles of comprehensive dental treatment planning;
- know the medical, ethical, and legal issues involved in patient care;
- be able to recognize the need for specialty consultation;
- be competent in coordinating and sequencing patient treatments;
- be effective members of the dental team;
- be prepared to enter general practice;
- be educated and trained for licensure examination; and
- appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic course work builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients' needs are stressed.

The department's practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

Courses

Family Dentistry Courses

FAMD:8484 Dental Practice Management 2 s.h.
Principles of dental practice management; delivery of comprehensive dental treatment in a simulated group-practice clinical setting, with chairside dental assistants.

FAMD:8487 Clinical Experiences: Comprehensive Care arr.
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

FAMD:8488 Clinical Competencies: Comprehensive Care arr.
Refinement of clinical skills, judgment, and critical self-evaluation in the delivery of integrated, comprehensive dental care.

FAMD:8494 Topics in Family Dentistry 3 s.h.
Current techniques, findings; applications for general practitioner and graduate specialty programs.

FAMD:8495 Treatment Planning and Sequencing 2 s.h.
Documentation of diagnostic procedures used in developing a treatment plan and sequence for selected clinical patients; student presentations.
Geriatric and Special Needs Dentistry

Coordinator
• Howard Cowen

Professional certificate: geriatric and special needs dentistry
Faculty: http://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program-faculty
Website: http://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program

The certificate program in geriatric and special needs dentistry prepares dentists to be leaders and teachers in this critical area of practice. The multidisciplinary program incorporates medicine and psychiatry and blends clinical and didactic experiences in varied settings, such as acute, palliative, rehabilitative, and long-term care. Its goal is to provide dental professionals with the knowledge and skills they need to provide patient-centered, sound, and realistic treatment plans for their geriatric and special needs patients.

Geriatric and Special Needs Dentistry, Certificate

The Certificate in Geriatric and Special Needs Dentistry requires a minimum of one year of full-time study. The program prepares dentists to evaluate and manage the oral health problems of older adults across the spectrum of geriatric health care services as well as adults with special needs. It also prepares professionals for scholastic positions in geriatric education. Successful graduates meet the educational requirements for eligibility to take the fellowship examination of the Special Care Dentistry Association.

Certificate students have opportunities to collaborate with medical residents and other allied health care professionals in providing a holistic approach to care of patients whose dental and medical needs are complex. They gain experience in the College of Dentistry's patient care clinics and Geriatric Mobile Dental Unit, at St. Luke's Hospital (Cedar Rapids, Iowa), and at University of Iowa Hospitals and Clinics.

Highlights of the curriculum include advanced clinical geriatric and special needs dentistry, interdisciplinary geriatric patient assessment, geriatric dentistry case studies, outreach, and teaching practicum.

Applicants must hold a D.D.S. or D.M.D. degree from an accredited dental school, be licensed dentists, and meet the admission requirements of the Graduate College. Contact the Geriatric and Special Needs Dentistry Program to learn more.
Hospital Dentistry

Head
• Kirk L. Fridrich (Oral and Maxillofacial Surgery)

Director, Graduate Program
• Ryan W. Hill

Faculty: https://www.uihealthcare.org/docs/profiles.aspx?id=225137
Website: https://www.uihealthcare.org/2column.aspx?id=236134

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals and Clinics. The service includes divisions of general dentistry, maxillofacial prosthodontics, and oral and maxillofacial surgery, and it interacts with the college's specialties of orthodontics, periodontics, pediatric dentistry, endodontics, diagnosis, oral pathology, and prosthodontics.

The Hospital Dentistry Program offers a one-year general practice residency.

Residency Program
The general practice residency program prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association (ADA).

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients. Rotations and patient experiences are divided between University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Health Care System.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program. They are appointed to the hospital’s house staff and have the same privileges and responsibilities as residents in other professional education programs.

Applicants must be U.S. citizens or permanent residents and must be graduates of a dental school accredited by the American Dental Association. They also must be eligible for licensure to practice dentistry in the United States. Application deadline is October 1 for the following July 1. See General Practice Residency Program for admission and application requirements.
Operative Dentistry

Head
- Steven Armstrong

Professional certificate: operative dentistry
Faculty: http://www.dentistry.uiowa.edu/operative-faculty
Website: http://www.dentistry.uiowa.edu/operative

The Department of Operative Dentistry teaches the foundational concepts of dentistry to predoctoral dental students in caries diagnosis, prevention, repair, and restorative techniques. The primary departmental focus is to provide the knowledge, technical skills, critical thinking and judgment for the diagnosis, prevention, and management of dental caries, non-caries dental defects (attrition, abrasion, erosion, abfraction, developmental abnormalities, discoloration, and trauma), and elective aesthetic smile enhancements. It also serves an equally important position to provide national leadership in dental research and advanced restorative technology in its collective faculty efforts and through the professional Certificate in Operative Dentistry.

D.D.S. Student Training

Course work and clinical experiences in operative dentistry are fundamental to the overall education of Doctor of Dental Surgery students. Operative dentistry course work covers roughly one quarter of curriculum time during the first three years of dental school as students progress toward competency in operative dentistry. The department’s primary goal is to educate dental students, using best available evidence, to achieve and maintain optimal patient oral comfort, function, and aesthetics through risk-based diagnosis, prevention, and minimally-invasive treatment of caries and hard tissue lesions of the teeth.

Programs

Professional Program of Study

Certificate
- Certificate in Operative Dentistry [p. 1016]

Courses

Operative Dentistry Courses

OPER:5126 Operative Dentistry Seminar 0-1 s.h.
Review and critical analysis of operative dentistry literature.

OPER:5140 Operative Dentistry Advanced Clinic 0-3 s.h.
Medical and surgical clinical management of dental disease; special emphasis on minimally invasive dentistry using advanced aesthetic principles.

OPER:5234 Selected Applications of Operative Dentistry 0-3 s.h.
Advanced techniques completed on simulated patients.

OPER:5245 Pre-Clinical Teaching 0-3 s.h.
Teaching predoctoral dental students on simulated patients.

OPER:6246 Clinical Teaching 0-2 s.h.
Clinical teaching instruction in operative dentistry clinics.

OPER:8120 Dental Anatomy 3 s.h.
Basic dental terminology and nomenclature, human tooth morphology, creation of tooth crowns with wax.

OPER:8122 Operative Dentistry I 6 s.h.
Principles and design of cavity preparations; placement of restorative materials using simulated patients.

OPER:8240 Operative Dentistry II 5 s.h.
Principles of caries and non-carious lesion management, design of cavity preparations, restoration of teeth, patient management, pain control; esthetic dentistry; tooth bleaching, tooth recontouring, esthetic builds with dental composite; exercises on mannequins in simulation clinic and procedures performed on patients in operative clinic. Prerequisites: OPER:8122.

OPER:8370 Operative Dentistry III 4 s.h.
Combination of didactic and clinical aspects of operative dentistry; medical and surgical management of dental disease; emphasis on minimally invasive dentistry with advanced aesthetic principles.
Operative Dentistry, Certificate

Students must earn the Certificate in Operative Dentistry in conjunction with an M.S. or Ph.D. in oral science; see Oral Science [p. 1023] in the Catalog.

The Certificate in Operative Dentistry is a professional clinical specialty program that provides dentists with advanced training for teaching, research, and the clinical practice of operative dentistry. The operative dentistry graduate program meets the educational requirements for application to take board certification examinations of the American Board of Operative Dentistry. (The American Dental Association does not recognize operative dentistry as a specialty area.)

Applicants to the certificate program must be graduates of accredited United States or recognized international dental schools and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

Certificate students must be enrolled in the M.S. or Ph.D. program in oral science in order to earn the Certificate in Operative Dentistry. Completion of both programs requires 36 months of full-time study. The M.S. requires additional course work as well as a thesis and oral and written comprehensive exams. Students have some flexibility in their curriculum to take courses that particularly interest them; see Oral Science [p. 1023] in the Catalog.

Students must provide their own financial support for the certificate and degree programs, including research and thesis expenses.

For more information, visit the Graduate Program in Operative Dentistry website.
Oral and Maxillofacial Surgery

Head
• Kirk L. Fridrich

Assistant Head
• Richard G. Burton

Director, Graduate Program
• Steven L. Fletcher

Professional certificate: oral and maxillofacial surgery
Faculty: http://www.dentistry.uiowa.edu/oral-maxillofacial-surgery-faculty
Website: http://www.dentistry.uiowa.edu/oral-maxillofacial-surgery

The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its training program for predoctoral students is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals and Clinics. Its certificate program is based primarily in the Oral and Maxillofacial Surgery Residency program at University of Iowa Hospitals and Clinics.

D.D.S. Student Training

The Doctor of Dental Surgery curriculum in oral and maxillofacial surgery is designed to develop a foundation of professional knowledge and surgical skills that will enable students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in didactic courses. Theory and application of anesthesia-analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

Programs

Professional Program of Study

Certificate
• Certificate in Oral and Maxillofacial Surgery [p. 1018]

Facilities

The University of Iowa health sciences campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. Appropriate environments for residency training in oral and maxillofacial surgery are provided by University of Iowa Hospitals and Clinics, the College of Dentistry, and the Carver College of Medicine.

Courses

Oral and Maxillofacial Surgery Courses

OMFS:5208 Pain and Anxiety Control 0-3 s.h.
Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.

OMFS:8115 Anesthesia and Pain Control I 1 s.h.
Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination; neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

OMFS:8230 Basic Oral and Maxillofacial Surgery 2 s.h.
Principles; indications, contraindications for extractions; evaluation of patient's related medical history; techniques of extraction, minor oral surgery procedures.

OMFS:8245 Anesthesia and Pain Control II 1 s.h.
Theory, application, instrumentation of nitrous oxide sedation; emphasis on cardiovascular, respiratory physiology; evaluation of patients, practical techniques for nitrous oxide sedation.

OMFS:8355 Advanced Oral and Maxillofacial Surgery 1 s.h.
History, examination, diagnosis, treatment of diseases and traumatic injuries of oral cavity.

Clinical experience at the College of Dentistry, University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.
Oral and Maxillofacial Surgery, Certificate

The department offers a four-year residency program that culminates in the Certificate in Oral and Maxillofacial Surgery. The program combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.

Recommendations of the American Dental Association, the Committee on Graduate Training of the American Association of Oral and Maxillofacial Surgeons, and the American Board of Oral and Maxillofacial Surgery have been considered carefully in planning the structure and scope of training.

The residency period covers four years of hospital training, providing an orientation to hospital procedures, integration of basic and clinical sciences, acquisition of surgery principles, and familiarization with varied aspects of health services.

Competence in clinical oral and maxillofacial surgery requires knowledge of the basic medical sciences related to the specialty. In addition to hospital and clinical training, residents take advanced coursework in subjects such as applied pharmacology, surgical anatomy, pathology, physiology, and microbiology. They also review closely related disciplines such as roentgenology, anesthesiology, physical diagnosis, and laboratory procedures.

The assumption of increased responsibility and the opportunity for clinical and operating room experience are important aspects of residency training.

Residents gain clinical training in anesthesia through an assigned rotation in the Department of Anesthesia (Carver College of Medicine). Previous advanced training in physical diagnosis, physiology, pharmacology, and pathology take on greater clinical significance, and increased responsibility in the operating room as first assistant and surgeon further develops surgical judgment and skills.

Development and implementation of a research project under staff supervision enhance the value of the residency training.

Senior residents may be given responsibility for major oral and maxillofacial surgical cases during rotations at University of Iowa Hospitals and Clinics. Each fourth-year resident is assigned to a rotation as a clinical and didactic coordinator and assumes responsibility to qualify for examination by the American Board of Oral and Maxillofacial Surgery. To learn more about Iowa’s program, visit the Oral and Maxillofacial Surgery Residency website.

Admission

Students may begin the four-year certificate program only on July 1. Applicants are selected through a post-D.D.S. dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-fourth of their graduating class, and must be eligible to be licensed to practice dentistry in the United States.
Oral Pathology, Radiology, and Medicine

Head
- John W. Hellstein

Professional certificates: oral and maxillofacial pathology; oral and maxillofacial radiology
Faculty: http://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine-faculty
Website: http://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine

The Department of Oral Pathology, Radiology, and Medicine educates predoctoral students and professional students, who may pursue graduate study along with their professional training. The department has diverse curricular responsibility and a faculty with widely varied disciplinary expertise.

D.D.S. Student Training
The Department of Oral Pathology, Radiology, and Medicine teaches Doctor of Dental Surgery and other health care students about diseases that manifest in and around the oral and maxillofacial region. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic management of these diseases and about their etiology and natural history. They also study identification of systemic diseases and the oral implications through physical evaluation of patients.

Programs

Professional Programs of Study

Certificates
- Certificate in Oral and Maxillofacial Pathology [p. 1021]
- Certificate in Oral and Maxillofacial Radiology [p. 1022]

Facilities
Facilities reserved for the Department of Oral Pathology, Radiology, and Medicine include a radiology special procedures area; an interpretation room; a surgical oral pathology laboratory; a clinical pathology laboratory with areas for histopathology; and a seminar room for small groups of graduate and undergraduate students.

In addition, the College of Dentistry has joint-use research laboratories that are well equipped and staffed for conducting research involving histology, histochemistry, materials technology, radiobiology, ultrastructure, and electron probe analysis and quantification.

Courses

Oral Pathology, Radiology, and Medicine Courses
OPRM:5200 Stomatology Literature Review 0-3 s.h.
Current literature in oral and maxillofacial pathology and radiology; presentation of graduate student research; development of lectures or seminars for D.D.S. or graduate students, or continuing education for peers and practicing dentists.

OPRM:5225 Manifestations of Oral and Paraoral Disease 0-3 s.h.
Clinical experience in diagnosing, managing patients.

OPRM:5226 Oral Pathology for Graduate Students 0-1 s.h.
Head and neck diseases, abnormalities.

OPRM:5227 Surgical Oral Pathology 0-1 s.h.
Experience in day-to-day operations of surgical oral pathology laboratory; advanced training in histopathologic diagnosis of oral and maxillofacial diseases. Corequisites: OPRM:5240, if not taken as a prerequisite.

OPRM:5228 Introduction to Surgical Oral Pathology 0-1 s.h.
Day-to-day operations of surgical oral pathology laboratory; histopathologic diagnosis of oral and maxillofacial diseases.

OPRM:5230 Research in Oral Pathology, Radiology, and Medicine 0-3 s.h.
Includes thesis preparation.

OPRM:5238 Introduction to Histopathology 0-1 s.h.
Case studies; histopathologic diagnosis of diseases that affect oral and maxillofacial region.

OPRM:5240 Histopathology 0-1 s.h.
Case studies; advanced training in histopathologic diagnosis of diseases that affect oral and maxillofacial region. Corequisites: ORDN:5202, if not taken as a prerequisite.

OPRM:5241 Hospital Oral Pathology, Radiology, and Medicine 0-3 s.h.
Management of patient consultations, diagnosis, therapy at a hospital-based dental service.

OPRM:5242 Clinical Oral and Maxillofacial Radiology 0-3 s.h.
Radiologic manifestations of diseases; emphasis on craniofacial complex.

OPRM:5243 Practical Oral and Maxillofacial Radiology 0-3 s.h.
Clinic participation; supervision of dental and dental hygiene students, review of their cases; participation in clinical radiology conferences, laboratory exercises.

OPRM:5244 Technical Oral and Maxillofacial Radiology 0-3 s.h.
Experience with technical maintenance of darkroom, clinical equipment; troubleshooting under supervision of radiology staff.

OPRM:5245 Head and Neck Radiology 0-3 s.h.
Hospital-based rotation in diagnostic radiology with participation in interpretation sessions; CT, MRI, nuclear medicine, ultrasound.
OPRM:5246 Craniofacial Radiology 0-3 s.h.
Hospital-based rotation in diagnostic radiology; exposure to interpretive sessions on ultrasound, CT, MRI, nuclear medicine.

OPRM:5256 Advanced Oral Pathology 0-1 s.h.
Diseases involving orofacial organs; emphasis on bibliographic research, biodynamic analysis of pathologic processes, diagnostic interpretation; content adapted to student interests. Requirements: graduate standing in oral pathology.

OPRM:8120 Fundamentals of Oral Radiology 1 s.h.
Methods of clinical, radiographic examination, record keeping; correlation of basic, clinical sciences.

OPRM:8235 Oral Pathology 4 s.h.
Diseases involving orofacial organs.

OPRM:8245 Introduction to Clinical Oral Radiology 1 s.h.
Principles, techniques of diagnosis, radiology, clinical pathology in clinical practice.

OPRM:8355 Systemic Disease Manifestations 1 s.h.
Clinical medicine for dental students; basic information for patient evaluation.

OPRM:8360 Clinical Oral Diagnosis 1 s.h.
Diagnosis of orofacial diseases by clinical, laboratory, radiographic and treatment planning methods; clinical case analysis.

OPRM:8361 Clinical Oral Radiology arr.
Making and processing intraoral, extraoral radiographs; principles of radiographic interpretation.

OPRM:8365 Clinical Oral Pathology 1 s.h.
Oral and maxillofacial diseases: integration of the clinical, historical, radiographic features; therapeutic management.

OPRM:8368 Applied Dental Pharmacology 2 s.h.
Patients’ medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.

OPRM:8370 Application of Critical Thinking 1 s.h.
Continuation of DENT:8219; evidence-based dentistry, critical thinking, treatment planning sessions; online and small group sessions.
Oral and Maxillofacial Pathology, Certificate

Oral science involves the study of structure, function, and diseases of the oral and maxillofacial region. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The department’s programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while earning a professional certificate. Students working toward the department’s certificate may pursue a Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

The department offers the Certificate in Oral and Maxillofacial Pathology. The educational requirements of the certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Accreditation, the American Board of Oral and Maxillofacial Pathology.

Admission

Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or an international equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or international equivalent) to be considered for admission.

International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

The department’s faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview is required.

Graduate Study

Students earning the department’s professional certificate may pursue a Master of Science in oral science while they work toward the certificate. They pursue the M.S. track that corresponds with their certificate (Certificate in Oral and Maxillofacial Pathology). Each program combines the minimum requirements of the M.S. and the certificate; completion time usually is 36 to 48 months.

All students in the combined programs pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. They must complete the courses listed below, including the core courses and the basic science and departmental courses listed for their M.S. track. M.S. candidates must prepare, submit, and defend their thesis based on the results of research conducted during their course of study. See Oral Science [p. 1023] in the Catalog for additional information about requirements and admission.

Oral Science

Director

• Christopher Squier (Oral Pathology, Radiology, and Medicine/International Programs)

Graduate degrees: M.S. in oral science; Ph.D. in oral science
Website: http://www.dentistry.uiowa.edu/dental-research-oralscience-program

Graduate programs in oral science require that students complete courses from a core curriculum and conduct independent research leading to a thesis. The programs prepare graduates for careers in teaching and research.

Students must enroll in a professional certificate program offered by a College of Dentistry department in order to enroll in the Master of Science program in oral science. The following departments offer their certificate students the opportunity to earn M.S. degrees in oral science: endodontics, prosthodontics, operative dentistry, periodontics, and oral pathology, radiology, and medicine.

Programs

Graduate Programs of Study

Majors

• Master of Science in Oral Science [p. 1024]
• Doctor of Philosophy in Oral Science [p. 1025]

Courses

Oral Science Courses

ORSC:5200 Seminars in Dental Research 0-1 s.h.
ORSC:5210 Dental Sciences Research Methodology 0-2 s.h.
Practical, experimental procedures in dental research; literature and design; writing of research protocols. Offered summer session.

ORSC:5212 Statistical Methods for Dental Research 0-3 s.h.
Descriptive methods, elementary probability, distributions, populations and samples, methods for analyzing percentage data and paired and unpaired measurement data, regression, correlation, and analysis of variance.

ORSC:5215 Research Design in Dentistry 0-2 s.h.
Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs. Offered spring semester.

ORSC:5220 Pathophysiology of Skin and Oral Mucosa 0-2 s.h.
Biology of skin, oral mucosa; changes in behavior of the tissues in varied physiological, pathological conditions. Offered spring semesters of even years. Prerequisites: ORSC:5210.

ORSC:5240 Pathophysiology of the Pulp-Dentin Complex 0-3 s.h.
Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisites: ORSC:5210.

ORSC:5250 Current Concepts of Cariology 0-2 s.h.
Etiology of dental caries; pathogenesis, development of preventive measures. Offered spring semesters of odd years. Prerequisites: ORSC:5210.

ORSC:5260 Bone and Tooth Support Structure and Implants 0-2 s.h.
Biology of bone and periodontal structures; biologic basis for therapeutic use of dental implants. Offered fall semesters of odd years.

ORSC:5275 Oral Microbiology and Immunology 0-2 s.h.
Principles of microbiology and immunology, aspects of microbial community development in the oral cavity, basic concepts of host/parasite interactions related to development of oral diseases; biological, immunological, and clinical manifestations induced by major oral pathogens. Offered spring semesters of odd years. Requirements: microbiology, biochemistry, and biology. Recommendations: immunology.

ORSC:5280 Advanced Dental Therapeutics 0-1 s.h.
Antimicrobial, analgesic, related therapies; emphasis on drug/drug interactions, dental implications of chronic cardiovascular and central nervous system medications. Offered fall semesters.

Thesis research. Requirements: oral science M.S. or Ph.D. candidacy.

ORSC:5610 Independent Study 0-3 s.h.
Opportunity to pursue in-depth study in a particular area of interest; students meet with faculty member to design plan of study.

ORSC:5620 Oral Sciences Colloquium arr.
Presentations, seminars, and discussion sessions on research presentations; career and individual development plans for graduate and postdoctoral students in the oral sciences program.
Oral Science, M.S.

Requirements

The Master of Science program in oral science requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of course work, 9 s.h. of independent research leading to a thesis, and a final examination. M.S. students must spend at least two years in full-time residence at the University of Iowa.

Students pursuing the M.S. normally must be enrolled in a clinical specialty training program offered by a College of Dentistry department. Students should complete the M.S. and the clinical specialty training program in three years of study.

Admission

Applicants to the M.S. program must meet the admission requirements of the Graduate College. Applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English.

Programs normally begin July 1 each year.

A personal interview may be requested for either program.
Oral Science, Ph.D.

Requirements

The Doctor of Philosophy program in oral science requires a minimum of 72 s.h. of graduate credit, including advanced course work and original research that culminates in the successful defense of a dissertation. Students must pass a comprehensive examination, prepare and gain approval of a research project, and complete and successfully defend a dissertation that describes the results of their research. Completion of the program usually requires at least four years of full-time study.

Admission

Applicants to the Ph.D. program must meet the admission requirements of the Graduate College. Applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English.

Programs normally begin July 1 each year.

Applicants to the Ph.D. program are asked to submit a statement describing past research experience and current research interests, and stating how completion of the Ph.D. program fits their career goals.

A personal interview may be requested for either program.
Orthodontics

Head
• Thomas E. Southard

Professional certificate: orthodontics
Graduate degree: M.S. in orthodontics
Faculty: http://www.dentistry.uiowa.edu/orthodontics-faculty
Website: http://www.dentistry.uiowa.edu/orthodontics

The Department of Orthodontics educates predoctoral, professional, and graduate students for careers as practicing dentists, orthodontists, researchers, and teachers. It delivers state-of-the-art treatment to its patients—adults, children, and adolescents with a range of orthodontic, craniofacial, and related issues. The department also conducts major research programs and receives significant funding from the National Institutes of Health.

The graduate program and the professional clinical specialty program in orthodontics prepare competent individuals to practice orthodontics and dentofacial orthopedics. The programs’ objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students’ research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

D.D.S. Student Training

The Department of Orthodontics prepares Doctor of Dental Surgery students to competently recognize and diagnose malocclusions of the teeth. Lecture courses guide D.D.S. students in learning basic concepts of dental and facial growth as well as treatment-oriented subject matter. In a laboratory course, students take and evaluate diagnostic records and fabricate treatment appliances.

</tbody>
</table>

ORDN:5202 Diagnosis and Treatment Planning 0-2 s.h.
Literature concerning orthodontic diagnosis; treatment of particular problems; case histories of patients treated in graduate clinic.

ORDN:5203 Advanced Orthodontic Technique 0-3 s.h.
Skills for treatment of disfiguring malocclusions; use of edgewise biomechanical therapy; laboratory focus on typodont exercises.

ORDN:5204 Biomechanics 0-3 s.h.
ORDN:5205 Facial Growth 0-2 s.h.
Theories, processes; use of accepted facial growth concepts in treatment of individuals with malocclusions during active growth period.

ORDN:5207 Case Analysis 0-3 s.h.
Literature on diagnosis, treatment of mixed dentition patients; case histories of patients treated by serial extraction procedure.

ORDN:5209 Orthodontic Practicum 0-3 s.h.
Clinical practice.

ORDN:5210 Orthodontic Seminar 0-3 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed orthodontic treatment.

ORDN:5217 Cephalometrics 0-3 s.h.
Use of skull X-ray (lateral and/or postero-anterior) in formulating orthodontic diagnosis, treatment plans for malocclusions; cephalometrics as a tool for craniofacial structure research.

ORDN:5220 Craniofacial Anatomy 0-3 s.h.
Literature on anatomy, phylogeny, ontogenesis, physiology of craniofacial structures.

ORDN:5221 Surgical Orthodontic Seminar 0-1 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed surgical-orthodontic treatment.

ORDN:5400 Dental Treatment of Maxillofacial Deformities 0-2 s.h.
ORDN:5700 Orthodontics Clinic 0-1 s.h.
Clinical experience in orthodontics clinic.

ORDN:6211 Problems: Orthodontics 0-3 s.h.
ORDN:6212 Research: Orthodontics 0-3 s.h.
ORDN:6215 Orthodontic Journal Club 0-3 s.h.
Current biological, technical publications.

ORDN:6216 Practice Management 0-3 s.h.
Business management of orthodontic practice; solo practice, associateship, partnership, practice corporation.

ORDN:8215 Growth and Development 1 s.h.
Normal human growth and development; emphasis on craniofacial region.

ORDN:8235 Orthodontic Laboratory 1 s.h.
Limited care case diagnosis and treatment.

ORDN:8236 Orthodontic Treatment 1 s.h.
From patient management to use of appliances for correcting some malocclusions in the general practitioner’s office.
Orthodontics, Certificate

Satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper, qualifies students to receive the Certificate in Orthodontics.

Admission

Applicants must have a D.D.S. degree or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University of Iowa for interviews with department faculty.
Orthodontics, M.S.

Requirements

The Master of Science program in orthodontics requires a minimum of 30 s.h. of graduate credit. Students must satisfactorily complete a thesis based on an original research project to qualify for the M.S. degree.

Admission

Applicants must have a D.D.S. degree or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University of Iowa for interviews with department faculty.
Pediatric Dentistry

Head
• Karin Weber-Gasparoni

Professional certificate: pediatric dentistry
Faculty: http://www.dentistry.uiowa.edu/pediatric-faculty
Website: http://www.dentistry.uiowa.edu/pediatric

The Department of Pediatric Dentistry instructs predoctoral and professional students in the prevention and treatment of dental diseases in children as well as individuals with special health care needs. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

D.D.S. Student Training

All second-year Doctor of Dental Surgery students participate in a one-semester lecture course that includes preclinical exercises in the Simulation Clinic. Third-year D.D.S. students participate in a clerkship, which includes a lecture course and a clinical course. During their fourth year, D.D.S. students participate in a rotation through the department's clinics.

Research Opportunities

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, nutrition, prevention, and access to care.

Faculty

Faculty members hold numerous professional offices at national and state levels, committee memberships, consultancies, and honors in professional organizations. They serve as reviewers for professional journals and federal granting agencies. They also participate regularly in continuing education programs for dentists and other health science personnel. Fifteen of the department's faculty members are diplomates of the American Board of Pediatric Dentistry.

Programs

Professional Program of Study
• Certificate in Pediatric Dentistry [p. 1030]

Courses

Pediatric Dentistry Courses

PEDO:5220 Social, Cultural, and Public Health Issues in Pediatric Dentistry 0-1 s.h.
PEDO:5700 Advanced Didactic Pediatric Dentistry 0-1 s.h.
PEDO:5702 Seminar in Pediatric Dentistry 0-1 s.h.
Pediatric Dentistry, Certificate

The department’s certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association.

The Certificate in Pediatric Dentistry is a two-year residency program that prepares students for certification by the American Board of Pediatric Dentistry. Certificate students are trained in all phases of pediatric dentistry and have career choices in private practice, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations.

Approximately 60 percent of the certificate program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 10 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students’ individual interests.

Close associations with the Stead Family Department of Pediatrics [p. 1478] in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals and Clinics permit emphasis on oral rehabilitation under general anesthesia, treatment of children with conscious sedation, instruction in physical diagnosis, and management of children with developmental disabilities.

Admission

Prospective students apply through the American Dental Education Association PASS program. Openings in the program are filled through the Postdoctoral Dental Matching Program. Applicants must meet the admission requirements of the Graduate College.

Financial Support

Stipends for the two-year program are provided by federal agencies and other sources.
Periodontics

Head
- Georgia K. Johnson

Professional certificate: periodontics
Faculty: http://www.dentistry.uiowa.edu/periodontics-faculty
Website: http://www.dentistry.uiowa.edu/periodontics

The Department of Periodontics educates predoctoral students as well as professional students, who may elect to pursue graduate study along with their professional training. The department also provides interdisciplinary care for patients with complex treatment needs; generates new knowledge through its research programs; and provides professional service and leadership at all levels, local to worldwide.

D.D.S. Student Training

The periodontal program acquaints Doctor of Dental Surgery students with the diagnosis and management of periodontal diseases. It combines didactic, laboratory, and clinical experience and applies the biological concepts of periodontology to the comprehensive clinical management of patients.

Courses

PERI:5212 Applied Oral Microbiology 0-3 s.h.
Role of microbial factors and host response in pathogenesis of periodontal diseases; interactions between periodontal diseases and systemic diseases/conditions.

PERI:5225 Periodontology Literature Review I: Mucogingival Therapy 0-3 s.h.
Analysis of literature relating to a range of mucogingival conditions affecting the periodontium, different procedures to address/correct them, and expected outcome from each.

PERI:5226 Periodontology Literature Review: Regenerative Therapy 0-3 s.h.
Critical evaluation of rationale, indications, and results of various regeneration procedures and materials used in periodontics.
Periodontics, Certificate

Students working toward the Certificate in Periodontics may pursue the Master of Science in oral science in conjunction with the certificate; see “Graduate Study” below.

The Certificate in Periodontics requires 36 months of full-time study, including satisfactory completion of required didactic and clinical courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper. Opportunities are provided for experience in clinical and basic research.

The certificate program provides a sound foundation for the clinical practice of periodontics. It meets all requirements of the American Dental Association’s Commission on Dental Accreditation for advanced dental education programs in periodontics. It also meets the educational requirements for application to take board certification examinations of the American Board of Periodontology.

Certificate students must be financially prepared for uninterrupted pursuit of their program of study.

Admission

Applicants to the periodontics certificate program must have a D.D.S. degree or the equivalent and must meet the admission requirements of the Graduate College. Applicants must take the National Dental Board Examination and must interview with the department. Visit Iowa Graduate Admissions—College of Dentistry to learn more about applying to the certificate program.

Graduate Study

Students earning the Certificate in Periodontics may pursue a Master of Science in oral science concurrently while working toward certificate completion. The M.S. program requires 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations. See Oral Science [p. 1023] in the Catalog.
Preventive and Community Dentistry

Head
- Daniel Caplan

Director, Graduate Program
- John Warren

Graduate degree: M.S. in Dental Public Health
Faculty: http://www.dentistry.uiowa.edu/preventive-faculty
Website: http://www.dentistry.uiowa.edu/preventive

The Department of Preventive and Community Dentistry educates future and practicing dental and oral health professionals, preparing them to understand and recognize:

- conditions that compromise patients;
- social, cultural, community, and political influences on dental practice;
- principles of preventive dentistry for individuals, groups, and communities; and
- considerations for preventing and treating oral disease in geriatric and special needs patients.

In addition to offering educational programs, the department provides patient care at the College of Dentistry and in a variety of off-campus settings. It also is home to research that advances dental public health.

D.D.S. Student Training

Predoctoral training in preventive, community, and geriatric dentistry is designed to increase Doctor of Dental Surgery students’ awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give students opportunities to interact with health care teams and the public in Iowa and around the world. The department conducts off-site community programs statewide, nationwide, and worldwide. It also operates the Special Care Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, D.D.S. students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

Programs

Graduate Program of Study
- Master of Science in Dental Public Health [p. 1035]

Courses

Preventive and Community Dentistry Courses

PCD:8116 Fundamentals of Clinical Dentistry 1 s.h.
Identification of health and disease in the mouth; practical methods of disease control, philosophy of preventive dentistry; patient assessment, clinical diagnosis.

PCD:8117 Cariology and Preventive Therapies 2 s.h.
Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in prevention of caries. Prerequisites: PCD:8116.

PCD:8118 Preventive Dentistry Assessment and Patient Care 3 s.h.
Patient oral assessment, communication, patient management skills; preventive dentistry risk assessment, oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisites: PCD:8116 and PCD:8117.

PCD:8119 Behavioral Science I, Interprofessional Education, and Ethics 2 s.h.
Introduction to patient-centered care, interpersonal and professional communication with patient, information exchange, preventive treatment plan formulation in patient encounters, and ethics.

PCD:8120 Foundations for Critical Thinking I 2 s.h.
Problem and case-based small group sessions covering evidence-based dentistry and treatment planning integrating information taught concurrently in dental curriculum.

PCD:8218 Foundations for Critical Thinking II 1 s.h.
Continuation of DENT:8118; evidence-based dentistry, critical thinking and treatment planning sessions; online and small group sessions. Prerequisites: DENT:8118.

PCD:8219 Behavioral Science II and Interprofessional Education 2 s.h.
Continuation of DENT:8119; assessing patient understanding of practices for improving/maintaining oral health; overview of patient challenges to effective communication; application of behavioral science principles in dentistry and behavior theories. Prerequisites: DENT:8119.

PCD:8245 Clinical Preventive Dentistry 0-2 s.h.
Experience providing complete prophylaxis and preventive services for college patients; application of nutrition principles and communication skills in a clinic setting. Prerequisites: PCD:8118.

PCD:8319 Behavioral Science III 1 s.h.
Continuation of DENT:8219; standardized patient exercises with chairside feedback and evaluation of communication skills; participation in small group discussions regarding application of communication skills and behavioral science principles in patient encounters.

PCD:8355 Introduction to Geriatric Dentistry 2 s.h.
Biological, psychological, and social aspects of aging; normal aging and disease processes associated with aging; pathological changes that affect oral health treatment of dental diseases and patient management. Requirements: D.D.S. enrollment or completion of dental hygiene program. Same as ASP:8355.

PCD:8360 The Practice of Dentistry in the Community I 1-2 s.h.
Issues related to the role of the dental professional at a local and state level, including dental public health, health literacy, cultural competency, and forensic dentistry; the role of the state dental director.

PCD:8361 The Practice of Dentistry in the Community II 1-2 s.h.
Factors that affect the profession and practice of dentistry, including basics of health care systems in the U.S. and in other countries; health care reform; Medicaid; dental insurance; health care delivery systems; legal and malpractice issues; dental utilization and dental workforce; quality of care.
PCD:8485 Broadlawns Medical Center arr.  
Dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments; student team experience in Des Moines.

PCD:8486 Colorado Migrant Program arr.  
Experience providing primary dental care and outreach services to a migrant population; broad understanding of needs, resources for migrant, low-socioeconomic populations.

PCD:8487 Community Health Care: Davenport arr.  
Experience providing dental care at medical-dental ambulatory health care facility serving Scott County; community-related assignments.

PCD:8488 St. Lukes Dental Health Center arr.  
Experience providing clinical and outreach services for low-income children and adults with developmental disabilities at St. Luke's Hospital, Cedar Rapids; operative and behavioral dental problems, hospital protocol, special needs of low-socioeconomic clients.

PCD:8489 Geriatrics and Special Needs Program arr.  
Experience in Special Care Clinic and Geriatric Mobile Dental Unit; comprehensive care for medically, physically, cognitively compromised adults, including frail elderly nursing home residents with portable equipment, other underserved populations.

PCD:8491 Private Practice Preceptorship arr.  
Development of skills and knowledge necessary for day-to-day practice of dentistry; experience at selected preceptor sites in Iowa.

PCD:8494 Special Field Clinic arr.  
Extramural experiences developed according to student needs, extramural opportunities.

PCD:8496 Siouxland Community Health Center arr.  
Experience providing dental care at medical/dental ambulatory health care facility; community-related assignments.

PCD:8497 ADEAGies/ADR-ACDFP Fellowship arr.  
Window into day-to-day experiences of dental school faculty members for oral health professional students; exposure to multifarious educational experiences at dental institutions including academics, clinical practice, and biomedical, clinical, educational research, and administration.

PCD:8500 Dental Student Research Honors Program arr.  
Experience in conducting research. Requirements: D.D.S. enrollment and approval of mentor and program director.

**Dental Public Health Courses**

**DPH:5000 Introduction to Dental Public Health** 0-2 s.h.  
Science, philosophy, practice of dental public health.

**DPH:5001 Literature Review Methods: Dental Public Health** 0-2 s.h.  
Concepts and process of literature review, particularly in area of student's interest.

**DPH:5005 Administration of Public Dental Programs** 0-2 s.h.  
Application of general management concepts; practical aspects of planning, financing, staffing, implementing, operating, evaluating dental public health programs at federal, state, local levels.

**DPH:5006 Preventive Programs in Dental Public Health** 0-2 s.h.  
Prevention, control methods for major dental conditions, primarily dental caries, periodontal diseases; clinical efficacy, cost-effectiveness; development of comprehensive preventive oral health plan for a community.

**DPH:5008 Field Experience in Dental Public Health** arr.  
Arranged with public and voluntary health agencies according to students' and agencies' needs.

**DPH:5009 Advanced Field Experience in Dental Public Health** 1-3 s.h.  
Opportunity to research, develop, and implement programmatic objectives with local, state, national, and/or federal agencies and organizations on an issue that is both relevant to the student and the agency; may require off-site visits to agencies or organizations. Prerequisites: DPH:5008.

**DPH:5014 Dental Care Policy and Financing** 0-2 s.h.  
Dental financing and policy issues: payment mechanisms for health care service providers, third-party prepayment plans, salaried and public-financed programs, Medicaid and Medicare programs, dental insurance systems, and care of the underserved.

**DPH:5016 Introduction to Statistical Computing** arr.  
Use of statistical packages on a personal computer for data management and analysis. Offered summer session.

**DPH:5031 Geriatric Care** 0-2 s.h.  
Issues and problems related to oral health care in older adults, especially the frail or functionally dependent.

**DPH:6002 Research Protocol Seminar** 0-2 s.h.  
Development of a master's thesis protocol; identification of thesis topic, review of relevant literature, development of research methods, writing.

**DPH:6003 Independent Study: Dental Public Health** 1-3 s.h.  
Issues and problems related to oral health care in older adults, especially the frail or functionally dependent.

**DPH:6004 Principles of Oral Epidemiology** 0-3 s.h.  
Retrospective, prospective, cohort study designs; validity and reliability; distribution and determinants of oral diseases —caries, periodontal diseases, oral cancer, malocclusion, fluorosis, HIV infection, tooth loss, edentulism.

Protocol preparation; data collection, analysis, organization; writing, defense of research.

**DPH:6017 Teaching Methods and Evaluation** 0-2 s.h.  
Philosophies of dental education, teaching methodologies, evaluation; focus on learning to write educational objectives, writing and analyzing exam items.

**DPH:6018 Clinical Teaching Practicum: Preventive Dentistry** 0-3 s.h.  
Teaching experience in preventive dentistry clinic setting with first-year dental students; outcomes focused on methods in clinical teaching, evaluation, and remediation.
Dental Public Health, M.S.

Requirements

The Master of Science program in dental public health requires 40 s.h. of course work and is designed to be completed in two academic years of full-time study. It prepares dentists and dental hygienists to be specialists in dental public health. The program emphasizes research and requires a research project culminating in the completion and defense of a thesis. Successful dentist graduates meet the educational requirements for eligibility to take the certifying examination of the American Board of Dental Public Health.

Admission

Applicants must meet the admission requirements of the Graduate College.
Prosthodontics

Head
• Julie Holloway

Professional certificate: prosthodontics
Faculty: http://www.dentistry.uiowa.edu/prosthodontics-faculty
Website: http://www.dentistry.uiowa.edu/prosthodontics

Prosthodontics is the dentistry specialty involving crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and implant prostheses.

D.D.S. Student Training
The Department of Prosthodontics instructs Doctor of Dental Surgery students in the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry. Students learn through laboratory projects and treatment of patients with differing prosthodontic needs.

Programs

Professional Program of Study
• Certificate in Prosthodontics [p. 1038]

Facilities
Most didactic, clinical, and laboratory instruction and patient treatment takes place in the Department of Prosthodontics, which is located in the Dental Science Building. The building also houses the Doctor of Dental Surgery (D.D.S.) program, training programs in specialties recognized by the American Dental Association, and the Iowa Institute for Oral Health Research.

The college and the department provide supporting technologies that include cone beam CT radiography, implant imaging software, laboratory CAD/CAM systems, laser surgery, clinical operating microscopes, and digital shade matching.

Advanced prosthodontic students spend time at University of Iowa Hospitals and Clinics, where they work closely with medical professionals in other disciplines to treat medically compromised prosthodontic patients and those who require maxillofacial rehabilitation.

PROS:6220 Fixed Prosthodontics Literature Review I 0-4 s.h.
Fixed prosthodontic procedures; assigned readings, discussion of related research.

PROS:6221 Fixed Prosthodontics Literature Review II 0-4 s.h.
Porcelain-fused-to-metal and ceramic restorations, color science and esthetics; assigned readings, discussion of related research.

PROS:6222 Implant Literature Review 0-4 s.h.
Implant prosthodontics; assigned readings, discussion of related research.

PROS:6223 Occlusion Seminar 0-4 s.h.
Occlusion and the temporomandibular system; assigned readings and discussion of related research.

PROS:6224 Graduate Restorative Materials 0-2 s.h.
Dental materials science; mechanical, physical, and chemical properties of restorative materials; selection and manipulation.

PROS:6225 Complete Denture Literature Review 0-4 s.h.
Complete denture prosthodontics; assigned readings, discussion of related research.

PROS:6226 RPD Literature Review 0-4 s.h.
Removable partial denture prosthodontics; assigned readings, discussion of related research.

PROS:6700 Maxillofacial Prosthodontics Seminar 0-1 s.h.

PROS:7700 Maxillofacial Prosthodontics Rotation 0-1 s.h.

PROS:8120 Treatment of Dentulous Patients: Introduction to Occlusion Lecture 1 s.h.
Introduction to principles of occlusion and their clinical application.

PROS:8121 Treatment of Dentulous Patients: Introduction to Occlusion Lab 1 s.h.
Patient simulation exercises demonstrating principles of occlusion.

PROS:8122 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Anterior Teeth Lecture 1 s.h.
Basic principles of fixed prosthodontics for single-unit anterior teeth; basic principles of tooth preparation, clinical steps, and digital procedures for fabrication of anterior single-tooth all-ceramic crowns and interim crowns. Prerequisites: PROS:8120 and PROS:8121.

PROS:8123 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Anterior Teeth Lab 1 s.h.
Patient simulation exercises in single anterior tooth preparation, and fabrication of single-unit anterior all-ceramic and interim restorations. Prerequisites: PROS:8120 and PROS:8121.

Basic biomechanical principles of fixed posterior single tooth prosthodontics; diagnosis and treatment planning for dentate patients including occlusion. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.

PROS:8125 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Posterior Teeth Lab 1 s.h.
Patient simulation exercises in single posterior tooth preparation and laboratory fabrication of single-unit posterior definitive and interim restorations. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.
PROS:8240 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Lecture 1 s.h.
Basic biomechanical principles of fixed prosthodontics for multiple-unit fixed prostheses; diagnosis and treatment planning for partially edentulous patient, including occlusion and esthetic concerns.

PROS:8241 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Patient Simulation 1 s.h.
Patient simulation exercises in preparation and fabrication of a three-unit fixed partial dental prosthesis and interim restoration.

PROS:8242 Treatment of Partially Edentulous Patients: Single Tooth Implant Lecture 1 s.h.
Principles, clinical steps, materials, and laboratory procedures necessary for single tooth fixed implant treatment. Prerequisites: PROS:8240 and PROS:8241.

PROS:8243 Treatment of Partially Edentulous Patients: Single Tooth Implant Patient Simulation 1 s.h.
Clinical steps in laboratory procedures for single tooth implant surgical guide fabrication and restoration. Prerequisites: PROS:8240 and PROS:8241.

PROS:8244 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Lecture 1 s.h.
Basic biomechanical principles of tooth replacement with removable partial prosthodontics; diagnosis and treatment planning for partially edentulous patients. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8245 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Patient Simulation 1 s.h.
Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of removable partial dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8246 Treatment of Edentulous Patients: Removable Complete Prosthodontics Lecture 1 s.h.
Fundamental principles of diagnosis and treatment planning for edentulous patients, surgical and prosthodontic protocols for oral rehabilitation of edentulism. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243 and PROS:8244 and PROS:8245.

PROS:8247 Treatment of Edentulous Patients: Removable Complete Prosthodontics Patient Simulation 1 s.h.
Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of complete dentures, including implant over-dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243 and PROS:8244 and PROS:8245.

PROS:8360 Prosthodontic Clinic arr.
Experience supplemented by individual supervision, demonstration.

PROS:8365 Prosthodontic Seminar 2 s.h.
Knowledge in biological, basic sciences and technique applied to clinical fixed and removable prosthodontics procedures.
Prosthodontics, Certificate

Students working toward the Certificate in Prosthodontics must pursue the Master of Science or the Doctor of Philosophy in oral science in conjunction with the certificate; see "Graduate Study" below.

The Certificate in Prosthodontics requires a minimum of 36 months of study. It prepares individuals for specialty clinical practice in the discipline. The curriculum includes didactic courses and clinical training in all of the disciplines that make up the broad specialty of prosthodontics, including implant prosthodontics, maxillofacial prosthetics, and treatment of temporomandibular disorders. Patient care is completed in close collaboration with the other dental specialties. Clinically related basic science instruction complements the clinical curriculum.

The certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association. Successful completion of the program satisfies the formal training requirement for eligibility to take the American Board of Prosthodontics certification examination.

Admission

Applicants to the prosthodontics certificate program must meet the admission requirements of the Graduate College. They must hold a D.D.S. or a D.M.D. degree from a dental school accredited by the American Dental Association or an equivalent degree.

The certificate program begins around July 1 each year. Applications are accepted year-round; those received by August 15 are considered for admission the following July. A personal interview is required for qualified applicants.

Graduate Study

Students earning the Certificate in Prosthodontics must pursue a Master of Science or a Doctor of Philosophy in oral science while they work toward the certificate. The graduate programs prepare individuals for careers in dental education and research and for independent study and professional growth.

Both graduate programs require more courses in the biomedical sciences and research methodology than the certificate program requires. Students must prepare and defend a thesis (M.S.) or dissertation (Ph.D.) based on original research. Facilities and support personnel for research are available through the college's Iowa Institute for Oral Health Research. See Oral Science [p. 1023] in the Catalog.
College of Education

Dean
• Daniel L. Clay

Executive Associate Dean
• Christopher C. Morphew

Associate Dean, Academic Affairs and Graduate Programs
• Amanda Thein

Associate Dean, Teacher Education and Student Services
• Nancy J. Langguth

Undergraduate major: elementary education (B.A., B.S., granted by the College of Liberal Arts and Sciences)

Undergraduate minors: educational psychology; human relations

Graduate degrees: M.A.; M.A.T.; M.S.; Ed.S.; Ph.D.

Graduate certificates: college teaching; online teaching; teaching English as a foreign language

Website: https://education.uiowa.edu/

The nation's first university-level professorial chair in education was established at the University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college's growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today's testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments: Educational Policy and Leadership Studies [p. 1049]; Psychological and Quantitative Foundations [p. 1068]; Rehabilitation and Counselor Education [p. 1084]; and Teaching and Learning [p. 1101].

Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

Minors

The College of Education offers two undergraduate minors for students who wish to be better informed about education: one in educational psychology and one in human relations. The minors may help support students' future career objectives and benefit students in their roles as parents, taxpayers, or future members of local boards of education. See the Department of Psychological and Quantitative Foundations [p. 1068] to learn more about the minor in educational psychology; see the Department of Rehabilitation and Counselor Education [p. 1084] to learn more about the minor in human relations.

Honors in Education

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted, based on the recommendations of faculty and/or staff members and the education honors advisor. Honors Opportunity Program students must take EPLS:4180 Human Relations for the Classroom Teacher, EDTL:4900 Foundations of Special Education, and complete five additional honors experiences. Successful completion of the program results in recognition of the student as a College of Education honors graduate. The Honors Opportunity Program is housed in and administered by the Belin-Blank Center.

Graduate Programs of Study

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by the College of Education's faculty. Graduate students in education enroll in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College.

Degree Programs Offered

The College of Education offers the following graduate degrees and programs.

Department of Educational Policy and Leadership Studies

M.A., Ed.S., and Ph.D. in educational policy and leadership studies; the following programs are available:

- Educational leadership (offered in the M.A., Ed.S., and Ph.D.)
- Higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.)
- School curriculum and assessment policy (offered in the Ed.S.)
- Schools, culture, and society (offered in the M.A. and Ph.D.)

Department of Psychological and Quantitative Foundations

M.A., Ed.S., and Ph.D. in psychological and quantitative foundations; the following programs are available:

- Counseling psychology (offered in the M.A. (Hong Kong) and Ph.D.)
- Educational measurement and statistics (offered in the M.A. and Ph.D.)
- Educational psychology (offered in the Ph.D.)
- Learning sciences (offered in the M.A.)
- School psychology (offered in the Ed.S. and Ph.D.)
Department of Rehabilitation and Counselor Education

M.A. and Ph.D. in rehabilitation and counselor education; the following programs are available:

- Counselor education and supervision (offered in the Ph.D.)
- Couple and family therapy (offered in the Ph.D.)
- Rehabilitation and mental health counseling (offered in the M.A.)
- Rehabilitation counselor education (offered in the Ph.D.)
- School counseling (offered in the M.A.)

Department of Teaching and Learning

M.A., M.A.T., M.S., and Ph.D. in teaching and learning; the following programs are available:

- Art education (offered in the M.A.)
- Developmental reading (offered in the M.A.)
- English education (offered in the M.A. and M.A.T.)
- Foreign language and English as a Second Language (ESL) Education (offered in the M.A., M.A.T., and Ph.D.)
- Language, literacy, and culture (offered in the Ph.D.)
- Mathematics education (offered in the M.A., M.A.T., and Ph.D.)
- Science education (offered in the M.S., M.A.T., and Ph.D.)
- Social studies education (offered in the M.A. and Ph.D.)
- Special education (offered in the M.A. and Ph.D.)
- STEM education (offered in the M.S.)

Master of Arts

The College of Education offers a Master of Arts. Some of the college’s M.A. programs are offered with thesis as well as without thesis. Nonthesis programs usually provide more specialized course work than do thesis programs. Although a nonthesis program is not necessarily terminal, students who expect to continue their studies in a doctoral program are urged to select a thesis program in order to gain more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under "Graduate Programs of Study" in College of Education department sections of the Catalog.

Course work completed more than 10 years before the session in which the degree is to be conferred must be evaluated to determine how much credit may be accepted toward the degree requirements. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree.

Master of Arts in Teaching

The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate programs. It is a nonthesis program with requirements that range from 45 s.h. to 67 s.h. of credit. See the Department of Teaching and Learning [p. 1101] in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of English, foreign languages, and science education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student's teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

A Master of Arts program with a secondary education major in social studies leads to initial teacher licensure. See "M.A.: Social Studies Education"/"Program B Requirements" in the Teaching and Learning [p. 1101] section of the Catalog.

Joint B.A./M.A.T. with Science Education Subprogram

Bachelor of Arts students interested in pursuing a graduate degree in teaching may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduate students majoring in biology, chemistry, environmental sciences, or physics, the joint program enables students to earn a B.A. and M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "Joint B.A./M.A.T.: Science Education" in the Master of Arts in Teaching [p. 1130] section of the Catalog. Interested students should consult an advisor.

Master of Science

The College of Education offers a Master of Science in teaching and learning without thesis. The degree requirements are similar to those for a Master of Arts.

Specialist in Education

The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master's degree, except that an Ed.S. requires students to complete 15 s.h. of resident work on campus in one 12-month period or in two summer sessions. Course work completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Not all programs offer an Ed.S. degree. For a list of programs and degrees offered, see "Graduate Programs of Study" above.

Doctor of Philosophy

The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation. Ph.D. students must complete two full-time semesters of course work after they have earned 21 s.h. of graduate credit and have been admitted to the Ph.D. program.

Certificates

The Certificate in College Teaching requires 12 s.h. of graduate credit. The certificate program is open to all University of Iowa students working toward a Ph.D. or other terminal graduate degree. The certificate program complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. It requires course work, supervised teaching experience, and
preparation of a teaching portfolio. To learn more or to apply, see Graduate Certificate in College Teaching on the College of Education website.

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students. The certificate program develops students' skills in using technology to solve instructional problems associated with distance and time. The certificate's online format uses the techniques and approaches that the program teaches. To learn more or apply, see Certificate in Online Teaching on the College of Education website.

The Certificate in Teaching English as a Foreign Language (TEFL) requires 12 s.h. of graduate credit and is offered completely online. The TEFL certificate is designed for students who are interested in English language teaching and administration outside of the United States in primary and secondary school settings (K-12). To learn more or to apply, see Certificate in Teaching English as a Foreign Language on the College of Education website.

Professional Improvement
Students who are interested in taking courses as nondegree students should apply for nondegree status to the Graduate College. They can then be admitted by a department on a nondegree basis by contacting the department. Students must be admitted to a department in order to complete a program objective such as teacher licensure.

Extramural Education
Through the Division of Continuing Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet residency requirements for degrees. Students who plan to complete a degree program should apply for admission to the Graduate College and satisfy all application requirements for the degree program they wish to enter.

Special regulations govern such course work. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to the University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

Graduate and postbaccalaureate students also may complete a Teacher Education Program; see "Graduate and Postbaccalaureate Admission to TEPs" below and the Teaching and Learning [p. 1101] section of the Catalog.

Preparation for special education teaching is offered primarily at the graduate level. In addition, an instructional specialist program is available as an added endorsement for undergraduate students admitted to an elementary education program.

Undergraduate students admitted to a Teacher Education Program must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program [p. 437]. They must satisfy General Education's Quantitative or Formal Reasoning requirement with a college-level mathematics course.

The Office of Student Services provides information on Teacher Education Programs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office's website.

Undergraduate Admission to TEPs
Undergraduate applicants to the University of Iowa who wish to become teachers may indicate their interest in the elementary education major or a secondary-level Teacher Education Program (TEP) on their application for admission. Application materials for Teacher Education Programs are available from the Office of Student Services or on the office's website.

Acceptance to a Teacher Education Program is prerequisite to registration for most College of Education undergraduate courses.

Application Deadlines
Application deadlines for all Teacher Education Programs are as follows.

- Summer session and fall semester: March 1
- Spring semester: October 1

Late applications are not accepted.

General Requirements
Admission to Teacher Education Programs is competitive. Admission requirements may vary by program area. Faculty members in each program area review and select students to be admitted to their program. In order to be considered for admission to a Teacher Education Program, an undergraduate student must satisfy the following requirements: admission to the University of Iowa; a minimum amount of credit for college-level work; a minimum grade-point average; minimum scores on a preadmissions test; and a preadmission volunteer field experience in a regular K-12 classroom setting. There may be additional requirements. Teacher Education Program application materials and current minimum application requirements are available on the Office of Student Services website.

Direct Admissions Policy
Any student entering the University of Iowa who, upon graduation from high school, has a composite score equal to or greater than 27 on the ACT and a minimum high school g.p.a. of at least 3.80 will be directly admitted into the elementary Teacher Education Program.

Any student who, upon graduation from high school, has a high school g.p.a. of at least 3.20 and who has been accepted
into a music studio will be directly admitted into the K-12 music licensure program. Admission is contingent upon submission and acceptance of official verification of a music student's high school grade-point average prior to the start of the student's first year at the University of Iowa.

**Graduate and Postbaccalaureate Admission to TEPs**

Students who have completed a baccalaureate degree may be admitted to a Teacher Education Program (TEP) as graduate or undergraduate students. Students must apply to the TEP and to the Graduate College or the College of Liberal Arts and Sciences. In some programs they may apply for a master's degree objective—either a Master of Arts in Teaching (M.A.T.) or in selected majors, a Master of Arts (M.A.).

Students who choose to pursue a graduate-level teacher preparation program must be eligible for admission to the Graduate College, which requires a g.p.a. of at least 3.00 in all previous college course work. They must submit an official Graduate Record Exam (GRE) General Test score report, with scores that meet the minimum score requirement. They also must submit a complete application to the Teacher Education Program; see the Iowa Graduate Admissions website.

Students also may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this option must apply to the appropriate Teacher Education Program, following the undergraduate admissions procedure, and must meet the general requirements for undergraduate admission to the University of Iowa; see the Iowa Undergraduate Admissions website.

Application deadlines for graduate students and postbaccalaureate students with senior standing are March 1 and October 1.

**TEP Standards and Policies**

Students in the Teacher Education Program must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed from the Teacher Education Program or denied admission to student teaching. For more information on standards and policies, consult the Office of Student Services.

**Electronic Portfolio**

Students in the Teacher Education Program document their achievement of professional standards on ePortfolio, a web-based program in which they collect instructional artifacts and performances assigned in all their courses. Students receive instruction on the ePortfolio requirement beginning with the required course EDTL:3002 Technology in the Classroom (teacher education) and EPLS:4180 Human Relations for the Classroom Teacher (educational leadership).

**Teacher Leader Professional Development Program**

Teachers from the University of Iowa are distinguished by their preparation with world-class faculty researchers and clinical practitioners and a one-of-a-kind professional development program that highlights contemporary issues in 21st-century education. All requirements must be completed prior to student teaching. All teacher education students are required to participate.

**Student Teaching**

The final phase of the Teacher Education Program (TEP) is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. The student teaching semester is a full-time, all-day, experience. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers' experiences. Transfer credit may not be used to satisfy the student teaching requirement.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Student Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 30 for students planning to student teach the following fall semester and April 30 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college's required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas.

For more information, contact the Office of Student Services.

**Waivers**

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

**Urban Student Teaching**

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Clark County, Nevada (Las Vegas area); Chicago Public Schools; Aldine, Texas (Houston area); Rialto, California (Los Angeles area); and St. Louis Park, Minnesota (Minneapolis area). These options are open to all education majors who meet the requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Student Services.

**International Student Teaching**

International student teaching experiences are available primarily through Global Gateway for Teachers, an Indiana University Program working in collaboration with the University of Iowa. Sites include Australia, China, Costa Rica, Ecuador, England and Wales, Greece, India, Ireland, Italy, Japan, Kenya, New Zealand, Norway, Russian Federation, Scotland, Spain, and Turkey.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program
areas (for instance, English education) are required to
complete a full semester of student teaching in the United
States before student teaching at an international site.
For more information about international student teaching
opportunities, contact the Office of Student Services.

Teacher Licensure/Certification
The Iowa Board of Educational Examiners issues teacher,
support service, and administrator licenses on the
recommendation of Iowa colleges and universities whose
programs have been approved by the Iowa Department of
Education. All University of Iowa preparation programs have
Iowa Department of Education approval.
Licensure/certification requirements across the nation are
subject to change. Students who plan to seek employment
in a state other than Iowa should make every effort to be
informed about current requirements in that state. Many
states require some type of competency testing. Generally,
students who apply out-of-state should first secure Iowa
licensure.
To be recommended by the University of Iowa, applicants
must complete all requirements of the appropriate approved
program. A minimum of 20 s.h. of course work applied to meet
program requirements must be earned at the University of
Iowa. Fingerprinting is required for all new applicants for Iowa
licensure; the State of Iowa has outlined specific procedures
for the fingerprinting process.
As a requirement for completion of an approved Teacher
Education Program for initial teaching licensure, the state
of Iowa requires a passing score on two tests: a test that
measures pedagogy and a test that measures knowledge of
at least one content area. Current requirements are for Praxis
II tests that are specific to a student’s program. The tests are
required before recommendation for licensure or certification
to any state.
The College of Education Office of Student Services provides
Iowa application forms, fingerprinting procedures, and
licensure/certification assistance to all students completing
approved programs offered by the college. It also provides
assistance to individuals interested in adding endorsements
to their Iowa license based on completion of State of Iowa
minimum licensure requirements.

State of Iowa Requirements
All University of Iowa students seeking an Iowa teaching
license must complete EPLS:4180 Human Relations for the
Classroom Teacher and EDTL:4900 Foundations of Special
Education, or approved substitutes. Human relations courses
offered through community colleges are not accepted. In the
State of Iowa, applicants must be at least 21 years old to be
granted a teaching license. Applicants who have been found
guilty of a felony are barred from receiving an Iowa teaching
license. Appeals may be filed directly with the Iowa Board of
Educational Examiners.

Belin-Blank Center for
Gifted Education and Talent Development
The Connie Belin and Jacqueline N. Blank International Center
for Gifted Education and Talent Development conducts
research, training, and service in gifted education and
disseminates information on the education of gifted students.
Located in the Blank Honors Center, its programs and
services include the Belin-Blank Fellowship Program in Gifted
Education, practicum and internship experiences, and course
work in gifted education (including coordinating the state
endorsement). Pre-college student programs include: Invent
Iowa, Scholastic Art & Writing Awards, above-level testing
for students in grades 2-9, precollege summer and academic
year programs for high-ability students in grades 2-11,
and programs for international students. The center also
administrates the Iowa Online Advanced Placement Academy
and the Wallace Assessment and Counseling Clinic, which
specializes in twice-exceptionality; and the Acceleration
Institute, which is dedicated to the study of curricular
acceleration for academically talented children.
In addition to the honors program for College of Education
students, the Center administers three University-level
student programs: the Iowa Talent Project, developed for
under-represented minority students from gifted programs
in Des Moines and Cedar Rapids, Iowa; the Bucksgaum Early
Entrance STEAM Academy, a highly selective early-entrance
program for students who have completed their sophomore
or junior year in high school; and the Hong Kong Scholars
Program, an early decision program that admits selected high
school seniors from Hong Kong to the University of Iowa.
The center also provides practicum and internship
experiences for undergraduate and graduate students and
coordinates course work for the Iowa Talented and Gifted
Endorsement. For more information, contact the Belin-Blank
Center.

Blommers Measurement
Resources Library
The Paul Blommers Measurement Resources Library includes
books, journals, research reports, and reference materials
related to educational and psychological measurement,
testing, assessment, and evaluation, as well as an extensive
collection of published and unpublished tests. The library
supports the teaching and research needs of faculty, staff,
and students at the University of Iowa, primarily serving the
College of Education.

Center for Advanced Studies in
Measurement and Assessment
The Center for Advanced Studies in Measurement and
Assessment (CASMA) pursues interdisciplinary research-

Resources

Baker Teacher Leader Center
The Baker Teacher Leader Center (TLC) helps students in
the Teacher Education Program realize their career and
professional goals and become leaders as 21st-century
teachers. The center provides students with access to key
individuals in the Teacher Education Program (TEP) and offers
core student support in one central location. Its technology-
enhanced Learning Commons has collaborative work spaces
for students, faculty, and staff. The facility models new and
innovative technologies in education and supports seminars,
workshops, and presentations. Community partnerships with
area education agencies, community organizations, and
schools provide access to classrooms where future teachers
can innovate, improve, collaborate, develop, and discover
their identities as teacher leaders.
based initiatives that lead to advances in the methods and practice of educational measurement and assessment. CASMA performs, promotes, fosters, and disseminates research in measurement and psychometric methodologies that respond to contemporary needs and initiatives in testing.

Currently, the center devotes considerable resources to research on equating, scaling, and generalizability theory; it also offers workshops and training sessions on those topics.

Extensive free suites of computer programs for equating are available on the CASMA website. The site also features research reports and technical notes on measurement topics such as generalizability theory, equating methods, revolutions and evolutions in educational testing, and decision consistency with complex assessments.

Center for Disability Research and Education
The Center for Disability Research and Education (CDRE) provides a bridge between research and practice to facilitate interdisciplinary collaboration and implementation of evidence-based practices and to conduct research that meets the needs of individuals with disabilities.

Center for Evaluation and Assessment
The Center for Evaluation and Assessment (CEA) conducts evaluations, research studies, and professional development initiatives. The center's mission is to promote the sound use of assessment results, provide high-quality evaluation services to clients, create effective training activities for graduate students, improve the quality of evaluation theory and practice, and contribute to research on program evaluation and assessment.

The center conducts evaluations in a broad range of areas: clinical and translational science, minority recruitment and retention, delivery of social and human services, curriculum and instruction, professional training, and the impact of public policy on PK-12 education. The center's staff members consult with universities, school systems, and other policy-making organizations in Iowa and nationwide that use evaluation studies and assessments to make important decisions regarding individuals or organizations. The center also provides training and professional development in program evaluation and assessment.

Center for Research on Undergraduate Education
The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students' chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

College of Education Writing Resource
The Writing Resource provides graduate students with a writing tutor who can assist with academic writing to revise, discuss, and offer a one-to-one workshop setting as graduate students prepare papers. This is a collaborative process, requiring both student and tutor to improve the paper’s content.

Cooperating Schools Program
The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects and service-learning projects conducted by faculty, staff, and students in public schools throughout Iowa. The program provides information to help researchers obtain permission to conduct research in Iowa schools. The Cooperating Schools Program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

Education Technology Center
The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. In addition to Internet access, services include collegiate file and application servers; standard office tools; specialized applications such as media production tools and qualitative and quantitative analysis programs; secure folders and directories; and electronic mailing lists for faculty, staff, and student groups. The ETC also provides website and digital signage (kiosk) development for College of Education departments, offices, and groups.

The Education Technology Center provides faculty with technical and design support for online course management, research technologies, distance education, multimedia, and ePortfolio production.

Polycom videoconferencing, SMART Boards and SMART Podiums, and wireless access are available throughout the college. Every classroom and conference room has a digital presentation system, and five classrooms are outfitted for videoconferencing and distance education instruction.

Faculty members and students can check out wireless laptops, computer projectors, audience response systems (clickers), digital audio recorders, digital video cameras, iPads, and other devices from the center. In all, the College of Education supports more than 850 computers, laptops, PDAs, and smartphones as well as seven servers.

Grants and Research Services Center
The Grants and Research Services Center (GRSC) provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

Institute on Disability and Rehabilitation Ethics
The Institute on Disability and Rehabilitation Ethics (IDARE) is a cross-disciplinary, cross-institutional online community of scholars. Its goal is to use research, education, and consultation to improve the quality of ethical practice experienced by people with disabilities who receive services from rehabilitation, health, mental health, and social service professionals. IDARE works to influence disability policy and practice development nationally and locally and to influence
professional organizations' consideration of ethical issues that affect people with disabilities and other marginalized populations.

**Iowa Center for Assistive Technology Education and Research**

The Iowa Center for Assistive Technology Education and Research (ICATER) helps to ensure equal access and opportunities for persons with disabilities by advancing assistive technology through research, education, and service. The center collaborates with University and community programs to provide technical assistance that enhances the services and resources available to educators, service providers, and persons with disabilities. It also sponsors workshops and education programs. The center’s assistive technology laboratory is available for student use, demonstrations, consultations, and research.

**Iowa Supports Education and Resources for Veterans and Enlisted**

Iowa Supports Education and Resources for Veterans and Enlisted (I-SERVE) was created to help facilitate successful transitions for veterans and enlisted service members into higher education at the University of Iowa. The center is located in the Teacher Leader Center, on the first floor of the North Lindquist Center. The program assists veterans with accessing benefits, the application process, completing course work, preparing for and searching for jobs, and achieving overall career success.

**Iowa Testing Programs**

Iowa Testing Programs (ITP) provides assessment expertise to schools in the State of Iowa and consultation to the Iowa Department of Education and to area education agencies. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Assessments, for use in elementary and secondary schools, as well as other assessment tools to support instruction and learning. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting and in-service training to educators and school systems, and provides training experience for graduate students in educational measurement and evaluation.

**Libraries**

University of Iowa Libraries provides a wide variety of resources in print and online. Course reserve materials are available at the Main Library, just across the street from the College of Education; at the Hardin Library for the Health Sciences, on the health sciences campus; and at the Science Library, near the center of campus. An education librarian, whose office is in the College of Education, is available to help students with their research projects and assist faculty members and teaching assistants with their research and instructional needs.

**Office of Graduate Teaching Excellence**

The Office of Graduate Teaching Excellence (OGTE) is dedicated to excellence in college teaching and the preparation of future faculty. The office facilitates opportunities for research, teaching, and service. Through the Iowa Education Fellows Program (i-fellows), OGTE develops and conducts workshops and seminars that address the developmental needs of College of Education doctoral students, from their first semester on campus through completion of their degrees. The office also guides graduate students through the process of earning the Certificate in College Teaching (Graduate College).

**Office of Student Services**

The Office of Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state. A variety of application and information materials are available at the office and on its website.

**Statistics Outreach Center**

The Statistics Outreach Center (SOC), a service of the College of Education and Iowa Testing Programs, helps the college’s faculty, staff, and students use quantitative statistical methods to produce high-quality research. The center offers short-term consulting on statistical data analysis and grant proposals to the College of Education at no charge and provides services to departments and grants outside the college on a fee basis. The SOC also offers a variety of educational opportunities involving statistical software. Information on course schedules, events, resources, and an appointment request form is available on the Statistics Outreach Center website.

**UI Helping Professional Workshops**

The UI Helping Professionals Workshops (IHELP) program provides affordable workshops intended to enhance the personal and professional development of helping professionals. The program offers Continuing Education Units (CEU’s) for community, agency, and education practitioners working with or interested in individuals, groups, families, and organizations.

**Financial Support**

College of Education students may be eligible for scholarships, awards, or graduate assistantships. Information about financial support for students is available at Scholarships and Awards on the college’s website. The Graduate College posts a list of open assistantships on its website; see Graduate Grants and Assistantships.

Students interested in employment opportunities in the college’s support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at the University of Iowa.

**Graduate Assistantships**

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries
Special Graduate Research Assistantships in Education

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Applicants must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Exam (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs director. Application deadline is late February.

Scholarships and Awards

The College of Education presents a number of awards funded by donors; recipients must meet the criteria established by the donors for their awards. Recipients are presented with their award at a spring semester luncheon. For more information, see Scholarships and Awards on the college’s website.

Duane D. Anderson Memorial Scholarship: awarded to a transfer student from an Iowa community college who is currently enrolled in a program in the College of Education.

Jack Bagford Elementary Education Scholarship: presented to an undergraduate or graduate student in elementary education who will be student teaching during the academic year following the award; recipient must be a resident of Iowa.

David and Connie Belin Honors Award: presented to graduating seniors who have completed all requirements for the Honors Opportunity Program.

Blommers-Hieronymus-Feldt Fellowship: presented to doctoral students in educational measurement and statistics.

Lowell Brandt Rehabilitation Counseling Award: presented to graduate students pursuing a master’s degree in the rehabilitation counseling program.

Barry Bratton Award for Achievement in Design of Instructional Processes: presented to graduate students who have completed course work that reflects a commitment to the systemic design and improvement of instructional processes and materials.

Dr. Bettye M. Caldwell and Dr. Fred T. Caldwell Scholarship: presented to undergraduate students interested in pursuing careers in early childhood development including the fields of education, sociology, psychology, and other related academic programs.

Jake and Kimberly Chung Scholarship: presented to a teacher education student for their student teaching semester.

Debra Clausen Memorial Scholarship: presented to a graduate student in the College of Education who will work at the Hospital School (now the Center for Disabilities and Development) to evaluate and develop learning programs for students with mental disabilities, including Down’s Syndrome, or to students pursuing careers in special education.

T. Anne Cleary Psychological Research Scholarship: presented to students in the Department of Psychological and Quantitative Foundations.

College of Education Dean’s Scholars: presented to high achieving students who desire to become teachers.

John Leonard Davies Scholarship: presented to a student who is a first- or second-semester senior in the Department of Teaching and Learning who is viewed as being creative and having outstanding potential for success in the field of K-12 education.

Harvey H. Davis Memorial Scholarship: presented to outstanding graduate students in educational leadership with preference given to students interested in the financing of education.

Dr. Mary Agnella Gunn Memorial Scholarship: presented to worthy undergraduate or graduate students in education.

John H. Haefner Memorial Scholarship: presented to a student who will be student teaching in the area of social studies.

Gladys and Margaret Harvey Education Scholarship: presented to students who show financial need and are enrolled in the College of Education.

Emma E. Holmes Education Scholarship: presented to an outstanding undergraduate or graduate student in any program in the College of Education; based on merit and need, the recipient must be a U.S. citizen with first preference for a student in the top 20 percent of their class, second preference for a student with demonstrated financial need.

Albert Hood Promising Scholar Award: presented to a doctoral student in the Department of Rehabilitation and Counselor Education and a student in the higher education and student affairs program with an approved prospectus.

H.D. Hoover Scholarship: presented to a graduate student working on mathematics achievement testing in the elementary grades.

Howard K. and Mathilda Ihrke Student Success Scholarships: presented to first-generation undergraduate and graduate students in the Teacher Education Program.

Howard R. Jones Achievement Award: presented to worthy undergraduate or graduate students in education.

Kyle C. and Eula B. Jones Scholarship: presented to undergraduate and graduate students planning careers in elementary and secondary education and administration.

Charlotte and Ruby Junge Scholarship: presented to undergraduate or graduate students in elementary or secondary education who will be student teaching for a full semester.

Daniel G. Loetscher Memorial Science Education Scholarship: presented to students pursuing secondary education with an emphasis in the sciences, with preference given to those pursuing an emphasis in chemistry.
Perry Eugene McClenahan Memorial Scholarship: presented to an outstanding graduate student in educational administration.

Sheila E. McFarland Memorial Scholarship: presented to a student who will be student teaching for a full semester in the area of elementary education, preference for this award will be given to an Iowa resident.

Leonard A. Miller Memorial Scholarship: presented to an outstanding first-year M.A. student in rehabilitation counseling.

Minority Student Award: presented to undergraduate or graduate students of color.

Helen Mackin Nichol Memorial Scholarship: presented to students from Iowa who are in secondary education and plan to teach and work with mentally and emotionally disturbed children.

Melvin R. Novick Award in Educational Measurement and Statistics: presented to a third- or fourth-year doctoral student in educational measurement and statistics who has at least a year of study remaining.

Paul Opstad Scholarship: presented to a full- or part-time graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students.

Margaret P. Park Scholarship: presented to deserving students in the College of Education with preference given to students from St. Louis County, Minnesota; Rock Island County, Illinois; or Iowa.

Guy and Gladys Peterson Scholarship: presented to students admitted to the Teacher Education Program who have completed at least 12 s.h. of education course work.

Betty Piercy Award: presented to a deserving student in the field of reading.

Ann Ramsey and Richard E. Posey Scholarship: presented to a student who is a junior pursuing a career in teaching or education.

Rolland Ray Award: presented to doctoral students completing a dissertation concerned with measurement in mathematics education, science education, social studies education, or English education.

Mary Maxine Redmond Scholarship: presented to undergraduate students from Iowa enrolled in the College of Education.

Judith Young Saunders Scholarship: presented to an undergraduate or graduate student who is pursuing a degree in teacher education, with preference given to students with severe visual impairments.

Judy Skalsky Memorial Scholarship: presented to an undergraduate or graduate student majoring in art education.

Margaret A. Sloan Scholarship: presented to undergraduate or graduate students in the College of Education.

Lloyd Smith Scholarship: presented to students in elementary social studies.

Maureen Medberry Snell Education Award: presented to outstanding students in the College of Education.

Carol M. and Ed Stenson Scholarship in Education: presented to undergraduate students pursuing a special education certification or degree in general teacher education who exhibit both financial need and academic merit.

Drs. Andrew and Jeanne Stevenson Scholarship: presented to students in the College of Education with preference to students studying science education who plan to one day teach science education.

Franklin D. Stone and Louise P. Stone International Scholarship: presented to an outstanding international student pursuing a Ph.D. in the College of Education.

James and Coretta Stroud Fellowship: presented to an outstanding graduate student in educational psychology.

Grace Phelps Stucker Scholarship: presented to an outstanding undergraduate or graduate teacher education student.

Edgar M. and Evelyn Benzler Tanruther Scholarship: presented to undergraduate and/or graduate students in elementary education.

University High School Innovative Development in Education Award (IDEA): presented to students during their secondary student teaching experience.

Emily C. Wagner Scholarship: presented to an undergraduate student in secondary education with an English education teaching degree who will be student teaching in the academic year following the award, preference for students who are residents of Iowa with a g.p.a. of at least 3.00 and demonstrated financial need.

Erwin and Louise Wasta International Scholarship: presented to an international student in the College of Education.

Courses

Most College of Education courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections under “Courses”; see the links at the right side on this page. The college also offers the following interdepartmental courses.

Education Interdepartmental Courses

EALL:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EDTL:4081, EPLS:4081, PSQF:4081, RCE:4081.

EALL:4130 Introduction to Grant Writing 3 s.h.
Comprehensive training in grant proposal writing; basics of project development and management; core principles for writing small and large proposals to public and private funding sources; finer points of grant writing to increase competitiveness of future proposals and applications; for students with limited grant writing experience. Same as MUSM:4150.

EALL:5150 Introduction to Educational Research 3 s.h.
Principles of empirical educational research; logic of inquiry for both quantitative and qualitative research methodologies.
EALL:7387 Introduction to Online Post-Secondary Course Design and Facilitation 3 s.h.
Knowledge of distance learning and teaching at the post-secondary level; instructional design principles relevant to development of online courses.

EALL:7475 Ph.D. ePortfolio in College Teaching 3 s.h.
Framework for connecting authentic evidence of scholarly work and teaching competencies; use of advanced web and multimedia technologies to link artifacts to ePortfolio templates.

Education Honors Opportunity Program Courses

EHOP:4100 Honors Seminar in Education 2 s.h.
Research in education and related professions in collaboration with a College of Education faculty member of student’s choice; preparation for senior honors project.

EHOP:4101 Senior Honors Project 1-2 s.h.
Collaboration with a faculty member on research project; written report. Prerequisites: EHOP:4100.
Educational Policy and Leadership Studies

Graduate degrees: M.A. in educational policy and leadership studies; Ed.S. in educational policy and leadership studies; Ph.D. in educational policy and leadership studies

Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/epls

The Department of Educational Policy and Leadership Studies offers academic programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational leadership, higher education and student affairs, and schools, culture, and society. The department also offers joint programs with other College of Education departments and with other University of Iowa colleges.

The department offers graduate degree programs in three major areas within educational policy and leadership studies:

- educational leadership (offered in the M.A., Ed.S., and Ph.D.), including an interdisciplinary program in school curriculum and assessment policy (offered in the Ed.S.);
- higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.); and
- schools, culture, and society (offered in the M.A. and Ph.D.).

The areas are described below under "Graduate Study Areas," followed by information about each degree program.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Graduate Study Areas

Educational Leadership

Study in educational leadership prepares individuals for leadership positions. In addition to graduate degree programs, the area includes principal licensure and superintendent endorsement. See Master of Arts [p. 1055], Specialist in Education [p. 1058], and Doctor of Philosophy [p. 1059] in this section of the Catalog.

Licensure

To be eligible for recommendation by the University of Iowa for licensure in Iowa as a principal or superintendent/area education agency administrator, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Student Services. Students who hold an M.A. must satisfy all core requirements and must complete at the University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative license has specific requirements, candidates are required to plan their programs with their advisors' approval.

Superintendent Endorsement

The superintendent endorsement curriculum is designed to prepare individuals for licensure as a school superintendent (pre-K-12) as well as for other school district leadership positions; for the chief administrator position in Iowa's area education agencies (AEA) as well as other AEA leadership positions; and for leadership positions in state or federal departments of education and related agencies. The superintendent endorsement requires a total of 30 s.h. of credit.

School Curriculum and Assessment Policy

The interdisciplinary program trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation. See Specialist in Education [p. 1058] in this section of the Catalog.

Higher Education and Student Affairs

Advanced study in higher education and student affairs draws upon diverse perspectives from varied disciplines and professional fields to analyze critical issues and policies and their effects on students, faculty, administrators, staff, and other members of the higher education community. It also explores the complex interactive relationships among institutions of higher education, the external environment, and society at large.

Graduate degree programs in higher education and student affairs prepare professionals and scholar practitioners to serve as administrators, researchers, educators, and analysts in institutions of higher and postsecondary education and in related public and private agencies. The programs provide opportunities for concentrated study in student affairs administration; higher education policy and leadership; teaching, learning, and curriculum; and cultural foundations of higher education. See Master of Arts [p. 1055], Specialist in Education [p. 1058], and Doctor of Philosophy [p. 1059] in this section of the Catalog.

Schools, Culture, and Society

Schools, culture, and society is an interdisciplinary area that enhances students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in the formal social enterprise of education. See Master of Arts [p. 1056] and Doctor of Philosophy [p. 1061] in this section of the Catalog.

Programs

Graduate Programs of Study

Majors
- Master of Arts in Educational Policy and Leadership Studies [p. 1055]
Courses

Educational Policy and Leadership Studies Courses

EPLS:1029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

EPLS:2098 The Student Affairs Profession 3 s.h.
Introduction to field of student affairs in context of higher education; focus on foundations of profession, including a brief history of field, professional associations, institutional differences, professional and ethical standards, functional areas in higher education, student learning and developmental theory, overview of graduate preparation, and current topics.

EPLS:3000 Foundations of Education 3 s.h.
Overview of American education, preschool through secondary; aims, history, philosophy of education; professional ethics, legal responsibilities; school curriculum, organization, finance, school law, political and social issues.

EPLS:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, PSQF:4081, RCE:4081.

EPLS:4110 Administration and Policy in Gifted Education 2 s.h.
Policy, administrative, evaluation issues in developing and maintaining gifted programs in a school setting; participants develop gifted program and policies for a school; for school executives and coordinators of gifted programs.

EPLS:4111 Evaluation of Gifted Programs 1 s.h.
Fundamentals of program evaluation essential for exemplary gifted programs.

EPLS:4113 Staff Development for Gifted Programs 1 s.h.
Planning, content, and delivery of staff development regarding gifted students and their needs.

EPLS:4150 Leadership and Public Service I 3 s.h.
Preparation for providing public service to a local community; leadership skills for effective mentoring of children in grades 6-10.

EPLS:4151 Leadership and Public Service II 2 s.h.
Preparation to provide leadership and public service to a local community agency; being a leader and a public servant in the context of societal oppressions such as racism, sexism, able-bodiedism; part of the human relations minor. Prerequisites: EPLS:4150.

EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.
Influence of social factors such as discrimination, diversity, equity, racism, sexism, and ethnic and socioeconomic pluralism on American schools and classrooms; for teacher education candidates. GE: Values, Society, and Diversity.

EPLS:5100 Issues and Policies in Higher Education 3 s.h.
Development of the idea of a university; selected functions, issues, policies of American higher education.

EPLS:5102 History of American Education 3 s.h.
Purposes of public education, diversity, and control of schooling from a historical perspective; emphasis on conflicting interpretations of pivotal events and educational movements; connections between educational policies and larger historical developments.

EPLS:5104 Education in the Third World 2-3 s.h.
Educational implications of various development issues, including role of media, and multinational corporations and foreign aid; educational dilemmas currently facing Third World governments.

EPLS:5123 History of Ethnic/Minority Education 2-3 s.h.
Educational histories of American ethnic and minority groups; comprehensive understanding of American educational history, context for contemporary educational policy discussions.

EPLS:5126 Twentieth-Century Educational Movements 2-3 s.h.
Current educational policy debates concerning diversity and equity, historical roots of these policies; historical context for 20th-century equal education opportunity movements.

EPLS:5130 Sociology of Education 3 s.h.
Effects of school and school organization on educational outcomes; course-taking patterns and tracking, desegregation, differences in school sector; focus on entire span of student’s academic career; examination of school and organizational effects at the primary, secondary, and postsecondary levels of education. Same as SOC:5130.

EPLS:5131 Race, Class, and Gender Inequalities in Education 3 s.h.
Role of ascribed characteristics (e.g., race, class, gender) on educational opportunities and outcomes; achievement gaps, school desegregation, social and cultural capital, peer influence, family attributes, neighborhood influence, influence of significant others, course-taking patterns, and educational destinations. Same as SOC:5165.

EPLS:5134 Education and the World of Work 2-3 s.h.
Relationship between education and work in individual and organizational behavior, and between educational and economic systems; economics, psychology, sociology, education.

EPLS:5142 Sociology of Higher Education 3 s.h.
Sociological approach to study of higher education; issues of inequality and stratification in higher education; focus on relationship between higher education and larger economic and demographic processes; college access, college destinations, attainment, and returns to a college degree. Same as SOC:5680.

EPLS:5154 Education, Race, and Ethnicity 2-3 s.h.
Role of education in ethnic and racial groups in contemporary and/or historical context. GE: Values, Society, and Diversity.
EPLS:5155 Critical Thinking 3 s.h.
Formal and informal logic and probabilistic reasoning; focus on construction and critical analysis of arguments; introduction for students planning research in social foundations.

EPLS:5156 Philosophies of Education 2-5 s.h.
Principal educational philosophers and philosophies that have influenced Western education; emphasis on how philosophical ideas and conflicts have shaped the educational scene.

EPLS:5157 Ethics in Education 3 s.h.
Major theories of the nature of ethical action and of value judgment; theoretical accounts related to the practical decision making contexts of teaching.

EPLS:5158 John Dewey and Education 2-3 s.h.
Dewey’s philosophy of instrumentalism, with emphasis on his theories of knowledge, valuation, aesthetics, especially as applied to educational theory and practice.

EPLS:5165 Introduction to Program and Project Evaluation 3 s.h.
Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as PSQF:5165.

EPLS:5195 Research in Cross-Cultural Settings 3 s.h.
Cultural, psychological, logistical issues in conducting research in foreign settings; development of a research plan, recent debates in ethnographic research literature.

EPLS:5210 Education and Social Change 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as SOC:5810.

EPLS:5240 Topics in Education arr.
Seminar for intensive study of one problem, issue, or work field.

EPLS:5245 The American Professoriate 3 s.h.
Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.

EPLS:5247 Multiculturalism in Higher Education 3 s.h.
Theory and application of multicultural competency in higher education.

EPLS:5250 Introduction to Student Affairs 3 s.h.
Foundations of student affairs work; overview of institutional cultures, legal issues, ethical principles, standards of practice in student affairs.

EPLS:5251 College Students and Their Environments 3 s.h.
Characteristics of college students and issues they face; students’ institutional, social, cultural environments; impact of environments on student learning, development.

EPLS:5252 Administration of Higher Education and Student Affairs 3 s.h.
Administrative structures and processes in higher education settings. Requirements: higher education and student affairs major.

EPLS:5253 Assessment in Higher Education and Student Affairs 3 s.h.
Theories, practices, and issues relevant to assessment of student outcomes and institutional effectiveness in higher education; basic overview of research, assessment, and evaluation; elements of assessment design, including methods for data collection and analysis; relevant ethical and political dilemmas; practical assessment activities. Requirements: M.A. standing in higher education and student affairs program.

EPLS:5278 Helping Skills in Student Affairs Work 3 s.h.
Development of ability to identify, understand, and intentionally apply the active attending and influencing skills; readings and class presentations.

EPLS:6201 Foundations of School Administration 3 s.h.
Organization and administration of American public education; principles and concepts of leadership and organizations; socioeconomic, political, and professional factors relating to education and school administration.

EPLS:6206 Research Process and Design 3 s.h.
Research process, with emphasis on fundamentals of experimental design, internal and external validity, correlational designs, and statistical inference.

EPLS:6209 Survey Research and Design 3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: EPLS:6206 or PSQF:4143. Same as PSQF:6209.

EPLS:6216 Finance in Higher Education 3 s.h.
Theory, research, policy, and practice related to public and private funding of higher and postsecondary education.

EPLS:6217 Theory and Practice of Leadership 2-3 s.h.
Theory-based literature and critiques of leadership as applied to educational institutions.

EPLS:6218 The Law and Higher Education 3 s.h.
The role of law as it affects postsecondary institutions; analysis of case law in specific areas of concern to administrators, faculty, staff, students.

EPLS:6220 History of Higher Education 3 s.h.
History of postsecondary education in the United States; emphasis on conflicting interpretations of pivotal developments; consideration of access, curriculum, student life, academic freedom, role of universities in society, and balance of teaching, research and service from a historical perspective.

EPLS:6221 The College Curriculum 3 s.h.
Issues, principles, policies, and practices in college curriculum development; diverse philosophical, historical, cultural, social, psychological, political foundations of contemporary college curricula; perspectives on and models of college curriculum, related processes of teaching and learning; principles and practices that guide design and change of higher education curriculum.

EPLS:6222 Introduction to Policy Analysis and Evaluation 3 s.h.
Theoretical and technical approaches to analysis and evaluation of contemporary public policies.

EPLS:6224 Organizational Theory and Administrative Behavior 3 s.h.
Theories and concepts of organizational behavior applied in structural, organizational, administrative contexts of American education.
EPLS:6225 Introduction to Public Policymaking 3 s.h.
Overview of state level higher education structures and policies; research on state level policy processes.

EPLS:6226 Educational Management 2-3 s.h.
Literature and research on management; emphasis on American education.

EPLS:6228 Policy Design and Implementation 2-3 s.h.
Review of literature, emphasis on policy drafting skills for administration and management in education and other settings.

EPLS:6236 Administration of Students with Special Needs 3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as EDTL:6936.

EPLS:6237 History of the Teaching Profession 3 s.h.
History of public school teaching, and teachers' problematic professional status; teacher education in the 19th and 20th centuries; formation and activities of teacher unions in the 20th century.

EPLS:6238 Gender and Education in Historical Perspective 3 s.h.
Gender in context of history of education in the United States; coeducation in common schools, academies, and high schools; women's arrival and experiences as college students; masculinity in higher education; single-sex versus coeducation; emphasis on conflicting historical interpretations. Same as GWSS:6238.

EPLS:6242 Research for Effective School Leaders 3 s.h.
Fundamental language of contemporary research; identification and application of basic research components to contemporary educational leadership problems; applicability of research toward effective decision making.

EPLS:6260 Contemporary Management Strategies for the Pre-K-12 Principal 3 s.h.
Leadership skills and management techniques for daily organization and operation of schools; emphasis on climate, communication, group processes, conflict resolution, curriculum management.

EPLS:6265 Standards-Based Education and Accountability 3 s.h.
Standards-based education; academic content standards, K-12 articulation, alignment studies, use of standardized test results to evaluate academic programs.

EPLS:6266 Program Evaluation 3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization. Same as PSQF:6265.

EPLS:6270 Policy and Politics of Leadership 3 s.h.
Current issues from academic journals, states, think tanks, consortia.

EPLS:6273 The College Student 3 s.h.
Overview of theories, research, practices, and issues relevant to understanding students in institutions of higher education. Requirements: Ph.D. standing in Higher Education and Student Affairs program.

EPLS:6275 Diversity and Equity in Higher Education 3 s.h.
Historical, contemporary, theoretical, and empirical aspects of diversity and equity in higher education; unique experiences of members of historically under-represented groups; challenges of transforming institutions to make them more responsive to the experiences of diverse groups.

EPLS:6285 School and Community Relationships 3 s.h.
Community analysis, politics and education, power groups and influences, school issues and public responses, public relations strategies.

EPLS:6290 Master's Project arr.
Research for the nonthesis program; topic approved by advisor.

EPLS:6293 Individualized Instruction arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest.

EPLS:6298 Legal Aspects of School Personnel 3 s.h.
Teacher and student: liability, negotiations, rights, privileges, responsibilities of school personnel; principles of law derived from court decisions; constitutional and statutory provisions; for teachers and administrators.

EPLS:6301 Professional Seminar in Student Affairs I 1 s.h.
Orientation to field; writing and academic support.

EPLS:6302 Professional Seminar in Student Affairs II 1 s.h.
Working with groups in higher education.

EPLS:6303 Professional Seminar in Student Affairs III 1 s.h.
Consulting, training, and curriculum development in student affairs.

EPLS:6304 Professional Seminar in Student Affairs IV 1 s.h.
Professional identity, job search support.

EPLS:6311 Seminar: Research Topic in Education 2-3 s.h.
Topic submitted by students, faculty.

EPLS:6315 Orientation to the Superintendency 3 s.h.
Leadership theory and research of the superintendent's role of increasing student achievement; personal goals for communication; ethics, integrity, flexibility, reflective, and collaborative leadership; expectations of the superintendent by the board of directors; defining one's role; developing an entry plan; dealing with social/emotional isolation of superintendency; and influences in the larger political, social, economic, legal, and cultural context.

EPLS:6317 Operational Leadership and Management 1 s.h.
Managing fiscal and physical resources responsibly, efficiently, and effectively; effective communication of school operations; leadership and management of nutrition program, transportation program, facilities, construction; board policy, legal issues; state reporting, ethical decision-making; relationship building, problem solving amidst barriers and various stakeholder groups.
EPLS:6319 Human Resources Leadership  2 s.h.
Leadership theory and research of the superintendent's role of aligning human resources practice and increasing student achievement; employment law; contract negotiations process/collective bargaining; contract maintenance; recruiting, selecting, developing, and retaining employees; working with labor unions and Public Employee Relations Board; special education law; Evaluator 2 Training. Requirements: EPLS:6206.

EPLS:6321 Social Advocacy Summit  1 s.h.
Summit format; challenges and opportunities in Iowa's K-12 schools with changing demographics; opportunity for K-12 school districts and higher education institutions to engage in conversation on how to meet the needs of students and local school districts.

EPLS:6323 School Finance  2 s.h.
Manage fiscal and physical resources; communicate effectively with internal and external audiences regarding school operations; comply with state and federal mandates and local board policies; align educational programs, plans, actions, and resources with the district vision and goals.

EPLS:6325 Organizational and Educational Leadership  2 s.h.
Facilitate connections of students and families to health and social services that support a focus on learning as a district level leader in a school district; collaboratively establish a culture that welcomes and honors families and community and seeks ways to engage them in students learning; AEA structure, compliance and regulatory functions including special education.

EPLS:6329 Legislative Summit  1 s.h.
Collaborate with families and community members, respond to diverse community interests and needs, and mobilize community resources as a district level leader in a school district; work with legislators, build advocacy groups in a community, engage stakeholders, how to lobby legislators and meet with local senate and house representatives to participate in lobbying.

EPLS:6332 College Student Psychosocial and Identity Development  3 s.h.
Theoretical models of psychosocial and identity development in college students; applications to student affairs work.

EPLS:6333 Practicum  arr.
Small-scale research projects; supervised experience in planning, design, management, analysis, reporting of research activities; assignments to current and personal faculty research projects; student assumes major responsibility.

EPLS:6334 College Student Learning, Cognitive, and Moral Development  3 s.h.
Learning and development of college students; theoretical models of learning, cognitive development, moral development; applications to student affairs work.

EPLS:6336 Impact of College on Students  3 s.h.
Introduction to literature; career and economic returns, values and attitudes, learning and cognitive development, assessment and methodological issues of studying college outcomes. Prerequisites: EPLS:6206.

EPLS:6370 Quantitative Methods for Policy Analysis  3 s.h.
Methodological strategies for quantitative research; analysis of secondary data to investigate educational issues and policies; recording variables, summation scaling and factor analysis, missing data, sample design and survey estimation, model building; implementation of linear and binary regression, regression diagnostics; hands-on experience conducting statistical analysis of social data. Prerequisites: PSQF:4143 and PSQF:6243.

EPLS:6381 Analysis and Appraisal of Curriculum  3 s.h.
Comprehensive investigation of systematic procedures and resources for identifying and evaluating essential features and constituent elements of a given school district's curricular offering; state and federal requirements of the curricular program; for persons in administration, curriculum, and supervision programs or positions.

EPLS:6383 Supervision and Evaluation  3 s.h.
Data collection and management skills; data-driven leadership; coaching and feedback techniques; teacher quality legislation; research and best practice regarding teacher evaluation, supervision; teaching standards.

EPLS:6400 Early Childhood Leadership Clinical  3 s.h.
Classroom instruction and supervised experience with problems in early childhood educational administration; organization, planning, evaluation, decision making.

EPLS:6401 Elementary Leadership Clinical  3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

EPLS:6402 Secondary Leadership Clinical  3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

EPLS:6403 Special Education Leadership Clinical  3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

EPLS:6404 Central Administration Clinical  3 s.h.
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

EPLS:6415 Orientation to the Superintendency: Clinical  2 s.h.
Clinical experience aligned with course topics and assignments in a K-12 school or other educational organization; development of a clinical plan with the guidance of a university professor and local school district mentor based on course requirements, career goals, and interests.

EPLS:6417 Operational Leadership Clinical  1 s.h.
Clinical experience aligned with course topics and assignments in the operational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
EPLS:6419 Human Resources Leadership Clinical 2 s.h.
Clinical experience aligned with course topics and assignments in the human resources leadership course; completion of a clinical experience in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

EPLS:6425 Organizational and Educational Leadership Clinical 1 s.h.
Clinical experience aligned with course topics and assignments in the organizational and educational leadership course; completion of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.

EPLS:7291 Administration of Educational Programs and Personnel 3 s.h.
Personnel and program planning examined against statements of educational purpose; interrelationships and internal consistencies of program and staff administration from perspectives of philosophy, psychology, learning theory, sociology, curriculum theory.

EPLS:7367 Seminar: Current Issues in Special Education Administration arr.
New developments in administration; new content each year. Prerequisites: EPLS:6236.

EPLS:7373 Qualitative Research Design and Methods 3 s.h.
Theory and practice of qualitative research design and methodology; exploratory field experience in collection and analysis of data; individual and focus group interviews, participant observation. Requirements: Ph.D. standing.

EPLS:7380 Practicum in College Teaching arr.
Supervised college teaching experience in courses related to major academic areas; collaboration with faculty course instructors.

EPLS:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, GRAD:7385, PSQF:7385, RCE:7385.

EPLS:7392 Mixed Methods Research 3 s.h.
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research;extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EDTL:7410.

EPLS:7395 Educational Specialist Research arr.
Individual instruction in the design, research, and writing of a research project of significant quality for upper-level graduate work.

EPLS:7432 Multicultural Initiatives 3 s.h.
Impact of culture, race, ethnicity, and intersection of identity in higher education, student affairs, and community agency settings; knowledge, skills, and competencies needed by teachers, student affairs professionals, social workers, counselors, and educational administrators to facilitate individual empowerment through relationships; focus on different ways to design multicultural initiatives to various professional work settings to promote diversity. Requirements: Ph.D. standing or advanced-level M.A. standing. Recommendations: introductory course on issues of race, culture, gender and/or any course on sociopolitical issues or structural oppression strongly recommended.

EPLS:7433 Current Issues in Higher Education and Student Affairs 3 s.h.
Current issues related to higher education; opportunity to clarify perspectives; review of literature in a particular area of interest; readings, class discussions, independent research, consultations with professionals in the field, student presentations. Requirements: higher education and student affairs Ph.D. standing.

EPLS:7444 Advanced Practicum in Student Affairs arr.
Supervised work experience in student affairs settings.

Supervision of research, design, and writing of Ph.D. thesis; individual instruction.
Educational Policy and Leadership Studies, M.A.

Educational Leadership

The Master of Arts program in educational leadership requires a minimum of 36 s.h. of graduate credit. The program prepares individuals for appointments as school principals and for positions in area education agencies and state departments of education. Upon completion of this degree, students will have completed the requirements to earn a master's degree from the University of Iowa and to obtain pre-K-12 principal and pre-K-12 supervisor of special education endorsement (State of Iowa endorsement 189). In order to obtain the State of Iowa endorsement, an individual must have at least three years of teaching at the pre-K-12 level.

With the aid of an advisor, each M.A. student prepares a plan of study that includes the following core requirements.

### Core Requirements

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPLS:6201</td>
<td>Foundations of School Administration</td>
<td>3</td>
</tr>
<tr>
<td>EPLS:6236</td>

<tr>
<td>EPLS:6383</td>
<td>Supervision and Evaluation</td>
<td>3</td>
</tr>
</tbody>
</table>

For Iowa licensure as a principal, students must hold an Iowa teacher license, have taught for three years, and meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and the following required clinical courses.

### Clinical Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EPLS:6400</td>
<td>Early Childhood Leadership Clinical</td>
<td>3</td>
</tr>
<tr>

<td>Secondary Leadership Clinical</td>
<td>3</td>
</tr>
<tr>
<td>EPLS:6403</td>
<td>Special Education Leadership Clinical</td>
<td>3</td>
</tr>
</tbody>
</table>

Students earning an M.A. without principal licensure are not required to complete the clinical courses. Instead, they complete a series of electives (12 s.h.) approved by their advisors. For more detailed information, see M.A. Educational Leadership programs on the Educational Leadership web page.

### Comprehensive Examination

Students in the M.A. program with licensure or the M.A. program without licensure will be required to take comprehensive examinations at the end of their program of study. The M.A. comprehensive examination for students consists of two parts: a general written examination in educational leadership covering material from all courses in the program, and a written examination that focuses on content from one of the courses in the program. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

### Admission

Applicants to the M.A. program in educational leadership must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, an essay demonstrating writing ability, and other evidence of academic ability and professional promise.

### Higher Education and Student Affairs

The Master of Arts program in higher education and student affairs requires a minimum of 40 s.h. of graduate credit. The program prepares graduates for entry- and mid-level positions in two- and four-year institutions.

Students choose one of two tracks when they apply to the program: the student affairs track or the higher education policy/administration track. Through these two tracks, the program prepares individuals for positions in advising, programming, administration, assessment, management, and policy in higher education settings.

The Higher Education and Student Affairs (HESA) M.A. program curriculum consists of course work in postsecondary administration, college students and their environments, and current and emerging issues in higher education, as well as in research and assessment. The curriculum integrates theory and practice and is designed to be completed in two years of full-time study or equivalent part-time study. At the time of application, students choose one of two tracks—student affairs or higher education administration and policy. All students complete a comprehensive examination process during the semester in which they intend to graduate.

The curriculum includes the higher education core, track courses, a supervised practice, and an integrative experience. Elective course work is subject to advisor approval.

All students in the student affairs track complete an internship in their second year under the direction of an M.A.-level supervisor. See "Integrative and Summative Experiences" below.

Students complete the following course work.

**Policy Track**

Higher Education Administration and assistantship.

Students in the student affairs track complete a 600-clock
Summative Experiences
Student Affairs Track: Integrative and

**Concentrations**

**Student Affairs Track**

Students must complete the following course work.

All of these:

- EPLS:5250 Introduction to Student Affairs 3
- EPLS:5278 Helping Skills in Student Affairs Work 3
- EPLS:6301 Professional Seminar in Student Affairs I 1
- EPLS:6302 Professional Seminar in Student Affairs II 1
- EPLS:6303 Professional Seminar in Student Affairs III 1
- EPLS:6304 Professional Seminar in Student Affairs IV 1
- EPLS:6332 College Student Psychosocial and Identity Development 3
- EPLS:6334 College Student Learning, Cognitive, and Moral Development 3

**Student Affairs Track: Integrative and Summative Experiences**

Students in the student affairs track complete a 600-clock hour internship, typically within their second-year graduate assistantship.

**Higher Education Administration and Policy Track**

Students complete the following course work.

All of these:

- EPLS:6216 Finance in Higher Education 3
- EPLS:6224 Organizational Theory and Administrative Behavior 3
- EPLS:6225 Introduction to Public Policymaking 3
- EPLS:6290 Master's Project (in consultation with the faculty advisor) arr.

Recommended courses:

- EPLS:6218 The Law and Higher Education 3
- EPLS:6221 The College Curriculum 3

**Comprehensive Examination**

All M.A. students complete a comprehensive examination during the semester in which they intend to graduate. Students complete a take-home written examination based on the program core and their chosen track.

**Admission**

Applicants to the M.A. program in higher education and student affairs must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Examination (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, a résumé or curriculum vita, three letters of recommendation, and a personal statement are required. The statement of purpose (one to three pages) should include an indication of track (student affairs or higher education administration and policy), professional goals, whether the applicant plans to enroll full- or part-time, and how the applicant's goals and experiences are consistent with the higher education and student affairs program's mission and values.

Application deadline is December 15 for admission the following fall. Applicants who are recommended for admission are invited to come to campus on spring Campus Visit Day, during which they interview for assistantships. Full-time M.A. students in the student affairs track must be employed at an approved site (usually in an approved graduate assistantship).

**Schools, Culture, and Society**

The Master of Arts program in schools, culture, and society requires a minimum of 32 s.h. of graduate credit and is offered without thesis. The program develops students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in education.

M.A. students complete at least 24 s.h. in schools, culture, and society courses in three disciplinary areas: sociology, history, and philosophy. They earn 12 s.h. in one of the disciplinary areas and 6 s.h. in each of the other two areas. The remaining 8 s.h. of course work must be in a concentration area appropriate to the student's career and academic goals.

Students must satisfactorily complete a six-hour comprehensive examination covering the program's three disciplinary areas and the student's concentration area. The examining committee may elect to hold an oral examination after the exam.

**Admission**

Applicants to the M.A. program in schools, culture, and society must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful.

Applicants must submit a personal statement explaining their professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; a résumé; and scores on the Graduate
Record Exam (GRE) General Test. Application deadline is February 15 for admission the following fall.
Educational Policy and Leadership Studies, Ed.S.

Educational Leadership

The Specialist in Education program in educational leadership requires 36 s.h. of graduate credit. The program prepares candidates to be superintendents in Iowa or to hold other district-level leadership positions in K-12 school districts. It also prepares them for appointments as area education agency chief administrators and for jobs in state or federal departments of education.

Students in the Ed.S. program must have an Iowa administrator license. They obtain the superintendent endorsement (State of Iowa endorsement 171) upon completing the required Ed.S. course work and at least three years of principal experience.

Ed.S. students must complete 26 s.h. of course work. Many educational leadership courses are offered by distance education; see MyUI for information about courses offered during current semesters. They also must complete 10 s.h. of clinical work and must maintain an entry plan/portfolio. At the conclusion of the program, students are required to pass a comprehensive examination, submit a portfolio, and a first-year entry plan. For detailed information, refer to Ed.S. programs on the Educational Leadership web page.

Admission

Applicants to the Ed.S. program in educational leadership must meet the admission requirements of the Graduate College and of the educational leadership program. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores, three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

School Curriculum and Assessment Policy

The Specialist in Education program in school curriculum and assessment policy requires 36 s.h. of graduate credit beyond the master's degree (required credit may vary depending on a student's academic background, experiences, needs, and interests).

The interdisciplinary program trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation.

The program offers concentrations in policy, measurement and statistics, and curriculum and draws on course work from across the College of Education. Graduates are qualified to serve as educational leaders in the areas of school policy, assessment, and curriculum at federal, state, and district levels.

For more information on the school curriculum and assessment policy programs, see the Department of Educational Policy and Leadership Studies.

Admission

Applicants to the Ed.S. program in school curriculum and assessment policy must meet the admission requirements of the Graduate College and of the school curriculum and assessment policy program. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) general test scores, one to two page statement of goals, and other evidence of academic ability and professional promise.

Higher Education and Student Affairs

The Specialist in Education program in higher education and student affairs requires 60 s.h. of graduate credit. The program provides advanced graduate study in administration, policy studies, and specializations developed in consultation with an advisor. The Ed.S. also may be awarded upon completion of a joint program of graduate work in higher education and an academic field, or upon completion of a higher education sequence following a master's degree program in a different field. Students must meet the Graduate College residency requirement.

Required Courses

The Ed.S. program of study must include the following.

| Professional Education and Related Field Courses | 18 |
| Specialization Area Courses | 28 |
| Electives (approved by a student's advisor) | 10 |
| EPLS:7395 Educational Specialist Research | 4 |

Total Hours 60

Depending on the student's career goals, the program may include an appropriate structured and supervised internship, determined in consultation with the advisor.

Comprehensive Examination

A culminating experience is required of all students, the nature of which will be contracted with the advisor. An oral examination of the culminating experience may be required.

Related Field

Students majoring in another field who want to complete a related field in higher education and student affairs should consult with a higher education and student affairs faculty member early in their study. Plans of study are developed individually.

Admission

Applicants to the Ed.S. program in higher education and student affairs must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Exam (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.
Educational Policy and Leadership Studies, Ph.D.

Educational Leadership

The Doctor of Philosophy program in educational leadership requires a minimum of 90 s.h. of graduate credit. The program prepares scholarly professionals for leadership positions in a wide range of educational and public sector settings. Ph.D. students acquire strong backgrounds in leadership, policy, and research. They equip themselves to discover, integrate, and apply knowledge as transformational leaders. The Ph.D. in educational leadership requires the following work.

| Common Courses | 12 |
| Cognate Courses | 9 |
| Electives | 29 |
| Concentration Area Courses | 12 |
| Research Courses | 18 |
| Dissertation | 10 |
| **Total Hours** | **90** |

Students also complete the comprehensive examination and a dissertation, described below.

Many educational leadership courses are offered by distance education; see MyUI for information about courses offered during current semesters.

For more detailed course work information, see Educational Leadership on the Educational Policy and Leadership Studies website.

**Required Research Courses**

All educational leadership Ph.D. students must complete either EALL:5150 Introduction to Educational Research or EPLS:6206 Research Process and Design during the first year of their Ph.D. program. They also must complete a minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website.

**Comprehensive Examination**

Ph.D. students must satisfactorily complete a written take-home comprehensive examination consisting of three parts. The first part covers a student’s major area of study, and the second covers two additional concentration areas. The third is on the student’s outside area of study and is prepared by faculty members outside the Department of Educational Policy and Leadership Studies. The written exams are followed by an oral examination.

**Dissertation**

All students must write a dissertation based on an original research project in an area of educational leadership. Students must earn 10 s.h. of credit for dissertation research. The doctoral program culminates with a final oral defense of the dissertation. Students must be registered at the University of Iowa during the session in which they graduate.

**Admission**

Applicants to the Ph.D. program in educational leadership must meet the admission requirements of the Graduate College and of the educational leadership program. They also must satisfy the residency requirement of two full-time (at least 9 s.h.) registrations. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores, three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

**Higher Education and Student Affairs**

The Doctor of Philosophy program in higher education and student affairs requires 90 s.h. of graduate credit. The program prepares faculty and scholar practitioners for leadership positions in student affairs and academic administration and for positions as graduate faculty members, leaders in conducting research about college students and higher education, policy analysts in postsecondary institutions and in public or private agencies, and teachers and academic leaders at two-year and four-year colleges.

The program integrates the academic experience with the cocurricular learning experiences of students and studies the outcomes of both. The curriculum is organized around three core areas: higher education administration and policy; teaching, learning, and the college experience; and diversity, equity, and foundations of higher education. Students take courses in each area and specialize in one.

The higher education administration and policy area studies organizational policy, leadership, and change. It helps administrators develop expertise in planning, evidence-based decision making, and effective leadership and organizational management. Individuals interested in enrollment management and institutional research should find this area appealing.

The teaching, learning, and the college experience area studies college teaching and learning and the ways in which college affects students. It enables educators to become more effective in designing, implementing, and evaluating powerful curricular and cocurricular initiatives. It should appeal to teaching faculty, institutional researchers, faculty development professionals, and leaders of student success initiatives.

The diversity, equity, and foundations of higher education area helps educators prepare to lead social change within their organizations and to facilitate difficult dialogues designed for interpersonal growth and development. It should appeal to chief diversity officers and other administrators called upon to develop curricula around social justice and to individuals interested in the empirical study of diversity in higher education.

The 90 s.h. required for the Ph.D. includes a substantive common core (24 s.h.), a research core (17 s.h.); a specialization (12 s.h.); graduate electives, including transfer course work (25 s.h.); and dissertation research (12 s.h.).

To fulfill the Graduate College residency requirement, doctoral students must enroll for a minimum of 9 s.h. in each of two semesters or a minimum of 6 s.h. in each of three semesters.

| Substantive Common Core Courses | 24 |
| Research Core Courses | 17 |
Specialization Area Courses: 12
Graduate Electives: 25
Dissertation: 12
Total Hours: 90

Substantive Common Core

The substantive common core provides foundational understanding of higher education and general knowledge that all students must master, regardless of their career goals and interests. All courses in the core (24 s.h.) must be completed at the University of Iowa.

All of these:
- EPLS:6216 Finance in Higher Education 3
- EPLS:6220 History of Higher Education 3
- EPLS:6221 The College Curriculum 3
- EPLS:6224 Organizational Theory and Administrative Behavior 3
- EPLS:6225 Introduction to Public Policymaking 3
- EPLS:6273 The College Student 3
- EPLS:6275 Diversity and Equity in Higher Education 3
- EPLS:7432 Multicultural Initiatives 3

Research Core

The research core (17 s.h.) assures that a student achieves scholarly autonomy and initiative.

Basic Research Methods

Both of these are required (6 s.h.):
- EPLS:6206 Research Process and Design 3
- EPLS:7373 Qualitative Research Design and Methods (or approved substitute) 3

Statistics/Linear Regression

All of these (8 s.h. taken in this order):
- EPLS:5240 Topics in Education (when topic is data coding and management) 1
- PSQF:6243 Intermediate Statistical Methods 4
- EPLS:6370 Quantitative Methods for Policy Analysis 3

Advanced/Specialized Research Methods

Students should work with their advisor to choose one course (at least 3 s.h.) appropriate to their dissertation design.

Qualitative Methods

- EPLS:5240 Topics in Education (when topic is introduction to historical methodology) 3
- EPLS:7392 Mixed Methods Research 3
- EDTL:7071 Critical Discourse Analysis in Educational Research 3
- EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3

Quantitative Methods

- EPLS:5240 Topics in Education (when topic is multilevel modeling) 3
- EPLS:6209 Survey Research and Design 3
- POLI:7003 AdvancedMethodology 4
- PSQF:6246 Design of Experiments 4
- SOC:7170 AdvancedStatistical Modeling of Data 3
- SOC:7180 Structural Equation Modeling 3

Specialization Area

The specialization area gives students the opportunity to develop expertise in one area. Most students complete the common core before declaring one of the following three specializations: higher education administration and policy; teaching, learning, and the college experience; or diversity, equity, and foundations of higher education. Each specialization has its own course requirements and options.

Graduate Electives

Students choose 25 s.h. of elective graduate course work in consultation with their advisors. A student and their advisor may determine that some of the graduate elective work may be drawn from appropriate previous graduate course work that complements other aspects of the student’s doctoral program.

Comprehensive Examination

The Ph.D. comprehensive examination consists of a set of take-home questions with a limited time to respond. Questions are based on the substantive core and a student’s concentration. The written examination is followed by an oral examination.

Dissertation

The dissertation is a major research study planned in collaboration with the student’s advisor. Students must write a formal dissertation proposal and submit it for approval, first to their advisor and then to the members of their doctoral committee. Students and their advisors determine when the proposal is complete. Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation.

Admission

Applicants to the Ph.D. program in higher education and student affairs must meet the admission requirements...
of the Graduate College. Each applicant must submit a personal statement; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; a résumé or curriculum vita, and scores on the Graduate Record Exam (GRE) General Test. The statement of purpose (one to three pages) should include an indication of specialization, professional and/or research interests, whether the applicant plans to enroll full- or part-time, and how the applicant's goals and experiences are consistent with the higher education and student affairs program's mission and values. Application deadline is December 1 for admission the following fall.

For more information on higher education and student affairs programs, see the Department of Educational Policy and Leadership Studies.

Schools, Culture, and Society

The Doctor of Philosophy program in schools, culture, and society requires a minimum of 90 s.h. of graduate credit. The program develops students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in education.

Ph.D. students complete a common core (12 s.h.), a disciplinary foundation (12 s.h.), an interdisciplinary focus (9 s.h.), cognate courses (28 s.h.), research tools (17 s.h.), and a dissertation (12 s.h.).

<table>

Disciplinary Foundation

Students choose one of three disciplinary foundation areas: sociology, history, or philosophy. They complete 12 s.h. in the area by taking three courses offered by the Department of Educational Policy and Leadership Studies (prefix EPLS) and one course offered by the corresponding department in the College of Liberal Arts and Sciences: sociology (prefix SOC), history (prefix HIST), or philosophy (prefix PHIL). The following lists provide examples of courses appropriate for the three disciplinary foundation areas.

Interdisciplinary Focus

Students choose one of two interdisciplinary focus areas: diversity and equity, or policy contexts. They take three courses in that area (total of 9 s.h.) chosen from the corresponding list. At least two of the courses (6 s.h.) must be from outside their disciplinary foundation area (see "Disciplinary Foundation" above).

Cognate Courses
Students must complete at least 28 s.h. of additional graduate-level course work in a field or fields that are relevant to their scholarly and professional goals. Students commonly complete some or all of the 28 s.h. with relevant graduate-level course work from other University of Iowa programs or with approved transfer credit from other institutions. A student’s advisor, in consultation with other faculty members in the program, determine which course work to accept.

Research Tools
All students must take at least 17 s.h. in research methods as part of their schools, culture, and society Ph.D. program.

Basic Research Methods
The following two courses are required:
- EPLS:6206 Research Process and Design 3
- EPLS:7373 Qualitative Research Design and Methods 3
With approval, students may substitute course above for one of the following:
- EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3
- PSQF:7331 Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods) 3
- RCE:7338 Essentials of Qualitative Inquiry 3

Intermediate Statistics and Linear Regression
All students must take the following three courses:
- EPLS:5240 Topics in Education (when topic is data coding and management) 1
- PSQF:6243 Intermediate Statistical Methods 4
- EPLS:6370 Quantitative Methods for Policy Analysis 3

Advanced and/or Specialized Research Methods
Students consult with their advisor to choose one course appropriate to their dissertation design from the "Qualitative or Non-Quantitative Courses" list or the "Quantitative Courses" list.

Qualitative or Non-Quantitative Courses
- EPLS:5195 Research in Cross-Cultural Settings 3
- EPLS:5240 Topics in Education (when topic is historical methodology in education or analysis of philosophical argumentation) 3
- EPLS:7392 Mixed Methods Research 3
- EDTL:7071 Critical Discourse Analysis in Educational Research 3
- EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3
- EDTL:7073 Ethnographic Methods, Theories, and Texts 3
- EDTL:7751 Advanced Qualitative Data Analysis 3
- HIST:7197 The Art and Craft of Historical Writing arr.
- PSQF:6265 Program Evaluation 3
- RCE:7444 Qualitative Research in the Multicultural Context 3

Quantitative Courses
- EPLS:5240 Topics in Education (when topic is multilevel modeling) 3
- EPLS:6209 Survey Research and Design 3
- EPLS:6370 Quantitative Methods for Policy Analysis 3
- POLI:7003 Advanced Methodology 4
- PSQF:6249 Factor Analysis and Structural Equation Models 3
- SOC:5160 Research Design and Methods 3
- SOC:7170 Advanced Statistical Modeling of Data 3
- SOC:7180 Structural Equation Modeling 3

Comprehensive Examination
The comprehensive examination consists of three take-home exams, each with a maximum of 12 pages. The first exam covers the common core, the second covers the student’s interdisciplinary focus area, and the third covers the student’s disciplinary foundation area.

Dissertation
After completing the comprehensive examination, Ph.D. students write a formal dissertation prospectus and submit it for approval first to their dissertation advisor and then to the members of their dissertation committee. The dissertation prospectus must be formally approved by the dissertation advisor and the dissertation committee before a student may begin dissertation research.

Students must earn 12 s.h. of dissertation research credit. The dissertation process culminates with a final oral defense of the dissertation. Students must register at the University of Iowa each fall and spring semester until the dissertation is successfully defended and the Ph.D. is awarded.

Admission
Applicants to the Ph.D. program in schools, culture, and society must meet the admission requirements of the Graduate College. A personal interview with one or more
members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful. Applicants must submit a personal statement explaining their professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; and scores on the Graduate Record Exam (GRE) General Test. Admission is for fall semester entry. Application deadline is January 15 for admission the following fall.

For more information on schools, culture, and society programs, see the Department of Educational Policy and Leadership Studies.
Multicultural Education and Culturally Competent Practice

Academic Coordinator
• Diana Sproles

Graduate certificate: multicultural education and culturally competent practice
Website: https://www.grad.uiowa.edu/ogi

The certificate program in multicultural education and culturally competent practice helps students develop culturally competent practice as they continue in their academic and professional careers. The program raises awareness of how worldview, values, beliefs, and biases shape the ways in which individuals and groups interact, interpret, and learn from each other. It is based on the need for a proactive and sustained approach to educational reform, advocacy, and social justice.

Multicultural Education and Culturally Competent Practice, Certificate

The Certificate in Multicultural Education and Culturally Competent Practice requires a minimum of 15 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 in all University of Iowa course work for the certificate. Students may count 6 s.h. of work for their major program of study toward the certificate.

The certificate program is open to students who are enrolled in the University of Iowa Graduate College or who hold an undergraduate degree. Students must register by completing the registration form. Contact the Office of Graduate Teaching Excellence.

The Certificate in Multicultural Education and Culturally Competent Practice requires the following course work.

Graduate certificate: online teaching
Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/academic-programs/educational-psychology-learning-sciences/certificate-online-teaching

The growth of online teaching presents a need to address course quality, instructor training, assessment of teaching effectiveness and student learning, and retention. The Certificate in Online Teaching is an online graduate program designed to prepare students for the realities of online teaching and to help them expand their career options.

The Certificate in Online Teaching is administered by the Department of Psychological and Quantitative Foundations [p. 1068] and is granted by the Graduate College.

Programs

Graduate Program of Study
Certificate
- Certificate in Online Teaching [p. 1067]
Online Teaching, Certificate

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.

The certificate program develops students’ skills in using technology to solve instructional problems associated with distance and time. The certificate’s online format uses the techniques and approaches that the program teaches.

The certificate requires the following course work.

Psychological and Quantitative Foundations

Chair
• Timothy N. Ansley

Undergraduate minor: educational psychology
Graduate degrees: M.A. in psychological and quantitative foundations; Ed.S. in psychological and quantitative foundations; Ph.D. in psychological and quantitative foundations
Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/pq

The Department of Psychological and Quantitative Foundations offers programs in these areas: counseling psychology, educational measurement and statistics, educational psychology, learning sciences, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills necessary to function effectively in settings that require the application of psychological and quantitative principles, and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The department's degree programs incorporate both goals, but the Master of Arts and Specialist in Education programs emphasize the first goal, and the Doctor of Philosophy programs emphasize the second.

The department offers graduate degree programs in the following major areas within psychological and quantitative foundations:

- counseling psychology (offered in the M.A. and Ph.D.);
- educational measurement and statistics (offered in the M.A. and Ph.D.);
- educational psychology (offered in the Ph.D.);
- learning sciences (offered in the M.A.); and
- school psychology (offered in the Ed.S. and Ph.D.).

In addition to the degrees and the minor offered as programs of study, the department offers a course that is approved for the Quantitative or Formal Reasoning area of the College of Liberal Arts and Sciences General Education Program (p. 437), PSQF:1020 Elementary Statistics and Inference.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Programs

Undergraduate Program of Study

Minor
• Minor in Educational Psychology [p. 1075]

Graduate Programs of Study

Majors
• Master of Arts in Psychological and Quantitative Foundations [p. 1076]

• Specialist in Education in Psychological and Quantitative Foundations [p. 1078]
• Doctor of Philosophy in Psychological and Quantitative Foundations [p. 1079]

Courses

Students may receive credit for only two of these three courses: STAT:1010 Statistics and Society, STAT:1020 Elementary Statistics and Inference (same as PSQF:1020), and STAT:1030 Statistics for Business. Credit for STAT:1010 is given only if the course is taken before STAT:1020 (same as PSQF:1020) or STAT:1030.

Psychological and Quantitative Foundations Courses

PSQF:1020 Elementary Statistics and Inference 3 s.h.
Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning. Same as STAT:1020.

PSQF:1026 Mindfulness: Being Here With It All 2 s.h.
Training in Mindfulness-Based Stress Reduction; application to dealing with life changes (i.e., transition to University life); navigating daily life (academics, roommates, schedules); improving academic skills; self-regulation of emotions; questions of meaning and purpose.

PSQF:1027 Mindfulness Foundations in the Helping Professions 3 s.h.
Training in Mindfulness-Based Practices; application to personal and professional life.

PSQF:1029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

PSQF:1050 Learning Online Successfully 2 s.h.
Experiences in an online environment and opportunities to engage with digital materials for learning to develop skills and strategies for future classes; assess resources for successful online learning, participate in a variety of online learning environments including online discussions and collaborations, develop strategies for reading and marking digital materials, managing time for working and studying online, and plan for future courses that may be online or include digital course materials.

PSQF:1075 Educational Psychology and Measurement 3 s.h.
Principles and classroom applications of cognitive and social development, learning and cognition, motivation, and assessment.

PSQF:2115 Introduction to Counseling Psychology 3 s.h.
Historical and philosophical foundations of counseling psychology; theories, application, and work of counseling psychologists.
PSQF:2116 Applied Child and Adolescent Psychology 3 s.h.
Overview of child and adolescent development, psychopathology, and basic-level intervention; foundation for working in applied child and adolescent mental health settings; typical areas of psychological difficulty, including developmental disorders, ADHD, depression, anxiety, substance use; contextual and environmental factors, including abuse, poverty, neglect.

Exploration of research-based implications for teaching, learning, and daily living; skillful engagement of demands educators face in personal and professional lives; mindfulness as paying attention in present moment and relating wisely to what is occurring; specific mindfulness practices that integrate awareness into daily living; how research and program evaluations throughout the world document that consistent practice of mindfulness improves attention and concentration; ability to respond skillfully to stress, self-regulation of emotion, physical and mental health, communication, life satisfaction.

PSQF:3103 Early Childhood Guidance 4 s.h.
Effective communication, understanding child development and behavior, appropriate limits and rules, structuring problem solving and consequences, fostering self control, organizing classroom environment and curriculum to support child behavior, methods to address persistent and challenging behaviors; nurturance and child guidance via parenting, child rearing practices, and child-family relations.

PSQF:3104 Multicultural Issues in Counseling and Psychology 3 s.h.
Introduction to multicultural competencies and its importance to counseling, psychology, and helping professions; psychological concepts and research pertaining to privilege; racism, race, culture, sexual orientation, social class and classism, and their application in culturally adapted psychotherapy interventions; how these matters and other cultural identities and constructs are handled and used in applied psychology and counseling; focus on intersection of research and practice.

PSQF:3191 Asian American Experiences 3 s.h.
Aggregate experiences of Asian Pacific Americans, starting from developments in countries of origin to their contemporary issues; histories of various Asian Pacific American groups (e.g., Chinese, Korean, Filipino, Japanese, Asian Indian, Hawaiians, Vietnamese, etc.), as well as culture, politics, the media, and stereotypes; similarities among the different Asian Pacific American groups, as well as a comparative look at how African, Latino, and Native American experiences help shape and contribute to Asian Pacific America.

PSQF:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, EPLS:4081, RCE:4081.

PSQF:4106 Child Development 3 s.h.
Theories and research findings about typical course of child development, differences in development. Requirements: junior standing.

PSQF:4111 Human Motivation 3 s.h.
Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students. Requirements: junior standing.

PSQF:4120 Psychology of Giftedness 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as RCE:4120.

PSQF:4121 Identification of Students for Gifted Programs 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as RCE:4121.

PSQF:4122 Math Programming for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as EDTL:4022.

PSQF:4123 Academic Acceleration: Providing Excellence and Equity in Education for High Ability Students 1 s.h.
Arr. Acceleration as an effective curricular intervention for high-ability students; forms of acceleration, research evidence for acceleration, and process of implementing acceleration; reasons for persistent negative attitudes about acceleration; advocacy for acceleration; skills for effective practice and implementation. Requirements: computer with internet access, sound card, Adobe Reader, and Adobe Flash Player.

PSQF:4125 Counseling and Psychological Needs of the Gifted 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as RCE:4125.

PSQF:4126 Cognitive and Affective Needs of Underachieving Gifted 1 s.h.
Diagnostic strategy for identifying types of underachievement; teaching and counseling interventions appropriate for each. Same as RCE:4126.

PSQF:4127 Research and Theory in Talent/Giftedness 1 s.h.
Biennial research symposium. Same as RCE:4127.

PSQF:4128 Neuroscientific Implications for Gifted 1 s.h.
Neurology of behavior and neurodegenerative disease; the psychology of learning and memory, its application to gifted education.

PSQF:4129 Creativity: Issues and Applications in Gifted Education 1 s.h.
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as RCE:4129.

PSQF:4130 Early Adolescent Development 3 s.h.
Psychological growth and development of the early adolescent (ages 10-14), including the physical, cognitive, social, emotional, and sexual development of the middle-school aged child.

PSQF:4133 The Adolescent and Young Adult 3 s.h.
Psychological and social aspects of adolescence and young adulthood; emphasis on theory, research, and practical applications.
PSQF:4134 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as EDTL:4934.

PSQF:4136 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as EDTL:4936.

PSQF:4143 Introduction to Statistical Methods 3 s.h.
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as STAT:4143.

PSQF:4150 Introduction to Educational Measurement 3-4 s.h.
Test development procedures, reliability, validity, item writing, evaluation of item and test characteristics; classroom assessment methods; interpretation of scores from standardized achievement and aptitude tests; no background in statistics assumed.

PSQF:4520 Bayesian Statistics 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as IGPI:4522, STAT:4520.

PSQF:5165 Introduction to Program and Project Evaluation 3 s.h.
Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as EPLS:5165.

PSQF:5193 Special Readings and Projects arr.
Supervised individual study. Requirements: senior standing.

PSQF:5194 Continuing Education Individual Study arr.
Supervised individual study.

PSQF:5199 Topical Workshop in Psychological and Quantitative Foundations arr.
School, educational, and counseling psychology and allied disciplines; for professionals and graduate students in education, mental health, social services, related fields.

PSQF:5218 Foundations of School Psychology 3-4 s.h.
Introduction to field of school psychology; becoming competent practitioners and leaders in school and community settings; roles and functions of school psychologists; ethical standards and issues in the profession of psychology; legal issues involved in practice of school psychology; current topics and trends. Corequisites: PSQF:7224.

PSQF:5226 Assessment of Giftedness 3 s.h.
Training and practice in assessment of gifted children. Same as RCE:5226.

PSQF:6200 Educational Psychology 3 s.h.
Psychology of the learning/instruction process: theoretical perspectives on learning, instruction, motivation, and assessment; developmental concepts, social processes, individual variation, learning and technology, biological basis of learning.

PSQF:6203 Tools and External Representations in Learning Processes 3 s.h.
Theories and issues in the use of technology in learning and teaching; project to design a technology-supported learning solution for an educational problem.
PSQF:6225 Introduction to Counseling Psychology Practice/Research II 3 s.h.
Learning and performance of basic helping skills; integration of these skills with counseling theories, broader counseling strategies; laboratory-based.

PSQF:6230 Research in Educational Psychology 1-3 s.h.
Design, implementation, and presentation of an educational psychology empirical research project. Requirements: graduate standing in educational psychology.

PSQF:6231 Concepts and Principles of Behavior Analysis 3 s.h.
Comprehensive review of psychological principles of learning derived from experimental research and empirical studies; types of behavior, motivational influences on behavior, respondent behavior and operant conditioning, stimulus control, schedule influences on behavior, observational learning, verbal behavior, rule-governed behavior, and behavioral accounts of language and cognition.

PSQF:6232 Functional Behavior Assessment and Analysis 3 s.h.
Understanding the purpose of assessments of behavior, developing assessments based on the presenting problems of behavior, conducting assessments to understand the purpose of behavior, and develop an effective behavior intervention plan; advanced coverage of special topics, including preference assessments and verbal behavior.

PSQF:6233 Ethics for Behavioral Psychologists 1 s.h.
Ethics that are unique to applied behavior analysis; ethical considerations.

PSQF:6235 Multicultural Counseling 3 s.h.
Theoretical and practical aspects of the cultural adaptation process; implications for interventions in diverse populations; issues. Requirements: counseling skills introductory course.

PSQF:6238 Assessment of Learning Differences 3-4 s.h.
Application and interpretation of correlation techniques, chi-square, t- and f-tests, interval estimation, simple cases of analysis of variance. Prerequisites: PSQF:4143.

PSQF:6243 Intermediate Statistical Methods 4 s.h.
Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Requirements: for PSQF:6243 -- PSQF:4143; for STAT:6513 -- STAT:4143. Same as STAT:6513.

PSQF:6244 Correlation and Regression 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Requirements: for PSQF:6244 -- PSQF:6243; for STAT:6514 -- STAT:6513. Same as STAT:6514.

PSQF:6245 Applied Multivariate Analysis 3 s.h.

PSQF:6246 Design of Experiments 4 s.h.

PSQF:6247 Nonparametric Statistical Methods 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Same as STAT:6547.

PSQF:6248 Research Synthesis and Meta-Analysis 3 s.h.
Rationale and methods for research synthesis and meta-analysis; conceptual issues in quantitative research synthesis in the social sciences and other disciplines, including medicine; thorough understanding of concept of sampling distribution is needed to understand the statistical methods introduced. Prerequisites: PSQF:6246 or PSQF:6244.

PSQF:6249 Factor Analysis and Structural Equation Models 3 s.h.
Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL: assumptions and limitations of alternative approaches. Prerequisites: PSQF:6244 and PSQF:6246.

PSQF:6250 Computer Packages for Statistical Analysis 1-3 s.h.
Computer programs and systems designed to execute statistical analyses (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: PSQF:6243. Requirements: elementary knowledge of computer programming.

PSQF:6251 Individual Intelligence Testing 3 s.h.
Administration of individual intelligence tests; interpretation of test results; issues in psychological testing; factors that influence performance. Prerequisites: PSQF:4143 or PSQF:4150.

PSQF:6252 Introduction to Multivariate Statistical Methods 3 s.h.
Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisites: PSQF:6244 and PSQF:6246.

PSQF:6255 Construction and Use of Evaluation Instruments 3 s.h.
Design and construction of measures used in educational evaluation: achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: PSQF:4143 and PSQF:6257.

PSQF:6257 Educational Measurement and Evaluation 3 s.h.
Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data; interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisites: PSQF:4143.
PSQF:6258 Theory and Technique in Educational Measurement  
3 s.h.
Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:6259 Scaling Methods  
3 s.h.
Unidimensional and multidimensional scaling techniques; item response theory with a focus on polytomous models; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisites: PSQF:6262. Corequisites: PSQF:6249 and PSQF:6252.

PSQF:6262 Item Response Theory  
3 s.h.
Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:6263 Consultation Theory and Practice  
3 s.h.
Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as RCE:6263.

PSQF:6265 Program Evaluation  
3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization. Same as EPLS:6266.

PSQF:6275 Constructivism and Design of Instruction  
3 s.h.
Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.

PSQF:6281 Cognitive Theories of Learning  
3 s.h.
Theories of learning and cognition as they relate to education; development of expertise, transfer of learning, design of learning environments, use of learning technologies. Prerequisites: PSQF:6200.

PSQF:6292 Supervised Research in Educational Psychology  
1-3 s.h.
Identification of research problems, development of research designs and materials, conducting of research studies; faculty-guided activity or seminars.

PSQF:6293 Individual Instruction in Psychological and Quantitative Foundations  
arr.

PSQF:6299 M.A. Project: Portfolio/Internship/Practicum  
3 s.h.
Individual portfolio/internship/practicum project; reflection, revision, and presentation of educational psychology portfolio.

PSQF:6312 Psychopathology Across the Lifespan  
3 s.h.
DSM IV categories, related diagnostic issues.

PSQF:7201 Counseling Psychology Research Writing  
3 s.h.
How to write scientifically in counseling psychology; qualitative and quantitative research writing, literature reviews, methodologies, discussions; APA style.

PSQF:7224 Introduction to School Psychology Practice  
1-3 s.h.
Introduction to the practice of school psychology; framework for understanding role and function, legal and ethical boundaries, professional requirements; preparation for practicum.

PSQF:7237 Beginning Practicum in School Psychological Service  
arr.
Supervised practicum in psychological and educational evaluation in school settings. Prerequisites: PSQF:6238 and PSQF:6251.

PSQF:7245 Evaluation of Children with ADHD and LD  
arr.
Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as PEDS:7245.

PSQF:7305 Psychotherapy I: Dynamic and Phenomenological Approaches  
3 s.h.
Major psychodynamic and existential-phenomenological theories of personality; emphasis on implications for psychotherapy.

PSQF:7306 Psychotherapy III: Work Psychology and Career Interventions  
3 s.h.
Foundations of career interventions; emphasis on major assessment instruments (vocational interests, values, abilities/skills, personality) and career counseling processes, skills, techniques.

PSQF:7309 Personality Assessment  
3 s.h.
Standardized and projective techniques for personality assessment; preparation for competent administration and interpretation of varied tests and measures.

PSQF:7310 Intelligence Assessment  
3 s.h.
Standardized intelligence testing; preparation to administer and interpret intelligence tests for children and adults.

PSQF:7313 Psychopathology in Childhood  
3 s.h.
Current theories regarding the development of psychopathology in children and adolescents; current approaches to treatment for disorders in children and adolescents.

PSQF:7315 Social and Emotional Assessment of Children and Adolescents  
3 s.h.
Link between personality theory, child and adolescent assessment; interpretation, integration of assessment information; record reviews, interviews, objective tests, projective techniques. Prerequisites: PSQF:6238 and PSQF:6251.

PSQF:7320 History and Systems of Psychology  
3 s.h.
Philosophical underpinnings of psychology, early systems in psychology, developments in the 20th century.

PSQF:7331 Seminar: Educational Psychology I - Current Topics  
arr.
Intensive investigation of a specific research topic.

PSQF:7337 Advanced Practicum in School Psychology  
arr.
Supervised experience in psychological interventions, consultation, counseling in school and clinic settings. Prerequisites: PSQF:6238 and PSQF:6251 and PSQF:7237.

PSQF:7342 Research Project in School Psychology  
arr.
Experience in research facilities on campus; writing research questions, planning a research study, writing a research article.

PSQF:7345 Academic Interventions  
3 s.h.
Interventions used by school and support system personnel to address academic skill deficits among children, adolescents; instructional design and delivery problems associated with deficits.
PSQF:7346 Behavioral Interventions 3 s.h.
Interventions used by school and support system personnel to address behavioral and social/emotional status of children, adolescents.

PSQF:7347 Home/School/Community: System Interventions 3 s.h.
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as RCE:7347.

PSQF:7350 Seminar in Evaluation 2-3 s.h.
In-depth examination of selected topics. Prerequisites: PSQF:5165 or EPLS:5165 or PSQF:6265 or EPLS:6266. Requirements: two courses in program evaluation.

PSQF:7352 Seminar: Behavioral Assessment and Evaluation 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as EDTL:7952.

PSQF:7354 Seminar: Experimental Approaches in Counseling Research arr.
Application of experimental methodology to study of counseling and vocational phenomena.

Critical examination of current issues and problems of the professional worker in the field of educational measurement and evaluation as reflected in research literature, other professional communication media.

PSQF:7356 Process and Outcomes in Counseling Psychotherapy 3 s.h.
Advanced knowledge of the state of process and outcome research on psychotherapeutic procedures. Requirements: Ph.D. candidacy in appropriate field.

PSQF:7358 Equating and Scaling of Educational Tests 3 s.h.
Designs and methods, including linear, equipercentile, and item response theory methods; emphasis on concepts, applications to testing programs, research. Prerequisites: PSQF:6243 and PSQF:6257.

PSQF:7365 Psychotherapy II: Cognitive and Behavioral Approaches 3 s.h.
Major cognitive and behavioral theories of personality and psychotherapy; emphasis on implications for clinical practice.

PSQF:7367 Social Psychology and Social Systems 3 s.h.
Social aspects of behavior in organizations; behavioral science theory and research on organizations, system change, transformation, leadership.

PSQF:7375 Topics in Educational Measurement and Statistics 1-3 s.h.

PSQF:7380 Practicum in College Teaching arr.
Supervised college teaching experience in courses related to major academic areas, in collaboration with faculty course instructors.

PSQF:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, EPLS:7385, GRAD:7385, RCE:7385.

PSQF:7390 Supervision of School Psychology Practicum/Internship arr.
Experience supervising school psychology practicum or internship students. Requirements: Ph.D. standing.

PSQF:7393 M.A. Thesis in Psychological and Quantitative Foundations arr.

PSQF:7394 Supervised Research in Counseling Psychology 1-3 s.h.

PSQF:7434 Practicum in Counseling Psychology 3 s.h.
Supervised practice in counseling services. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7437 Internship in School Psychology arr.
Supervised internship for Ph.D. students in school psychology. Requirements: completion of required courses.

PSQF:7450 Practicum in Program Evaluation arr.
Supervised experience in designing and implementing components of program evaluations. Prerequisites: PSQF:5165 or EPLS:5165 or PSQF:6265 or EPLS:6266. Requirements: two courses in program evaluation.

PSQF:7452 Leadership, Consultation, and Supervision 3 s.h.
Overview of intervention modalities other than individual and group therapy, especially those that pertain to leadership within organizations, consultation with organizations and communities, and supervision of the work of others; capstone course in counseling psychology sequence. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7453 Advanced Practicum in Counseling Psychology 1-3 s.h.
Supervised work in counseling services. Prerequisites: PSQF:7434.

PSQF:7455 Generalizability Theory 3 s.h.
Analysis of variance methods applied to estimation of components of various types of measurement error variance; basic concepts, mathematical foundations, models, assumptions, designs, applications; relationships with other measurement theories. Prerequisites: PSQF:6246 and PSQF:6258.

PSQF:7457 Advanced Group Leadership Experience 3 s.h.
Practice working in a psychotherapy group; review major theories on group psychotherapy processes, integrate empirical research on effectiveness of group work; multicultural considerations in group psychotherapy; didactic and experiential format. Prerequisites: RCE:7357.

PSQF:7458 Internship in Counseling Psychology arr.
Supervised work in internship setting. Prerequisites: PSQF:7434 and PSQF:7453. Requirements: Ph.D. standing in counseling psychology and completion of all requirements except dissertation.

PSQF:7465 Issues and Ethics in Professional Psychology 3 s.h.
Professional ethics; issues in professional practice of psychology.
PSQF:7466 Psychological Services to Children, Adolescents, and Families: Legal and Ethical Standards  
3 s.h.
Review of laws at state and federal level which are related to child, adolescent, and family functioning; emphasis on APA and NASP ethical standards, application of these standards, and ethical decision making models. Recommendations: graduate student who will provide services to children, adolescents, and families.

PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations  
arr.
Educational Psychology, Minor

The minor in educational psychology is open to all College of Liberal Arts and Sciences students enrolled in an undergraduate degree program. The minor provides an enriched background in educational psychology, education testing, and research methods in education. It does not lead to certification for public school teaching. Students earning the minor select a department advisor, who helps them choose appropriate course work.

The minor requires 15 s.h., including 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass. Transfer credit must be approved in order to count toward the minor.

Course work for the minor in educational psychology must include 15 s.h. selected from the following list.

Contact the Office of Student Services for more information about the minor.
The Master of Arts in counseling psychology program is held in Hong Kong. It provides students with education in the theories, research, and scholarship about the principles and foundational knowledge in counseling psychology. Students learn relevant psychological interventions, strategies, and remediation to work with people in order to effectively solve problems, respond to client situations, and plan for the future. Since there is no supervised practicum component to this degree, students who graduate with the M.A. are not eligible to practice counseling psychology or be licensed in the United States. However, students will be qualified to apply for doctoral programs in professional psychology and counseling fields, such as clinical counseling, school psychology, counselor education, rehabilitation counseling, and school counseling.

The M.A. in counseling psychology requires a minimum of 34 s.h. of graduate credit with no thesis. Prerequisites for some of the required courses may mean that students will need to complete additional course work. Students are expected to maintain a minimum g.p.a. of 2.75 in all work for the degree. Courses are taught year round, and each course covers one month of instruction and one month of no instruction. Students can complete their M.A. in at least 24 months.

The following course work is required.

### Admission

All students must submit an application for admission through the Office of Admissions, two letters of recommendation, a professional résumé or curriculum vita, a personal statement that details the reasons for seeking admission to the program, and a writing sample.

Faculty in the counseling psychology program will review applications and make decisions on who is admitted to the program. Students are admitted to the program in the fall, spring, and summer sessions.

### Educational Measurement and Statistics

The Master of Arts program in educational measurement and statistics requires a minimum of 30 s.h. of graduate credit with thesis and 32 s.h. of graduate credit without thesis. The program provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.

All M.A. students must complete a core of courses (approximately 26 s.h.) that includes a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

**Thesis students complete 2 s.h. of additional course work beyond the core and earn thesis credit. Nonthesis students complete 6 s.h. of additional course work beyond the core.**

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

### Admission

Applicants to the M.A. program in educational measurement and statistics must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals. For information about admission dates, contact the educational measurement and statistics program coordinator.

### Learning Sciences

The online Master of Arts in learning sciences has a strong emphasis on how theory and research inform the understanding of learners, learning, instruction, and the technology and environments in which learning and instruction occur.

The curriculum includes courses in the theories of the learning sciences, design of effective learning environments and technologies, and implementation of instructional design. Elective opportunities allow a student to choose an interest area to develop a multidisciplinary specialization. Current areas include technology and media, human development and motivation, and measurement and evaluation. The capstone experience of the program is an internship/practicum that allows a student to apply knowledge of the learning sciences in a context of interest.

The program requires a minimum of 30 s.h. of graduate credit. A thesis is not required. Students develop a program of study in consultation with their advisor.

Full-time M.A. students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time M.A. students take 3 to 6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply to substitute equivalent course work from another institution or department for required or recommended courses.

</tr>
</tbody>
</table>

**Admission**

Applicants to the M.A. program in learning sciences must meet the admission requirements of the Graduate College, including the minimum grade-point average. Viable applicants should have a verbal score of at least 146 and a quantitative score of at least 149 on the Graduate Record Examination (GRE) General Test; successful applicants generally score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Teaching experience is desirable but not required.

Application deadline for fall semester entry is January 15 with review beginning soon after. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 should consider themselves committed and should not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication, *Graduate Study in Psychology and Associated Fields*. This policy is consistent with standards set by the association's Board of Educational Affairs.
The educational specialist program in school psychology requires a minimum of 66 s.h. of graduate credit. The program provides course work and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as a school psychologist (State of Iowa endorsement 236).

The curriculum includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a written portfolio and a project paper prepared in conjunction with PSQF:7342 Research Project in School Psychology.

The plan of study is as follows.

Psychological and Quantitative Foundations, Ph.D.

Counseling Psychology

The Doctor of Philosophy program in counseling psychology requires a minimum of 111 s.h. of graduate credit. All students must study full time. The program is fully accredited by the American Psychological Association.

The Ph.D. program's goal is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

Students in the program must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association's Ethical Principles of Psychologists. For more information, contact the program director.

The Ph.D. program in counseling psychology requires the following work.

Research Requirement

All of these:

- PSQF:6243 Intermediate Statistical Methods 4
- PSQF:7331 Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods) 3
- PSQF:7394 Supervised Research in Counseling Psychology (at least 4 s.h. is required; students enroll for 1 s.h. per semester for up to four semesters) 4

One of these:

- PSQF:6244 Correlation and Regression 4
- PSQF:6246 Design of Experiments 4

Qualitative and quantitative methodology is discussed in PSQF:7394 Supervised Research in Counseling Psychology, which is directed each semester by faculty advisors. Research from each student is discussed and evaluated, critiqued, and supported.

Basic Psychology

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

Counseling Psychology Core

All of these:

- PSQF:6223 & PSQF:6225 Introduction to Counseling Psychology Practice/Research I-II 6
- PSQF:6235 Multicultural Counseling 3
- PSQF:7305 Psychotherapy I: Dynamic and Phenomenological Approaches 3
- PSQF:7306 Psychotherapy III: Work Psychology and Career Interventions 3
- PSQF:7309 Personality Assessment 3
- PSQF:7310 Intelligence Assessment 3
- PSQF:7356 Process and Outcomes in Counseling Psychotherapy 3
- PSQF:7365 Psychotherapy II: Cognitive and Behavioral Approaches 3
- PSQF:7434 Practicum in Counseling Psychology 3
- PSQF:7452 Leadership, Consultation, and Supervision 3
- PSQF:7453 Advanced Practicum in Counseling Psychology (repeatable) 1-3
- PSQF:7465 Issues and Ethics in Professional Psychology 3

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum's site is typically University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of PSQF:6299 M.A. Project: Portfolio/Internship/Practicum before enrolling in PSQF:7453 Advanced Practicum in Counseling Psychology.

Electives

Elective courses are determined in collaboration with the major advisor.

Internship

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all or almost all required course work, satisfactory progress toward completion of the portfolio requirement, and successful completion of practicum requirements. Internships usually require geographic relocation.

Comprehensive Exam and Dissertation

Comprehensive examinations are written in counseling psychology ethics and issues. The comprehensive examination is structured as a component of the portfolio review. For more information, contact the program coordinator.

The dissertation research study is planned in collaboration with the doctoral student's major advisor. Dissertation credit ranges from 12 to 15 s.h.

Admission

Applicants to the Ph.D. program in counseling psychology must meet the admission requirements of the Graduate College. Preference is given to applicants who have an
undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial course work in psychology; a Graduate Record Examination (GRE) General Test verbal score of 152 or higher, quantitative score of 151 or higher, and analytical writing score of 3.5 or higher; and previous research and counseling experience.

Application materials must include a Graduate College application form; official transcripts of all previous college work; an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required); a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology; and three letters of recommendation from individuals qualified to assess the applicant’s potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between five and eight students each year.

Students begin the program in fall. Application deadline is December 1; admission decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection.

### Educational Measurement and Statistics

The Doctor of Philosophy program in educational measurement and statistics requires a minimum of 90 s.h. of graduate credit. The program prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.

During the first year of graduate study, a student and the advisor plan a program of study that is appropriate for the student’s interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research methodology, and educational psychology. Work in other University of Iowa departments is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education. All students are required to develop familiarity with computer programming techniques and equipment.

Students who enter the program without completing an M.A. thesis must complete a substitute project before taking the Ph.D. comprehensive examinations.

After completing most of their course work, students take the comprehensive examination, which typically consists of three 3-hour written examinations on educational measurement, applied statistics, and program evaluation, or approved substitute areas, such as educational psychology or mathematical statistics, in which a student has completed at least 9 s.h. of course work. In place of one written examination, the student’s committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student’s command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Work for the Ph.D. concludes with the dissertation, which is included in the 90 s.h. required for the degree.

Students who have completed an empirical M.A. thesis acceptable to the faculty may omit the second-year project.

The program of study includes substantive areas within educational psychology and the learning sciences, including courses in cognition, development, learning theory, and the design of instruction, learning environments, and learning technologies. Other learning opportunities include a research practicum in which students assist with and eventually design and carry out original research, a slate of research courses that meet the College of Education’s research requirements, a minor area of the student’s choice, and a dissertation in the student’s area of interest.

Research Requirement

The heart of educational psychology as a field is the creation, dissemination, and use of rigorous research to better understand and address educational issues. While many of the required courses address various aspects of the guiding principles set out by the National Research Council, students engage in the following course work and research-related activities.

Quantitative and Qualitative Research Methods

Both of these:
- PSQF:6220 Quantitative Educational Research Methodologies 3
- PSQF:7331 Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods) 3

Statistics

Central to understanding research in the field is the understanding and use of statistical methods.

This course:
- PSQF:6243 Intermediate Statistical Methods 4

Quantitative Methods

Based on the types of questions encountered in the field, students benefit from additional exposure to quantitative methods.

One of these:
- PSQF:6244 Correlation and Regression 4
- PSQF:6246 Design of Experiments 4
- PSQF:6247 Nonparametric Statistical Methods 3
- PSQF:6252 Introduction to Multivariate Statistical Methods 3

Research Project

In consultation with a faculty member, students design, implement, and present an original second-year research study. This experience provides the opportunity to conduct a pilot study that will strengthen their thesis in terms of methods, instruments, theoretical grounding, or focus of research question. Student presentations of their research are open to the public. Students are encouraged to submit their study results for broader dissemination at a local, regional, or national conference.
Additional Course Work

To develop specific competencies that are related to research, doctoral students in educational psychology are encouraged to select from the following elective courses.

<table>

Advanced qualitative course (consult with advisor)
Mixed methods course (consult with advisor)

Research-Related Activities

Students are encouraged to participate in research experiences beyond their course work. They are encouraged to:

- attend research conferences as a presenter or audience member;
- become members of professional research organizations such as the American Educational Research Association;
- volunteer as proposal reviewers for conferences in their areas of expertise later in their program of study; and
- work with faculty members on faculty research projects.

Electives

Students may take up to 9 s.h. of elective course work. Students can take PSQF:6217 Seminar in College Teaching and/or additional research courses. See “Research Requirement” above. Other courses may be included in consultation with the advisor.

Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of course work outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline such as mathematics education, educational philosophy, or program evaluation. Courses must be numbered 5000 or above, can span across departments and colleges, and must be consistent with a plan approved by a student’s advisor.

Comprehensive Examination

The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of the examining committee, composed of five faculty members and does not necessarily include the same faculty members as the dissertation committee. The options are a review article, an extended research activity, or a traditional comprehensive examination. For details of each option’s requirements, contact the Department of Psychological and Quantitative Foundations.

Admission

Applicants to the Ph.D. program in educational psychology must meet the admission requirements of the Graduate College, including the minimum grade-point average. They must have a verbal score of at least 150 and a quantitative score of at least 152 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.

Admission is for fall entry. Application deadline is January 15; late applications might not be considered. Review of applications begins soon after, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication Graduate Study in Psychology and
Associated Fields. This policy is consistent with standards set by the association’s Board of Educational Affairs.

School Psychology

The Doctor of Philosophy program in school psychology requires a minimum of 125 s.h. of graduate credit. The program is fully accredited by the American Psychological Association.

The program’s goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners.

Ph.D. students develop a plan of study in consultation with their academic advisors. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

Students are required to complete yearly portfolio reviews, which include oral examinations; carry out a preliminary dissertation research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations.

Research Requirement

To receive credit for additional courses, students must obtain prior approval from their advisor and the school psychology program.

All of these:
PSQF:6243 Intermediate Statistical Methods 4
PSQF:6244 Correlation and Regression 4
PSQF:6246 Design of Experiments 4
PSQF:7331 Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods) 3

Program Core

The following courses are required.

All of these:
PSQF:6238 Assessment of Learning Differences (taken with PSQF:7237) 3-4
PSQF:6251 Individual Intelligence Testing (taken with PSQF:7237) 3
PSQF:6263 Consultation Theory and Practice (taken with PSQF:7337) 3
PSQF:7224 Introduction to School Psychology Practice 3
PSQF:7237 Beginning Practicum in School Psychological Service (minimum of 150 hours required) 3
PSQF:7313 Psychopathology in Childhood 3
PSQF:7315 Social and Emotional Assessment of Children and Adolescents 3
PSQF:7337 Advanced Practicum in School Psychology (minimum of 750 hours required) 12
PSQF:7352 Seminar: Behavioral Assessment and Evaluation 3
PSQF:7367 Social Psychology and Social Systems 3
PSQF:7380 Practicum in College Social Psychology Practicum/ Internship 1-3
PSQF:7390 Supervision of School Psychology Practicum/ Internship 1
PSQF:7437 Internship in School Psychology (one year full-time or two years half-time; total of 1800 hours required) 3

Program course work in evaluation

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of PSQF:7237 Beginning Practicum in School Psychological Service before enrolling in PSQF:7337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

Admission

Applicants to the Ph.D. program in school psychology must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education and a g.p.a. above 3.00. A combined verbal and quantitative score of 308 or higher and an analytic writing score of 4 or higher on the Graduate Record Examination (GRE) General Test are recommended but not required. The faculty also encourages applications from individuals with an M.A. or Ed.S. and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall entry. Admission decisions are usually made by March 15. The program admits from six to eight students each year.
Rehabilitation and Counselor Education

Chair
• John S. Wadsworth

Undergraduate minor: human relations
Graduate degrees: M.A. in rehabilitation and counselor education; Ph.D. in rehabilitation and counselor education
Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/rce

The Department of Rehabilitation and Counselor Education prepares students to facilitate human development across the life span, to advocate for clients and students, and to serve local, national, and international communities through the delivery and creation of state-of-the-art counseling services. The department achieves these goals by advancing knowledge, skills, and attitudes appropriate for effective and ethical professional counseling practice and by conducting and disseminating related research.

The department prepares practitioners and scholars by offering graduate programs in five major areas within rehabilitation and counselor education:
- counselor education and supervision (offered in the Ph.D.);
- couple and family therapy (offered in the Ph.D.);
- rehabilitation and mental health counseling (offered in the M.A.);
- rehabilitation counselor education (offered in the Ph.D.);
- school counseling (offered in the M.A.).

It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs. In addition, it offers an undergraduate minor in human relations.

Programs

Undergraduate Program of Study

Minor
• Minor in Human Relations [p. 1091]

Graduate Programs of Study
• Master of Arts in Rehabilitation and Counselor Education [p. 1092]
• Doctor of Philosophy in Rehabilitation and Counselor Education [p. 1095]

Facilities

An on-campus counseling suite serves as a laboratory for training. In addition, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed at approved sites nationwide.

Admission

Prospective students must meet admission requirements for the individual programs as well as the department’s general admission requirements. Criminal background checks may be required.

Applicants to any of the department’s degree programs must satisfy the following admission requirements. Applicants also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants must submit the following:
• a completed graduate application form;
• copies of official transcripts of all previous undergraduate and graduate college work;
• official report of Graduate Record Exam (GRE) General Test verbal and quantitative scores;
• a statement of an applicant’s reasons for seeking an advanced degree in the department, including a statement of personal career objectives; and
• three current letters of recommendation from persons qualified to assess the applicant’s prospects for completing the M.A. or Ph.D. and to assess the applicant’s commitment to the profession.

The department may request a personal or telephone interview.

The following admission standards are considered for individual program admission decisions.

M.A. applicants should have an undergraduate g.p.a. of at least 3.00.

Ph.D. applicants should have a graduate g.p.a. of at least 3.00; those who have not been granted a graduate degree should have an undergraduate g.p.a. of at least 3.00.

International applicants must score at least 80 (Internet-based) on the Test of English as a Foreign Language (TOEFL). The department may require applicants with lower TOEFL scores to complete University of Iowa course work in English language fluency. TOEFL scores must be submitted with the application for admission.

Typically, doctoral students are not admitted unless they have completed a master’s degree in counseling or a related field. Relevant work experiences are important. Students who are accepted without a related master’s degree must complete core master’s-level course work before taking advanced Ph.D. courses. Required remedial courses and experiences are determined in consultation with the advisor and are included in a student’s curriculum plan.

The criteria listed above are minimum standards for admission. Final admission decisions are made by faculty committees. Some of the department’s programs have additional admission requirements; see the descriptions of the individual programs.

Application

For application materials, visit Iowa Graduate Admissions and the Department of Rehabilitation and Counselor Education website.

Applications must be complete before they can be reviewed. Applicants are responsible for providing a complete application dossier; to check on whether an application
Students in the department may apply for a wide variety of graduate assistantships. For example, many of the University's student service units award graduate assistantships. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

### Courses

#### Rehabilitation and Counselor Education Courses

**RCE:1029 First-Year Seminar**
1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**RCE:1030 Belin-Blank Center Seminar**
1 s.h.
Presentations and discussions by University resource experts and Belin-Blank Center for Gifted Education staff. Requirements: Belin-Blank Center student.

**RCE:2081 Making a Vocational-Educational Choice**
2-3 s.h.
Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.

**RCE:4081 ePortfolio Production**
1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, EPLS:4081, PSQF:4081.

**RCE:4110 Psychology of Food and Mood**
3 s.h.
Neurobehavioral and psychological determinants of food preference, behavior, and mood management; cultural meanings of food in North America, obesity, dieting, disordered eating; how we use food as a means of managing or damaging our food and health.

**RCE:4111 Relationships and Workplace Dynamics: Keys to a Successful Career**
3 s.h.
Examination of human relations, workplace organizational structures, and workplace expectations of team work, diversity, conflict, conflict resolution and communication; leadership, employees' effect on leadership, individual self-awareness, team structures, leadership habits, behaviors and organizational influences.

**RCE:4112 Job Interviewing for Success**
3 s.h.
Two approaches to job interviews: interviewing to obtain a job, and interviewing applicants for a job; talents, knowledge, and skills necessary to successfully conduct interviews from job applicant and employer perspectives; review of typical interview processes, discussion of legal and ethical boundaries with tips on responding to questions of concern, examination of interview formats and styles, communication best practices prior/during/following an interview, development of typical interview questions and responses and review of strategies employers use in hiring processes such as applicant screening, interview content, and candidate evaluation.

**RCE:4113 Sleep, Sleep Deprivation, and Sleep Disorders**
3 s.h.
Theories and stages of sleep; aging and normal sleep; impact of sleep and sleep deprivation on mental and physical health; overview of sleep disorders and treatments.

**RCE:4114 Psychology of Body Modification and Self-Image**
3 s.h.
Exploration of psychology and practices of body modification as related to self-image; dynamic relationship between body and identity; body modification accomplished in many ways and for many reasons (beauty, social status, religious expression, improve function, to rebel); how gender, race, culture, age, and health shape our attitudes about our bodies and our decision to make modifications; risks and benefits (physical, emotional, social) of making a body modification to ones' sense of self as it relates to others and to oneself.

**RCE:4119 Family Issues in Giftedness**
1 s.h.
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/ family relationships.

**RCE:4120 Psychology of Giftedness**
3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as PSQF:4120.

**RCE:4121 Identification of Students for Gifted Programs**
3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as PSQF:4121.

**RCE:4123 Gender Issues and Giftedness**
1 s.h.
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.

**RCE:4124 Ethnic and Cultural Issues and Giftedness**
1 s.h.
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.

**RCE:4125 Counseling and Psychological Needs of the Gifted**
1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as PSQF:4125.

**RCE:4126 Cognitive and Affective Needs of Underachieving Gifted**
1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as PSQF:4126.
RCE:4127 Research and Theory in Talent/Giftedness 3 s.h.  
Biennial research symposium. Same as PSQF:4127.

RCE:4128 Advanced Leadership Seminar in Gifted Education 1 s.h.  
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.

RCE:4129 Creativity: Issues and Applications in Gifted Education 1 s.h.  
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as PSQF:4129.

RCE:4130 Human Sexuality 3 s.h.  
Introduction to human sexuality from a sociocultural perspective; readings and discussions of sensitive topics and explicit depictions/discussions of sexuality; students may relate their sexual experiences to course content; combination of formats.

RCE:4131 Loss, Death, and Bereavement 3 s.h.  
Psychological study of death, grief, loss, bereavement, and coping from a multidimensional and multidisciplinary perspective; loss and grief as natural experiences that are not often explicitly discussed; overview of topics relating to death, including multicultural attitudes toward death, death practices, theories on loss and bereavement, and grieving throughout the life cycle; hospice and palliative care, suicide, and making meaning of life out of death; development of critical thinking skills by engaging in empirically-based discussions.

RCE:4132 Introduction to Addictions and Impulse Control Disorders 3 s.h.  
Exploration of addictions and impulse control disorders; legal, social, physical, and emotional issues related to addictions and impulse control disorders.

RCE:4137 Introduction to Educating Gifted Students 3 s.h.  
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as EDTL:4137.

RCE:4140 Foundations of Leadership for Community Agencies 3 s.h.  
Preparation to become effective employees and leaders; emphasis on leadership roles in clinical and other human service or health care settings; how leadership transcends job title associated with high work performance; experiential activities that illustrate key didactic concepts and didactic lecture review, written assignments, experiential assignment, in-depth discussions illustrating key concepts.

RCE:4145 Marriage and Family Interaction 3 s.h.  
Contemporary American couple, marriage, and family relationships; mate selection.

RCE:4162 Introduction to Couple and Family Therapy 3 s.h.  
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques.

RCE:4173 Trauma Across the Lifespan 3 s.h.  
Current theory and practice models related to trauma and crisis intervention; overview of multi-system level definitions of trauma experience (historical, individual, interpersonal, family, organizational, community, global); various approaches to trauma response theory; unique contributions that counselors offer (strength, resiliency, coping); commitments to multicultural and systems factors; macro- to micro-level understanding of trauma.

RCE:4174 Positive Psychology 3 s.h.  
Promotion of human potential as a focus for counseling professionals that provides a supplement to diagnosis and treatment of pathology; how to achieve happiness, resilience, wellness, and life satisfaction through enhancement of human strengths and virtues.

RCE:4175 Motivational Interviewing 3 s.h.  
Motivational Interviewing (Miller & Rollnick) and the stages of change model.

RCE:4176 Child Abuse: Assessment, Intervention, and Advocacy 3 s.h.  
Preparation for work involving abused children or child abuse issues; appropriate for careers in counseling, education, health sciences, law, psychology, social work, and so forth; interactive approach.

RCE:4177 Life After Service: Veterans in College 3 s.h.  
Introduction to various resources on campus related to increasing student veterans' success as college students; topics and assignments specifically tailored to military service-connected students (e.g., ROTC students, national guard or reserve military members, active duty veterans); topics include vocational rehabilitation, GI Bill, current events, and health care (sleep, TBI, traumatic stress responses, substance abuse); development of academic skills for writing, more effective studying, improved reading and note taking.

RCE:4178 Microcounseling 1-3 s.h.  
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.

RCE:4179 Sexuality Within the Helping Professions 3 s.h.  
Relationship between sexuality and mental health; varied ethical and professional issues in sex therapy.

RCE:4180 Topical Seminar for Helping Professionals arr.  
Topics for the continuing education of counselors and related professionals.

RCE:4185 Introduction to Substance Abuse 3 s.h.  
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.

RCE:4187 Introduction to Assistive Technology 3 s.h.  
How assistive technology can be used for attainment of goals in education or work. Same as EDTL:4987.

RCE:4188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.  
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as EDTL:4188.
RCE:4190 Group Processes for Related Professions 3 s.h.
Small-group procedures for personal and organizational development in educational settings; discussions of theoretical and ethical issues, multicultural considerations, and research findings supplemented with demonstrations; participation in a personal growth group.

RCE:4191 Advocacy: Awareness, Assertiveness, and Activism arr.
Introduction to advocacy skills--communicate, convey, negotiate or assert interests, desires, needs, and rights for self or others; opportunity to design and implement a plan of change; ecological model of human interaction that suggests a person must be viewed within context of his or her environment(s); how having power on a personal and social level impacts one's environment and is central to a person's well-being; advocacy as a central function of helping professions.

RCE:4192 Group Leadership in Human Sexuality 0-3 s.h.
How to teach human sexuality; how to help students achieve an open-minded yet responsible attitude toward their own and others' sexuality. Prerequisites: RCE:4130.

RCE:4193 Individual Instruction - Undergraduate arr.

RCE:4194 Interpersonal Effectiveness 3 s.h.
Paradigms and techniques that enhance interpersonal relationship skills.

RCE:4195 Ethics in Human Relations and Counseling 3 s.h.
Morality and ethics; ethical issues; models and techniques for effective ethical decision making in personal and professional interactions.

RCE:4197 Citizenship in a Multicultural Society 3 s.h.
Human relationships in the context of societal oppressions such as racism, sexism, able-bodiedism, and heterosexism.

RCE:4199 Counseling for Related Professions 3 s.h.
Counseling theories and techniques; ethical and multicultural considerations; small-group discussions, demonstrations, lectures.

RCE:5200 Professional School Counselor 3 s.h.
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues. Requirements: admission to school counseling program.

RCE:5202 Introduction to Group Counseling 3 s.h.

RCE:5203 Career Development 3 s.h.
Preparation for counselors and student affairs professionals; career development concepts and theories, family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Requirements: rehabilitation and counselor education enrollment.

RCE:5204 School Culture and Classroom Management for School Counselors 3 s.h.
American public elementary and secondary schools and the school counselor's role; classroom management for school counselors.

RCE:5210 Rehabilitation Client Assessment 3 s.h.
Process and practice of assessing persons with disabilities for rehabilitation plan development and decision making; multicultural and ethical considerations.

RCE:5221 Theories of Counseling and Human Development Across the Life Span 3 s.h.

RCE:5222 Counseling Children and Adolescents in Schools 3 s.h.
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisites: RCE:5221 or RCE:5278.

RCE:5223 Counseling Gifted and Talented Students 3 s.h.
Learning theories and best practices related to school counseling of gifted and talented students; academic, career, and personal/social development. Prerequisites: RCE:4137.

RCE:5226 Assessment of Giftedness 3 s.h.
Training and practice in assessment of gifted children. Same as PSQF:5226.

RCE:5230 School Counseling Program Leadership and Management 3 s.h.
Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability; behavioral consultation and collaboration; ethical, multicultural, family considerations. Corequisites: RCE:6321 or RCE:6322.

RCE:5237 Seminar in Gifted Education 2-3 s.h.
Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Requirements: work as teacher with Belin Fellowship.

RCE:5238 Advanced Seminar in Gifted Education 1 s.h.
Supervisory, administrative, and research issues; fellowships for seminar participants. Prerequisites: RCE:5237.

RCE:5241 Introduction to Rehabilitation and Mental Health Counseling 3 s.h.
Historical, philosophical, legislative, societal, and multicultural overview of rehabilitation and mental health process and practice in community-based settings; roles of rehabilitation and mental health professionals, nature of agencies, resources, contemporary issues and ethics.

RCE:5247 Medical Aspects of Disability 3 s.h.
Medical evaluation as part of the rehabilitation process; body systems, medical terminology, medical description of disabilities; functional limitations; projection of potential for rehabilitation and mental health applied to planning and placement.

RCE:5248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation 3 s.h.
Psychiatric conditions, their diagnostic criteria using the DSM-IV-TR, treatment planning considerations; medical and psychiatric rehabilitation models, interrelationship in providing services to persons with psychiatric disabilities; functional assessment and client-driven rehabilitation planning for community reintegration. Requirements: rehabilitation and counselor education enrollment.

RCE:5249 Psychiatric Disorders and Interventions 3 s.h.
Description, classification, and theoretical perspectives related to psychiatric disorders; models of intervention in community-based settings.
RCE:5250 Multiculturalism in Helping Professions 3 s.h.
Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of amulticulturally diverse society; knowledge, skill, self-awareness components relevant for helping practitioners. Requirements: rehabilitation and counselor education enrollment.

RCE:5254 Assessment and Appraisal 3 s.h.
Presentation of materials related to assessment and appraisal for those who plan to work as professional counselors; didactic and experiential activities that enhance a counseling professional's work in the field; specifically, development of skills related to the administration, scoring, and interpretation of basic assessment materials and appraisal in a counseling setting.

RCE:5256 Action Research: School-Based Field Research 3 s.h.
Field-based research experiences in school settings; students conceptualize, design, conduct, and articulate school-based research findings. Prerequisites: RCE:5254.

RCE:5262 Advanced Couple and Family Therapy 3 s.h.
Review and critique couple and family therapy theory, ethics, and techniques as applied to problems of couple and family over the life span; multicultural considerations. Requirements: advanced graduate standing. Recommendations: RCE:4162.

RCE:5270 Issues and Ethics in Counseling 3 s.h.
Ethical standards and decision making; current issues; ethical, legal, and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

RCE:5276 Research in Rehabilitation and Mental Health Counseling 3 s.h.
Current state of counseling practice and emphasis on accountability as a professional quality; need for counselors to be knowledgeable and skillful in identifying and using "what works" in counseling endeavors; introduction to major principles, concepts, and practices in social science research, including program evaluation; preparing counselors-in-training as future research consumers. Recommendations: rehabilitation and mental health counseling major.

RCE:5278 Applied Microcounseling 3 s.h.
Development of basic and advanced counseling skills; preparation for work in education and community settings.

RCE:5280 Topical Seminar in RCE arr.
Special topics dealing with contemporary problems of concern to counselors in specific settings.

RCE:6263 Consultation Theory and Practice 3 s.h.
Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as PSQP:6263.

RCE:6293 Individual Instruction--Graduate arr.

RCE:6300 Practicum in School Counseling 3 s.h.
Supervised experience counseling and consulting in elementary and secondary school settings. Requirements: completion of school counseling core courses.

RCE:6321 Internship in Elementary School Counseling 6 s.h.
Supervised placement in an elementary school setting; performance of tasks, responsibilities of an elementary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6322 Internship in Secondary School Counseling 6 s.h.
Supervised placement in a secondary school setting; performance of tasks, responsibilities of a secondary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6323 Internship in Middle School Counseling 3 s.h.
Supervised placement in a middle school setting; performance of tasks and responsibilities of a middle school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6341 Job Development Placement and Follow-up 3 s.h.
Obtaining appropriate jobs for individuals with disabilities who have received rehabilitation services; client, counselor, employer, job specifications.

RCE:6342 Psychosocial and Developmental Aspects 3 s.h.
Dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

RCE:6348 Prepracticum in Rehabilitation and Mental Health Counseling 3 s.h.
Counseling laboratory to promote knowledge, skills, and awareness of effective and ethical counseling methods, and fundamentals of helping relationships and case management. Prerequisites: RCE:5221. Corequisites: RCE:5278.

RCE:6349 Practicum in Rehabilitation and Mental Health Counseling arr.
Experience in a community agency serving individuals with disabilities and mental health disorders, supervised by a certified rehabilitation counselor in an approved site. Prerequisites: RCE:6348.

RCE:6350 Internship I: Rehabilitation and Mental Health Counseling 3-6 s.h.
Experience to enhance competency in agencies and with persons represented in student's specialty area. Prerequisites: RCE:6349.

RCE:6352 Internship II: Rehabilitation and Mental Health Counseling arr.
Full-time clinical experience in rehabilitation and mental health settings; training in wide range of rehabilitation and mental health functions under supervision of a qualified M.A. counselor with appropriate credentials. Prerequisites: RCE:6350.

RCE:6394 Research and Scholarship Internship 1-3 s.h.
Preparation for comprehensive examination.

RCE:6500 Research Methods in Counseling 3 s.h.
Introduction to research methods for counselors; research strategies that have dominated counseling literature; key concepts related to development of researchable questions, use and interpretation of quantitative and qualitative analyses, factors impacting design integrity, and use of findings to effect counseling program modifications; focus on essential approaches needed to conceptualize and develop a research proposal.

RCE:7255 Advanced Career Development and Counseling 3 s.h.
Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.
RCE:7338 Essentials of Qualitative Inquiry 3 s.h.
Principles, processes of qualitative research in education; methods of design, data collection and analysis, interpretation, trustworthiness. Requirements: Ph.D. enrollment and introductory research course.

RCE:7347 Home/School/Community: System Interventions 3 s.h.
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as PSQF:7347.

RCE:7353 Advanced Counseling and Psychotherapy 3 s.h.
Theories, techniques, and ethics of counseling clients with personal and interpersonal problems; ethical and multicultural considerations.

RCE:7357 Advanced Group Counseling and Psychotherapy 3 s.h.
Theories and techniques of group counseling and psychotherapy; integration of theory, experience, and research in group counseling; ethical and multicultural considerations.

RCE:7360 Advanced Practicum in Counseling arr.
Supervised practice in counseling; intensive analysis of counselor ethics, styles, methods. Advanced graduate standing in counselor education and consent of instructor required. Prerequisites: RCE:5221. Requirements: Ph.D. enrollment, advanced graduate standing in counselor education, and counseling introductory practicum; and concurrent enrollment in RCE:5249 for rehabilitation counselor education student.

RCE:7361 Advanced Practicum in Couple and Family Therapy 1-3 s.h.
Opportunity to accumulate client contact and supervision hours towards graduation and licensure; conceptual and executive skills, observational skills and abilities to work as a member of a therapeutic team, awareness of how personal growth and development as a therapist impacts work with clients, comfort and motivation to learn multiple training levels provided, creation of collaborative and supportive atmosphere on all practicum levels. Requirements: enrollment in couple and family therapy program.

RCE:7369 Advanced Seminar in Rehabilitation Counseling 3 s.h.
Philosophy, theory, research base, practice of rehabilitation counseling, psychology; ethical and multicultural considerations; relationship to disability studies; psychological aspects of disability, client assessment, history, systems, contemporary issues.

RCE:7380 Internship in Teaching arr.
Supervised college teaching experience in counselor education courses; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations.

RCE:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, EPLS:7385, GRAD:7385, PSQF:7385.

RCE:7388 Family Development 3 s.h.
Overview of research relating to family development, family structure, and cultural/ethnic diversity; how research can be applied to clinical practice; focus on strengths and challenges of families with varying structures, cultural dimensions in family functioning, developmental perspectives on family functioning, and how these factors can advance family systems based on research and practice.

RCE:7389 Seminar in Couple Intervention Research 3 s.h.
Overview of couple intervention and outcome research; focus on evidence-based couple therapies (i.e., Emotionally Focused Couple Therapy, Behavioral Couple Therapy, work of John Gottman); research addressing effectiveness and efficiency of couple interventions in treatment of couple distress issues highly comorbid with distress, including review of mental and physical health problems; research addressing factors associated with treatment outcomes.

RCE:7399 Supervision in Couple and Family Therapy 3 s.h.
Supervision of Master's-level couple and family therapy students; mentoring supervision received from supervision instructor; assignments reflect requirements for AAMFT Approved Supervisor designation; fulfills didactic requirement for AAMFT Approved Supervisor status. Requirements: enrollment in couple and family therapy program.

RCE:7400 Seminar: Ethics and Issues in Counseling 3 s.h.
Ethical, professional, and contemporary issues in counseling practice, education, and research. Requirements: rehabilitation and counselor education Ph.D. enrollment.

RCE:7404 Seminar in Child and Adolescent Intervention Research 3 s.h.
Review and analyze pertinent literature and evidenced-based interventions for children and adolescents; focus on reviewing and critically analyzing published outcome studies in areas of childhood and adolescent disorders, as well as examining and critiquing effective interventions that have undergone stages 1-3 clinical trials; active discussions of the research findings for clinical implications will occur. Prerequisites: RCE:5262.

RCE:7438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education 3 s.h.
Exploration of qualitative research at advanced theoretical, practical, and technical level, inside and outside a typical classroom environment; scholarly discussions. Prerequisites: RCE:7338.

RCE:7440 Seminar in Family-Based Play Therapy Interventions 3 s.h.
Inclusion of children in family therapy sessions; varied therapeutic strategies to effectively work with young children and their parents; employment of developmental lens (therapeutic techniques largely depend on children's age and developmental stage) and theoretical lens (many techniques are linked to certain theoretical approaches); development of therapeutic skills with application of varied therapeutic approaches in clinical work; does not train students to become play therapists and/or child therapists. Prerequisites: RCE:5262.

### Human Relations, Minor

The minor in human relations is open to all University of Iowa students enrolled in undergraduate degree programs.

The minor in human relations requires a minimum of 15 s.h. of credit, including 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor and in all UI courses for the minor. Course work in the minor may not be taken pass/nonpass, but may count toward the minor if offered as S/U or S/F. Transfer credit must be approved by the chair of the Department of Rehabilitation and Counselor Education in order to count toward the minor.

The minor in human relations requires the following course work.

Contact the Department of Rehabilitation and Counselor Education for more information about the minor.
Rehabilitation and Counselor Education, M.A.

Maintaining Good Standing

All graduate students must meet the following standards in order to remain in their degree programs and advance to candidacy and remain a candidate for a degree:

- maintain a g.p.a. of at least 3.00;
- successfully complete practicums and internships;
- maintain professional behavior consistent with the ACA Code of Ethics (American Counseling Association) for students enrolled in a counseling graduate program, or the AAMFT Code of Ethics (American Association for Marriage and Family Therapy) for graduate students in couples and family therapy, and any additional code of professional ethics adhered to in any agency in which the student completes a practicum or internship; and
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student's academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in the student's department file.

Probational Status

M.A. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, a student may be removed from the program. Students are allowed one probational status during their program of study.

Standards

Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in the following areas:

- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multicultural competent helping professional;
- integration of feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student; and
- a personal plan for future practice in the field regarding multicultural relationships.

Rehabilitation and Mental Health Counseling

The Master of Arts program in rehabilitation and mental health counseling requires a minimum of 60 s.h. of graduate credit. Full-time students can complete the program in approximately 21 months (four semesters plus two summer sessions). The program prepares professional counselors to provide assistance in psychological wellness, employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their own functional needs. It also prepares counselors in mental health counseling/psychiatric rehabilitation to obtain licensure as professionals who provide services in mental health settings.

Rehabilitation and mental health counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans Affairs vocational rehabilitation programs; independent living centers; community-based rehabilitation centers and supported employment; community mental health centers; psychiatric rehabilitation programs; and private for-profit worker’s compensation and insurance rehabilitation agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate an individual's needs. Assessment, personal and vocational counseling, development of rehabilitation and treatment plans, case management, service coordination, psychosocial adjustment, job development, placement, and follow-up are typical services that rehabilitation and mental health counselors provide.

The M.A. program in rehabilitation and mental health counseling is accredited by the Council on Rehabilitation Education (CORE) and the Council for Accreditation of Counseling and Related Educational Programs (CACREP) in clinical mental health counseling.

Graduates of the M.A. program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRCC) and the National Board for Certified Counselors. By completing the program's course work, students also complete the courses they must take in order to apply for licensure as mental health counselors in Iowa.

The M.A. curriculum blends academic work with supervised clinical experiences. Students take two semesters of practicum and one semester of internship concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to rehabilitation and community mental health agencies or facilities that meet CORE and CACREP accreditation standards and that have programs or clientele who match a student's interests and educational objectives. Clinical placements require criminal background checks.

Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

The M.A. program in rehabilitation and mental health counseling requires the following work.

The Master of Arts program in school counseling requires the following courses as outlined on the Department of Rehabilitation and Counselor Education website before enrolling in RCE:6300 Practicum in School Counseling for the spring semester of their second year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Students must complete program and department core courses as outlined on the Department of Rehabilitation and Counselor Education website before enrolling in RCE:6300 Practicum in School Counseling for the spring semester of their second year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student’s progress is reviewed periodically by the major advisor. Students who have successfully completed all prerequisites for RCE:6300 are reviewed in the semester before they take the practicum course, to assure that they are prepared for it. During the summer, students are evaluated to assure their readiness for the internship RCE:6321 Internship in Elementary School Counseling or RCE:6322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

The M.A. program in school counseling requires the following work.

### Required Courses

The following schedule of required courses reflects a three-year program of study. Students who do not have teacher licensure are required to complete at least three additional courses in education before the third year of classes.

### Comprehensive Examination

The comprehensive examination consists of two exams totaling six hours: a three-hour departmental comprehensive examination and a three-hour written examination on the process and practice of rehabilitation and mental health counseling. Exams are offered only during fall and spring semesters.

### Admission

Applicants to the graduate program must meet the department’s general admission requirements.

Applicants to the M.A. program in rehabilitation and mental health counseling should have a good academic record and relevant experience, such as assisting individuals with disabilities. No specific undergraduate major area of study is required for the M.A. program, but a major in one of the social sciences is considered good preparation. Postbaccalaureate work experience relevant to the field of rehabilitation and mental health counseling is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. Applicants also must meet the department’s admission requirements. A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for summer session (June) entry; application deadline for full-time study is March 1. Applications for part-time study are accepted for fall and spring semesters and are considered when class space permits.

Students pursue a sequenced plan of study that begins in summer session. Although students may be admitted for any semester, the program highly recommends that full-time students begin in summer.

### School Counseling

The Master of Arts program in school counseling requires a minimum of 54 s.h. of graduate credit. The program prepares individuals to work effectively as counselors in K-12 school settings. It is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Successful graduates are eligible for K-12 school counselor licensure in Iowa. Students may apply to the National Board for Certified Counselors at the completion of their programs. They also may earn an endorsement in talented and gifted education or a certificate from the Belin-Blank Center for Gifted Education by taking additional course work.

During the first few semesters, students take core cognate courses, including course work on gifted education, and the microcounseling clinical skills laboratory. Then they enter a counseling practicum followed by an internship. Students who enter without teaching licensure are required to take additional course work in education—EPLS:3000 Foundations of Education, EDTL:4900 Foundations of Special Education, and PSQF:6200 Educational Psychology or equivalent—to meet school counselor licensure standards. Students are expected to complete at least 100 clock hours in practicum and 600 clock hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students must complete program and department core courses as outlined on the Department of Rehabilitation and Counselor Education website before enrolling in RCE:6300 Practicum in School Counseling for the spring semester of their second year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student’s progress is reviewed periodically by the major advisor. Students who have successfully completed all prerequisites for RCE:6300 are reviewed in the semester before they take the practicum course, to assure that they are prepared for it. During the summer, students are evaluated to assure their readiness for the internship RCE:6321 Internship in Elementary School Counseling or RCE:6322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

The M.A. program in school counseling requires the following work.

Comprehensive Examination

All students are required to take comprehensive exams for the departmental core and for school counseling during their final semester of internship. Comprehensive exams include a written six-hour exam in the departmental core and school counseling. An oral exam also is required unless waived by the comprehensive exam committee.

Admission

Applicants to the graduate programs must meet the department's general admission requirements. Applicants to the M.A. program in school counseling should have an undergraduate g.p.a. of 3.00 or higher. The department prefers that applicants have one year of teaching experience or successful experiences with children and/or adolescents, which they must document in a written statement. Graduate Record Exam (GRE) General Test scores must be on file at the University.

Applications are accepted for summer and fall entry and should be submitted by January 25th.
Rehabilitation and Counselor Education, Ph.D.

Maintaining Good Standing

All graduate students must meet the following standards in order to remain in their degree programs and advance to candidacy and remain a candidate for a degree:

- maintain a g.p.a. of at least 3.00;
- successfully complete a practicum, internship, or equivalent professional experience;
- maintain professional behavior consistent with the ACA Code of Ethics (American Counseling Association) for students enrolled in a counseling graduate program, or the AAMFT Code of Ethics (American Association for Marriage and Family Therapy) for graduate students in couples and family therapy, and any additional code of professional ethics adhered to in any agency in which the student completes a practicum or internship; and
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student’s academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in the student’s department file.

Probational Status

Ph.D. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, a student may be removed from the program. Students are allowed one probational status during their program of study.

Standards

Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in the following areas:

- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multiculturally competent helping professional;
- integration of feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student; and
- a personal plan for future practice in the field regarding multicultural relationships.

Counselor Education and Supervision

The Doctor of Philosophy program in counselor education and supervision (CES) requires 96 s.h. of graduate credit. The program provides students with knowledge and skills related to general counseling (including mental health and school counseling), teaching, consulting, supervising counselors, and conducting research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations. Students may choose an emphasis in an area agreed upon by faculty advisors.

Counselor education and supervision graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors, perform counseling interventions with individuals and groups, and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners, educators, and policy makers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA) and the Association for Counselor Education and Supervision (ACES) are the professional organizations most related to program activities.

The Ph.D. curriculum includes required courses in counseling, in research tools and applications, and a dissertation. Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master’s degree program approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) may need to remedy deficiencies by taking appropriate course work at the master’s degree level.

The Ph.D. program in counselor education and supervision requires the following work.

Required Ph.D. Research Courses

Students must complete a specific sequence of research courses which include distributed course work in both qualitative and quantitative areas. They select from doctoral research courses listed under RCE Doctoral Research Requirements on the Department of Rehabilitation and Counselor Education website.

Elective Minor Area

The program offers an elective specialty in rehabilitation counselor education. This special emphasis advances individuals’ research, teaching, clinical supervision, and leadership interests in areas that address a variety of disability-related issues and the training of rehabilitation counselors in various settings.

The National Council on Rehabilitation Education is an additional professional organization closely related to this specialty area.

Students who chose to fulfill requirements for this specialty area also complete the following.

RCE:7369 Advanced Seminar in Rehabilitation Counseling 3
RCE:7450 Advanced Social Psychology of Disability 3
RCE:7461 Practicum in Research arr.

A series of courses, typically a minimum of three, outside the Department of Rehabilitation and Counselor Education (consult major and minor area advisors)

Master's Thesis Project or Equivalent

Students are required to submit a previously conducted master's thesis for faculty review and approval or to complete a new supervised experiential research project before taking comprehensive exams. Students without an approved M.A./M.S. thesis enroll in the following.

RCE:6394 Research and Scholarship Internship 1-3

Comprehensive Examination

The comprehensive examination consists of an oral defense of a student's portfolio, which covers six professional competency domains in counselor education, and an exam on the minor area. The examination may be taken during a student’s final semester of course work, which typically includes an internship.

Dissertation

The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h. The dissertation committee must include at least two counselor education and supervision faculty members.

RCE:7493 Ph.D. Thesis 10-15

Admission

Applicants to the program must meet the department’s general admission requirements. In addition, applicants to the Ph.D. program in counselor education and supervision must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Students may be admitted for fall, spring, or summer entry, but the department strongly advises application for fall entry. Consideration of applications begins January 15 for fall entry; all application materials should be received at the University by this date.

Couple and Family Therapy

The Doctor of Philosophy program in couple and family therapy (CFT) requires a minimum of 74 s.h. of graduate credit. The program prepares professionals for couple/marriage and family therapy leadership roles in academic and research settings, administration and supervision, and clinical delivery systems.

Using a social justice perspective, the program prepares CFTs in three domains: innovative research methods, advanced theoretical knowledge and clinical/ supervisory skills, and effective teaching practices. Each of these domains is applied within an ethical and multicultural context.

The program is designed to meet the accreditation standards of the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) of the American Association for Marriage and Family Therapy. Ph.D. graduates are expected to have sufficient knowledge and skill to teach and conduct research at colleges and universities; supervise other professionals; and provide clinical services to individuals, couples, and families. They also should have competencies to engage in and evaluate theory-based qualitative and/or quantitative research.

Credit for the Ph.D. program may include credit for relevant course work completed for a COAMFTE-accredited master’s degree program in couple/marriage and family therapy or the equivalent.

Each student is required to submit a curriculum plan during the first two years of the program, before completing the comprehensive examination. The CFT faculty reviews each student annually; students must fulfill departmental requirements in order to continue in the program.

Work for the Ph.D. includes course work, a critical review, a theory of change paper, a comprehensive exam, a clinical or academic internship, and a dissertation. Most students complete the program's required course work in two or three years and take one or two years to complete the internship and dissertation.

The Ph.D. program in couple and family therapy requires the following work.
may require quantitative, qualitative, or mixed methods and depending on a student’s research questions, the dissertation may involve data collection or the secondary analysis of an existing data set. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee.

RCE:7493 Ph.D. Thesis

10

Admission

Applicants to the program must meet the department’s general admission requirements.

Applicants should have a graduate g.p.a. of at least 3.00 and a Graduate Record Exam (GRE) General Test combined verbal and quantitative score of at least 300 on the revised test or at least 1,100 on the old test. They also must hold a master's degree in couple and family therapy/marriage and family therapy from a Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) accredited program or the equivalent.

Students are admitted for fall entry. All application materials should be received at the University on or before December 31, when the faculty begins evaluating applications. The program requires an interview with the faculty, in person or by telephone. Generally, the interview is scheduled once complete application materials have been received.

Rehabilitation Counselor Education

The Doctor of Philosophy program in rehabilitation counselor education requires a minimum of 90 s.h. of graduate credit. The program prepares professionals for leadership roles in rehabilitation counselor education, research, administration, and service delivery systems. It provides rehabilitation counselors the opportunity to master knowledge; clinical, teaching, and supervisory skills; and research competencies at the most advanced levels.

Ph.D. students focus on three areas of advanced development: rehabilitation counselor education and supervision, research, and professional practice. The program is flexible, permitting students to pursue individualized plans of study within the required curriculum. Ph.D. graduates are expected to have sufficient knowledge and skill to teach at colleges and universities, supervise other professionals, and provide clinical services to clients. They also should have competencies to engage in and evaluate theoretical, qualitative, and quantitative research.

Each student is required to submit a curriculum plan. The rehabilitation counseling faculty reviews each student annually. Students must meet the department’s requirements in order to continue in the program.

The 90 s.h. required for the degree may include credit for relevant course work completed for a master's degree. This combination of master’s and doctoral course work ensures exposure to vocational and psychiatric rehabilitation as well as to independent living rehabilitation and community-based counseling processes, concepts, programs, and services. Students who are not eligible for certification by the Commission on Rehabilitation Counselor Certification (CRCC) may be required to take courses to become eligible.

Most students complete their course work and comprehensive exam in three years and take a fourth year to complete the dissertation.

Dissertation

Work for the doctoral dissertation employs a student’s independent skills in conducting original research. The dissertation process is supervised by a student’s advisor. Depending on a student’s research questions, the dissertation may require quantitative, qualitative, or mixed methods and...
The Ph.D. program in rehabilitation counselor education requires the following work.

**Department Core**

All of these:

- RCE:7255 Advanced Career Development and Counseling 3
- RCE:7353 Advanced Counseling and Psychotherapy 3
- RCE:7357 Advanced Group Counseling and Psychotherapy 3
- RCE:7400 Seminar: Ethics and Issues in Counseling 3

**Program Requirements**

Students are expected to have completed core rehabilitation counseling requirements during master's degree work (see Master of Arts in Rehabilitation and Counselor Education [p. 1092] with subprogram in rehabilitation and mental health counseling in the Catalog). The advisor and program faculty determine which master's-level courses must be taken to correct deficiencies. Students also must complete the following.

- RCE:7360 Advanced Practicum in Counseling (section 1) 3
- RCE:7369 Advanced Seminar in Rehabilitation Counseling 3
- RCE:7380 Internship in Teaching 1-3
- RCE:7385 Teaching and Learning in Higher Education 3
- RCE:7450 Advanced Social Psychology of Disability 3
- RCE:7454 Supervision Theory and Practice 3
- RCE:7455 Internship in Supervision 3
- RCE:7462 Advanced Practicum in Clinical Teaching 3
- PSQF:6217 Seminar in College Teaching 1-3

**Required Ph.D. Research Courses**

Students must complete a specific sequence of research courses which include distributed course work in both qualitative and quantitative areas. They select from a list of doctoral research courses; see RCE Doctoral Research Requirements on the Department of Rehabilitation and Counselor Education website.

**Minor Area**

Students plan a minor area in collaboration with their major advisor and curriculum plan committee. The minor area must be outside the department. Students select a minimum of 9 s.h. of course work in the minor area, in collaboration with their minor advisor and with the approval of their curriculum plan committee.

**Comprehensive Examination**

The comprehensive examination consists of three exams that total nine hours. They cover the department core (three hours), rehabilitation counseling—theory, practice, and research (three hours), and the minor area (three hours).

**Dissertation**

The dissertation is a major research study planned in collaboration with a student's major advisor. At least two rehabilitation counseling faculty members serve on the dissertation committee; one of them chairs or co-chairs the committee.

- RCE:7493 Ph.D. Thesis 10-15

**Admission**

Applicants to the program must meet the department's general admission requirements.

Applicants to the Ph.D. program in rehabilitation counselor education should have a master's degree in rehabilitation counseling or a related area and a graduate g.p.a. of 3.00 or higher. One year of full-time work experience in rehabilitation or a related field is strongly encouraged. Applicants should submit a written statement of purpose for pursuing the Ph.D. in rehabilitation counselor education and a statement of personal career objectives, official score on the Graduate Record Exam (GRE) General Test, and three letters of recommendation. A personal interview is required.

Applications are accepted for fall, spring, or summer entry; fall entry is strongly advised. Faculty consideration of applications begins January 15 for fall entry, November 15 for spring entry, and April 1 for summer entry.
Teaching English as a Foreign Language

Interim Chair, Department of Teaching and Learning
  • David B. Bills

Coordinator, Teaching English as a Foreign Language
  • David C. Johnson

Graduate certificate: teaching English as a foreign language
Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/academic-programs/foreign-language-and-esl-education/certificate-teaching-english-foreign-language

The graduate Certificate in Teaching English as a Foreign Language is designed for students interested in English language teaching and administration outside of the United States in primary and secondary school settings. Course study provides rigorous research-based content; cutting-edge online course technology; and web-based interaction allowing students to work at their own pace within the course schedule and structure. All of the courses are online.

The certificate is administered by the Department of Teaching and Learning [p. 1101] and is granted by the Graduate College.

Programs

Graduate Program of Study

Certificate
  • Certificate in Teaching English as a Foreign Language [p. 1100]
Teaching English as a Foreign Language, Certificate

The Certificate in Teaching English as a Foreign Language requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.

The certificate is organized around four competencies in foreign language teaching: theory, curriculum, assessment, and methodology. The competencies cover theoretical, conceptual, and sociopolitical foundations in second language learning and teaching; language education program design; fundamentals of second language assessment; and English language teaching methods and ethics.

Students begin certificate course work in the fall semester and complete their course work in the spring.

The certificate requires the following course work.

**Admission**

Applications for fall semester should be submitted by April 1. Students who apply should:

- hold a baccalaureate degree;
- have a minimum grade-point average of 2.50 in undergraduate course work;
- have a minimum TOEFL score of 90, with a minimum of 20 in each of the four sections (reading, writing, listening, speaking); and
- meet the general requirements of the Graduate College.
Teaching and Learning

Interim Chair
• David B. Bills

Undergraduate majors: elementary education (B.A., B.S., granted by the College of Liberal Arts and Sciences); science education (B.S., granted by the College of Liberal Arts and Sciences)

Graduate degrees: M.A.T. in teaching and learning; M.A. in teaching and learning; M.S. in teaching and learning; Ph.D. in teaching and learning

Faculty: https://education.uiowa.edu/directories
Website: https://education.uiowa.edu/teach

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education.

Undergraduate students pursuing a major in elementary education or science education must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Arts (elementary education) or Bachelor of Science (elementary education and science education); see the CLAS Academic Policies Handbook.

The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education; developmental reading; English education; foreign language, second language, and English as a Second Language education; language, literacy, and culture; mathematics education; music education; science education; social studies education; special education; and STEM education.

The department offers graduate degree programs in three major areas: elementary education, secondary education, and special education.

Elementary education programs:

- developmental reading (offered in the M.A. in teaching and learning); and
- language, literacy, and culture (offered in the Ph.D. in teaching and learning).

Secondary education programs:

- developmental reading (offered in the M.A. in teaching and learning);
- English education (offered in the M.A. and M.A.T. in teaching and learning);
- foreign language and English as a Second Language (ESL) education (offered in the M.A., M.A.T., and Ph.D. in teaching and learning);
- language, literacy, and culture (offered in the Ph.D. in teaching and learning);
- mathematics education (offered in the M.A., M.A.T., and Ph.D. in teaching and learning);
- science education (offered in the M.S., M.A.T., and Ph.D. in teaching and learning); and
- social studies education (offered in the M.A. and Ph.D. in teaching and learning).

The secondary education area also collaborates with the College of Liberal Arts and Sciences to offer an education option for graduate students earning an M.S. in mathematics; an M.A. and Ph.D. in music with a concentration in music education; and a joint B.A./M.A.T. in teaching and learning (science education) for undergraduates majoring in biology, chemistry, environmental sciences, or physics. In addition, the area offers an ESL endorsement for individuals who are enrolled in a Department of Teaching and Learning graduate degree program or who are licensed in-service teachers.

In addition, the Master of Arts in music is administered by the School of Music [p. 670] (College of Liberal Arts and Sciences) in cooperation with the College of Education. The concentration in music education provides students with deeper insights into music, the theory and practice of music education, and the role of music in the school curriculum.

The Doctor of Philosophy in music with concentration in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs. Doctor of Philosophy students whose concentration is music therapy enroll in the Ph.D. program with concentration in music education. Modifications in the curricular requirements are made to reflect the professional knowledge and skills required for positions such as college teaching or advanced clinical or research positions in music therapy. Both programs are administered by the School of Music [p. 670] (College of Liberal Arts and Sciences) in cooperation with the College of Education.

Special education program:

- special education (offered in the M.A. and Ph.D. in teaching and learning).

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Programs

Undergraduate Programs of Study

Majors

- Major in Elementary Education (Bachelor of Arts) [p. 1115]
- Major in Elementary Education (Bachelor of Science) [p. 1118]
- Major in Science Education (Bachelor of Science) [p. 1121]

Graduate Programs of Study

Majors

- Master of Arts in Teaching and Learning [p. 1125]
- Master of Arts in Teaching and Learning [p. 1130]
- Master of Science in Teaching and Learning [p. 1135]
- Doctor of Philosophy in Teaching and Learning [p. 1137]
### TEP/Licensure

Undergraduate students must be admitted to the Teacher Education Program (TEP) before they may take required professional education courses. The application for admission should be submitted to the College of Education Office of Student Services. Deadlines for application are March 1 and October 1 for admission to restricted course work in the following semester. Each program reviews applications and chooses a limited number of students for admission.

In order to be considered for admission, students must complete a minimum of 30 s.h. of earned college credit and must have a University of Iowa cumulative and overall cumulative g.p.a. of at least 3.00. Some subject areas have additional admission criteria. A limited number of applicants are accepted into each Teacher Education Program, so a 3.00 g.p.a. does not ensure admission. Admission decisions are based on grade-point average in the major and other criteria relevant to teaching success.

The application process includes submission of an application form, a writing sample, two letters of recommendation, and an Iowa criminal history check request form. Applicants are required to submit PRAXIS Core test scores in mathematics, reading, and writing. Applicants must have a Praxis Core Test Designated Institution Score Report with minimum scores of 156 in reading, 162 in writing, and 150 in mathematics. Applicants also must provide verification that they have completed a 10-hour pre-admission clinical experience in a K12 classroom setting.

Students should consult a College of Education advisor in their program area or contact the Office of Student Services for more information on admission criteria.

Graduate students who apply to the Graduate College for a teacher licensure program must apply separately for admission to the Teacher Education Program. Deadlines for application to either program are October 1 or March 1 for admission to restricted course work in the following semester. Graduate and postbaccalaureate students may submit scores on the Graduate Record Exam (GRE) General Test instead of PRAXIS scores. Applicants must have a verbal reasoning and quantitative reasoning composite score of at least 300 on the revised GRE (at least 1080 on the old GRE) and an analytical writing score of at least 3.0.

A limited number of applicants are accepted into each Teacher Education Program, so meeting the Graduate College admission requirements does not ensure admission. Admission decisions are based on grade-point average in the undergraduate major and other criteria relevant to teaching. Upon admission to the TEP, students are assigned an education advisor.

### Admission to Student Teaching

Admission to the student teaching semester requires a separate application. Applications must be submitted one year before the student teaching semester. Applicants' credentials and academic and professional progress are reviewed to ensure that a student is qualified for placement in the profession. Verification that a student meets all specific program area requirements is made when the student applies for student teaching.

Consult a College of Education advisor or the Office of Student Services for information about admission and requirements for student teaching in specific licensure programs.

### Financial Support

A limited number of teaching assistantships are available for graduate students. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; some involve teaching sections of undergraduate methods courses and supervising student teachers; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. of credit per semester, but they must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships, consult the College of Education advisor in the appropriate field.

#### Financial Support

Examination of artists’ contributions to STEM and how innovations in STEM have shaped art; readings from art history, historical texts, technological advances, and scientific, engineering, and mathematics journals; how a discovery in one area can have a ripple effect across fields, and how to make diverse connections to content areas in teaching and research.

Weekly performances to develop and define communication skills for professional careers in teaching and business; poetry, prose, monologue, storytelling, duo interpretation, reader’s theatre, and demonstration speeches. Same as COMM:2821.

Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, MUSM:3001, SIED:3001.
EDTL:3003 Teaching as a Profession 3 s.h.
Teaching as a profession in the American education system; topics include examining motivations to become a teacher; historical perspectives; social, legal, and ethical issues; examining career paths in the field of education.

EDTL:3026 Workshop for Secondary School Journalism/Communication Teachers 1-3 s.h.
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as JMC:3210.

EDTL:3059 Introduction to Education and the Regents Alternative Pathway to Iowa Licensure Program 4 s.h.
Foundational knowledge and understanding of educational practices for teacher intern candidates in the Regents Alternative Pathway to Iowa Licensure (RAPIL) program; topics include students as learners, the instructional process, and assessment. Requirements: admission to the RAPIL program.

EDTL:3060 Learning and Instruction for Today’s Classrooms 4 s.h.
First course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3061 Instructional Planning, Strategies, and Assessment 4 s.h.
Fourth course in the Regents Alternative Pathway to Iowa Licensure program. Prerequisites: EDTL:3059 and EDTL:3060. Requirements: admission to the RAPIL program.

EDTL:3062 Learning Communities 3 s.h.
Fifth course in the Regents Alternative Pathway to Iowa Licensure program. Prerequisites: EDTL:3059 and EDTL:3060 and EDTL:3063. Requirements: admission to the RAPIL program.

EDTL:3063 Creating Classrooms Conducive to Teaching and Learning 3 s.h.
Third course in the Regents Alternative Pathway to Iowa Licensure program. Prerequisites: EDTL:3060 and EDTL:3059. Requirements: admission to the RAPIL program.

EDTL:3064 Intern Seminar on Critical Issues in Education 3 s.h.
Sixth course in the Regents Alternative Pathway to Iowa Licensure program. Prerequisites: EDTL:3062 and EDTL:3063 and EDTL:3059 and EDTL:3060 and EDTL:3061. Requirements: admission to the RAPIL program.

EDTL:3065 Methods in Teaching in the Secondary Classroom 3 s.h.
Learn, identify, and implement effective content-specific secondary teaching methods with focus on active student engagement; students develop and enhance instructional planning/pedagogy with special emphasis on content-specific secondary teaching methods, including reading in content area; describe and implement process of pre-, formative, and summative assessment strategies, appropriately aligning them in the instructional design of secondary content lessons; taking specific steps toward improving professional dispositions. Prerequisites: EDTL:3060 and EDTL:3061 and EDTL:3062 and EDTL:3063.

EDTL:3071 Secondary Classroom Management 2-3 s.h.
Characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers. Prerequisites: EDTL:3090. Requirements: admission to TEP.

EDTL:3090 Orientation to Secondary Education 1 s.h.
Overview, including options for student teaching, classroom observation, lesson planning, classroom management, performance indicators, INTASC standards, blood borne pathogens, professional ethics.

EDTL:3091 Secondary Education Program Orientation and Classroom Management 1-3 s.h.
Overview including opportunities, policies and procedures, requirements and expectations, and services associated with the Teacher Education Program; characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers.

EDTL:3095 Teaching Reading in Secondary Content Areas 1 s.h.
Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

EDTL:3103 Assessment for Instructional Planning and Practice 3 s.h.
Fundamentals of using assessment data to make instructional planning decisions that preservice educators need in their advanced course work and classrooms; practical application with curriculum-based procedures; emphasis on classroom-based procedures used to make educational decisions to plan instruction for students, particularly those who are experiencing academic difficulty. Requirements: admission to TEP.

EDTL:3114 Parent-Child Relationships 3 s.h.
Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children’s development, abilities.

EDTL:3120 Methods and Materials: Music for the Classroom Teacher 2 s.h.
Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Requirements: admission to TEP.

EDTL:3122 Creativity, Imagination, Play, and Human Development through the Arts 3 s.h.
Different theories related to human development and visual arts; use of visual arts to make meaning out of experience from the time people began making symbolic marks; ways to integrate visual arts into everyday life; cognitive and physical processes involved in making, understanding, and looking at visual art through studio experiences; theories of cognitive development; role of visual art in education; introduction to art production, art history, art criticism, and aesthetics.

EDTL:3123 Reading and Responding to Children's Literature 3 s.h.
Reading and teaching of children's literature; becoming more knowledgeable readers of children's literature; using children's literature in elementary classroom for aesthetic, personal, social, and critical purposes; wide range of literary texts in different genres and multiple ways readers might experience these texts given particular teaching approaches; ways in which readers interact with texts and with each other to make meaning as they read and discuss literature. Requirements: admission to elementary TER.

EDTL:3127 Methods and Materials: Physical Education, Health, and Wellness 2-3 s.h.
Methods, curriculum. Requirements: admission to TEP.
<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDTL:3130 Adaptive Physical Education for the Elementary Classroom Teacher</td>
<td>2 s.h.</td>
<td>Create and deliver quality, inclusive physical education for students with mental, physical, or emotional disabilities; identify and evaluate the needs of disabled students, plan units and lessons with appropriate modifications for all learners, write an IEP, comply with IDEA in a physical education setting. Prerequisites: EDTL:3127.</td>
</tr>
<tr>
<td>EDTL:3131 Movement Education</td>
<td>2 s.h.</td>
<td>Movement education as a basis for psychomotor and cognitive development in children; summary of basic growth and motor development; in-depth instruction on theory and application of movement education curriculum, and practice on design and execution of movement education lessons.</td>
</tr>
<tr>
<td>EDTL:3139 American Government and Civics for the Elementary Classroom Teacher</td>
<td>3 s.h.</td>
<td>Foundations and processes of American government as related to development of civic literacy in elementary students and their teachers; founding documents, legal precedents, social and economic changes throughout American history; research-based teaching and learning processes from social studies education. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3141 Elementary School Mathematics: Number and Operations</td>
<td>3 s.h.</td>
<td>Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen number and operations content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing number and operations concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3142 Elementary School Mathematics: Geometry and Measurement</td>
<td>3 s.h.</td>
<td>Problem-solving approach to current trends in math education; current math content knowledge assessed at start and end of course; opportunities to strengthen geometry and measurement content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing geometry and measurement concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3143 Methods of Elementary Art and Field Experiences</td>
<td>3-4 s.h.</td>
<td>Application of studio methods to teaching children in Saturday Children's Art Class Program. Same as ARTE:3143.</td>
</tr>
<tr>
<td>EDTL:3146 Elementary School Mathematics: Data/Probability and Algebra</td>
<td>3 s.h.</td>
<td>Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen data analysis/probability and algebra content knowledge; how grade K-5 children think about and learn math; core ideas of learning, teaching, planning, and assessing data/probability and algebra concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3154 Teaching and Learning in the Earth Sciences</td>
<td>3 s.h.</td>
<td>Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of earth sciences; essential concepts in earth sciences; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EDTL:3002 and EDTL:3190. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3158 Teaching and Learning in the Biological Sciences</td>
<td>3 s.h.</td>
<td>Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of biological sciences; essential concepts in biological sciences; instruction to promote learning of essential concepts; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EDTL:3190 and EDTL:3002. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3159 Teaching and Learning in the Chemical/Physical Sciences</td>
<td>3 s.h.</td>
<td>Meaningful and practical learning experiences to foster elementary science learning environments and engage learners in scientific practices and understanding of physical sciences; essential concepts in physical sciences; instruction to promote student learning of essential concepts; learning, teaching, subject matter, curriculum, and assessment. Prerequisites: EPLS:3000 and PSQF:1075 and EDTL:3190 and EDTL:3002. Requirements: admission to TEP.</td>
</tr>
<tr>
<td>EDTL:3160 Literacy Learning and Teaching I</td>
<td>3 s.h.</td>
<td>Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades K-3; for preservice elementary teachers. Prerequisites: EDTL:3190 and EDTL:3002. Requirements: admission to elementary TEP.</td>
</tr>
<tr>
<td>EDTL:3161 Social Studies for the Elementary Classroom Teacher</td>
<td>3 s.h.</td>
<td>Individual growth and change due to environment, economy, and technology; focus on developing teacher's understanding of social and behavioral sciences and how they relate to geography, history, and government in student's growth toward democratic citizenship; emphasis on need to develop intellectually stimulating curricula based on Iowa Core in behavioral science; lesson and curriculum development from research-based best practices in teaching social studies and driven by Iowa Core goals and objectives; technology as a teaching tool and focus of investigation in today's society. Prerequisites: EDTL:3002 and EDTL:3190. Requirements: admission to elementary TEP.</td>
</tr>
<tr>
<td>EDTL:3164 Literacy Learning and Teaching II</td>
<td>3 s.h.</td>
<td>Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades 3-6; for preservice elementary teachers. Prerequisites: EDTL:3190 and EDTL:3002. Requirements: admission to elementary TEP.</td>

</tbody>
</table>
EDTL:3610 Introduction and Practicum: Music 2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; six hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:3620 Methods and Materials: General Music 3 s.h.
Methods for teaching general music in elementary and secondary schools. Prerequisites: EDTL:3002 and EDTL:3610 and EDTL:3090.

EDTL:3635 Instrumental Conducting 3 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: MUS:3625. Same as MUS:3635.

EDTL:3640 Choral Methods 3 s.h.
Organization, implementation of effective choral music programs for all ages. Same as MUS:3640.

EDTL:3645 Choral Conducting and Literature 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under EDTL:3645. Prerequisites: EDTL:3640 and MUS:3625. Same as MUS:3645.

EDTL:3650 Instrumental Methods and Materials 3 s.h.
Elementary and secondary instrumental music methods course required for K-12 music teacher certification. Same as MUS:3650.

EDTL:3905 Teaching Deaf and Hard of Hearing Students 3-4 s.h.
Issues in deaf education; management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in English and/or American Sign Language. Requirements: for 4 s.h. option -- concurrent enrollment in ASL:3002, if not taken as a prerequisite. Same as ASLE:3905.

EDTL:3915 Introduction: Strategist I (Elementary) 1-2 s.h.
Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming; students complete a practicum with an elementary special education teacher. Requirements: admission to TEP.

EDTL:3933 The Culturally Different in Diverse Settings 3 s.h.
Diversity in society; laws--past and present, experiences, incidents, how they affect society.

EDTL:3938 Assessment of Learning Problems 3 s.h.
Effective use of varied formal and informal assessment techniques for students with learning and behavior problems; techniques that inform teaching decisions. Requirements: admission to TEP and Elementary Strategist I program.

EDTL:3963 Inclusive Theatre 3 s.h.
Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations. Same as THTR:3605.

EDTL:3976 Reading Intervention for Students At Risk 3 s.h.
Reading instructional approaches for students at risk for, or with reading disabilities; students enrolled in lab apply content while working with a reading disability student; use of effective teaching principles and research-based practices for designing and delivering instruction in reading (including oral and silent reading), vocabulary development, reading fluency, comprehension. Requirements: admission to TEP.

EDTL:4021 Science for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of students with above average ability and interest in science; theory and practice; development of program outlines for science programs.

EDTL:4022 Math Programming for High Ability Students 1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as PSQF:4122.

EDTL:4024 Differentiating Projects with Technology 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio.

EDTL:4025 Differentiated Instruction for the Gifted 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials.

EDTL:4026 Reading for High-Ability Students 1 s.h.
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students.

EDTL:4028 Differentiating through Advanced Technology 1 s.h.
Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development.

EDTL:4029 Developing Leadership Skills for Gifted and Talented Students, K-12 1 s.h.

EDTL:4032 Middle School Curriculum and Methods 3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Requirements: admission to TEP.

EDTL:4065 Social Studies for High-Ability Learners 1-2 s.h.
Intersection of unique challenges presented by talented students and challenges of designing, implementing, and assessing quality inquiry-based social studies instruction; background in social studies or social studies education not required.
EDTL:4066 Curriculum Concepts in Gifted Education 3 s.h.
Analyzing and refining understanding of curriculum in context of needs of gifted and talented students, rationale for and implementation of curriculum differentiation, and curriculum principles for and applications to gifted and talented; designed for preservice and inservice educators, as well as those interested in curriculum development, design, and delivery.

EDTL:4072 Thinking Skills 1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

EDTL:4073 Programming/Curriculum for High Ability Students 1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiation, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.

EDTL:4074 Differentiation at the Secondary Level 1 s.h.
Importance of differentiation for gifted learners in middle school and high school; differentiation through advanced placement programs as well as broader perspectives on differentiation; essentials for differentiation understood and applied to a lesson that will be implemented with students.

EDTL:4081 ePortfolio Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EPLS:4081, PSQF:4081, RCE:4081.

EDTL:4085 Current Readings and Research in Gifted Education 1 s.h.
Research in the field of gifted education and talent development; applications of research to ensure best practices in providing services and programs for high-ability learners.

EDTL:4087 Seminar: Curriculum and Student Teaching 1-3 s.h.
Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants' student teaching experiences. Requirements: student teaching.

EDTL:4089 Elementary School Special Subject Area Student Teaching arr.
Supervised teaching experience in a single subject in grades 1-6.

EDTL:4091 Observation and Laboratory Practice in the Secondary School arr.
Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools.

EDTL:4092 Observation and Laboratory Practice in the Secondary School arr.
Continuation of EDTL:4091.

EDTL:4096 Topics in Teaching and Learning arr.

EDTL:4137 Introduction to Educating Gifted Students 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as RCE:4137.

EDTL:4153 Gifted and General Education Collaboration 1 s.h.
Need for differentiated learning experiences throughout the school day for gifted students; how classroom teachers and gifted/talented resource teacher collaborate to provide appropriate instructional services to gifted students; collaborative models, planning process, and recommendations for both direct and indirect services. Requirements: access to the Internet.

EDTL:4171 Literacy Learning and Teaching III 3 s.h.
Elaborates on content from EDTL:3160 and EDTL:3164; issues in theoretically sound reading and writing assessment, instruction in K-8 classrooms where local, state, and national goals play increasing roles; reading and writing processes; teaching and learning of reading and writing; focus on role of language and conversation in learning, content area reading instructional strategies, classroom-based reading and writing assessment, special issues in teaching, and learning with textbooks. Prerequisites: EDTL:3190 and EDTL:3002.

EDTL:4188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as RCE:4188.

EDTL:4189 Practicum in Gifted/Talented Education 1 s.h.
Experience developing course materials for classes offered through the Belin-Blank Center for Gifted Education.

Student teaching at the elementary level (K-9). Corequisites: EDTL:4091. Requirements: application to the Office of Teacher Education and Student Services.

EDTL:4191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase arr.

EDTL:4192 Special Area Student Teaching arr.
Supervised teaching and observation in specific areas of elementary curriculum (see MyUI for areas offered).

EDTL:4193 Independent Study arr.
Requirements: senior standing.

EDTL:4199 Program Models in Gifted Education 3 s.h.
Development and refinement of preservice and inservice educators' understanding of academic programs; needs of gifted and talented students, including diverse and often underrepresented groups of students; rationale for and implementation of a comprehensive program model for gifted students. Requirements: Internet access.

Collaborative work to recreate one exhibition from the University of Iowa Museum of Art that took place before the flood of 2008; creation of content that contributes to a virtual museum experience; introduction to digital tools commonly used in design of exhibitions; recreation of historical exhibitions based on documentary photographs in museum and University archives and research on the premise of the exhibition and objects on view; how digital artifacts might be used in different contexts; use of museum and digital environments as labs for lifelong and distance learning.
EDTL:4220 The Avant-Garde at the University of Iowa 3 s.h. In 1968, the intermedia program was established in the School of Art and Art History as one of the first art programs that deliberately brought studio training and a range of other academic and performance disciplines together in order to foster new experimental practices; the UI also is home to the International Dada Archive and Research Center, established in 1979; using resources of the UI library and museum, students examine the ways avant-garde ideas enter into everyday life, and how radical ideas come to shape, transform, and activate new ways of learning today.

EDTL:4314 Introduction and Practicum: Secondary English 3 s.h. Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

EDTL:4315 Learning to Teach Secondary English/Language Arts and Field Experience 3 s.h. Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisites: EDTL:4314. Same as ENGL:4810.

EDTL:4355 Approaches to Teaching Writing 3 s.h. Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative. Same as CNW:4355.

EDTL:4394 Methods: Secondary Reading 2-3 s.h. Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisites: EDTL:4314.

EDTL:4406 Foreign Language Education Practicum I 3 s.h. Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4416.

EDTL:4407 Foreign Language Education Practicum II 3 s.h. Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4417.

EDTL:4410 Teaching K-12 Second Language Learners 3 s.h. Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Requirements: admission to TEP.

EDTL:4416 Learning to Teach Second Languages I 3 s.h. Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisites: EDTL:4406.

EDTL:4417 Learning to Teach Second Languages II 3 s.h. Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisites: EDTL:4410 or EDTL:6483. Corequisites: EDTL:4407.

EDTL:4418 ESL Practicum I 4 s.h. Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers.

EDTL:4465 Methods: Teaching English as a Foreign Language 3 s.h. Explores approaches, methods, and practices in teaching English as a foreign language; history of language teaching approaches as well as cutting-edge innovations; all four skill areas are covered (speaking, listening, reading, writing); ethical issues concerning linguistically diverse learners and the impact of English language policies around the world; students will develop skills in teaching approaches for English Language Learners (ELLs), including lesson and unit planning and materials evaluation and adaptation.

EDTL:4467 Methods for Teaching English to Speakers of Other Languages in K-12 Settings 4 s.h. Exploration of approaches, methods, and practices in teaching English to speakers of other languages in K-12 school settings; communicative and content-based approaches to language learning with practical application of theory and research; issues concerning linguistically diverse learners covered with pedagogical implications; skills in teaching approaches for English language learners; lesson and unit planning, materials evaluation and adaptation, and assessment for placement, diagnosis, exit, and evaluation of English language learners.

EDTL:4468 Instruction of English Language Learners for K-12 Classrooms 3 s.h. Preparation to work with English Learners (ELLs) in K-12 settings; dramatic increase in this population over recent decade; need for teachers to understand sociocultural and linguistic challenges faced by ELLs and their families; proficiency in instructional and differentiation strategies for instructing ELLs; ELL variation and cultural considerations, English language development standards, second language teaching and learning, differentiation for ELLs, effective practice for ELL instruction and assessment; for students in teacher preparation program.

EDTL:4498 Language Structure for Teaching English Language Learners 4 s.h. Exploration of theory, rules, and examples to gain practical understanding of the system of language structure; focus on working with English language learners from a variety of first language backgrounds in educational settings; principles of discourse, phonology, morphology, syntax, pragmatics, and semantics that build a framework for discussion of applications and analysis of student and teacher language; address English language learners’ development in P-12 settings; strategies to evaluate learner language; increase awareness of language challenges for English language learners that can occur in spoken and written educational instruction and materials. Requirements: admission to TEP.

EDTL:4535 Methods: High School Mathematics 3 s.h. Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curricular planning for all students. Prerequisites: EDTL:3534.

EDTL:4640 Introduction to Music Research 2-3 s.h. Preparation for conducting research on music behavior.

EDTL:4751 Science Teaching and Practice with Early Learners 3 s.h. Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.
EDTL:4752 Methods of Teaching Science 3 s.h.
Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisites: EDTL:4751.

EDTL:4753 Instructional Issues in Teaching Science 3 s.h.
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisites: EDTL:4752. Corequisites: EDTL:4779.

Supervised teaching experience in a single subject; secondary school setting.

EDTL:4811 Introduction and Practicum: Secondary Social Studies 3 s.h.
Experience observing and assisting social studies teachers and students in secondary schools; nine hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:4870 Methods: Secondary Social Studies 3 s.h.
Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

EDTL:4876 Advanced Methods for Teaching and Learning in a Culturally Responsive Classroom 3 s.h.
Multiculturalism and equity issues in education that support development of resources and lesson activities to appeal to a diverse student body; asynchronous online course for educators in all disciplines who are pursuing licensure or currently teaching in a K-12 classroom, advanced technological literacy not required. Eight weeks. Requirements: successful completion of a methods course in K-12 licensure program.

EDTL:4900 Foundations of Special Education 3 s.h.
Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems.

EDTL:4921 Transition and Related Issues 3 s.h.
Curriculums, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.

EDTL:4922 Supervised Teaching: Elementary Strategist I 7 s.h.
Student teaching at the elementary level in a program for students with mild to moderate disabilities. Requirements: elementary education major.

EDTL:4934 Parent-Teacher Communication 1-3 s.h.
Realities of working with parents; interpersonal skills; options for parent support services. Same as PSQF:4134.

EDTL:4936 Home/School/Community Partnerships 3 s.h.
Issues related to collaboration among families, educators, community members in implementing school programs. Same as PSQF:4136.

EDTL:4940 Characteristics of Disabilities 3 s.h.
Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.

EDTL:4950 Behavioral and Social Interventions 3 s.h.
Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.

EDTL:4967 Integrated Disability Studies Practicum 1-3 s.h.
Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities; four whole-group classroom sessions and required attendance at one UI REACH course.

EDTL:4969 Diversity, Career Exploration, and Transition II 1-3 s.h.
Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities, and assist them with transitioning into the workplace; three whole-group classroom sessions and required attendance in one of two REACH courses (Internship prep or job search strategies).

EDTL:4982 Instructional Decision Making in Education 3 s.h.
Overview of and practical application with curriculum-based procedures for assessment and evaluation; classroom-based measures to make educational decisions for instruction of students, particularly those experiencing academic difficulty.

EDTL:4983 Academic and Behavioral Strategies for Students with Learning Disabilities and Behavioral Disorders 3 s.h.
Merge theory and practices for assessing, planning interventions, delivering instruction, and monitoring progress for individuals who have learning disabilities and emotional/behavioral disorders.

EDTL:4984 Academic Skills for Students with Special Needs 3 s.h.
Introduction to appropriate methodology for teaching academic skills to students with significant learning difficulties; how to teach students effectively regardless of the label that might be applied to them or the setting to which they might be assigned; effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching academic skills to education students with special needs.

EDTL:4987 Introduction to Assistive Technology 3 s.h.
How assistive technology can be used for attainment of goals in education or work. Same as RCE:4187.

EDTL:4990 Interdisciplinary Issues in Disabilities 1-3 s.h.
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.

EDTL:5080 Workshop: Teacher Training for Advanced Placement Courses 1-2 s.h.
Focus on a particular academic content area.
EDTL:5104 Language Disorders in School-Aged Children 3 s.h.
Emphasis on elementary grades; usually taken in conjunction with EDTL:4192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors. Same as CSD:5104.

EDTL:5535 Current Issues in Mathematics Education 1-3 s.h.
Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs.

EDTL:5600 Graduate Music Education Workshop 1 s.h.
For inservice music teachers; topics vary. Same as MUS:5600.

EDTL:5601 Graduate Music Education Workshop II 1 s.h.
Varied topics; for inservice music teachers. Same as MUS:5601.

EDTL:5640 Foundations of Music Education 3 s.h.
Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

EDTL:5961 Foundation of Applied Behavior Analysis 3 s.h.
Foundation knowledge and basic principles of behavior analysis in philosophical assumptions of behavior analysis, behavioral terminologies, verbal operants, and measurement concepts; first in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst (BCaBA) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Corequisites: EDTL:5964 and EDTL:5965.

EDTL:5964 Behavior Analyst Practicum 1-4 s.h.
Development, implementation, and evaluation of techniques that produce behavior changes in clients; discussion of key issues related to techniques of applied behavior analysis; review of various theoretical, conceptual, historical, legal, and practical aspects of behavior analysis; provides a portion of the supervisory component as required by the Behavior Analyst Certification Board (BACB).

EDTL:5965 Ethics and Professional Conduct of Behavior Analysts II 3 s.h.
Addresses issues related to ethical and professional conduct of behavior analysts when working with clients according to the Behavior Analyst Certification Board (BACB) Professional Disciplinary and Ethical Standards and Guidelines for Responsible Conduct for Behavior Analysts; this is a second course in ethics and professional conduct designed to prepare students who speak Chinese to sit for the Board Certified Behavior Analyst certification exam sponsored by the BACB; students in this course will examine the BACB Guidelines for Responsible Conduct and issues related to (a) interventions, (b) behavior change systems, and (c) implementation, management, and supervision. Prerequisites: EDTL:5961 and EDTL:5963 and EDTL:7953.

EDTL:6104 Literature for Children II 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as ENGL:6104.

EDTL:6104 Literature for Children II 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as ENGL:6104.

EDTL:6104 Literature for Children II 3 s.h.
Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as ENGL:6104.

EDTL:6164 Early Literacy Development and Instruction 2-3 s.h.
Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

EDTL:6165 Reading and Writing Across Intermediate Grades 3 s.h.
Issues in teaching, learning, and assessment of students grades 4-9; fostering positive literate identities; literacy engagement, strategies for reading, writing, and critically responding to texts in a range of genres and formats and across content areas.

EDTL:6167 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.
Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

EDTL:6171 Advanced Reading Clinic Techniques 2-3 s.h.
Instructional procedures for children and early adolescents with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Corequisites: EDTL:6172.

EDTL:6172 Advanced Reading Clinic Practicum 2-3 s.h.
Practice in selecting and using instructional procedures that address the needs and interests of struggling literacy learners, with emphasis on teaching to students' strengths; how to fit clinical teaching techniques into an overall literacy instructional program. Corequisites: EDTL:6171.

EDTL:6267 Seminar: Current Issues in Art Education 3-4 s.h.
Analysis of literature in art education and related disciplines. Same as ARTE:6267.

EDTL:6293 Individual Instruction arr.
EDTL:6315 M.A. Seminar: English Education arr.
Significant developments in English education; primary and collateral readings. Same as ENGL:6315.

EDTL:6393 Master's Thesis arr.

EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as SLA:6503.

EDTL:6402 Second Language Program Management 3 s.h.
Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as EDTL:6504.

EDTL:6403 Language Policy and Planning 3 s.h.
Sociology and politics of national policies involving language, internationally; development of a research-based policy perspective on language issues in the country in which the student intends to teach.

EDTL:6409 Cultural Curriculum 3 s.h.
Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as SLA:6970.

EDTL:6480 Issues in Foreign Language Education 3 s.h.
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as SLA:6500.

EDTL:6483 Second Language Classroom Learning 3 s.h.
Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as ASIA:6483, SLA:6506.

EDTL:6484 Reading in a Second Language 3 s.h.
Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as SLA:6501.

EDTL:6497 Principles of Course Design for Second Language Instruction 3 s.h.
Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as ASIA:6483, SLA:6506.

EDTL:6530 Workshop in School Mathematics 0-3 s.h.
Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience.

EDTL:6531 Technology in School Mathematics 2-3 s.h.
Methods, materials, issues, pedagogy, assessment; use, evaluation of technology for mathematics teaching and learning; implications for organization, development of course content.

EDTL:6534 Foundations of Mathematics Education 2-3 s.h.
History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity; research literature.

EDTL:6536 Teaching of Geometry 2-3 s.h.
Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

EDTL:6539 Teaching of Algebra 2-3 s.h.
Current developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of technologies, implications of current research for the algebra classroom.

EDTL:6563 STEM Through Mathematical Modeling 3 s.h.
Prepares potential STEM teachers or in-service teachers who want to develop integrated STEM learning environments to learn mathematical modeling as an interdisciplinary instructional approach; mathematical modeling practice to learn and teach mathematics, science, engineering, and technology focused on students' understanding of new concepts from an individual knowledge basis; engagement in problem-based learning where individuals develop conjectures, critique arguments, and revise ideas to reach conclusions; students will understand how people learn new concepts and how teachers should provide adequate learning environments for students to learn and understand the core concepts of STEM.

EDTL:6570 Foundation of School Mathematics Curriculum 3 s.h.
Elementary and secondary background developments in school and mathematics curriculum; definitions, historical perspective, reform, theories of knowledge, implementation, evaluation, international perspectives, issues in mathematics curriculum.

EDTL:6600 Individual Projects in Music Education 1-2 s.h.
Projects of special concern to individual music teachers in public schools.

EDTL:6755 Practices of Inquiry in Science Learning Environments 3 s.h.
Contemporary perspectives on inquiry-based science teaching and learning, implications for theory and research; readings, discussions, presentations, and writing to examine and build upon policy-level science education reform discourse, sociological and organizational theory, empirical research in science education.

EDTL:6757 Learning in the Science Classroom 2-3 s.h.
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented.

EDTL:6758 Writing in the Science Classroom 3 s.h.
Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning.

EDTL:6759 Advanced Pedagogy 3 s.h.
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers.
EDTL:6761 STEM Research and Leadership Seminar 3 s.h.
Broad overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on relevant journals related to STEM learning and teaching; students will summarize, critique, and discuss a variety of research perspectives and articles and describe how the information relates to their current teaching; students explore ways to improve their STEM pedagogical and instructional practices and methods for assessing critical student outcomes; students develop awareness of research that provides a foundation for effective STEM teaching and learning and strategies for implementing research supported practices in STEM learning contexts of all types.

EDTL:6762 STEM Experiential Learning 3 s.h.
Overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on problem-based and experiential learning curriculum, instruction, and assessment by engaging in authentic experiences and reflecting on how these influence practice and student learning; facilitates ability to solve real world STEM problems of interest to students and community through engagement with community partners; assists students to acquire and demonstrate 21st-century competencies the STEM workplace identifies as critical; provides authentic, meaningful, and cross-curricular experience in facilitating student engagement in real-world situations.

EDTL:6764 STEM Extracurricular Experience and Capstone 6 s.h.
Engages teachers in STEM experience outside the traditional classroom; provides 90-hour STEM inclusive experience coupled with a capstone project; engagement with STEM community leaders, business partners, or outreach leaders to develop a plan for participation in and investigation of a STEM related experience; may work with a STEM extracurricular activity in a school or university, a STEM related business or industry partner, or a STEM related grant funded project through a university; course completion is accomplished through a capstone sharing of their experience, how the experience has solidified their understanding of STEM, and how the experience will impact their classroom activities.

EDTL:6833 History and Foundations of Social Studies Education 3 s.h.
Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals.

EDTL:6840 Theories and Perspectives in Global Education 3 s.h.
Examination of theories and perspectives within global education that help to understand historical and contemporary social, political, economic, and cultural issues; relationship to international studies, international education, global cultures, human rights, social justice, and other areas; interaction with global educators who conduct research and/or teach in institutes of higher education around the world.

EDTL:6841 Infusing a Global Perspective into the Curriculum 2-3 s.h.
Rationales, conceptualizations, and themes in global perspectives in education, implications for curriculum change; elements of perspective consciousness, cultural universals, cultural diversity, cross-cultural awareness, global systems, global history, global issues; application and evaluation of ideas within fields of study and varied teaching situations.

EDTL:6842 Examining Power, Resistance, and Change Through Global Education 3 s.h.
Examines historical and contemporary movements for equity and social justice led by students and educators around the world; examines national and transnational narratives of resistance to develop a deeper understanding of the intersections of power, place, and resistance in education, past, present, and future; students will read and analyze diverse narrative, autobiographic, and ethnographic accounts of global social actions to more deeply understand the intersections of identity, privilege, power, and how resistance works.

EDTL:6877 Seminar: Social Studies Education arr.
Periodical literature, trends, curricular developments, research in various aspects of social studies education; for master's and doctoral candidates in social studies education.

EDTL:6906 Practicum with Exceptional Persons arr.
Practicum experience with students with disabilities; experiences differ depending upon student's program of study.

EDTL:6909 Seminar: Graduate Supervised Teaching 1 s.h.
For students enrolled in graduate student teaching practicum. Requirements: special education major.

EDTL:6936 Administration of Students with Special Needs 3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as EPLS:6236.

EDTL:6950 Strategist I Student Teaching: Elementary arr.
Student teaching in an elementary mild and moderate special education program.

EDTL:6951 Strategist I Student Teaching: Secondary arr.
Student teaching in a secondary mild and moderate special education program.

EDTL:6953 Strategist II Student Teaching: Elementary arr.
Student teaching in K-8 learning disabilities or behavior disorders.

EDTL:6954 Strategist II Student Teaching: Secondary arr.
Student teaching in secondary learning disabilities or behavior disorders.

EDTL:6955 Social and Behavioral Interventions 3 s.h.
Design, implementation, and evaluation of function-based interventions for students with significant behavioral challenges; functional behavior assessment, multi-component intervention design, and single-subject methodology to test effects of intervention in a K-12 school.

EDTL:6975 Explicit Instruction 3 s.h.
Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

EDTL:7004 Schooling in the United States 3 s.h.
Governance, finance, and policy structures that have influenced teaching and learning in public schools.

EDTL:7008 Seminar: Research and Current Issues arr.
Review of literature, critical analysis of reported research, and study of current issues and problems for a specific curricular area; topics vary.
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture
Historical, recent research and theory in literacy education; topics vary.

EDTL:7033 Seminar on Teacher Education 3 s.h.
History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.

EDTL:7040 Advanced Topics in Teaching and Learning arr.
Topics vary.

EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3 s.h.
Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing.

EDTL:7071 Critical Discourse Analysis in Educational Research 3 s.h.
Critical discourse analysis (CDA) as theory and method; social and power relations, identities, and knowledge through written, visual, and spoken texts in social settings, such as schools, families, communities; theoretical and methodological traditions of CDA in educational research; critical approaches to analyzing spoken, written, and visual texts. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3 s.h.
Advanced course in traditional and contemporary qualitative data analysis methods and varied forms of reporting to understand, critique, and conduct research about literacy learning and teaching. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h.
Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student's choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer's techniques to develop an ethnographic portfolio. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7075 Educational Ethnography 3 s.h.
Study of culture and social organization; how ethnographers become participant-observers of varying degrees in the social setting they study; opportunities to explore ethnographic research methods; focus on ethnography in educational settings; methods used in a variety of contexts including communities, businesses, families, and other social organizations; ethnography committed to social justice; social theory, issues of power and privilege, unequal access to socioeconomic and educational opportunities.

EDTL:7092 Field Service Project arr.
Individual field service project in a specific curricular area; for advanced students.

EDTL:7093 Research Project arr.
Individual research projects in a specific curricular area; for advanced students.

EDTL:7165 Reading Clinic: Supervision arr.
Supervised experience in guiding and improving teacher performance in clinical practicums.

EDTL:7380 Practicum in College Teaching arr.

EDTL:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EPLS:7385, GRAD:7385, PSQF:7385, RCE:7385.

EDTL:7405 Research Methods in Second Language Teaching and Learning 3 s.h.
Overview of common research methods used to study second language (L2) teaching and learning and related fields; variety of readings from current L2 publications, presentations, video testimonials by active L2 researchers, discussions of readings, and activities designed to process and apply concepts; field research methods; designing a rigorous research study on topic of student's choice; speaking and writing with confidence about research methods used in other studies.

EDTL:7406 Proposal Writing for Second Language Research 3 s.h.
Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning.

EDTL:7410 Mixed Methods Research 3 s.h.
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research; extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EPLS:7392.

EDTL:7535 Seminar: Research in Mathematics Education arr.
Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary.

EDTL:7600 Seminar: Current Topics in Music Education 2-3 s.h.
Major areas of professional and research interest.

EDTL:7640 Advanced Research in Music Education 3 s.h.
Design, performance, analysis, and reporting of music research.

EDTL:7707 Research: Science Education arr.
Planning of individual research projects by M.S. and Ph.D. students.

EDTL:7750 Seminar: Science Education 0-2 s.h.
Discussion of completed faculty and doctoral candidates' research, national issues, program features.
EDTL:7751 Advanced Qualitative Data Analysis 3 s.h.
Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7755 Independent Study in Science Education Research 2-3 s.h.

EDTL:7756 Research Apprenticeship in Science Education 3 s.h.
Practical experiences in science education research in a collaborative, team-oriented environment; apprenticeship model of instruction in which students' participation in authentic tasks and their learning are mutually constitutive; engagement in actual research practices to produce an empirically-based product; development of expertise with some aspect of research methodology determined by instructor; for graduate students with interests in research or development based in K-16 contexts.

EDTL:7774 Qualitative Research with Computer-Aided Qualitative Data Analysis Software 3 s.h.
Qualitative data analysis using computer-aided qualitative data analysis software (CAQDAS); emphasis on methodological approaches to data analysis, and practical and experiential aspects of using CAQDAS to conduct these stages of analysis; opportunity to work with ATLAS.ti, NVivo, Dedoose, and the Coding Analysis Toolkit (CAT); capstone product is a research report based upon qualitative analysis; students strongly encouraged to analyze data from their own research.

EDTL:7932 Field Service Project in Special Education Internship arr.
Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education.

EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education 2-3 s.h.
Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills.

EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II 2-3 s.h.
Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisites: EDTL:7943.

EDTL:7945 Current Issues and Trends in Learning Disabilities 3 s.h.
Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

EDTL:7948 Contemporary Research in Behavioral Disorders 3 s.h.
In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.

EDTL:7952 Seminar: Behavioral Assessment and Evaluation 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as PSQF:7352.

EDTL:7953 Seminar: Single Subject Design Research 3 s.h.
Reviews of single subject research, development of student proposals; focus on special education, applied research.

Science Education Courses

SIED:3001 Introduction to Museum Studies 3 s.h.
Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, EDTL:3001, MUSM:3001.

SIED:4102 Societal and Educational Applications of Earth Science and Environmental athletics. Major ideas and principles of earth and environmental sciences; emphasis on common applications in today’s world.

SIED:4103 Societal and Educational Applications of Biological Sciences arr.
Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.

SIED:4105 Societal and Educational Applications of Physical Sciences arr.
Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.

SIED:4106 Societal and Educational Applications of Chemical Concepts arr.
Principles of chemistry as applied in industry, communication, daily living.

SIED:4115 Directed Study arr.

SIED:4135 The Nature of Science 3-4 s.h.
Ideas on understanding and ways of thinking that are essential in a world shaped by science, technology, engineering, and mathematics; focus on increasing science literacy by examining the nature of science; comparison of characteristics specific to individual science disciplines; identification of great episodes and debates in history of science and habits that are essential for science literacy; scope and sequence of content and process skills for K-12 curriculum, instruction, and assessment.
Elementary Education, B.A.

Requirements

The College of Education offers the undergraduate major in elementary education for students earning a Bachelor of Arts degree from the College of Liberal Arts and Sciences.

The Bachelor of Arts with a major in elementary education requires a minimum of 120 s.h., including at least 77 s.h. of credit for the major. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program [p. 437]. They also must complete all requirements for the elementary education major and the Teacher Education Program (TEP), including student teaching.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis tests that are specific to a student's program. The tests are required before recommendation for licensure or certification to any state.

The B.A. with a major in elementary education requires the following work.

Foundation Courses

Students may complete the foundation courses before being admitted to the major in elementary education, but the courses are not prerequisite to admission to the major.

Endorsements

Students have the option of completing an endorsement in one of the following areas: art, English language arts, English as a Second Language (ESL), hearing impaired, mathematics, middle school, music, physical education, reading, science, social sciences (history, social studies), special education (Instructional Strategist I: Mild/Moderate), and speech communication/theatre. Courses in the endorsement area may be taken pass/nonpass if they are offered with the pass/nonpass option. Requirement lists for each endorsement area are available from the Department of Teaching and Learning.

The University of Iowa also offers an added endorsement in talented and gifted education.

Transfer Students

Before they student teach, transfer students must complete the following courses at the University of Iowa.

All of these:
A practicum
Two of these:
- EDTL:3123 Reading and Responding to Children's Literature
- EDTL:3160 Literacy Learning and Teaching I
- EDTL:3161 Social Studies for the Elementary Classroom Teacher
- EDTL:3163 Methods: Elementary School Mathematics
- EDTL:3164 Literacy Learning and Teaching II

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

**TEP: Secondary Education**

The College of Education offers the Teacher Education Program in secondary education for undergraduate students in the College of Liberal Arts and Sciences. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program (p. 437) and the requirements for their majors (see College of Liberal Arts and Sciences [p. 17] in the Catalog). They also must complete all requirements of the College of Education's Teacher Education Program.

Licensure/certification requires a major of at least 30 s.h. of course work in one of the secondary school subject areas listed below. Licensure/certification course requirements for each major are available from the Department of Teaching and Learning. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis tests that are specific to a student's program. The tests are required before recommendation for licensure or certification to any state.

The College of Education offers secondary school teacher preparation programs in the following areas.

**Art**
- *Coaching
- English
- *English as a second language
- *Hearing impaired
- *Journalism
- Mathematics
- *Middle school
- Music
- *Reading

Science, including biology, chemistry, physics, earth science, and 9-12 all science

Social science, including anthropology, economics, geography, history, political science, psychology, and sociology

*All social sciences
*Talented and gifted

World languages—Chinese, French, German, Italian, Japanese, Latin, Spanish

*Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-8. This K-8 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an advisor, contact the Department of Teaching and Learning.

**Requirements**

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements in addition to the requirements of their major. All course work must be completed before student teaching.

One introduction and practicum course in the major field 2-3

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area); Adams County, Colorado (Denver area); Rialto, California; and Clark County, Nevada.
In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

**Transfer Students**

Transfer students must complete the following work before they student teach.

Appropriate methods courses

A practicum at the University of Iowa

All course work in the major

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

**Career Advancement**

The B.A. with a major in elementary education program prepares students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Elementary Education, B.S.

Requirements

The College of Education offers the undergraduate major in elementary education for students earning a Bachelor of Science degree from the College of Liberal Arts and Sciences.

The Bachelor of Science with a major in elementary education requires a minimum of 120 s.h., including at least 77 s.h. of credit for the major. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program [p. 437]. They also must complete all requirements for the elementary education major and the Teacher Education Program (TEP), including student teaching.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis tests that are specific to a student's program. The tests are required before recommendation for licensure or certification to any state.

The B.S. with a major in elementary education requires the following work.

Foundation Courses

Students may complete the foundation courses before being admitted to the major in elementary education, but the courses are not prerequisite to admission to the major.

Endorsements

Students have the option of completing an endorsement in one of the following areas: art, English language arts, English as a Second Language (ESL), hearing impaired, mathematics, middle school, music, physical education, reading, science, social sciences (history, social studies), special education (Instructional Strategist I: Mild/Moderate), and speech communication/theatre. Courses in the endorsement area may be taken pass/nonpass if they are offered with the pass/nonpass option. Requirement lists for each endorsement area are available from the Department of Teaching and Learning.

The University of Iowa also offers an added endorsement in talented and gifted education.

Transfer Students

Before they student teach, transfer students must complete the following courses at the University of Iowa.

All of these:
EDTL:3002 Technology in the Classroom 2
EDTL:3190 Orientation to Elementary Education 1-2

A practicum
Two of these: 6
EDTL:3123 Reading and Responding to Children's Literature 3
EDTL:3160 Literacy Learning and Teaching I 3
EDTL:3161 Social Studies for the Elementary Classroom Teacher 3
EDTL:3163 Methods: Elementary School Mathematics 3
EDTL:3164 Literacy Learning and Teaching II 3

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

**TEP: Secondary Education**

The College of Education offers the Teacher Education Program in secondary education for undergraduate students in the College of Liberal Arts and Sciences. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the General Education Program (p. 437) and the requirements for their majors (see College of Liberal Arts and Sciences [p. 17] in the Catalog). They also must complete all requirements of the College of Education's Teacher Education Program.

Licensure/certification requires a major of at least 30 s.h. of course work in one of the secondary school subject areas listed below. Licensure/certification course requirements for each major are available from the Department of Teaching and Learning. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on two tests: a test that measures pedagogy and a test that measures knowledge of at least one content area. Current requirements are for Praxis tests that are specific to a student's program. The tests are required before recommendation for licensure or certification to any state.

The College of Education offers secondary school teacher preparation programs in the following areas.

Art
*Coaching
*English
*English as a second language
*Hearing impaired
*Journalism
*Mathematics
*Middle school
*Music
*Reading

Science, including biology, chemistry, physics, earth science, and 9-12 all science

Social science, including anthropology, economics, geography, history, political science, psychology, and sociology
*All social sciences
*Talented and gifted World languages—Chinese, French, German, Italian, Japanese, Latin, Spanish
*Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-8. This K-8 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an advisor, contact the Department of Teaching and Learning.

**Requirements**

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements in addition to the requirements of their major. All course work must be completed before student teaching.

One introduction and practicum course in the major field 2-3

<table>

Appropriate methods courses
A practicum at the University of Iowa
All course work in the major

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

**Career Advancement**

The B.S. with a major in elementary education program prepares students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Science Education, B.S.

Science education provides preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence.

Program planning in science education requires the cooperation and involvement of a variety of University departments and colleges. Most of the program's requirements are drawn from courses offered by these varied academic units.

Research

Each faculty member in science education is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science education.

Science education faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.

International students enrich the opportunities for graduate studies in science education. New international collaborative efforts are under way each year.

Requirements

The major in science education is interdisciplinary. It is intended for students interested in education; it is not intended to prepare students for advanced study in one area of science. When graduates of the science education program elect to pursue graduate study in a specific area of science, they often must complete additional course work in that discipline after they are admitted to the Graduate College.

The Bachelor of Science with a major in science education requires a minimum of 120 s.h., including at least 48-50 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.70 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program (p. 437); the B.S. degree is awarded by the College of Liberal Arts and Sciences.

The science education curriculum includes courses offered by science departments in the College of Liberal Arts and Sciences, science applications courses, and courses in the history, philosophy, and sociology of science. Students who complete the major gain:

- knowledge in two or more areas of science;
- a specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones);
- a view of science from a historical/philosophical/cultural perspective; and
- experience with the application of scientific knowledge.

The major offers five emphasis areas: all-science, biology, chemistry, earth science, and physics.

The all-science emphasis area is open only to students who will earn teacher licensure and would like equal preparation in biology, chemistry, earth science, and physics. Students who choose the all-science emphasis area do not choose a secondary emphasis area. They must complete all requirements for teacher licensure in order to graduate in the all-science emphasis area.

Students who do not choose the all-science emphasis area may elect whether or not to earn teacher licensure. They choose a primary and a secondary emphasis area from biology, chemistry, earth science, and physics, acquiring depth in the primary emphasis area equivalent to six semesters of sequential study and preparation in the secondary area equivalent to four semesters of sequential study.

All science education students must complete the requirements for their emphasis area(s) plus the broad field science block. Those who wish to earn teacher licensure also must complete the College of Education's Teacher Education Program (TEP), including the 47 s.h. professional education sequence; see "B.S. with Teacher Licensure" below.

Special Rules

The Science Education Program may involve many faculty advisors and more than one college or department. Consequently, the following special rules apply to science education students.

At least 10 s.h. of graded credit in science must be earned at the University of Iowa.

No credit from the CLEP Natural Science General Examination may be applied toward the major in science education.

Courses for the major may not be taken pass/nonpass. Grades from all courses applied toward the science education major are used in computing a student's grade-point average in the major, both at the University of Iowa and overall.

Since mathematics forms an integral part of so many aspects of modern science, all-science emphasis area education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

The B.S. with a major in science education requires the following course work.

All-Science Emphasis Area

Students who choose the all-science emphasis area do not choose a secondary emphasis area. They complete a minimum of 48 s.h. for the major, including at least 36 s.h. in the following course work (at least 9 s.h. in each of the four science disciplines—biology, chemistry, earth science, and physics), and 12 s.h. in the broad field science block. They also must complete all requirements for teacher licensure (see "B.S. with Teacher Licensure" below).

Biology

At least 9 s.h. from these:

BIOL:1411 Foundations of Biology
### Biology Emphasis Area

Students who choose biology as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23-25 s.h. in the following biology course work plus at least 15 s.h. in a secondary emphasis area (chemistry, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor’s permission, students may include a science applications course in their secondary emphasis area.

Students must complete 12 s.h. from the following.

This course:

SIED:4135 The Nature of Science 4

Two of these:

SIED:4102 Societal and Educational Applications of Earth Science and Environmental 4
SIED:4103 Societal and Educational Applications of Biological Sciences 4
SIED:4105 Societal and Educational Applications of Physical Sciences 4
SIED:4106 Societal and Educational Applications of Chemical Concepts 4

**Earth Science Emphasis Area**

Students who choose earth science as their primary emphasis area complete a minimum of 48 s.h. for the major, including at least 21 s.h. in the following earth science course work plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Both of these:

EES:1040 Evolution and the History of Life 4
EES:1080 Introduction to Environmental Science 4

One of these:

EES:1030 Introduction to Earth Science 3-4
EES:1050 Introduction to Geology 4

One of these:

EES:2831 Geologic Field Methods 3
EES:3000 Geologic Training Assignment 1-3
EES:3300 Sedimentary Geology 4
EES:3840 Structural Geology 4

One of these:

EES:3020 Earth Surface Processes 3
EES:3210 Principles of Paleontology 3
EES:3360 Soil Genesis and Geomorphology 3

One of these:

EES:1290 Energy and the Environment 3
GEOG:1050 Foundations of GIS 3
GEOG:4010 Field Methods in Physical Geography 3

One of these:

EES:3070 Marine Ecosystems and Conservation 3
EES:3080 Introduction to Oceanography 2

And both of these:

Course work in a secondary emphasis area (biology, chemistry, or physics) 15
Course work listed under "Broad Field Science Block" below 12

**Physics Emphasis Area**

Students who choose physics as their primary emphasis area complete a minimum of 47 s.h. for the major, including at least 20 s.h. in the following physics course work plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or earth science) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

One of these sequences:

PHYS:1511-1512 College Physics I-II (if physics is a secondary emphasis area) 8
PHYS:1611-1612 Introductory Physics I-II 8
PHYS:1701-1702 Physics I-II 8

One of these:

PHYS:2703 Physics III 4
PHYS:3710 Intermediate Mechanics 3

One of these:

ASTR:1070 Stars, Galaxies, and the Universe (if physics is a secondary emphasis area) 3-4
Science Education, B.S.

ASTR:1080 Exploration of the Solar System 3-4
(if physics is a secondary emphasis area)

ASTR:1771 General Astronomy I 4

One of these:
PHYS:3811 Electricity and Magnetism I 3
PHYS:3850 Electronics 4

One of these:
PHYS:1200 Physics of Everyday Experience 3
(if physics is a secondary emphasis area)

PHYS:1410 Physics of Sound 3-4

And both of these:
Course work in a secondary emphasis area 15
(biology, chemistry, or earth science)

Course work listed under “Broad Field Science Block” below

**Broad Field Science Block**

Students must complete 12 s.h. from the following.

This course:
SIED:4135 The Nature of Science 4

Two of these:
SIED:4102 Societal and Educational Applications of Earth Science and Environmental 4
SIED:4103 Societal and Educational Applications of Biological Sciences 4
SIED:4105 Societal and Educational Applications of Physical Sciences 4
SIED:4106 Societal and Educational Applications of Chemical Concepts 4

**B.S. with Teacher Licensure**

In order to earn licensure to teach in elementary and/or secondary schools, students must satisfy all requirements for the science education major and for graduation and must complete the College of Education’s Teacher Education Program (TEP).

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

In order to be considered for admission to the TEP, students must have completed a minimum of 30 s.h. of course work with a cumulative g.p.a. of at least 3.00. Admission decisions are based on grade-point averages in science courses and other criteria relevant to teaching. A limited number of applicants are accepted to the TEP, so having the required grade-point average does not ensure admission. Contact the Office of Student Services for information about applying to the TEP.

The TEP requires the following professional education courses, which total a minimum of 47 s.h.

All of these:
EDTL:3002 Technology in the Classroom 2-3
EDTL:3071 Secondary Classroom Management 2
EDTL:3090 Orientation to Secondary Education
EDTL:3095 Teaching Reading in Secondary Content Areas
EDTL:4900 Foundations of Special Education
EPLS:3000 Foundations of Education
EPLS:4180 Human Relations for the Classroom Teacher
PSQF:1075 Educational Psychology and Measurement

These taken in sequence:
EDTL:4751 Science Teaching and Practice with Early Learners
EDTL:4752 Methods of Teaching Science
EDTL:4753 Instructional Issues in Teaching Science
EDTL:4779 Secondary School Science Practicum (taken with EDTL:4753)

These three taken concurrently:
EDTL:4087 Seminar: Curriculum and Student Teaching (section 91)
EDTL:4091 Observation and Laboratory Practice in the Secondary School
EDTL:4092 Observation and Laboratory Practice in the Secondary School

And:
One college-level math course, excluding MATH:0100, MATH:0300, and MATH:1005.

**Honors in the Major**

The science education program offers outstanding students the opportunity to graduate with honors in the major. Honors students in science education must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and fulfill other requirements; contact the Science Education program for more information about graduating with honors in the science education major.

In addition to honors in their majors, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.

**Academic Plans**

**Four-Year Graduation Plan**

The Four-Year Graduation Plan is not available to students majoring in science education.

**Career Advancement**

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Teaching and Learning, M.A.

Art Education

The Master of Arts in teaching and learning (art education) requires a minimum of 38 s.h. of graduate credit. The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

Requirements

The M.A. plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in EDTL:6267 Seminar: Current Issues in Art Education; and a total of 12 s.h. in additional course work, specified after a student begins the program.

M.A. students also must complete a studio thesis or a written thesis.

Admission

Applicants to the M.A. in teaching and learning (art education) must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum course work in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight digital reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper. Deficiencies in undergraduate art or courses recommended for teacher licensure/certification are evaluated following admission so that students can make up required course work concurrent with work for the degree.

Developmental Reading

The Master of Arts in teaching and learning (developmental reading) requires a minimum of 33 s.h. of graduate credit with thesis and a minimum of 35 s.h. of graduate credit without thesis. The program prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required course work develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies a student for certification as a reading specialist.

The M.A. in teaching and learning (developmental reading) requires the following work.

Required Courses

All of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDTL:4171</td>
<td>Literacy Learning and Teaching</td>
<td>3</td>
</tr>
</tbody>

Thesis

A thesis is required for the thesis option.

EDTL:6393  Master's Thesis  2

Electives

Students, in consultation with their advisors, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

Comprehensive Examination

The comprehensive examination consists of two three-hour exams. Each three-hour exam is based on an aspect of reading or literacy. With agreement of a student's advisor and committee, a comprehensive project may be substituted for the written examination in one or both areas.

Admission

Applicants to the M.A. in teaching and learning (developmental reading) must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and
show evidence of completing two years of successful teaching experience.

**English Education**

The Master of Arts in teaching and learning (English education) requires a minimum of 30 s.h. of graduate credit. The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.

M.A. students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is EDTL:6315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s), or they may choose to write a thesis.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

**Admission**

Applicants to the M.A. in teaching and learning (English education) must meet the admission requirements of the Graduate College. They should have taken extensive course work in English and should have taught English for at least two years. Application should be made to the College of Education.

**Foreign Language and ESL Education**

The Master of Arts in teaching and learning (foreign language and English as a Second Language (ESL) education) requires a minimum of 33-36 s.h. of graduate credit. The program is designed for students who would like to pursue a foreign language and ESL education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in foreign language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

Students take at least 15 s.h. in second language education course work, 9 s.h. in graduate language or linguistics, and 9 s.h. in the cognate area. They must earn 9 s.h. in courses numbered 5000 or above.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually.

The M.A. in teaching and learning (foreign language and ESL education) requires the following work, including these suggested courses.

<table>

</tr>
</tbody>
</table>

**Target Language**

In consultation with their advisor, students select at least 9 s.h. of graduate language courses in their area of interest.

**Cognate Area**

Students complete at least 9 s.h. of course work chosen in consultation with their advisor.

**Master's Examination**

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from foreign language education. The candidate and the advisor discuss and formalize the exam's content and process eight months before the exam.

**Admission**

Applicants to the M.A. in teaching and learning (foreign language and ESL education) must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and must have earned at least 20 s.h. in undergraduate, upper-division foreign language course work. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate course work and some experience living, working, and/or studying in the culture of the applicant's chosen target language are preferred.

International applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

**Mathematics Education**

The Master of Arts in teaching and learning (mathematics education) requires a minimum of 32 s.h. of graduate credit. The program provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

**Required Courses**

M.A. students take a minimum of 9 s.h. of course work in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education, which must include EDTL:5535 Current Issues in Mathematics Education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from their cognate area.
Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

**Comprehensive Examination**

Students take three two-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

**Admission**

Applicants to the M.A. in teaching and learning (mathematics education) must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics. A combined score of 300 on the verbal and quantitative sections of the Graduate Record Exam (GRE) General Test is preferred.

**Social Studies Education**

The Master of Arts in teaching and learning (social studies education) requires 38 s.h. of graduate credit. The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Students choose one of two programs. Program A provides interdisciplinary study in education, history, social science, or related areas for classroom teachers or others interested in advancing their competence in instruction and their subject area. Program B is for students who have a bachelor's degree in history or a social science and who wish to obtain a teaching license/certificate while earning the M.A. degree. Program B students must apply to both the Graduate College and the College of Education.

**Program A Requirements**

Students enrolled in the Master of Arts Program A create a course of study in consultation with their advisor that aligns with their interests related to social studies education and/or their profession. Students distribute the program's required 38 s.h. among three concentration fields in history or a social science (or related area), social studies and global education, and general education. At least 9 s.h. must be earned in history or a social science and in general education courses numbered 3000 or above. Students also must earn at least 12 s.h. in courses numbered 6000 or above offered through the social studies education program.

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

**Program A Comprehensive Examination**

A Master of Arts Program A candidate selects one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with the candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

**Program B Requirements**

Program B students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education’s Teacher Education Program for secondary education in social studies may not apply credit they have earned as undergraduates in required licensure courses to the 38 s.h. required for the M.A., even though the credit counts toward state teaching licensure.

Program B students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the M.A. program and before student teaching. Required teaching licensure course work completed at other colleges or universities is reviewed on a case-by-case basis.

Program B students who were accepted to the undergraduate Teacher Education Program before they received a baccalaureate must complete a college-level math course. For licensure, students admitted to the M.A. in teaching and learning (social studies education) must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level course work. Required professional education course work not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate course work may apply.

Students must complete all of the following professional education courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement for Program B is reduced accordingly, but it never falls below 38 s.h. All students must take the course work required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

**Professional Education Courses**

EPLS:3000  Foundations of Education  3
EPLS:4180  Human Relations for the Classroom Teacher  3
PSQF:6200  Educational Psychology  3

Students must earn at least 12 s.h. in courses numbered 6000 or above through the social studies education program and a minimum of 9 s.h. of graduate course work in history or a social science area. Students should take at least one course taught by the instructor who will serve on the examining committee in the history or social science area.

Program B Comprehensive Examination

A Master of Arts Program B candidate selects one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with the candidate’s advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as “certification only” candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning with subprograms in English education, foreign language education, or science education, or an M.A. in teaching and learning with a subprogram in social studies (program B).

Admission

Applicants to the M.A. in teaching and learning (social studies education) must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

After declaring a social studies education major, M.A. students must maintain a g.p.a. of at least 3.00.

Special Education

Special education programs are offered in K-8 and 5-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.

The Master of Arts in teaching and learning (special education) requires a minimum of 32 s.h. of graduate credit. The program prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission in order to obtain an additional area of special education licensure/certification (i.e., professional improvement). Students typically receive licensure/certification in at least one area upon completing the program. Contact the Department of Teaching and Learning for specific program requirements.

Admission

Applicants to the M.A. in teaching and learning (special education) must meet the admission requirements of the Graduate College. They must have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

Final admission decisions are made by the special education graduate admissions committee.

Teaching, Leadership, and Cultural Competency

The Master of Arts in teaching and learning (teaching, leadership, and cultural competency) requires a minimum of 33 s.h. of graduate credit. The program is offered completely online. The program addresses identified needs within the profession: English Language Learner (ELL) instruction, cultural competency in the classroom, evidenced-based frameworks for technology integration, educational leadership, and teacher leader/instructional coaching best practices.

Students take a 24 s.h. core, including courses in instructional leadership, cultural competency and diversity, assessment, technology, and curriculum; and 9-12 s.h. of specialized course work. The course work that students take count toward Iowa teacher licensure renewal units.

The M.A. program in teaching, leadership, and cultural competency requires the following work.

A course on advanced instructional technology for K-12 schools (consult advisor) 3
A course on cultural competency/diversity and the K-12 experience (consult advisor) 3
Specialization courses (consult advisor) 9-12

Admission

Applicants to the M.A. in teaching and learning (teaching, leadership, and cultural competency) must meet the admission requirements of the Graduate College. They must have a bachelor's degree, a g.p.a. of at least 3.00 in undergraduate course work, and a valid United States teaching license in K-12 education. Applicants should supply two letters of recommendation from individuals familiar with their work in schools or in an educational program. International applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).
Teaching and Learning, M.A.T.

English Education

The Master of Arts in Teaching in teaching and learning (English education) requires a minimum of 45 s.h. of graduate credit. The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

The M.A.T. in teaching and learning (English education) requires the following work.

English

All of these:
EDTL:6315/ENGL:6315 M.A. Seminar: English Education arr.
CNW:4355 Approaches to Teaching Writing 3
ENGL:3190 Language and Learning 2-3
ENGL:3191 Reading and Teaching Adolescent Literature 3

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program:
A course in Shakespeare
Three courses in American literature
A course in British literature
A course in nonfiction or creative writing, in addition to CNW:4355

Education

All of these:
EDTL:3002 Technology in the Classroom (must be taken during student's first semester in the college) 2
EDTL:3090 Orientation to Secondary Education (must be taken during student's first semester in the college) 1
EDTL:4087 Seminar: Curriculum and Student Teaching 1-3
EDTL:4091 Observation and Laboratory Practice in the Secondary School arr.
EDTL:4092 Observation and Laboratory Practice in the Secondary School arr.
EDTL:4314 Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394) 3
EDTL:4315 Learning to Teach Secondary English/Language Arts and Field Experience 3
EDTL:4394 Methods: Secondary Reading 2-3
EDTL:4900 Foundations of Special Education 3
EPLS:3000 Foundations of Education 3
EPLS:4180 Human Relations for the Classroom Teacher 3
PSQF:6200 Educational Psychology 3

Comprehensive Examination

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in English education.

Admission

Applicants to the M.A.T. in teaching and learning (English education) must meet the admission requirements of the Graduate College. They must have been granted a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must take the Graduate Record Exam and meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of course work in professional education courses before admission.

Foreign Language and ESL Education

The Master of Arts in Teaching in teaching and learning (foreign language and English as a Second Language (ESL) education) requires a minimum of 67 s.h. of graduate credit. The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, and Spanish.

M.A.T. students must complete at least 18 s.h. in graduate course work in the collaborating foreign language department in addition to professional education courses.

The M.A.T. in teaching and learning (foreign language and ESL education) requires the following work.

Professional Education

All of these:
EDTL:3002 Technology in the Classroom (must be taken during student's first semester in the college) 2
EDTL:3090 Orientation to Secondary Education (must be taken during student's first semester in the college) 1
EDTL:3095 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college) 1
Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements.

ESL Endorsement

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a Teacher Education Program (TEP) or licensed in-service teachers.

Admission

Applicants to the ESL endorsement program must submit a one-page essay explaining why they wish to teach ESL and a transcript of all university-level course work, along with the English as a Second Language Added Endorsement Program K-12 application. Applicants whose first language is not English must provide evidence of a minimum score of 26 (Internet-based) on the speaking section of the Test of English as a Foreign Language (TOEFL) and have completed one of the following.

Four semesters of commonly-taught languages such as French, German, Hebrew, Italian, Portuguese, Russian, or Spanish; or a proficiency level of Intermediate Low on the ACTFL Guidelines

Three semesters of less commonly-taught languages such as Arabic, Chinese, or Japanese; or a proficiency level of Novice High on the ACTFL Guidelines

LING:3001 Introduction to Linguistics (with a grade of B or higher)

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 1 and March 1.

Mathematics Education

The Master of Arts in Teaching in teaching and learning (mathematics education) requires a minimum of 49 s.h. of graduate credit. The program is designed primarily for students who decide they would like to become teachers and have already completed a B.S. or B.A. in mathematics. It features advanced work in mathematics along with the courses required for certification. It is a means by which students can obtain both a Master's degree and certification. This degree program assumes a student has completed a baccalaureate degree in mathematics equivalent to one that would be completed at the University of Iowa, but has no previous course work in education. More course work may be advised if there are mathematics courses a student has not taken as part of the undergraduate mathematics baccalaureate degree program to render the student's degree equivalent to one from the University of Iowa.

The M.A.T. in teaching and learning (mathematics education) requires the following work.

Education

The first three courses should be taken during the first semester of registration:

EDTL:3002 Technology in the Classroom 2-3
EDTL:3090 Orientation to Secondary Education 1
requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate g.p.a. of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

Joint B.A./M.A.T. Mathematics Education

The College of Liberal Arts and Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in Mathematics plus a Master of Arts in Teaching degree in education in as little as five years.

The Combined B.A./M.A.T. (4+1) program provides a seamless process whereby students can progress from undergraduate to graduate status. The usual period of study for both the Bachelor of Arts and the Master of Arts in Teaching degree is six years. Through careful planning, many of the courses required for the M.A.T. program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements. Visit B.A./M.A.T. (4+1) Mathematics on the College of Education website.

Admission

Students are eligible to apply to the 4+1 program during their sophomore or junior year if they have a cumulative g.p.a. of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP); two recommendations from University of Iowa faculty; a career plan describing how this program will enhance the student’s scholarly and or career goals; and an unofficial transcript of student’s prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum g.p.a. must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form; a letter of application/statement of purpose; one additional letter of recommendation from a faculty member in the mathematics major; Graduate Record Exam (GRE) General Test scores; and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students who submit completed applications will be notified at the end of the eighth semester or in the program’s fourth year.

Science Education

The Master of Arts in Teaching in teaching and learning (science education) requires a minimum of 48 s.h. of graduate credit. The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master’s degree and teaching certification at the same time.
The program assumes students have completed considerable course work in science (at least 56 s.h.) as undergraduates, but no previous course work in education. Students' science course work should be equivalent to that required by the University of Iowa Science Education program.

The M.A.T. in teaching and learning (science education) requires the following work.

**Professional Education Foundation Sequence**

<table>
<thead>
<tr>
<th>All of these:</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDTL:3002 Technology in the Classroom</td>
</tr>
<tr>
<td>(must be taken during student's first semester in the college)</td>
</tr>
<tr>
<td>EDTL:3071 Secondary Classroom Management</td>
</tr>
<tr>
<td>EDTL:3090 Orientation to Secondary Education (must be taken during student's first semester in the college)</td>
</tr>
<tr>
<td>EDTL:3095 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)</td>
</tr>
<tr>

</tr>
<tr>
<td>EPLS:4180 Human Relations for the Classroom Teacher</td>
</tr>
<tr>
<td>PSQF:6200 Educational Psychology</td>
</tr>
</tbody>
</table>

Science education courses taken in the following sequence:

| EDTL:4751 Science Teaching and Practice with Early Learners | 3 |
| EDTL:4752 Methods of Teaching Science | 3 |
| These two taken concurrently: |
| EDTL:4753 Instructional Issues in Teaching Science | 3 |
| EDTL:4779 Secondary School Science Practicum | 2 |
| These three taken concurrently: |
| EDTL:4087 Seminar: Curriculum and Student Teaching | 3 |
| EDTL:4091 Observation and Laboratory Practice in the Secondary School | 6 |
| EDTL:4092 Observation and Laboratory Practice in the Secondary School | 6 |

**Electives**

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science course work listed above must take additional science course work to meet the minimum requirement of 48 s.h.

**Comprehensive Examination**

Students complete comprehensive examinations before their student teaching semester. Two comprehensive exams, one in science education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas. The science education exam, under the guidance and supervision of the examining committee, consists of two parts, written and oral. Detailed requirements for the science education comprehensive examination are available from the Department of Teaching and Learning office.

**TEP: Secondary Education**

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in science education.

**Admission**

Applicants to the M.A.T. in teaching and learning (science education) must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all Teacher Education Program (TEP) application requirements.

**Joint B.A./M.A.T.: Science Education**

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree with a major in biology, chemistry, environmental sciences, or physics may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. The joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees.

B.A. students are admitted to the joint program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the joint program. Students take 30 s.h. of course work during the fifth year and must complete all remaining requirements for both degrees that year.

**Science Specialization (Broad Field Science Block)**

The following courses are required for the undergraduate degree in science education at the University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

<table>

Education courses required for the joint program are listed under "Joint B.A./M.A.T.: Science Education" above. Requirements for the B.A. degree are listed under Biology [p. 152], Chemistry [p. 173], Environmental Sciences [p. 382], and Physics and Astronomy [p. 712] (College of Liberal Arts and Sciences) in the Catalog.
Teaching and Learning, M.S.

Science Education

The Master of Science in teaching and learning (science education) requires a minimum of 38 s.h. of graduate credit. The program is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field.

M.S. students complete course work in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The M.S. program in teaching and learning (science education) requires the following work.

Required Courses

- All of these:
  - EDTL:6755 Practices of Inquiry in Science Learning Environments (no substitute for this course) 3
  - EDTL:6757 Learning in the Science Classroom (no substitute for this course) 3
  - EDTL:6759 Advanced Pedagogy (no substitute for this course) 3
  - EDTL:7755 Independent Study in Science Education Research (taken twice for 3 s.h. each) 6

- Two science content courses chosen in consultation with advisor 6

- A minimum of 12 s.h. chosen from these:
  - EDTL:6758 Writing in the Science Classroom 3
  - PSQF:4143 Introduction to Statistical Methods 3
  - PSQF:6200 Educational Psychology 3
  - PSQF:6220 Quantitative Educational Research Methodologies 3
  - PSQF:6275 Constructivism and Design of Instruction 3
  - RCE:7338 Essentials of Qualitative Inquiry 3

- One additional qualitative or quantitative research methods course chosen in consultation with advisor

- May include one of these:
  - EDTL:7004 Schooling in the United States 3
  - EDTL:7033 Seminar on Teacher Education 3

Thesis

Students must complete a thesis, for which they earn 2-4 s.h. of credit.

- EDTL:6393 Master's Thesis 2-4

Master of Science Examination

A final oral examination is administered on campus in which candidates defend their thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

Admission

Applicants to the M.S. in teaching and learning (science education) must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

STEM Education

The Master of Science in teaching and learning (STEM education) requires 36 s.h. of graduate credit. The program focuses on science, technology, engineering, and mathematics (STEM) education. The M.S. allows students to earn the M.S. degree and complete course work for the State of Iowa K-12 STEM specialist endorsement from the Board of Educational Examiners (BOEE). Degree requirements fit the schedule of a practicing teacher by including online, hybrid, night, weekend, and summer course work, with periodic on-campus meetings.

The M.S. in teaching and learning (STEM education) requires the following course work.

Required Courses

STEM Pedagogy Courses

- All of these:
  - EDTL:6761 STEM Research and Leadership Seminar 3
  - EDTL:6762 STEM Experiential Learning 3
  - EDTL:6563 STEM Through Mathematical Modeling 3

College of Education Course

- One of these:
  - EDTL:7004 Schooling in the United States 3
  - EDTL:7033 Seminar on Teacher Education 3

Science/Mathematics Courses

- All of these:
  - EDTL:4193 Independent Study 3
  - EDTL:7755 Independent Study in Science Education Research 3

Science or math graduate-level courses at the 3000 level or above in the following subject areas: BIOL, CHEM, EES, MATH, PHYS, or other courses if approved (consult advisor)

Additional Course Work

- 6 s.h. from these:
  - EDTL:6530 Workshop in School Mathematics 1-3
EDTL:6531  Technology in School Mathematics  2-3
EDTL:6534  Foundations of Mathematics Education  2-3
EDTL:6757  Learning in the Science Classroom  2-3
EDTL:6758  Writing in the Science Classroom  3
EDTL:6759  Advanced Pedagogy  3
PSQF:4143  Introduction to Statistical Methods  3
PSQF:6200  Educational Psychology  3
PSQF:6275  Constructivism and Design of Instruction  3
RCE:7338  Essentials of Qualitative Inquiry  3

**STEM Extracurricular Experience**

This course:
EDTL:6764  STEM Extracurricular Experience and Capstone  6

**M.S. with K-12 STEM Specialist Endorsement**

If students wish to obtain the K-12 STEM specialist endorsement along with the Master of Science degree, they must:

- Demonstrate completion of 12 s.h. of science and 12 s.h. of math content course work. Credit is granted for math and science content course work completed as part of the M.S. program.
- Complete 3 s.h. of engineering or technological design course work. Students can fulfill this requirement with ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II.

**Admission**

Applicants to the M.S. in teaching and learning (STEM education) must meet the admission requirements of the Graduate College. These include:

- a bachelor’s degree from a regionally-accredited American college or university or an equivalent degree from another country as determined by the Office of Graduate Admissions with an undergraduate major in a given science or math area (or combination of science areas), science education, math education, or in elementary education with a science or math emphasis;
- a minimum g.p.a. of 3.00 or the foreign equivalent as determined by the Office of Graduate Admissions; and
- international applicants whose first language is not English must score at least 81 (Internet-based) with a minimum score of 600 on the Test of English as a Foreign Language (TOEFL) or a minimum International English Language Testing System (IELTS) score of 7.0 (with no subscore lower than 6.0).

Teaching licensure/certification is recommended for the M.S. degree and required if the candidate seeks the K-12 STEM specialist endorsement from the Board of Educational Examiners (BOEE).
Teaching and Learning, Ph.D.

Ph.D. Required Research Courses

Students admitted to doctoral programs must complete the program's research requirements.

Required Ph.D. Core Courses

All Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses, depending upon program requirements.

EDTL:7004 Schooling in the United States 3
EDTL:7033 Seminar on Teacher Education 3

Required Ph.D. Cognates

All Ph.D. students in the Department of Teaching and Learning must complete two approved cognate areas as part of their doctoral study plan. Most comprehensive exams in the department are designed to cover the student's core area plus two cognate areas, so selection of cognate areas is important. Cognates also may enhance students' employment possibilities, since they represent a minor area of study.

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list, or they may customize their own cognate areas in consultation with their advisors.

Curriculum Theory and Development

Three of these:
EDTL:4876 Advanced Methods for Teaching and Learning in a Culturally Responsive Classroom 3
EDTL:6570 Foundation of School Mathematics Curriculum 3
EDTL:7004 Schooling in the United States 3
EDTL:7075 Educational Ethnography 3
EPLS:6265 Standards-Based Education and Accountability 3
EPLS:6381 Analysis and Appraisal of Curriculum 3
PSQF:6255 Construction and Use of Evaluation Instruments 3

Foreign Language and ESL Education

Both of these:
EDTL:6400 Fundamentals of Second Language Assessment 3
EDTL:6483 Second Language Classroom Learning 3
One of these, chosen in consultation with faculty:
EDTL:6403 Language Policy and Planning 3
EDTL:6480 Issues in Foreign Language Education 3
EDTL:6484 Reading in a Second Language 3
EDTL:6497 Principles of Course Design for Second Language Instruction 3

Gifted Education

Administrative Strand
Two of these, chosen in consultation with faculty:
EPLS:4110 Administration and Policy in Gifted Education 2
EPLS:4111 Evaluation of Gifted Programs 1
EPLS:4113 Staff Development for Gifted Programs 1
RCE:4127 Research and Theory in Talent/Giftedness 1

Programming Strand
Both of these:
EDTL:4066 Curriculum Concepts in Gifted Education 3
EDTL:4199 Program Models in Gifted Education 3

Psychology Strand
Two of these, chosen in consultation with faculty:
RCE:4120 Psychology of Giftedness 3
RCE:4121 Identification of Students for Gifted Programs 3
RCE:4137 Introduction to Educating Gifted Students 3
RCE:5226 Assessment of Giftedness 3
RCE:5237 Seminar in Gifted Education 2-3

Global Education

All of these:
EDTL:6840 Theories and Perspectives in Global Education 3
EDTL:6841 Infusing a Global Perspective into the Curriculum 3
EPLS:5104 Education in the Third World 2-3
EPLS:5195 Research in Cross-Cultural Settings 3

Language, Literacy, and Culture

Both of these:
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture (introduction to LLC) arr.
EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture (topic chosen in consultation with advisor) arr.

General Emphasis
This course:
EDTL:7008 Seminar: Research and Current Issues (topic chosen in consultation with advisor) arr.

Elementary Emphasis
One of these:
EDTL:6104 Literature for Children II 3
EDTL:6164 Early Literacy Development and Instruction 2-3
EDTL:6165 Reading and Writing Across Intermediate Grades 3

Secondary Emphasis
One of these:
The Ph.D. program in foreign language and ESL education requires the following work. Students may be able to count some courses completed for the master's degree toward the 80 s.h. required for the Ph.D.

### Required Courses

#### Foreign Language Education Core

Students must complete the following (21 s.h.).

- EDTL:6400 Fundamentals of Second Language Assessment 3
- EDTL:6403 Language Policy and Planning 3
- EDTL:6409 Cultural Curriculum 3
- EDTL:6483 Second Language Classroom Learning 3
- EDTL:6484 Reading in a Second Language 3
- EDTL:6497 Principles of Course Design for Second Language Instruction 3
- EDTL:7406 Proposal Writing for Second Language Research 3

Students must complete both of the following Ph.D. core courses.

- EDTL:7004 Schooling in the United States 3
- EDTL:7033 Seminar on Teacher Education 3

#### Core Electives

Students may take the following courses in addition to, but not instead of, the courses listed under "Foreign Language Education Core" above. Students must have their advisor's consent to substitute other courses as electives.

- EDTL:6402 Second Language Program Management 3
- EDTL:6480 Issues in Foreign Language Education 3
- EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture (when topic is relevant) arr.
- SLA:6920 Multimedia and Second Language Acquisition 3

In addition, students must complete an approved cognate area; see "Required Ph.D. Cognates" under Ph.D. Required Research Courses [p. 1137] in this section of the Catalog.

The program requires 16 s.h. of course work in research methods. Three courses must be taken from the "First Tier Requirements" list, and two courses must be taken from the "Second Tier Requirements" list. Students who have little experience with social/behavioral sciences research methods when they enter the program may be advised to take remedial course work in research methods, which does not count toward the 16 s.h. requirement.

#### First Tier Requirements

These courses should be taken in the first two years of study (10 s.h.).

- EDTL:7405 Research Methods in Second Language Teaching and Learning 3
- PSQF:6243 Intermediate Statistical Methods 4
One of these:

<table>

## Comprehensive Examination

In order to qualify to take the comprehensive examination, students must successfully complete the required course work and an extended research activity. After successful completion of the required course work and the research activity, and upon recommendation of the program's faculty, a student is eligible to sit for the comprehensive examination. Completion of the required course work and research activities does not guarantee advancement to the examination.

After passing the comprehensive examination, students consult with their advisor to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts research under the primary guidance of the advisor.

## Admission

Applicants to the Ph.D. program in foreign language and ESL education must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching foreign language or ESL and should hold a master's degree or have completed a significant amount of graduate course work in a foreign language or foreign language education. Applicants must have a g.p.a. of at least 3.00 in graduate course work. International applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

Application materials should include a statement of purpose explaining the applicant's professional goals, transcripts of all undergraduate and graduate work, Graduate Record Exam (GRE) General Test scores, a sample of academic writing, and three letters of recommendation.

## Language, Literacy, and Culture

The Doctor of Philosophy program in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. The program brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides a broad background in relevant theoretic and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

## Required Courses

Students complete an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; approved cognate areas (see “Required Ph.D. Cognates” under Ph.D. Required Research Courses [p. 1137] in this section of the Catalog); and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning with 6 s.h. of those outside the College of Education. Students also earn 10-12 s.h. of dissertation credit.

Students in the Ph.D. program in language, literacy, and culture are required to take 18 s.h. in research course work.

<table>

Additional credit hours as outlined below: 12

A sequence of courses that meets the specific research interests of a student (selected in consultation with an advisor and the language, literacy, and culture faculty)

Semester hours may be taken in any combination of qualitative, quantitative or other relevant research paradigms

Courses may be taken either within or outside of the College of Education

It is recommended that students take EALL:5150 Introduction to Educational Research (3 s.h.) early in their programs of study.

And, students complete one of these core courses:

EDTL:7004 Schooling in the United States 3
EDTL:7033 Seminar on Teacher Education 3

Comprehensive Examination and Dissertation

As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for three forms of written and oral exams: they answer take-home questions in two areas of literacy; they submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest; and they design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information, see Language, Literacy, and Culture on the Department of Teaching and Learning website.

Admission

Applicants to the Ph.D. program in language, literacy, and culture must meet the admission requirements of the Graduate College. They should have at least three years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master’s degree in a literacy-related field. Application materials should include a statement of purpose explaining the applicant’s reasons for pursuing graduate study and describing future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed December 1 each year.

Mathematics Education

The Doctor of Philosophy program in mathematics education requires a minimum of 80-90 s.h. of graduate credit. The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education.

Students must update graduate course work completed more than 10 years before admission to the program. The Ph.D. program in mathematics education requires the following work.

Required Courses

Students must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website.

Students must complete one of the following Ph.D. core courses.

EDTL:7004 Schooling in the United States 3
EDTL:7033 Seminar on Teacher Education 3

In addition, students must complete an approved cognate area; see “Additional Requirements” below.

Students must complete a minimum of 24 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional course work in mathematics at the University of Iowa, chosen with advisor approval. They also must complete at least six courses in mathematics education, including EDTL:5535 Current Issues in Mathematics Education and EDTL:7535 Seminar: Research in Mathematics Education.

Additional Requirements

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the course work listed above. All Ph.D. students must complete an approved cognate area; a partial list of potential cognate areas is available from the M.A. program in mathematics education.

Upon completing the program, a student must have a cumulative g.p.a. of 3.00 or higher on all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

Comprehensive Examination

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.
**Dissertation**

Students must earn 10 s.h. of dissertation credit in EDTL:7493 Ph.D. Thesis. Each candidate completes a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before the candidate undertakes the study. Upon completion of the dissertation, the candidate defends the dissertation in an oral examination.

**Admission**

Applicants to the Ph.D. program in mathematics education must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent; a current teaching license/certificate and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

**Science Education**

The Doctor of Philosophy program in teaching and learning (science education) requires a minimum of 85 s.h. of graduate credit. The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

The Ph.D. program in teaching and learning (science education) requires the following work.

**Required Courses**

All Ph.D. students in science education must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website. Course selections must be consistent with other requirements for the degree.

All doctoral students in science education must complete one or both of the following Ph.D. core courses. Students may not substitute other courses for these.

- EDTL:7004 Schooling in the United States 3
- EDTL:7033 Seminar on Teacher Education 3

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Required Ph.D. Cognates" under Required Ph.D. Research Courses (p. 1137) in the Doctor of Philosophy in Teaching and Learning section of the Catalog.

**Science Education**

All of these (15 s.h.):

- EDTL:6757 Learning in the Science Classroom 3
- EDTL:6759 Advanced Pedagogy 3

Graduate-level science education courses chosen in consultation with advisor

**Education**

All of these (9 s.h.):

- EALL:5150 Introduction to Educational Research 3
- PSQF:6200 Educational Psychology 3
- PSQF:6275 Constructivism and Design of Instruction 3

**Research in Science Education**

Both of these (21 s.h.):

- EDTL:7750 Seminar: Science Education (taken three times for 1 s.h. each) 3
- EDTL:7755 Independent Study in Science Education Research (taken six times for 3 s.h. each) 18

**Science Area**

Students complete a family of courses (total of 12 s.h.) in a major science area.

**Dissertation**

Ph.D. students earn 10 s.h. of thesis credit in EDTL:7493 Ph.D. Thesis.

**Admission**

Applicants to the Ph.D. program in science education must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 300 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test. Applicants must submit three letters of recommendation; a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study; and an example of their academic writing.

**Social Studies Education**

The Doctor of Philosophy program in social studies education requires a minimum of 90 s.h. of graduate credit. The program prepares secondary department chairs, supervisors, curriculum directors, teacher education personnel, and college instructors in the social sciences and in social studies education.

The required 90 s.h. of credit includes course work and the dissertation (10 s.h.).

**Required Courses**

Students are required to complete 16 s.h. of course work focused on research methodology.

This course:

- PSQF:6243 Intermediate Statistical Methods 4

One of these:

- EDTL:7070 Introduction to Qualitative Methods in Literacy Research 3
- EPLS:7373 Qualitative Research Design and Methods 3
Students must take the following courses in social studies and in each of the study areas that constitute the major.

Seminars and courses numbered 5000 or above are required following Ph.D. core courses. In addition, students must complete one or both of the education program. Prior approval from their advisor and from the social studies receive credit toward their program requirements must obtain prior approval from their advisor and from the social studies program.

Students that want to take a course that is not listed above to receive credit toward their program requirements must obtain prior approval from their advisor and from the social studies education program.

In addition, students must complete one or both of the following Ph.D. core courses.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDTL:6833</td>
<td>History and Foundations of Social Studies Education</td>
</tr>
</tbody>
</table>

The remaining course work must be distributed among approved cognate areas (see "Required Ph.D. Cognates" under Ph.D. Required Research Courses [p. 1137] in this section of the Catalog), history, social sciences or related areas, and professional education, depending on a student's background and goals.

### Comprehensive Examination

Students take three three-hour examinations, one in each of the study areas. Depending on the distribution of course work, the nine hours of written examinations may be rearranged. The Ph.D. examining committee consists of five members, who are selected according to the nature of the student's Ph.D. program and distribution of course work. An oral examination is conducted by the committee following the written exam.

### Dissertation

Ph.D. candidates, in consultation with their committee, may choose to complete a dissertation organized by either chapters or publishable articles, depending on their career goals and the nature of their study. In either case, the scholarly pursuit must be on a philosophical or social science research problem in social studies education. The candidate must present a prospectus of the proposed scholarship to the committee before undertaking the dissertation. Upon completion, the candidate defends the dissertation in an oral exam.

### Admission

Applicants to the Ph.D. program in social studies education must meet the admission requirements of the Graduate College. They must have a bachelor's degree in history, the social sciences, or education; a master's degree in history, the social sciences, or education; a cumulative g.p.a. of at least 3.00; and a combined verbal and quantitative score of at least 310 on the Graduate Record Exam (GRE) General Test. At least two years of teaching experience is strongly preferred. Applicants who did not write a thesis as part of their M.A. must submit seminar papers or field research as equivalents.

### Special Education

The Doctor of Philosophy program in special education requires a minimum of 90 s.h. of graduate credit. The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

The Ph.D. curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area (see "Required Ph.D. Cognates" under Ph.D. Required Research Courses [p. 1137] in this section of the Catalog), and at least one specialization area.
Required Courses

This course:
EALL:5150 Introduction to Educational Research 3

Quantitative Research Requirements (13 s.h.)
Both of these:
PSQF:4143 Introduction to Statistical Methods 3
PSQF:6243 Intermediate Statistical Methods 4

Two of these:
EPLS:6206 Research Process and Design 3
PSQF:6220 Quantitative Educational Research Methodologies 3
PSQF:6244 Correlation and Regression 4
PSQF:6246 Design of Experiments 4
PSQF:6247 Nonparametric Statistical Methods 3
PSQF:6249 Factor Analysis and Structural Equation Models 3
PSQF:6252 Introduction to Multivariate Statistical Methods 3

Qualitative Research Requirements (6 s.h.)
This course:
EDTL:7953 Seminar: Single Subject Design Research 3

One of these:
EDTL:7410 Mixed Methods Research 3
EPLS:7373 Qualitative Research Design and Methods 3

Ph.D. Core Course

One of these:
EDTL:7004 Schooling in the United States 3
EDTL:7033 Seminar on Teacher Education 3

Proseminar Courses

Both of these:
EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education 3
EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II 3

Minor

Students also must complete an interdisciplinary minor in a discipline outside of special education (minimum of 12 s.h.).

Comprehensive Examination and Dissertation

In addition, students are required to write the comprehensive examination and complete a doctoral dissertation, earning a minimum of 10 s.h. in the following course.

EDTL:7493 Ph.D. Thesis 10

Admission

Applicants to the Ph.D. program in special education must meet the admission requirements of the Graduate College.

They must have master's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Exam (GRE) General Test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

Postsecondary Program of Study

UI REACH (Realizing Educational and Career Hopes) is a two-year transition certificate program at the University of Iowa for students with multiple intellectual, cognitive, and learning disabilities. UI REACH provides a campus experience that empowers young adults to become independent, engaged members of the community. Courses, campus life, and career preparation assist students to reach their full potential. UI REACH strives to maintain periodic contact with alumni to encourage them to become independent adults by utilizing the independent living and career-related skills they acquired in the program.

UI REACH offers courses on academic skill building, career preparation, student and community life skills, and socialization. Courses are taught by College of Education instructors.

UI REACH students live in a University of Iowa residence hall, where they receive support from specially trained undergraduate resident assistants. A fully inclusive college environment provides students with age-appropriate community opportunities and interactions with other University of Iowa students.

A limited number of UI REACH alumni may be selected to participate in the program's third-year option. Participation during the third year involves full-time course work; emphasis is on additional courses and internships that promote self-sufficiency, independent living, and self-determination.

For more information, visit the UI REACH website.

Courses

UI REACH Courses

REA:0001 Academic Success 2 s.h.
Tools that help students succeed in academic courses; basic organization, efficient note taking, study and test-taking skills; participation in activities that increase awareness of classroom dynamics; solutions for test anxiety; ways to approach diverse learning experiences; how class content relates to study hall and residential facilities; seminar.

REA:0010 Social Skills I 2 s.h.
Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

REA:0020 Computers and Technology I 2 s.h.
Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

REA:0021 Computers and Technology II 2 s.h.
Builds on REA:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

REA:0030 Health and Wellness I - Exploration 2 s.h.
Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face—nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.

REA:0031 Health and Wellness II - Healthy Lifestyles 2 s.h.
Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

REA:0040 Personal Finance and Math I 2 s.h.
Understanding of numbers, operations, and managing personal finances; computation strategies, problem-solving strategies, skills for good consumers; opportunity to practice math skills in the community and the workplace; first in a series.

REA:0041 Personal Finance and Math II 2 s.h.
Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

REA:0050 Lifetime Reading and Writing 2 s.h.
Enhancement of leisure reading; library visit to discover interesting genres, activities to review books, discussion of components (e.g., plot, characters); techniques of good readers; writing tools for success in daily living; writing forms including short organizational forms (e.g., to-do lists, grocery lists), family correspondence, business letters; observation and demonstration of writing techniques; use of writing as a form of self-expression, organization, and communication with others.

REA:0051 Practical Writing 1 s.h.
Writing tools for success in daily living; experience with a range of writing forms, beginning with short organizational forms such as to-do and grocery lists and progressing to family correspondence and business letters; observation and demonstration of writing techniques in group activities; help with self-expression in written formats, with focus on organization and communication with others; students practice writing techniques in class, in their residence halls, and in the community; seminar.

REA:0060 Tools for Life I: Critical Thinking and Decision Making 1 s.h.
Introduction to strategies, key elements, and resources for critical thinking; problem-solving and critical-thinking strategies and skills for responsible, independent decision making in personal, university, career, and community contexts; small-group discussion, case studies, role-playing, and applied practice in real-world situations related to daily, personal, academic, and career decisions.
REA:0061 Tools for Life II: Problem Solving 1 s.h.
Introduction to strategies and methods of problem solving; evaluation of scenarios from academic, social, and work environments; discussion of students' personal and current experiences; focus on development of interpersonal communication skills, relationship building, independence, career selection.

REA:0062 Social Skills II 2 s.h.
Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

REA:0070 Life Skills I - Transitions 2 s.h.
Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.

REA:0071 Life Skills II - Community Life 2 s.h.
Review of previously learned skills for making the transition to independent living in the college environment; use of a personal planner for managing daily routines and schedules, planning for independent living after graduation; classroom activities, practical experiences on campus and in the community.

REA:0072 Life Skills III - On Your Own 2 s.h.
Goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; skills required for finding and managing a home or apartment, using community resources and agencies, and meeting basic needs; how to be interdependent and independent in the community.

REA:0073 Life Skills IV - Transition Planning 2 s.h.
Work on transition plan during spring semester of final year--goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; using community resources and agencies; meeting basic needs; how to be interdependent and independent in student's home community; identification of transition team members; plan and lead transition meeting.

REA:0074 Household Management II 3 s.h.
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.

REA:0075 Household Management I 3 s.h.
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.

REA:0076 Community Leisure and Advocacy 1 s.h.
Utilizing community resources while promoting self-advocacy and leadership; student support for transitioning from a university setting to community living; exploration of community resources related to recreation, entertainment, and independent living using multiple media sources for information gathering; field trips to investigate local resources; research related resources within students' home communities. Requirements: enrollment in UI REACH Program.

REA:0078 Historical Documentary Making 2 s.h.
History of disabilities (learning and physical disabilities); ground work for making a historical documentary; desktop documentary software used by student teams to produce documentaries on history of disability rights movement. Requirements: enrollment in REACH program.

REA:0079 Service Learning 2 s.h.
Classroom-based learning combined with community service; available resources and ways to better a community; assessment of community needs, research volunteer organizations, service-learning opportunities within the community.

REA:0080 Exploring Issues in Society 1 s.h.
Diversity and social justice issues; some social implications of being a person with a disability (e.g., negative treatment from others due to stigma, ignorance, stereotypes); guidance toward empowerment in self-advocacy at work, at school, and in community life; overview of cognitive and learning disabilities, Americans with Disabilities Act and other legislation that promotes equality, history of the disability rights movement, current social trends affecting people with disabilities; perspectives from America's history of social, cultural, and religious unity, celebration, and conflict.

REA:0081 Personal Leadership 1 s.h.
Builds on concepts learned in REA:0080; self-advocacy and awareness of individual strengths as empowerment for leadership roles in the community; qualities of a leader, value of mentors, importance of community service; elements of work-life balance; opportunities to participate in life-long service learning and leadership.

REA:0090 Current Events 1 s.h.
Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, Internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.

REA:0091 Psychology 1 s.h.
Basic concepts of psychology, with focus on daily life and understanding behavior; situations encountered as persons with an intellectual disability; differences between a psychologist, psychiatrist, and counselor; role of professionals; individual differences and social influences on behavior; introduction to scientific method, conducting basic experiments.

REA:0094 Introduction to Spanish: Language and Culture 2 s.h.
Introduction to Spanish language and culture; emphasis on basic conversational phrases, functional vocabulary, and cultural awareness; diversity of 21st-century Spanish-speaking world.

REA:0100 Career Exploration 4 s.h.
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.
REA:0101 Job Search Strategies 2 s.h.
Fundamental tools and techniques for getting a job; students create a résumé, including references and updated work history; interview techniques, information gathering, thank-you letters, work-related vocabulary, appropriate behaviors and attitudes for a successful job search; role playing, demonstrations, real-world practice.

REA:0102 Entrepreneurism 2 s.h.
Characteristics, advantages, and disadvantages of self-employment; legal aspects of forming a business, marketing, acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; students write a business plan.

REA:0103 Job Search Strategies II 2 s.h.
Continuation of REA:0101; update résumés, references, and cover pages; appropriate behaviors and attitudes for successful job search; seek and apply for jobs with assistance from instructor.

REA:0200 Business Support Seminar 1 s.h.
Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.

REA:0201 Creative Arts Seminar 2 s.h.
Aspects of careers in creative arts; availability of employment, professional association memberships, vocabulary used in the creative arts work environment.

REA:0202 Education Career Seminar 1 s.h.
Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.

REA:0203 Health Services Seminar 1 s.h.
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.

REA:0204 Hospitality Seminar 1 s.h.
Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.

REA:0205 Human Services Seminar 1 s.h.
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.

REA:0207 Marketing/Sales Seminar 1 s.h.
Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

REA:0208 Parks and Natural Resources Seminar 1 s.h.
Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.

REA:0209 Skilled Trades Seminar 1 s.h.
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.

REA:0210 Information/Technology Seminar 1 s.h.
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.

REA:0211 Culinary Arts Seminar 1 s.h.
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in REACH program.

REA:0212 Community College Prep Seminar 1 s.h.
Preparation to continue education at a community college after UI REACH; application and admission testing requirements, how to access the services offered at Student Disability Services; exploration of associate degree and certificate; area of study requirements and courses offered.

REA:0250 Academics and Life Skills Exploration I 1-3 s.h.
Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.

REA:0251 Academics and Life Skills Exploration II 1-2 s.h.
Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.

REA:0252 Academics and Life Skills Enrichment I 1-3 s.h.
Broaden and diversify academic and student life experiences; address specific interest areas of students; focus on communication, relationships, academics, and independent life; individualize, extend, and provide depth to student's current level of knowledge and skills.

REA:0253 Academics and Life Skills Enrichment II 1-2 s.h.
Builds on extended and diversified learning opportunities provided in REA:0252; transfer of skills and knowledge to new situations and environments encountered as students transition to workplace and home communities.

REA:0254 Social Skills for Work 1 s.h.
Learning opportunities to develop appropriate social skills in the workplace.

REA:0300 Internship I - Prep arr.
Introduction to functional skills, job expectations, environments of the workplace; students venture out into the community and see first-hand what a specific career or job entails; role of the influencer; small groups, job shadowing, tryouts--depending on individual needs and abilities; create a résumé; summer job searching skills; preparation for Internship II--applications, interviews, contacting employers.
REÁ:0301 Internship II  
Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.

REÁ:0302 Internship III  
Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.

REÁ:0303 Internship IV  
Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and e-mailing weekly journals; students, instructors, and employers evaluate student's work performance.

REÁ:0304 Internship V  
Continuation of REÁ:0303; community work experiences with periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.

REÁ:0305 Advanced Internship  
Development of advanced workplace skills in time management, communication, problem solving, and performance; one or more internships individualized to meet needs for further workplace soft skill development; observation in workplace by instructors, employers and mentors; journaling and discussion of experience with UI REACH staff; tracking time via method that works for individual needs; internship experiences and classroom seminars; emphasis on work skills in any career area and soft skills needed to be an independent worker. Requirements: UI REACH fourth year enrollment.

REÁ:0325 Computer and Technology Literacy I  2 s.h.  
Self-paced course to improve personal, academic, and career computer literacy and skills; online learning modules and computer-based programs to increase computer skills; email and Internet searching, online learning options, online banking and purchasing, Microsoft Office programs, and online career resources.

REÁ:0326 Computer and Technology Literacy II  2 s.h.  
Self-paced course builds on skills learned in REÁ:0325; extends and provides depth to student's current level of skill; course work focuses on enhancing personal, academic, and career computer literacy; group discussion, demonstration, independent exploration, and practice to further develop computer skills; email, online career resources, Google Drive, social networking, and budgeting.

REÁ:0327 Social Networking  1 s.h.  
Management of student's social network space; instruction and practice to increase access to people online while encouraging safe practices in social media communication; types of personal information that should not be revealed online; risks of meeting strangers online; constructing online personal space by engaging in use of appropriate messages, photos, and privacy settings.

REÁ:0400 Independent Study  
Independent study coordinated with the student's UI REACH advisor.

REÁ:0501 Special Topics  
Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.
College of Engineering

Dean
- Alec B. Scranton

Associate Dean, Research and Graduate Studies
- Milan Sonka

Associate Dean, Academic Programs
- Keri C. Hornbuckle

Associate Dean, Diversity and Outreach
- Tonya L. Peeples

Director, Center for Bioinformatics and Computational Biology
- Tom Casavant

Director, Center for Computer-Aided Design
- Karim Abdel-Malek

Director, Iowa Institute for Biomedical Imaging
- Milan Sonka

Director, IIHR—Hydroscience and Engineering
- Larry Weber

Undergraduate degree: B.S.E.
Undergraduate certificates: naval hydrodynamics; technological entrepreneurship; wind energy
Graduate degrees: M.S.; Ph.D.
Website: https://www.engineering.uiowa.edu/

Engineering is defined by ABET (formerly known as Accreditation Board for Engineering and Technology) as that profession in which knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to use, economically, the materials and forces of nature for the benefit of mankind.

In short, engineering is the application of science and mathematics to solve problems for society.

The major aim of engineering is the creation of a new process, product, material, or system. This activity demands a high degree of creativity and problem solving ability coupled with a full understanding of engineering fundamentals, good judgment, and a practical sense of economics.

The College of Engineering prepares students for one or more of the many career opportunities in the engineering profession. Such opportunities include positions in design, production, development, research, management, and consulting. Engineers are employed in industrial organizations, governmental agencies, and private practice.

The College of Engineering's mission is to develop, disseminate, transfer, and preserve technical knowledge that improves people's lives. The college endeavors to:

- provide a well-rounded and superior engineering education that draws upon resources of a comprehensive research university to attract outstanding undergraduate and graduate students in selected engineering fields;
- conduct high-quality research in selected areas, enabling faculty members and students to keep pace with new developments and ensuring that the newest concepts are taught in its courses; and
- serve the needs of the University, industry, government, and the general populace by making its facilities and faculty expertise accessible.

College Organization

The College of Engineering has five departments and four research units. The Department of Biomedical Engineering, Department of Chemical and Biochemical Engineering, Department of Civil and Environmental Engineering, Department of Electrical and Computer Engineering, and Department of Mechanical and Industrial Engineering offer a total of six undergraduate programs of study with Bachelor of Science in Engineering degrees offered in:

- biomedical engineering,
- chemical engineering,
- computer science and engineering,
- civil engineering,
- electrical engineering,
- industrial engineering, and
- mechanical engineering.

The college also offers joint undergraduate degrees with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a joint bachelor's/master's degree program in each engineering discipline; and a joint bachelor's/master's degree with the School of Urban and Regional Planning (also see graduate Certificate in Transportation Studies [p. 1314]). See "Joint and Dual Degrees" under Requirements [p. 1164] in the Bachelor of Science in Engineering section of the Catalog.

In addition, the College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship [p. 1254] for undergraduate engineering students. The College of Engineering also teams with the College of Liberal Arts and Sciences to offer the Certificate in Wind Energy [p. 1256], which is open to all University of Iowa undergraduates. The college also offers the undergraduate Certificate in Naval Hydrodynamics [p. 1252].

The College of Engineering offers Master of Science and Doctor of Philosophy degrees in:

- biomedical engineering,
- chemical and biochemical engineering,
- civil and environmental engineering,
- electrical and computer engineering,
- industrial engineering, and
- mechanical engineering.

The research units are the Center for Bioinformatics and Computational Biology, the Center for Computer-Aided Design, the Iowa Institute for Biomedical Imaging, and IIHR—Hydroscience and Engineering.

Diversity and Inclusion in the College of Engineering

The College of Engineering is committed to developing an inclusive community of learning and scholarship with the sustainable support systems that enable participants of all ages (pre-K12, college, graduate students, staff, and faculty) to succeed. This welcoming extends beyond the college...
to the wider University of Iowa community and to national venues. Inclusion efforts are led by the Outreach, Admissions, Scholarship and Inclusion Services (OASIS) team. Diversity programs offered by the Ethnic Inclusion Effort for Iowa engineering (eIE) and by Women in Science and Engineering (WaSE) help to nourish the college community. Project Lead the Way (PLTW) and FIRST Tech Challenge (FTC), as well as general pre-engineering summer camps, engage K-12 students and teachers in the Midwest expanding inclusion practices to broaden participation of underrepresented groups in science and engineering disciplines. These programs enjoy the support from several international engineering and manufacturing firms, federal agencies, and private foundations. The associate dean for diversity and outreach manages these efforts and further serves to increase recruitment and retention of diverse undergraduate and graduate students, faculty, and staff within the college.

Diversity and Inclusion in Graduate Programs
Diversity programs have served to build and nourish the graduate community within the College of Engineering. The college is active in recruiting graduate students of diverse backgrounds and provides mentoring, networking, professional development, and financial support for many graduate students. The success in mentoring underrepresented students in engineering has been built on strong collaboration with other campus units and has been supported through private, state, and federal funding.

Signature programs within the College of Engineering which support graduate students include the Ethnic Inclusion Effort for Iowa Engineering and Women in Science and Engineering which provide opportunities for graduate professional development. In addition, the college is a diversity leader as a part of the University Center for Exemplary Mentoring, supported by the Alfred P. Sloan foundation, and as a member of The National GEM Consortium.

Professional Licensure
Licensure as a professional engineer is governed by the laws of each state. Most states' minimum requirements include graduation from an accredited engineering curriculum of at least four years, followed by at least four years of practical experience and successful completion of two major examinations.

The agency that controls and monitors the licensing procedure in Iowa is the Engineering & Land Surveying Examining Board. The first step in the procedure for students enrolled in an accredited program is to pass an examination on engineering fundamentals given near the time of graduation. Following graduation and the successful completion of the engineering fundamentals exam, graduates receive an Engineer-in-Training (EIT) certificate. The final step in the procedure is to pass the principles and practice exam in a specialty area following a minimum of four years of approved professional experience. At this point, the graduate engineer becomes a licensed Professional Engineer.

Student Organizations
The College of Engineering is invested in creating inclusive opportunities for students to further develop their leadership skills and to become more engaged and committed student leaders. In turn, student organizations are empowered to maximize their impact around the college, the university, and the community. The College of Engineering is home to more than 30 student groups comprised of honors organizations, departmental and multidisciplinary organizations, diversity and professional organizations, and industry specific organizations. The Student Development Center (SDS) and Outreach, Admissions, Scholarships, and Inclusion Services (OASIS), as well as the dean’s office, in conjunction with the Engineering Student Council, work together to support recognized student organizations. Engineering Student Council plans and carries out activities involving the entire college and acts on college-wide matters of general student interest.

Several engineering professional societies have University of Iowa student chapters: American Institute of Chemical Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Biomedical Engineering Society, Institute of Electrical and Electronics Engineers, and Institute of Industrial Engineers.

The following student organizations are multidisciplinary and are open to all engineering students:

- the American Institute of Aeronautics and Astronautics is a professional organization affiliated with the field of aerospace engineering;
- the American Wind Energy Association focuses on career development, research, and advocacy for wind energy;
- Artineers is an organization that fosters collaborations between engineering and the arts;
- Engineering Sales Club helps engineering students develop the professional skills required for careers in technical sales and consulting;
- Engineering World Health, Continental Crossings, U.S. Green Building Council, and Engineers Without Borders work to reduce poverty and improve global sustainability;
- Human Factors and Ergonomics Society promotes the discovery and exchange of knowledge concerning the characteristics of human beings that are applicable to the design of systems and devices;
- UI Robotics Club is a comprehensive organization focused on robotics and FIRST;
- Society of American Military Engineers promotes and facilitates engineering support for national security;
- Society of Automotive Engineers is a technical organization that designs and fabricates a Mini-Baja Car to compete at regional and national competitions; and
- Theta Tau, a national professional engineering fraternity, focuses on developing engineering leaders for service, profession, and brotherhood.

The University chapter of Tau Beta Pi, a national honorary society for students in all engineering fields, gives special recognition to superior students in their junior and senior years. The work of students who are outstanding in specific engineering disciplines is recognized by Alpha Eta Mu Beta (biomedical engineering), Omega Chi Epsilon (chemical engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Alpha Pi Mu (industrial engineering), and Pi Tau Sigma (mechanical engineering).

Student organizations that support the enrollment of women and members of minority populations in the college include the Multi-Ethnic Engineering Student Association; the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers; the National Society of Black Engineers; Out in Science, Technology Engineering, and
Mathematics (oSTEM); the Society of Asian Scientists and Engineers; the Society of Hispanic Professional Engineers; the Society of Women Engineers; and Women in Science and Engineering.

For more information, visit Engineering Student Organizations on the college’s website.

**Programs**

### Undergraduate Programs of Study

The College of Engineering offers the Bachelor of Science in Engineering [p. 1157]; see that section of the Catalog for detailed information about the B.S.E., including requirements, admission, and academic rules and procedures. B.S.E. degrees are offered in Biomedical Engineering [p. 1170], Chemical and Biochemical Engineering [p. 1181], Civil and Environmental Engineering [p. 1195], Electrical and Computer Engineering [p. 1211], and Mechanical and Industrial Engineering [p. 1227]. For information about each B.S.E. major, see the Catalog’s College of Engineering department sections. The College of Engineering also offers two undergraduate certificates in Naval Hydrodynamics [p. 1252] and Wind Energy [p. 1256].

### Graduate Programs of Study

The College of Engineering offers the Master of Science and Doctor of Philosophy; see Biomedical Engineering [p. 1170], Chemical and Biochemical Engineering [p. 1181], Civil and Environmental Engineering [p. 1195], Electrical and Computer Engineering [p. 1211], and Mechanical and Industrial Engineering [p. 1227] departmental sections in the Catalog for information about principal research and study areas, degree requirements, admission, and financial support for individual graduate programs.

### High School Program

#### Project Lead The Way

Project Lead The Way (PLTW) is a four-year high school sequence taught in conjunction with traditional math and science courses. The program's curriculum emphasizes critical thinking, creativity, innovation, and real-world problem solving. PLTW courses provide students with in-depth, hands-on knowledge of engineering and technology-based careers.

### Facilities

### Facilities and Resources

#### Seamans Center for the Engineering Arts and Sciences

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. Dedicated in 2001, the Seamans Center combines new construction with extensive renovation of the former Engineering Building to provide space for learning, teaching, research, and collaboration that meet the needs of 21st-century engineering. Additional work rooms and conference areas join the Seamans Center's expanded classrooms and flexible research space in an environment designed to serve the needs of the college's students, faculty, and staff.

Construction began in 2016 on an addition that will provide state-of-the-art collaborative classrooms and learning spaces that further enhance the creative learning opportunities for students. The Seamans Center provides the welcoming and collaborative facilities that support the active and engaging educational and research programs in the College of Engineering.

### Engineering Student Services

The professional staff of Engineering Student Services administers student services for the College of Engineering, including advising, tutoring, student records, and global engineering. It also is the administrative home of Engineering Professional Development and the Hanson Center for Technical Communication.

### Engineering Professional Development

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinates the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. EPD offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation. EPD partners with the Pomerantz Career Center to facilitate on-campus interviewing and administration of the University's online recruiting system, HireaHawk.

### Global Engineering

In the world's global society, engineering graduates in all disciplines are expected to have a level of global competence in order to successfully interact with colleagues and customers around the world. Successful engineers are able to communicate across cultures, work in ethnically and culturally diverse teams, and can effectively deal with ethical issues and conflicts arising from such differences.

University of Iowa engineering students have numerous opportunities to study abroad. Students can immerse themselves in another culture while taking required engineering courses in English for a winter, summer, semester or full academic year. Students can also explore opportunities abroad to fulfill their minor or elective focus area requirements.

In addition to studying abroad, engineering students can pursue additional opportunities abroad, such as volunteering abroad, conducting research in other countries, and global internships.

### Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collections include more than 140,000 volumes and electronic full-text access to over 5,000 engineering and scientific journals. It offers electronic access to primary engineering and scientific indexes and abstracts, and full-text access to standards and U.S. patents. The library also maintains a substantial collection of publications from major engineering societies and a collection of national and international standards. Tools also are available for check out to students and faculty in order to allow for more hands-on projects and use in class assignments. Example tools include screwdrivers, scales, and light meters. The library provides
The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports curricular, research, and operational needs of the College of Engineering and the University. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a variety of manufacturing equipment. The shop has a high resolution 3-D scanner and several high resolution 3-D printers. EMS also supports College of Engineering clubs with its projects support facility.

Research Centers
The College of Engineering has four major research centers. College of Engineering researchers also collaborate with researchers from outside the college in several interdisciplinary research units.

College of Engineering Research Centers

Center for Bioinformatics and Computational Biology
The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blinding eye disease, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB has been at the cutting edge of high throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, to which the CBCB plays a central role in partnership with labs, centers, and institutes across the University’s Carver College of Medicine and basic science programs across campus. The CBCB also has been a nexus for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

Center for Computer-Aided Design
The Center for Computer-Aided Design (CCAD) conducts basic and applied research in six units: the Operator Performance Laboratory (research in human performance); the Virtual Soldier Research program (research in human modeling and simulation); the Cognitive Systems Laboratory (research in human factors in transportation and human computer interaction); the Reliability and Sensory Prognostic Systems program; the National Advanced Driving Simulator (research in human factors and simulation for ground transportation); the Musculoskeletal Imaging, Modeling, and Experimentation Program (computational modeling of anatomic structures); and Advanced Manufacturing Technology (design, modeling, and fabrication of tissue replacement parts, tissue scaffolds, medical devices, and cell and organ printing; testing of manufacturability, design effectiveness, virtual performance, and reliability of polychlorinated biphenyls—PCBs).

Iowa Institute for Biomedical Imaging
The Iowa Institute for Biomedical Imaging (IIBI) conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound), medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); and virtual surgery planning (augmented reality for liver resection surgery). The institute is sponsored jointly by the College of Engineering and the University’s Carver College of Medicine.
IIHR—Hydroscience & Engineering

IIHR—Hydroscience & Engineering is a world-renowned center for education, research, and public service focusing on hydraulic engineering and fluid mechanics. Based in the C. Maxwell Stanley Hydraulics Laboratory, a five-story red brick building on the banks of the Iowa River, IIHR is a unit of the University of Iowa’s College of Engineering. IIHR students, faculty members, and research engineers work together to understand and manage one of the world’s greatest resources—water. Students from around the world benefit from IIHR’s comprehensive multidisciplinary approach, which includes basic fluid mechanics, laboratory experimentation, and computational approaches.

IIHR activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (hydraulics structures, river mechanics, hydraulic structures, fish passage, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water-quality monitoring); and water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes). The University of Iowa’s Water Sustainability Initiative (WSI) brought new interdisciplinary expertise to the institute in 2013 when the WSI faculty members (based in the Colleges of Liberal Arts and Sciences, Engineering, and Public Health) affiliated with IIHR. The Iowa Geological Survey joined IIHR in 2014, bringing new expertise in Iowa’s subsurface resources, groundwater modeling, innovative geophysical skills, and more.

Students gain hands-on experience through close cooperation with faculty and staff on research projects funded by industry, government, and other organizations.

Interdisciplinary Research Units

Center for Biocatalysis and Bioprocessing

The Center for Biocatalysis and Bioprocessing (CBB) concentrates on biocatalysis and bioprocessing education, research, and technology transfer. Its research includes fermentation; bioprocessing of small molecules, peptides, proteins and biocatalysis; pilot-scale technology transfer; structural biology of biocatalysts; biocatalyst screening and discovery; bioremediation; cloning of genes and optimization of protein expression in microorganisms; and GMP operations for producing clinical-grade biotherapeutics.

Center for Global and Regional Environmental Research

The Center for Global and Regional Environmental Research (CGRER) is devoted to studying and bettering the environment. Its focus includes multiple aspects of global environmental change, including regional effects on nature ecosystems, environments, and resources on human health, culture, and social systems. The center helps Iowa's agencies, industries, and people prepare for accelerated environmental change.

Center for Health Effects of Environmental Contamination

The Center for Health Effects of Environmental Contamination (CHEEC) is a multidisciplinary environmental health research center dedicated to supporting and conducting research to identify, measure, and prevent adverse health outcomes related to exposure to environmental toxins, particularly water contaminants. The center also conducts educational programs on environmental health and works with environmental database design, development, and systems support for environmental health research.

Center for International Rural and Environmental Health

The Center for International Rural and Environmental Health (CIREH) promotes understanding and awareness of the causes, consequences, and prevention of communicable, chronic, environmental, and occupational diseases in all regions of the world. The center focuses its education, training, and research on nations with substantial agrarian economies.

Environmental Health Sciences Research Center

The Environmental Health Sciences Research Center (EHSRC) researches the adverse health effects of environmental contaminants among rural and agricultural populations. The center is at the forefront of research on rural environmental health problems such as pesticide-induced cancers and birth defects, community and occupational exposures to airborne hazards from concentrated livestock operations, asthma among rural children, and remediation of rural hazardous waste sites. It also trains scientists to characterize mechanisms that underlie environmental disease and approaches to their prevention.

Injury Prevention Research Center

The Injury Prevention Research Center (IPRC) is a multidisciplinary unit whose focus includes injury prevention, acute care, biomechanics, and surveillance activities. The center's current work involves examining different types of residential smoke detectors, using simulation technology to study driving safety among persons with sleep apnea and persons on antiseizure medication, using bicycling simulation to study risk taking in children, and studying the effect of interpersonal violence on women's health.

Optical Science and Technology Center

The Optical Science and Technology Center (OSTC) involves researchers from the College of Engineering and the College of Liberal Arts and Sciences. The center's objective is to catalyze research in the optical sciences by establishing an environment that promotes collaborative science and the development of innovative technology. Broad areas of interest include development of novel semiconductor materials with unique electronic and optical properties; design, fabrication, and characterization of nanostructures and nanomaterials; photopolymerization processes; exploration of environmental science; and application of novel optical devices in the biosciences.

Orthopaedic Biomechanics Laboratory

The Orthopaedic Biomechanics Laboratory researches the application of advanced innovative computational formulations and novel experimental approaches to clinically-oriented problems across the spectrum of musculoskeletal biomechanical research, including total joint replacement (hip, spine, knee, ankle) posttraumatic arthritis, osteonecrosis of the hip, high-energy limb trauma, carpal tunnel syndrome, and articular contact stresses as they relate to joint degeneration.
Photopolymerization Center
The Photopolymerizations Center (IUCRC) works to advance the fundamental understanding of the kinetics and mechanisms of photopolymerizations; to establish a venue for active discussions and collaborations among industrial and academic researchers; to explore high-risk, cutting-edge research on photopolymerization processes that could lead to technological innovations; and to promote and/or develop novel applications that exploit the unique set of advantages offered by photopolymerizations.

Public Policy Center
The Public Policy Center (PPC) facilitates interdisciplinary academic research on policy related to health, transportation and vehicle safety, social and education related issues, environment, and politics. It works to provide policy makers and the public with information they can use to help communities and individuals thrive in sustainable ways.

Courses
The college's individual undergraduate programs and course requirements for each engineering major also are described in the Catalog's College of Engineering department sections. Each undergraduate program builds upon a core program (see Bachelor of Science in Engineering [p. 1157] in the Catalog). Not all core courses are required for each engineering major. Core program courses are intended for College of Engineering students. Undergraduates in other disciplines who wish to register for core program courses should contact Engineering Student Services.

Core Engineering Courses

ENGR:0000 Engineering Internship/Co-op 0 s.h.
For engineering majors participating in the Cooperative Education and Internship Program.

ENGR:0002 Engineering Half-Time Internship 0 s.h.
Registration for work assignment periods; for students participating in the Cooperative Education Program.

ENGR:0004 Engineering Academic Internship arr.
Academic credit for full-time co-op/internship employment in the College of Engineering. Requirements: for international students -- F-1 or J-1 visa, engineering undergraduate standing, minimum 3.50 g.p.a., full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved 3 s.h. distance education or evening course, and preapproval of internship by Engineering Professional Development; non-international students may be eligible on case-by-case basis.

ENGR:0006 Engineering Global Internship/Co-op 0 s.h.
Registration for global work experiences; for students participating in the Cooperative Education Program.

ENGR:1000 Engineering Success for First-Year Students 1 s.h.
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills.

ENGR:1029 First-Year Seminar arr.
Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

ENGR:1100 Engineering Problem Solving I 3 s.h.
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

ENGR:1300 Engineering Problem Solving II 3 s.h.
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

ENGR:1430 Introduction to Engineering Design 3 s.h.
Problem-solving skills taught through a design-development process; use of solid-modeling computer design software to create, analyze, and communicate models of product solutions. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1431 Principles of Engineering 3 s.h.
Introduction to engineering and engineering technology; exploration of varied technology systems and manufacturing processes to show how engineers and technicians use math, science, and technology to solve engineering problems and help people; concerns about social and political consequences of technological change. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1432 Digital Electronics 3 s.h.
Applied logic, with focus on application of electronic circuits and devices; use of computer simulation software to design and test digital circuitry before circuits and devices are built. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1433 Computer Integrated Manufacturing 3 s.h.
Builds on computer solid modeling skills developed in ENGR:1430 on of robotics and automation principles; robotics in automated manufacturing, design analysis; students use CNC equipment to produce models of their 3-D designs. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1434 Civil Engineering and Architecture 3 s.h.
Overview of civil engineering and architecture; interrelationship and dependence of each field on the other; roles of civil engineers and architects, project planning, site planning, building design, project documentation and presentation; students use state-of-the-art software to solve real-world problems and provide solutions for projects and activities. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1435 Aerospace Engineering 3 s.h.
Experience applying scientific and engineering concepts to design materials and processes for aeronautics and flight; aerospace information systems, star sailing or astronautics rocketry, propulsion, physics of space science, space life sciences; habitat and crew systems with life support, biology of space science, principles of aeronautics, structures and materials, systems engineering. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.
ENGR:1436 Biotechnical Engineering 3 s.h.
Experiences from the fields of biotechnology, bioengineering, biomedical engineering, and biomolecular engineering; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1437 Computer Science Principles 3 s.h.
Implementation of the College Board's 2013 Computer Science Principles framework; development of computational thinking, career paths that utilize computing, professional tools to foster creativity and collaboration; use of Python as a primary tool; incorporation of multiple platforms and languages for computation; development of programming expertise, exploration of Internet workings; projects and problems including app development, visualization of data, cybersecurity, robotics, simulation. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1438 Computer Science A 3 s.h.
Development of computational thinking skills through Android app development for mobile platforms; utilization of industry-standard tools such as Android Studio, Java programming language, XML, and device emulators; students collaborate to create original solutions to problems of their own choosing by designing and implementing user interfaces and Web-based databases; curriculum is a College Board-approved implementation of AP Computer Science A. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:1440 Environmental Sustainability 3 s.h.
Investigation and design of solutions in response to real-world challenges related to clean and abundant drinking water, food supply issues, and renewable energy; application of knowledge through hands-on activities and simulations. Requirements: enrollment in Project Lead The Way program and consent of UI Project Lead The Way director.

ENGR:2110 Engineering Fundamentals I: Statics 2-3 s.h.

ENGR:2120 Engineering Fundamentals II: Electrical Circuits 3 s.h.
Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

ENGR:2130 Engineering Fundamentals III: Thermodynamics 3 s.h.
Basic elements of classical thermodynamics, including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles; psychrometrics. Prerequisites: PHYS:1611 and CHEM:1110. Corequisites: MATH:1560.

ENGR:2510 Fluid Mechanics 4 s.h.
Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: MATH:2560 and ENGR:2710. Corequisites: ENGR:2130.

ENGR:2710 Dynamics 3 s.h.
Vector calculus, Newton's laws, 3-D motion of particles and multiparticle systems, 2-D motion of rigid bodies. Prerequisites: ENGR:2110 and MATH:1550.

ENGR:2720 Materials Science 3 s.h.
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

ENGR:2730 Computers in Engineering 2-3 s.h.
Advanced programming; good software engineering techniques including pseudocode and documentation, dynamic data structures, recursive programming, procedural and object-oriented computing, inheritance, and standard template library; contemporary and global impact of software and computers on society; robot programming lab arranged (using C/C++ language). Prerequisites: ENGR:1300.

ENGR:2750 Mechanics of Deformable Bodies 3 s.h.
Elementary theory of deformable bodies; stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: ENGR:2110. Corequisites: MATH:2560.

ENGR:2760 Design for Manufacturing 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: ENGR:2720.

ENGR:4000 Engineering Honors Seminar 1 s.h.
Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

ENGR:4001 Leadership Seminar: Mediocrity is Not an Option 1 s.h.
Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.

ENGR:5200 COE Fellows Seminar 1 s.h.
Aspects of professional development for academic research, including applications for graduate fellowships, types of student aid, stewardship of discretionary accounts, identifying and meeting milestones in the Ph.D. process, integrating into the research team, teaching in a variety of academic settings, writing research articles, developing a curriculum vitae, networking in professional organizations, preparing research presentations, critical thinking, creating inclusive laboratory and classroom environments, and the impact of engineering on sustainability.
ENGR:6431 Concepts of Physical Science and Principles of Engineering  
5 s.h.
Understanding the field of engineering and engineering technology; technology systems and manufacturing processes explored to learn how engineers and technicians use math, science, and technology to solve engineering problems and benefit people; concerns about social and political consequences of technological change. Requirements: Project Lead The Way high school teacher.

ENGR:6433 Concepts in Physical Science with Computer Integrated Manufacturing Applications  
5 s.h.
Introduction to high-tech, innovative nature of modern manufacturing; opportunities related to understanding manufacturing; manufacturing processes, product design, robotics, automation; students may earn a virtual manufacturing badge recognized by the National Manufacturing Badge system; proper paradigm for relating these concepts to secondary level students. Requirements: Project Lead The Way teacher.

ENGR:6434 Concepts of Physical Science with Civil Engineering Applications  
5 s.h.
Civil engineering and architecture field experience; proper paradigm for relating concepts to secondary-level students, history of civil engineering, architectural design, surveying, cost and efficiency analysis, sustainable design, soil testing, site evaluation and layout. Requirements: Project Lead The Way high school teacher.

ENGR:6437 Concepts of Physical Science with Computer Engineering  
5 s.h.
Field of computer science and software engineering; exploration of pedagogy to learn how engineers and technicians use math, science, and technology to solve engineering problems and benefit people; concerns about social and political consequences of technological change. Requirements: Project Lead The Way high school teacher.

ENGR:6438 Concepts of Physical Science with Medical Detectives Training  
2 s.h.
Field of medical testing and forensics, exploration of pedagogy; how medical personnel use math, science, and technology to solve problems and benefit people; solving medical mysteries through hands-on projects and labs; how to measure and interpret vital signs; how systems of human body work together to maintain health. Requirements: Project Lead The Way high school or middle school teacher.

ENGR:6439 Concepts of Physical Science with Engineering Design and Development  
5 s.h.
Experiences from engineering design and development fields; proper paradigm for relating concepts to secondary-level students; team work to design and develop an original solution to a technical problem by applying engineering design process; research to choose, validate, and justify a technical problem; teams design, build, and test solutions, then present and defend original solution to an outside panel; developed by Project Lead The Way.

ENGR:6440 Concepts in Physical Science with Environmental Sustainability Applications  
1-5 s.h.
Investigation and design of solutions in response to real-world challenges related to clean and abundant drinking water, food supply issues, and renewable energy; proper paradigm for relating these concepts to secondary level students; application of knowledge through hands-on activities and simulations. Requirements: Project Lead The Way teacher.

ENGR:6450 Concepts in Physical Science with K-5 STEM Launch Applications  
1-2 s.h.
Introduction to Project Lead the Way (PLTW) launch curriculum; 24 modules (K-5 grade level) that align to Common Core State Standards for math and English language arts, Next Generation Science Standards, and other national and state standards; 10-hour modules presented in pairs that combine to create a thematic unit; flexibility of teachers and schools to introduce modules that they want, when they want, and at the grade level they want; proper paradigm for relating these concepts to elementary (K-5) students, training other elementary teachers. Requirements: Project Lead The Way teacher.

ENGR:6451 Concepts in Physical Science with Introduction to Computer Science  
2-3 s.h.
Preparation for teaching beginning computer science course; creation of simple applications for mobile devices using MIT App Inventor; impact of computing on society, application of computing across career paths, skill building and awareness of digital citizenship and cybersecurity; transfer of programming skills gained in MIT App Inventor to text-based programming in Python to create strategy games; proper paradigm for relating these concepts to secondary students.

ENGR:6462 Concepts in Computer Science Applications  
5 s.h.
Developing computational thinking skills through the medium of Android App development for mobile platforms; utilize industry-standard tools such as Android Studio, Java programming language, XML, and device emulators; students collaborate to create original solutions to problems of their own choosing by designing and implementing user interfaces and Web-based databases; course curriculum is a college board-approved implementation of AP CS A; focus on the proper paradigm for relating these concepts to secondary level students. Requirements: consent of UI Project Lead The Way director.

ENGR:6470 Concepts in Principles of Biomedical Science Applications  
5 s.h.
Introductory course of the Project Lead The Way Biomedical Science program; students explore concepts of biology and medicine to determine factors that led to the death of a fictional person; students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life; activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems; course also stresses the proper paradigm for relating these concepts to secondary level students. Requirements: consent of UI Project Lead The Way director.

ENGR:7270 Engineering Ethics  
1 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.
ENGR:7604 Engineering Ethics for Post Docs 0 s.h.
Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.
Bachelor of Science in Engineering

Undergraduate major: B.S.E.
Website: http://www.engineering.uiowa.edu/

The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) with majors in biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. The undergraduate majors are designed to attract the best and brightest students and prepare them to be engineers who will succeed in a workplace filled with diverse people, attitudes, and ideas; to compete in the global marketplace; to work effectively in multidisciplinary teams; and to confidently understand, use, and develop modern technology.

All six B.S.E. programs of study are accredited by ABET (formerly known as Accreditation Board for Engineering and Technology). Each has its own set of articulated program educational objectives, and all are designed to ensure that graduates possess the following general attributes:

- ability to apply knowledge of mathematics, science, and engineering;
- ability to design and conduct experiments as well as to analyze and interpret data;
- ability to design a system, component, or process to meet desired needs;
- ability to function on multidisciplinary teams;
- understanding of professional and ethical responsibility;
- ability to communicate effectively in oral, written, and graphical forms;
- a broad education necessary to understand the impact of engineering solutions in a global and societal context;
- recognition of the need to engage in lifelong learning and the ability to do so;
- knowledge of contemporary issues; and
- ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs of study distinguish the College of Engineering from other engineering colleges in the region. They draw on the University’s recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All build on the University’s research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives (e.g., engineering practice, project management, research and development).

This Catalog section provides information about requirements that all B.S.E. students must fulfill, regardless of their engineering major, as well as admission information and academic rules and procedures.

Engineering students may earn more than one B.S.E. degree. They also may earn joint undergraduate degrees in the College of Liberal Arts and Sciences or the Tippie College of Business, a joint B.S.E./master's degree in urban and regional planning, or a joint B.S.E./M.S. in engineering; see "Joint and Dual Degrees" under Requirements [p. 1164] in this section of the Catalog.

Minors

Engineering students may complete minors in a number of disciplines. For instance, students interested in heading an engineering firm might choose to earn a minor in business administration. For a list of minors and links to the departments and programs that offer them, see Find Your Program and select undergraduate minors.

B.S.E. programs generally allow students to satisfy their elective focus area requirement by completing a minor. Students who choose this option must work closely with program advisors to ensure that the minor is compatible with their engineering career aspirations.

In order to have the minor noted on their transcript, students must designate that they have fulfilled a minor's requirements when they apply for degree on MyUI. See "Application for Degree" under Academic Rules and Procedures [p. 1158] in this section of the Catalog.

Certificates

Engineering students may earn certificates offered by colleges across the University. The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship [p. 1254], which is tailored specifically for engineering students who intend to start and operate their own business or who would like to understand and learn about managing innovation in business environments. The College of Engineering also teams with the College of Liberal Arts and Sciences to offer the undergraduate Certificate in Wind Energy [p. 1256], which introduces students to a developing field that has a growing need for professionals with knowledge of wind energy. The college also offers the Certificate in Naval Hydrodynamics [p. 1252]. Other certificates of particular interest to engineering students include the Certificate in International Business [p. 567] and the Certificate in Sustainability [p. 1655].

See Find Your Program and select undergraduate certificates for a complete list of certificates and links to their individual Catalog sections.

Cooperative Education and Internship Program

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional practice while they are still students. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of the day-to-day life of an engineer.

Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation. A portion of registered co-op and/or internship experience before graduation can be credited toward the experience requirements for professional licensure in Iowa and some other states.
Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half time while taking at least 6 s.h. of classes. The co-op experience may cover one to three semesters, a series of summer placements, or a single summer. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. Interested students and employers or organizations must register with the College of Engineering director of professional development. For details, see Engineering Professional Development on the College of Engineering website.

**Diversity and Inclusion in the College of Engineering**

The College of Engineering strives to be a national leader in including women and men of all races and ethnic groups in its student body and providing a model for other institutions that are interested in strengthening inclusion of all peoples in engineering. The Ethnic Inclusion Effort for Iowa Engineering develops integrative programs and activities which serve to build and nourish the engineering community. This includes support of diversity programming and diversity in student organizations. Women in Science and Engineering (WISE) offers a variety of services for undergraduate students including the WiSE Peer Mentoring Program and the Be-WISE Women in Science and Engineering Living-Learning Community (LLC). The Be-WISE-LLC is the University of Iowa’s longest continuously running living-learning community that provides academic and social support programming, as well as a positive community of scholars, for women majoring in STEM fields. To learn more, see Diversity at the UI College of Engineering on the college’s website.

**Student Organizations**

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college, including the electronic newsletter E-Week. Several engineering professional societies have student chapters at the University, as do a number of engineering honor societies. In addition, students may join a wide variety of engineering student organizations. Visit Student Organizations on the College of Engineering website for more information.

**Programs**

**Undergraduate Program of Study**

**Major**

- Bachelor of Science in Engineering [p. 1164]

**Academic Rules and Procedures**

**Academic Advising**

Undeclared engineering students and declared first-year students are advised by the staff of Engineering Student Services. After the first year, engineering students who have declared an academic program are advised by faculty advisors assigned to that program. Students may request a change of advisor when it is deemed appropriate. All students are required to have a conference with their advisors before registering for classes each semester.

**Application for Degree**

Students who wish to be considered for graduation must submit a Degree Application through MyUI the session before they are eligible to graduate or before the deadline date during the session in which their degree is to be conferred.

Students who do not graduate in the session they submitted their Degree Application must submit another application through MyUI for the next applicable session. Students do not need to be registered to apply for a degree.

See Applying for Degree on the Office of the Registrar website.

**Academic Recognition**

**Graduation with Honors**

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment. To be eligible for graduation with honors, students must be approved by a selected honors committee and the director of the honors program, and they must complete honors requirements. See "Honors in Engineering" under Requirements [p. 1164] in this section of the Catalog.

**Graduation with Distinction**

Graduation with distinction recognizes high academic achievement based on grades. The college awards degrees "with highest distinction" to students in the highest two percent of their graduating class, "with high distinction" to students in the next-highest three percent, and "with distinction" to students in the next-highest five percent. Ranking is based on students' grade-point average for all college-level study taken up to their final registration.

To be eligible to be considered for graduation with distinction, students must complete their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration. Students in the combined engineering/liberal arts and sciences program are eligible to graduate with distinction regardless of the college in which they complete their residency requirement.

**Dean's List**

Undergraduate students in the Colleges of Liberal Arts and Sciences and Engineering and the Tippie College of Business who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean’s List for that semester.

**President's List**

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded course work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President’s List.

**Academic Standards**

**Maximum Schedule**

During early registration, students may register for a maximum of 19 s.h. for a fall or spring semester, 12 s.h. for a summer session, or 3 s.h. for a winter session. Course schedules that exceed the maximum semester hours allowed...
require approval of the advising staff in Engineering Student Services. The Permission to Register for Additional Hours form is available online.

**Classification of Students**

Students in the College of Engineering are classified by the number of semester hours of credit they have earned toward the Bachelor of Science in Engineering.

- **First-year:** 0-29 s.h. earned toward the B.S.E.
- **Sophomore:** 30-59 s.h. earned toward the B.S.E.
- **Junior:** 60-89 s.h. earned toward the B.S.E.
- **Senior:** 90 s.h. or more earned toward the B.S.E.

**Grading System**

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

- **A-plus:** 4.33
- **A (superior):** 4.00
- **A-minus:** 3.67
- **B-plus:** 3.33
- **B (above average):** 3.00
- **B-minus:** 2.67
- **C-plus:** 2.33
- **C (average):** 2.00
- **C-minus:** 1.67
- **D-plus:** 1.33
- **D (below average):** 1.00
- **D-minus:** 0.67
- **F (failing):** 0

This grading system is used for all students in both undergraduate and graduate engineering courses. Grades of D-minus are passing grades; that is, courses completed with grades of D-minus or higher count toward collegiate requirements, with the exception of MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus, which have a minimum grade requirement of C-minus or higher.

**Academic Probation and Dismissal**

Students who do not achieve or surpass University of Iowa cumulative and semester minimum grade-point averages of 2.00 are placed on academic probation. Students on academic probation are restored to good standing when they successfully complete an additional 9 s.h. toward an engineering degree, either in one semester or cumulatively, and their University of Iowa cumulative and semester grade-point averages equal or exceed 2.00.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters. Students on academic probation are not permitted to continue their enrollment without written expectations for their future performance.

When all of the grade-point averages equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing. Students on academic probation who withdraw registration after the deadline to drop courses may be dismissed.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one calendar year. A written appeal for reinstatement must be submitted to the Appeals Committee at the Student Development Center. Appeals must be submitted before June 15 for reinstatement in a fall semester or before December 15 for reinstatement in a spring semester.

**Appeal Procedures**

Students in the College of Engineering who wish to appeal certain academic actions or records must submit their requests in writing to the Appeals Committee at the Student Development Center. Consult the college for specific mailing information.

Students submit their requests in writing but do not appear before the committee. The committee considers and recommends an action to the associate dean for undergraduate programs regarding each request. Each student filing an appeal will receive in writing a letter conveying the decisions of the committee. The decisions of the committee are final.

**Revocation of Dismissal Immediately after Dismissal is Imposed**

If extenuating circumstances, such as a disabling illness or a personal crisis, interfered with academic progress resulting in dismissal, a student may appeal for a revocation of the dismissal, based on careful and complete documentation of the extenuating circumstances.

**Reinstatement in the College**

Students dismissed from the college due to poor scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Students may file a written appeal for reinstatement to re-enroll after an interval of at least one full academic year.

**Retroactive Withdrawal from an Academic Semester or Summer Session**

Students requesting a retroactive withdrawal of a specific semester must provide documentation substantiating the
particular extenuating circumstance that occurred which was beyond their control.

**Letter Conditions**

Students filing an appeal should consider their letters carefully. The letters must meet the following conditions:

- be typewritten on 8 1/2" x 11" paper;
- include full name, student ID number, current address, and current date;
- use the salutation “Dear Committee Members”;
- be signed (unsigned letters will not be accepted and will cause a delay in the review of the appeal);
- be brief, clear, complete, and concise;
- state specifically the subject and nature of the appeal to be considered by the committee; and
- include supporting documentation of circumstances, including statements from health care professionals, if applicable.

Supporting letters documenting illness or special circumstances must be solicited by the student from appropriate sources. Students also may wish to contact their faculty advisor, department chair, instructor and/or employer for letters of reference. The supporting person(s) should send these letters directly to the Appeals Committee at the Student Development Center. Consult the college for specific mailing information.

The College of Engineering requests this information only for the purpose of ruling on the appeal. No persons outside the University are provided information without the student’s permission, except for items of directory information such as name and local address. If a student fails to provide the required information, the college will not be able to act on the appeal request.

**Dropping and Adding Courses**

Students may add or drop courses, except College of Law courses, any time before the deadline published in the University’s academic deadline calendar. Deadlines are different for regular and off-cycle courses. See Academic Calendar on the Office of the Registrar website. See Course Deadlines for course-specific deadlines.

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

**Withdrawing from Courses**

Undergraduates receive the mark of W for any course dropped after the second week of the semester or the first one-and-one-half weeks of the summer session. Students may not drop the same course with a mark of W more than twice. Special courses that may be repeated are exempt from this rule.

Students who have a legitimate reason for dropping a course (e.g., disabling illness, death of an immediate family member) and can document that reason are permitted to exclude that drop from the maximum, but the W is not removed from the record. Requests for such exclusions are made at Engineering Student Services.

**Withdraw of Registration**

Students who withdraw their entire registration must consult the staff at Engineering Student Services. A student on scholastic probation who withdraws registration at any time without good cause may not be permitted to enroll for the following semester without specific approval from Engineering Student Services staff. Withdrawal forms for students enrolled in the college are signed by the associate dean for academic programs.

**Prerequisites**

Undergraduate students must complete a course’s prerequisites. The registration system reads a student’s record, and if there is no evidence that the prerequisite has been completed or is in progress, the system automatically blocks enrollment. See Prerequisites on the Tippie College of Business website for more information about prerequisite policies and procedures.

**Pass/Non-Pass Option**

A maximum of two courses taken pass/nonpass (P/N) may be applied toward satisfaction of the general education (humanities and social sciences) requirement. P/N registration must be approved by the student’s advisor and the instructor of the course and must be completed during the first 10 days of a semester or the first two weeks of a summer session. P/N registration may not be changed after the deadline for adding courses. The pass/nonpass option may not be used for courses taken to satisfy the rhetoric requirement. Guided Independent Study courses taken for humanities or social science credit may not be taken P/N.

Students enrolled in courses taught in the College of Engineering may choose to be graded pass/nonpass under the following conditions:

- the signatures of the advisor and instructor must be obtained on the proper form, and the completed form must be submitted to the Registrar’s Service Center by the student within the time period established by University policy; and
- the mark of P (pass) is awarded where the final course grade earned was C-minus or higher; the mark of N (nonpass) is given for grades of D-plus or below; marks of P and N are not used in computing the grade-point average, and the mark of N does not count as earned credit.

No course work taken in the College of Engineering on the pass/nonpass option may be used to satisfy requirements for an engineering degree.

**Second-Grade-Only Option**

Students may elect to repeat a course with only the new grade being counted in their grade-point average. The option may be applied to no more than three courses, and it may be applied only once to a particular course. Transfer students may apply the option on a prorated basis.

A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully.

To exercise the second-grade-only option, students register as usual for the course that is to be repeated, then they complete a second-grade-only option form at Engineering Student Services. The Engineering Second Grade Option Form is available online. Students must complete the form during the session in which they repeat the course, within the first 12 weeks of the fall or spring semester or the first six weeks of the summer session. Students must follow this procedure or
both grades will be counted in their University of Iowa grade-point average.

Under the second-grade-only option, the registrar marks the permanent record to show that a particular course has been repeated. Both grades remain on the permanent record, but only the second is used in calculating the grade-point average and semester hours earned. The course must be taken the second time under the same circumstances and with the same grade option as it was taken the first time.

The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner. A student who holds a degree from the University of Iowa may not apply the second-grade-only option to a course taken before the degree was conferred.

Satisfactory/Fail, Satisfactory/ Unsatisfactory

The noncredit professional seminar courses required in each of the professional programs are offered only satisfactory/fail (S/F). No other engineering courses are offered on this basis. An F (fail) grade earned for such a class does not satisfy any portion of the professional seminar requirement.

Incomplete and No Report Grades

A mark of I (incomplete) that is not replaced by a final grade will automatically be converted to an F (fail) at the end of the next fall or spring semester (summer and winter sessions excluded), even if a student does not enroll after the session the incomplete was posted.

A mark of O (no grade reported) will remain on a student’s permanent record until a valid grade is submitted.

Credit by Examination

Students who have acquired knowledge in subject areas from sources other than formal course registrations may be granted credit toward graduation by examination, under the following conditions and limitations.

No more than 32 s.h. of credit by examination may be applied toward B.S.E. degree requirements.

College-Level Examination Program (CLEP) credit may be counted toward the lower-level general education (humanities and social science) requirements. CLEP credit earned in natural science areas does not count toward the engineering degree. Credit also may be earned through Advanced Placement (AP) Exams. For details about CLEP and AP credit, see Credit by Exam Options on the Office of Admissions website.

Engineering students may earn credit for equivalent experience or former course work in any of the required common core courses through successful completion of examinations prepared and graded by the core course committees. Students who fail a core course are not permitted to earn credit by examination for the failed course. Students who wish to earn credit for core courses by examination must obtain approval from the associate dean for academic programs.

With approval of the departmental faculty, credit in three or fewer courses (totaling no more than 6 s.h.) may be awarded upon successful completion of final examinations in program elective courses.

Language Incentive Program

The University’s Furthering Language Incentive Program (FLIP) gives entering engineering students two options for earning college credit for study of a world language.

Option 1: Entering students who place into a fifth-semester language course and complete the course with a grade of B-minus or higher receive 4 s.h. of exam credit for the fourth-semester course. The credit is ungraded but may be counted toward the hours required for graduation. Incentive credit is not granted for course work for which credit has been received.

Students are eligible for incentive credit only during their first and second registrations at the University of Iowa.

Option 2: Students may receive 2 s.h. of exam credit for earning a grade of B-minus or higher in a first-semester-level course in a language different from the language used to satisfy their world languages requirement. They may earn another 2 s.h. for completing the second-semester-level course in that language for a grade of B-minus or higher.

Visit the college’s website for more information about FLIP credit. For more information on eligibility and restrictions, consult Engineering Student Services.

Credit from Other Colleges

Course requirements in engineering may be satisfied with credit earned in courses taken in other University of Iowa colleges or at other accredited colleges or universities. When students apply for admission to the College of Engineering, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the Student Development Center either before or during the student’s first semester of enrollment in the college.

Satisfaction of engineering course requirements by transfer work may be approved by the Student Development Center if, course-by-course, there is a match in the content and level of the transfer courses, and if the grades earned for such courses are C-minus or higher. Students who want to satisfy the engineering general education component requirements or the University of Iowa rhetoric requirement by transfer work must follow the College of Engineering transfer credit guidelines.

Students planning to attend a two- or four-year institution before transferring to the College of Engineering should discuss the planned transfer with officials at both schools before embarking on a transfer program. The College of Engineering has recommended transfer course lists for most Iowa community colleges and some four-year colleges. Once students are enrolled in the College of Engineering, they must have prior approval for course work taken at other institutions.

Contact Engineering Student Services for more information.

By policy of the Board of Regents, State of Iowa, a student may apply a maximum of 64 s.h. of transfer credit earned at a two-year college toward the minimum 128 s.h. required for the B.S.E. However, transfer credit from a two-year school in excess of 64 s.h. is used in computing grade-point average and may be used to satisfy course requirements, even though the semester hours cannot be counted toward the total required for graduation. A grade of C-minus or higher is
required in order for transfer credit to be applied toward a degree requirement.

Course Substitutions
For students in the College of Engineering, the substitution of an alternate course for a required course requires the approval of a petition. The Petition/Substitution form is available on the college's website or at Engineering Student Services. The form must be completed by a student and must be approved by a student’s advisor and by the chair of the engineering program in which a student is majoring. If the petition involves a required engineering core course or a general education component course, then it also must be approved by Engineering Student Services. Substitutions for required engineering core courses should be made infrequently and only under compelling circumstances. Substitutions of courses that are required by a student’s program are governed by the faculty of that program; approval of these course substitutions is needed only from the faculty advisor and the department chair. All petitions must be forwarded to Engineering Student Services for inclusion in a student’s permanent file.

Auditing Courses
Students in the College of Engineering may register for a course for zero credit (audit) with the permission of the course instructor and the advisor. The mark of AUS (audit successful) is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a drop-add form is used. These changes must be made during the first three weeks of a semester or the first one-and-one-half weeks of a summer session.

Misconduct, Complaints
Student Academic Misconduct
The College of Engineering endorses the policies and rights of students as stated in Regulation 1 of the Code of Student Life General Conduct Regulations in the University of Iowa Code of Student Life. The College of Engineering reserves the authority to handle acts of academic misconduct as adopted by engineering faculty and staff.

The following regulations provide a procedure for dealing with students who are alleged to have committed an act of academic misconduct.

Guidelines for Disciplinary Action by an Instructor
Exams: In cases of cheating on midterm or final exams, it is recommended that the instructor reduce the student’s grade, including the assignment of the grade of F (fail) in the course. When a course grade has been reduced to an F (fail), the student may not drop the course, nor use the second-grade-only option procedure to eliminate the failing grade from semester and cumulative grade-point average values that appear on a student’s permanent record card.

It is recommended that cheating on quizzes be considered as serious a violation as on exams and that the penalty be similar. The instructor shall send a written report of any disciplinary action to the office of the dean and the report shall be placed in the student’s file.

Homework, lab reports, etc.: Each instructor shall announce at the beginning of each course the acceptable policies on student collaboration in each of the graded course requirements. When the policy is clearly violated, a O (no grade reported) shall be assigned for the total portion of the course grade allocated to the requirement in which the violation occurred; for example, a O (no grade reported) for all homework assignments if cheating occurred on a homework assignment. A written report of this action shall be sent by the instructor to the office of the dean and placed in the student’s file.

Student Appeal
When a written report of disciplinary action by an instructor is received by the office of the dean, the student shall be notified in writing of the action. If the student feels that the finding of cheating is in error or the penalty is unjust, the student may request a hearing by notifying in writing the associate dean of the college. If the student is not satisfied with the results of the hearing, the student may request a review by the associate provost for undergraduate education.

Disciplinary Action by the Dean
In cases of flagrant or a second offense, the dean of the college may impose the following or other penalties as the offense may warrant: cancellation of the student’s registration, disciplinary probation, suspension from the college, or recommendation of expulsion from the University by the president. If the student feels that the penalty imposed by the dean is unjust, the student may request a review by the office of the provost.

Record of Disciplinary Action
Reports of academic misconduct received by the office of the dean shall be placed in the student’s electronic file at the University of Iowa. The office of the dean shall notify the student of each report and the right of the student to request a hearing for review of the case.

Student Complaints Concerning Faculty Actions
Students with complaints against faculty should first attempt to resolve the issue with the faculty member against whom there is a complaint. Lacking a satisfactory outcome, the student should discuss the matter with the chair of the faculty member’s program, division, or department.

Students who are uncomfortable with dealing directly with a faculty member or a program/division chair may seek assistance from the College of Engineering Ombudsperson in seeking a resolution of a complaint. However, it is anticipated that grievances generally can be satisfactorily resolved most expeditiously at the faculty or chair level. If the student is not satisfied with the outcome of this procedure, the student should discuss the complaint with the associate dean for academic programs in the College of Engineering.
Admission

Applicants for admission to the College of Engineering as first-year students must have successfully completed at least four years of English/language arts; four years of mathematics, which must include at least two years of algebra, one year of geometry, and one year of higher mathematics (trigonometry, analysis, calculus); two years of a single foreign language; three years of natural science, which must include at least one year of chemistry and at least one year of physics; and at least two years of social studies. A high school computer programming course is recommended but not required.

Applicants are guaranteed admission to the College of Engineering if they have no high school unit deficiencies, an ACT composite score of 25 or higher, an ACT math score of 25 or higher, and a Regent Admission Index score of at least 265. Students who do not meet these requirements, or who attend a high school that does not rank its students, are encouraged to send recommendations from math and science teachers and a personal statement, which will be considered in an individual review by the College of Engineering.

Students who are admitted through the individual review process may be required to make up deficiencies by taking a lower-level course in their area of deficiency before enrolling in the first required course in that area. For example, students who have high math grades and standardized test scores, but who are deficient by one unit in mathematics, may be required to complete a course such as MATH:1020 Elementary Functions before enrolling in the first engineering calculus course.

Incoming first-year and transfer students who do not meet the foreign language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level foreign language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Information about admission to the College of Engineering is available on the college’s website.

Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed calculus I and the equivalent of either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculus-based physics). Overall grade-point average also is considered in transfer applications.

Information about admission requirements for transfer students is available on the college’s website.
Bachelor of Science in Engineering, B.S.E.

Requirements

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the UI College of Engineering for the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

Engineering students earn the B.S.E. degree in one of six undergraduate programs of study (majors): biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, or mechanical engineering.

All students complete a core of common B.S.E. requirements, usually during their first three semesters; see “Core Requirements” below. They also must complete a curriculum—a set of required and elective courses—designed specifically for their major program. The curriculum prepares students to practice engineering in that program’s field of engineering. It is designed by the program’s faculty members according to guidelines provided by the national accrediting body of ABET.

Each program’s curriculum is divided into four major stems: mathematics and basic sciences; engineering topics; an elective focus area; and the general education component (humanities and social sciences). All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem. See “Curriculum Stems” below.

Courses below the level of the beginning courses in each program’s curriculum count toward students’ overall grade-point averages and are recorded on their transcripts, but they do not count toward requirements for the B.S.E. degree.

Core Requirements

All B.S.E. students must complete a core of courses that constitute approximately one-third of the courses required for the degree. They complete most of the core during their first three semesters, so most students may postpone making a decision about which engineering major to pursue or may change their engineering major during their first three semesters with little or no loss of time or credit.

The core includes RHET:1030 Rhetoric, a first-year course in writing, speaking, and critical reading; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II, which cover a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming; and courses in chemistry, engineering mathematics and fundamentals, and physics. Students must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

Students should complete the core requirements according to the following three-semester plan. Those who do not follow this plan may encounter a delay in graduation because of scheduling problems for courses that must be taken in a specific sequence or that are offered only once a year.

Requirements for Each Engineering Major

The curriculum for each B.S.E. major is described in that program’s departmental Catalog section; see Biomedical Engineering [p. 1170], Chemical and Biochemical Engineering [p. 1181], Civil and Environmental Engineering [p. 1195], Electrical and Computer Engineering [p. 1211], or Mechanical and Industrial Engineering [p. 1227].
Each program's curriculum is divided into four major stems, which are described below.

Curriculum Stems

The curriculum for each B.S.E. program of study is divided into four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (humanities and social sciences). All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem.

Mathematics and Basic Sciences

The mathematics and basic sciences stem provides the foundation upon which the engineering courses for each engineering major are based. It includes a minimum of five courses in mathematics and statistics and one each in chemistry and physics. The faculty of each engineering program has specified at least one additional chemistry or physics course and other additional mathematics or science courses beyond these minimum requirements to provide a base appropriate for the program's major.

Engineering Topics (Science and Design)

The engineering topics stem builds upon the math and science stem, providing a bridge from fundamental principles to applications and creative practice.

The stem's engineering science courses use the underlying principles learned in the mathematics and basic sciences stem to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits, as well as other engineering courses relevant to each major.

The stem's engineering design courses focus on the process of devising a system, component, or process to meet a stated objective. Engineering design integrates decision making and the optimal application of basic sciences, mathematics, and engineering sciences to reach a desired outcome. Elements of the design process include the establishment of objectives and criteria, synthesis, analysis, construction, testing, evaluation, and consideration of realistic constraints such as economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact.

Elective Focus Area

The elective focus area stem provides a set amount of credit that students use to build strength in a technical focus area by completing a minor, earning a certificate, or pursuing a tailored program of study.

Students choose elective focus area courses consistent with traditional career goals or nontraditional career goals. Their choice of degree plan and courses may affect the number and type of employment opportunities available to them after graduation. Program advisors help students develop coherent, well-focused plans that fit their goals.

Students who pursue a traditional focus area may replace up to 21 s.h. of traditional technical electives with course work toward a minor or certificate. Students who choose nontraditional focus areas work closely with an advisor to build a rigorous, well-focused program. They must define and justify their career goals; provide a detailed plan of study and obtain their B.S.E. program's approval for the plan before beginning the plan's course work; and complete the plan as approved.

Each B.S.E. program is responsible for approving proposed plans of study, ensuring that the program's ABET accreditation criteria are met, and that students' choices are consistent with their career aspirations and with the college's educational mission.

Guidelines for elective focus areas vary by program. For details, see Engineering Curriculum Guides on the college's website.

General Education Component

The general education component stem promotes understanding of and appreciation for community, culture, and learning through course work. All summer 2015 incoming students and those admitted later are held to the following requirements.

Students earn 15 s.h. in courses chosen from approved departments and programs as outlined below.

Completion of at least 3 s.h. from the "Be Creative" course list as follows.

Completion of at least 9 s.h. as follows.

The remaining general education component courses can be selected from the "Be Creative" list, from courses in the seven College of Liberal Arts and Sciences General Education Program areas above, or from the College of Engineering approved course subject list. See General Education Component for departments and programs that offer approved courses. Most general education component courses are offered by the College of Liberal Arts and Sciences.

Credit may be earned by examination; see Academic Rules and Procedures [p. 1158] in this section of the Catalog.

Students who enter the College of Engineering with a B.A. or B.S. are considered to have satisfied the general education component requirement.

Students who enroll in a joint degree program in the College of Engineering and the College of Liberal Arts and Sciences or the Tippie College of Business are considered to have satisfied the College of Engineering's general education requirement once they have completed all requirements for the liberal arts and sciences degree or the business degree.

**Honors in Engineering**

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a B.S.E. with honors, which is noted on the student's transcript. See the College of Engineering Honors Education Opportunities website for details.

In addition to honors in engineering, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

**Second B.S.E. Degree**

Current College of Engineering students and recent graduates may earn a second Bachelor of Science in Engineering. The second degree must include all courses required by the second engineering degree program, including the senior-level design course sequence and any specific social science elective requirements. Elective focus area courses selected for the second B.S.E. must be of a variety and level that permit students to meet at least the minimal level of competence usually expected of graduates of that program.

Students must file an academic study plan, which must be approved by the faculty of the second degree program, submitted to the Student Development Center, and placed in a student's permanent file before a student may begin course work in the second B.S.E. The study plan should include a list of the courses to be taken in the second program along with a list of the courses already completed and yet to be completed.
for the first engineering degree program. Any changes in the plan must be approved by a student's faculty advisor in the second program and by the department chair of that program (the college petition form may be used for this purpose), submitted to the Student Development Center, and placed in a student's permanent file.

**Joint and Dual Degrees**

**Joint B.B.A./B.S.E.**

The College of Engineering and the Tippie College of Business offer a joint degree program in which students earn two University of Iowa bachelor’s degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the joint program must complete all requirements for both degrees, including general education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on a student’s choice of major study areas.

Students in the joint B.B.A./B.S.E. program should consult with their advisors about whether the second-grade-only option is available to them.

Students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the joint degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact Engineering Student Services.

For information about the B.B.A., including requirements for the degree, see Bachelor of Business Administration [p. 927] (Tippie College of Business) in the Catalog.

**Joint B.S.E./Liberal Arts and Sciences Degree**

Students may earn two University of Iowa bachelor’s degrees in a joint program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in joint degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences General Education Program [p. 437] and the College of Engineering general education component.

Students in the joint program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the joint degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the joint degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the joint degree program. Joint degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to his or her engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact Engineering Student Services for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences [p. 17] in the Catalog and select majors in departments from the college index.

**B.S./B.S.E. Dual Degree with Northern Iowa**

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all course work and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of course work at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the general education requirements. Credit for courses passed with a grade of C or higher is transferred to the University of Iowa as credit for equivalent courses there.

At the University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Course work completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution’s B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the University’s established deadlines.

**Joint B.S.E./M.S. in Engineering**

Engineering students may be eligible to enroll in one of the College of Engineering’s joint B.S.E./M.S. programs, which allow students to begin working toward a master’s degree in engineering while they are completing the bachelor’s degree. The joint programs, which are offered by each of the college’s departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See “Joint
Joint B.S.E./M.A. or M.S. in Urban and Regional Planning

The College of Engineering and the School of Urban and Regional Planning offer the joint Bachelor of Science in Engineering/Master of Arts or Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the joint program has two advisors, one in engineering and one in urban and regional planning. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their B.S.E. program during the first two years and begin adding courses from the urban and regional planning program during the third year. Successful students receive a B.S.E. at the end of the fourth year and an M.A. or M.S. in urban and regional planning at the end of the fifth year.

Students in the joint program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.A. or M.S. in urban and regional planning.

See Urban and Regional Planning [p. 1316] (Graduate College) in the Catalog for information about the graduate degree. Contact Engineering Student Services for information about applying to the joint program.

## Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. EPD offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Biomedical Engineering

Chair
• Nicole M. Grosland

Undergraduate major: biomedical engineering (B.S.E.)
Graduate degrees: M.S. in biomedical engineering; Ph.D. in biomedical engineering
Faculty: http://www.engineering.uiowa.edu/bme/people/faculty-bme
Website: http://www.engineering.uiowa.edu/bme

The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.

The Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.

Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields. Several faculty members have joint appointments in biomedical engineering and in the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

Facilities

Undergraduate Teaching Laboratories
Six dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: Biomaterials Laboratory, Biomeasurements and Biosystems Laboratory, Biomechanics Laboratory, the Carver Biomechanics and Mechanobiology Laboratory, Cell Biology for Engineers Laboratory, and Senior Design Laboratory.

Biomaterials
The Biomaterials Laboratory is equipped to test varied properties of biomaterials, including hard and soft tissues and prostheses. The laboratory is used for BME:2500 Biomaterials and Biomechanics and other biomaterials courses, BME:5421 Cell Material Interactions, and senior design projects.

Biomeasurements and Biosystems
The Biomeasurements and Biosystems Laboratory is equipped to measure biomedical variables of clinical and physiological interest, design and build electronic instrumentation, and conduct modeling experiments in physiology. It is used for BME:2200 Systems, Instrumentation, and Data Acquisition, BME:2210 Bioimaging and Bioinformatics, elective courses in biomeasurements and biological systems analysis, senior design projects, and demonstrations in BME:2110 Cell Biology for Engineers.

Biomechanics
The Biomechanics Laboratory is equipped to perform experiments relating to the cardiovascular and human musculoskeletal systems. The laboratory houses two cone-and-plate viscometers; compact stress-strain devices for characterizing cardiovascular tissues; digital still, video, and motion-capture cameras for kinematic analysis; goniometers; a ski binding tester; a drop tower for impact testing; a dual-mode amplifier system; two 3-D printers; a table-top material testing machine; and dissecting tools. The lab is used for BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and musculoskeletal biomechanics, other elective courses, and senior design projects.

Carver Biomechanics and Mechanobiology Laboratory
The Carver Biomechanics and Mechanobiology Laboratory (CBML) is a shared resource in the Department of Biomedical Engineering with a mission to enhance teaching, training, and research in the field of biomechanics and mechanobiology. Biomechanics and mechanobiology is the study of how cells, fluids, tissues, and organs respond to physical forces. It contributes to the understanding of cardiovascular disease, cancer metastasis, wound healing, medical device function, and stem cell therapies.

The lab houses a planar biaxial stress-strain test apparatus, a pulse duplicator apparatus for characterizing blood flow through mechanical and tissue heart valves, a micro-PIV system for quantifying flow and particle dynamics at the micro-scale, a stent crimper for characterizing vascular stent designs, a multimode plate reader for quantifying cell activity and ECM remodeling, a lyophilizer for quantifying elastin and collagen content in soft tissue samples, a micromanipulator for performing micropipette aspiration studies, and a controlled microscope room for imaging live cells over long durations. The lab is used for courses in cardiovascular biomechanics and cellular engineering, other elective courses, and senior design projects.

Cell Biology for Engineers
The Cell Biology for Engineers Laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future studies in quantitative cell-based research problems in the life and health sciences.
studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, adenovirus-mediated gene transfer techniques, microarray and analysis, and polymerase chain reaction (PCR) analysis of nucleic acids. They also are introduced to bioinformatics techniques used in cell biology. Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and varied support apparatuses used in cell-based studies. The lab is used for BME:2110 Cell Biology for Engineers, BME:4120 Advanced Cell Biology for Engineers, and BME:5421 Cell Material Interactions.

**Senior Design**

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

**Research Facilities and Laboratories**

**Bioinformatics and Computational Biology Laboratory**

The Bioinformatics and Computational Biology Laboratory is equipped for computational and research needs. It includes four compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental purposes. In addition, the Bioinformatics Laboratory is equipped with a high-speed network (10- and 100-megabit and gigabit ethernet), hardwired and wireless, and ATM. It includes five dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 100 gigabytes of RAM, and 2.5 terabytes of disk space.

Computer resources include a dedicated computer server cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet—eight Dual AMD MP-2400 (2.2 GHz, 2 GB memory, 40 GB disk each); second dedicated computer server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet—12 Dual Pentium III (500 MHz, 1 GB memory, 9 GB disk each), and four Dual Pentium III (500 MHz, 2 GB memory, 9 GB disk each); and third dedicated computer cluster of nine Linux systems (18 CPUs) connected with a dedicated 2.4 GB multistage intranet—eight Dual Pentium III (866 MHz, 5 GB memory, 45 GB disk each), and one Dual Pentium III (866 MHz, 1 GB memory, 45 GB disk each).

There are two additional clusters: an 8-node cluster of Pentium II class machines and a 12-system heterogeneous cluster of various SUNs, HPs, and SGIs; four dedicated, dual fiber channel, redundant disk storage systems (RAID) with 412 GB usable each. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

**Cardiovascular Biomechanics Laboratory**

The Cardiovascular Biomechanics Laboratory houses an EMS Whitest uniaxial tension/compression testing system, a pulse-duplicating apparatus with flow loop, a spectrophotometer, silicone prototype fabrication utilities, high-speed/high-resolution cameras, a Sun Solaris workstation, and personal computers. The lab is equipped for soft tissue tensile/compression testing and viscoelastic creep/relaxation testing; simulation of flow through fabricated, anatomically realistic, patient-specific models of vasculature and heart valves; quantification of protein content in soft tissues; fabrication of realistic, compliant prototypes of human organs; and computational modeling of hemodynamics and tissue mechanics of normal and pathological cardiovascular organs.

**Jolt/Vibration/Seating Laboratory**

The Jolt/Vibration/Seating Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to low back pain due to the interaction between people and equipment in jolt (impact) and vibration environments. Shakers are available to simulate impact and vibration environments. Human responses are measured using equipment including load cells, electromyography, accelerometry, position sensors, and pressure pads. Portable sensors and data recorders are used to evaluate impact and vibration environments in the field and compare them to domestic and international guidelines and standards.

**Large Scale Digital Cell Analysis Laboratory**

The Large Scale Digital Cell Analysis System (LSDCAS) is an automated microscopy system designed to perform non-perturbing live cell imaging. LSDCAS has been in studies designed to determine mechanisms of cell death following treatment with anti-cancer therapies. Current studies involve the adaptation of the LSDCAS technology towards the development of automatic single-cell analysis techniques to be used in drug discovery. LSDCAS consists of two computer-controlled inverted Hoffman modulation contrast microscopes outfitted with environmental control chambers, motorized stages, shutters, focusing systems, and high-resolution digital camera systems.

LSDCAS is housed in a dedicated microscopy room that provides the dark environment necessary for systems that operate around the clock automatically recording cell growth and other phenomena. LSDCAS data is stored and analyzed using a data center consisting of an 8 processor Linux server with 16 gigabytes of RAM, a 30 terabyte hardware RAID storage system, and a 30 terabyte robotic tape backup system. Web application software and many other programs provide robust analysis capabilities for the large variety of data produced by the system. The LSDCAS codebase contains over one hundred thousand lines of program code developed over the past two decades to provide automatic single cell analysis capabilities of general interest in cell biology. In addition, the lab has equipment and technologies generally used in cell and molecular biology, including protein and nucleic acid gel electrophoresis analysis systems, real-time RT-PCR systems, cell culture incubators, a laminar flow cell culture biosafety cabinet, a chemical fume hood, -80C freezer, other refrigerators and freezers, an ice machine, water purification system, autoclave, and many other tools, reagents, and devices.

**Multiscale Modeling, Mechanobiology, and Tissue Engineering Laboratory**

The Multiscale Modeling, Mechanobiology, and Tissue Engineering Laboratory is equipped for computational and
experimental investigations centered on the role of physical forces in directing cell-material interactions that govern biological phenomena across multiple scales. A 650-square-foot core wet lab has equipment for isolating, culturing, maintaining, and analyzing cells, including a Nu-Aire two-chamber incubator, lab refrigerator and freezer, and a Thermo Scientific 1300 Series class II, type A2 biological safety cabinet. A 120-square-foot microscopy room houses an ADMET BioTense top-mounted perfusion bioreactor that integrates with a Nikon Ti-E inverted microscope, a system equipped to simultaneously record force values and acquire images of cell-to-extracellular matrix interactions in 3-D environments (e.g., a collagen gel) at high magnification over long periods of time and under a suite of mechanical testing protocols. The MTESTQuattro material testing system and accompanying software controls the bioreactor temperature, drives the actuator, and records force. The system can be operated in load or displacement control, supplying monotonic, cyclic, or segmented control profiles. Both the microscope and bioreactor are interfaced with an HP Z210 convertible minitower base model workstation.

Orthopaedic Biomechanics Laboratory

The Orthopaedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

Regenerative Engineering Laboratory

The Regenerative Engineering Laboratory inhabits over 1000 square feet of the Pappajohn Biomedical Discovery Building. The lab is fully equipped to support research at the interface of materials, engineering, and cell biology. The BSL2 cell culture room in the lab has two Panasonic cell culture incubators, two thermo biological safety cabinets, a fluorescent microscope, 37°C bead bath, and centrifuges. A culture incubator, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

Spine Research Laboratory

The Spine Research Laboratory is equipped for interdisciplinary research. The lab's MTS Bionix servohydraulic testing equipment (with extended columns) permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The lab also has a fully automated 3-D motion measuring system.

These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., LVDTs, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture, in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

Courses

Biomedical Engineering Courses

BME:0000 Biomedical Engineering Internship/Co-op 0 s.h.
Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

BME:1010 First-Year Forum 1 s.h.
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

BME:2010 Professional Seminar: Biomedical Engineering 1 s.h.
Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.

BME:2110 Cell Biology for Engineers 3 s.h.
Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2200 Systems, Instrumentation, and Data Acquisition 4 s.h.
Introduction to engineering art and science of modeling, acquisition, and analysis of data collected from living systems; modeling of physiological and biological systems; concepts of analog circuit design, with emphasis on circuits for collecting data for biomedical applications using operational amplifiers, active filters, conversion, and interface to microcomputers; patient safety; clinical circuits; analysis of data using time domain and Fourier domain techniques and models; time domain sampling, and Nyquist sampling theorem. Prerequisites: ENGR:2120. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.
BME:2210 Bioimaging and Bioinformatics 4 s.h.
Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: ENGR:1300 and BIOL:1411. Corequisites: BIOS:4120 or STAT:3510. Same as IGPI:2210.

BME:2500 Biomaterials and Biomechanics 4 s.h.
Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: BIOS:4120 or STAT:3510.

BME:2710 Engineering Drawing, Design, and Solid Modeling 3 s.h.
Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3-D CAD software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3-D solid parametric design for assembly and 3-D drawing documentation; creation of 3-D assemblies and detailed drawings from art of design to part, utilization of solid modeling techniques.

BME:3010 Leadership and Resourcefulness 1 s.h.
Development of leadership skills and resourcefulness for real-world professional work and life. Requirements: completion of BME:1010 and two semesters of BME:2010.

BME:3200 Systems Biology for Biomedical Engineers 3 s.h.
Although systems biology is comprised of both experimental and computational aspects, this course focuses on the latter; introduction to deterministic models of biochemical reaction networks; computational models constructed using Wolfram System Modeler—a software tool that works with Mathematica—and on known biochemical reaction networks and associated rate data; development of biologically-realistic models that can be analyzed using System Modeler to provide insights into the complexities of biochemical reaction networks, with an emphasis on biological regulation at the biochemical level. Prerequisites: BME:2110 and BME:2200.

BME:3998 Individual Investigations: Biomedical Engineering arr.
Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

BME:4010 Biomedical Engineering Design Seminar 1 s.h.
Information and presentations about possible projects; mentors available for senior design projects. Requirements: junior standing.

BME:4110 Principles of Regenerative Bioengineering arr.
Embryonic, fetal, and adult sources, human and nonhuman “stemness” of cells; references to biomaterials (i.e., those designed to direct organization, growth, and differentiation of cells in process of forming functional tissue by providing physical and chemical cues); biomarkers and nano-medicine; promises of bioinformatics in support tissue engineering, gene and protein sequencing, gene expression analysis, protein expression, and interaction analysis. Prerequisites: BIOL:1411. Corequisites: HHP:3500. Recommendations: BME:2110.

BME:4111 Fundamentals of NanoScale Technologies in Regenerative Bioengineering 1 s.h.
Nanotechnology as an emerging field in the quest to better and more affordable health care; experimentation and development of new materials that benefit regenerative medicine; targeted drug delivery and enhanced tissue engineering as a priority in pursuit of new approaches in tissue and organ transplantation; state-of-the-art new technologies applied to role of stem cells and biomedical engineering in future health care; seminar with reading and comments of significant journal articles in the field. Prerequisites: BME:4110.

BME:4112 Methods in Regenerative Bioengineering and NanoScale Technology 3 s.h.
Nanotechnology as an emerging field in the quest to better and more affordable health care; experimentation and development of new materials that benefit regenerative medicine; targeted drug delivery and enhanced tissue engineering as a priority in pursuit of new approaches in tissue and organ transplantation; state-of-the-art new technologies applied to role of stem cells and biomedical engineering in future health care. Prerequisites: BIOL:1411. Corequisites: HHP:3500. Recommendations: BME:2110.

BME:4120 Advanced Cell Biology for Engineers 3 s.h.
Introduction to techniques and quantitative analysis used in cell biology and taught from cell engineering perspective; focus on isolation, intracellular localization, and determination of mRNA levels of specific cellular proteins; analysis of resulting data and interpret reliability of results; laboratory course. Prerequisites: BME:2110.

BME:4310 Computational Biochemistry 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOC:3110 or BIOC:3120. Same as BIOC:4310.

BME:4910 Biomedical Engineering Senior Design I 4 s.h.
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: BIOS:4120 or STAT:3510. Requirements: senior standing.

BME:4920 Biomedical Engineering Senior Design II 4 s.h.
Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.
BME:5010 Seminar in Biomedical Engineering 0 s.h.
Presentation of recent advances in biomedical engineering. Requirements: graduate standing.

BME:5020 Seminar in Bioinformatics 1 s.h.
Forum for research presentations by scientists with national and international prominence; broad range of research topics in bioinformatics, genomics, and high-throughput biology; sponsored by the NIH T32 Bioinformatics Predoctoral Training Program at the University of Iowa. Same as IGPI:5020.

BME:5200 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as IGPI:5212.

BME:5210 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as IGPI:5206.

BME:5220 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5480, IGPI:5480.

BME:5230 Multidimensional Medical Imaging Process 3 s.h.
Algorithms developed to process and analyze large volumetric data sets; physics of CT, MRI, ultrasound, 3-D convolution and filtering, geometric transformations, shape features, surface segmentation, regional segmentation, surface tiling, surface reconstruction, volumetric registration. Third in a medical imaging sequence. Prerequisites: ENGR:1300.

BME:5251 Advanced Biosystems 3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as IGPI:5251.

BME:5252 Health Informatics II 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as IE:5870, IGPI:5210, RSNM:5301.

BME:5320 Bioinformatics Techniques 3 s.h.
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and ENGR:1300. Same as ECE:5210, IGPI:5321.

BME:5330 Computational Genomics 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and BME:5320 and (CS:3110 or ENGR:1300). Same as BIOL:5320, ECE:5220, GEN:5173, IGPI:5330.

BME:5340 Contemporary Topics in Biomedical Engineering 3 s.h.
New and emerging areas of biomedical engineering and related fields; specific content varies.

BME:5401 Biomaterials and Implant Design 3 s.h.
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites: ENGR:2750 and BME:2500.

BME:5415 Polymer Fundamentals 1 s.h.
Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as CBE:5309.

BME:5421 Cell Material Interactions 3 s.h.
Current thought and techniques in the engineering and assessment of biomaterials. Prerequisites: BME:2110.

BME:5430 Biotransport 3 s.h.
Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications.

BME:5510 Cardiac and Vascular Mechanics 3 s.h.
Bio-solid mechanics of the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; design of artificial organs, prostheses. Prerequisites: ENGR:2750 and BME:2500.

BME:5520 Cardiovascular Fluid Mechanics 3 s.h.
BME:5530 Design of Circulatory Implants and Artificial Organs 3 s.h.
Exploration of current innovations and new technologies; examination of various devices currently on the market from a standpoint of design variables and objectives (i.e., stents, heart valves, dialyzers, VADs, artificial organs); biomedical engineers' vital role in design and improvement of these implants. Prerequisites: BME:2500.

BME:5540 Quantitative Studies of Respiratory and Cardiovascular Systems 3 s.h.
Quantitative physiological aspects of respiratory and cardiovascular systems; classical models of these systems are considered including lumped element models, branching tree structures, and distributed parameter models to predict wave propagation in compliant walled tubes filled with compressible or incompressible fluids; development of extensive computer models to simulate the behavior of these systems in frequency- and time-domains, under various conditions of health and disease. Prerequisites: BME:2200 and HHP:3500.

BME:5550 Cardiovascular Tissue Mechanics 3 s.h.
Solid mechanics principles applied to understand behavior of tissues in the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; solid mechanics of tissue-prosthesis interactions. Prerequisites: ENGR:2750 and BME:2500.

BME:5560 Introduction to Applied Biomedical Finite Element Modeling 3 s.h.
Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisites: ENGR:2750 and BME:2500.

BME:55630 Kinetics of Musculoskeletal Systems 3 s.h.
Principles of kinematics; kinetics applied to analytical and experimental investigation of musculoskeletal systems; mathematical foundations for kinematic and kinetic analyses; examples of mathematical modeling of human movements. Prerequisites: ENGR:2710.

BME:55640 Ergonomics of Occupational Injuries 3 s.h.
Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500. Corequisites: ENGR:2750.

BME:55660 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540, ME:5150.

BME:55720 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as CEE:5236, ME:5236.

BME:5910 Fast-Track Biomedical Engineering Design 1-A 3 s.h.
Part A of first semester of year-long senior capstone design project; individual or group design project involving biomedical engineering problems. Corequisites: BME:5911. Requirements: senior standing.

BME:5911 Fast-Track Biomedical Engineering Design 1-B 1 s.h.
Part B of first semester of year-long senior capstone design project; individual or group project involving biomedical engineering problems. Corequisites: BME:5910. Requirements: senior standing.

BME:5920 Fast-Track Biomedical Engineering Design 2-A 3 s.h.

BME:5921 Fast-Track Biomedical Engineering Design 2-B 1 s.h.

BME:5998 Individual Investigations: Biomedical Engineering arr.
Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

BME:5999 Research: Biomedical Engineering M.S. Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Requirements: graduate standing.

BME:6110 Mechanics of Cells and Cellular Systems 3 s.h.
Mechanics of cells; focus on cellular mechanical properties, responses to mechanical stimuli, cellular forces and measurement, and computational tools; cellular environment considered with implication to disease pathologies and medical device design considerations.

BME:6120 Advanced Topics in Regenerative Bioengineering and NanoScale Biotechnology 3 s.h.
Continuation of BME:4110 with in-depth examples and approaches; development of organs through stem cells maturation and differentiation complemented by biomedical applications; fundamental concepts of stem cell biology applied to modern technology; reference to biomaterials (those designed to direct organization, growth, and differentiation of cells); concept of biomarkers and nanomedicine based on the notion that new materials can be engineered to not interfere with normal biological conditions and unique enough to be detected non-invasively with modern diagnostic instruments (CT, MRI, Echo). Prerequisites: BME:2110 or BME:4110.

BME:6415 Advanced Biomechanics and Modeling of Soft Tissues 3 s.h.
Application of continuum mechanics and modeling to study of biological tissues and biomaterials.

BME:6515 Advanced Biological Soft Tissue Mechanics 3 s.h.
Topics in vascular solid mechanics; study of vascular tissue from theoretical (constitutive modeling), experimental, and computational perspectives.
BME:6520 Advanced Biofluid Mechanics 3 s.h.
Hemodynamic theories of atherogenesis, Womersley models, steady and unsteady flows in curvature, bifurcation and branching arterial segments, flow dynamics past prosthetic implants, experimental and computational models, particulate and mass transport simulations in human circulation.
Prerequisites: BME:5520.

BME:6610 Spine Mechanics 3 s.h.
Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis.
Prerequisites: BME:5610.

BME:6630 Human Response to Vibration 3 s.h.
Exploration of the human body, a complex mechanism exposed to mechanical shock and vibration from many sources, under many conditions; interactions and applicable exposure standards, effects of whole-body and hand-arm vibration. Requirements: graduate standing in College of Engineering or College of Public Health.

BME:7999 Research: Biomedical Engineering Ph.D. Dissertation arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering.
Biomedical Engineering, B.S.E.

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- contribute to the biomedical field through the responsible design of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- advance to leadership positions in their chosen field.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in biomedical engineering builds on the foundation provided by the B.S.E. core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate [p. 1258] College. Students whose choice of electives includes a three-course sequence in organic chemistry, an additional biology course, and a biochemistry course may satisfy entrance requirements of the Carver College of Medicine [p. 1348], the College of Dentistry [p. 1003], or the allied health sciences.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

Students also complete the curriculum designed for their major program, which covers four stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog.

Biomedical engineering students must choose a track, which constitutes the elective focus area for the biomedical engineering major. They may choose one of four preapproved tracks—bioinformatics and computational biology, bioimaging, biomechanics and biomaterials, and cellular engineering. Each track may be designated pre-medicine by taking the necessary track electives. Each approved track has a group of four required courses and a list of suggested electives. For details about tracks and their requirements, visit Tracks on the department's website.

Joint B.S.E./M.S.

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn an M.S. in biomedical engineering. This program allows students to count 12 s.h. toward the undergraduate and graduate degree and begin work on a master's thesis or research project while they are still undergraduates. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. in their fifth year of study.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.50, and must submit a letter of application to the chair of the Department of Biomedical Engineering stating the intended area of specialization and a letter of support from the proposed M.S. advisor.

Joint B.S.E./M.S. in Occupational and Environmental Health

B.S.E. students majoring in biomedical engineering (musculoskeletal biomechanics track) who are interested in earning a Master of Science in occupational and environmental health (industrial hygiene subprogram) may apply to the joint B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The joint program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. For information about the M.S. program, see Occupational and Environmental Health [p. 1567] (College of Public Health) in the Catalog.

Academic Plans

The following study plan includes the B.S.E. core requirements and the curriculum for the biomedical engineering major. Some courses in this plan are prerequisites for others. Students must complete a course's prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

**Career Advancement**

B.S.E. graduates with a major in biomedical engineering may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life-support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Biomedical Engineering, M.S.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background and career objectives, and sound academic practice.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. M.S. students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments in the College of Engineering and the University.

Requirements

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. The M.S. may be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. A student's plan of study is reviewed by the committee before the student has completed 18 s.h. of course work. The plan of study then is submitted for review to the department chair.

M.S. students must fulfill the grade-point-average requirements of the Graduate College on a minimum of 30 s.h. of graduate work and must successfully complete the final examination administered by their committee.

M.S. students (thesis or nonthesis) must complete the following courses or their equivalents.

<table>

</tbody>
</table>

Individual study plans should include as much advanced work as individual aptitude and previous preparation permit.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences, with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 310 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the Master of Science program in biomedical engineering.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

Financial Support

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

Career Advancement

The Graduate College at the University of Iowa offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Professional Development on the Graduate College website.
Biomedical Engineering, Ph.D.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background and career objectives, and sound academic practice.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Faculty members in the department have teaching and research expertise in cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate course work and research topic.

Requirements

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal course work taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and the thesis. Students who enter with an M.S. may count a maximum of 33 s.h. of approved transfer credit toward the Ph.D., but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least 12 s.h. for research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal course work to strengthen perceived areas of weakness.

Ph.D. students must complete the following courses or their equivalents.

</tbody>
</table>

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the course work specified in the plan of study and with the required grade-point average and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

Financial Support

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

Career Advancement

The Graduate College at the University of Iowa offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Professional Development on the Graduate College website.
Chemical and Biochemical Engineering

Chair
- C. Allan Guymon

Undergraduate major: chemical engineering (B.S.E.)
Graduate degrees: M.S. in chemical and biochemical engineering; Ph.D. in chemical and biochemical engineering

Faculty: http://www.engineering.uiowa.edu/cbe/people/faculty-cbe
Website: http://www.engineering.uiowa.edu/cbe/

Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences—chemistry, the biological sciences, and physics—to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and bioenergy fuels (e.g., biodiesel or ethanol) fall within the realm of chemical engineering. Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products. Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrups in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa’s curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

- Doctor of Philosophy in Chemical and Biochemical Engineering [p. 1192]

Facilities

Undergraduate Core

Materials Science Laboratory
The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

Required Undergraduate Laboratories

Chemical Engineering Laboratory
The Chemical Engineering Laboratory provides instruction for undergraduate students in CBE:3150 Thermodynamics/Transport Laboratory and CBE:3155 Chemical Reaction Engineering/Separations Laboratory. It is equipped for experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. The lab includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, fluid friction apparatus, and heat conduction apparatus. Analytical equipment includes gas chromatographs, UV/visible spectrophotometers, polarimeters, and refractometers.

The lab is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

Chemical Process Safety Laboratory

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. It is equipped with two Miniflash automatic flash point tester (closed cap), an advanced reactive system screening tool (ARSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

Biochemical Engineering Laboratory

The Biochemical Engineering Laboratory is an integral part of CBE:5205 Introduction to Biochemical Engineering. It is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, three New Brunswick C76 Water Bath Shakers, a UV/visible spectrometer, a Thermo Scientific Nanodrop 3300 fluorospectrometer, and a YSI 2700 Select Biochemistry Analyzer. This equipment is used to study the growth and metabolism of microorganisms and recombinant protein production.

Process Control Laboratory

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to CBE:4105 Process Dynamics and Control in Design. The lab consists of computer control of a shell-and-tube heat exchanger, and a level-and-flow control process rig with state-of-the-art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment. Additional laboratories provide instruction in the use of process
simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and multicapacitance processes; approximations of multicapacitance systems as first-order and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the lab are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

Air Pollution Computational, Field, and Laboratory Studies

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of lab and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center’s computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including Arc/Info, Arcview, NCAR Graphics, Matlab, S-Plus, and Vis5d, as well as geographical information software. The ESRI software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizes for aerosols from 3 nm to 1 micron with time resolution to 30 seconds; aerosol particle sizes for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for RH and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through Labview.

Selected instruments are field deployable in a custom air-conditioned trailer. Through collaboration with the IHRR—Hydroscience & Engineering, access to micrometeorology sensors, 1-D and 2-D elastic and Raman LIDAR, and gas sensors is available, including multichannel ammonia monitors.

Biochemical Engineering

Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for PCR amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high-performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules. In addition, the lab has multiple extremophile cultivation systems including a high-pressure (0.1-100 MPa) cell cultivation system, several continuous cultivation systems, and high-temperature oil bath shakers for physiological studies of extremophile microbes.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

Biomedical Engineering

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle size, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high-performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.

Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

Computer Facilities

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college’s Engineering Computer Services, which maintains a large network of high-performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University’s central research facility in high-speed vector computation. This facility
has SGI Power Challenger minisupercomputers and provides nodes for external links for access to supercomputers.

Fundamentals and Applications of Photopolymerization

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction; characterization of high-speed propagation and termination kinetics that lead to the polymer structure; and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

Courses

Chemical and Biochemical Engineering Courses

CBE:0000 Chemical Engineering Internship/Co-op 0 s.h.
Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

CBE:1000 CBE Departmental Seminar 1 s.h.
Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

CBE:1180 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

CBE:2030 Energy and Society 3 s.h.
History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.

CBE:2050 Severe and Unusual Weather 3 s.h.
Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage.

CBE:2105 Process Calculations 3 s.h.
Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

CBE:3000 Professional Seminar: Chemical Engineering 1 s.h.
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: CBE:2105. Requirements: Sophomore standing.

CBE:3105 Chemical Engineering Thermodynamics 3 s.h.
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.

CBE:3110 Engineering Flow and Heat Exchange 3 s.h.
Fundamentals of fluid flow and heat transfer; fluid rheology, boundary layer theory, potential flow, dimensional analysis, laminar and turbulent flow in pipes, flow through packed beds, fluidized beds, pumps, flow measurement, filtration, heat exchanger design, and conductive, convective, and radiative heat transfer. Corequisites: CBE:2105.

CBE:3115 Mass Transfer and Separations 3 s.h.
Mechanisms of diffusional mass transfer; solution of industrial problems, including the design of distillation, extraction, absorption, adsorption, drying, membrane processes; mechanical separations. Prerequisites: CBE:3110 and CBE:3105.

CBE:3120 Chemical Reaction Engineering 3 s.h.
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites: CBE:3115.

CBE:3125 Chemical Process Safety 3 s.h.
Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: CBE:3115. Corequisites: CBE:3120.
CBE:3150 Thermodynamics/Transport Laboratory 3 s.h.

CBE:3152 Environmental Chemistry I 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:3152.

CBE:3155 Chemical Reaction Engineering/Separations Laboratory 2 s.h.
Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3115 and CBE:3150. Corequisites: CBE:3120.

CBE:3160 Engineering Analysis of Alternative Energy Systems 3 s.h.
Engineering and sustainability analyses of conventional and emerging energy technologies; alternative energy sources, including biomass, wind, solar, geothermal; alternative energy carriers (transportation fuels), including varied biofuels, hydrogen, natural gas, ammonia. Prerequisites: ENGR:2130.

CBE:3998 Individual Investigations: Chemical Engineering arr.
Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

CBE:4105 Process Dynamics and Control in Design 3 s.h.
Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: CBE:3120.

CBE:4109 Chemical Engineering Process Design I 2 s.h.
Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: CBE:3115 and CBE:3120 and CBE:3125.

CBE:4110 Chemical Engineering Process Design II 3 s.h.
Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: CBE:4109.

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as ACB:4156, EES:4156.

CBE:4195 Senior Enriching Activities Seminar 0 s.h.
Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110.

CBE:4410 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

CBE:4459 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: CEE:2150. Same as CEE:4159, IGPI:4159.

CBE:5000 Seminar in Chemical and Biochemical Engineering 1 s.h.
Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

CBE:5100 Graduate Professional Development Seminar 1 s.h.
Seminar participants work with a faculty member to select and attend eight hours of approved seminars and professional development trainings at the University of Iowa; final meeting of participants is held to share notable seminars; typical seminar series include College of Engineering lectures, departmental and research center graduate seminars, the CBE professional seminar series, offerings of the Center for Teaching and Learning. Requirements: CBE masters standing.

CBE:5104 Introduction to Literature Review and Technical Writing 3 s.h.
Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.

CBE:5105 Introduction to Literature Review and Proposal Writing 3 s.h.
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.

CBE:5110 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as ME:5210.

CBE:5115 Transport Phenomena I 3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.
CBE:5140 Mathematical Methods in Engineering 3 s.h.

CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering arr.
Research techniques for graduate students in chemical and biochemical engineering.

CBE:5205 Introduction to Biochemical Engineering 3 s.h.
Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:3120.

CBE:5210 Bioseparations 3 s.h.
Unit operations used to isolate and purify biologically-derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.

CBE:5215 Advanced Biochemical Engineering 3 s.h.
Advanced concepts regarding behavior of biological systems used in modern technologies (e.g., food processing, pharmaceutical production, environmental remediation, chemical synthesis): principles of biochemical engineering applied to design, development, and analysis of processes that use biocatalysts; second in series addressing engineering aspects of biotechnology. Recommendations: CBE:5205.

CBE:5240 CEBC Colloquium 1 s.h.
Sustainable development issues addressed by guest speakers from chemical industries; process economics, environmental impact assessment.

CBE:5250 Introduction to Biocatalysis 3 s.h.
Applications of biological catalysis in varied industries; potential of biological catalysis to address future challenges in science and engineering.

CBE:5300 Drug Delivery Devices 3 s.h.
Why drug delivery devices are needed and how they are regulated; review of several clinical device categories (inhalation, transdermal, implantable) and preclinical technologies on the horizon.

CBE:5309 Polymer Fundamentals 1 s.h.
Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as BME:5415.

CBE:5310 Polymer Science and Technology 3 s.h.
Uses, properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, polymer processing. Prerequisites: CHEM:2220. Corequisites: CBE:3120.

CBE:5315 Polymer Chemistry 3 s.h.
Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: CHEM:2220.

CBE:5390 Photopolymerization Topics 1 s.h.
Seminars presented by faculty members, research assistants, students.

CBE:5405 Green Chemical and Energy Technologies 3 s.h.
Strategies for pollution prevention for chemical processes studied at the macroscale (industrial sector), the mesoscale (unit operations), and the microscale (molecular level); case studies. Prerequisites: CBE:2105.

CBE:5415 Satellite Image Processing and Remote Sensing of Atmosphere 3 s.h.
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents.

CBE:5425 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources and removal processes. Corequisites: CBE:3120. Same as CEE:5115.

CBE:5875 Perspectives in Biocatalysis 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CBE:5998 Individual Investigations: Chemical and Biochemical Engineering arr.
Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Requirements: graduate standing.

CBE:6145 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

CBE:6210 Biotechnology of Extremophiles 3 s.h.
Evolution and engineering of biocatalysis under extreme conditions; physiological, kinetic, and molecular behavior of systems that perform under extremes of temperature, pH, salinity, pressure, solvent concentrations.

CBE:7999 Research: Chemical and Biochemical Engineering Ph.D. Dissertation arr.
Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering.
Chemical Engineering, B.S.E.

The undergraduate program in chemical engineering produces graduates who have a strong foundation of scientific and technical knowledge and are equipped with problem solving, teamwork, and communication skills that will serve them throughout their careers, consistent with the following educational objectives.

Within a few years of graduation, the program’s graduates will:

• attain careers as practicing chemical engineers in fields such as pharmaceuticals, microelectronics, chemicals, polymers/advanced materials, food processing, energy, biotechnology, and environmental engineering;
• attain advanced studies in disciplines such as chemical engineering, environmental engineering, medicine, law, and business; and
• assume professional leadership roles.

The undergraduate program in chemical engineering uses the following methods and strategies to achieve its educational objectives:

• foster a personalized, supportive environment for all students by taking advantage of the unique combination of a small college atmosphere in a major research university;
• enrich the undergraduate experience through cultural diversity and international opportunities or experiential learning;
• provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
• provide students with experience in learning and applying tools (e.g., computer skills) to solve theoretical and open-ended chemical engineering problems;
• provide students with opportunities to participate in multidisciplinary teams and to develop and practice written and oral communication skills, both within the team and to a broader audience;
• provide students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints; and
• provide a contemporary grounding in professional responsibility, including ethics, the global and societal impact of engineering decisions, and the need for lifelong learning.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in chemical engineering provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog. Seminars do not count toward the 128 s.h. required for the degree.

For chemical engineering students, the sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, engineering flow and heat exchange, chemical engineering thermodynamics, mass transfer and separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship [p. 1254], or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of science, engineering, humanities, and social science electives. Several preapproved elective focus areas may help students define potential careers.

Students must select elective area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. See ”Elective Focus Area” below.

Elective Focus Area

The elective focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved elective focus areas in biochemical engineering, pharmaceutics, chemical process engineering, polymers, energy and environment, sustainability, pre-medicine, business, and entrepreneurship.

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department’s curriculum committee. See Chemical Engineering Curriculum on the Department of Chemical and Biochemical Engineering website for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

Joint B.S.E./M.S.

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn an M.S. in chemical and biochemical engineering. B.S.E./M.S. students may count 12 s.h. of course work (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the
bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application and statement of purpose to the chair of the Department of Chemical and Biochemical Engineering. Visit B.S./M.S. Programs on the department’s website to learn more.

### Academic Plans

The following study plan includes the B.S.E. core requirements and the curriculum for the chemical engineering major. Some courses in this plan are prerequisites for others. Students must complete a course's prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

### Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93-98 percent of
graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE).

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Chemical and Biochemical Engineering, M.S.

Graduate students in the Department of Chemical and Biochemical Engineering gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials and medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

Biochemical Engineering

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Carbon dioxide accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth. The department’s researchers are investigating the corresponding effect on insect cell growth and the baculovirus infection process.

The department works to design technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are under way. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The department also conducts research in structural enzymology, molecular mechanisms of host-pathogen interactions, and biocatalysis. The laboratory uses biophysical, structural, and molecular biology techniques to understand the details of enzyme action. This information is used to design and engineer biocatalysts for the production of chiral compounds. Work also is under way on cellular recognition and signaling processing during infection and inflammation. Knowledge gained from these studies aids the design of drugs and biological sensors for bacterial presence.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry and Biology (College of Liberal Arts and Sciences); the Departments of Biochemistry and Microbiology and the Free Radical and Radiation Biology Program (Carver College of Medicine); and the College of Pharmacy. This focus includes involvement in the University’s Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

Biomedical Research

The department’s research involves a multidisciplinary approach to solving problems in the medical field, particularly in drug delivery and biomaterials.

Researchers are working to develop safe delivery systems that target drugs precisely in the human body and avoid premature metabolization or elimination. To treat respiratory infections, micron-sized particles are being engineered with properties that enhance aerodynamic performance, particle stability, and targeting within the respiratory tract. Polymeric vehicles are being designed to provide sustained protection and prevention against cancers by kick-starting the immune system. Finally, work is under way to overcome barriers to efficient delivery of DNA, with the potential to provide cures for genetic disorders such as cystic fibrosis and X-Linked Severe Combined Immunodeficiency (X-SCID). This work brings together collaborators from the Carver College of Medicine, the Colleges of Dentistry and Pharmacy, and the Departments of Chemistry and Biomedical Engineering.

In the biomaterials realm, new materials are being developed that can interact with the human body to perform certain functions while maintaining compatibility. A project with the Department of Ophthalmology and Visual Sciences involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology—Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells to improve cochlear implants. Current research in the tissue engineering field applies microfabrication techniques to develop scaffolds that are biodegradable and biocompatible with cell-interactive properties, and that directly incorporate controlled-release functionality within the scaffold.

The department also conducts research that is focused on self-assembling systems, rational design of novel drug and gene delivery systems, and development of sophisticated scaffolds for tissue-specific regeneration. In tissue engineering, microfabrication techniques are applied to novel biomaterials to provide spatial control over tissue formation and to integrate minimally invasive scaffold delivery strategies. In drug and gene delivery, researchers are exploring the synergistic application of degradable particle technology, CpG oligonucleotides, and heat-shock protein therapy for generating sustained, stronger immune responses against carcinomas.
Students involved in animal research have access to the University’s Office of Animal Resources, which is adjacent to University of Iowa Hospitals and Clinics.

**Energy and Environment**

Chemical engineers are well-suited to make major contributions toward meeting challenges for the environment, energy, and sustainable development. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO2 fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves three centers and institutes on campus. The Center for Global and Regional Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center’s chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IIHR—Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience and Nanotechnology Institute provides an interdisciplinary home for chemical and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

**Photopolymerization**

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department’s research in this area focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

Chemical and biochemical engineering researchers are members of the Photopolymerization Center, an industry/university cooperative center on fundamentals and applications of photopolymerization. The center brings together experts from the University of Iowa, the University of Colorado, and member companies such as 3M, DSM, and Boeing. In addition, interdisciplinary collaborations are fostered on campus through the Optical Science and Technology Center, which oversees a seminar series, an annual symposium, training at the Microfabrication Facility, and equipment use in shared facilities.

**Requirements**

The Master of Science program in chemical and biochemical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. All M.S. students must earn at least 24 s.h. in approved graduate-level course work; courses numbered below 3000 do not count toward this requirement. Thesis students earn 6 s.h. in CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved course work and are required to complete four core courses with a g.p.a. above 3.25 for those courses.

M.S. students must maintain a graduate g.p.a. of at least 3.00. Each thesis student must pass a final M.S. examination. There is no world languages requirement.

Graduate students who receive assistantships, fellowships, or other financial support awarded with the understanding that they will pursue an advanced degree with thesis may not elect the nonthesis option.

Graduate students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the graduate admissions committee. If approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they were newly admitted graduate students. For a detailed description of program requirements, see CBE Graduate Program on the Department of Chemical and Biochemical Engineering website.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants should have a B.S. in chemical engineering or related discipline, with satisfactory grades, from a recognized college or university in the United States, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair’s approval. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their applications.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.
Financial Support

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, chemical and biochemical engineering students interact with students and faculty members from biochemistry, biology, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology.

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. The engineering profession also is a foundation for a variety of careers in medicine, law, government, and consulting. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Chemical and Biochemical Engineering, Ph.D.

Graduate students in the Department of Chemical and Biochemical Engineering gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials and medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

Biochemical Engineering

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Carbon dioxide accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth. The department's researchers are investigating the corresponding effect on insect cell growth and the baculovirus infection process.

The department works to design technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are under way. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The department also conducts research in structural enzymology, molecular mechanisms of host-pathogen interactions, and biocatalysis. The laboratory uses biophysical, structural, and molecular biology techniques to understand the details of enzyme action. This information is used to design and engineer biocatalysts for the production of chiral compounds. Work also is under way on cellular recognition and signaling processing during infection and inflammation. Knowledge gained from these studies aids the design of drugs and biological sensors for bacterial presence.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry and Biology (College of Liberal Arts and Sciences); the Departments of Biochemistry and Microbiology and the Free Radical and Radiation Biology Program (Carver College of Medicine); and the College of Pharmacy. This focus includes involvement in the University's Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

Biomedical Research

The department's research involves a multidisciplinary approach to solving problems in the medical field, particularly in drug delivery and biomaterials.

Researchers are working to develop safe delivery systems that target drugs precisely in the human body and avoid premature metabolization or elimination. To treat respiratory infections, micron-sized particles are being engineered with properties that enhance aerodynamic performance, particle stability, and targeting within the respiratory tract. Polymeric vehicles are being designed to provide sustained protection and prevention against cancers by kick-starting the immune system. Finally, work is under way to overcome barriers to efficient delivery of DNA, with the potential to provide cures for genetic disorders such as cystic fibrosis and X-Linked Severe Combined Immunodeficiency (X-SCID). This work brings together collaborators from the Carver College of Medicine, the Colleges of Dentistry and Pharmacy, and the Departments of Chemistry and Biomedical Engineering.

In the biomaterials realm, new materials are being developed that can interact with the human body to perform certain functions while maintaining compatibility. A project with the Department of Ophthalmology and Visual Sciences involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology—Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells to improve cochlear implants. Current research in the tissue engineering field applies microfabrication techniques to develop scaffolds that are biodegradable and biocompatible with cell-interactive properties, and that directly incorporate controlled-release functionality within the scaffold.

The department also conducts research that is focused on self-assembling systems, rational design of novel drug and gene delivery systems, and development of sophisticated scaffolds for tissue-specific regeneration. In tissue engineering, microfabrication techniques are applied to novel biomaterials to provide spatial control over tissue formation and to integrate minimally invasive scaffold delivery strategies. In drug and gene delivery, researchers are exploring the synergistic application of degradable particle technology, CpG oligonucleotides, and heat-shock protein therapy for generating sustained, stronger immune responses against carcinomas.
Students involved in animal research have access to the University's Office of Animal Resources, which is adjacent to University of Iowa Hospitals and Clinics.

Energy and Environment

Chemical engineers are well-suited to make major contributions toward meeting challenges for the environment, energy, and sustainable development. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO2 fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. This work involves three centers and institutes on campus. The Center for Global and Regional Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center's chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IHR—Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience and Nanotechnology Institute provides an interdisciplinary home for chemical and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

Photopolymerization

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department's research in this area focuses on comprehensive characterization of the kinetics, mechanisms, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

Chemical and biochemical engineering researchers are members of the Photopolymerization Center, an industry/university cooperative center on fundamentals and applications of photopolymerization. The center brings together experts from the University of Iowa, the University of Colorado, and member companies such as 3M, DSM, and Boeing. In addition, interdisciplinary collaborations are fostered on campus through the Optical Science and Technology Center, which oversees a seminar series, an annual symposium, training at the Microfabrication Facility, and equipment use in shared facilities.

Requirements

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Candidates usually are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree.

All candidates must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course on proposal writing, and a thermodynamics course, as well as six additional courses (total of 30 s.h.). There is no world languages requirement.

Ph.D. candidates must maintain a graduate g.p.a. of at least 3.25.

All doctoral students are required to satisfy a qualifying requirement and pass a comprehensive examination before they can become candidates for the degree. The Ph.D. comprehensive examination is the presentation and defense of the candidate's Ph.D. research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College. A final examination, which is a defense of the thesis, completes the doctoral program. For a detailed description of program requirements, see CBE Graduate Program on the Department of Chemical and Biochemical Engineering website.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Applicants should have a B.S. in chemical engineering or related discipline, with satisfactory grades, from a recognized college or university in the United States, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair's approval. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their applications.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Civil and Environmental Engineering

Chair
• Michelle Scherer

Undergraduate major: civil engineering (B.S.E.)
Graduate degrees: M.S. in civil and environmental engineering; Ph.D. in civil and environmental engineering
Faculty: http://www.engineering.uiowa.edu/cee/people/faculty-cee
Website: http://www.engineering.uiowa.edu/cee/

Civil engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth, prevent erosion and sedimentation of our rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air and our surface waters and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

In addition to the degree programs offered by the Department of Civil and Environmental Engineering, the department also participates in two Graduate College programs: Applied Mathematical and Computational Sciences [p. 1267], an interdisciplinary doctoral program; and Transportation Studies [p. 1314], a graduate certificate program.

Certificate in Wind Energy
The Departments of Mechanical and Industrial Engineering, Civil and Environmental Engineering, and Electrical and Computer Engineering (College of Engineering) and the Department of Geographical and Sustainability Sciences (College of Liberal Arts and Sciences) administer the undergraduate certificate program in wind energy; see Wind Energy [p. 1256] in the Catalog.

Related Certificate: Transportation Studies
The Transportation Studies Program offers the Certificate in Transportation Studies, which requires 18 s.h. of graduate credit. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Mechanical and Industrial Engineering, and Geographical and Sustainability Sciences and the School of Urban and Regional Planning participate in the program.

The certificate is coordinated by the School of Urban and Regional Planning. See Transportation Studies [p. 1314] for more information about the certificate.

Programs

Undergraduate Program of Study
Major
• Major in Civil Engineering (Bachelor of Science in Engineering) [p. 1204]

Graduate Programs of Study
Majors
• Master of Science in Civil and Environmental Engineering [p. 1207]
• Doctor of Philosophy in Civil and Environmental Engineering [p. 1209]

Facilities

Undergraduate Core
The first-year engineering course ENGR:1100 Engineering Problem Solving I includes an introduction to the college’s Engineering Computer Services. Students in the course use computer-aided design tools on engineering work stations. All civil engineering courses require knowledge of personal computers and contain significant computer content.

For information about laboratories affiliated with core courses coordinated by other engineering departments, see the Catalog section for each of the departments.

Required and Elective Undergraduate Laboratories
CEE:2015 Civil and Environmental Engineering Practice (2 s.h.), CEE:3763 Principles of Transportation Engineering (3 s.h.), and CEE:3084 Project Design and Management in Civil Engineering (3 s.h.): use of a state-of-the-art laboratory for computer-aided design and drawing.
CEE:3530 Soil Mechanics (3 s.h.): equipped for determining the classification, seepage characteristics, stress-strain properties, and strength of soils.
CEE:3155 Principles of Environmental Engineering (4 s.h.): conducted at the University Water Treatment Plant and Iowa City Wastewater Plant for demonstrations of unit operations and processes of water and wastewater treatment, and applications in environmental chemistry and microbiology.
CxEE:3371 Principles of Hydraulics and Hydrology (3 s.h.): hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, with laboratory.

CxEE:3586 Civil Engineering Materials (3 s.h.): structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber.

CxEE:4153 Environmental Chemistry Laboratory (3 s.h.): experiments to demonstrate fundamental principles of aquatic chemistry and chemical analyses for characterization of water and wastewater quality, conducted in the Environmental Engineering Laboratories.

CxEE:5154 Environmental Microbiology (3 s.h.): typical microorganisms isolated and their physiology and metabolic characteristics studied in the Environmental Engineering Laboratories.

CxEE:5156 Physical-Chemical Process Fundamentals (3 s.h.) and CxEE:4151 Biological Treatment Processes (3 s.h.): unit operations, processes studied in bench scale experiments; use of typical process analytical parameters; experiments conducted in the Environmental Engineering Laboratories, University Water Plant, and Iowa City Wastewater Treatment Plant.

Graduate Laboratories
Environmental Engineering and Science

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The labs support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University’s Center for Health Effects of Environmental Contamination and its Center for Global and Regional Environmental Research, and with the UI Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

Hydraulics, Hydrology, and Water Resources

The teaching and research functions of the department are closely connected to the research activities of IIHR—Hydroscience & Engineering. The institute houses some of the most robust research facilities in the world, including a 100-meter towing tank, a wave basin facility for ship hydrodynamics research, several flumes, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, state-of-the-art instrumentation for flow measurements and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. IIHR—Hydroscience & Engineering operates the 250-square-foot facility, which is located on the Mississippi River near Muscatine, Iowa. The station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. It is equipped with water quality laboratories, research boats, and a seminar room.

Structures, Mechanics, and Materials

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of Engineering Computer Services and the Center for Computer-Aided Design (CCAD). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities is available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing also are available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access through CCAD to a six-degree-of-freedom man-rated shaker table with 4000-pound payload and a 12-camera Vicon motion-capture system.

Transportation Engineering

The department’s Asphalt Laboratory is equipped with a set of SuperPave testing equipment and asphalt mixture performance testing equipment, which can measure dynamic modulus and flow number of asphalt mixtures. The lab has a Hamburg Wheel Tracking Device for measuring the moisture sensitivity of asphalt mixtures; asphalt foaming equipment for mix design of cold in-place recycled asphalt using foamed asphalt; and equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures. The Asphalt Laboratory is one of the department’s group of laboratories for testing the strength behavior of other materials.

Courses
Civil and Environmental Engineering Courses

CxEE:0000 Civil Engineering Internship/Co-op 0 s.h.
Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record card. Requirements: admission to the Cooperative Education Program.
**CEE:1030 Introduction to Earth Science**  
3-4 s.h.  
Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as EES:1030.

**CEE:1031 Introduction to Earth Science Laboratory**  
1 s.h.  
Laboratory component of EES:1030. Requirements: completion of 3 s.h. in EES:1030 or CEE:1030. Same as EES:1031.

**CEE:2000 CEE Sophomore Seminar**  
0 s.h.  
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, faculty, and professionals; lifelong learning skills and requirements for professional licensure in civil engineering. Requirements: sophomore standing.

**CEE:2015 Civil and Environmental Engineering Practice**  
2 s.h.  
Concepts of the built environment and the natural environment; infrastructure life cycle; engineering communication (plans, engineering drawings and information systems, computer-aided drafting); field trip to major city.

**CEE:2150 Natural Environmental Systems**  
3-4 s.h.  
Environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting. Prerequisites: CHEM:1110. Same as GHS:2150.

**CEE:2240 Digital Drafting with AutoCAD**  
3 s.h.  
Basic principles of 2-D and 3-D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: CERM:2010 or SCLP:2810 or TDSN:2210 or MTLS:2910. Same as TDSN:2240.

**CEE:3001 Leadership Seminar**  
1 s.h.  
Survey of leadership ideas and principles as applied to situations commonly encountered in civil engineering practice, especially as they relate to challenges that beginning engineers face; speakers in selected engineering professions provide context and examples; exercises on leadership principles. Requirements: junior standing in civil and environmental engineering.

**CEE:3002 Technical Communication in CEE**  
1 s.h.  
Development of communication skills through writing and oral presentations; impact of engineering solutions in a global, economic, environmental, and societal context; writings and presentations on current or historical engineering solutions; exposure to professionals with significant experiences to share in these areas. Requirements: junior standing.

**CEE:3003 Senior Design Seminar**  
1 s.h.  
Review and extension of civil and environmental engineering project management skills in preparation for capstone senior design course; project scheduling, cost estimating, contract types, construction phasing; review for Fundamentals of Engineering Exam (FE) and practice tests in four disciplinary areas. Requirements: senior standing.

**CEE:3084 Project Design and Management in Civil Engineering**  
3 s.h.  
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Prerequisites: CEE:3763 and CEE:3533 and CEE:3371 and CEE:3155 and CEE:3003. Requirements: senior standing.

**CEE:3136 Design of Concrete Structures**  
3 s.h.  
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Corequisites: CEE:3533.

**CEE:3141 Design With the Developing World**  
3 s.h.  
Experience working on interdisciplinary teams to solve problems of the developing world; technologies for improving water and sanitation, energy, housing, and health; community building strategies, participatory methods, other techniques essential to good design; service-learning component. Recommendations: junior or higher standing. Same as GHS:3141.

**CEE:3142 Quality Control**  
3 s.h.  
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020. Same as IE:3600, STAT:3620.

**CEE:3152 Environmental Chemistry I**  
3 s.h.  
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CBE:3152.

**CEE:3155 Principles of Environmental Engineering**  
4 s.h.  
Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Corequisites: CEE:2150.

**CEE:3328 Fluvial Geomorphology**  
3 s.h.  
Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: EES:3020 or another 3000-level geology or hydrogeology course. Same as EES:3380.

**CEE:3371 Principles of Hydraulics and Hydrology**  
3 s.h.  
Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: ENGR:2510.

**CEE:3530 Soil Mechanics**  
3 s.h.  
Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: ENGR:2750.
CEE:3533 Principles of Structural Engineering 3 s.h.
Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: ENGR:2750.

CEE:3586 Civil Engineering Materials 3 s.h.
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: ENGR:2750.

CEE:3763 Principles of Transportation Engineering 3 s.h.
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Corequisites: CEE:2015.

CEE:3783 Surveying and Remote Sensing 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisites: ENGR:1100.

CEE:3790 Resilient Infrastructure and Emergency Response 3 s.h.
Concepts of resilient cities with specific emphasis on role of infrastructure and built environment; risk analysis, hazard mitigation and emergency response to various threats; resiliency through good design.

CEE:3998 Individual Investigations: Civil Engineering arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

CEE:4097 Topics in Teaching and Learning 1 s.h.
Overview of Iowa's hydroclimate; emphasis on discharge, rainfall, and temperature; how to address basic research questions related to Iowa's climate and extreme events; hands-on exercises.

CEE:4102 Groundwater 3 s.h.
Groundwater quality and quantity; Darcy's Law, 2-D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.

CEE:4103 Water Quality 3 s.h.
Sources, availability, uses, characteristics, criteria, best management practices for surface waters; protection of waters impaired by eutrophication, soil erosion and sedimentation; pathogenic organisms, habitat destruction, wastewater discharges, contaminated sediments, atmospheric deposition, watershed development, invasive species, irrigation return flows, stormwater discharges, nonpoint sources, agricultural runoff; laboratory component, measurement of water quality characteristics in the field. Requirements: junior or higher standing.

CEE:4104 Groundwater Modeling 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and (EES:4630 or CEE:4103). Same as EES:4660.

CEE:4107 Sustainable Systems 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CBE:4410.

CEE:4116 Computer-Aided Design for Civil and Environmental Engineering 3 s.h.
Introduction to engineering design process and graphical communications tools used by civil engineers; fundamentals of engineering drawing, descriptive geometry, multiview projection, graphical analysis, coordinate systems, database manipulation, building information modeling (BIM); AutoCAD. Prerequisites: CEE:2015. Requirements: civil and environmental engineering major.

CEE:4118 Probabilistic Methods in Hydroscience 3 s.h.
Common probabilistic models used in hydrology, hydraulics, and water resources; derived distributions; multivariate models and estimation of model parameters; analysis of data and model building; uncertainty analysis. Prerequisites: STAT:2020 and MATH:2560.

CEE:4119 Hydrology 3 s.h.
Overview of fundamental processes in water cycle, including precipitation, evaporation, infiltration, and runoff; quantitative approaches for predicting streamflow and design discharges; applications to flood hazard assessment and stormwater management. Prerequisites: ENGR:2510.

CEE:4120 Water Resources Sustainability 3 s.h.
Effect of human impact on hydrologic ecosystems (aquifers, watersheds, coastal zones, lakes, and wetlands); quantitative measures of impact and mitigation/attenuation efforts; key questions addressed (What does water resources sustainability mean? How can it be measured? How can it be implemented?); worldwide case studies that illustrate the detrimental effects of unsustainable resource utilization and the benefits of implementing sustainable resource management strategies.

CEE:4123 Hydroclimatology 3 s.h.
Introduction to fundamental processes governing climate system and hydrological cycle, links between them; measurements of atmospheric and terrestrial components; atmosphere-ocean interactions (e.g., El Nino, Pacific Decadal Oscillation); teleconnections; climatology of atmospheric storms and impacts (e.g., atmospheric rivers, tropical cyclones, floods, droughts); climate change and variability; tools for analysis of climate data. Recommendations: CEE:4118, CEE:4119, CEE:4180, and CEE:4378.

CEE:4131 Impacts of Technological Singularity 3 s.h.
Technological singularity—what it is, its current standing, impacts, implications; bio-, nano-, and information technologies; how new technologies affect sustainability; ethical issues raised by technologies.

CEE:4135 Structural Modeling and Health Monitoring 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: CEE:3533 and ENGR:2750.
CEE:4166 Multiscale Hydrology: Introduction to Multiscale Hydrologic Phenomena 3 s.h.
Hydrologic principles over the last century developed from experimentation at laboratory and small plot scales; major scientific and engineering challenges, including links between statistical fluctuations that data extracts; physical, chemical, and biological principles through appropriate mathematical theories, numerical models, and field observations; coupled hydrologic processes at larger scales using newly built on abstraction; observations used in hydrologic engineering at larger scales for several decades and missing a coherent theory that ties them together. Prerequisites: MATH:6600 and ENGR:2510. Requirements: three semesters of calculus and college physics, an introductory hydrology course, and a probability and statistics course.

CEE:4147 Decentralized Wastewater Treatment 3 s.h.
Established and innovative technologies used in decentralized wastewater treatment; lagoons, constructed wetlands, sand filters, and other ecological technologies appropriate for small wastewater flows; need for more sustainable treatment of small wastewater flows; Iowa’s approximately 739 unsewered communities throughout the state, high-growth areas surrounding Des Moines and Cedar Rapids-Iowa City corridor with small developments in need of wastewater treatment, developing countries. Prerequisites: CEE:2150 and CEE:3155 and CEE:3371.

CEE:4151 Biological Treatment Processes 3 s.h.

CEE:4153 Environmental Chemistry Laboratory 3 s.h.
Laboratory experiments to demonstrate important concepts in environmental chemistry and to familiarize students with procedures used to characterize water and wastewater and evaluate certain treatment processes. Prerequisites: CHEM:1120. Corequisites: CEE:5152.

CEE:4157 Environmental Engineering Design 3 s.h.
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: CEE:3155.

CEE:4158 Solid and Hazardous Wastes 3 s.h.
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for CEE:4158 -- CEE:2150, for OEH:4920 -- OEH:4240. Same as OEH:4920.

CEE:4159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: CEE:2150. Same as CEE:4459, IGPI:4159.

CEE:4160 Introduction to Bridge Engineering 3 s.h.
Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: CEE:3533.

CEE:4162 Structural Systems for Buildings 3 s.h.
Detailed analysis and design of gravity and lateral force resisting systems for buildings; roof, floor, and bearing wall gravity systems; steel braced frames, steel and concrete moment frames, and masonry and timber shear walls lateral systems; introduction to tall building structures. Prerequisites: CEE:3533.

CEE:4164 Design of Wood Structures 3 s.h.
Framing layout and analysis of wood frame structures for gravity and lateral loads; design of structural members for bending, axial load, and shear, including joists, beams, columns, engineered lumber, bearing walls, shear walls, and diaphragms; introduction to connection design. Prerequisites: CEE:3533.

CEE:4167 Public Transit Operations and Planning 3 s.h.
Bus, light and heavy rail, and paratransit modes; transit operations, planning, modeling and optimization, transit agency economics, transit finance, and evolving transportation policy; skills essential to planners and engineers who intend to work for a either planning agency, transportation provider, or a transportation or planning consulting firm; individual and group projects involving transit operations. Requirements: undergraduate or graduate standing in engineering, or graduate standing in urban and regional planning. Same as URP:4195.

CEE:4176 Transportation Demand Analysis 3 s.h.
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Same as URP:4262.

CEE:4180 Fundamentals of Atmospheric Science 3 s.h.
Review of fundamental principles in atmospheric sciences needed for study of interdisciplinary topics involving the Earth’s atmosphere; understanding weather and climate processes to address problems in engineering; hydrometeorology of rainfall and its measurement by remote sensing; impact of climate anomalies and climate change on water resources; exchange of water, energy, and chemicals at the land-atmosphere boundary; forecasting of atmospheric chemistry and air quality. Prerequisites: ENGR:2510.

CEE:4187 Statistics for Experimenters 3 s.h.
Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as OEH:4540.

CEE:4220 U.S. and Global Environmental Health Policy 3 s.h.
Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Requirements: for OEH:4220 -- OEH:4240; for CEE:4220 -- CEE:2150. Same as GHS:4220, OEH:4220.

CEE:4317 Remote Sensing 3 s.h.
Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing.
CEE:4370 Flow in Open Channels 3 s.h.
in-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: CEE:3371.

CEE:4371 Water Resources Engineering 3 s.h.
Planning and economics of varied water resources projects; stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Corequisites: CEE:3371.

CEE:4373 River Mechanics 3 s.h.
Laws governing fall velocity, applications to particle-size analysis; incipient motion, bed forms, bed load, suspended load, natural river processes; theory and practice of movable-bed model experiments. Prerequisites: CEE:4370.

CEE:4374 Water Resource Design 3 s.h.
Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: CEE:3371.

CEE:4378 Hydrometeorology 3 s.h.
Atmospheric thermodynamics; precipitation processes; evaporation; infiltration; surface runoff; hydrographs, runoff relations; runoff hydrography; storage problems; frequency, intensity, duration studies of storms, floods, droughts; hydrometeorological observations and network design; watershed modeling; urban hydrology climate.

CEE:4385 International Perspectives in Water Sciences and Management 3 s.h.
Internationalization and water, with focus on a country or a world region; intensive, in-depth exposure to complex issues that affect planning and execution of water projects in large-scale watersheds.

CEE:4511 Numerical Calculations 3 s.h.
Development of algorithms for functional approximations, numerical differentiation and integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisites: MATH:2560. Same as ME:4111.

CEE:4512 Engineering Design Optimization 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as ME:4112.

CEE:4515 Computer-Aided Engineering 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ME:3052 and ENGR:2750. Same as ME:4110.

CEE:4532 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as ME:4153.

CEE:4533 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as IGPI:4115, ME:4115.

CEE:4535 Design of Steel Structures 3 s.h.
Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: CEE:3333.

CEE:4539 Foundations of Structures 3 s.h.
Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: CEE:3530.

CEE:4543 Computational Inelasticity 3 s.h.
Computational techniques and implementations for elastic, hyperelastic, elasto-plastic, visco-elastic, and visco-plastic material models; development of sound numerical integration algorithms from rate constitutive equations. Recommendations: CEE:3179.

CEE:4560 Pavement Engineering 3 s.h.
Fundamental design principles; characterization and testing of asphalt and concrete paving materials; stresses and stain development within pavement structure; basic principles of mechanistic-empirical pavement design procedures. Prerequisites: CEE:3763.

CEE:4568 Civil Infrastructure 3 s.h.
Analytical methods for developing Infrastructure Management Systems (IMS); evaluation of infrastructure condition, performance modeling, rehabilitation optimization, development of the IMS; basic concepts of information technology applied in solving civil infrastructure management problems. Prerequisites: CEE:2015.

CEE:4762 Design of Transportation Systems 3 s.h.
Overview of different modes within transportation systems; concepts of sustainability and livability in transportation system design; derivation of standards for geometric design of highways; roundabout design; cross-sectional and longitudinal geometric design of highways. Prerequisites: CEE:3763.

CEE:4763 Traffic Engineering 3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: STAT:2020 and CEE:3763.

CEE:4764 Winter Highway Maintenance 3 s.h.
Aspects of winter highway maintenance; current and innovative practices and the theory that underpins them.

CEE:4788 International Perspectives: Xicotepec 2-3 s.h.
Introduction to providing service to a community in a less developed country; student projects intended to improve community life in Xicotepec. Requirements: P3 standing. Same as GHS:4126, PHAR:8788, THTR:4265.

CEE:4995 Contemporary Topics in Civil and Environmental Engineering arr.
New topics or areas of study not formally offered in other civil and environmental courses; ice engineering, chaos and strange attractors, remote sensing, nonlinear dynamics of hydrologic processes, advanced water and wastewater treatment processes, hazardous waste control, global climate change, damage mechanics; based on faculty/student interest.
CEE:5083 Introduction to Comp Flow in Pipes and Channels 3 s.h.
General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisites: ME:5160.

CEE:5091 Graduate Seminar: Structure, Mechanics, Materials 0 s.h.
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty, students. Requirements: senior or graduate standing.

CEE:5092 Graduate Seminar: Environmental Engineering Seminar 0 s.h.
Presentation and discussion of current topics, case studies, and research in environmental science and engineering by students, guest lecturers, faculty. Requirements: senior or graduate standing.

CEE:5093 Graduate Seminar: Hydraulics, Hydrology, and Water Resources 0 s.h.
Presentation and discussions of recent advances and research in hydraulics, hydrology, and water resources by guest lecturers, faculty, students. Requirements: senior or graduate standing.

CEE:5094 Graduate Seminar: Transportation 0 s.h.
Recent advances and research in transportation engineering. Requirements: senior or graduate standing.

CEE:5115 Atmospheric Chemistry and Physics 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources and removal processes. Corequisites: CBE:3120. Same as CBE:5425.

CEE:5129 Information Systems for Resource Management 3 s.h.
Understanding and managing natural and engineered resources requiring data-reach foundation; management of data; complex data-driven technologies integrated into data and information systems (DIS); hands-on opportunity to develop or use capabilities of DIS for study or research area of interest (science, engineering, industrial operation); wind power generation, an emerging field in Iowa, used as a case study for illustrating key DIS components, links, and functionalities. Same as ECE:5129, GEOG:5129, IE:5129, ME:5129.

CEE:5137 Composite Materials 3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as ME:5167.

CEE:5154 Environmental Microbiology 3 s.h.
Fundamentals of microbiology and microbial ecology with application in water quality and biodegradation of priority pollutants; lectures and laboratory. Corequisites: CEE:5152.

CEE:5156 Physical-Chemical Process Fundamentals 3 s.h.
Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: CEE:2150 and CEE:5152. Corequisites: CEE:3155.

CEE:5179 Continuum Mechanics arr.
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as ME:5179.

CEE:5186 Introduction to Hydroinformatics 3 s.h.
Hydroinformatics as the study, design, development, and deployment of cyberinfrastructure systems for hydrologic data collection, distribution, interpretation, visualization, and analysis to aid in the understanding and management of geospatial data; introduction to fundamental and advanced hydroinformatics concepts and procedures including automated data collection, relational databases, data management, metadata and semantics, data formats and standards, data transformations and processing to support modeling and analysis, and scientific visualization of hydroclimate data.

CEE:5188 Computational Methods in Water Resources 3 s.h.
Computational methods for solution of problems; emphasis on problems in water resources; standard methods for problem solutions using computers; problems of interest in hydraulics/hydrology. Recommendations: some programming ability.

CEE:5210 Developing Professional Service Business 2-3 s.h.
Use of professional skills and functional knowledge in creating a specialized service business. Same as ENTR:9000.

CEE:5236 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720, ME:5236.

CEE:5369 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as ME:5160.

CEE:5372 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as ME:5162.
CEE:5374 Environmental Fluid Dynamics 3 s.h.
Introduction to the fundamentals of fluid dynamics with emphasis on application to natural flows of air and water in environmental systems; physical laws describing fluid dynamics, focus on development of physical insight of environmental fluids problems and strategies for solving them; analysis tools for solving various problems related to the movement of mass, momentum, and energy in natural and urban environments; systems include the atmospheric boundary layer, rivers, and streams, lakes, wetlands, and coastal zones; topics include incompressible viscous fluid flows, turbulence, waves, effects of rotation and stratification, scaling analysis, and scalar transport. Prerequisites: ENGR:2510. Requirements: working knowledge of multivariate calculus, partial differential equations, statistics, hydrology/hadraulics, and elementary fluid mechanics.

CEE:5513 Mathematical Methods in Engineering 3 s.h.

CEE:5540 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:5660, ME:5150.

CEE:5549 Fracture Mechanics 3 s.h.
3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: BME:4910 or ME:4055 or ME:5150. Same as ME:5159.

CEE:5875 Perspectives in Biocatalysis 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CEE:5990 Structural Engineering Practicum A 2 s.h.
Students select a design project and develop two or more alternative design concepts in consultation with a three-member advisory committee consisting of at least one faculty member and one design professional; entire design process documented in a written report. Prerequisites: CEE:3136 and CEE:4535.

CEE:5991 Structural Engineering Practicum B 1 s.h.
Detailed design development of one of the concepts developed in CEE:5990; students perform detailed design calculations using applicable structural analysis and design software, produce professional quality structural plans including connection details, and defend design to a three-member advisory committee. Prerequisites: CEE:5990.

CEE:5998 Individual Investigations: Civil and Environmental Engineering arr.
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CEE:5999 Research: Civil and Environmental Engineering M.S. Thesis arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Requirements: graduate standing.

CEE:6151 Environmental Systems Modeling 3 s.h.
Mathematical modeling of environmental systems, including rivers, lakes, estuaries, treatment systems for conventional and toxic pollutants. Prerequisites: CEE:2150 and CEE:3155 and CEE:5152. Same as IGPI:6151.

CEE:6223 Environmental Boundary Layers 4 s.h.
Fundamentals of environmental boundary layer dynamics and thermodynamics of natural and engineered systems; atmospheric boundary layers and aquatic surface layer dynamics; land-atmosphere interaction, air-water exchange, and turbulent transport in aquatic ecosystems; turbulence, surface energy balance, spectral analysis, similarity theory; flow over homogeneous and heterogeneous surfaces, thermal stratification effects, measurement, simulation of turbulent and surface fluxes; applications to environmental modeling, urban meteorology, ecosystem dynamics, renewable energy; recent and current research topics. Prerequisites: ENGR:2510.

CEE:6225 Environmental Engineering and Science Communication Skills: Writing and Presenting 3 s.h.
Writing and speaking about environmental engineering and science research; key principles of writing with clarity and cohesion, and practice applying these principles on a piece of research writing that students are currently working on; review best practices for presenting research to peers and at conferences; students are required to share their work with peers through writing and presentations. Recommendations: graduate standing in earth and environmental sciences; M.S. students must be thesis option.

CEE:6253 Environmental Organic Chemistry 3 s.h.
Environmental factors that govern processes that determine fate of organic chemicals in natural and engineered systems; knowledge of chemical fate applied toward quantitatively assessing environmental behavior of organic chemicals; holistic view on physical-chemical properties of organic compounds, including aspects of gas-solid partitioning, bioaccumulation, and transformations in the atmosphere.

CEE:6255 Environmental Biotechnology and Bioremediation 3 s.h.
Concepts in molecular microbial ecology and bioremediation; microbial diversity and genetics, evolution of biodegradation pathways, application of quantitative PCR, high-throughput amplicon and metagenomic and transcriptomic sequencing, proteomics, stable isotopes; bioremediation research and practice. Prerequisites: CEE:5154.

CEE:6310 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as ME:6214.

CEE:6372 Environmental Dispersion Processes 3 s.h.
Review of classical diffusion theories; longitudinal dispersion, transverse and vertical mixing in free-surface turbulent shear flow; application to natural channels; selected topics including stream-tube models, mixing and dispersion of heated effluents. Corequisites: CEE:5369.
CEE:6376 Viscous Flow 3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260 -- ME:5160; for CEE:6376 -- CEE:5369. Same as ME:6260.

CEE:6520 Watershed Sedimentation 3 s.h.
Exploration of rich and complex field of sediment transport, geomorphology, and contaminant transport; associated physical, chemical, and biological processes with associated mathematical modeling; investigation of current topics not covered elsewhere, including physical processes affecting stability/mobility, transport, and fate of soil/sediments; lack of general understanding in development of fine-scale sedimentary structure in different systems, particularly contamination and contamination release; suspension effects on turbulent flows. Prerequisites: CEE:4370 and CEE:4373.

CEE:6532 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as IGPI:6216, ME:6215.

CEE:6534 Applied Optimal Design 3 s.h.
Optimal design problem formulation; optimality conditions; linear, quadratic, convex, and nonlinear programming; Lagrangian duality; numerical algorithms for unconstrained and constrained design problems, design sensitivity analysis, engineering applications. Prerequisites: CEE:5513. Same as ME:6534.

CEE:6763 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as URP:6063.

CEE:7197 Teaching Undergraduate Science and Engineering arr.
Basic skills to be a successful undergraduate instructor; teaching of technical subjects and solving problems; emphasis on practical applications of lesson material and class demonstrations; techniques for teaching effective classes; opportunity for students to teach; intended for graduating Ph.D. students with a career interest in a university environment.

CEE:7250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as ME:7250.

CEE:7549 Multiscale Modeling 3 s.h.
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as ME:6255.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering.
Civil Engineering, B.S.E.

Civil and environmental engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Civil and environmental engineers are solvers of real-world problems. Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, engineered environmental systems and flood-related sciences. In the future, civil and environmental engineers will be called upon to design structures for earth, prevent erosion and sedimentation of rivers, predict effects of global climate change on the environment, improve flood monitoring and forecasting, provide modern and efficient transportation systems, and ensure the quality of air and surface waters and groundwater.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil and environmental engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which can be in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

Within a few years of graduation, graduates of the program are expected to:

- be productive and contributing members of the civil and environmental engineering profession as practitioners, entrepreneurs, researchers or teachers, and be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies if qualified and interested; and
- promote the safety, health, and welfare of the public and environmental through professional practice and civic leadership.

Requirements

The Bachelor of Science in Engineering requires a minimum of 131 s.h. Students majoring in civil engineering choose one of two subtracks: civil, which provides breadth in the discipline; or environmental, which provides for a concentration.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering (p. 1157) in the Catalog.

Civil subtrack and environmental subtrack requirements are the same for the first semester of the first year but are different in subsequent semesters.

Students must select elective focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. See “Elective Focus Area” below.

Elective Focus Area

Civil engineering students may choose from several standard elective focus areas developed by the department or create an individual focus area tailored to their interests.

Standard elective focus areas are offered in the broad field of civil and environmental engineering practice and in the four technical areas: environmental engineering; hydraulics and water resources; structures, mechanics, and materials; and transportation engineering. Other areas of focus include pre-architecture and urban and regional planning. For more detailed information about elective focus areas, see Bachelor of Science in Engineering (p. 1157) in the Catalog. For a list of standard elective focus area options and guidelines for tailored elective focus areas in civil engineering, see CEE Elective Focus Areas on the Department of Civil and Environmental Engineering website.

Joint B.S.E./M.S.

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for civil engineering undergraduate students who intend to earn an M.S. in civil and environmental engineering. B.S.E./M.S. students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h. and must have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. They also must identify a faculty sponsor who can guide them from at least the second semester of their senior year until they complete the M.S.

Applications are due by March 1.

Academic Plans

The following study plan includes the B.S.E. core requirements and the curriculum for the civil engineering major. Some courses in the curriculum are prerequisites for others. Students must complete a course’s prerequisites before they may register for the course. Those who take courses...
in the order below satisfy the prerequisite requirements automatically.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Civil and Environmental Engineering, M.S.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; and transportation.

Research and Study Areas

Environmental Engineering and Science

The environmental engineering and science curriculum provides a comprehensive base of course work and research in the areas of air- and water-quality management, environmental chemistry and microbiology, natural systems modeling, and processes for water supply, pollution control, and solid and hazardous waste management. Interdisciplinary specialization and study are conducted with programs including IIHR—Hydroscience & Engineering, the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Hazardous Substances Research Center, the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering, Earth and Environmental Sciences, Geographical and Sustainability Sciences, Microbiology, Occupational and Environmental Health; and the School of Urban and Regional Planning. New areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Hydraulics, Hydrology, and Water Resources

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute. Senior staff members of the institute are professors in the program; they devote about half of their time to teaching.

IIHR offers unique opportunities for students to participate actively in the research, analysis, and design aspects of real-world problems. Considerable attention is given to the use of computers in mathematical modeling and in data acquisition and processing. IIHR high-speed computer facilities and advanced graphics and communication software complement the hydrology, hydraulics, and water resources curriculum.

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum aims toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Requirements

The Master of Science program in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. The program enables students to concentrate in one or more areas of their choice. Students who choose the thesis program may earn up to 6 s.h. for the thesis.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. All M.S. students must maintain a g.p.a. of at least 2.75, pass an oral examination, and in some program options, a written examination.

Consult the department’s Graduate Student Manual for more detailed information about the M.S. program in civil and environmental engineering.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Each of the program’s curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants to the M.S. program should have a cumulative undergraduate g.p.a. of at least 3.00. Applicants whose grade-point average is slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

Financial Support

A significant number of research assistantships are available on a variety of research projects, as are a limited number of teaching assistantships. Selection of recipients usually is based on scholastic achievement and research interest.

Career Advancement

Current and projected demand for M.S. graduates is excellent. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.
Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Civil and Environmental Engineering, Ph.D.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; and transportation.

Research and Study Areas

Environmental Engineering and Science

The environmental engineering and science curriculum provides a comprehensive base of course work and research in the areas of air and water quality management, environmental chemistry and microbiology, natural systems modeling, and processes for water supply, pollution control, and solid and hazardous waste management. Interdisciplinary specialization and study are conducted with programs including IIHR—Hydroscience & Engineering, the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Hazardous Substances Research Center, the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering, Earth and Environmental Sciences, Geographical and Sustainability Sciences, Microbiology, Occupational and Environmental Health; and the School of Urban and Regional Planning. New areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Hydraulics, Hydrology, and Water Resources

The graduate program in hydraulics, hydrology, and water resources prepares students for careers by providing a strong theoretical and applied foundation, and a broad-based academic background, necessary for positions in engineering design, research, and academia. The program combines hydraulics, fluid mechanics, hydrology, and water resources with elements from environmental engineering, meteorology, remote sensing and systems analysis, and related disciplines such as mathematics, statistics, electrical and computer science engineering, geology, and geographical information systems.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute. All the professors in the program are research engineers at the institute. IIHR, a leading laboratory in fluids-related fundamental and applied research, offers unique opportunities for students to participate actively in the research of real-world problems—including river health and restoration, hydraulic structures for urban water management and fish passage, and wind energy—providing interdisciplinary education for future leaders in science and engineering, and advancing knowledge in support of sustainable natural and engineered systems.

Most of the faculty members in the hydraulics, hydrology, and water resources program also are part of the Iowa Flood Center, the only academic flood center in the nation. By training and educating a workforce knowledgeable in the flood-related sciences, the Iowa Flood Center provides students with the opportunity to work on improving flood monitoring and prediction capabilities, and on developing models for flood frequency estimation and real-time forecasting.

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum aims toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Requirements

The Doctor of Philosophy program in civil and environmental engineering requires a minimum of 72 s.h. of graduate credit. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study.

Students usually need at least three years of full-time graduate study to complete the degree. All students must pass a qualifying examination. Students also must pass a written and oral comprehensive examination before they may be formally admitted to Ph.D. candidacy; the comprehensive examination usually is taken after all required course work has been completed. Students devote one year to the preparation of a dissertation that contributes to knowledge in the field; they must defend their dissertation successfully in a final examination. Ph.D. students must maintain a g.p.a. of at least 3.00 throughout the program.

Consult the department's Graduate Student Manual for more detailed information about the Ph.D. program in civil and environmental engineering.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants to the Ph.D. program should have a graduate g.p.a. of at least 3.00. Applicants whose grade-point average is slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination.
(GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

**Financial Support**

A significant number of research assistantships are available on a variety of research projects, as are a limited number of teaching assistantships. Selection of recipients usually is based on scholastic achievement and research interest.

**Career Advancement**

Graduates are placed in advanced technical positions in industry, consulting firms, or government.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Electrical and Computer Engineering

Chair
• Er-Wei Bai

Undergraduate majors: computer science and engineering (B.S.E.); electrical engineering (B.S.E.)

Graduate degrees: M.S. in electrical and computer engineering; Ph.D. in electrical and computer engineering

Faculty: http://www.engineering.uiowa.edu/ece/people/faculty-ece

Website: http://www.engineering.uiowa.edu/ece/

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas, such as computer systems, software applications, medical imaging, robotics, wireless communications, and fiber optics. From smart technologies to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are constantly reinventing the world.

Many benefits that have sprung from electrical and computer engineering technology now are taken for granted—noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical and computer engineers also play crucial roles in major emerging technologies, such as driverless vehicles, smart cities, and human genomics.

As the United States strives to retain or enlarge its share of national and international markets, electrical and computer engineers will play a more important role in fostering innovation, increasing productivity, and creating intelligent systems to improve the quality of life for the world.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

Certificate in Wind Energy

The Departments of Mechanical and Industrial Engineering, Civil and Environmental Engineering, and Electrical and Computer Engineering (College of Engineering) and the Department of Geographical and Sustainability Sciences (College of Liberal Arts and Sciences) administer the undergraduate certificate program in wind energy; see Wind Energy [p. 1256] in the Catalog.

Research and Study Areas

• Major in Computer Science and Engineering (Bachelor of Science in Engineering) [p. 1218]

Graduate Programs of Study

Majors
• Master of Science in Electrical and Computer Engineering [p. 1224] (software engineering subprogram available)
• Doctor of Philosophy in Electrical and Computer Engineering [p. 1226]

Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Students may earn the Certificate in Informatics [p. 1289] (Graduate College), to augment their Ph.D. training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

Since 1994, the Coordinated Laboratory for Computational Genomics, a CBCB affiliate, has engaged in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the Carver College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments.

The laboratory's facilities include more than 200 workstations, 3 Linux clusters, and access to the NSF TeraGrid and other high-performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

Computer Systems and VLSI Circuits

Research emphasis is directed toward design and test of very-large-scale integrated (VLSI) circuits, high-performance computing and networking, and intelligent agent systems. Research in the VLSI area involves development of techniques and algorithms that assist in synthesis and testing of large-scale logic circuits, and incorporation of these techniques into computer-aided design tools. Current projects include new pattern sources for built-in-test, efficient test pattern generation, generation of compact test sets, and methods for reducing test data volumes.

High-performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that support high-performance wireless networking, and on control and coordination of mobile ad hoc networks. Current
research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Departmental facilities that support this work include Linux and Windows workstations and server nodes that provide college-wide networked computer services. Advanced computing facilities also are available at national supercomputing centers and federal laboratories.

**Control Systems and Systems Theory**

Control systems and system theory use feedback to improve the predictability and efficiency of engineered systems ranging from electronic amplifiers to vehicle guidance systems, manufacturing processes, communication channels, and the Internet. Work in control systems and systems theory draws heavily on results from mathematics, physics, and computer science to model the systems that are to be controlled and to implement feedback controllers.

Current research emphasizes optimal, adaptive, digital, robust, and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

Research in control systems and systems theory is supported by extensive computing resources and collaborations with local industry, the Center for Computer-Aided Design, the National Advanced Driving Simulator (NADS), and the Carver College of Medicine.

**Nanoscale Electronics and Spintronics**

Nanoscale devices and systems provide solutions for low-power logic devices, high-density 3-D stackable electronic and/or spintronic memory elements, and solar/waste energy harvesting applications. Current nanoscale and spintronics work involves post-CMOS transistor research to extend Moore’s law in this century; use of novel magnetic and nonmagnetic nanomaterials for enhanced-CMOS and nonvolatile memory; and intelligent solar cells, thermoelectric devices, fuel cells and batteries for efficient solid-state energy conversion. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

**Signal and Image Processing**

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology, and Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing-impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 35 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high-performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

**Waves and Materials**

Research in this area is carried out primarily in the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Seamans Center for the Engineering Arts and Sciences, and in Van Allen Hall. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, Chemistry, Internal Medicine, and Neurosurgery. Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with micrometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, and a noninvasive glucose sensor for medical research.
Wireless Communication Systems

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, health care applications, home automation, and traffic control. Current research includes the application of WSN, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, soil moisture).

Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy efficient WSNs and issues of localization, network organization, and control.

Research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Projects include the removal of intersymbol interference by blind identification/equalization, multiple-user detection in CDMA without power control, receiver structures for 3G wireless cellular systems, cooperative beam forming for ad hoc wireless networks, resource allocation in OFDM systems, and scheduling in wireless networks. Fundamental theoretical issues and practical implementation are emphasized.

Facilities

Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

Undergraduate Laboratories

The department's undergraduate laboratories include facilities for the study of electrical and electronic circuits, wireless communication, power and sustainable energy, signals and systems, microprocessor-based computers and systems, measurement automation, communication systems, control systems, computer-aided design of VLSI circuits, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embedded-systems development.

Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of bioinformatics, image processing, software engineering, electro-optics, control systems, medical imaging and image analysis, large-scale intelligent systems, and wireless communication. Linux and Windows workstations and server nodes provide college-wide networked computing support. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

Courses

Electrical and Computer Engineering Courses

ECE:0000 Electrical Engineering Internship/Co-op 0 s.h.
Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student’s permanent record. Requirements: admission to Cooperative Education Program.

ECE:2120 Art and Engineering 3 s.h.
Collaborative, interdisciplinary, cutting-edge opportunity to gain real world engineering experience while learning to think creatively and analytically to create engaging works of art; interdisciplinary collaboration and creative methodologies that enhance life-long creative practice of artists and engineers; basic electronics and Arduino prototyping platform to create programmable, sensor-driven, responsive circuits. Prerequisites: MTLS:2910 or CERM:2010 or SCPL:2810 or TDSN:2210. Same as TDSN:2205.

ECE:2400 Linear Systems I 3 s.h.
Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: ENGR:2120 and MATH:2560.

ECE:2410 Principles of Electronic Instrumentation 4 s.h.
Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: ENGR:2120 and PHYS:1612.

ECE:3000 Professional Seminar: Electrical Engineering 1 s.h.
Professional aspects of electrical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.

ECE:3320 Introduction to Digital Design 3 s.h.
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Requirements: sophomore standing.

ECE:3330 Introduction to Software Design 3 s.h.
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as IGPI:3330.
ECE:3350 Computer Architecture and Organization 3 s.h.
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high-performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Prerequisites: ENGR:2730 and ECE:3320.

ECE:3360 Embedded Systems and Systems Software 3 s.h.
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and higher-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: ENGR:2730.

ECE:3400 Linear Systems II 3 s.h.
Continuation of ECE:2400, emphasis on Laplace and Z-transform analysis; unilateral and bilateral Laplace transform; region of convergence; stability; block diagram algebra; first- and second-order continuous and discrete time systems; Bode plots. Prerequisites: ECE:2400.

ECE:3410 Electronic Circuits 4 s.h.
Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: ECE:2410 and ECE:2400.

ECE:3500 Communication Systems 3 s.h.
Introduction to analog and digital communications, with an emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: ECE:3400.

ECE:3540 Communication Networks 3 s.h.
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, Internet protocol; technology examples. Prerequisites: ENGR:2730. Corequisites: STAT:2020.

ECE:3600 Control Systems 3 s.h.
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: ECE:2400.

ECE:3700 Electromagnetic Theory 3 s.h.
Electric and magnetic forces, Maxwell’s equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: MATH:3550 and PHYS:1612.

ECE:3720 Electrical Engineering Materials and Devices 3 s.h.
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: ECE:3410 and PHYS:1612.

Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

ECE:4720 Introductory Optics 3 s.h.
Geometrical and physical optics; interference; diffraction; polarization; microscopic origins of macroscopic optical properties of matter; optical activity; electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisites: (PHYS:1512 or PHYS:2703 or PHYS:1612) and (MATH:1560 or MATH:1860). Same as PHYS:4720.

ECE:4728 Introductory Solid State Physics 3 s.h.
Phenomena associated with solid state: classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: PHYS:3741. Same as PHYS:4728.

ECE:4880 Principles of Electrical and Computer Engineering Design 3 s.h.
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisites: ECE:2410 and ENGR:2730. Requirements: senior standing.

ECE:4890 Senior Electrical and Computer Engineering Design 3 s.h.
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: ECE:4880. Requirements: completion of three required subprogram courses.

ECE:5000 Graduate Seminar: Electrical and Computer Engineering 0 s.h.
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.

ECE:5129 Information Systems for Resource Management 3 s.h.
Understanding and managing natural and engineered resources requiring data-reach foundation; management of data; complex data-driven technologies integrated into data and information systems (DIS); hands-on opportunity to develop or use capabilities of DIS for study or research area of interest (science, engineering, industrial operation); wind power generation, an emerging field in Iowa, used as a case study for illustrating key DIS components, links, and functionalities. Same as CEE:5129, GEOG:5129, IE:5129, ME:5129.

ECE:5210 Bioinformatics Techniques 3 s.h.
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and ENGR:1300. Same as BME:5320, IGPI:5321.
ECE:5220 Computational Genomics 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and BME:5320 and (CS:3110 or ENGR:1300). Same as BIOL:5320, BME:5330, GENE:5173, IGPI:5330.

ECE:5300 Switching Theory 3 s.h.
Switching algebras; combinational circuits--hazards, minimization, multiple-output networks; sequential circuits--critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment; state reduction; input-output experiments. Prerequisites: ECE:3320.

ECE:5310 Introduction to VLSI Design 3 s.h.
MOS devices and circuits; MOS transistor theory, MOS processing technologies, MOS device models; timing and power considerations; performance issues; scaling; various logic schemes; circuit techniques; clocking strategies; I/O structures; design styles; ASIC design; MOS subsystem design; system case studies, use of electronic design automation tools, introduction to hardware description languages, design synthesis, design projects; lab. Prerequisites: ECE:3320 and ECE:3410.

ECE:5320 High Performance Computer Architecture 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as CS:5610.

ECE:5330 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as IGPI:5331.

ECE:5380 Testing Digital Logic Circuits 3 s.h.
Logic models for faults; fault detection in combinatorial and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisites: ECE:3320.

ECE:5410 Advanced Circuit Techniques 3 s.h.
Advanced circuit principles; component, signal and noise models; sub-circuit design including oscillators, amplifiers, multipliers, noise generators, frequency converters, phase-locked loops, filters, transmission gates and level-shifters; measurement techniques including bridge, signal averaging and lock-in techniques, case studies of A/D and D/A converters, single-supply op amps, low-noise, large-signal and high frequency circuits; lab. Prerequisites: ECE:3410.

ECE:5420 Power Electronics 3 s.h.
Fundamental concepts and design techniques of power electronics circuits; switching power pole and various switch-mode DC to DC power conversion topologies; feedback control of switch-mode DC to DC power supplies; diode rectification of AC utility power and Power Factor Control (PFC) circuits; electromagnetic concepts and design of high-frequency inductors and transformers; electrically isolated switch-mode DC power supply topologies and soft-switching DC-DC converters and inverters; techniques for synthesis of DC and low-frequency AC sinusoidal voltages. Prerequisites: PHYS:1611 and ENGR:2120. Requirements: junior standing.

ECE:5430 Electric Drive Systems 3 s.h.
Basic characteristics of DC and AC electric motors and their associated power electronics interfaces; applications of electric machines and drives that are essential for wind turbines, electric and hybrid-electric; emphasis on vehicles; electric machines in context of overall drives and associated applications; space-vector theory used to analyze electric machines and drives; DC motor/generator characteristics and control; AC single phase and three-phase motor characteristics and feedback control, including AC synchronous and induction motors. Prerequisites: ENGR:2120 and PHYS:1611. Requirements: junior standing.

ECE:5450 Pattern Recognition 3 s.h.
Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisites: ECE:2400. Same as IGPI:5450.

ECE:5460 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as IGPI:5460.

ECE:5480 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME: 2200. Same as BME:5220, IGPI:5480.

ECE:5500 Communication Theory 3 s.h.
Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/interference probability tradeoffs, coding for error detection and correction. Prerequisites: STAT:2020 and ECE:3500.

ECE:5520 Introduction to Information and Coding Theories 3 s.h.
Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: ECE:3500 and STAT:2020.
ECE:5530 Wireless Sensor Networks 3 s.h.
Wireless sensor networks overview; antennas, radio propagation models; WSN power and energy considerations, engineering issues, batteries, networks layers, stacks, medium access control (MAC); spread spectrum, FHSS, CDMA; infrastructure establishment; WSN routing; localization; synchronization; sensors; RFID; WSN case studies; lab. Prerequisites: STAT:2020 and ECE:3500. Requirements: senior standing.

ECE:5600 Control Theory 3 s.h.
State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600. Same as ME:5360.

ECE:5620 Electric Power Systems 3 s.h.
Overview of electric power systems; single phase and three-phase representations of electric power signals and electromagnetic concepts; AC transmission lines and underground cables, power flow in a power system network, AC power transformers, High Voltage DC (HVDC) power transmission, electric power distribution, synchronous generators, voltage regulation and stability, power system transients and dynamic stability, control of interconnected power systems, transmission line faults, transient over-voltages and surge protection. Prerequisites: PHYS:1611 and ENGR:2120. Requirements: junior standing.

ECE:5630 Sustainable Energy Conversion 3 s.h.
Overview of sustainable energy conversion technologies; thermal energy conversion; Carnot and Rankine cycles; solar resource and raw energy availability, PV solar cell characteristics, solar panel construction, Maximum Power Point (MPP) tracking and utility grid interface; wind energy conversion resource and available energy, wind turbine configurations, electrical power interface electronics; ocean energy conversion tidal and wave resources and conversion technologies; tidal basin containment conversion and tidal current turbine systems. Prerequisites: ENGR:2120 and PHYS:1611. Requirements: junior standing.

ECE:5640 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as IGPI:5641, ME:5362.

ECE:5700 Advanced Electromagnetic Theory 3 s.h.
Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: ECE:3700.

ECE:5720 Solid State Physical Electronics 3 s.h.
Advanced topics in semiconductor physics and devices; elementary concepts in quantum and statistical mechanics, diodes, bipolar transistor, field-effect transistor. Prerequisites: ECE:3720.

ECE:5780 Optical Signal Processing 3 s.h.
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transforms, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780 -- ECE:3700; for PHYS:4820 -- PHYS:3812. Same as PHYS:4820.

ECE:5790 Electo Optics 3 s.h.
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: for ECE:5790 -- ECE:3700; for PHYS:4726 -- PHYS:3812. Same as PHYS:4726.

ECE:5800 Fundamentals of Software Engineering 3 s.h.
Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as CS:5800.

ECE:5810 Formal Methods in Software Engineering 3 s.h.
Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as CS:5810.

ECE:5820 Software Engineering Languages and Tools 3 s.h.
Modern agile software development practices for cloud and web-based applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Requirements: ECE:5800 or CS:5800; or graduate standing with solid understanding of object-oriented design and programming, and facility with at least one object-oriented programming language. Same as CS:5820.

ECE:5830 Software Engineering Project 3 s.h.
Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820 and CS:5800. Same as CS:5830.

ECE:5995 Contemporary Topics in Electrical and Computer Engineering arr.
New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

ECE:5998 Individual Investigations: Electrical and Computer Engineering arr.
Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Requirements: graduate standing.

ECE:6720 Nonlinear Optics 3 s.h.
ECE:6726 Laser Principles 3 s.h.

ECE:7450 Magnetic Resonance Imaging Systems 3 s.h.
Mathematical foundations and practical implementation for magnetic resonance imaging (MRI); principles of image formation using Fourier and projection techniques, non-Cartesian sampling, tomographic image reconstruction, sources of artifacts and their correction. Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7450.

ECE:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as IGPI:7470.

ECE:7480 Advanced Digital Image Processing 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/ fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7480.

ECE:7720 Semiconductor Physics 3 s.h.
Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as PHYS:7720.

ECE:7920 ECE Graduate Seminar on Image Processing, Computer Vision and Medical Imaging 0 s.h.
Recent advances and research in image processing, computer vision, and medical imaging; presentation by guest lecturers, faculty, students. Requirements: graduate standing.

Current research. Same as PHYS:7930.

ECE:7995 Advanced Topics in Electrical and Computer Engineering arr.
Discussion of current literature in electrical and computer engineering.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering.
Computer Science and Engineering, B.S.E.

This B.S.E. program combines the technical content of a computer science degree and a computer engineering degree in a single degree program. The program curriculum is jointly taught by faculty from the Departments of Electrical and Computer Engineering and Computer Science. The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.

The computer science and engineering program encompasses the technical rigor of a Bachelor of Science program in computer science, but also provides a full component of computer engineering course work. Graduates gain the foundational knowledge provided by a computer science education together with the critical thinking, problem-solving, and system design skills at the heart of a computer engineering curriculum.

Graduates of the program will:

- exhibit leadership and vision in contributing to the technical and policy decision of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- participate in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering with a major in computer science and engineering (CSE) requires a minimum of 128 s.h. The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals and interests. Students choose one of several elective focus areas to personalize their curriculum and to help them prepare for the type of job or research they plan to pursue.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1300 Engineering Problem Solving I; and courses in chemistry, engineering mathematics and fundamentals, and physics. Computer Science I: Fundamentals (CS:1210), is taken instead of ENGR:1100 Engineering Problem Solving I. Students who complete ENGR:1100 Engineering Problem Solving I before entering the CSE program may use that course for elective credit. All students must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog.

Elective Focus Area and Major Courses

Students select an elective focus area (EFA) to personalize their curriculum and to help them prepare for the type of job or research they plan to pursue. The EFA consists of six elective courses (18 s.h.). A number of areas are available, such as bioinformatics, business, medical imaging, embedded systems, and software engineering. For a complete list, see ECE Elective Focus Area on the Department of Electrical and Computer Engineering website. Students also may work with their academic advisor to create a customized plan tailored to their goals and interests.

CSE students must complete 10 required computer science and engineering program courses, two constrained program electives, six EFA courses, and a two-semester capstone design sequence. Students who choose their EFA courses carefully may be able to earn the Certificate in Sustainability [p. 1655], the Certificate in Technological Entrepreneurship [p. 1254], or one of several undergraduate minors offered by the University by taking minimal additional course work beyond that required for the computer science and engineering major.

The B.S.E. with a major in computer science and engineering requires the following course work.

Required Courses

Students complete all of the following.

Elective Focus Area Courses

Students complete six elective focus area courses, which they select according to guidelines established by the department. For a list of EFAs and course selection guidelines, see ECE
Elective Focus Areas on the Department of Electrical and Computer Engineering website.

**Capstone Design Courses**

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

**Joint B.S.E./M.S.**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for computer science and engineering undergraduate students who intend to earn an M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree on the Department of Electrical and Computer Engineering website.

**Academic Plans**

The following study plan includes the B.S.E. core requirements and the curriculum for the computer science and engineering major. Some courses in the curriculum are prerequisites for others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

Career Advancement

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

The major also prepares students for further study in many areas demanding computational and engineering skill sets.
Electrical Engineering, B.S.E.

Electrical engineers develop technologies and systems for a wide variety of applications ranging from telecommunications to medical imaging. They play a central role in the design and implementation of any technology that is powered by electricity as well as the generation and distribution of electric power. Topics covered in the electrical engineering curriculum include: design of electronic circuits, communication systems, control systems, and semiconductor devices. Students may opt to specialize in any of these areas as well as others including: electrical power generation and distribution, medical image processing, computer systems, or design of micro- and nano-scale optical and electronic devices.

Electrical engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.

Graduates of the program will:

- exhibit leadership and vision in contributing to the technical and policy decisions of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- participate in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering with a major in electrical engineering requires a minimum of 128 s.h. The major in electrical engineering provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of several elective focus areas according to the type of job or research they plan to pursue. They also choose one of two tracks to support their elective focus area.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Engineering Problem Solving I and ENGR:1300 Engineering Problem Solving II; and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog.

Electrical engineering students complete the curriculum listed under Academic Plans [p. 1222]. During their second year, they select an elective focus area (EFA) and choose a track that corresponds with it: the computer track or the electrical track. They begin taking track and EFA courses in their third year.

Elective Focus Area and Track

Students select an elective focus area to personalize their curriculum and to help them prepare for the type of job or research they plan to pursue. More than 20 EFAs are available, such as bioinformatics, business, communication systems, medical imaging, nanotechnology, power systems, and software; for a complete list, see ECE Elective Focus Areas on the Department of Electrical and Computer Engineering website. Students also may work with their academic advisor to create a customized EFA plan tailored to their goals and objectives. In addition, they select one of two curricular tracks —computer or electrical—to support their EFA. Students also complete five required courses in their track, two electrical engineering program courses common to both tracks, and seven EFA courses.

Students who choose their track and EFA courses carefully may be able to earn the Certificate in Sustainability [p. 1655], the Certificate in Technological Entrepreneurship [p. 1254], or one of several undergraduate minors offered by the University without taking courses beyond those required for the electrical engineering major. Students in the computer track automatically meet the requirements for a minor in computer science.

The electrical engineering major requires the following track and elective focus area courses.

Required Computer Track Courses

Students in the computer track complete these five track courses:

- ECE:3330 Introduction to Software Design 3
- ECE:3350 Computer Architecture and Organization 3
- ECE:3360 Embedded Systems and Systems Software 3
- CS:2210 Discrete Structures 3
- CS:3330 Algorithms 3

Required Electrical Track Courses

Students in the electrical track complete these track courses:

- ECE:3400 Linear Systems II 3
- ECE:3410 Electronic Circuits 4
- ECE:3500 Communication Systems 3
- ECE:3600 Control Systems 3
- ECE:3720 Electrical Engineering Materials and Devices 3

Track Breadth and Depth Electives

Students complete one track breadth elective and one track depth elective.

Students in the computer track must choose their track breadth elective from the list of required electrical track courses above. Students in the electrical track must choose their track breadth elective from the list of required computer track courses. Students in either track may instead use ECE:3540 Communication Networks as their track breadth elective.
The track depth elective must be an advanced course in a subject area within a student’s track—normally numbered 4000 or above. For a complete list of depth electives for each track, consult the Department of Electrical and Computer Engineering.

**Elective Focus Area Courses**

Students complete seven elective focus area courses, which they choose according to guidelines established by the department. For a list of EFAs and course selection guidelines, see ECE Elective Focus Areas on the Department of Electrical and Computer Engineering website.

**Capstone Design Courses**

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes team work, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

**Joint B.S.E./M.S.**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduate students who intend to earn an M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor’s degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree on the Department of Electrical and Computer Engineering website.

**Academic Plans**

The following study plan includes the B.S.E. core requirements and the curriculum for the electrical engineering major. Some courses in the curriculum are prerequisites for others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.
General education component course 3  
Track depth elective 3  
Two elective focus area courses 6

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). Electrical engineers find employment everywhere smart technology is employed. They consistently rank among the most sought after and highest-paid technology professionals. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester. EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Electrical and Computer Engineering, M.S.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, Computer Science, Mechanical and Industrial Engineering, and Biomedical Engineering, and the Carver College of Medicine. Principal areas of graduate study include waves and materials, computer systems, wireless communications, signal and image processing, computational genomics, and control systems and systems theory. View principal areas of study under Research and Study Areas (p. 1211).

Requirements

The Master of Science program in electrical and computer engineering requires 30 s.h. of graduate credit with or without thesis. Either option may precede Ph.D. study.

M.S. students must maintain a cumulative g.p.a. of at least 3.00.

Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; nonthesis students may count no more than 3 s.h. of independent study toward the degree. For a list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

All M.S. students who plan to satisfy thesis requirements must successfully complete a final examination, which is conducted by a committee of at least three faculty members. The final examination consists of an oral defense of the thesis.

M.S. Subprogram in Software Engineering

A Master of Science subprogram in software engineering is available to both thesis and nonthesis students. Both thesis and nonthesis options require a minimum of 30 s.h. of graduate credit. All rules for additional credit and the M.S. final examination are the same as for the M.S. without the subprogram. Successful completion of the subprogram results in a designation that specifies "(software engineering)" on a student's transcript.

The software engineering subprogram requires the following course work.

<table>

In addition to the courses listed above, thesis students complete another 3 s.h. of course work from the approved list of electrical and computer engineering courses; nonthesis students complete another 6 s.h. For a list of approved courses, see the Electrical and Computer Engineering Graduate Manual.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

M.S. applicants must have a g.p.a. of at least 3.00 on all electrical and computer engineering, mathematics, and physics course work. M.S. applicants with a g.p.a. between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics course work may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional course work, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Electrical and Computer Engineering, Ph.D.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students’ individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, Computer Science, Mechanical and Industrial Engineering, and Biomedical Engineering, and the Carver College of Medicine. Principal areas of graduate study include waves and materials, computer systems, wireless communications, and control systems and systems theory. View principal areas of study under Research and Study Areas [p. 1211].

Requirements

The Doctor of Philosophy program in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal course work (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. For the list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Each Ph.D. student’s study plan must be approved by the student’s advisor and by the graduate committee.

Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying process. The qualifying process consists of two parts—an examination and a course breadth requirement. The half-day written exam is given once a year, late in the spring semester. It covers two subjects chosen by a student from a list of nine. Students normally are expected to take the qualifying examination at the first offering after they have completed 30 s.h. of their graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once, the next time it is offered.

Following successful completion of the Ph.D. qualifying examination and invitation to the Ph.D. program, a student must complete the two-part Ph.D. comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.

Students must pass the Ph.D. qualifying examination before they may take the Ph.D. comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

The final requirement for completion of the Ph.D. program is the preparation and successful defense of the Ph.D. thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Ph.D. applicants must have a g.p.a. of at least 3.25 on all electrical and computer engineering, mathematics, and physics course work.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Graduates consistently rank among the most sought-after and highest-paid technology professionals.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester. EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Mechanical and Industrial Engineering

Chair
- Ching-Long Lin

Undergraduate majors: industrial engineering (B.S.E.); mechanical engineering (B.S.E.)

Graduate degrees: M.S. in industrial engineering (optional concentration in wind power management); Ph.D. in industrial engineering; M.S. in mechanical engineering; Ph.D. in mechanical engineering

Faculty: http://www.engineering.uiowa.edu/mie/people
Website: http://www.engineering.uiowa.edu/mie/

The Department of Mechanical and Industrial Engineering offers distinct undergraduate and graduate degrees and research programs in industrial engineering and in mechanical engineering. It also is the administrative home of the undergraduate Certificates in Wind Energy (p. 1256) and Naval Hydrodynamics (p. 1252).

Industrial Engineering

Industrial engineering is concerned with analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. In order to accomplish these activities, the industrial engineer must be skilled in mathematics, physical sciences, management, and human relations as well as manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

Industrial engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

Mechanical Engineering

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices, such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems.

Machines and mechanical systems are the foundations of human technology. Mechanical systems are found in mechanical engineering systems and devices such as manufacturing equipment, medical equipment, ground vehicles, heavy equipment, farm equipment, aircraft, ships, home appliances, packaging machinery, wind turbine blades and gearboxes, robots, and biomedical systems.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

Certificate in Naval Hydrodynamics

The Department of Mechanical and Industrial Engineering offers the undergraduate certificate program in Naval Hydrodynamics; see Naval Hydrodynamics (p. 1252) in the Catalog.

Certificate in Wind Energy

The Departments of Mechanical and Industrial Engineering and Electrical and Computer Engineering (College of Engineering) and the Department of Geographical and Sustainability Sciences (College of Liberal Arts and Sciences) administer the undergraduate certificate program in wind energy; see Wind Energy (p. 1256) in the Catalog.

Related Certificate: Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Mechanical and Industrial Engineering, and Geographical and Sustainability Sciences and the School of Urban and Regional Planning participate in the program.

The certificate is coordinated by the School of Urban and Regional Planning. See Transportation Studies (p. 1314) for more information about the certificate.

Programs

Undergraduate Programs of Study

Majors
- Major in Industrial Engineering (Bachelor of Science in Engineering) (p. 1238)
- Major in Mechanical Engineering (Bachelor of Science in Engineering) (p. 1240)
Graduate Programs of Study

Majors

• Master of Science in Industrial Engineering [p. 1242] (optional concentration in windpower management)
• Master of Science in Mechanical Engineering [p. 1245]
• Doctor of Philosophy in Industrial Engineering [p. 1247]
• Doctor of Philosophy in Mechanical Engineering [p. 1250]

Facilities

Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory is used by students in industrial engineering and in mechanical engineering. The laboratory provides students with experience in CAD/CAM systems. It is equipped with 4-axis CNC mills (Haas and Techno-CNC), CNC router (Techno-CNC), CNC metal lathe (Haas and Techno-CNC), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, press, foot shear, and welding station. The lab has the latest software technology, such as Pro/ENGINEER and Rhinoceros.

Industrial Engineering

The following facilities and laboratories are used by undergraduate and graduate students. For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see those departments' Catalog sections.

Active Learning Facility

The Active Learning Facility (ALF) is designed to encourage group interaction in a small classroom setting. The reconfigurable classroom is equipped with nine tables and 20 HP workstations. It is used for industrial engineering courses and for small groups working together on computer assignments.

Biomanufacturing Laboratory

The Biomanufacturing Laboratory teaches students about emerging processes and techniques in cell-biomaterial interactions and gives them hands-on laboratory experience. Work in the lab is interdisciplinary, spanning engineering, medicine, biology, and biotechnology. The lab provides facilities for engineered living tissue systems. Next generation manufacturing tools are used to build biologically inspired structures intended to replace diseased or damaged organs and tissues. Lab research projects and activities focus primarily on design, modeling, and fabrication of tissue replacement parts; tissue scaffolds and medical devices; and cell and organ printing. Diverse software and hardware are available to support bioadditive manufacturing platforms.

Cognitive Systems Laboratory

The Cognitive Systems Laboratory is devoted to examining the safety, performance, and user acceptance implications of technology insertion into complex systems. The lab has networked computers, a video editing workstation, a process control simulation, and a low-cost driving simulator. The simulator is equipped with five cameras, instrumentation to record all driver activity, and an eye tracking system. The Cognitive Systems Laboratory shares the driving simulator and an instrumented vehicle with the Operator Performance Laboratory. The equipment supports class projects, system development, and undergraduate and graduate research.

Design Project Laboratory

The Design Project Laboratory is equipped with standard computers and videoconferencing facilities. It supports senior design project courses.

GROK Lab

The GROK Lab develops technologies to help scientists and doctors improve their understanding and control of complex systems such as robots, distributed sensor networks, and augmented-reality systems. The lab designs and builds software, electronic circuits, and mechanical devices that create or modify complex systems and that extend scientists' understanding of how to make these systems perform their intended tasks better.

The lab has a variety of software development platforms and manufacturing tools, including CNC machines and supplies for casting and molding, as well as a suite of equipment for circuit design, testing, and assembly. The GROK lab has developed technologies used by NASA to control robots exploring South America and Mars. Its most recent projects have focused on using distributed sensor networks to track the activities of health care workers and on developing training simulators for orthopaedic surgeons.

Intelligent Systems Laboratory

The Intelligent Systems Laboratory provides facilities for research in computational intelligence leading to applications in industry, service organizations, and health care. Research in the lab is funded by government agencies and industrial corporations. Solutions to practical problems and enhancement of engineering education are emphasized. Most of the lab's recent projects concentrate on development of software tools for product development, manufacturing, and health care applications.

The Intelligent Systems Laboratory is furnished with the latest computer technology to support research on numerous computing platforms. Diverse software is available for modeling, design, and construction of intelligent systems—for example, data mining software, neural networks, expert systems, and simulation software.

Operator Performance Laboratory

Research in the Operator Performance Laboratory (OPL) focuses on determining human performance in a variety of situations, with particular emphasis on driving and flight deck environments. Much of the research is performed in the field using a state-of-the-art instrumented vehicle that is equipped with five cameras, eye movement equipment, two computers, video equipment, and a suite of sensors. The OPL also features a scale Boeing 737-400 fixed-base flight simulator with six channels of visuals. The flight simulator is equipped with a remote eye-tracking device that allows the activation of selected virtual controls in the flight deck. A specially designed stimulus presentation booth is used for color research and for photometry applications. Computer models of operator performance are designed based on the data obtained in the laboratory and field research.
Mechanical Engineering

Mechanical Engineering Undergraduate Instruction

Engineering Core
The laboratories for fluid flows and transport processes contain a wind tunnel; a water flume; a water table; four water channels with porous media; three air-jet tables; various air, water, and oil flow devices; and facilities for numerous small-scale experiments to demonstrate the principles of mass, momentum, and energy transfer.

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments' Catalog sections.

Computational Fluids Laboratory
The Computational Fluids Laboratory is equipped with 20 computers running ANSYS Fluent software used in fluid mechanics courses.

Design Project Laboratory
The Design Project Laboratory supports all senior design project courses. It is equipped with eight mid-level workstations as well as a high-end workstation, which enables students to manipulate full design models and interactive WebEx sessions with companies using the analysis software during the session. Research versions of ANSYS Fluent and ProE, standard computers, and videoconferencing facilities also are available.

Experimental Fluid Mechanics Laboratory
The Experimental Fluid Mechanics Laboratory acquaints students with ongoing research in fluid mechanics and hydraulics. The lab focuses on literature, experiments, numerical simulations, audio-video aids, and links to educational and scientific internet sites. Students using the lab develop an understanding of basic flow mechanisms and become familiar with the latest developments in experimental techniques and instrumentation.

Ralph and Barbara Stephens Experimental Engineering Laboratory
The Ralph and Barbara Stephens Experimental Engineering Laboratory supports the required undergraduate courses ME:3351 Engineering Instrumentation and ME:4080 Experimental Engineering. The lab is equipped with varied instruments and test rigs that help students learn basic measurement principles and laboratory procedures. It also offers sensors for measurement of displacement, mass, temperature, pressure, velocity and flow rate, heat flux, force, torque, and so forth.

Solidification Laboratory
The Solidification Laboratory supports research in fundamental aspects of solidification and their application in casting of metals. Research in the lab ranges from basic experimental and computational studies of microstructure evolution to modeling and simulation of a wide variety of industrial metal casting processes. Collaboration with the casting industry has resulted in custom-made software for process control, new capabilities in commercially available casting simulation software, and strategies for yield improvement and defect prevention. Facilities include numerous state-of-the-art computer workstations and experimental test setups.

Thermal and Heat Transfer Laboratory
The Thermal and Heat Transfer Laboratory is equipped with data acquisition systems to process data online. It also provides facilities for experiments in heat transfer measurements.

Mechanical Engineering Graduate Facilities

Fluid Mechanics
The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience & Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, a towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems.

Facilities available in the department include a flow visualization and imaging system with CCD (charge-coupled devices) camera, and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support.

In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

Mechanical Systems
Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Center for Computer-Aided Design (CCAD). CCAD maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of LINUX and Windows applications servers connected to centralized file servers. CAD/CAE, software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

Thermal Sciences
Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, an air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.
### Industrial Engineering Courses

**IE:0000 Industrial Engineering Internship/Co-op** 0 s.h.
Enterprise engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**IE:1000 First-Year Seminar** 0-1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**IE:2000 Industrial Engineering Sophomore Seminar** 0 s.h.
Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.

**IE:2500 Engineering Economy** 3 s.h.

**IE:3000 Professional Seminar: Industrial Engineering** 0 s.h.
Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.

**IE:3138 Biomanufacturing** 3 s.h.
Design and manufacturing technologies in development of biomedical related products (customized implants, medical devices, tissue scaffolds, engineered tissues, organs, biological systems); tissue engineering, BioCAD, biomedical imaging and processing for customized implant development, reverse engineering, biomaterials, regenerative medicine and drug delivery, traditional manufacturing processes for tissue engineering, rapid prototyping and layered manufacturing, rapid tooling, bioadditive fabrication, biomanufacturing and new frontiers in biomanufacturing (organ printing); hands-on laboratory projects and assignments. Prerequisites: ENGR:2760.

**IE:3149 Information Visualization** 3 s.h.
Instruments for reasoning about quantitative information; analyzing and communicating statistical information; main typologies of data graphics (data-maps, time-series, space-time narrative, relational diagrams, graphs and methods for dimensionality reduction); language for discussing data visualizations combined with knowledge of human perception of visual objects; how to visualize information effectively by using statistical methods, knowledge of human perception, and basics of data graphics. Prerequisites: STAT:2020.

**IE:3300 Manufacturing Systems** 3 s.h.
Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: IE:3700 and ENGR:2760. Same as ME:4131.

**IE:3350 Process Engineering** 3 s.h.
Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, agility. Offered spring semesters. Prerequisites: IE:3700.

**IE:3400 Human Factors** 3 s.h.
Decision of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: PSY:1001.

**IE:3450 Ergonomics** 3 s.h.
Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of design deficiencies; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

**IE:3500 Information Systems Design** 3 s.h.
Structure and design of computer-based information systems; concepts of information systems, decision making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: ENGR:1300.

**IE:3600 Quality Control** 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020. Same as CEE:3142, STAT:3620.

**IE:3610 Stochastic Modeling** 3 s.h.

**IE:3700 Operations Research** 3 s.h.
Operations research models and applications; emphasis on deterministic model (linear programming, duality). Offered fall semesters. Prerequisites: MATH:2550. Corequisites: STAT:2020.

**IE:3750 Digital Systems Simulation** 3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; hands-on usage of ARENA simulation software, manufacturing, health care, and service. Offered spring semesters. Prerequisites: IE:3610 and IE:3700.

**IE:3760 Applied Linear Regression** 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010. Same as IGPI:3200, STAT:3200.

**IE:3998 Individual Investigations: Industrial Engineering** arr.
Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.
IE:4116 Manufacturing Processes and Automation 3 s.h.
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ENGR:2760. Same as ME:4116.

IE:4172 Big Data Analytics 3 s.h.
Principles of data mining and machine learning in context of big data; basic data mining principles and methods—pattern discovery, clustering, ordering, analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms; applications of these methods; development of analytical techniques to cope with challenging and real “big data” problems; introduction to MapReduce, Hadoop, and GPU computing tools (CUDA and OpenCL). Prerequisites: STAT:2020. Requirements: basic programming skills in C, C++, Java, or Python; knowledge of Matlab, Octave, or R; and knowledge of a word processor. Recommendations: IE:3760 and CS:4400 and CS:3330 and MATH:2550.

IE:4175 Safety Engineering 3 s.h.
Systems safety principles and methods, occupational safety, product safety and liability, accident investigation and prevention methods and analysis, hazard analysis, and standards and regulations.

IE:4550 Wind Power Management 3 s.h.
Principles of wind power production, wind turbine design, wind park location and design, turbine and wind farm control, predictive modeling, integration of wind power with a grid.

IE:4600 Industrial Engineering Design Project 1-4 s.h.
Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Offered spring semesters. Corequisites: IE:3300 and IE:3550 and IE:3450 and IE:3500 and IE:3600 and IE:3750, if not taken as prerequisites.

IE:4610 Enhanced Design Experience 2-3 s.h.
Real-world, in-depth design experience in student teams, working with engineers at major companies in the region; application of industrial engineering knowledge and skills to design products and related operational systems.

IE:4900 Introduction to Six Sigma 3 s.h.
Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills; application of the DMAIC model to a real-life improvement projection (a “learn-by-doing” approach). Prerequisites: IE:3600.

IE:5000 Graduate Seminar: Industrial Engineering 1 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.

IE:5129 Information Systems for Resource Management 3 s.h.
Understanding and managing natural and engineered resources requiring data-reach foundation; management of data; complex data-driven technologies integrated into data and information systems (DIS); hands-on opportunity to develop or use capabilities of DIS for study or research area of interest (science, engineering, industrial operation); wind power generation, an emerging field in Iowa, used as a case study for illustrating key DIS components, links, and functionalities. Same as CEE:5129, ECE:5129, GEOG:5129, ME:5129.

IE:5860 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as HMP:5370, IGPI:5200, MED:5300, RSNM:3195, SLIS:5900.

IE:5870 Health Informatics II 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as BME:5252, IGPI:5210, RSNM:5301.

IE:5995 Contemporary Topics in Industrial Engineering arr.
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.

Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in industrial engineering. Requirements: graduate standing.

IE:6211 Human Factors in Healthcare Systems 3 s.h.
Solving human factors problems in health care work systems; cognitive systems engineering, interface design, health care productivity, patient safety; specific research including decision making, information transfer, and communication; discrete event and dynamic systems simulation modeling; human computer interaction; health information technology/systems; usability; business models of organizational, technical, and social elements of health care systems.

IE:6232 Advanced Computer-Aided Design and Manufacturing 3 s.h.
In-depth study of CAD and manufacturing (CAD/CAM); review of CAD/CAM, computer graphics, NURBS modeling (curves/surfaces, solid modeling, design data exchange); computational geometry for product development, heterogeneous object modeling, rapid prototyping (RP) and layered manufacturing, computer-aided path planning, CAD applications (computer-aided tissue engineering, biomedical imaging and processing, biomaterials); related lab projects and assignments. Requirements: knowledge of one programming language (C, C++, C#, VB, or Java).

IE:6300 Innovation Science and Studies 3 s.h.
Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.
IE:6350 Computational Intelligence 3 s.h.
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: IE:3700. Same as NURS:6900.

IE:6410 Research Methods in Human Factors Engineering 3 s.h.
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance.

IE:6420 Human/Computer Interaction 3 s.h.
Development of projects using human factors principles in the design of computer interfaces.

IE:6440 Airborne Design of Experiments 3 s.h.
Issues in design of airborne human factors research, and techniques applicable to ground transportation research; statistical, human factors, flight mechanics, and organizational principles in flight test engineering; basic understanding of systematic approach to human factors flight testing, development of test points and test apparatus, flight envelope, proper briefing techniques, mission execution, and after-action review; securing, synchronizing, and analyzing data.

IE:6450 Human Factors in Aviation 3 s.h.
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development.

IE:6460 The Design of Virtual Environments 3 s.h.
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software.

IE:6480 Unmanned Aircraft Systems 3 s.h.
Applications and research in unmanned aircraft systems (UAS) with focus on engineering aspects; new era of aviation and how UAS are fast emerging as a disruptive technology in aviation; applications ranging from film production, photography, precision agriculture, remote sensing, and infrastructure inspections to military applications; problem space of UAS from a variety of angles including engineering controls design, data links, UAS types, human factors, regulatory aspects.

IE:6600 Linear Programming 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as MSCI:6600.

IE:6720 Nonlinear Optimization 3 s.h.
Mathematical models, theory, algorithms for constrained and unconstrained nonlinear optimization; optimality conditions and aspects of duality theory; applications of nonlinear optimization in data analytics and machine learning.

IE:6750 Stochastic Optimization 3 s.h.
General tools and approaches used in decision making under uncertainties; modeling of uncertainties and risk, changes that uncertainties bring to the decision process, difficulties of incorporating uncertainties into optimization models, common techniques for solving stochastic problems.

IE:6760 Pattern Recognition for Temporal Data 3 s.h.
Harvesting of useful information and patterns from temporal and sequential data; fundamental techniques including temporal data representation, similarity computation, time series classification and clustering, pattern discovery, anomaly detection, hidden Markov model, and stochastic filtering; applications in different areas such as health care and bioinformatics, business and financial engineering, and web usage mining.

IE:6770 Game Theory 3 s.h.
Problems, challenges, solution strategies, and other elements that arise among decision makers who have aligned or opposing objectives; changes that collaboration and competition bring to decision making and problem solving; how ideas and concepts of game theory can be used to understand economic, industrial, social, and biological phenomena. Requirements: basic linear programming and probability.

IE:6780 Financial Engineering and Optimization 3 s.h.
Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates; options and futures contract valuation, including weather and energy derivatives; risk management and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

IE:6790 Reliability Theory and Applications 3 s.h.
Fundamental topics in reliability engineering, including system reliability modeling, statistical inference of lifetime data, basic preventive maintenance models; statistics and random process models, and online monitoring and change detection techniques. Prerequisites: MATH:2550 and STAT:2020.

IE:7995 Advanced Topics: Industrial Engineering arr.
Discussion of current literature in industrial engineering.

IE:7998 Special Topics in Industrial Engineering arr.
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering.

<tbody>
<tr>
<td>ME:3040</td>
<td>Thermodynamics II</td>
<td>3</td>
<td>Power and refrigeration cycles; mixtures of gases; psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisites: ENGR:2130.</td>
</tr>
<tr>
<td>ME:3052</td>
<td>Mechanical Systems</td>
<td>4</td>
<td>Topics in mechanical behavior and failure of materials; materials selection in design; stress and deflection analysis; static failure theories; fatigue and durability in design; fracture, statistical, and reliability considerations; introduction to finite element analysis using commercial software packages; standards, product liability, engineering ethics. Prerequisites: ENGR:2750. Corequisites: ENGR:2720 and ENGR:2760 and STAT:2020.</td>
</tr>
<tr>
<td>ME:3091</td>
<td>Professional Seminar: Mechanical Engineering</td>
<td>0</td>
<td>Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Requirements: junior standing.</td>
</tr>
<tr>
<td>ME:3351</td>
<td>Engineering Instrumentation</td>
<td>2</td>
<td>Basic elements of measuring circuits (bridges, voltage dividers, shunts, transformers); laboratory instrumentation (oscilloscopes, multimeters, power supplies, signal generators); amplifiers; frequency response principles; sensors; data acquisition, signal processing, filtering using Labview. Prerequisites: PHYS:1612 and ENGR:2120.</td>
</tr>
<tr>
<td>ME:4048</td>
<td>Energy Systems Design</td>
<td>4</td>
<td>Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: ME:3045 and ME:3040.</td>
</tr>
<tr>
<td>ME:4055</td>

</tr>
<tr>
<td>ME:4125</td>
<td>Biomimetic Fluid Dynamics</td>
<td>3</td>
<td>Study and development of engineered systems that mimic the structure and function of biological systems; overview of the fluid dynamic principles that govern locomotion by swimming or flapping flight; equations of motion, fundamentals of aerodynamics; analytical models of force generation for swimming and flight; parameters governing effective locomotion; experimental and numerical studies to understand the present state of the art, challenges, and important questions. Prerequisites: ENGR:2510.</td>
</tr>
<tr>
<td>ME:4142</td>
<td>Wind Turbine Aerodynamics</td>
<td>3</td>
<td>Fluid mechanics of wind turbines and wind farms; engineering methodologies to design wind turbine blades; evaluation of rotor wakes; interaction between machines; effects of topography on wind turbine and wind farm performance. Prerequisites: ENGR:2510.</td>
</tr>
</tbody>
</table>
ME:4153 Fundamentals of Vibrations 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as CEE:4532.

ME:4164 Fundamentals of Wind Turbines arr.
Application of fundamental principles of thermodynamics, fluid mechanics, and mechanical systems to wind turbine engineering; fundamentals of horizontal-axis wind turbines, wind energy conversion to useful work; wind turbine aerodynamics, performance, design of components; overview of wind resource and historical development of wind farm operation.

ME:4175 Computational Naval Hydrodynamics 3 s.h.
Simulations based on relevant vessels and propellers will be used to introduce the use of computational fluid dynamics for the analysis of surface and underwater marine craft performance, while also introducing naval hydrodynamics concepts related to resistance, propulsion, maneuvering, and seakeeping; an educational version of the naval hydrodynamics code REX will be freely distributed and used in the class. Prerequisites: ENGR:2510.

ME:4176 Experimental Naval Hydrodynamics 3 s.h.
Introduction to experimental methods for measurement of propeller thrust performance and resistance of surface vessels and underwater marine craft; present and expand on fundamental concepts related to fluid mechanics, measurement methods, and uncertainty analysis in a context that focuses on naval science and technology challenges; students work with models of relevant vessels and propellers in a dedicated towing tank facility. Prerequisites: ENGR:2510.

ME:4186 Enhanced Design Experience 2-3 s.h.
Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: ME:4086.

ME:5113 Mathematical Methods in Engineering 3 s.h.

ME:5129 Information Systems for Resource Management 3 s.h.
Understanding and managing natural and engineered resources requiring data-reach foundation; management of data; complex data-driven technologies integrated into data and information systems (DIS); hands-on opportunity to develop or use capabilities of DIS for study or research area of interest (science, engineering, industrial operation); wind power generation, an emerging field in Iowa, used as a case study for illustrating key DIS components, links, and functionalities. Same as CEE:5129, ECE:5129, GEOG:5129, IE:5129.

ME:5143 Computational Fluid and Thermal Engineering 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisites: ME:3045.

ME:5145 Intermediate Heat Transfer 3 s.h.
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: ME:3045.

ME:5146 Modeling of Materials Processing 3 s.h.
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Corequisites: ME:3045.

ME:5149 Propulsion Engineering 3 s.h.
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems, relevant terminology and analysis techniques, parameteric cycle analysis for ideal engines, off-design analysis methods, problem-solving methodology. Requirements: ME:3040 or graduate standing.

ME:5150 Intermediate Mechanics of Deformable Bodies 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as BME:5660, CEE:5540.

ME:5154 Intermediate Kinematics and Dynamics 3 s.h.
Kinematic and dynamic analysis of mechanical systems; computational kinematics, Lagrangian dynamics, principle of virtual work in dynamics, constrained dynamics, spatial dynamics. Prerequisites: ENGR:2710.

ME:5159 Fracture Mechanics 3 s.h.
3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: BME:4910 or ME:4055 or ME:5150. Same as CEE:5549.

ME:5160 Intermediate Mechanics of Fluids 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as CEE:5369.
ME:5162 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as CEE:5372.

ME:5167 Composite Materials 3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as CEE:5137.

ME:5179 Continuum Mechanics arr.
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as CEE:5179.

ME:5180 Measurements in Fluid Mechanics: Fundamental and Advanced Topics 3 s.h.
General concepts in fluid mechanics measurement; classical methods for flow rate, pressure, velocity, temperature, concentration, and wall shear stress; state-of-the-art methods for flow visualization and full-field quantitative measurement; introduction to advanced optical measurement method, i.e., particle image velocimetry (PIV), and related image processing techniques; hands-on training with a class project assignment on writing a computer program to evaluate experimental image recordings. Prerequisites: ENGR:2510. Requirements: primary knowledge of fluid mechanics, thermodynamics, and heat transfer; basic skill in computer language.

ME:5195 Contemporary Topics in Mechanical Engineering arr.
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Requirements: junior standing.

ME:5210 Intermediate Thermodynamics 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as CEE:5110.

ME:5236 Optimization of Structural Systems 3 s.h.
Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720, CEE:5236.

ME:5360 Control Theory 3 s.h.
State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600. Same as ECE:5600.

ME:5362 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as ECE:5640, IGPI:5641.

ME:6191 Graduate Seminar: Mechanical Engineering 1 s.h.
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students.

ME:6198 Individual Investigations: Mechanical Engineering arr.
Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in mechanical engineering.

ME:6214 Analytical Methods in Mechanical Systems 3 s.h.
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as CEE:6310.

ME:6215 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, IGPI:6216.

ME:6216 Laser Materials Processing 3 s.h.
Proficient engineering background involved in laser processing and manufacturing; fundamentals and operation principles for various types of laser systems; laser optics, principles of laser-matter interactions, laser-induced thermal and thermo-mechanical effects; emerging areas of laser applications (e.g., microscale and nanoscale laser processing, ultrafast laser processing) and related energy transport analyses; video demonstrations. Prerequisites: ME:3045 and MATH:3550.

ME:6217 Advanced Modeling and Simulation for Manufacturing 3 s.h.
How materials often behave in a complicated manner involving deeply coupled effects among stress/stain, temperature, and microstructure during a manufacturing process; modeling and prediction of material processes based on a metallo-thermomechanical coupled analysis; focus on heat transfer modeling in material processes, fundamental mechanics aspects required for material processing analysis, and microstructural evolution modeling in material processes. Prerequisites: CEE:4533 and ME:3045.

ME:6245 Diffusive Transport 3 s.h.
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as CBE:6145.
ME:6246 Advanced Numerical Methods for Mechanical Systems 3 s.h.
Introduction to meshfree particle methods, extended finite element method, material stability analysis, thermal-mechanical coupling, and coupling of finite element/meshfree methods. Requirements: ME:4115 or ME:5143 or background in computational mechanics, computational chemistry, or computational physics.

ME:6247 Contact Mechanics 3 s.h.
Varied aspects of contact mechanics and engineering applications, including stationary contacts, sliding, rolling, impact, and fretting fatigue; emphasis on theoretical basis of solutions of contact mechanics problems; mathematical methods of solving contact problems using Green's function method; complex potentials and integral transform methods. Prerequisites: ME:5113 and ME:5150.

ME:6255 Multiscale Modeling 3 s.h.
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as CEE:7549.

ME:6258 Computational Ship Hydrodynamics 3 s.h.
Introduction to computation of problems in three main areas of ship hydrodynamics: resistance and propulsion, seakeeping, and maneuvering; focus on issues of simulating operating ships, modeling methods, and numerical techniques used to approach ship hydrodynamics. Prerequisites: ME:5160. Corequisites: ME:5143.

ME:6260 Viscous Flow 3 s.h.
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers -- equations, solution methods, applications; stability theory and transition; incompressible turbulent flow -- mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260 -- ME:5160; for CEE:6376 -- CEE:5369. Same as CEE:6376.

ME:6261 Multibody System Dynamics 3 s.h.
Introduction to principles of analytical and computational dynamics for rigid and flexible multibody systems; spatial kinematics and dynamics of rigid body systems, numerical solution procedures for multibody dynamics analysis, and flexible multibody dynamics. Prerequisites: ME:5154.

ME:6262 Inviscid Flow 3 s.h.
Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; vortex kinematics and dynamics; steady and unsteady aerodynamic theory. Prerequisites: ME:5160.

ME:6263 Compressible Flow arr.
Compressible flow behavior; 1-D unsteady flow and appropriate use of x-t diagrams; 2-D flows and use of the method of characteristics; Burgers' Equation and its properties.

ME:6275 Advanced Heat Transfer 3 s.h.
Conservation laws, forced and natural convection; surface and gaseous radiation; analytical and numerical methods; applications. Prerequisites: ME:5145.

ME:6278 Nonlinear Elasticity 3 s.h.
Nonlinear elasticity theory; modern applications in biomechanics; vectors and tensors, constitutive theory of elastic material, some exact solutions of boundary value problems, inverse deformation relations, stability of elastic material, theories of tissue adaptive response. Prerequisites: ME:5150. Requirements: elementary linear elasticity.

ME:6534 Applied Optimal Design 3 s.h.
Optimal design problem formulation; optimality conditions; linear, quadratic, convex, and nonlinear programming; Lagrangian duality; numerical algorithms for unconstrained and constrained design problems, design sensitivity analysis, engineering applications. Prerequisites: CEE:5513. Same as CEE:6534.

ME:7248 Combustion Theory 3 s.h.
Laminar flame theory; turbulent combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: ME:5145 and ME:5160.

ME:7250 Advanced Fracture Mechanics 3 s.h.
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as CEE:7250.

ME:7256 Computational Solid Mechanics 3 s.h.
Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: ME:5113 and CEE:4533.

ME:7257 Probabilistic Mechanics and Reliability 3 s.h.
Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: CEE:4533 and ME:5113.

ME:7259 Mechanical Design in Structures 3 s.h.
Discrete and continuum variational equilibrium equations, discrete design sensitivity analysis for static responses and eigenvalues, interactive design workstation, continuum sizing design sensitivity analysis for static responses and eigenvalues, design sensitivity analysis of structural dynamics, differentiability theory, shape optimal design, shape design sensitivity analysis, design sensitivity of nonlinear structural systems. Prerequisites: CEE:4533 and ME:5113 and ME:5150.

ME:7265 Multiphysics Modeling of Solids 3 s.h.
Coupling of mechanical, electrical, electromagnetic, and thermal fields in solids; how to formulate and solve applied multiphysics problems where mechanical, electromagnetic, and thermal loads must be taken into account. Prerequisites: ME:5150.

ME:7266 Interfacial Flows and Transport Processes 3 s.h.
Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: ME:5145 and ME:5160.
ME:7267 Multiphase Flow and Transport 3 s.h.
Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: ME:5145 and ME:5160.

ME:7268 Turbulent Flows 3 s.h.
Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: ME:5160.

ME:7269 Computational Fluid Dynamics and Heat Transfer 3 s.h.
Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: ME:4111 and ME:5160.

ME:7295 Advanced Topics in Mechanical Systems 3 s.h.
Advanced contemporary topics in mechanical systems engineering not covered in other courses and determined by student/faculty interest.

ME:7296 Advanced Topics in Thermal and Fluid Engineering arr.
Thermodynamics, fluid mechanics, heat and mass transfer, related experimental and analytical techniques; selection of subject and content determined by instructor/student interest.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering.
Industrial Engineering, B.S.E.

The educational objective of the B.S.E. program in industrial engineering is to produce graduates who, within a few years of graduation:

- will have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- will have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- will be engaged in workplace, professional, or civic communities.

Visit Industrial Engineering Program Educational Objectives on the Department of Mechanical and Industrial Engineering website to learn more.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, manufacturing, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Engineering Problem Solving I, ENGR:1300 Engineering Problem Solving II, and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog.

Students must select elective focus area courses according to guidelines established by the Department of Mechanical and Industrial Engineering. See "Elective Focus Area" below.

Elective Focus Area

The industrial engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see Bachelor of Science in Engineering [p. 1157] in the Catalog. For a list of standard industrial engineering elective focus area options and guidelines for tailored elective focus areas, see Industrial Engineering Undergraduate Program on the Department of Mechanical and Industrial Engineering website.

Joint B.S.E./M.S.: Industrial Engineering

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for industrial engineering undergraduate students who intend to earn an M.S. in industrial engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work, attend the program’s graduate seminar, and work with a faculty member on a master’s thesis project while they are still undergraduates. They may count 6 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

Some students in undergraduate majors other than industrial engineering may be admitted to the combined program; they must meet the same admission requirements as industrial engineering majors. In some cases, they may be required to take additional course work to meet the prerequisite requirements for upper-level courses.

Academic Plans

The following study plan includes the B.S.E. core requirements and the curriculum for the industrial engineering major. Some courses in the curriculum are prerequisites for others. Students must complete a course's prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

### Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
**Mechanical Engineering, B.S.E.**

The educational objective of the B.S.E. program in mechanical engineering is to produce graduates who, within a few years of graduation:

- will have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- will have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- will be engaged in workplace, professional, or civic communities.

Visit Mechanical Engineering Program Educational Objectives on the Department of Mechanical and Industrial Engineering website to learn more.

### Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The major in mechanical engineering lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.

Mechanical engineering students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations. They also acquire an appreciation of professional and ethical responsibilities.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Engineering Problem Solving I, ENGR:1300 Engineering Problem Solving II, and courses in chemistry, engineering mathematics and fundamentals, and physics. They must earn a grade of C-minus or higher in the core requirements MATH:1550 Engineering Mathematics I: Single Variable Calculus and MATH:1560 Engineering Mathematics II: Multivariable Calculus.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component (15 s.h. of humanities and social science courses). For information about the curriculum stems, see Bachelor of Science in Engineering [p. 1157] in the Catalog.

Upper-level students work on team projects in a senior capstone design course, ME:4086 Mechanical Engineering Design Project. Some students may arrange to participate in established research projects.

Students must select elective focus area courses according to guidelines established by the Department of Mechanical and Industrial Engineering. See “Elective Focus Area” below.

### Elective Focus Area

The mechanical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see Bachelor of Science in Engineering [p. 1157] in the Catalog. For a list of standard mechanical engineering elective focus area options and guidelines for tailored elective focus areas, see Mechanical Engineering Undergraduate Program on the Department of Mechanical and Industrial Engineering website.

### Joint B.S.E./M.S.: Mechanical Engineering

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for mechanical engineering undergraduate students who intend to earn an M.S. in mechanical engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work, attend the program’s graduate seminar, and participate in master’s research while they are still undergraduates. They may count 6 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor’s degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

### Academic Plans

The following study plan includes the B.S.E. core requirements and the curriculum for the mechanical engineering major. Some courses in the curriculum are prerequisites to others. Students must complete a course’s prerequisites before they may register for the course. Those who take courses in the order below satisfy the prerequisite requirements automatically.

- General education component course 3

### Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor’s degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Industrial Engineering, M.S.

Research and Study in Industrial Engineering

Graduate study in industrial engineering is tailored individually. Programs of study for all students are based on their background and career objectives and are designed according to sound academic practice. The curriculum is highly flexible; the goal is academic excellence.

The program offers six principal academic focus areas: design and manufacturing, human factors engineering and ergonomics, engineering management, reliability and production systems, operations research and applied statistics, and information systems. Graduate students participate in research in their academic concentration areas.

Engineering Management

Current research in engineering management consists of entrepreneurship, parametric cash flow analysis, strategic management, and economic risk analysis. Engineering management studies concentrate on engineering administration, engineering economics, and information systems. This area is covered by courses in the 50 series.

Human Factors and Ergonomics

Current research in human factors and ergonomics includes investigation of the effects of visual and auditory displays on human information processing and development of computer systems that ease the challenges of controlling complex medical and robotic systems. This work examines how engineers should shape information technology to enhance productivity, safety, and customer satisfaction. Industrial engineering faculty members and students work to improve the effectiveness of robot systems for exploration of Mars and the Moon, to improve driving safety, and to design new cockpit interfaces. The department has several medical, flight, and driving simulators. It also conducts research in other facilities, including the National Advanced Driving Simulator, the most advanced simulation facility in the world.

Human factors and ergonomics studies concentrate on designing systems compatible with human capabilities and limitations. Human factors engineering integrates components from the fields of psychology, cognitive sciences, physiology, statistics, and technical sciences to address issues of human-interface design and human-systems design. Specific considerations include human cognitive abilities and limitations, visual performance, error reduction, workload assessment and mitigation, design of jobs in the industrial environment, information acquisition and processing, choice of action, operator performance measurement, and economic concerns. This area is covered by courses in the 40 series.

Information Systems

Studies in information systems concentrate on system design. Design problems involve devising information systems that meet a diverse set of requirements. Contemporary topics include network-based systems, client/server systems, internet systems, and medical informatics.

Manufacturing

Ongoing manufacturing research consists of flexible manufacturing systems, optimum control of processes, and reliability assessment. Manufacturing courses, denoted by the 30 series, delve into selecting appropriate manufacturing methods, planning processing operations, devising control strategies, and designing products and manufacturing systems. Contemporary topics include computer-aided process planning, computer-aided design, computer-controlled manufacturing, concurrent engineering, and applications of artificial intelligence in manufacturing.

Operations Research and Applied Statistics

Ongoing research in operations research and applied statistics deals with the application of optimization techniques for informed decision making in the public and private sectors. The primary focus of this work is modeling, simulating, and optimizing the design and operation of systems such as logistics, communications, health care, and manufacturing. Studies in operations research and applied statistics concentrate on mathematical programming, statistical, and computer sciences for modeling, analyzing, and optimizing systems. Various methodologies in this area include mathematical programming, heuristic optimization, statistical analysis, and digital systems simulation. This area is covered by courses in the 70 series.

Quality Control and Production Systems

Current research in quality control and production systems focuses on measures for corporate quality and reliability, computer-aided layout and scheduling, just-in-time production, inspection, and online expert systems in process control. Studies of quality control and production systems focus on reliability engineering, quality control, and production systems. This area is covered by courses in the 60 series.

Related Certificate: Informatics

The Graduate College offers the Certificate in Informatics with a health informatics subtrack. The subtrack emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care. Industrial engineering students working toward the certificate complete IE:5860 Health Informatics I, IE:5870 Health Informatics II, and approved electives. To learn more, see Certificate in Informatics [p. 1295] in the Graduate College section of the Catalog.

Requirements

The Master of Science program in industrial engineering requires a minimum of 30 s.h. of graduate credit with thesis, and a minimum of 36 s.h. of graduate credit without thesis. Students who intend to pursue a Ph.D. should select the thesis option; those who hold research or teaching assistantships may be required to select the thesis option. The M.S. concentration in wind power management is open to students in either option.

All M.S. students must earn 21 s.h. in graduate-level industrial engineering courses. They earn a minimum of 9 s.h. in 5000-level industrial engineering courses and complete at least
one 3000- or 5000-level course from each of three focus areas: human factors, operations research, and reliability and systems design. Thesis students who plan to pursue a Ph.D. may choose to take two 5000-level courses in each of the three focus areas in order to complete their Ph.D. breadth requirement before entering the doctoral program. Students select other courses in consultation with their advisors; choices are documented in a student's plan of study.

Thesis students may count a maximum of 6 s.h. of research credit toward the degree and may include that credit in the required 21 s.h. of graduate-level industrial engineering courses. The thesis option does not include research credit.

All graduate students must register for IE:5000 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

M.S. students must maintain a g.p.a. of at least 3.00 on all graduate work at the University of Iowa and must pass a final comprehensive examination as specified by their examining committees.

Entering students must have strong verbal and written skills in English and a background in computer programming (e.g., C++, C, VB), probability, statistics, and mathematics equivalent to that required by accredited undergraduate engineering programs. Students with insufficient academic background must remedy deficiencies by taking appropriate courses beyond those normally required for the study plan.

Entering students are advised by the department chair or by a designated faculty advisor. The department chair or the graduate program coordinator assigns an advisor to students during their first regular semester in residence.

During that semester, each student and the advisor prepare a study plan, which they submit to the department chair for approval. Once the plan is approved, it is filed with a student's record. It is a student's responsibility to assure that the study plan is submitted to the department chair.

M.S. students must pass a final comprehensive examination, as specified by their examining committees. Examination committees consist of at least three Graduate College faculty members and must be approved by the department chair.

The comprehensive examination may consist of both oral and written parts. Its purpose is to assess the adequacy of a student's defense of thesis and/or course preparation. The final study plan, approved by the Graduate College dean, is prerequisite to the exam. A student should consult with the advisor on the composition of the advisory/examination committee and the time and place for the exam.

It is a student's responsibility to submit a degree application by the college's deadline.

For more detailed information about M.S. program requirements, including a list of focus area courses, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering website.

**M.S. Concentration in Wind Power Management**

M.S. students in industrial engineering may elect to concentrate in wind power management. They must meet all regular requirements for the M.S. in industrial engineering. In addition, thesis option students must take three courses (9 s.h.) from the list of recommended courses. Nonthesis option students must take four courses (12 s.h.) from the list of recommended courses and one course (3 s.h.) from the list of electives. Students' course selections must be approved by their advisors.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

Reference letters, student research interests, grade-point average for previous graduate study, and factors such as faculty availability are considered in admission decisions.

M.S. applicants may be admitted from an ABET-accredited baccalaureate curriculum in any engineering discipline, or in the mathematical sciences, the physical sciences, or the computer sciences with a g.p.a. of at least 3.00 and an acceptable score on the Graduate Record Examination (GRE) General Test. Applicants from institutions outside the United States must meet equivalent conditions for regular admission. Students with lesser qualifications may be considered for conditional admission.

Students from business or social science programs who have mathematical preparation similar to that of engineering students are considered for regular or conditional admission. Students on conditional status must achieve regular status within two sessions of their first registration by attaining an acceptable grade-point average and gaining regular acceptance by the industrial engineering program faculty; otherwise, they are dismissed. Admissions may be limited by available resources.
Financial Support

A number of one-quarter-time and one-half-time teaching and research assistantships are available for graduate students. Awards are based on students' academic records and assessment of their potential contribution to the research and teaching goals of the program. Advanced graduate students also may qualify for appointments as graduate teaching fellows. Contact the chair of the Department of Mechanical and Industrial Engineering for details.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Mechanical Engineering, M.S.

Research and Study in Mechanical Engineering

The graduate programs in mechanical engineering educate students in more depth and breadth than is possible at the baccalaureate level. This prepares the graduate to use contemporary methods at advanced levels in professional careers in engineering design, development, teaching, and research. Plans of study for all students are based on their background and career objectives, and are designed according to sound academic practice. Faculty members in the program have teaching and research expertise in energy and power conversion, fluid and thermal sciences, solid mechanics, mechanical systems, and related areas.

Students may develop programs emphasizing fluid mechanics, thermodynamics, heat transfer, fatigue and fracture mechanics, and mechanical systems. Some may pursue more general programs that combine emphases. Others may specialize in interdisciplinary areas (e.g., energy engineering, materials engineering, automatic control, chemical processes), which involve a combination of mechanical and industrial engineering departmental courses and appropriate electives from other departments in the College of Engineering and across the University. Ph.D. programs may center on any one of these areas through choice of appropriate course work and research topic.

For more information, see the Mechanical Engineering Graduate Student Handbook, available from the department.

The mechanical engineering program offers the following research and study areas.

Fluid Mechanics

The graduate program in fluid mechanics provides a rigorous and broad foundation in theoretical, numerical, and experimental aspects of the subject. It is especially suitable for those seeking careers in teaching and/or research in academic and industrial organizations. The program focuses on fundamental principles and techniques of solving problems in the varied fields of fluids engineering. It emphasizes computer use, both in mathematical modeling of flow phenomena and in acquisition and processing of experimental data.

Although most of the relevant courses are offered by the Department of Mechanical and Industrial Engineering, students are strongly encouraged to take applied mathematics and classical mechanics courses offered by the Departments of Mathematics [p. 645] and Physics and Astronomy [p. 712] in the College of Liberal Arts and Sciences and by other College of Engineering departments.

Current research projects include computational modeling of viscous and turbulent flows; vortex dynamics; unsteady flows; pulmonary flow; flow separation and control; atmospheric flows; environmental flows; ship hydrodynamics; viscous flow around ships; propulsor flow and propulsor-body interactions; free-surface effects; nonlinear wave theory; biomimetic fluid mechanics; hydraulic turbines; quantitative flow visualization and image processing; computational fluid dynamics; LDV and thermal anemometry for flow analysis; and uncertainty analysis.

Mechanical Systems

The graduate program in mechanical systems is designed to provide students with a broad, strong background in theoretical, computational, experimental, and applied aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, multiscale modeling and simulation, and experimentation used to analyze and design mechanical systems. Areas of concentration include reliability-based design and optimization, nanotechnology, tissue mechanics, machine and vehicle dynamics, optimal design, structural sensitivity analysis and optimization, computational solid mechanics, probabilistic mechanics, mechanics of composite materials, reliability, and fatigue and fracture mechanics.

Although most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering, students are encouraged to consider appropriate course work from other areas, including courses offered by other College of Engineering departments and in disciplines such as mathematics [p. 645], statistics [p. 875], and physics [p. 712].

Current research projects include computational mechanics, tissue mechanics, multiphysics, and multiple-scale problems; mechanics of multifunctional composites and nanocomposites, electromagnetic and thermal effects in composites, micromechanical modeling of multiphase composites and nanocomposites, impact and failure of composites, contact mechanics problems with friction and adhesion; stochastic meshfree and finite element methods; design sensitivity analysis of nonlinear structural systems; reliability-based design optimization; surrogate modeling for reliability-based design optimization; shape optimal design of elastoplastic materials; optimal design of metal stamping process; probabilistic and elastic-plastic fracture mechanics; damage tolerant design; fatigue behavior and life prediction under constant and variable amplitude loading; design sensitivity analysis of rigid and flexible mechanical systems; multibody system dynamics, tire dynamics, wheel and rail contact dynamics; wind turbine drivetrain dynamics; and vehicle system dynamics.

Thermal Sciences

The graduate program in thermal sciences and systems is designed to provide students with a rigorous and broad foundation in theoretical and experimental aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamentals of thermodynamics and heat transfer, and associated analytical, numerical, and experimental methods used in energy systems. Areas of concentration include fluid mechanics, thermodynamics, heat transfer, phase-change, combustion, and fuel cells.

Most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering. Students are encouraged to balance their programs by supplementing these with appropriate course work from other areas, including courses offered by other College of Engineering departments and in disciplines such as mathematics [p. 645] and physics [p. 712].

Current research projects include biomass gasification; turbulent flames; combustion of biomass; alternative and renewable fuels; combustion instability; spray atomization and combustion; transport modeling of fuel cells; transport phenomena in materials processing, melting,
and solidification; and optical-based diagnostics of complex thermal processes.

**Requirements**

The Master of Science program in mechanical engineering requires a minimum of 30 s.h., with or without thesis. Thesis students may count 6-9 s.h. earned for thesis research and writing toward the degree. Each student determines a study plan in consultation with an advisor and submits the plan to the department chair for approval.

All M.S. students must register for ME:6191 Graduate Seminar: Mechanical Engineering each semester.

To earn the M.S., a student must maintain a g.p.a. of at least 3.00 on graduate work used to satisfy the degree requirements and must be successful in the final examination. This examination is administered by a student's committee, which consists of at least three faculty members, including at least one with primary appointment in the Department of Mechanical and Industrial Engineering.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete the degree.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. In order to be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on a 4.00 scale on all previous college-level work and Graduate Record Examination (GRE) General Test scores of at least 500 verbal, 750 quantitative, and 4.5 analytical writing. Students whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign language (TOEFL).

Applicants with a lower grade-point average and/or GRE or TOEFL test scores may be considered for conditional admission, under exceptional circumstances. Applicants admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

**Financial Support**

Financial support is available to M.S. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical and Industrial Engineering, the Center for Computer-Aided Design, IIHR—Hydroscience and Engineering, and the National Advanced Driving Simulator. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student’s potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. All applications for financial support should be submitted directly to the department chair.

M.S. students with assistantship appointments of one-quarter-time or more are required to register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of course and research work beyond the baccalaureate degree.

**Career Advancement**

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Industrial Engineering, Ph.D.

Research and Study in Industrial Engineering

Graduate study in industrial engineering is tailored individually. Study programs for all students are based on their background and career objectives, and are designed according to sound academic practice. The curriculum is highly flexible; the goal is academic excellence.

The program offers six principal academic focus areas: design and manufacturing, human factors engineering and ergonomics, engineering management, reliability and production systems, operations research and applied statistics, and information systems. Graduate students participate in research in their academic concentration areas.

Engineering Management

Current research in engineering management consists of entrepreneurship, parametric cash flow analysis, strategic management, and economic risk analysis. Engineering management studies concentrate on engineering administration, engineering economics, and information systems. This area is covered by courses in the 50 series.

Human Factors and Ergonomics

Current research in human factors and ergonomics includes investigation of the effects of visual and auditory displays on human information processing and development of computer systems that ease the challenges of controlling complex medical and robotic systems. This work examines how engineers should shape information technology to enhance productivity, safety, and customer satisfaction. Industrial engineering faculty members and students work to improve the effectiveness of robot systems for exploration of Mars and the Moon, to improve driving safety, and to design new cockpit interfaces. The department has several medical, flight, and driving simulators. It also conducts research in other facilities, including the National Advanced Driving Simulator, the most advanced simulation facility in the world.

Human factors and ergonomics studies concentrate on designing systems compatible with human capabilities and limitations. Human factors engineering integrates components from the fields of psychology, cognitive sciences, physiology, statistics, and technical sciences to address issues of human-interface design and human-systems design. Specific considerations include human cognitive abilities and limitations, visual performance, error reduction, workload assessment and mitigation, design of jobs in the industrial environment, information acquisition and processing, choice of action, operator performance measurement, and economic concerns. This area is covered by courses in the 40 series.

Information Systems

Studies in information systems concentrate on system design. Design problems involve devising information systems that meet a diverse set of requirements. Contemporary topics include network-based systems, client/server systems, internet systems, and medical informatics.

Manufacturing

Ongoing manufacturing research consists of flexible manufacturing systems, optimum control of processes, and reliability assessment. Manufacturing courses, denoted by the 30 series, delve into selecting appropriate manufacturing methods, planning processing operations, devising control strategies, and designing products and manufacturing systems. Contemporary topics include computer-aided process planning, computer-aided design, computer-controlled manufacturing, concurrent engineering, and applications of artificial intelligence in manufacturing.

Operations Research and Applied Statistics

Ongoing research in operations research and applied statistics deals with the application of optimization techniques for informed decision making in the public and private sectors. The primary focus of this work is modeling, simulating, and optimizing the design and operation of systems such as logistics, communications, health care, and manufacturing. Studies in operations research and applied statistics concentrate on mathematical programming, statistical, and computer sciences for modeling, analyzing, and optimizing systems. Various methodologies in this area include mathematical programming, heuristic optimization, statistical analysis, and digital systems simulation. This area is covered by courses in the 70 series.

Quality Control and Production Systems

Current research in quality control and production systems focuses on measures for corporate quality and reliability, computer-aided layout and scheduling, just-in-time production, inspection, and online expert systems in process control. Studies of quality control and production systems focus on reliability engineering, quality control, and production systems. This area is covered by courses in the 60 series.

Related Certificate: Informatics

The Graduate College offers the Certificate in Informatics with a health informatics subtrack. The subtrack emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care. Industrial engineering students working toward the certificate complete IE:5860 Health Informatics I, IE:5870 Health Informatics II, and approved electives. To learn more, see Certificate in Informatics [p. 1295] in the Graduate College section of the Catalog.

Requirements

The Doctor of Philosophy program in industrial engineering requires a minimum of 72 s.h. It is granted upon demonstration of comprehensive knowledge and scholarly work at the highest level.

A maximum of 36 s.h. earned toward the M.S. may be counted toward the 72 s.h. required for the Ph.D. Students must spend at least two semesters in residence at the University of Iowa. They also must maintain a g.p.a. of at least 3.25 on all graduate work done at the University.

The degree requires broad academic background with considerable depth in at least one area of specialization that
clearly demonstrates a student's capability to do high-level research. Ph.D. students must complete a series of written and oral examinations and a written dissertation based upon the results of an original investigation.

Students without a Master of Science in industrial engineering or a closely allied area must satisfy all requirements for the M.S. in industrial engineering before they may be admitted to the Ph.D. program.

Entering students are advised by the department chair or by a designated faculty advisor. During a student's first regular semester in residence, an advisor is assigned by the department chair or the graduate program coordinator. Students are expected to identify an industrial engineering faculty member willing to serve as their advisor by the end of their first regular semester in the program.

Once a student is assigned an advisor, the student works with the advisor to prepare a study plan, which is submitted to the department chair for approval. Once the plan is approved by the department chair, it is filed with a student's record. At the beginning of each academic year, the industrial engineering faculty reviews the study plan and gives a student feedback regarding progress toward the degree objective. It is the student's responsibility to assure that the study plan is submitted to the program chair.

Admission to degree candidacy requires a g.p.a. of at least 3.25 on all graduate work taken at the University of Iowa, demonstration of capacity for individual research achievement (typically a dissertation research proposal), and successful completion of the comprehensive examination given by the examining committee.

The comprehensive examination is scheduled with approval of a student's advisor and the industrial engineering program coordinator or the graduate coordinator once a student's study plan is essentially completed. The examining committee determines the composition of the exam, including written and oral parts, and determines whether a student is ready to begin dissertation research.

For more detailed information about Ph.D. program requirements, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering website.

All Ph.D. students must satisfy the following requirements.

Graduate students must register for IE:5000 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

**Industrial Engineering Breadth Requirement**

Each Ph.D. student must pass at least two 5000-level industrial engineering courses in each of three focus areas: human factors, operations research, and reliability and systems design. Students who have earned an M.S. in the program may already have satisfied this requirement.

**Qualifying Exam**

Each student must satisfy the qualifying exam requirement in two of the three focus areas. The requirement for a focus area can be satisfied by passing a written qualifying exam in the focus area or by earning a grade of A-minus or higher in each of two 5000-level industrial engineering courses in the focus area.

**Focus Area**

Students select one of the three focus areas and take additional course work in that area. They fulfill the minimum requirement of the focus area, completing at least two additional 5000-level industrial engineering courses in the area.

**Comprehensive Examination**

Each student must demonstrate ability to carry out creative individual research by completing and defending the dissertation research proposal in a comprehensive examination. The exam includes written and oral parts and is conducted by an examining committee of at least five industrial engineering and Graduate College faculty members. It is scheduled after the qualifying examination requirement has been satisfied. The examining committee determines whether a student is ready to begin dissertation research. Once a student has completed the comprehensive examination satisfactorily, the student is accepted as a candidate for the Ph.D.

**Final Examination (Thesis Defense)**

Each student must defend the completed dissertation in the final examination, which is conducted by the examining committee.

**Ph.D. Concentration in Wind Power Management**

Ph.D. students who concentrate in wind power management must meet all regular requirements for the doctoral degree. In addition, they must gain sufficient breadth and depth of domain knowledge in their study area by taking energy-related courses.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

Reference letters, student research interests, grade-point average for previous graduate study, and factors such as faculty availability are considered in admission decisions.

Ph.D. applicants may be admitted from an ABET Inc.-accredited baccalaureate curriculum or a postbaccalaureate curriculum in any engineering discipline or in the mathematical sciences, computer science, or physical sciences with a g.p.a. of at least 3.25 and an acceptable GRE General Test score. Applicants from outside the United States must meet equivalent standards for regular admission as determined by the University of Iowa. Students also may be admitted from business or social science programs as determined individually.

Applicants who intend to pursue a Ph.D. and who have a B.S. or an M.S. without thesis usually are admitted first to the M.S. program. All admissions to the Ph.D. program are reviewed by the graduate studies committee.
Financial Support

A number of one-quarter-time and one-half-time teaching and research assistantships are available for graduate students. Awards are based on students’ academic records and assessment of their potential contribution to the research and teaching goals of the program. Advanced graduate students also may qualify for appointments as graduate teaching fellows. Contact the chair of the Department of Mechanical and Industrial Engineering for details.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on resume and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Mechanical Engineering, Ph.D.

Research and Study in Mechanical Engineering

The graduate programs in mechanical engineering educate students in more depth and breadth than is possible at the baccalaureate level. This prepares the graduate to use contemporary methods at advanced levels in professional careers in engineering design, development, teaching, and research. Plans of study for all students are based on their background and career objectives, and are designed according to sound academic practice. Faculty members in the program have teaching and research expertise in energy and power conversion, fluid and thermal sciences, solid mechanics, mechanical systems, and related areas.

Students may develop programs emphasizing fluid mechanics, thermodynamics, heat transfer, fatigue and fracture mechanics, and mechanical systems. Some may pursue more general programs that combine emphases. Others may specialize in interdisciplinary areas (e., energy engineering, materials engineering, automatic control, chemical processes), which involve a combination of mechanical and industrial engineering departmental courses and appropriate electives from other departments in the College of Engineering and across the University. Ph.D. programs may center on any one of these areas through choice of appropriate course work and research topic.

For more information, see the Mechanical Engineering Graduate Student Handbook, available from the department.

The mechanical engineering program offers the following research and study areas.

Fluid Mechanics

The graduate program in fluid mechanics provides a rigorous and broad foundation in theoretical, numerical, and experimental aspects of the subject. It is especially suitable for those seeking careers in teaching and/or research in academic and industrial organizations. The program focuses on fundamental principles and techniques of solving problems in the varied fields of fluids engineering. It emphasizes computer use, both in mathematical modeling of flow phenomena and in acquisition and processing of experimental data.

Although most of the relevant courses are offered by the Department of Mechanical and Industrial Engineering, students are strongly encouraged to take applied mathematics and classical mechanics courses offered by the Departments of Mathematics (p. 645) and Physics and Astronomy (p. 712) in the College of Liberal Arts and Sciences and by other College of Engineering departments.

Current research projects include computational modeling of viscous and turbulent flows; vortex dynamics; unsteady flows; pulmonary flow; flow separation and control; atmospheric flows; environmental flows; ship hydrodynamics; viscous flow around ships; propulsor flow and propulsor-body interactions; free-surface effects; nonlinear wave theory; biomimetic fluid mechanics; hydraulic turbines; quantitative flow visualization and image processing; computational fluid dynamics; LDV and thermal anemometry for flow analysis; and uncertainty analysis.

Mechanical Systems

The graduate program in mechanical systems is designed to provide students with a broad, strong background in theoretical, computational, experimental, and applied aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, multiscale modeling and simulation, and experimentation used to analyze and design mechanical systems. Areas of concentration include reliability-based design and optimization, nanotechnology, tissue mechanics, machine and vehicle dynamics, optimal design, structural sensitivity analysis and optimization, computational solid mechanics, probabilistic mechanics, mechanics of composite materials, reliability, and fatigue and fracture mechanics.

Although most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering, students are encouraged to consider appropriate course work from other areas, including courses offered by other College of Engineering departments and in disciplines such as mathematics (p. 645), statistics (p. 875), and physics (p. 712).

Current research projects include computational mechanics, tissue mechanics, multiphysics, and multiple-scale problems; mechanics of multifunctional composites and nanocomposites, electromagnetic and thermal effects in composites, micromechanical modeling of multiphase composites and nanocomposites, impact and failure of composites, contact mechanics problems with friction and adhesion; stochastic meshfree and finite element methods; design sensitivity analysis of nonlinear structural systems; reliability-based design optimization; surrogate modeling for reliability-based design optimization; shape optimal design of elastoplastic materials; optimal design of metal stamping process; probabilistic and elastic-plastic fracture mechanics; damage tolerant design; fatigue behavior and life prediction under constant and variable amplitude loading; design sensitivity analysis of rigid and flexible mechanical systems; multibody system dynamics, tire dynamics, wheel and rail contact dynamics; wind turbine drivetrain dynamics; and vehicle system dynamics.

Thermal Sciences

The graduate program in thermal sciences and systems is designed to provide students with a rigorous and broad foundation in theoretical and experimental aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamentals of thermodynamics and heat transfer, and associated analytical, numerical, and experimental methods used in energy systems. Areas of concentration include fluid mechanics, thermodynamics, heat transfer, phase-change, combustion, and fuel cells.

Most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering. Students are encouraged to balance their programs by supplementing these with appropriate course work from other areas, including courses offered by other College of Engineering departments and in disciplines such as mathematics (p. 645) and physics (p. 712).

Current research projects include biomass gasification; turbulent flames; combustion of biomass; alternative and renewable fuels; combustion instability; spray atomization and combustion; transport modeling of fuel cells; transport phenomena in materials processing, melting,
and solidification; and optical-based diagnostics of complex thermal processes.

**Requirements**

The Doctor of Philosophy program in mechanical engineering requires 72 s.h. of graduate credit, including at least 54 s.h. in course work (excluding thesis research) and at least 12 s.h. earned for Ph.D. thesis research. Students must pass the qualifying examination administered by the program to be formally admitted to the doctoral program.

Each student takes the comprehensive examination after passing the qualifying examination and when the course work specified in the study plan is nearly completed; in any case, the comprehensive examination should be taken no later than 28 months after the first registration in the Ph.D. program. To be admitted to the comprehensive examination, a student must be in good academic standing and must be recommended by the advisor. The exam is administered by the student's committee. Admission to Ph.D. candidacy is recognized upon successful completion of the comprehensive examination.

Having satisfactorily completed the exam, a student usually has only to complete and defend the dissertation at the final examination.

Requirements for the Ph.D. usually can be completed in three to four years beyond the M.S.

**Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. In order to be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on a 4.00 scale on all previous college-level work and Graduate Record Examination (GRE) General Test scores of at least 500 verbal, 750 quantitative, and 4.5 analytical writing. Students whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign language (TOEFL).

Applicants with a lower grade-point average and/or GRE or TOEFL test scores may be considered for conditional admission, under exceptional circumstances. Applicants admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

**Financial Support**

Financial support is available to Ph.D. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical and Industrial Engineering, the Center for Computer-Aided Design, IIHR—Hydroscience and Engineering, and the National Advanced Driving Simulator. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objectives receive preference in new assistantship awards. All applications for financial support should be submitted directly to the department chair.

Ph.D. students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of course and research work beyond the baccalaureate degree. Once they meet these minimums, graduate students must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

**Career Advancement**

The engineering profession is used a foundation for a variety of careers in industry, medicine, law, government, and consulting.

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college’s co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

EPD also offers individual advising and class presentations on resume and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.
Naval Hydrodynamics

Chair, Department of Mechanical and Industrial Engineering

- Ching-Long Lin

Coordinators

- James H. Buchholz (Mechanical and Industrial Engineering), Pablo Carrica (Mechanical and Industrial Engineering)

Undergraduate certificate: naval hydrodynamics
Website: https://www.engineering.uiowa.edu/mie/undergraduate-program/certificate-program-naval-hydrodynamics

Science and technology challenges related to national defense in maritime environments demand a workforce with a strong foundation in the engineering sciences related to fluid flow, computational and experimental methods, dynamical systems, and control. The undergraduate Certificate in Naval Hydrodynamics introduces students to the basic principles of naval hydrodynamics including propulsion, resistance, maneuvering, and seakeeping.

Students completing the certificate will work in a unique learning community where they will have an opportunity to contribute to projects of interest to the Navy and its supporting industry, and learn about potential career paths.

Programs

Undergraduate Program of Study
Certificate

- Certificate in Naval Hydrodynamics [p. 1253]
Naval Hydrodynamics, Certificate

The Certificate in Naval Hydrodynamics requires 18 s.h. of credit. The certificate program is open to current University of Iowa undergraduate students and to all individuals who are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

All of the certificate courses have prerequisites; students must complete all of a course’s prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate. Prerequisites for certificate courses are listed on the Certificate Program in Naval Hydrodynamics website.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an additional eligible course. In addition, mechanical engineering students may earn the Certificate in Naval Hydrodynamics while they complete the design elective focus area for their major.

College of Engineering students earning the certificate are advised by the Department of Mechanical and Industrial Engineering [p. 1227].

The Certificate in Naval Hydrodynamics requires the following course work.

**Required Courses**

All of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ME:4175</td>
<td>Computational Naval Hydrodynamics</td>
<td>3</td>

Technological Entrepreneurship

Undergraduate certificate: technological entrepreneurship

Website: http://www.engineering.uiowa.edu/current-students/educational-opportunities/earn-technological-entrepreneurship-certificate

The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship. The program is administered by the John Pappajohn Entrepreneurial Center in the business college.

The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

Students who complete the certificate program are able to:

- recognize and seize upon opportunities;
- employ a more innovative and creative mindset in problem solving;
- develop strategic business plans;
- understand how to acquire and manage resources for innovation;
- work effectively in interdisciplinary teams;
- bridge engineering and business principles; and
- network with business and industry professionals.

Programs

Undergraduate Program of Study

Certificate

- Certificate in Technological Entrepreneurship [p. 1255]
Technological Entrepreneurship, Certificate

The Certificate in Technological Entrepreneurship requires a minimum of 18 s.h. of credit. Certificate students study how the entrepreneurial process relates to technology-based businesses. The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

The certificate program is open to Bachelor of Science in Engineering students who have earned at least 45 s.h. of credit toward the B.S.E. and have a University of Iowa g.p.a. of at least 2.75. Students must declare their intention to pursue the certificate on MyUI and must apply for admission using the application form available online.

Students must complete at least 12 s.h. of the 18 s.h. required for the certificate at the University of Iowa or in approved study abroad courses. They must maintain a g.p.a. of at least 2.00 in work toward the certificate. Students must be granted the B.S.E. and complete all certificate requirements in order to receive the certificate.

The Certificate in Technological Entrepreneurship requires the following course work.

Foundation Course

One of these:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENTR:1350</td>
<td>Foundations in Entrepreneurship</td>
<td>2</td>
</tr>
<tr>

Wind Energy

Chair, Department of Mechanical and Industrial Engineering

- Ching-Long Lin

Undergraduate certificate: wind energy
Website: http://www.engineering.uiowa.edu/mie/undergraduate-program/certificate-wind-energy

Wind energy has become a major source of clean energy and is expected to grow over the coming decades. That growth will create new jobs and a need for professionals who have diverse backgrounds and knowledge of wind energy fundamentals. The Certificate in Wind Energy introduces undergraduate students to wind energy. The program is interdisciplinary, integrating course work and faculty expertise from the Departments of Mechanical and Industrial Engineering, Civil and Environmental Engineering, and Electrical and Computer Engineering (College of Engineering) and the Department of Geographical and Sustainability Sciences (College of Liberal Arts and Sciences).

Programs

Undergraduate Program of Study
Certificate

- Certificate in Wind Energy [p. 1257]
Wind Energy, Certificate

The Certificate in Wind Energy requires 18 s.h. of credit. The certificate program is open to current University of Iowa undergraduate students and to all individuals who are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

Work for the certificate focuses on energy, environment, and information science and includes core courses and electives. Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an approved math/science elective.

Several certificate courses have prerequisites; students must complete all of a course’s prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate. Prerequisites for certificate courses are listed on the Certificate in Wind Energy website.

College of Engineering students earning the certificate are advised by the Department of Mechanical and Industrial Engineering [p. 1227] or the Department of Electrical and Computer Engineering [p. 1211]; College of Liberal Arts and Sciences students are advised by the Department of Geographical and Sustainability Sciences [p. 447]. Students interested in completing the Certificate in Wind Energy should contact one of the advisors listed on the Certificate in Wind Energy website.

The Certificate in Wind Energy requires the following course work.

Core Courses

Students take at least two courses from the following.

<table>
<thead>
<tr>

Graduate College

Dean
• John C. Keller

Associate Dean
• Sarah C. Larsen

Assistant Deans
• Heidi Arbisi-Kelm, Jennifer Teitle

Website: https://www.grad.uiowa.edu/

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University’s total enrollment. This high ratio reflects the breadth of the University’s graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. Additionally, the college works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

Manual of Rules and Regulations of the Graduate College

The current edition of the Manual of Rules and Regulations of the Graduate College is available on the Graduate College website.

Office of Graduate Inclusion

The Office of Graduate Inclusion (OGI) is dedicated to providing academic assistance to graduate students from underrepresented populations across graduate programs; to helping build a sustainable practice of inclusion that nourishes and attracts underrepresented graduate students campuswide; and to helping build community through individual and group activities focused on successful academic progress.

Graduate Student Success

The Graduate College takes a holistic approach to graduate student and postdoctoral scholar preparation. Whether a student’s goal is a career in academe, industry, government, or elsewhere—professional development can expand one’s options and make a student more marketable to employers. The Graduate Student Success Office (GSS) can help graduate students in the realms of:

• communication
• research and publication
• diversity
• funding
• teaching
• leadership
• careers
• wellness

Research Resources

Many of the University’s diverse research activities are centrally administered by the Office of Research and Economic Development, which has a cooperative relationship with the Graduate College.

Graduate Student Senate

The Graduate Student Senate is the University graduate student body representative organization. Representatives are elected annually from each University department that has a graduate degree program. The senate’s primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

Programs

Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Educational Specialist (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social Work (M.S.W.), Doctor of Philosophy (Ph.D.), Doctor of Musical Arts (D.M.A.), Doctor of Nursing Practice (D.N.P.), Doctor of Physical Therapy (D.P.T.), and Doctor of Audiology (Au.D.) degrees.

The college currently confers degrees in the following major fields.

Accounting: M.Ac.²
Actuarial Science: M.S.
African American World Studies: M.A.¹
American Studies: M.A.¹, Ph.D.
Anatomy and Cell Biology: M.S., Ph.D.
Anthropology: M.A.¹, Ph.D.
Applied Mathematical and Computational Sciences: Ph.D.
Art: M.A.¹, M.F.A.
Art History: M.A.¹, Ph.D.
Asian Civilizations: M.A.¹
Astronomy: M.S.¹
Biochemistry: M.S., Ph.D.
Biology: M.S.¹, Ph.D.¹ (see Integrated Biology)
Biomedical Engineering: M.S.¹, Ph.D.
Biostatistics: M.S.¹, Ph.D.
Book Arts: M.F.A.
Business Administration: M.A.¹, Ph.D.
Business Analytics: M.S.
Chemical and Biochemical Engineering: M.S.¹, Ph.D.
Chemistry: M.S.¹, Ph.D.
Civil and Environmental Engineering: M.S.¹, Ph.D.
Classics: M.A.¹, Ph.D.
Clinical Investigation: M.S.¹
Communication Studies: M.A.², Ph.D.

¹ Ph.D. programs are also available online
² M.Ac. programs are also available online
Community and Behavioral Health: M.S., Ph.D.
Comparative Literature: Ph.D.
Comparative Literature—Translation: M.F.A.
Computer Science: M.S., M.C.S., Ph.D.
Dance: M.F.A.
Dental Public Health: M.S.
Economics: M.A., Ph.D.
Education: M.A., M.A.T., Ed.S., Ph.D.
Educational Policy and Leadership Studies; M.A., Ed.S., Ph.D.

Women’s Studies: Ph.D.

1 Degree offered with or without thesis
2 Nonthesis degree
3 Student entry suspended

Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master’s and doctoral degree programs is provided later in these Graduate College sections of the Catalog: Applied Mathematical and Computational Sciences [p. 1267], Genetics [p. 1281], Human Toxicology [p. 1284], Immunology [p. 1287], Informatics [p. 1289], International Studies [p. 576], Molecular and Cellular Biology [p. 1305], Neuroscience [p. 1307], and Translational Biomedicine [p. 1311].

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master’s and doctoral degrees. Students seeking approval for interdisciplinary master’s and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations of the Graduate College on the college’s website.

Joint Programs

Joint Programs Offered Through the Graduate College

Various joint programs have been developed whereby students work simultaneously toward two degrees. Consult the appropriate Catalog sections for more information.

Established joint programs include health management and policy/business administration; health management and policy/urban and regional planning; occupational and environmental health/urban and regional planning; public health/urban; public health/medicine; public health/pharmacy; public health/veterinary medicine; and social work/urban and regional planning.
Joint B.S./Ph.D.: Biochemistry
The joint B.S./Ph.D. program in biochemistry enables Bachelor of Science students majoring in biochemistry to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see Biochemistry [p. 1364] in the Catalog.

Joint B.A.: Biology/M.P.H. with Epidemiology Subprogram or M.S.: Epidemiology
The joint B.A. in biology/M.P.H. with epidemiology subprogram and the joint B.A. in biology/M.S. in epidemiology enable Bachelor of Arts students majoring in biology to begin work toward the M.P.H. or M.S. while completing the bachelor's degree. Students admitted to either program may count 12 s.h. of credit toward both the B.A. and the M.P.H. or M.S. degree requirements; they also may maximize their selection of upper-level classes for advanced training in epidemiology. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see Biology [p. 17], Master of Public Health [p. 1583], and Epidemiology [p. 1549] in the Catalog.

Joint B.S.E./M.S.: Biomedical Engineering
The joint B.S.E./M.S. program in biomedical engineering enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Biomedical Engineering [p. 1170] in the Catalog.

Joint B.S.E.: Biomedical Engineering/ M.S.: Occupational and Environmental Health
The joint B.S.E. in biomedical engineering/M.S. in occupational and environmental health enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. in occupational and environmental health while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College, the College of Engineering, and the College of Public Health; see Biomedical Engineering [p. 1170] and Occupational and Environmental Health [p. 1567] in the Catalog.

Joint B.S.E.: Chemical Engineering/ M.S.: Chemical and Biochemical Engineering
The joint B.S.E. in chemical engineering/M.S. in chemical and biochemical engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of course work, typically advanced chemistry sequences and electives, toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering (p. 1181) in the Catalog.

Joint B.S.E.: Chemical Engineering/ M.S.: Civil and Environmental Engineering
The joint B.S.E. in chemical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of course work toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering (p. 1181) and Civil and Environmental Engineering (p. 1195) in the Catalog.

Joint B.S.E.: Civil Engineering/M.S.: Civil and Environmental Engineering
The joint B.S.E. in civil engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in civil engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Civil and Environmental Engineering [p. 1195] in the Catalog.

Joint B.S.E.: Civil Engineering/M.A. or M.S.: Urban and Regional Planning
The joint B.S.E. in civil engineering/M.S. in urban and regional planning enables undergraduate students majoring in civil engineering to begin work toward the M.A. or M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.A. or M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Civil and Environmental Engineering [p. 1195] and Urban and Regional Planning [p. 1316] in the Catalog.

Joint B.A. or B.S.: Computer Science/ M.C.S.
The joint B.A. or B.S. in computer science/M.C.S. program enables undergraduate students majoring in computer science to begin work toward the M.C.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of course work, typically advanced technical courses and electives, toward both the bachelor's and the M.C.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Computer Science [p. 263] in the Catalog.
Joint B.S.E.: Electrical Engineering/ M.S.: Electrical and Computer Engineering

The joint B.S.E. in electrical engineering/M.S. in electrical and computer engineering enables undergraduate students majoring in electrical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements and engage in thesis-level research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1211] in the Catalog.

Joint B.A. or B.S.: Environmental Policy and Planning/M.A. or M.S.: Urban and Regional Planning

The joint B.A. or B.S. in environmental policy and planning/ M.A. or M.S. in urban and regional planning enables undergraduate students majoring in environmental policy and planning to begin work toward the M.A. or M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.A. or B.S. and M.A. or M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Environmental Policy and Planning [p. 374] and Urban and Regional Planning [p. 1316] in the Catalog.

Joint B.A./M.A.: German

The joint B.A./M.A. program in German enables undergraduate students majoring in German to begin work toward the M.A. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.A. degree requirements. They also have the opportunity for early entrance into advanced courses in German. Offered by the Graduate College and the College of Liberal Arts and Sciences; see German [p. 470] in the Catalog.

Joint B.S.E./M.S.: Industrial Engineering

The joint B.S.E./M.S. program in industrial engineering enables undergraduate students majoring in industrial engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend one of the department's graduate seminars, and work on master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Mechanical and Industrial Engineering [p. 1227] in the Catalog.

Joint Law and Graduate Degrees

The College of Law and several Graduate College programs and schools have developed joint programs in which students pursue the Juris Doctor (J.D.) degree and a graduate degree concurrently. Offered by the Graduate College and the College of Law; see College of Law [p. 1326] in the Catalog.

Joint M.A.: Library and Information Science/Certificate in Book Studies

The joint M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. Students admitted to the program receive training in the management of varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Offered by the Graduate College; see Library and Information Science [p. 1298] and Center for the Book [p. 1270] in the Catalog.

Joint B.A./M.A.: Linguistics with TESL Focus

The joint B.A./M.A. program in linguistics with TESL (Teaching English as a Second Language) focus enables students majoring in linguistics to begin work toward the M.A. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of advanced course work toward both the B.A. and M.A. degree requirements and may take selected graduate-level courses before they have been awarded the B.A. degree. They also may gain experience teaching ESL at the college level early in their graduate careers. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Linguistics [p. 629] in the Catalog.

Joint B.A./M.A.T. with Mathematics Education Subprogram

The joint B.A./M.A.T. program with mathematics education subprogram enables Bachelor of Arts students majoring in mathematics to begin work toward the M.A.T. while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see Mathematics [p. 645] and Teaching and Learning [p. 1101] in the Catalog.

Joint B.S.E./M.S.: Mechanical Engineering

The joint B.S.E./M.S. program in mechanical engineering enables undergraduates majoring in mechanical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend a graduate seminar, and participate in master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Mechanical and Industrial Engineering [p. 1227] in the Catalog.

Joint B.S.E.: Mechanical Engineering/ M.S.: Civil and Environmental Engineering

The joint B.S.E. in mechanical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in mechanical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of course work toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements before they have
been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Mechanical and Industrial Engineering [p. 1227] and Civil and Environmental Engineering [p. 1195] in the Catalog.

**Joint M.D./Ph.D. (Medical Scientist Training Program)**

The joint Doctor of Medicine/Doctor of Philosophy program prepares students for careers in academic medicine, with emphasis on basic and clinical research. Offered by the Graduate College and the Carver College of Medicine; see Medical Scientist Training (p. 1402) Program in the Catalog.

**Joint B.S./Ph.D.: Microbiology**

The joint B.S./Ph.D. program in microbiology enables undergraduate students majoring in microbiology to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see Microbiology [p. 1404] in the Catalog.

**Joint B.A.: Psychology/M.P.H. with Community and Behavioral Health Subprogram**

The joint B.A. in psychology/M.P.H. program with community and behavioral health subprogram enables Bachelor of Arts students majoring in psychology to begin work toward the M.P.H. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see Psychological and Brain Sciences [p. 764] and Master of Public Health [p. 1583] in the Catalog.

**Joint Bachelor’s and Public Health Graduate Degrees**

The College of Public Health and various undergraduate programs have developed joint programs in which students pursue the bachelor’s degree, either a B.A. or a B.S., and a public health graduate degree, M.A., M.P.H. or M.S., in five years instead of six. Offered by all undergraduate colleges, the Graduate College, and the College of Public Health; see College of Public Health [p. 1520] in the Catalog.

**Joint B.A./M.A.T. with Science Education Subprogram**

The joint B.A./M.A.T. program with science education subprogram enables Bachelor of Arts students majoring in biology, chemistry, environmental sciences, or physics to begin work toward the M.A.T. while completing the bachelor’s degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see Biology [p. 152], Chemistry [p. 173], Environmental Sciences [p. 382], or Physics and Astronomy [p. 712] and Teaching and Learning [p. 1101] in the Catalog.

**Joint Au.D./Ph.D.: Speech and Hearing Science**

The joint Au.D./Ph.D. program in speech and hearing science is designed for students who would like to practice audiology and hold a faculty position at a university. Students admitted to the program work concurrently toward the Doctor of Audiology and the Doctor of Philosophy; they may count 30 s.h. toward the requirements of both degrees. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Communication Sciences and Disorders [p. 223] in the Catalog.

**Joint B.S.: Statistics/M.P.H. with Quantitative Methods Subprogram**

The joint B.S. in statistics/M.P.H. program with quantitative methods subprogram enables Bachelor of Science students majoring in statistics to begin work toward the M.P.H. while completing the bachelor’s degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see Statistics and Actuarial Science [p. 875] and Master of Public Health [p. 1583] in the Catalog.

**Joint B.S.: Therapeutic Recreation/ M.S.: Health and Human Physiology (Child Life Subprogram)**

The joint B.S. in therapeutic recreation/M.S. in health and human physiology with a child life subprogram enables undergraduate students majoring in therapeutic recreation to begin work toward the M.S. while completing the bachelor’s degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Therapeutic Recreation (p. 520) and Health and Human Physiology (p. 495) in the Catalog.

**Certificates**

The Graduate College also participates with other University of Iowa colleges in offering the following graduate certificates.

**Advanced Practice Nursing**

The Certificate in Advanced Practice Nursing is a program for Doctor of Nursing Practice (D.N.P.) students that offers advanced clinical training in five specialty areas:

- adult/gerontology nurse practitioner;
- adult/gerontology nurse practitioner-acute care;
- family nurse practitioner;
- pediatric nurse practitioner-primary care; and
- pediatric nurse practitioner-acute care and psychiatric/mental health nursing.
Students who complete the D.N.P. program and the certificate requirements are qualified to sit for a professional certification exam. See the Certificate in Advanced Practice Nursing [p. 1502] in the Catalog.

**Aging Studies**

The Aging Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The program is designed to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. See the Certificate in Aging Studies [p. 33] in the Catalog.

**Agricultural Safety and Health**

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas and for health professions students who intend to practice in rural areas. The program is designed to help rural health professionals address safety and health issues in farm settings. See the Certificate in Agricultural Safety and Health [p. 1528] in the Catalog.

**American Indian and Native Studies**

The American Indian and Native Studies Program (AINSP) offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other indigenous peoples of the Western Hemisphere. See the Certificate in American Indian and Native Studies [p. 38] in the Catalog.

**Biostatistics**

The Certificate in Biostatistics is open to students in University of Iowa graduate degree programs outside biostatistics and to individuals admitted to the Graduate College as nondegree students. The certificate program enables students to add a formal biostatistics emphasis to their degree programs. Students who complete the certificate in conjunction with a graduate degree may count a maximum of 6 s.h. of certificate credit toward their graduate degree. See the Certificate in Biostatistics [p. 1536] in the Catalog.

**Business Analytics**

The Certificate in Business Analytics is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The certificate program is designed for working professionals and addresses a growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making. See the Certificate in Business Analytics [p. 979] in the Catalog.

**Center for the Book**

The Certificate in Book Studies/Book Arts and Technologies requires 18 s.h. of graduate credit and is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status. See the Certificate in Book Studies/Book Arts and Technologies [p. 1275] in the Catalog.

**Cognitive Science of Language**

The Certificate in Cognitive Science of Language requires a minimum of 12-15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply. See the Certificate in Cognitive Science of Language [p. 1277] in the Catalog.

**College Teaching**

The Certificate in College Teaching complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. The program is open to graduate students working toward a Ph.D. or other terminal graduate degree. See the Certificate in College Teaching [p. 1280] in the Catalog.

**Emerging Infectious Disease Epidemiology**

The Certificate in Emerging Infectious Disease Epidemiology is a postbaccalaureate program designed to meet the training needs in emerging infectious disease of international public health professionals as well as University of Iowa graduate students. Applicants to the program must hold a bachelor's degree. See the Certificate in Emerging Infectious Disease Epidemiology [p. 1548] in the Catalog.

**Gender, Women's, and Sexuality Studies**

The Certificate in Gender, Women's, and Sexuality Studies is open to students enrolled in graduate degree programs. See the Certificate in Gender, Women's, and Sexuality Studies [p. 436] in the Catalog.

**Global Health Studies**

The Certificate in Global Health Studies is open to graduate and professional students, except for those in the College of Pharmacy, who have earned the Pharm.D. degree; they are awarded the undergraduate certificate. Students must maintain a g.p.a. of at least 3.00 in work for the 18 s.h. certificate. See the Certificate in Global Health Studies [p. 494] in the Catalog.

**Informatics**

The Certificate in Informatics requires a minimum of 18-21 s.h. of graduate credit, depending on the student's choice of subprogram: the subprograms in bioinformatics and computational biology, health informatics, and information science require a minimum of 18 s.h.; the geoinformatics subprogram requires a minimum of 21 s.h. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics. See the Certificate in Informatics [p. 1295] in the Catalog.
Multicultural Education and Culturally Competent Practice

The Certificate in Multicultural Education and Culturally Competent Practice is open to graduate students enrolled in graduate degree programs and to postbaccalaureate, nondegree graduate students. The curriculum, which consists of five courses (15 s.h.), begins with an introductory course and ends with a capstone course. See the Certificate in Multicultural Education and Culturally Competent Practice [p. 1065] in the Catalog.

Online Teaching

The Certificate in Online Teaching is designed to prepare students for the realities of online teaching and to help them expand their career options. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. See the Certificate in Online Teaching [p. 1067] in the Catalog.

Public Digital Humanities

The Certificate in Public Digital Humanities requires 15 s.h. of graduate credit. The program is open to all University of Iowa graduate students in good academic standing. Students must maintain a g.p.a. of at least 3.00 in work for the certificate. See the Certificate in Public Digital Humanities [p. 1310] in the Catalog.

Public Health

The College of Public Health offers the Certificate in Public Health for undergraduate and graduate students. The certificate program is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies. See the Certificate in Public Health [p. 1539] in the Catalog.

Sacred Music

The Certificate in Sacred Music is an interdisciplinary program with courses in sacred music, choral conducting and literature, keyboard, voice, religion, and art and art history. The program is open to students enrolled in a graduate degree program and to nondegree students who have been admitted to the Graduate College and who have consent of the certificate’s faculty advisor. See the Certificate in Sacred Music [p. 701] in the Catalog.

Teaching English as a Foreign Language (TEFL)

The TEFL certificate is intended for overseas English teachers and administrators who are not able to enroll in face-to-face classes at the University of Iowa. The certificate prepares students to seek and retain positions in English language teaching and administration. The program is open to students enrolled in a graduate degree program and to nondegree students who have been admitted to the Graduate College and who have consent of the certificate’s faculty advisor. See the Certificate in Teaching English as a Foreign Language [p. 1100] in the Catalog.

Translational and Clinical Investigation

The Certificate in Translational and Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. See the Certificate in Translational and Clinical Investigation [p. 1591] in the Catalog.

Transportation Studies

The Certificate in Transportation Studies requires 18 s.h. of graduate credit. Students may earn the certificate in conjunction with an M.S. or Ph.D. in civil and environmental engineering or with an M.A. or M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student’s background, additional course work in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student’s degree program. See the Certificate in Transportation Studies [p. 1315] in the Catalog.

Financial Support

Approximately half of the University’s graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see “Section VII. Graduate Appointments” in the Manual of Rules and Regulations of the Graduate College. The following are the primary sources of assistance.

Teaching and Research Assistantships

Teaching and research assistantships are available in most departments. Assistantship stipends typically range between $18,809 for a half-time academic-year appointment and $22,980 for a half-time fiscal-year appointment; assistants also are eligible for tuition scholarships. Assistants (one-quarter-time or more) pay resident tuition rates for fee purposes.

Iowa Arts Fellowships

Iowa Arts Fellowships are for University of Iowa graduate students entering M.F.A. programs. Typical stipends are $18,500 for the academic year, with all tuition and 25 percent of mandatory fees paid, plus a health insurance allowance, for one year (the remaining years of support must be provided by the appointing program). There are no departmental service obligations while holding the first-year fellowship.

Iowa Performance Fellowships

Iowa Performance Fellowships are for first-year D.M.A. candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships ($18,000 for year one, $9,404.50 for years two and three), summer fellowships ($2,000 for years one and two), and tuition and 25 percent of mandatory fees paid (fellow is responsible for the remainder of fees). The School of
Music provides a one-quarter-time research assistantship in years two and three.

**Graduate College Iowa Recruitment Fellowships**

Iowa Recruitment Fellowships program enhances departmental recruitment packages by offering the most accomplished new doctoral students a stipend supplement ($2,000 per year) for up to five years and fellowship support for up to four summer terms ($4,000 per summer). Tuition scholarships are to be paid during the academic years (fall, spring) by the appointing unit, while the Graduate College provides up to 2 s.h. of tuition and benefits for the summer terms. Recipients are nominated by their department.

**Graduate College Summer Fellowships**

Graduate College Summer Fellowships are for advanced doctoral students who have completed their comprehensive exams, are working to complete their dissertations, and do not otherwise have funding for the summer session. Awards provide a summer stipend of $4,000 and provide up to 2 s.h. of tuition. Awardees must enroll for the six-week, eight-week, or twelve-week summer session. Students enrolled in the four-week summer session are not eligible to receive the fellowship.

**T. Anne Cleary International Research Fellowships**

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed all predissertation requirements, including the comprehensive examination, and who will use the fellowship for dissertation research outside North America. The awards may vary from $1,500 to $5,000 and are meant to supplement other research funds. Doctoral students in any discipline may apply. Past recipients of the Cleary fellowship and Doctor of Musical Arts students who choose the D.M.A. essay option are not eligible.

**Ballard and Seashore Dissertation-Year Fellowships**

Ballard and Seashore Dissertation Fellowships are one semester fellowships for doctoral candidates who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide $10,000 for the semester plus tuition and 25 percent of mandatory fees paid for up to 2 s.h. and a health insurance allowance.

**Post-Comprehensive Research Awards**

The Post-Comprehensive Research Awards program provides an opportunity for advanced doctoral students to benefit from protected and supported time to pursue their scholarly research activities. The award is intended to recognize students with distinguished academic achievement during their early graduate training. These achievements should be evident from a combination of outstanding academic performance in course work, as well as early scholarly research activities. Students who have held teaching assistantships in the previous two semesters will have priority. Awardees will receive a stipend in the amount of $9,404.50. The Graduate College also supports up to 2 s.h. of tuition, 25 percent of the mandatory fees, and a health insurance allowance. Recipients are nominated by their department.

**Scholarships**

Scholarships provide up to full tuition.

**Graduate Student Travel Awards**

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary from $200 to $400. Funds are administered by the Graduate Student Senate and the Graduate College.

**Other Sources**

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of Research and Economic Development maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

**Courses**

Most Graduate College courses are offered by the college's programs and schools. They are listed and described in the corresponding General Catalog sections; see the links on the right side of this page.

The college also offers the following nondepartmental courses.
GRAD:6003 Doctoral Final Registration 1 s.h.
Requirements: doctoral degree candidate in final session of enrollment.

GRAD:6140 Introduction to Multicultural Education and Culturally Competent Practice 3 s.h.
Introduction to foundations of multicultural education and cultural competence; numerous equal access movements that impact professional practice in education, social work, counseling, and the allied helping professions mobilized in the U.S. during the 20th century; issues of diversity and equity that continue to fuel current policy debates and impact professional practice; roots of equal access movements from Brown v. Board of Education to the present; social, political, and/or economic contexts for equal access policies concerning race/ethnicity, class, language, gender, ability, and sexual orientation.

GRAD:6217 Seminar in College Teaching 1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as PSQF:6217.

GRAD:6300 Writing for Learned Journals 1-4 s.h.
Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals’ audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as RHET:6330.

GRAD:6313 Digital Rhetorics 3 s.h.
Current discourse (utopic, dystopic, other strands) about the Internet as it shapes and is shaped by competing forces.

GRAD:6800 CIC Scholar arr.
GRAD:6801 Regents Exchange Program arr.
GRAD:6997 Graduate/Professional Transfer arr.
GRAD:6998 Undergraduate Transfer arr.
GRAD:6999 Resident/Fellow/Post-Doctoral 0 s.h.
GRAD:7280 Obermann Center for Advanced Studies Special Topics Seminars 1-3 s.h.
Active participation and engagement in a major program, such as the annual Humanities Symposium; readings on interdisciplinary histories, contexts, and theoretical perspectives that frame featured events; work of artists, scholars, and researchers participating in the program. Requirements: admission to Graduate College.

GRAD:7285 Obermann Center Professional Development Seminar 1 s.h.
Active participation and engagement in a series of classes dedicated to connecting public engagement, research, and teaching; readings and media viewings that frame course topics; production of a short film, marketing materials, grant, and syllabi relevant to public engagement project. Requirements: admission to Graduate College and completion of Obermann Graduate Institute on Engagement and the Academy.

GRAD:7290 Digital Humanities Theory and Practice 3 s.h.
Overview of theories and use of technology to preserve, deplus, visualize, map, and analyze concepts; discussions with practicing digital public scholars; assignments tailored to student research; final group project; introductory course in public digital humanities certificate. Same as SLIS:7290.

GRAD:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, EPLS:7385, PSQF:7385, RCE:7385.

GRAD:7400 Practicum in College Teaching arr.
Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.

GRAD:7500 Science Communication in the Digital Age 2 s.h.
Preparation for communicating scientific discoveries and importance of scientific endeavors in digital media; focus on adaptable and transferable skills; relevant preparation for digital communication in academic and nonacademic career paths; develop aptitude with speaking and performance skills relevant to video presentation; develop familiarity with video composition and editing processes.

GRAD:7601 Postdoctoral Research Scholar 0 s.h.
Requirements: postdoctoral standing.

GRAD:7602 Postdoctoral Research Fellow 0 s.h.
Requirements: postdoctoral standing.
Applied Mathematical and Computational Sciences

Chair
• Weimin Han (Mathematics)

Graduate degree: Ph.D. in applied mathematical and computational sciences
Faculty: https://www.amcs.uiowa.edu/faculty
Website: https://www.amcs.uiowa.edu

Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

Programs

Graduate Program of Study

Major
• Doctor of Philosophy in Applied Mathematical and Computational Sciences [p. 1268]

Courses

Applied Mathematical and Computational Sciences Courses

Current research by faculty, students, guests.

AMCS:7990 Reading and Research arr.
Applied Mathematical and Computational Sciences, Ph.D.

Requirements

The Doctor of Philosophy program in applied mathematical and computational sciences requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is autonomous, broadly based, and interdisciplinary. It is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences).

The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research.

Prospective students should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area.

Course of Study

Faculty members help each student plan a course of study that is consistent with the student's background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

Qualifying and Comprehensive Examinations

Students take a qualifying examination over three of the four core course sequences required for the Ph.D. (analysis, differential equations, numerical analysis, and topology). They also take a comprehensive examination related to their intended research area.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. To be prepared for graduate-level course work in mathematics and an additional area, applicants should have a bachelor's or master's degree with a strong mathematics component and some background in the additional area.

Applications for fall admission are due on January 15. For application forms and more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program.

Financial Support

Fellowships and research and teaching assistantships are available to qualified applicants. Fellowship support is available during summers. Applications for financial support should be submitted at the same time as applications for admission.

Career Advancement

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.
Biomedical Science

Director
- Daniel Thomas Tranel

The Biomedical Science Program is currently under development. The Master of Science and the Doctor of Philosophy degrees will be awarded in biomedical science. Subprograms available for the Ph.D. include biochemistry, cell and developmental biology, free radical and radiation biology, immunology, microbiology, molecular physiology and biophysics, molecular and cellular biology, and pharmacology. Contact the Biomedical Science Program for more information.

Courses

Biomedical Science Courses

BMED:5205 Practical Bioinformatics 1 s.h.
Formal instruction on the use and application of bioinformatics for bench scientists; bioinformatics, resources, genome annotations, sequence analysis, comparative genomics, expression analysis, and systems biology. Requirements: biostatistics.

BMED:5207 Principles of Molecular and Cellular Biology 3 s.h.
Structure of DNA, RNA, and Protein; DNA replication, genetic and epigenetic regulation; RNA production and processing; protein production and post-translation modification; cellular membranes and trafficking; cytoskeleton and regulation of cell junctions and migration; signal transduction and regulation of cell cycle and apoptosis; didactic lectures and group discussion of primary research publications.

BMED:7270 Scholarly Integrity/Responsible Conduct of Research I 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program.

Recommendations: minimum of first-year graduate standing (Ph.D., M.S./M.A.) and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7271 Scholarly Integrity/Responsible Conduct of Research II 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program.

Recommendations: minimum of first-year graduate standing (Ph.D., M.S./M.A.) and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7604 Scholarly Integrity/Responsible Conduct of Research I 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).

BMED:7605 Scholarly Integrity/Responsible Conduct of Research II 0 s.h.
Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).
Center for the Book

Director
- Timothy Barrett

Graduate degree: M.F.A. in book arts
Graduate certificate: book studies/book arts and technologies
Faculty: https://book.grad.uiowa.edu/faculty-and-staff/instructors
Website: https://book.grad.uiowa.edu

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining the role of books in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the Schools of Art and Art History and Library and Information Science; the Departments of History and English; University of Iowa Libraries; the Creative Writing Program (Iowa Writers' Workshop); and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Graduate students may earn a master's degree or a graduate certificate through the center. Undergraduate students may add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book arts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

Courses

Center for the Book Courses

UICB:2100 Creative Writing for Book Arts 3 s.h.
Creative writing in context of book arts; text and image, typography, visual sequence, graphic narrative; zines, chapbooks, broadsides, and artist's books.

UICB:2110 Introduction to Book Arts 3 s.h.
Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. Same as BKAT:2110.

UICB:2600 Graphic Design II 3 s.h.
Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as DSGN:2600.

UICB:2900 Book Design for Publishing 3 s.h.
Introduction to the major aspects of book design, including typography, layout, standard industry software, discussion of trends in the field. Same as ARTS:2900, ENGL:2900, WRIT:2900.

UICB:3140 Literature and the Book 3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures through 17th-Century, 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as ENGL:3140.

UICB:3142 Topics in Book History 3 s.h.
Authorship, publishing, and so forth within specific historical and cultural contexts. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures Through 17th Century, 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as ENGL:3142.

UICB:3280 Elements of Book Art 3 s.h.
Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. Same as BKAT:3280.

UICB:3310 Typography 4 s.h.
Introduction to letterform and typographic fundamentals; designing with type--attention to composition, hierarchy, historical practice. Corequisites: DSGN:2110, if not taken as a prerequisite. Same as DSGN:3120.

UICB:3380 Elements of Letterpress 3 s.h.
Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques; for non-book art majors. Same as BKAT:3380.

UICB:3400 Calligraphy: Foundational Hands 3 s.h.
Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as BKAT:3400.

UICB:3900 Special Project for Undergraduates arr.
Independent study.

Topics such as book design, printing, paper arts, letterforms, typography.

UICB:4100 Paperworks 3 s.h.
Conceptual and methodological approaches to 2-D and 3-D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. Same as BKAT:4100.
UICB:4150 Introduction to Book Studies 3 s.h.
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures Through 17th Century, or 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as ENGL:4150, SLIS:4150.

UICB:4205 Bookbinding I: Materials and Techniques 3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as BKAT:4205.

UICB:4210 Boxes and Enclosures 3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as BKAT:4210.

UICB:4270 Bookbinding II 3 s.h.
Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: UICB:4205. Same as BKAT:4270.

UICB:4280 Artists’ Books 3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book’s structure and design can enhance and integrate part of the work’s meaning. Prerequisites: UICB:4205 or UICB:4205. Same as BKAT:4280.

UICB:4290 Historical Book Structures 3 s.h.
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: UICB:4205 or UICB:4205.

UICB:4300 Letterpress I 3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typecasting, type classification; role of letterpress in modern private press and contemporary artists’ books. Same as ARTS:4300.

UICB:4305 Computer Graphics for Book Arts 3 s.h.
Introduction to Adobe Creative Suite graphic design software (InDesign, Illustrator, Photoshop); emphasis on using software for book arts applications; typesetting and pagination of multipage documents; methods for combining text and image; tools and techniques for digital illustration; creation and manipulation of digital images; preparations of digital files for desktop or letterpress printing and services bureau output.

UICB:4340 Digital Design for Artists’ Books 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists’ books with personal computers and graphic design software. Same as ARTS:4340.

UICB:4380 Letterpress II 3 s.h.
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300.

UICB:4390 Book and Publication Design 3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:3120 or UICB:4300. Same as ARTS:4390.

UICB:4400 History of Western Letterforms 3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as BKAT:4400.

UICB:4415 Calligraphy I: Foundational Hands 3 s.h.
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms.

UICB:4420 Calligraphy I: Blackletter Hands 3 s.h.
Explores some of the many calligraphic forms known collectively as blackletter hands (medieval introduction to calligraphy); study of various hands from the heavily vertical Textura to the floridly expressive Gothic Cursive, and the distinctive connotations these unique letterform carry; emphasis on exploring the creative process while refining calligraphic skills and understanding the historical and social connections this hand has with other disciplines.

UICB:4490 Advanced Studies in Letter Arts 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:3400. Same as BKAT:4490.

UICB:4910 The Book in the Middle Ages 3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, SLIS:4910.

UICB:4920 The Transition from Manuscript to Print 3 s.h.
Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as HIST:4920, SLIS:4920.

UICB:4930 Topics in Material Analysis 3 s.h.
Analysis and description of physical book artifacts and their component parts (parchment, paper, bookbinding) and allied specialties (the lettering arts, printing and illustration techniques); reading, writing, presentations. Same as HIST:4430.

UICB:5110 Islamic/Asian Papermaking History and Technique 3 s.h.
History, technique, and aesthetics of traditional Islamic and Asian hand papermaking. Same as BKAT:5110.
UICB:5130 Western Papermaking History and Technique 3 s.h.
History and technique of traditional European hand papermaking and related aesthetics; students gain confidence in pursuing independent production of handmade papers or undertaking related research in their own particular areas of interest; fiber preparation, sheet forming, and drying/finishing methods; concurrent readings and discussions of related history and aesthetics; special projects selected by student with instructor approval. Same as BKAT:5120.

UICB:5160 Studies in Papermaking arr.
Topics in the history and technique of papermaking. Prerequisites: UICB:4100 or UICB:5110 or UICB:5130.

UICB:5170 Advanced Papermaking Production 3 s.h.
Independent Western- or Japanese-style projects undertaken at UICB Research and Production Paper Facility at Oakdale Campus under faculty guidance; plan, implement, and evaluate professional scale production runs using full-scale equipment. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5170.

UICB:5180 Advanced Projects in Paper 3 s.h.
Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5180.

UICB:5210 Bookbinding III 3 s.h.
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210 -- UICB:4205 and UICB:4270; for BKAT:5210 -- BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as BKAT:5210.

UICB:5220 Book Conservation 3 s.h.
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270.

UICB:5260 Studies in Bookbinding 3 s.h.
Topics related to hand bookbinding. Same as BKAT:5260.

UICB:5280 Bookbinding IV 3 s.h.
Advanced studies in bookbinding; fine binding styles, leather paring and tooling, advanced finishing techniques, refining skills; continued look at differences in regional binding practices, how these differences affect function, and why particular styles developed. Prerequisites: UICB:5210.

UICB:5330 Letterpress III: Imagemaking arr.
Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as ARTS:5330.

UICB:5340 Letterpress III: The Handprinted Book 3 s.h.
Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasising on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as ARTS:5340.

UICB:5370 Studies in Printing 1-3 s.h.
Development of individual book projects and production of one substantial project or several smaller ones; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand on existing printing; classroom setting used to augment work session with in-progress critiques, readings, and visits to special collections.

UICB:5380 Letterpress IV: Advanced Projects 3 s.h.
Development and/or production of one substantial project; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand existing printing; classroom setting augments work sessions with in-progress critiques, readings, and visits to special collections. Prerequisites: UICB:5330 or UICB:5340.

UICB:5380 Letterpress IV: Advanced Projects 3 s.h.
Topics related to production, distribution, and consumption of books through history and into the future. Same as SLIS:5520.

UICB:5530 Topics in Preservation 3 s.h.
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as SLIS:5530.

UICB:5550 Special Project for Graduate Students arr.
Independent study.

UICB:5600 History of Readers and Reading 3 s.h.
Cultural nature of reading practices in historic and contemporary contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Same as SLIS:5600.

UICB:6100 Book Studies Proseminar 1-3 s.h.
UICB:6370 Topics in Book Studies 3 s.h.
Topics relevant to book studies and special collections. Same as SLIS:6370.

UICB:6510 Book Art Seminar: History, Practice, and Critique 3 s.h.
Art-historical introduction to book arts (printing, bookbinding, papermaking and paperworks, artist bookwork, lettering arts, literary fine press and fine press artist books); influences and origins, contemporary practice, critical considerations; locating field through lenses of fine art, craft, and book history; weekly readings, observational analyses, hands-on exercises; archival research in the University of Iowa Libraries Special Collections; final research, analytical, and/or critical project.

UICB:6520 Graduate Book Arts Workshop 3 s.h.
Development of art work and studio practice; readings and research in contemporary theory and practice; analysis of visual language; integration of creative activities and critical thinking in student's own art practice and analysis of contemporary work in book arts; group and individual critiques, studio assignments, presentations, discussions.
UICB:6540 M.F.A. Thesis Hours arr.
Book Arts, M.F.A.

Graduate study of the book is interdisciplinary. It focuses on book arts as hands-on practice as well as a historical and cultural phenomenon. Its principal objectives are to provide scholarly and aesthetic contexts for the study of book history, arts, and technologies; and to offer a structured program in book-related disciplines for graduate students with a serious interest in book studies.

Requirements

The Master of Fine Arts program in book arts requires a minimum of 60 s.h. of graduate credit, including a thesis. Students select one of several emphasis areas: artist book work, bookbinding, calligraphy, digital book work, papermaking, or printing. After completing core courses, they work with a faculty advisor to design an individualized curriculum in their specialty area. The degree culminates with the successful completion of a thesis.

The program requires the following course work.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College. Visit Admissions on the Center for the Book website for more information.
Cognitive Science of Language

Coordinator

• Robert M. McMurray (Psychological and Brain Sciences)

Graduate certificate: cognitive science of language
Faculty: https://cogscilang.grad.uiowa.edu/people
Website: https://cogscilang.grad.uiowa.edu

The scientific study of language is larger than any one field, due in part to the broad diversity in forms and uses of language. Iowa’s Cognitive Science of Language Program uses an interdisciplinary approach to the study of language, helping to prepare language scientists who are conversant in multiple domains.

The Department of Psychological and Brain Sciences [p. 764] (College of Liberal Arts and Sciences) is the administrative home of the Cognitive Science of Language Program; the certificate is conferred by the Graduate College.

Programs

Graduate Program of Study

Certificate

• Certificate in Cognitive Science of Language [p. 1277]
Cognitive Science of Language, Certificate

The Certificate in Cognitive Science of Language requires a minimum of 12-15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply.

The certificate program ensures that students have training in interdisciplinary approaches to the study of language along with a strong theoretical grounding in their Ph.D. discipline. Certificate students work with their Ph.D. advisor and the certificate program's coordinator to develop an individual plan of study that complements the degree program and career interests of all students. In order to be granted the Certificate in Cognitive Science of Language, students must complete all of the requirements of their Ph.D. program as well as all of the certificate requirements.

All certificate students must participate in the cognitive science of language proseminar, a two-semester (6 s.h.) survey course on the five major disciplines within the language sciences—psychology, formal linguistics, neuroscience, communication disorders, and computational approaches. They also must complete three approved courses chosen from the lists below, and they must include a faculty member in the cognitive sciences of language on their Ph.D. comprehensive and dissertation exam committees. Students may enroll in the proseminar and three additional courses before or concurrently with other courses in their programs.

The Certificate in Cognitive Science of Language requires the following course work.

College Teaching

Director

• Mitchell J. Kelly (Psychological and Quantitative Foundations)

Graduate certificate: college teaching
Website: https://education.uiowa.edu/services/office-graduate-teaching-excellence-ogte/graduate-certificate-college-teaching

The certificate program in college teaching provides course work and supervised experiences that prepare graduate students for careers in postsecondary education.

The Certificate in College Teaching is administered by the College of Education and granted by the Graduate College.

Programs

Graduate Program of Study

Certificate

• Certificate in College Teaching [p. 1280]
College Teaching, Certificate

The Certificate in College Teaching requires a minimum of 12 s.h. of graduate credit. The certificate program is open to all University of Iowa Graduate College students enrolled in a Ph.D. or other terminal degree program.

Previous teaching experience does not count toward certificate requirements.

Students apply to the certificate program on the Office of Graduate Teaching Excellence (OGTE) website, under Graduate Certificate in College Teaching.

Category 1

Category 1 course work provides an overview of basic instructional issues and methods in college teaching. The work requires students to engage in discipline-specific thinking as they consider their own teaching situations.

Students choose two courses (minimum of 6 s.h. required) from the following.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>GRAD:6217</td>

<td>Web-Based Learning</td>
<td>3</td>
</tr>
</tbody>
</table>

Category 2

Category 2 requires students to teach for at least two semesters under the guidance of two different professors. Prior or current experience as a teaching assistant does not count toward this requirement. Students enroll in one of the following courses twice, with each enrollment supervised by a different faculty member. Students earn a total of 3 s.h. for the two enrollments. They can enroll in two practicums with two different professors in the same semester or they can complete practicum experiences in separate semesters.

<table>
<thead>

<td>Practicum in College Teaching</td>
<td>1-3</td>
</tr>
<tr>
<td>RCE:7380</td>
<td>Internship in Teaching</td>
<td>1-3</td>
</tr>
</tbody>
</table>

Category 3

For Category 3, students develop a full portfolio that demonstrates their skills and competencies in teaching, research, and service. The portfolio requires sample syllabi, a statement of teaching philosophy, samples of assignments and student work, and reflective essays on critical issues in teaching in higher education.

A committee of three faculty members, including the student’s faculty advisor, reviews the portfolio and provides advice to the student about its content and quality. The student’s faculty advisor is responsible for evaluating the portfolio and recommending that the certificate be awarded.

Category 3 requires the following course.

<table>

Genetics

Chair
- Daniel Eberl (Biology)

Graduate degree: Ph.D. in genetics
Faculty: https://genetics.grad.uiowa.edu/faculty-and-research/directory
Website: https://genetics.grad.uiowa.edu

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students are able to make up deficiencies in a particular area during their first year of graduate study.

Programs

Graduate Program of Study

Major
- Doctor of Philosophy in Genetics [p. 1282]

Courses

Genetics Courses

GENE:4213 Bioinformatics 4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, IGPI:4213.

GENE:5173 Computational Genomics 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and BME:5320 and (CS:3110 or ENGR:1300). Same as BIOL:5320, BME:5330, ECE:5220, IGPI:5330.

GENE:6150 Genetic Analysis of Biological Systems 3 s.h.
Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

GENE:6200 Special Topics in Genetics 1 s.h.
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as ACB:6200.

GENE:6234 Basic Biostatistical Methods with Genetics Applications 1 s.h.
Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches.

GENE:7191 Human Molecular Genetics 3 s.h.
Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

GENE:7301 Graduate Research in Genetics arr.
Genetics, Ph.D.

Requirements

The Doctor of Philosophy program in genetics requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal course work to their individual needs. All students are required to do some teaching as part of their development as future scientists and faculty members.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

All of these:
- GENE:6150 Genetic Analysis of Biological Systems 3
- GENE:6200 Special Topics in Genetics (seminar) 1
- GENE:6234 Basic Biostatistical Methods with Genetics Applications 1
- BISC:5201 Fundamentals of Gene Expression 1
- BISC:5203 Fundamentals of Dynamic Cell Processes 1

One of these:
- GENE:7191 Human Molecular Genetics 3
- BIOL:3172 Evolution 4
- BIOL:4333 Genes and Development 3

All of these:
- BMED:7270 Scholarly Integrity/Responsible Conduct of Research I 0
- BMED:7271 Scholarly Integrity/Responsible Conduct of Research II 0

Elective course work in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics 8

Seminar courses approved by the program 5

Even more important than formal course work is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is also strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and course work, students must pass a comprehensive examination, usually at the end of their second year in the program.

Associated Courses

Credit earned in the following courses may be counted toward the Ph.D. in genetics. Not all courses are offered every year.

- GENE:4213 Bioinformatics 4
- GENE:5173 Computational Genomics 3
- GENE:6150 Genetic Analysis of Biological Systems 3
- GENE:7191 Human Molecular Genetics 3
- BIOL:3172 Evolution 4
- BIOL:3713 Molecular Genetics 4
- BIOL:4333 Genes and Development 3
- BME:5320 Bioinformatics Techniques 3
- BMED:7270 Scholarly Integrity/Responsible Conduct of Research I 0
- BMED:7271 Scholarly Integrity/Responsible Conduct of Research II 0
- MCB:6215 Transcription and Multi-Functional Regulation by RNA 1
- MCB:6220 Mechanisms of Cellular Organization 3
- MCB:6225 Growth Factor Receptor Signaling 1
- MICR:6268 Biology and Pathogenesis of Viruses 2
- NSCI:4753 Developmental Neurobiology 3

Joint M.D./Ph.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in genetics in a joint degree program offered by the Carver College of Medicine and the Graduate College. See Medical Scientist Training Program [p. 1402] (Carver College of Medicine) in the Catalog.

Ph.D. and Dental Scientist Training Program

Ph.D. students in genetics who have earned a D.D.S. degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

Admission

Admission to the program is based on assessment of an applicants’ undergraduate academic records, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Admission requirements are not rigid. Most students working toward a Ph.D. in genetics at the University of Iowa have an undergraduate g.p.a. above 3.50, and a combined verbal and quantitative score above 310 on the GRE General Test (or 1250 using the old GRE scoring system). Students with lower grade-point averages or GRE scores may be admitted, depending on prior research experience and other indications of academic potential.

Students generally begin graduate work in the fall semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.
Financial Support

All genetics graduate students receive a financial stipend of $27,000 plus tuition for the academic year.

Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds.
Human Toxicology

Director
• Larry W. Robertson (Occupational and Environmental Health)

Associate Director
• Peter Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

Director, Graduate Studies
• Gabriele Ludewig (Occupational and Environmental Health)

Graduate degrees: M.S. in human toxicology; Ph.D. in human toxicology
Faculty: https://toxicology.grad.uiowa.edu/faculty
Website: https://toxicology.grad.uiowa.edu

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health.

The Human Toxicology Program is supported by the Iowa Superfund Research Program. Human toxicology faculty members are supported by the Environmental Health Sciences Research Center, a National Institute of Environmental Health Center of Excellence.

Programs

Graduate Programs of Study

Majors
• Master of Science in Human Toxicology [p. 1285]
• Doctor of Philosophy in Human Toxicology [p. 1286]

Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the University’s central research facilities, they provide access to the most up-to-date research equipment and expertise.

Human Toxicology, M.S.

Requirements

The Master of Science program in human toxicology requires a minimum of 39 s.h. of graduate credit and a thesis. The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, student work with their assigned mentor to choose an advisory committee, which meets at least once a semester to help students explore their research interests. The committee also provides consultation on course work and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All M.S. students must successfully complete the following course work as part of their course of study.

This course:
OEH:5710 Environmental Toxicology 3

Or these three courses:
PHAR:6501 Principles and Mechanisms of Chemical Toxicology 1
PHAR:6502 Toxic Agents and Concepts in Toxicology 1
PHAR:6503 Target-Organ Toxicity 1

And all of these:
BMED:7270 Scholarly Integrity/Responsible Conduct of Research I 0
OEH:6720 Advanced Toxicology 4
TOX:7180 Toxicology Research Seminar (enrollment is required each semester) 0-1

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded the Master of Science degree.

Associated Courses

For course descriptions and prerequisite information, see the course listings in the College of Pharmacy [p. 1504] and Department of Occupational and Environmental Health [p. 1567] sections of the Catalog.

</tbody>
</table>

Admission

Prospective students may apply to the program via a centralized application system; see Admission on the Human Toxicology Program website.

Completed applications should be submitted by March 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.
Human Toxicology, Ph.D.

Requirements

The Doctor of Philosophy program in human toxicology requires a minimum of 72 s.h. of graduate credit. The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology is also useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three two-month rotations in the laboratories of participating faculty members, in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from the mentor, each student chooses an advisory committee, which meets at least once a semester to help the student explore the student's research interests. The committee also provides consultation on course work and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All Ph.D. students must successfully complete the following course work as part of their course of study.

This course:
OEH:5710 Environmental Toxicology 3

Or these three courses:
PHAR:6501 Principles and Mechanisms of Chemical Toxicology 1
PHAR:6502 Toxic Agents and Concepts in Toxicology 1
PHAR:6503 Target-Organ Toxicity 1

And all of these:
BMED:7270 Scholarly Integrity/Responsible Conduct of Research I (must be completed within first two years of graduate study) 0
OEH:6720 Advanced Toxicology 4
TOX:7180 Toxicology Research Seminar (enrollment is required each semester) 0-1

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, the student advances to Ph.D. candidacy. Students devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

Associated Courses

For course descriptions and prerequisite information, see the course listings in the College of Pharmacy [p. 1504] and Department of Occupational and Environmental Health [p. 1567] sections of the Catalog.

Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including internal fellowships and graduate research assistantships, and from non-University sources, such as training grants from the National Institutes of Health.

Prospective students may apply to the program via a centralized application system; see Admission on the Human Toxicology Program website.

Completed applications should be submitted by March 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Associated Courses

For course descriptions and prerequisite information, see the course listings in the College of Pharmacy [p. 1504] and Department of Occupational and Environmental Health [p. 1567] sections of the Catalog.
Immunology

Director

- Steven Varga (Microbiology/Pathology)

Graduate degree: Ph.D. in immunology
Faculty: http://immuno.grad.uiowa.edu/faculty
Website: http://immuno.grad.uiowa.edu

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. Students take course work in immunology and related disciplines and are involved directly in laboratory research throughout their study.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Immunology [p. 1288]

Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Internal Medicine, Otolaryngology—Head and Neck Surgery, Pathology, Microbiology, Pharmacology, and Urology; and the College of Public Health Department of Epidemiology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

Courses

Immunology Courses

IMMU:2040 Summer Undergraduate IDGP Research 0 s.h.

IMMU:6201 Graduate Immunology 3 s.h.
Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Requirements: for IMMU:6201 -- college biology, general chemistry, and introductory immunology courses; for MICR:6201 -- courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201 -- courses in biochemistry and genetics; for MICR:6201 -- biochemistry course. Same as MICR:6201.

IMMU:6211 Immunology Seminar 1 s.h.
Requirements: immunology graduate standing.

IMMU:6231 Research in Immunology arr.
Laboratory research. Requirements: immunology graduate standing.

IMMU:6241 Writing a Scientific Proposal 1 s.h.
How to write a scientific proposal. Prerequisites: IMMU:6201. Requirements: enrollment in immunology graduate program.

IMMU:6247 Graduate Immunology and Human Disease 4 s.h.
Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as MICR:6247.

IMMU:7217 Integrated Topics in Infectious Diseases 1 s.h.
Clinical cases used to raise questions in host-microbe interactions; case/scientific exposés followed by related journal club discussions at next class session. Same as MICR:7217.

IMMU:7221 Advanced Topics in Immunology 3 s.h.
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as MICR:7207.
Immunology, Ph.D.

Requirements

The Doctor of Philosophy program is being revised for fall 2016 admission. Details about the program are not yet available.

The Doctor of Philosophy program in immunology requires a minimum of 72 s.h. of graduate credit. The program is flexible, accommodating students with a wide range of backgrounds in course work as well as practical experience in the biological and physical sciences. Entering students generally are expected to have strong backgrounds in biology, chemistry, biochemistry, microbiology, genetics, and mathematics. An introductory course in immunology is desirable. Deficiencies in specific areas often can be remedied through appropriate course work taken during the first year of graduate studies.

The curriculum consists of a sequence of required and elective courses that provide training in the conceptual and methodological aspects of immunology. The program offers ample opportunity for study in a variety of fields that interface with immunology.

The Ph.D. in immunology requires the following course work.

All of these:

After successfully completing the comprehensive examination, usually by the end of the second year of graduate study, students advance to candidacy for the Ph.D. They devote their time to research and writing their dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Ph.D. in immunology.

Admission

For information regarding admission and application procedures, contact the Immunology Program or visit its website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

All students in the Immunology Program receive stipends and tuition support, which comes from a variety of sources, including training grants from the National Institutes of Health, University of Iowa fellowships and graduate research assistantships, and individual faculty research grants.
Informatics

Chair
- Gregory R. Carmichael (Director, Iowa Informatics Initiative)

Graduate degrees: M.S.in informatics; Ph.D. in informatics
Graduate certificate: informatics
Faculty: http://informatics.grad.uiowa.edu/people
Website: http://informatics.grad.uiowa.edu

The field of informatics springs from the intersection of computational disciplines related to the humanities, the arts, and the biological, health, natural, and social sciences. As the rapid development of information technology transforms the world of human pursuits, informatics offers ways to solve new problems and to examine existing problems from new perspectives.

The Informatics Program provides graduate students the opportunity to study informatics in the broadest sense. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health.

The Master of Science and Doctor of Philosophy degrees in informatics, and the Certificate in Informatics, are offered in four subprograms: bioinformatics and computational biology, geoinformatics, health informatics, and information science.

Bioinformatics and computational biology are on the cutting edge intersecting basic life and biomedical science with high-performance computing and networking, mathematics, statistics, and engineering. They are strongly influenced and directed by the ongoing development of high-throughput data collection assays such as DNA sequencing, gene expression and proteomics.

Geoinformatics provides methods and technologies needed to measure, store, analyze, manage, and visualize information about phenomena occurring on or near the earth’s surface. It is an increasingly essential technology for understanding and managing the complex world.

Health informatics uses contemporary information technologies to improve the storage, organization, retrieval, and evaluation of health information in order to support clinical, clinical research, and public health applications.

Information science addresses the broad spectrum of data, information, and knowledge in seeking to identify and address recurring themes of representation, manipulation, retrieval, and comprehension. It draws from a diverse range of disciplines.

Programs

Graduate Programs of Study

Majors
- Master of Science in Informatics [p. 1293]
- Doctor of Philosophy in Informatics [p. 1294]

Certificate
- Certificate in Informatics [p. 1295]
IGPI:3510 Biostatistics 3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as STAT:3510.

IGPI:4100 Mathematical Statistics I 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2850 and MATH:2700. Same as STAT:4100.

IGPI:4101 Mathematical Statistics II 3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100. Same as STAT:4101.

IGPI:4115 Finite Element I 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as CEE:4533, ME:4115.

IGPI:4159 Air Pollution Control Technology 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: CEE:2150. Same as CBE:4459, CEE:4159.

IGPI:4200 Statistical Methods and Computing 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as STAT:4200.

IGPI:4213 Bioinformatics 4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512. Recommendations: grade of B+ or higher in BIOL:2512 or BIOL:3120, or graduate standing. Same as BIOL:4213, GEN:4213.

IGPI:4273 Population Genetics and Molecular Evolution 3 s.h.
Nucleotide sequences, genes, and mutation; rates and patterns of nucleotide substitution; selection at the molecular level and the neutral theory; population genetics theory; genome evolution. Prerequisites: BIOL:2512 with a minimum grade of C- or BIOL:2211 with a minimum grade of C-. Requirements: grade of C- or higher in BIOL:2211 or BIOL:2512, or graduate standing. Recommendations: grade of C- or higher in BIOL:3172. Same as BIOL:4273.

IGPI:4373 Molecular Phylogenetics 3 s.h.
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells. Prerequisites: BIOL:3172 with a minimum grade of C-. Same as BIOL:4373.

IGPI:4522 Bayesian Statistics 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as PSQF:4520, STAT:4520.

IGPI:4540 Statistical Learning 3 s.h.
Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/or software, such as R, SAS, and Matlab. Same as STAT:4540.

IGPI:4580 Data Visualization and Data Technologies 3 s.h.
Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; students learn to create and interpret these visualizations, and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS), as obtained from a regression course, strongly recommended. Same as STAT:4580.

IGPI:4740 Large Data Analysis 3 s.h.
Current areas that deal with problem of Big Data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 or ENGR:2730) and (MATH:2700 or MATH:2550) and (STAT:2010 or STAT:2020). Same as CS:4740, MATH:4740, STAT:4740.

IGPI:5001 Introductory Methodology 3-4 s.h.
Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: M.A. or Ph.D. standing in political science. Same as POLI:5001.

IGPI:5010 Research for Master’s Thesis arr.
Requirements: admission to M.S. program.

IGPI:5015 Independent Study arr.
IGPI:5020 Seminar in Bioinformatics 1 s.h.
Forum for research presentations by scientists with national and international prominence; broad range of research topics in bioinformatics, genomics, and high-throughput biology; sponsored by the NIH T32 Bioinformatics Predoctoral Training Program at the University of Iowa. Same as BME:5020.

IGPI:5043 Contextual Foundations - Special Libraries 3 s.h.
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as SLIS:5043.

IGPI:5110 Introduction to Informatics 3 s.h.
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as CS:5110.

IGPI:5199 Applied Statistics I 4 s.h.
Introduction to computing environments and statistical packages, descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation). Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as STAT:5200.

IGPI:5200 Health Informatics I 3 s.h.
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as HMP:5370, IE:5860, MED:5300, RSNM:3195, SLIS:5900.

IGPI:5203 User Education: Multimedia 3 s.h.
Develop multimedia projects for educational use in libraries; develop a portfolio of projects using multimedia technology; explore applications of multimedia for teaching and learning; explore and evaluate platforms for delivering multimedia in educational environments. Same as SLIS:5200.

IGPI:5206 Medical Imaging Physics 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210.

IGPI:5210 Health Informatics II 3 s.h.
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as BME:5252, IE:5870, RSNM:5301.

IGPI:5211 Genes, Genomes, and the Human Condition Graduate Lecture 3 s.h.
Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as BIOL:5211.

IGPI:5212 Biomedical Signal Processing 3 s.h.
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as BME:5200.

IGPI:5220 Principles of Public Health Informatics 3 s.h.
Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as EPID:5200.

IGPI:5251 Advanced Biosystems 3 s.h.
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as BME:5251.

IGPI:5270 Pathogenesis of Major Human Diseases 3 s.h.
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Prerequisites: BISC:5201 and BISC:5203. Same as PATH:5270.

IGPI:5321 Bioinformatics Techniques 3 s.h.
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and ENGR:1300. Same as BME:5320, ECE:5210.

IGPI:5330 Computational Genomics 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and BME:5320 and (CS:3110 or ENGR:1300). Same as BME:5320, BME:5330, ECE:5220, GEN:5173.

IGPI:5331 Graph Algorithms and Combinatorial Optimization 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as ECE:5330.

IGPI:5400 Computing in Statistics 3 s.h.
Introduction to computational methods used in statistical analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and BME:5320 and (CS:3110 or ENGR:1300). Same as BME:5320, BME:5330, ECE:5220, GEN:5173.

IGPI:5400 Computing in Statistics 3 s.h.
R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX, SAS, simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as STAT:5400.
IGPI:5450 Pattern Recognition 3 s.h.
Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition; neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisites: ECE:2400. Same as ECE:5450.

IGPI:5460 Digital Signal Processing 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory; design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as ECE:5460.

IGPI:5480 Digital Image Processing 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as BME:5220, ECE:5480.

IGPI:5641 Computer-Based Control Systems 3 s.h.
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5640. Same as ECE:5640, ME:5362.

IGPI:6100 Database Systems 3 s.h.
Design and development of a database-driven information system, including interfaces, database schema, and essential database operations; focus on widely used relational database model. Prerequisites: SLIS:5020. Same as SLIS:6100.

IGPI:6120 Natural Language Processing 3 s.h.
Tools and techniques for computational processing of text, including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as SLIS:6120.

IGPI:6140 Digital Environments 3 s.h.
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as SLIS:6140.

IGPI:6151 Environmental Systems Modeling 3 s.h.
Mathematical modeling of environmental systems, including rivers, lakes, estuaries, treatment systems for conventional and toxic pollutants. Prerequisites: CEE:2150 and CEE:3155 and CEE:5152. Same as CEE:6151.

IGPI:6216 Finite Element II 3 s.h.
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, ME:6215.

IGPI:6380 Analysis of Scholarly Domains 3 s.h.
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resultng literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as SLIS:6380.

IGPI:6490 Information Policy and Ethics 3 s.h.
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as SLIS:6490.

IGPI:6510 Readings in Informatics arr.
Topics not covered in other courses; individual study.

IGPI:6511 Applied Generalized Regression 3 s.h.
Applications of semiparametric models, generalized linear models, nonlinear normal errors models, correlated response models; use of statistical packages, especially SAS. Requirements: introductory statistics and applied linear models. Same as STAT:6510.

IGPI:6515 Independent Study arr.
Requirements: Ph.D. candidacy.

IGPI:6530 Environmental and Spatial Statistics 3 s.h.
Methods for sampling environmental populations, sampling design, trend detection and estimation, geostatistics, kriging, variogram estimation, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as STAT:6530.

IGPI:7400 Computer Intensive Statistics 3 s.h.
Computer arithmetic; random variate generation; numerical optimization; numerical linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101. Requirements: proficiency in Fortran or C or C++ or Java. Same as STAT:7400.

IGPI:7450 Magnetic Resonance Imaging Systems 3 s.h.
Mathematical foundations and practical implementation for magnetic resonance imaging (MRI); principles of image formation using Fourier and projection techniques, non-Cartesian sampling, tomographic image reconstruction, sources of artifacts and their correction. Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7450.

IGPI:7470 Image Analysis and Understanding 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as ECE:7470.

IGPI:7480 Advanced Digital Image Processing 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7480.
Informatics, M.S.

Requirements

The Master of Science program in informatics requires a minimum of 30-32 s.h. of graduate credit, depending on a student's choice of subprogram: the bioinformatics and computational biology subprogram requires a minimum of 30 s.h. of credit; the geoinformatics, health informatics, and information science subprograms require a minimum of 32 s.h. of credit. Students working toward a Doctor of Philosophy in informatics may be granted a Master of Science degree upon completion of the M.S. requirements.

Credit required for the M.S. includes 9-12 s.h. in foundations of informatics and at least 9 s.h. in disciplinary applications of informatics.

Students select an advisor from their subprogram's affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed at least once a year. A final master's degree examination, either oral or written, is required.

For more information about the Master of Science requirements, see Academic Programs on the Informatics Program website.

Admission

Applicants to the M.S. program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. They also must meet the admission requirements of the informatics subprogram they want to enter; see Prospective Students/Admission Information on the program's website.

Career Advancement

Informatics graduates work primarily in two market sectors. One includes the software and computer industries, from small start-ups to giants such as Microsoft, Yahoo, and Intel. These offer job opportunities in software development and design, systems analysis, user-interface development and design, web development, and many other areas. Another sector is made up of organizations whose primary business is not computing, such as banks, insurance, and other financial groups; health care organizations; consulting, media, and legal firms; entertainment companies; and the military.

As many as one-third of the department's graduates go into research or elect to pursue graduate studies in computer science, business, or other areas for which informatics provides a strong foundation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Informatics, Ph.D.

Requirements

The Doctor of Philosophy program in informatics requires a minimum of 72 s.h. of graduate credit. It is offered in four subprograms: bioinformatics and computational biology, geoinformatics, health informatics, and information science.

The 72 s.h. required for the Ph.D. includes 9-12 s.h. in foundations of informatics and at least 9 s.h. in disciplinary applications of informatics. Other course requirements are outlined in the curriculum specific to each subprogram.

Students select an advisor from their subprogram's affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed by their mentors and curricular advisory committees at least once a year. Ph.D. students must pass a comprehensive examination at or near completion of their course work requirements. The exam may be written, oral, or both, depending on the structure of the student's subprogram or the decision of the student's committee.

A student who does not already hold an M.S. in informatics from the University of Iowa and who has passed the Ph.D. comprehensive examination may be granted an M.S. degree in informatics without taking the final master's degree exam, upon recommendation by the informatics program.

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

For more information about the Doctor of Philosophy requirements, see Academic Programs on the Informatics Program website.

Admission

Applicants to the Ph.D. program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. They also must meet the admission requirements of the informatics subprogram they want to enter; see Prospective Students/Admission Information on the program's website.

Career Advancement

Informatics graduates work primarily in two market sectors. One includes the software and computer industries, from small start-ups to giants such as Microsoft, Yahoo, and Intel. These offer job opportunities in software development and design, systems analysis, user-interface development and design, web development, and many other areas. Another sector is made up of organizations whose primary business is not computing, such as banks, insurance, and other financial groups; health care organizations; consulting, media, and legal firms; entertainment companies; and the military.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Informatics, Certificate

The Certificate in Informatics requires a minimum of 18-21 s.h. of graduate credit, depending on a student's choice of subprogram: the subprograms in bioinformatics and computational biology, health informatics, and information science require a minimum of 18 s.h.; the geoinformatics subprogram requires a minimum of 21 s.h. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics.

All subprograms require a minimum of 9-12 s.h. in the foundations of informatics. In addition, the subprograms in bioinformatics and computational biology, health informatics, and information science require at least 9 s.h. in disciplinary applications of informatics; and the geoinformatics subprogram requires at least 12 s.h. in disciplinary applications of informatics.

For more information about certificate requirements, see Academic Programs on the Informatics Program website.

Admission

Applicants to the certificate program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions. Certificate program applicants may be degree or nondegree graduate students. Applicants who are enrolled in a University of Iowa graduate degree program must be in good academic standing in their program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. They also must meet the admission requirements of the informatics subprogram they want to enter; see Prospective Students/Admission Information on the program's website.
International Writing Program

Director
• Christopher Merrill

Faculty: https://iwp.uiowa.edu/about-iwp/iwp-staff
Website: https://iwp.uiowa.edu

The International Writing Program (IWP) conducts a unique fall residency program for established writers from outside the United States and a summer writing program for American and international high school students. During spring semester, IWP offers courses related to the program's general mission, including collaborative distance learning courses for writing students overseas. The program regularly offers massive open online courses (MOOCs) on literary topics.

Residency Program

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists for a one-semester residency on campus. Participants range from emerging talents to writers who are among their countries’ leading literary figures and writers of world stature. For most of them, their time in the program is their first, or their first extended, stay in the United States.

At the University they live and interact with each other while working on writing and translation projects and participating in public events. Throughout their residency, they present their work in IWP:3191 International Literature Today and IWP:5205 International Translation Workshop and participate as guests in many other courses on campus, including a First-Year Seminar for new University of Iowa undergraduates. They also interact with the public through readings, panel discussions, a film series, and other presentations.

Since 1967 more than 1,400 writers from 130 countries have participated in the program.

International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program or visit its website.

Summer Program

Between the Lines is an IWP summer program that brings American high school students together with students from Russia and the Arabic-speaking world for two weeks during the first half of July. Between the Lines students explore creative writing and world literature in a multilingual, multicultural environment. They attend a language-specific writing workshop, in which they create and share stories and poetry with their peers. They also participate in a literature seminar conducted in English, where they discuss works written by American and international authors.

International students are nominated by embassies in their home countries. American students who have completed grade 10, 11, or 12 may apply to the program; they must complete an online application and submit samples of their creative work, a statement of purpose, a letter of recommendation from a teacher familiar with their writing, and a current high school transcript. Contact Between the Lines for more information.

Between the Lines is funded by a grant from the U.S. Department of State's Bureau of Educational and Cultural Affairs.

Courses

International Writing Program Courses

IWP:1009 Undergraduate Internship arr.
Professional experience for students interested in arts management and international literature. Requirements: undergraduate standing, minimum of 36 s.h. of course work, and consultation with IWP director.

IWP:1040 Writing Across the Atlantic: Guided Creative Writing and Reading arr.
Reading contemporary British prose and poetry and students' own creative writing; instruction by a visiting writer from Great Britain who is participating in the International Writing Program.

IWP:1102 On Campus Independent Study arr.
Independent study arranged in collaboration with instructor.

IWP:1120 International Issues in Creative Nonfiction Writing arr.
Where does the subjective terminate, the objective commence? What are the boundaries between domestic and global, personal and political, fiction and nonfiction? Addressing these questions through academic and creative means; examination of pressing social, environmental, and creative issues; for students unafraid of technology, interested in Skyping, working on message boards, and exchanging multimedia responses with students worldwide; online course linking to institutions of higher learning abroad.

IWP:3152 America in Other Words 1-3 s.h.
Current idea of America in its imaginary form: post-1989 world fiction, poetry, and film in original language, in translation, and via online translation resources. Same as CL:3152.

IWP:3191 International Literature Today 1-3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3595, WLLC:3191.

IWP:3201 Writing and Publishing for the Literary Web arr.
Technical aspects of web publishing, including step-by-step instruction on using content management systems (Drupal and Wordpress); specific stylistic and editorial protocols associated with contributing to literary websites; utilize and navigate a content management system; create a contributor portfolio of online work, including media items, reviews, interviews, and blog posts.

IWP:3210 Comparative Arts 3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Same as CL:3210.

IWP:5205 International Translation Workshop 1-3 s.h.
International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as TRNS:5205.
Writing across genres; exploration of modes and voices different from chosen genres (i.e., poets may test the waters of playwriting, nonfiction writers of translation, translators of fiction); rotations by guest faculty; workshop includes students from Writing University M.F.A. programs and International Writing Program residents.

IWP:6635 Crossing Borders Seminar     2-3 s.h.

IWP:7460 Translation Workshop     4 s.h.
Requirements: at least one foreign language. Same as TRNS:7460.
Library and Information Science

Director
• David Eichmann

Graduate degree: M.A. in library and information science
Faculty: https://slis.grad.uiowa.edu/people/faculty
Website: https://slis.grad.uiowa.edu

Today's age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession's immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations. The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

The Master of Arts in library and information science has held continuous accreditation from the American Library Association since 1971.

Graduate students working toward a degree in library and information science may elect to pursue a joint degree program offered by the school in collaboration with the College of Law. See "Joint Degrees" under Requirements [p. 1302] in this section of the Catalog.

Students interested in school librarianship may earn a teaching license through a joint program with the College of Education; see "School Teacher Librarian" under Requirements [p. 1302] in this section of the Catalog.

Library and information science M.A. students also may earn the Certificate in Informatics [p. 1289] or the Certificate in Book Studies/Book Arts and Technologies [p. 1275].

The School of Library and Information Science administers the graduate certificate program in Public Digital Humanities. The certificate is especially for students with humanities backgrounds who want to gain expertise and credentials to work more intensively with technology. The program brings students together with varied academic backgrounds to learn how to communicate, sort out the roles required for fully functioning teams, and understand the unique contributions made by individuals across disciplines. Students learn to appreciate the diversity of humanities research methods while identifying core digital activities that underlie research projects.

Student Organizations and Activities

All M.A. students in the school are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. LISSO sponsors various activities, such as speaker series, workshops, brown bag lunches, and social events. Participation in LISSO events provides students with significant opportunities for professional and extracurricular growth. Students also are encouraged to join other state and national professional organizations.

The electronic journal BSides was created and is edited entirely by library and information science students. The journal publishes work by current students and recent alumni in a wide variety of formats, such as research papers, PowerPoint presentations, and websites.

Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at the University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year’s graduating class. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

Programs

Graduate Program of Study

Major
• Master of Arts in Library and Information Science [p. 1302]

Facilities

The School of Library and Information Science (SLIS) is housed in the south wing of the University's Main Library, in a setting that promotes community among students, faculty, and staff and provides easy access to resources of the University of Iowa Libraries. Facilities are provided for the varied instructional and research activities of the school.

The school includes two classrooms dedicated for use by SLIS faculty and students. These rooms include a wired 28 workstation technology classroom (19 Macs, 9 PCs) fully equipped for videoconferencing, and a seminar classroom
with a videoconferencing system and two large high-definition screens.

**Gunther Commons**

Gunther Commons, a state-of-the-art collaboratory equipped with eight workstations, is the school's combined student center and technology lab. Individuals and teams of students gather in the collaboratory to work on course assignments and to gain experience with specialized software that supports the latest teaching technologies. Students have access to both Windows and Macintosh computers, with gigabit access to the campus network and wireless service throughout the Main Library.

**University of Iowa Libraries**

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than 4 million volumes in the Main Library and six departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, InfoHawk+ provides online resource access to selected Internet and CD-ROM resources arranged by subject and academic discipline. Wireless Internet access is available in the Main Library.

The school benefits with proximity to the Learning Commons. Opened in fall 2013, it encompasses the majority of public space on the first floor of the Main Library. The Learning Commons is a technology-infused, comfortable and flexible learning space, and an academic and information help center.

The third floor of the Main Library houses the map collection, Special Collections, and University Archives, including the Iowa Women's Archives.

**Other Libraries**

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

**Other Resources**

The second floor of the University Capitol Centre (UCC) houses the instructional services and campus services departments of the University's Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center's computers for University-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the University's academic computing resources and the Internet.

**Courses**

**Library and Information Science Courses**

**SLIS:4150 Introduction to Book Studies** 3 s.h.

Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media; applied study of the codex as physical artifact. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures Through 17th Century, or 18th/19th-Century Literature, or 20th/21st-Century Literature. Same as ENGL:4150, UICB:4150.

**SLIS:4910 The Book in the Middle Ages** 3 s.h.

Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, UICB:4910.

**SLIS:4920 The Transition from Manuscript to Print** 3 s.h.

Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as HIST:4920, UICB:4920.

**SLIS:5000 Proseminar in Library and Information Science** 0 s.h.

Integrated view of different areas of library and information science; early program exposure to faculty members and their research interests. Requirements: library and information science major.

**SLIS:5010 Cultural Foundations** 1-3 s.h.

The role of libraries and information agencies in society; major issues, including information policy, professional ethics, literacy, diversity, technology, pedagogy. Requirements: admission to library and information science.

**SLIS:5020 Computing Foundations** 3 s.h.

Introduction to analysis, specification, and design of automated systems; review of the software life cycle; testing, deployment, and evaluation of large, computer-based software. Requirements: admission to library and information science.

**SLIS:5030 Conceptual Foundations** 3 s.h.

Theory, principles, and standards in organization of information; function of catalogs, indexes, bibliographic networks; introduction to metadata descriptions, name and title access, subject analysis, controlled vocabularies, classification systems. Requirements: admission to library and information science.

**SLIS:5041 Contextual Foundations - College and University Libraries** 3 s.h.

Objectives, organization, unique functions and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.

**SLIS:5042 Contextual Foundations - Public Libraries** 3 s.h.

Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
SLIS:5043 Contextual Foundations - Special Libraries  3 s.h.
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as IGPI:5043.

SLIS:5044 Contextual Foundations - School Library Media Administration  3 s.h.
Design of library media programs for the major functions of teaching and learning, information access, and program administration; focus on curricular and teaching responsibilities of school librarians and media specialists, development of philosophy, examination of roles and responsibilities, and program evaluation. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.

SLIS:5200 User Education: Multimedia  3 s.h.
Develop multimedia projects for educational use in libraries; develop a portfolio of projects using multimedia technology; explore applications of multimedia for teaching and learning; explore and evaluate platforms for delivering multimedia in educational environments. Same as IGPI:5203.

SLIS:5210 Reference and Information Services  3 s.h.
Resources and services; essential reference services and experience using a variety of print and electronic resources to answer specific reference questions. Prerequisites: SLIS:5010.

SLIS:5220 Resources for Children  3 s.h.
Evaluation and use of books, magazines, electronic media, and other sources of information and recreation in relation to youth development.

SLIS:5230 Resources for Young Adults  3 s.h.
Topics related to populations served by youth services departments (e.g., societal issues, informational needs); seminar.

SLIS:5240 Resources for Adults  3 s.h.
Role of libraries in meeting adults’ informational and recreational needs; popular culture materials, Reader’s Advisory services, lifelong learning.

SLIS:5520 Studies in Book History  3 s.h.
Topics related to production, distribution, and consumption of books through history and into the future. Same as UICB:5520.

SLIS:5530 Topics in Preservation  3 s.h.
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as UICB:5530.

SLIS:5600 History of Readers and Reading  3 s.h.
Cultural nature of reading practices in historic and contemporary contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Same as UICB:5500.

SLIS:5900 Health Informatics  3 s.h.
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as HMP:5370, IE:5860, IGPI:5200, MED:5300, RSNM:3195.

SLIS:6020 Literacy and Learning  3 s.h.
Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: SLIS:5010.

SLIS:6100 Database Systems  3 s.h.
Design and development of a database-driven information system, including interfaces, database schema, and essential database operations; focus on widely used relational database model. Prerequisites: SLIS:5020. Same as IGPI:6100.

SLIS:6110 Evidence-Based Practice in Library and Information Science  3 s.h.
Using research methods to create useful data to analyze library processes and assess effective programs in libraries; using results of research to improve library programs.

SLIS:6120 Natural Language Processing  3 s.h.
Tools and techniques for computational processing of text, including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as IGPI:6120.

SLIS:6130 Community Engagement  3 s.h.
Ways in which information professionals in libraries and other settings learn about, collaborate with, and provide services and outreach to community members; introduction and overview of community engagement theory and practice; service learning or community-based research projects. Prerequisites: SLIS:5010.

SLIS:6140 Digital Environments  3 s.h.
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as IGPI:6140.

SLIS:6145 Digital Preservation and Stewardship  3 s.h.
Introduction to concepts and theories related to preservation and continued stewardship of born-digital and digitized materials; taught from an archival perspective, focusing on current methods of collection, maintenance, and access for digital collections in libraries, archives, and museums.

SLIS:6150 Information Behavior  3 s.h.
Understanding how information users approach their information needs; concepts for understanding information use; analysis of user communities.

SLIS:6160 Search and Discovery  3 s.h.
Search system architecture; information needs and queries; search models; concepts in relevance and repositories, archives, web-based systems; information quality measures.

SLIS:6170 Organizational Management  3 s.h.
Survey of management issues common to all information environments--understanding organizations, decision making, hiring and personnel, grant writing, and marketing.

SLIS:6250 Beginning Cataloging and Classification  3 s.h.
Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; AACR2 descriptive principles, Dewey and Library of Congress classifications, Sears and LC subject headings, cataloging networks and services. Prerequisites: SLIS:5030.

SLIS:6320 Topics: Conceptual Structures/Systems  1-3 s.h.
Special topics relevant to conceptual structures (e.g., knowledge, representation, manipulation schemes) and systems (e.g., intelligent OPACS, user interface technologies).
SLIS:6330 Archives and Media 3 s.h.
Collecting as a core library activity; various types of media collected, from traditional print media to new digital media; how archives are structured and managed to provide for selection, organization, access, and perpetual storage; work on sample collections, presentation of techniques and concepts. Prerequisites: SLIS:5010 and SLIS:5030.

SLIS:6335 Metadata Theories and Applications 3 s.h.

SLIS:6345 Stewardship of Information and Collections 3 s.h.
Principles for creating, building, and maintaining digital and print collections in libraries and other information organizations. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Requirements: admission to Library and Information Science program.

SLIS:6370 Topics in Book Studies 3 s.h.
Topics relevant to book studies and special collections. Same as UICB:6370.

SLIS:6380 Analysis of Scholarly Domains 3 s.h.
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as IGPI:6380.

SLIS:6411 Topics: Resources/Services 1-3 s.h.
Current topics in types of information resources and services.

SLIS:6490 Information Policy and Ethics 3 s.h.
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as IGPI:6490.

SLIS:6520 Practicum in Libraries and Information Centers 2-3 s.h.
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 80 hours of fieldwork. Requirements: 15 s.h. of SLIS course work.

SLIS:6530 School Library Media Practicum 3 s.h.
Supervised field experience in library media centers at elementary and secondary school levels; emphasis on application of theory to practice; at least 80 hours of fieldwork. Prerequisites: SLIS:5044.

SLIS:6570 Independent Study 1-3 s.h.
Formal contract between student and faculty member. Requirements: formal proposal.

SLIS:6580 Thesis 0-6 s.h.
Library and Information Science, M.A.

Students who pursue the master's degree in library and information science gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers, and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. Students study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to assist them.

Requirements

The Master of Arts in library and information science requires 36 s.h. of graduate credit. A thesis option is available for students who seek additional research experience.

The master's degree program is designed to be completed in two years. The School of Library and Information Science strongly recommends that students not register for more than 12 s.h. during fall and spring semesters and 8 s.h. during summer sessions. The program also may be completed through part-time study.

Students may apply a maximum of 12 s.h. of graduate transfer credit in library and information science or related areas toward the degree, subject to the approval of the transfer credit committee. Approval is given course-by-course and is determined by the course's content, currency, and applicability to the student's program.

The curriculum includes a proseminar and three tiers of course work. Tier I consists of four required courses that provide a solid grounding for all successive course work. Tier II, students select four of the ten courses listed, based on their areas of interest. In Tier III, students may earn up to 12 s.h. in electives chosen with guidance from their advisors. This three-tier arrangement allows each student to concentrate in an area that most closely matches the student's professional goals.

The M.A. with a major in library and information science requires the following course work.

Proseminar

<table>

School Teacher Librarian

School teacher librarians provide instruction to students in accessing, evaluating, and using information; collaborate with teachers on the use of resources in instruction; provide leadership in the use of instructional and information technologies; offer reading guidance; provide reference service; and manage the library media center.

The University of Iowa offers a state-approved program leading to endorsement as school teacher librarian K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that leads both to certification and to the M.A. degree.

Licensed teachers employed in Iowa schools may enroll in a distance education program that leads to an M.A. in library and information science and endorsement for school librarianship. Contact the School of Library and Information Science for details.

Students who are interested in school libraries but lack a valid Iowa teaching license may earn licensure as a school teacher librarian by completing 30 s.h. in the College of Education. The Master of Arts in library and information science with teacher licensure requires 66 s.h. of credit. Students must apply and be admitted to both programs.

Joint Degrees

The School of Library and Information Science offers a joint Juris Doctor/Master of Arts with the College of Law. The primary goal of this joint program is integration of the two areas of study. Students in the joint program may apply a limited amount of credit toward both degrees. Up to 9 s.h. in law may be applied toward the M.A. in library and information science; up to 6 s.h. in library and information science may be applied to the J.D. Students in the joint program take law courses their first year and begin taking School of Library and Information Science courses in their second year. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program. For more information, see College of Law [p. 1326] in the Catalog.

In addition to the joint J.D./M.A., joint programs may be arranged between departments. A minimum of 60 s.h. of graduate work is required for a joint master’s degree program. Elective courses also are available for students who want to specialize in law librarianship but do not want to pursue the J.D. degree.

Certificate Opportunities

Students interested in special collections, book arts, or museum librarianship may pursue an M.A. in library and information science in conjunction with a graduate Certificate in Book Studies/Book Arts and Technologies. The program also may be appropriate for students interested in book studies scholarship and those seeking careers in publishing, graphic arts, or book-related industries that require a similar blend of subject and technical knowledge. For more information, see Certificate in Book Studies/Book Arts and Technologies [p. 1275] in the Catalog.

M.A. students in library and information sciences also have the opportunity to earn the Certificate in Informatics [p. 1289]. Specialty areas include bioinformatics and computational biology, geoinformatics, health informatics, and information science.

Separate application to each certificate program is required. For more information, see Programs & Degrees on the School of Library and Information Science website.
**Admission**

Applicants begin the admission process by submitting an online graduate application through the Office of Admissions. Applicants then receive a HawkID and can upload the remaining application documents through MyUI. Transcripts of all academic work, a written statement of purpose and goals, a résumé or curricula vitae, and three letters of recommendation are required. Applicants to the teacher librarian program are asked to include a copy of their current teaching certificate. The admission committee considers each applicant’s letters of recommendation, statement of purpose, résumé or curricula vitae, and other appropriate criteria, as well as an applicant’s grade-point average. Applicants for admission to the M.A. program should have a g.p.a. of at least 3.00 on a 4.00 scale. Graduate Record Examination (GRE) scores are not required. Admission is competitive.

Applicants whose first language is not English must score at least 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants with TOEFL scores below 100 on the Internet-based test are required by the University to take an English Proficiency Test if admitted to the program. In place of TOEFL, the school also accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0. Applicants who submit IELTS scores are required to take an on-campus English proficiency evaluation.

Completed applications should be received by February 1 for consideration for fall admission. Decisions of the admissions committee are announced approximately six weeks after the application deadline. Late applications are considered if places are still available. Financial aid is often not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Financial Support**

The School of Library and Information Science offers partial-tuition scholarships and one-quarter-time graduate assistantships. To be considered for scholarships or assistantships, applicants must meet the M.A. program’s grade-point average requirement for admission (see Admission [p. 1304] in this section of the Catalog). Prospective students must submit letters of application for scholarships before February 1. At the discretion of the admissions committee, limited graduate assistantships may be offered to incoming students based on academic merit and prior experience. In addition, available assistantships are advertised as they become available; students should apply for specific assistantships.

For information on departmental scholarships, contact the School of Library and Information Science or visit its website to learn about available opportunities. Part-time employment is usually available in the University of Iowa Libraries or other campus units.

Applications for student loans, work-study eligibility, or other financial assistance should be submitted directly to the University’s Office of Student Financial Aid.

---

**Career Advancement**

Library and information science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children’s librarian, school library media specialist, and archivist.

The school shares announcements of national and international job opportunities through an electronic mailing list. In addition, the Library and Information Science Student Organization (LISSO) sponsors talks by speakers versed in areas of librarianship as well as workshops on résumé writing, social media networking, and interviewing. Internships and the school’s practicum courses provide students with hands-on experience that may enhance their job prospects.
Molecular and Cellular Biology

Director

• Frederick Domann (Pathology/Radiation Oncology/Surgery)

Graduate degree: Ph.D. in molecular and cellular biology
Faculty: http://molcellbio.grad.uiowa.edu/faculty/directory
Website: http://molcellbio.grad.uiowa.edu

The Molecular and Cellular Biology Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological mechanisms at the molecular level. Faculty members are involved in a variety of research projects related to gene expression and regulation.

[p. 1306]

Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Anatomy and Cell Biology, Biochemistry, Internal Medicine, Microbiology, Molecular Physiology and Biophysics, Neurology, Obstetrics and Gynecology, Ophthalmology and Visual Sciences, Otolaryngology—Head and Neck Surgery, Pathology, Pharmacology, Physical Therapy and Rehabilitation Science, Psychiatry, and Radiation Oncology; and the College of Liberal Arts and Sciences Department of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

Courses

Molecular and Cellular Biology Courses

MCB:6215 Transcription and Multi-Functional Regulation by RNA 1 s.h.
Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisites: BISC:5201.

MCB:6217 Epigenetics, Cancer, and Mouse Models of Disease 1 s.h.
Epigenetic mechanisms of transcriptional control; regulation of chromatin structure and its relation to disease; fundamental concepts in cancer; mouse models for understanding the molecular basis for human disease; based on research publications. Prerequisites: BISC:5201.

MCB:6220 Mechanisms of Cellular Organization 3 s.h.
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MPB:6220.

MCB:6225 Growth Factor Receptor Signaling 1 s.h.
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Recommendations: BISC:5201 and BISC:5203. Same as ACB:6225, MPB:6225.

MCB:6226 Cell Cycle Control 1 s.h.
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Recommendations: BISC:5201 and BISC:5203. Same as ACB:6226, MPB:6226.

MCB:6227 Cell Fate Decisions 1 s.h.

MCB:6240 Inflammatory Cell Signaling and Targeted Cancer Therapy 1 s.h.
Introduction to topics in important cancer signaling pathways; promises and challenges of targeted cancer therapy; emphasis on current fundamental topics in cancer cell signalgs; how altered protein ubiquitination/deubiquitination, constitutive activation of proteins kinases, and transcription factors underpin uncontrollable proliferation and survival of cancer cells in tumor microenvironment; translation of knowledge to targeted cancer therapy; promotion of critical thinking. Recommendations: MCB:6225, MCB:6227, and BIOC:5243.

MCB:6250 Mechanisms of Parasitism Journal Club 1 s.h.
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MICR:6250.

MCB:6280 Topics in Molecular and Cellular Biology 1 s.h.
Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

MCB:7290 Seminars in Molecular and Cellular Biology 1 s.h.
Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.

MCB:7305 Molecular and Cellular Biology Research arr.
Requirements: molecular and cellular biology graduate standing.
Molecular and Cellular Biology, Ph.D.

Requirements

The Doctor of Philosophy program is being revised for fall 2016 admission. Details about the program are not yet available.

The Doctor of Philosophy in molecular and cellular biology requires a minimum of 72 s.h. of graduate credit. The program is sufficiently flexible to accommodate students with a wide range of backgrounds in the biological and physical sciences. Entering students are expected to have a solid background in science, including introductory biology and chemistry, organic chemistry, physical chemistry, calculus, genetics, and biochemistry. Students can remedy deficiencies in particular areas by taking appropriate course work during the first year of graduate study.

The curriculum consists of a sequence of required, core, and elective courses that provide didactic training in molecular and cellular biology and that ensure comprehensive exposure to concepts and experimental methodologies in the field. Students engage in laboratory research immediately upon enrollment and progress rapidly to original thesis projects that lead to a Ph.D.

Because of the diversity of biological research problems that can be pursued by employing molecular and cellular approaches, the program provides options for specialization in particular areas of interest.

The Ph.D. with a major in molecular and cellular biology requires the following course work.

Thesis Research and Dissertation

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to candidacy for the Ph.D. degree. They devote their time to completing thesis research and writing their Ph.D. dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Ph.D. in molecular and cellular biology.

Admission

For application materials and information about graduate training in molecular and cellular biology, contact the Molecular and Cellular Biology Program or visit its website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

Molecular and cellular biology graduate students receive stipends and tuition support from institutional and extramural sources, including University of Iowa fellowships and graduate research assistantships, and training grants from the National Institutes of Health.
Neuroscience

Chair
- Daniel Tranel (Psychological and Brain Sciences/Neurology)

Graduate degree: Ph.D. in neuroscience
Faculty: https://neuroscience.grad.uiowa.edu/faculty
Website: https://neuroscience.grad.uiowa.edu

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to the behavioral/cognitive.

Programs

Graduate Program of Study

Major
- Doctor of Philosophy in Neuroscience (p. 1308)

Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry, Internal Medicine, Molecular Physiology and Biophysics, Neurology, Pharmacology, and Psychiatry; and the College of Liberal Arts and Sciences Departments of Biology, Communication Sciences and Disorders, Health and Human Physiology, and Psychological and Brain Sciences. Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

NSCI:5210 Fundamentals of Behavioral Neuroscience 3-4 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience, sensation, motivation, emotion. Same as PSY:5210.

NSCI:5212 Foundations in Behavioral and Cognitive Neuroscience 4 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253 or PSY:5210 or NSCI:5210. Same as PSY:5212.

NSCI:5365 Seminar: Neuropsychology and Neuroscience arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, PSY:5365.

NSCI:5653 Fundamental Neurobiology 4 s.h.

Neurobiology from molecular/cellular to systems levels, including cell biology of neuron; membrane electrophysiology, synaptic transmission and plasticity, functional neuroanatomy, sensory systems from periphery to CNS, peripheral and central motor systems, autonomic systems, emotion, memory, sleep, language, attention and cognition, development of nervous system; discussion of classic and recent journal articles. Same as BIOL:5653, PSY:5203.

NSCI:5753 Developmental Neuroscience 1 s.h.

Neural induction and nervous system patterning; neurogenesis, axon, and dendrite outgrowth and targeting; synapse formation, specificity, refinement; mechanisms of neuronal cell death; myelination; neural stem cells; introduction to cellular, molecular, and genetic techniques in studies of neural development. Prerequisites: BIOL:4753. Same as BIOL:5753.

NSCI:6209 Steroid Receptor Signaling 1 s.h.

Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters. Same as MPB:6209, PCOL:6209.

NSCI:6240 Topics in Cognitive Neuroscience 1-3 s.h.

Key topics in the neural basis of human cognition; research literature. Recommendations: graduate courses in basic neuroscience and cognitive psychology. Same as NEUR:6240.

NSCI:6250 Functional Magnetic Resonance Imaging 2-3 s.h.

Basic physics principles of functional magnetic resonance imaging and approaches to data acquisition, including BOLD imaging, arterial spin labeling, and magnetic source imaging; data analysis strategies; paradigm design and development.

NSCI:6265 Neuroscience Seminar 0-1 s.h.

Research presentations. Offered fall and spring semesters. Same as ACB:6265, BIOL:6265, MPB:6265, PSY:6265.

NSCI:7235 Neurobiology of Disease 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders.

NSCI:7301 Directed Study in Neuroscience arr.

Requirements: neuroscience graduate standing.

NSCI:7305 Neuroscience Research arr.

Experimental research under faculty supervision.
Neuroscience, Ph.D.

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program or visit its website.

Requirements

The Doctor of Philosophy program in neuroscience requires a minimum of 72 s.h. of graduate credit. The program’s curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, students pursue a program of study individually designed according to their undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program’s required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping students explore their research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits the student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

Background Requirements

Students are expected to demonstrate competency, through prerequisites or course work, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the Neuroscience Program.

Neuroscience Core

The following courses form the core of the neuroscience graduate curriculum.

<table>

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

Full-time Neuroscience Program students receive stipends and full tuition scholarships through fellowships and research assistantships. Awards are renewed annually, based on continued satisfactory progress and availability of funds. The standard graduate student stipend is $27,000.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from the student’s primary research mentor. Occasionally, advanced students are supported through teaching assistantships. Tuition is paid for all students.

NIH Training Grant

The Neuroscience Program is supported by a training grant from the National Institutes of Health. The grant provides stipend and tuition support for a select group of first- and second-year graduate students.
Public Digital Humanities

Director
- James Elmborg (Library and Information Science)

Graduate certificate: public digital humanities
Faculty: https://pdh-certificate.grad.uiowa.edu/certificate-advisory-board
Website: https://pdh-certificate.grad.uiowa.edu

The Certificate in Public Digital Humanities brings students with varied academic backgrounds together to learn how to communicate, to sort out the roles required for fully functioning teams, and to understand the unique contributions made by individuals across disciplines. Students learn to appreciate the diversity of humanities research methods while identifying core digital activities that underlie research projects.

The certificate is administered by the School of Library and Information Science [p. 1298] and is granted by the Graduate College.

Programs

Graduate Program of Study
Certificate
- Certificate in Public Digital Humanities [p. 1310]
Public Digital Humanities, Certificate

The Certificate in Public Digital Humanities requires 15 s.h. of graduate credit. The program is open to all University of Iowa graduate students in good academic standing. Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

The Certificate in Public Digital Humanities requires the following course work.

Total Hours: 15

The course in data visualization will vary by semester. Students should check the Public Digital Humanities Certificate website for more information.

The elective course may be transferred from another academic institution at the discretion of the student's certificate advisor and with approval of the Graduate College. A g.p.a. of at least 3.00 is required for transfer course work.

Applicants to the certificate program must submit a one-page statement of interest to the director of the certificate program. They must include a signed letter from their academic advisor stating that they have their home department's support in pursuing the certificate.
Translational Biomedicine

Executive Associate Dean
• Patricia Winokur

Education Directors
• Laurie Gutmann (Neurology), Peggy Nopoulos (Psychiatry/Neurology/Stead Family Department of Pediatrics)

Graduate degree: M.S. in translational biomedicine
Website: http://icts.uiowa.edu/

The Translational Biomedicine Program offers training in translational biomedicine, biostatistics, ethics, and in various elective areas while providing time to conduct mentored research under the direction of an interdisciplinary team. It is specifically tailored to clinicians in medicine, nursing, pharmacy, dentistry, and psychology.

Related Certificate: Translational and Clinical Investigation

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see Translational and Clinical Investigation (p. 1590) (College of Public Health) in the Catalog.

Programs

Graduate Program of Study

Major
• Master of Science in Translational Biomedicine (p. 1312)

Facilities

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University of Iowa Institute for Clinical and Translational Science is available for research training. The program also is linked with the Carver College of Medicine’s graduate training program in clinical research.

Courses

Translational Biomedicine Courses

TBM:3001 Introduction to Translational Research 2 s.h.
Array of scientific studies translated into clinical solutions; creative ideas balanced with practical strategies for implementation at bedside; expansive number of career opportunities becoming available in translational sciences. Requirements: admission to clinical and translational science certificate program.

TBM:3002 Practicum in Clinical and Translational Science 2 s.h.
How research experience translates into clinical practice; translational impact of independent research; summary of research accomplishments; outline of a translational paper that is mutually acceptable to student, preceptor, and faculty; submission of paper and completion of poster presentation describing research project and translational application of research. Requirements: admission to clinical and translational science certificate program.

TBM:5000 Translational Biomedical Research arr.
Student research guided by mentor.

TBM:5001 Introduction to Translational Biomedicine 3 s.h.
Basis for clinical and translational research; introduction to principles of experimental design for patient- and population-oriented research; approaches available to clinical and translational investigators (e.g., statistics, questionnaires, ethics, imaging, information technology); infrastructure that supports clinical and translational investigators at the University of Iowa and nationally; for early-career clinicians/scientists and established investigators. Requirements: enrollment in translational biomedicine M.S. program.

TBM:5002 Critical Thinking and Communication: Study Design and Commercialization 1 s.h.
Various study design methodologies and process of commercialization; presentations of current projects. Requirements: candidacy for M.S. in translational biomedicine.

TBM:5003 Critical Thinking and Communication: Scientific Writing and Presentation Strategies 1 s.h.
Grant development and journal writing process; development of effective scientific presentations.

TBM:5004 Critical Thinking and Communication: Career Development and the Funding Process 1 s.h.
Introduction to a variety of career development awards and their requirements; opportunity to work on personal career development grant applications.

TBM:5005 TBM Critical Thinking and Communication: Leadership, Team Science, and Mentoring 1 s.h.
Leadership skills for managing and developing a research team; leading and organizing a team; managing and sharing resources with other faculty and fellows; finding, hiring, and keeping good people; leading productive meetings; delegation strategies; resources and tools for mentors; information on applying and teaching leadership skills to mentees.
Translational Biomedicine, M.S.

The goals of the M.S. translational biomedicine program are to:

- promote interaction and collaboration among researchers across the spectrum of biomedicine;
- enrich translational vocabulary and an understanding of T1 research (laboratory), T2 research (application to evidence-based practice), T3 research (implementation and dissemination), and T4 research (population studies and policy development) among basic, clinical, and human studies scientists; and
- develop skills in ethical decision making, scientific leadership, team building, networking, and research program management.

Requirements

The Master of Science in translational biomedicine requires a minimum of 30 s.h. of graduate credit. The plan of study for students in the two-year program is based on their chosen discipline.

The M.S. program is designed to teach members of scientific teams how to move biomedical discoveries into clinical applications and beyond. It is tailored for individuals who have completed training in one area of biomedicine and wish to apply their expertise to the T1-T4 research spectrum. The program admits individuals who hold medical or graduate degrees and are employed by the University of Iowa at the faculty ranks of assistant professor, associate professor, instructor, or as fellow physicians or postdoctoral scholars/fellows.

Course work for the M.S. requires authorship of an original manuscript of publishable quality for a peer-reviewed journal or authorship of a grant proposal for a National Institutes of Health (NIs) career award (e.g., K23, K08, K01, R01, R03, R21) or a Veterans Administration Career Award; R03 proposals completed for EPID:6110 Grant Writing for Clinical Investigators do not count toward this requirement. Original research manuscripts must be a minimum of 2,500 words. They must include a structured abstract; an introduction that frames the research question; description of methodology for study design, sampling, data collection strategies and sources, and description of data elements and data analysis; description of study results; and a discussion section that describes the relationships of current findings to prior relevant research, the clinical and policy implications of the findings, and methodological limitations.

The M.S. in translational biomedicine requires the following course work.

Admission

The Translational Biomedicine Program welcomes applicants who have diverse educational and scientific backgrounds and varied research interests. Applicants must have a strong interest and background in a health science profession and knowledge of basic sciences and medicine.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Translational biomedicine applicants must:

- have a doctoral-level degree in a biomedical discipline (e.g., M.D., D.O., D.D.S., D.N.P., Ph.D., Pharm.D., D.V.M., or equivalent);
- be employed by the University of Iowa as an assistant professor, an associate professor, an instructor, a fellow physician, or a postdoctoral scholar/fellow;
- be engaged in scientific research with a University of Iowa mentor who has funding from a peer-reviewed source (e.g., National Institute of Health, National Science Foundation, another foundation, and so forth);
- hold a bachelor’s degree from a regionally accredited American college or university or an equivalent degree from an international institution, as determined by the University of Iowa Office of Admissions;
- have a g.p.a. of at least 3.00 or the international equivalent, as determined by the University of Iowa Office of Admissions; and
- have a Graduate Record Exam (GRE) General Test combined verbal and quantitative score of 300 on the revised test (or 1050 on the old test) and an analytical writing score of 4.0 or above; applicants who already hold a graduate or professional degree may seek a waiver of the GRE requirement.

Applicants whose first language is not English must score at least 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL), or they must have a score of at least 7.0, with no subscore lower than 6.0, on the International English Language Testing System (IELTS).

Applicants must submit a curriculum vitae, a statement of research interest and career goals, and three letters of recommendation. One letter must be from the applicant’s UI research mentor; the program recommends that the second be a letter of support from the applicant’s department chair.

All prospective students, and their mentors, must guarantee that once they are accepted as students in the program, they will be able to devote essentially all of their time over a two-year period to training. For instance, a fellow in the Carver College of Medicine might spend no more than two...
months each year working on clinical assignments (e.g., two months of inpatient assignments or one month of inpatient assignments and one-half day per week in a clinic).

Transportation Studies

Director, School of Urban and Regional Planning
• Charles E. Connerly

Coordinator, Transportation Studies
• John W. Fuller (Urban and Regional Planning)

Graduate certificate: transportation studies
Faculty: https://www.urban.uiowa.edu/faculty-and-staff
Website: https://www.urban.uiowa.edu/certificates

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, the local or regional economy, and various subgroups within society.

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering [p. 1195] and the School of Urban and Regional Planning [p. 1316] participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn the Certificate in Transportation Studies along with their graduate degrees.

The Department of Mechanical and Industrial Engineering [p. 1227] also participates in the transportation certificate program, offering courses in human factors and safety issues in transportation, and the Department of Geographical and Sustainability Sciences [p. 447] offers courses in geographic information systems (GIS), location theory, and other related areas. The Certificate in Transportation Studies is coordinated by the School of Urban and Regional Planning [p. 1316].

Programs

Graduate Program of Study

Certificate
• Certificate in Transportation Studies [p. 1315]
Transportation Studies, Certificate

The Certificate in Transportation Studies requires 18 s.h. of graduate credit. Students may earn the certificate in conjunction with an M.S. or Ph.D. in civil and environmental engineering or with an M.A. or M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional course work in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to a student's degree program.

Students enrolled in the certificate program may wish to participate in faculty-led transportation research, which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

Certificate with M.S. or Ph.D. in Civil and Environmental Engineering

Students working toward a Master of Science or a Doctor of Philosophy in civil and environmental engineering may earn the Certificate in Transportation Studies by completing the courses listed below (18 s.h.). Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

Engineering students may apply to the certificate program through the Graduate College and the Department of Civil and Environmental Engineering. See Civil and Environmental Engineering [p. 1195] (College of Engineering) for information about graduate study and degree requirements in that department.

Certificate with M.A. or M.S. in Urban and Regional Planning

Students working toward a Master of Arts or Master of Science in urban and regional planning may earn the Certificate in Transportation Studies by completing a total of 18 s.h. from the courses listed below. Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

Urban and regional planning students may apply to the certificate program through the Graduate College and the School of Urban and Regional Planning. See Urban and Regional Planning [p. 1316] (Graduate College) for information about graduate study and degree requirements in the school.
Urban and Regional Planning

Director

• Charles E. Connerly

Graduate degrees: M.A. in urban and regional planning; M.S. in urban and regional planning

Faculty: https://www.urban.uiowa.edu/faculty-and-staff
Website: https://www.urban.uiowa.edu

Urban and regional planning encompasses the development and implementation of public policies that improve the quality of life in cities and regions. Today's planners find themselves in demand for such diverse jobs as sustainability coordinator and planner, environmental analyst with a natural resources agency, land use planner, transportation planner, community development planner, community organizer, economic development planner, recycling coordinator, planning director, neighborhood planner, state legislative analyst, planning consultant, and nonprofit project manager or director.

Related Certificate: Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies, which requires 18 s.h. of graduate credit. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Mechanical and Industrial Engineering, and Geographical and Sustainability Sciences and the School of Urban and Regional Planning participate in the program.

The certificate is coordinated by the School of Urban and Regional Planning. See Transportation Studies [p. 1314] for more information about the certificate.

Programs

Graduate Programs of Study

Majors

• Master of Arts in Urban and Regional Planning [p. 1320]
• Master of Science in Urban and Regional Planning [p. 1323]

Courses

Urban and Regional Planning Courses

URP:2013 Introduction to Sustainability arr. Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, and livable environments). Same as BUS:2013, GEOG:2013.

URP:3001 Planning Livable Cities 3 s.h. Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as GEOG:3920.

URP:3134 Regional and Urban Economics 3 s.h. Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as ECON:3640.

URP:3135 Environmental and Natural Resource Economics 3 s.h. Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100. Same as ECON:3625.

URP:3136 Development of Local and Regional Economies 3 s.h. Theories, methods, and public policy in regional economic development; business and industrial locations; theories of regional growth and development; tools for regional economic analysis; technology and knowledge economy; globalization and trade; economic development finance and policy. Prerequisites: ECON:1100. Same as ECON:3610.

URP:3350 Transportation Economics 3 s.h. Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as ECON:3750, GEOG:3940.

URP:3360 Urban Transportation arr. Transportation in the urban market; urban transport modes, technologies, costs, pricing, and ways to develop and analyze urban policy in order to promote city livability and sustainability; development of urban transportation and transport operations in the U.S. and worldwide; urban transport policies, plans, and policy development processes; major urban transportation issues, investigation of possible means of attacking urban transportation issues. Prerequisites: ECON:1100. Same as ECON:3770.

URP:4170 Megacities Seminar 1-3 s.h. Global historical, political, economic, urban, and cultural aspects of megacity development; planning methods to address contemporary and emerging issues; critical analysis of peer-reviewed literature and computational simulations; topics include urban sprawl, poverty and inequality, economies, food scarcity, population growth, governance models, environmental and health concerns, sustainability.

URP:4195 Public Transit Operations and Planning 3 s.h. Bus, light and heavy rail, and paratransit modes; transit operations, planning, modeling and optimization, transit agency economics, transit finance, and evolving transportation policy; skills essential to planners and engineers who intend to work for a either planning agency, transportation provider, or a transportation or planning consulting firm; individual and group projects involving transit operations. Requirements: undergraduate or graduate standing in engineering, or graduate standing in urban and regional planning. Same as CEE:4175.
URP:4262 Transportation Demand Analysis 3 s.h.
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Same as CEE:4176.

URP:4750 Environmental Impact Analysis 4 s.h.
In-depth exposure to the history and evolution of the U.S. Environmental Impact Assessment (EIA) process; discussion of major court cases; ecological, economic, and political aspects of current environmental controversies; exposure to real-world scenarios that are crucial to understanding the EIA process in action; field trips to six or seven environmental control facilities in Iowa City and neighboring areas. Prerequisites: GEOG:1070. Same as GEOG:4750.

URP:6063 Application Simulation to Transportation 3 s.h.
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as CEE:6763.

URP:6200 Analytic Methods in Planning I 1-3 s.h.
Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning to planning problems; use of computers and data systems in planning analysis.

URP:6201 Analytic Methods in Planning II 3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200.

URP:6202 Land Use Planning: Law and Practice 4 s.h.
Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

URP:6203 History and Theories of Planning 3 s.h.
History of urban planning in America as a reflection of social and economic forces; alternative planning philosophies, roles, and ethical choices open to planners. Same as HIST:6203.

URP:6205 Economics for Urban Planners 3 s.h.
Principles of economics for planners; concepts and techniques of microeconomic analysis; income inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities.

URP:6208 Program Seminar in Planning Practice 1 s.h.
Planning process, roles of planners, professional ethics and standards.

URP:6209 Field Problems in Planning I 3 s.h.
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing.

URP:6210 Field Problems in Planning II 3 s.h.
Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing.

URP:6211 Community Outreach Practicum 1-3 s.h.
Application of planning skills to community work by non-profit organizations in local area; urban planners contributing to their communities; community outreach.

URP:6216 Conflict, Negotiation, and Planning 3 s.h.
Conflict within communities, and planners' responses; networking, negotiating, mediating, coalition building, consensus building; case studies, role playing.

URP:6225 Applied GIS for Planners 3 s.h.
Analysis of Census of Population data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the Census.

URP:6227 Spatial Analysis in Planning 3 s.h.
Data bases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Prerequisites: URP:6225.

URP:6228 GIS for Local Government 1 s.h.
Development, maintenance, and operation of an enterprise-wide Geographic Information System (GIS); implementation of a parcel-based data system model common to government entities; practical experience using data for land-use planning analysis.

URP:6229 Practicum 5 s.h.
Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

URP:6233 Financing Local Government 3 s.h.
Financing of local government infrastructure through property taxes, bonding, impact fees, pricing, tax increment financing; institutional alternatives--downtown improvement districts, special districts, homeowners' associations; fiscal disparities and regional finance; case studies. Prerequisites: URP:6205.

URP:6235 Geodatabases and GIS 1 s.h.
Geodatabase implementation in the management of large GIS data sets. Prerequisites: URP:6225.

URP:6242 Planning and City Administration 1 s.h.
Relationship of planners and other local government personnel; how planning fits into city management; city management view of local political process, provision of city services, finance and budgeting, human resources, intergovernmental relations, how meetings are run, dealing with the public.

URP:6243 The Land Development Process 3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: URP:6202.

URP:6245 Growth Management 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisites: URP:6202.

URP:6249 Sustainability Seminar 1 s.h.
Focus of increasing interest for planning students and practicing planners; involves environmental effects, economy, social justice; discussion and investigation of sustainability practice applied to local and regional efforts of public and private entities; greater awareness and understanding of the effectiveness and resource requirements of local activities addressing sustainability; presentations by the instructor, local tours, guest lectures.
URP:6253 Designing Sustainable and Healthy Cities 3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts.

URP:6256 Environmental Policy 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States’ experience.

URP:6257 Environmental Management 3 s.h.
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection.

URP:6258 Modeling Dynamic Systems 3 s.h.
Nonlinear dynamics in human-environment relationships; quantitative modeling of global environment processes; environment modeling for policy and land use planning; introduction to fundamentals of linked global-scale environment processes from a systems perspective, focus on historical and contemporary role of human activities in altering flows of energy and mass within the Earth system; hands-on simulation and group games to understand feedback loops in complex systems, with applications to land use, water, climate, ecosystems, and nutrient cycles across time and spatial scales; emphasis on quantifying effects of policies and planning on environmental change.

URP:6260 Transportation Policy and Planning 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.

URP:6264 Transportation Planning Process 2-3 s.h.
Technical issues, political interface, citizen involvement, intermodal questions, public versus private roles; review and critique of transportation plans.

URP:6265 Planning Sustainable Transportation 2-4 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264.

URP:6266 Transportation and Land Use Planning 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form.

URP:6268 Freight Transportation Planning 3-4 s.h.
Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).

URP:6269 Transportation Program Seminar 1 s.h.
Transportation finance, safety and economic regulation, planning processes, management, government policy issues at federal, state, and local levels.

URP:6271 Housing Policy 3 s.h.
Recent housing policy initiatives at federal, state, and local levels.

URP:6273 Community Development 3 s.h.
Community Development Corporation involvement in housing and neighborhood revitalization; infill housing development and preservation; comprehensive community development initiatives.

URP:6277 Affordable Housing Finance 3 s.h.
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.

URP:6278 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, LAW:8751, MGMT:9150, RELS:6070, SPST:6010, SSW:6247.

URP:6279 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for LAW:8752 -- LAW:8751; for HMP:6365 -- HMP:6360 or MGMT:9150. Same as HMP:6365, LAW:8752, MGMT:9160, RELS:6075, SPST:6020, SSW:6248.

URP:6280 Planning for Disaster Mitigation and Recovery 2-3 s.h.
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners’ unique skills play the most significant roles in aiding a community to redesign a safer future.

URP:6282 Grant Writing 1-2 s.h.
Same as SSW:6282.

URP:6284 Green Building and LEED 1-2 s.h.
Preparation to earn LEED Green Associate professional credential; introduction to green building concepts and strategies as they relate to the United States Green Building Council’s (USGBC) Leadership in Energy and Environmental Design (LEED) rating system.

URP:6290 Economic Impact Assessment 3 s.h.
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications. Prerequisites: URP:6205.

URP:6295 Economic Development Policy 3 s.h.
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline.

URP:6297 Economic Development Finance 3 s.h.
Business financial statements and evaluation of loan proposals; small business finance including financing working capital, fixed assets, and real estate; economic development agencies and institutions; and case studies of economic development financing. Prerequisites: URP:6205.

URP:6305 Readings arr.
URP:6315 Independent Study in Planning  1-6 s.h.
Research and analysis of a special planning problem; opportunity to apply knowledge in area of specialization.

URP:6320 Introduction to Graphic Communications  2 s.h.
Visual communication techniques through use of print and digital media; how to graphically convey concepts and information to a variety of audiences; basic design principles to build a foundation in graphic communication; relationships between various software packages; advantages and shortcomings of various digital tools; development of professional graphic media that is beautiful and effective.

URP:6335 Internship  2 s.h.
Work in a planning or related agency or nonprofit organization.

URP:6400 Sustainable Development: The Kerala Experience  3 s.h.
Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session.
Urban and Regional Planning, M.A.

The Master of Arts is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as geography, economics, English, political science, engineering, architecture, sociology, urban studies, and history currently study in the school. More than 50 full-time students and a few part-time students are enrolled. About half of them are women, and about 10 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects.

Graduate students working toward a master’s degree in urban and regional planning may elect to pursue one of the joint degree programs offered by the school in collaboration with the College of Engineering, the College of Law, the College of Public Health, the Department of Geographical and Sustainability Sciences, and the School of Social Work.

Requirements

The Master of Arts program in urban and regional planning requires 50 s.h. of graduate credit. The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master’s degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required. A thesis is not required, although students may petition to write one. Students are encouraged to complete an approved internship or practicum.

The 50 s.h. required to complete the degree must be comprised of a minimum of 35 s.h. (approximately 12 courses) in the School of Urban and Regional Planning (prefix URP). Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall graduate g.p.a. of at least 3.00.

The M.A. in urban and regional planning requires the following work.

Core Curriculum

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.

The core requires a total of 23 s.h., including at least 3 s.h. in an advanced economic methods course. The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a waiver of selected core courses on the basis of previous course work.

Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school’s faculty and course offerings support five concentration areas: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.

Students complete at least 9 s.h. of courses in their concentration area. Courses offered by other University departments and programs may supplement those offered by the School of Urban and Regional Planning.

Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate course work in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. Students who complete a practicum are exempt from this requirement.

Internship
Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships are paid staff positions and are completed during the summer between the first and second years or during the academic year.

Practicum
An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during summer after the first year and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

Thesis
A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

Final Exam
A final examination is required for all students. An oral and written exam constitutes the final exam for students who do not write a thesis.

Joint Degrees
The School of Urban and Regional Planning participates in several joint degree programs, in which students work toward an M.A. in urban and regional planning at the same time they work toward another degree. Joint degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately (see “Two Master’s Degrees” in the Manual of Rules and Regulations of the Graduate College). The following joint degree programs are available:

- Joint B.S.E. in civil engineering/M.A. in urban and regional planning; see Bachelor of Science in Engineering (p. 1157) and Civil and Environmental Engineering (p. 1195) (College of Engineering) in the Catalog for information about the Bachelor of Science in Engineering.
- Joint B.A. or B.S. in Environmental Policy and Planning/M.A. in urban and regional planning; see Environmental Policy and Planning (p. 374) in the Catalog for information about the B.A. or the B.S. in Environmental Policy and Planning.
- Joint J.D./M.A. in urban and regional planning; see College of Law (p. 1326) in the Catalog for information about the Juris Doctor.
- Joint M.H.A./M.A. in urban and regional planning; see Health Management and Policy (p. 1559) (College of Public Health) in the Catalog for information about the Master of Health Administration.
- Joint M.S. in occupational and environmental health/M.A. in urban and regional planning; see Occupational and Environmental Health (p. 1567) (College of Public Health) in the Catalog for information about the Master of Science in occupational and environmental health.
- Joint M.S.W./M.A. in urban and regional planning; see Social Work (p. 814) (College of Liberal Arts and Sciences) in the Catalog for information about the Master of Social Work.

Requirements for each joint degree program can vary. The minimum requirements for the urban and regional planning part of any joint degree include completion of at least 35 s.h. in School of Urban and Regional Planning courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master's degree final examination. In all cases, joint degree programs require at least 60 s.h. of credit.

Students who wish to enter a joint degree program must apply to each of the two degree programs separately; they must be admitted to both programs before they may be admitted to the joint program. Contact the admissions coordinator at the School of Urban and Regional Planning for more information about joint degree programs.

Admission
Admission to the School of Urban and Regional Planning is open to students from any undergraduate major or concentration area.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Admission is based on Graduate Record Examination (GRE) General Test scores (verbal, quantitative, and analytical writing), letters of recommendation, previous academic performance, and a written statement of purpose. International applicants whose first language is not English are required to submit official TOEFL scores.

Applicants should submit an application form, GRE General Test scores, TOEFL score (for students whose first language is not English), recommendation letters, statement of purpose, and transcripts. For fall admission, applications should be submitted to arrive early in the year (preferably by January 15), although applications are accepted until July 15 (April 15 for international students). Applications for spring admission should be received by October 1 and no later than December 1. Fall admission is strongly preferred. Students applying for financial aid should submit their materials by January 15.

Financial Support
Students in the School of Urban and Regional Planning receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 10 hours of work per week under the direction of a faculty member. A few full or partial tuition scholarships also are available.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

### Career Advancement

Recent graduates have taken positions with city, metropolitan, and regional planning agencies, state and federal government, nonprofit organizations, and private consulting firms. They work in all geographic regions of the United States and in countries around the world.
Urban and Regional Planning, M.S.

The Master of Science is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as geography, economics, English, political science, engineering, architecture, sociology, urban studies, and history currently study in the school. More than 50 full-time students and a few part-time students are enrolled. About half of them are women, and about 10 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects.

Graduate students working toward a master's degree in urban and regional planning may elect to pursue one of the joint degree programs offered by the school in collaboration with the College of Engineering, the College of Law, the College of Public Health, the Department of Geographical and Sustainability Sciences, and the School of Social Work.

Requirements

The Master of Science program in urban and regional planning requires 50 s.h. of graduate credit. The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master's degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required for both degrees. A thesis is not required, although students may petition to write one. Students are encouraged to complete an approved internship or practicum.

The 50 s.h. required to complete the degree must be comprised of a minimum of 35 s.h. (approximately 12 courses) in the School of Urban and Regional Planning (prefix URP). Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall graduate g.p.a. of at least 3.00.

The M.S. in urban and regional planning requires the following:

Core Curriculum

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.

The core requires a total of 23 s.h., including at least 3 s.h. in an advanced economic methods course. The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a waiver of selected core courses on the basis of previous course work.

<td></td>
</tr>
</tbody>
</table>

Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school's faculty and course offerings support five concentration areas: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.

Students complete at least 9 s.h. of courses in their concentration area. Courses offered by other University departments and programs may supplement those offered by the School of Urban and Regional Planning.

Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate course work in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. Students who complete a practicum are exempt from this requirement.

<td>3</td>
</tr>
</tbody>
</table>
Internship

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.

Practicum

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during summer after the first year and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

Thesis

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

Final Exam

A final examination is required for all students. An oral and written exam constitutes the final exam for students who do not write a thesis.

Joint Degrees

The School of Urban and Regional Planning participates in several joint degree programs, in which students work toward an M.S. in urban and regional planning at the same time they work toward another degree. Joint degree programs enable students to earn both degrees in less time than it would take to earn the two degrees separately (see “Two Master’s Degrees in the Manual of Rules and Regulations of the Graduate College”). The following joint degree programs are available.

- Joint B.S.E. in civil engineering/M.S. in urban and regional planning; see Bachelor of Science in Engineering [p. 1157] and Civil and Environmental Engineering [p. 1195] (College of Engineering) in the Catalog for information about the Bachelor of Science in Engineering.
- Joint B.A. or B.S. in Environmental Policy and Planning/ M.S., in urban and regional planning; see Environmental Policy and Planning [p. 374] in the Catalog for information about the Bachelor of Arts or Science in Environmental Policy and Planning.
- Joint J.D./M.S. in urban and regional planning; see College of Law [p. 1326] in the Catalog for information about the Juris Doctor.
- Joint M.H.A./M.S. in urban and regional planning; see Health Management and Policy [p. 1559] (College of Public Health) in the Catalog for information about the Master of Health Administration.
- Joint M.S. in occupational and environmental health/M.S. in urban and regional planning; see Occupational and Environmental Health [p. 1567] (College of Public Health) in the Catalog for information about the Master of Science in occupational and environmental health.
- Joint M.S.W./M.S. in urban and regional planning; see Social Work [p. 814] (College of Liberal Arts and Sciences) in the Catalog for information about the Master of Social Work.

Requirements for each joint degree program can vary. The minimum requirements for the urban and regional planning part of any joint degree include completion of at least 35 s.h. in School of Urban and Regional Planning courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master’s degree final examination. In the case of two master’s degrees, all programs require at least 60 s.h. of credit.

Students who wish to enter a joint degree program must apply to each of the two degree programs separately; they must be admitted to both programs before they may be admitted to the joint program. Contact the admissions coordinator at the School of Urban and Regional Planning for more information about joint degree programs.

Admission

Admission to the School of Urban and Regional Planning is open to students from any undergraduate major or concentration area.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Admission is based on Graduate Record Examination (GRE) General Test scores (verbal, quantitative, and analytical writing), letters of recommendation, previous academic performance, and a written statement of purpose. International applicants whose first language is not English are required to submit official TOEFL scores.

Applicants should submit an application form, GRE General Test scores, TOEFL score (for students whose first language is not English), recommendation letters, statement of purpose, and transcripts. For fall admission, applications should be submitted to arrive early in the year (preferably by January 15), although applications are accepted until July 15 (April 15 for international students). Applications for spring admission should be received by October 1 and no later than December 1. Fall admission is strongly preferred. Students applying for financial aid should submit their materials by January 15.

Financial Support

Students in the School of Urban and Regional Planning receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 10 hours of work per week under the direction of a faculty member. A few full or partial tuition scholarships also are available.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

Undergraduate Program of Study
Review; law school's four student-run scholarly journals: completing the writing requirement is work on one of the four additional writing units. Among opportunities for research. During the second and third years, they complete take a small-section course in legal analysis, writing, and experience. During both semesters of their first year, students

law schools nationwide—is integral to all students' academic

The college is a charter member of the American Association of Law Schools and an American Bar Association-approved law school.

One of 11 colleges at the University of Iowa, the College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

Longstanding commitment to inclusion and diversity is a source of pride for the College of Law, which was one of the first schools in the nation to grant a law degree to a woman (1873) and to an African American (1879). Diversity is central to the college's educational philosophy and to its core mission of preparing culturally proficient graduates who are capable of intellectual inquiry, critical and reflective thinking, and engagement.

Iowa's challenging law school curriculum carefully balances substantive courses, perspective offerings, examination of ethical values and professionalism, and experiential programs, including a highly active in-house legal clinic. The college's low student-faculty ratio and the faculty's open-door policy ensure that students have opportunities for interaction and collaboration with their law professors.

The college's writing program—one of the strongest among law schools nationwide—is integral to all students' academic experience. During both semesters of their first year, students take a small-section course in legal analysis, writing, and research. During the second and third years, they complete four additional writing units. Among opportunities for completing the writing requirement is work on one of the law school's four student-run scholarly journals: Iowa Law Review; Journal of Corporation Law; Journal of Gender, Race & Justice; and Transnational Law & Contemporary Problems.

Professional Programs of Study

• Juris Doctor [p. 1341]
• Master of Laws [p. 1343]
• Master of Studies in Law [p. 1344]
• Doctor of Juridical Science [p. 1345]

Facilities

Facilities and Resources

Boyd Law Building

The Willard L. Boyd Law Building, completed in 1986, exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

One of 11 colleges at the University of Iowa, the College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

Facilities

Facilities and Resources

Boyd Law Building

The Willard L. Boyd Law Building, completed in 1986, exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

One of the building's facilities are classrooms, the Levitt Auditorium, the Law Library, faculty and administrative offices, offices for the college's cocurricular programs, meeting rooms, a bookstore, and a cafeteria. The ground floor features the Lauridsen Law Commons, a renovation project completed in 2016. The renovated suite for the college's clinical law programs functions as a teaching law firm, offering ease of access, usability, and visibility. Student and faculty lounges and faculty offices are located on the same floor, encouraging student-faculty interaction.

Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library. The Law Library has one of the most comprehensive collections of legal materials in the country, containing more than 1.3 million separately cataloged titles as of March 2016. A particular strength of the library is its collection of U.S. legal materials. The Law Library also holds an exceptionally strong collection of materials in foreign, comparative, and international law, including a print collection comprising more than 280,000 volumes and over 1,500 serials and subscriptions.

Research Centers and Programs

Participation in research centers and outreach programs is an important part of the College of Law's service to professional and civic communities.

Iowa Innovation, Business & Law Center

The Iowa Innovation, Business & Law Center is an interdisciplinary teaching and research venture that brings together faculty members who teach and study problems of business, technology, innovation, regulation, and legal policy from diverse perspectives. The center's purpose is twofold: first, it offers an innovative curriculum and outstanding legal training in areas pertaining to government regulation of entrepreneurship, innovation, and management of resources; second, it encourages creative individual and collaborative interdisciplinary research in these areas.

Institute of Public Affairs

The Institute of Public Affairs provides services and information to help maintain and strengthen the effectiveness of Iowa's local governments. The institute facilitates goal
setting and strategic planning, educational programs and information, professional development, and public management assistance, and offers information and publications, outreach, and linkage with other University programs and activities. The Institute provides training for newly elected mayors and council members through a municipal leadership academy and publishes the Iowa Municipal Policy Leader’s Handbook for city officials. It also holds the annual Iowa Municipal Management Institute, a professional development conference for city and county managers and administrators in Iowa.

**Labor Center**

The University of Iowa Labor Center provides educational programs and research support to Iowa’s working people and their organizations. Since 1951, the Labor Center has acted as a bridge between the University and Iowa’s labor community.

**Larned A. Waterman Iowa Nonprofit Resource Center**

The Larned A. Waterman Iowa Nonprofit Resource Center offers information and assistance from across the University of Iowa to help Iowa’s charitable nonprofit organizations become more effective in building their communities.

**Law, Health Policy & Disability Center**

The Law, Health Policy & Disability Center is a leader in law, technology, education, and research focused on improving the quality of life for persons living with disabilities. Based at the University of Iowa College of Law, the center concentrates on public policy and its impact on persons with disabilities, emphasizing employment, self-determination, and self-sufficiency.

**National Health Law and Policy Resource Center**

The National Health Law and Policy Resource Center, founded in 1981, promotes laws and public policies that foster and facilitate accessible, affordable, and quality health services and related services for all Americans, particularly members of vulnerable and disadvantaged populations. The center provides a nonpartisan forum for informed dialogue between academics, practitioners, and public policy makers based on the best available data and information about important health law and policy issues.

**University of Iowa Center for Human Rights**

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the University’s year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. Based in the College of Law, the center engages in human rights teaching, scholarship, and public engagement.

### Courses

The following courses are those offered by the College of Law during the past four academic years and those scheduled to be offered during the coming academic year. See the Guide to Courses under Courses and Curriculum on the College of Law website for a list of College of Law courses defined by Interpretation 509-1 of the American Bar Association Standards for the Approval of Law Schools.

### Law Courses

**LAW:8006 Civil Procedure**

4 s.h.

Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

**LAW:8010 Constitutional Law I**

3 s.h.

Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among several branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; role of judicial process in structuring limits within which society operates; institutional development of legal system, relationship among institutions within the system.

**LAW:8017 Contracts**

4 s.h.

Law that governs the otherwise unregulated sector of the economy; making and enforcement of promises, usually as part of a bargain; formation of agreements, consideration, invalidating causes, parole evidence and interpretation, conditions, and remedies; roles of promises and promissory exchanges in a modern economy; the law’s limitations on freedom of contract; brief introduction to Uniform Commercial Code, Article 2.

**LAW:8022 Criminal Law**

3 s.h.

Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an actus reus, or guilty act); blameworthy mental state (a mens rea or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

**LAW:8026 Introduction to Law and Legal Reasoning**

1 s.h.

Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

**LAW:8032 Legal Analysis Writing and Research I**

2 s.h.

Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.

**LAW:8033 Legal Analysis Writing and Research II**

2 s.h.

Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence. Prerequisites: LAW:8032.

**LAW:8034 Extended Legal Analysis Writing and Research II**

5 s.h.

Legal analysis, research, writing, and law-practice skills for non-native English speakers; recognition and analysis of legal issues, effective oral and written communication with clients and the court; persuasive writing; negotiation; oral argument; sentence-level effectiveness; interpreting statutes; emphasis on effective teamwork. Prerequisites: LAW:8032.
LAW:8037 Property 4 s.h.
Concept of private property as one of the legal system’s basic foundations; historical development of Anglo-American property law examined in conjunction with changing currents of economic, social, and political thought; emphasis on understanding decision making by courts in the common-law tradition, and its interplay with legislative enactments intended to change the common law; fundamental notions relating to the origins of property rights; relationship of possession and ownership, with emphasis on capacity of property law to recognize a wide range of interest configurations; impetus for promoting ease and reliability in conveyance of property interests, commercially and gratuitously; function of public recording in providing stability to transfers of interest in land; role of adverse possession and prescriptive use in recognizing expectations based on longstanding property relationships; responsiveness of property law to social change as illustrated by modern reforms in landlord-tenant act.

LAW:8046 Torts 4 s.h.
Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability considered from perspectives of jurisprudence, economics, and moral philosophy.

LAW:8105 Administrative Law 3 s.h.
Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies’ right to obtain information from members of the public; citizens’ right to obtain information in agencies’ possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties’ specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

LAW:8112 Advanced Civil Procedure arr. litig.
Complex civil litigation; advanced civil procedure topics not taught in first year; essential aspects of civil procedure (e.g., personal and subject matter jurisdiction); joinder devices (intervention, necessary parties, interpleader, consolidation), discovery and confidentiality orders, appellate jurisdiction, mechanisms to structure the trial (e.g., bifurcation of issues); class. Prerequisites: LAW:8006.

LAW:8121 Advanced Legal Research Methods in Specialized Subjects 1 s.h.
Legal research methods in specific legal practice and research areas; specific topic rotates each year (litigation and ADR, antitrust law, economically sophisticated conduct and economic damages), business and tax research, federal legislative history legal research, legal history research); students work with real-world examples to improve research skills related to a particular legal subject.

LAW:8123 Advanced Legal Research 2 s.h.
Builds on LAW:8032 and LAW:8033; in-depth exploration of American legal resources; current print and electronic resources that help students develop better, more efficient search techniques and select the most effective formats for their research; opportunity to review the basic sources of legal information, use varied techniques to access legal information, develop personal strategies for managing information; advanced training in LEXIS, WESTLAW, the Internet; nonlegal information sources important to the legal community.

LAW:8125 State Legal Research 1 s.h.
Legal resources available for a particular state; exploration of current print and low-cost electronic resources (i.e., Internet) to develop better, more efficient search techniques; selection of the most effective formats for research; sources of legal information; techniques for accessing legal information.

LAW:8133 American Governance: Theory and Practice 2-3 s.h.
Tracing the evolution of our constitutional system by examining specific events in American history; particular emphasis will be given to the role of Congress and its relationship with the Executive Branch and court system. Requirements: open only to students educated outside the United States.

LAW:8146 Antitrust Law 3 s.h.
Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

LAW:8158 Arbitration Principles and Practice 3 s.h.
Introduction to law of arbitration and essential skills and procedures involved in its practice; role of arbitration in modern conflict resolution in various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration (e.g., labor relations, employment, consumer and commercial transactions); development of skills and understanding of procedure through use of problems and exercises simulating common arbitration scenarios in which students participate as lawyers, arbitrators, and parties.

LAW:8159 Arbitration: Law and Theory 2-3 s.h.
The law of arbitration and its role in modern conflict resolution, conceptual framework and explanatory theories for the analysis of issues frequently encountered; statutory and contractual grounds for arbitration, such as labor relations, employment, consumer, and commercial transactions; the decision to use arbitration; the role of lawyers; judicial enforcement of arbitration agreements and arbitration awards; contractual issues and defenses; federal preemption; arbitrability and separability; remedies; the relationship between arbitration and litigation and mediation and other non-adversary forms of dispute resolution.

LAW:8160 Arbitration: Practice and Advocacy 1-2 s.h.
Skill development to effectively participate in arbitration and related court proceedings; advise clients on various aspects of arbitration; opportunity to draft an arbitration agreement, a petition to compel arbitration, a prehearing arbitration booklet with legal authorities and supporting exhibits, and pleadings necessary for judicial review; examination of all aspects of the arbitration process; procedures for post-award remedies and judicial review; hybrid methods of arbitration, applicable rules, and ethics concepts.
LAW:8161 Arbitration Advocacy Competition 1-2 s.h.
Development and application of arbitration advocacy skills in preparation for the Iowa intramural and regional competitions; addresses arbitration presentation methodology, procedure, prehearing preparation, and advocacy skills; students who advance in the intramural Iowa Arbitration Tournament are selected to represent Iowa in the ABA Arbitration Competition the following fall.

LAW:8163 Art, Law, and Ethics 3 s.h.
How law and ethics apply to individuals and institutions concerned with the visual arts. Same as ARTH:4040.

LAW:8167 The American Legal Experience 3-4 s.h.
Historical role of law in American society and its engagement with politics, social and biological science, economics. Same as HIST:4287.

LAW:8169 The American Legal Experience 3 s.h.
Historical role of law in American social, political, and economic life from the 17th century through 1980s; legal issues involving religion and state, early national period and the Constitution, law of slavery, common law and economic development, changing legal status of women, law's engagement with the social sciences, race discrimination, crime, legal realism, and development of modern welfare and business policy.

LAW:8186 Bankruptcy 3-4 s.h.
Rights of individuals and entities under the federal bankruptcy laws, from perspectives of debtors and creditors; foundational topics from liquidation bankruptcy (chapter 7) to reorganization bankruptcy (chapters 11 and 13); consumer and business bankruptcies; advanced bankruptcy topics such as small business reorganizations, farm bankruptcies, ethical issues in bankruptcy law, international insolvencies. Prerequisites: LAW:8374.

LAW:8194 Basic Federal Income Taxation 3-4 s.h.
Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.

LAW:8198 Building the State 2 s.h.
Examination of state building and deconstruction; taxing, spending, fiscal citizenship, theories about state building; topics may include statelessness, legibility and state building, utopian tax regimes, revolutionary tax systems (French, U.S.A., Confederate States of America, potential Scottish state), voluntary taxation and non-state "tax" regimes (ISIS, organized crime).

LAW:8245 Comparative Equality arr.
Affirmative action or "positive discrimination" for examining/comparing inequality and inclusion in the countries of France, Brazil, Canada, India, South Africa, and the United States; historical context in which affirmative action or positive discrimination programs have been implemented for certain groups within Brazil, Canada, India, South Africa, and the United States as arguments in favor of and against such programs in those countries; lessons learned from these countries applied to France to answer the question, "is France in need of affirmative action?"

LAW:8263 Comparative Law 2-3 s.h.
Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law.

LAW:8272 Conflict of Laws 2-3 s.h.
Problems created when a transaction or relationship has associations with more than one jurisdiction; emphasis on selection of appropriate rules where there are differences in laws of various jurisdictions and on recognition of judgments of other states; current evolution in theoretical approaches to these problems; limitations on American state courts by the federal constitution.

LAW:8280 Constitutional Law II 3 s.h.
Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.

LAW:8301 Copyrights 3-4 s.h.
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommendations: LAW:8643.

LAW:8303 Corporate Compliance Overview 2-3 s.h.
Areas of corporate and regulatory law that impose requirements on corporations including financial services institutions and health care provider organizations; importance of corporate compliance for these organizations and an overview of relevant regulatory authorities and their underlying theories and rationales; pertinent government regulations, guidance documents, and enforcement initiatives and the framework for corporate compliance; focus on the process of compliance which should be established internally, regardless of the relevant regulatory authority involved; evolving role of compliance and the chief compliance officer. Corequisites: LAW:8331.

LAW:8307 Corporate Finance 1-3 s.h.
Introduction to fundamental principles of corporate finance, including financial statement analysis, valuation of corporate securities and of businesses, capital structure decisions, portfolio theory, and efficient capital markets hypothesis; focus on financial and accounting aspects of corporate decisions than with any particular body of law. Prerequisites: LAW:8331.

LAW:8318 Corporate Governance and Control 1-3 s.h.
Principal issues in creation of appropriate governance and control systems for large publicly-held corporations; questions of corporate structure, shareholder voting rights, duties of directors, derivative suits, indemnification and transfers of control viewed from perspective of Delaware's statutory and common law. Recommendations: LAW:8331.
LAW:8322 Corporate Taxation 3 s.h.
Influence of tax considerations on the structure of corporate transaction, from a merger to a restructuring to a securities offering; examination of primary Internal Revenue Code provisions that affect corporations and their shareholders; corporate formations, dividends, redemptions, liquidations, taxable asset and stock acquisitions, tax-free reorganizations; analysis of statutory and regulatory materials; tax reform proposals. Prerequisites: LAW:8194. Corequisites: LAW:8331.

LAW:8331 Business Associations 3-4 s.h.
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.

LAW:8342 Topics in Criminal Law Practice 1-3 s.h.
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; students divided into teams (prosecutors and defense attorneys); hands-on exercises designed to reflect substantive criminal law and procedure discussion; jury selection, jury instructions, pretrial motions, client and witness interviews, depositions, investigation; ethical considerations for prosecutors and defense attorneys, including prosecutorial discretion in charging decisions and conflicts of interest. Prerequisites: LAW:8022.

LAW:8348 Criminal Procedure: Adjudication 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.

LAW:8350 Criminal Procedure: Investigation 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., Miranda doctrine), due process protection against unreliable suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce constitutional guarantees.

LAW:8362 Critical Race Theory arr.
Race relations and racial discrimination in America from perspectives of the Critical Race Theory movement (CRT); affirmative action, hate speech, queer theory, voting rights, postmodernism, liberalism, Asian-critical theory, Latin-critical theory, federal Indian law, critical white studies; critical race feminism—essentialism, motherhood, lawbreaking, employment law, sexual harassment, global issues.

LAW:8374 Debt Transactions 4 s.h.
Laws and practices of modern lending; procedures for collection of unsecured debts, including enforcement of judgments, exemptions, prejudgment remedies, fraudulent conveyances, statutory liens; secured transactions that involve real property (mortgages) and personal property (security interests governed by Uniform Commercial Code, Article 9); consumer and commercial transactions, counseling hypothetical creditor or debtor clients, understanding realities that shape enforcement of credit agreements.

LAW:8384 Law of Disability Discrimination 1-3 s.h.
Survey of various laws that govern the field of disability discrimination; particular attention to Americans with Disabilities Act, Section 504 of the Rehabilitation Act, The Individuals with Disabilities Education Act, and Fair Housing Act Amendments; emphasis on field of education law, including higher education; how to conduct an accessibility audit.

LAW:8399 Election Law 3 s.h.
The Supreme Court has long declared that the right to vote is fundamental, because it is preservative of all other rights; the right to vote in theory and practice, with focus on its relationship to racial and economic justice; what has been done and what should be done to move us closer to the ideal of political equality; proper role of unelected judges in our democracy; history of the right to vote, “one person, one vote” principle, Voting Rights Act, partisan gerrymandering, voter identification, voter registration, political parties, and campaign finance.

LAW:8407 Topics in Employee Benefits Law arr.
Survey of major topics in employee benefits law; overview of the plans that are subject to the Internal Revenue Code, ERISA, or both; tax-qualification rules for retirement plans focusing on 401(k) plans; disclosure owed and relief available to plan participants under ERISA; fiduciary responsibility for investment decisions under 401(k) plans; and whether ERISA preempts state and local initiatives to expand health care coverage.

LAW:8415 Employment Discrimination 2-3 s.h.
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.

LAW:8421 Employment Law 2-3 s.h.
Rights of employers, employees in unorganized workplaces; legal issues that arise between employers and employees in nonunionized settings; hiring, discipline, termination, minimum wage, covenants not to compete, employment-related intellectual property issues, occupational safety and health, unemployment.

LAW:8428 English Legal System 1 s.h.
Taught in spring London Law Consortium.

LAW:8433 Environmental Law 2-3 s.h.
Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.

LAW:8452 European Union Law 2-3 s.h.
Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.
LAW:8460 Evidence 3 s.h.
Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.

LAW:8467 Family Law 3-4 s.h.
Creation, dissolution of marriage and parent-child relationships; lawyer’s practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.

LAW:8481 Federal Courts 3 s.h.
Role of the federal courts in our federal system of government; the federal courts’ original and appellate jurisdiction; Supreme Court review of state courts’ judgments; Congress’ power to strip the federal courts of jurisdiction; development of federal common law; federal writ of habeas corpus; abstention doctrines; state sovereign immunity; federal remedies against state and local action; and Congress’ power to create non-Article III adjudicative tribunals. Prerequisites: LAW:8006 and LAW:8010.

LAW:8487 Federal Government Contracting 1 s.h.
Specialized litigation forums created by the federal government to remedy contract disputes over federal contracts for goods, services, and construction; similarities and differences between the federal litigation system and the common law of contracts and UCC Article 2 law; assessment of whether the federal litigation forums and policy goals work; related issues most attorneys encounter during their practices.

LAW:8497 Federal Criminal Practice 2 s.h.
Introduction to each step in the criminal process together with instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisites: LAW:8350.

LAW:8504 Corporate Crimes 1-3 s.h.
Introduction to corporate criminal law; black letter doctrines of corporate liability and sentencing; Department of Justice policies and practices that shape the course of corporate prosecutions; criminal statutes that are of frequent concern for corporations, including those that address false claims, securities fraud, bribery, and mail and wire fraud; developments occurring in this evolving area of law.

LAW:8509 Food and Drug Law 3 s.h.
Food and Drug Administration (FDA) as gatekeeper for permission to market prescription drugs and devices; key role in creation and analysis of information on these products; focus on prescription drugs and devices; five theoretical issues—autonomy, trust/agency costs, information, insurance, and markets in health care; substantive legal doctrines including IP, tort, administrative law, health law, and commercial speech; applied administrative law course.

LAW:8513 Foreign Comparative and International Legal Research 1-2 s.h.
Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; variety of print and electronic sources; research methods in foreign and international law.

LAW:8527 Foreign Relations Law arr.
Introduction to law of foreign relations in the United States; impact of constitutional distribution of powers on conduct of U.S. foreign relations; influence of separation of powers doctrines on conduct of foreign relations, status of international law in U.S. legal system, role of courts in adjudicating issues affecting foreign relations, and controversy over distribution of war powers between President and Congress.

LAW:8551 Family, Gender, and Constitutional History 3 s.h.
Same as HIST:4285.

LAW:8562 Health Law 2-3 s.h.
Major areas of concern in health law: tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

LAW:8570 Human Rights in the World Community 1-3 s.h.
Introduction to established and developing legal rules, procedures, and enforcement mechanisms that govern protection of international human rights; liberal western and developing world notions of human rights, recent examples of human rights controversies worldwide; international human rights of women.

LAW:8577 Immigration Law and Policy 1-3 s.h.
Legal, historical, social, philosophical, and policy foundations of immigration control; modern debate over immigration; criteria and procedures that govern admission of non-U.S. citizens to the United States for permanent residence and temporary visits; deportation criteria and processes; national security and civil liberties implications of immigration policy; refugees and political asylum; undocumented migrants; acquisition, loss, and significance of U.S. citizenship; focus on U.S. law with introduction to perspectives from comparative and international law; experience analyzing varied fact problems that require strategic decision making and interpretation of complex statutory provisions.

LAW:8584 Insurance 1-3 s.h.
Legal principles of insurance; applicability of general principles of contract formation; principles involved in determining which persons and interests are protected, which risks are transferred, and when rights are at variance with insurance policy provisions; claims process, disposition of disputed claims; adoption of tort principles and statutes to alter common law approach to insurance contracts.

LAW:8593 Federal Indian Law arr.
Specialized body of law allocating power and authority in Indian country that has grown up around native American peoples and their reservations; sovereignty, jurisdiction, federal Indian policy, tribal self-government.

LAW:8594 Interest-Based Negotiation for Lawyers 2-3 s.h.
Theory and practice of an approach to negotiation, known as interest-based or problem-solving negotiation; focus of this negotiation model is not on positions of disputants, but interests that underlie these positions; interest-based negotiators attempts to generate options that satisfy, at least minimally, interest of all parties and can lead agreements from which all parties realize some gains; emphasis on acquisition and enhancement of skills necessary to apply this negotiation approach; in-class exercises.
LAW:8599 International and Comparative Inequality Law 3 s.h.
Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.

LAW:8600 International Business Transactions 1-3 s.h.
Form and enforcement of agreements to enter arbitration in order to settle international business disputes; recognition and enforcement of arbitral awards, process of arbitrating an international business dispute; role-playing exercises to hone advocacy and decision-making skills.

LAW:8615 International Commercial Arbitration arr.
Formation and enforcement of agreements to enter arbitration; fundamental areas of American law (e.g., property, contract, torts, criminal law); use of economic efficiency as reasoning is used to explain and predict the effects of legal rules; goals and theories underlying these rules; common ways in which ideas may be protected—from basic form of protection (secrecy and trace secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.

LAW:8618 International and Comparative Family Law 1-3 s.h.

LAW:8620 International Intellectual Property Law 1 s.h.
Overview of international intellectual property law; comparison of U.S. and foreign law relating to patents, copyrights, trademarks; principal multinational agreements relating to intellectual property, including Paris Convention, Bern Convention, TRIPs Agreement; implementation of these agreements within domestic law of United States and other countries. Recommendations: at least one other intellectual property course.

LAW:8622 International Environmental Law 3 s.h.
Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

LAW:8629 Taxation of International Business Transactions 3 s.h.
Introduction to U.S. aspects of international taxation and international tax policy issues; how the United States taxes foreign persons on income they derive from U.S. sources; taxation of U.S. persons on their worldwide income; United States bilateral tax treaty network, under which many of the statutory rules regarding the taxation of foreigners are modified or supplanted; solving problems that illustrate the operation of the Code and regulations. Prerequisites: LAW:8194. Corequisites: LAW:8331.

LAW:8631 International Trade Law: Basic Norms and Regulations 3 s.h.
Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.

LAW:8643 Introduction to Intellectual Property 3-4 s.h.
Introduction to some of the most important intellectual property rules; goals and theories underlying these rules; common ways in which ideas may be protected—from basic form of protection (secrecy and trace secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.

LAW:8647 Competition Policy and Innovation 3 s.h.
Important issues at intersection of federal competition policy and intellectual property law; competition policy referenced as antitrust laws; competition policies that emanate from intellectual property laws or other regulatory provisions; exclusionary practices, collusion and joint ventures, vertical integration, and procedural issues.

LAW:8649 Foundations of International Law 1-3 s.h.
Introduction to fundamentals of international law; focus on aspects of international law that concern interests in the United States; survey of sources, methodology, and major doctrines of international law within framework of understanding diverse jurisprudential approaches; international law's relationship to U.S. domestic law and institutions; procedural aspects of international law involving international institutions, including the International Court of Justice; foundation course for students interested in international trade, business, family law, human rights, environmental law, and an interest in European Union law.

LAW:8658 Jurisprudence 2-3 s.h.
Exploration of questions central to jurisprudence by looking at positions that have been adopted by legal positivist, natural law theory, and sociological models of jurisprudence (i.e., is there more to legal argument than the strategic battle for a favorable judicial ruling? How would one have to conceive of legal reasoning if one were a judge? Are there right answers to legal questions? Do they presuppose a necessary connection between law and morality? Is any exchange of pros and cons merely a spectacle created in order to hide from the dumbfounded public that legal reasoning does not really matter?); comparative dimension provided in readings with background in civil law.

LAW:8666 Law and Development 2-3 s.h.
Origin of development law and institutions that were created in order to advance it, including the World Bank and International Monetary Fund.

LAW:8670 Labor Law 3-4 s.h.
How national labor law regulates labor relations in the private sector; law relating to unionized employees and firms; right of employees to organize into unions; limits of concerted activities by employees; scope and provisions of collective bargaining; enforcement of the collective bargaining agreement; rights of individual employees in collective units and in labor organizations; lawyer's role in dealing with judicial, administrative, and arbitral tribunals involved in enforcing labor law; lawyer's role in complex interrelationships between policy, statute, judicial, and administrative decisions.

LAW:8680 Law and Economics 3 s.h.
Introduction to economics analysis of law; how economic reasoning is used to explain and predict the effects of legal rules; fundamental areas of American law (e.g., property, contracts, torts, criminal law); use of economic efficiency as a normative criterion for evaluating legal rules; efficiency compared to various moral concepts to evaluate such rules.
LAW:8698 Law in the Muslim World 2-3 s.h.
International and comparative law issues relevant to countries in the Muslim World; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance. Requirements: junior or senior standing.

LAW:8709 Introduction to French Law 2-3 s.h.
Introduction to laws of France, characteristic features, and role of main institutions; civil law, contacts, tort, family law, commercial law, criminal law, labor law; visits to a French law school, Paris Court, and Ecole de Magistrature National (ENM), the National Judge School in Bordeaux. Summer abroad program.

LAW:8711 The Legal Profession 1-3 s.h.
Exploration of various aspects of history, structure, organization and function of legal profession; effective practice strategies; ethical and practical challenges of legal practice in different settings (i.e., working for judges, small and big firms, solo practice, corporations, non-profit organizations, public sector, internationally); readings, interviews, and discussion sessions with practicing attorneys; development of professional portfolios; practice of professional skills including effective communication, professional legal writing, and interviewing.

LAW:8712 Legislation 2-3 s.h.
Issues related to legislation and legislative process at state and federal level; introduction to legislation, legislative process, legislative advocacy, statutory drafting, statutory interpretation, and constitutional issues; role of lawyers in legislative process and formation of public policy.

LAW:8720 Mediation: Theory and Practice 3-4 s.h.
Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing; short writing assignments.

LAW:8726 Mergers and Acquisitions 3 s.h.
Significant legal and financial aspects of business combination transactions; transaction documents (e.g., stock purchase agreements, asset purchase agreements, merger agreements); valuation of companies and pricing of deals; legal and financial considerations affecting the structuring of deals; tender offers and their regulation under the Williams Act, tender offer rules; fiduciary duties of target board, including Revlon duties and the Unocal standard; anti-takeover devices (e.g., poison pills and staggered boards, deal protection devices, freezeout transactions); state anti-takeover statutes. Prerequisites: LAW:8331.

LAW:8733 Narrative Strategies for Lawyers 1-3 s.h.
Fiction writing; narrative nonfiction writing techniques; use of narrative in the legal context; workshop format to read and critique stories, published works, and works students have written.

LAW:8736 Natural Resource Law 2-3 s.h.
Survey of federal natural resources law; emphasis on current legal issues and focus on judicial resolution of disputes; history of public land law, constitutional issues in federal control of natural resources, environmental planning, wildlife protection, public land management, fisheries and marine resources, onshore and offshore minerals; history and politics of natural resources law, aspects of practicing in this area; various resources that pose different sorts of problems, regulatory responses to these problems used to build a toolkit of regulatory models that can be helpful in solving any resource problem.

LAW:8742 Negotiations 1-3 s.h.
Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations, conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

LAW:8751 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, RELS:6070, MGMT:9150, RELS:6075.

LAW:8752 Nonprofit Organizational Effectiveness II 3 s.h.

LAW:8763 Patent Law 2-4 s.h.
All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommendations: LAW:8615.

LAW:8770 Payment Law 1-3 s.h.
Law that governs methods by which businesses and consumers typically pay for goods and services in modern economy; legal rules applicable to traditional paper-based payment system, including negotiable instruments (checks and notes) and bank collection of checks; modern payment methods (credit cards, debit cards, wire transfers); focus on Articles 3, 4, and 4A of the Uniform Commercial Code and related federal law and regulations.

LAW:8787 International Finance 3 s.h.
International banking and securities transactions; major national markets of the United States, Europe, and Japan, and offshore markets; major areas of international regulation and policy, such as capital adequacy, clearance, and settlement.

LAW:8789 Unincorporated Business Associations 2-3 s.h.
Introduction to the main features of leading forms of unincorporated business associations, including limited liability companies (LLCs), limited partnerships, limited liability partnerships (LLPs), and hybrid for-profit/non-profit firms; topics include authority and management structure, fiduciary duties, financial rights, transfer rights, exit, and the unique issues affecting law and other professional firms; another unifying theme will be law and entrepreneurial action, with a specific focus on startup companies.
LAW:8917 Substitute Decision Making for Incapacitated Individuals 1-2 s.h.
Types and forms of substitute decision making for individuals whose decision-making capacity is impaired due to conditions such as dementia, mental disabilities, or mental illnesses and who need a surrogate (or substitute decision maker) to make decisions about matters such as finances; health care, personal care, living arrangements; financial powers of attorney; guardianships; conservatorships; advance directives including living wills, health care powers of attorney, out-of-hospital do-not-resuscitate orders (OOH-DNR); representative payees; introduction to probate court procedures and processes.

LAW:8919 Survey of Work Law 2-3 s.h.
Introductory survey of four types of legal regulation of the workplace: labor law, employment discrimination, law of private employment, and law of public employment.

LAW:8929 Taxation of Partnerships 2-3 s.h.
Introduction to federal tax treatment of partnerships and limited liability companies, the most common business entities in use in the United States today; classification of entities as partnerships for federal tax purposes; formation of partnership and subsequent contributions to partnership capital; flow-through tax treatment of partnership operations; tax-sensitive allocations of items of partnership income, deduction, credit and loss; partnership distributions and related tax-sheltering strategies; liquidation or sale of partnership interests; death or retirement of partners; tax treatment of partnerships compared with S corporations. Prerequisites: LAW:8194.

LAW:8936 Estate and Gift Tax 1-3 s.h.
Justification for wealth taxation, effectiveness of current law, and alternative methods of wealth taxation; two key wealth transfer taxes—estate tax and gift tax; emphasis on identification of tax base and taxpaying unit; may include income tax effects which flow from an individual's death, income taxation of grantor trusts, and related income tax issues. Corequisites: LAW:8194.

LAW:8939 Title Examination and Selected Real Estate Transactions 2 s.h.
Examination of abstracts of title to real property and preparation of resulting title opinion; drafting and transfer documents involved in typical real estate transactions.

LAW:8954 Trademarks and Unfair Competition Law 2-4 s.h.
Law of unfair competition with primary emphasis on trademarks; policies underlying unfair competition law, creation and establishment of trademark and trademark-like rights, enforcement of those rights, non-trademark concepts of false advertising, rights in one's persona; traditional doctrinal components and skill-based exercises; for students interested in trademark and unfair competition law, specifically and as part of a broader business law practice. Recommendations: LAW:8643.
LAW:8961 Select Issues in Transnational Litigation  arr.
Transnational litigation as any litigation involving a foreign
element (usually an American party in a foreign court or a
foreign party in an American court); litigation that seems
completely domestic and turns into a transnational one
(when discovery, interim measures, or enforcement are
sought overseas); encountering elements of transnational
litigation in today's global economy; in-depth study of a few
representative topics; emphasis on all relevant aspects of
transnational litigation (practice, doctrine, policy, theory).

LAW:8977 Advanced Trusts and Estates Practice  2 s.h.
Wide range of current issues in modern family estate
planning; difficult non-tax issues in family estate planning,
difficult tax-sensitive planning issues affecting clients of
modest means, difficult complex tax planning issues affecting
wealthy clients. Prerequisites: LAW:8981.

LAW:8979 Trusts and Estates II  arr.
Substantive provisions of wills and trust instruments; recurring
construction problems and pitfalls in drafting; powers of
appointment; future interests and how they operate in
complex trusts; impact of rules of policy restricting the
disposition of property, including the rule against perpetuities.
Corequisites: LAW:8981.

LAW:8981 Trusts and Estates I  1-4 s.h.
Law of succession and trusts; topics include policy basis of
inheritance and the changing character of intergenerational
wealth transfer; intestate succession; the requirements for
executing and revoking wills; the rise of will substitutes;
spousal protection against disinheritance; the creation,
modification, and termination of trusts; the particular rules
applicable to charitable trusts; the fiduciary duties of trustees;
the nature of a beneficiary’s interest in trust, the range of the
trustee’s discretion, and the rights of a beneficiary’s creditors;
recurring construction problems and pitfalls in drafting.

LAW:8987 Veterans Benefits Law  2-3 s.h.
Theory of veterans' benefits law and introduction to skills
necessary to represent veteran clients at every stage of the
U.S. Department of Veterans Affairs' adjudication process;
how many veterans struggle to navigate the complex VA
benefits system without assistance of counsel; law that
governs administration and adjudication of these benefits;
fundamental law of the VA’s claims adjudication process;
modification, and termination of trusts; the particular rules
applicable to charitable trusts; the fiduciary duties of trustees;
the nature of a beneficiary’s interest in trust, the range of the
trustee’s discretion, and the rights of a beneficiary’s creditors;
recurring construction problems and pitfalls in drafting.

LAW:8992 Water Law  arr.
Legal schemes for securing and using water rights in surface
water and groundwater for private and public uses in the
United States; riparian and prior appropriation doctrines
of water allocation, groundwater management regimes,
federal water management and regulation, and interstate
and transboundary allocation devices; evolving role of
science, economics, and policy in water allocation law; does
not address issues of water quality, which are covered in
environmental law.

LAW:9010 Appellate Advocacy I  1 s.h.
Experience based on an assigned fictitious case: writing an
appellate brief asserting the client's position, and arguing the
case before a panel of students, faculty, community attorneys.

LAW:9021 Van Oosterhout Baskerville Moot Court
Competition  1 s.h.
Single-elimination tournament culminating in the final four
advocates arguing before a panel of judges; advocates write
a portion of the brief, argue for and against the issue they
briefed. Prerequisites: LAW:9010.

LAW:9028 Jessup Moot Court Competition Team  1-2 s.h.
Participation as team member in Jessup International Moot
Court Competition; preparation of memorials in fall, travel to
February regional rounds; travel to international competition
in Washington, D.C., for top two teams. Prerequisites:
LAW:9010.

LAW:9033 National Moot Court Competition  1 s.h.
Participation by third-year students as law school’s
representatives in the regional Moot Court competition (fall
semester), and in judging intramural Moot Court competitions
(spring semester). Requirements: placement as one of four
finalists in LAW:9021.

LAW:9034 National Moot Court Tutorial  2 s.h.
For students participating in the National Moot Court
competition; provides a problem and a substantial record,
which provide basis for appellate brief and oral argument
competition; integrates teaching of substantive law with
development of oral and written advocacy skills in preparation
and application for the national competition.

LAW:9037 Advanced Moot Court Competition
Team  1 s.h.
Advanced Moot court team; members are top advocates from
previous year’s Van Oosterhout/Baskerville competition. Fall of
third year.

LAW:9038 Jessup International Moot Court
Competition  1 s.h.
Participation by second-year students in intramural regional-
and national-level moot court competition in international
law; intensive criticism in appellate brief writing and oral
argument. Prerequisites: LAW:9010.

LAW:9046 Moot Court Board  1-3 s.h.
Experience as member of the Moot Court Board administering
the Appellate Advocacy Program, researching appellate
cases used in the program, judging appellate arguments.
Requirements: membership based on performance in
LAW:9010.

LAW:9051 National Arbitration Competition
Team  1-2 s.h.
Students represent the College of Law at the ABA Regional/
National Arbitration Competitions held in fall of second or
third year; team members prepare to argue both sides of a
dispute in front of a panel of arbitrators at the competition;
topics include a review of basic presentation skills, essential
elements of arbitrating a dispute, and proper decorum in front
of the panel as well as in-depth practice and analysis of the
national case problem assigned; students spend time crafting
legal arguments, practicing the effective use of exhibits and
arbitration booklets, engaging in opening statements, direct
examination of witnesses, cross examination, and closing
arguments.
LAW:9060 Trial Advocacy 2 s.h.
Training in basic skills of trial advocacy; focus on particular aspects of trial technique (direct examination, cross-examination, handling documents, making objections, expert witnesses, jury selection, opening statements, closing arguments); pedagogical emphasis on learning by doing with immediate feedback by classmates, faculty, and outside attorneys or judges with subsequent videotape critiques; full-scale trial, from filing of pretrial motions to rendering of a jury verdict conducted by student co-counsel before a visiting Iowa judge and jury of lay people. Prerequisites: LAW:8460.

LAW:9061 Advanced Trial Advocacy - Stephenson Competition 1-2 s.h.
Review and expansion of topics presented in the initial trial advocacy course; preparation and application of these principles in the Stephenson trials; introduction to additional advanced problems such as the evidentiary issues raised in the trial problem. Corequisites: LAW:9060.

LAW:9062 Trial Advocacy Board 1-2 s.h.
Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: LAW:8460 and LAW:9060.

LAW:9066 Stephenson Trial Advocacy Team arr.
Student participation as College of Law representatives in Stephenson Trial Advocacy Competition. Prerequisites: LAW:9061.

LAW:9115 Law Review 1-2 s.h.
Performance of substantive tasks to produce a first-rate scholarly journal; writing a substantial note; comprehensive legal research experience; analysis of complex legal issues with enhanced critical-reasoning skills and command of the legal standard, The Bluebook citation system; selection of students that transfer to UI College of Law after their first year and rising second-year students is based on the Write-On Competition.

Experience on the Iowa Law Review editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9115.

LAW:9124 Journal of Corporation Law 1-2 s.h.
Experience editing articles and writing commentaries for The Journal of Corporation Law, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.

LAW:9127 Student Journal Editor - Journal of Corporate Law arr.
Experience on The Journal of Corporation Law editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9124.

LAW:9142 Transnational Law and Contemporary Problems Journal 1-2 s.h.
Experience researching and writing on issues in international and comparative law for the journal Transnational Law & Contemporary Problems. Requirements: second- or third-year law standing.

LAW:9145 Student Journal Editor - TLCP Journal arr.
Experience researching, writing, and editing on issues in international and comparative law for the journal Transnational Law & Contemporary Problems. Requirements: second- or third-year law standing.

LAW:9163 Journal of Gender, Race & Justice 1-2 s.h.
Academic year experience on The Journal of Gender, Race & Justice: writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Requirements: second- or third-year law standing.

LAW:9166 Student Journal Editor - Gender, Race & Justice arr.
Experience on The Journal of Gender, Race & Justice editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.

LAW:9251 Legal Practice Capstone 3-7 s.h.
Preparation for professional settings in which junior attorneys are expected to manage assignments from several different supervisors at once and execute projects in areas of law not formally studied in law school; variety of legal projects covering an array of doctrinal areas; identities of participating faculty members and nature of assigned projects revealed when course commences (e.g., junior attorneys in large and mid-sized law firms often discover day-to-day who their next supervisors are and what their next projects will be). Requirements: J.D. standing and in final year of study.

LAW:9302 Clinical Law Program - Internship arr.
Experience working directly with faculty members on cases and in-house program; full participation in interviewing, fact investigation, negotiation, classroom discussions.

LAW:9307 Clinical Law Program - Externship arr.
Experience representing clients through legal assistance offices in eastern Iowa, under supervision of faculty members and staff attorneys.

LAW:9322 Field Placement: Judicial arr.
Close work with a federal district court judge or state appellate judge conducting research and drafting a wide variety of legal memoranda, orders, and opinions; assist in hearings and perform other duties generally associated with a judicial clerkship; weekly meetings with a faculty supervisor to discuss student's work in chambers; participation in biweekly classroom discussions.

LAW:9331 Field Placement: General arr.
Experience in nonprofit organizations, government agencies; unpaid.

LAW:9335 Summer Legal Placement 1-3 s.h.
Externship opportunities for direct involvement in activities characteristically performed by attorneys (e.g., research and writing, document drafting, client interviewing and counseling, fact investigation, negotiations, court appearances); in-depth exposure to as many facets of the actual practice of law as practicable in each externship.

LAW:9346 British Legal Methods Clinical Program 3 s.h.
British Law externship; placement in London law office under guidance of barrister or solicitor; seminar and enrollment in course on English legal system taught by faculty of King's College, University of London.
LAW:9380 Courts Colloquium 1 s.h.
Opportunity to learn about inner workings of American judicial system through the lens of many judges; each semester centered on a theme (i.e., Iowa Courts, State Supreme Courts); sessions led by judges who, based on their positions, fit within selected theme.

LAW:9404 Field Placement: Corporate Law arr.
One-semester placement at a Delaware court; students typically assigned to many of the same tasks required of judicial clerks, may include corporate law issues. Prerequisites: LAW:8331.

LAW:9413 Health and Elder Law Practicum 1-6 s.h.
Opportunity to participate in research involving current health and elder law and policy issues, in collaboration with public health agencies, legislators, professional organizations, and advocacy organizations.

LAW:9423 Tutorial arr.
Different types of pedagogical techniques.

LAW:9424 Tutorial 1-4 s.h.
Work under faculty supervision; may involve substantive area of the law of jurisprudential ideas as they appear in various intellectual spheres; tutorials.

LAW:9429 Intellectual Property Advocacy 1-4 s.h.
Integrates teaching of substantive intellectual property law with development of oral and written advocacy skills in intellectual property field; builds on earlier learning in preparation for practice of law.

LAW:9442 Legal Analysis Writing and Research for Foreign Trained Lawyers 1-2 s.h.
Development of legal analysis, writing, and research skills in connection with a variety of assignments for foreign trained lawyers.

LAW:9444 Tutorial for Foreign-Trained Lawyers 1 s.h.

LAW:9445 Foreign-Trained Lawyer Orientation 1-2 s.h.
Orientation for foreign-trained student to U.S. legal system; introduction to U.S. patterns of legal argumentation, main institutional structures of U.S. legal system, and other distinctive aspects and/or fundamental principles of U.S. law; material drawn from basic areas of law (e.g., constitutional law, civil and criminal procedure, contracts, torts, property).

Examination of recent patent-related en banc Federal Circuit and Supreme Court decisions. Prerequisites: LAW:8643 or LAW:8763.

LAW:9455 Medical Tutorial for Law Students arr.
Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine. Prerequisites: LAW:8562.

LAW:9460 SJD Tutorial 5 s.h.
Thesis work under supervision of Doctor of Juridical Science (S.J.D.) committees; dissertation committee chairs conduct an irregular series of meetings to learn about and discuss issues common to research and writing of each thesis involved; students develop full thesis proposals and draft individual chapters; forum provided for workshops on student work and development of students’ abilities to discuss and critique legal scholarship; for all S.J.D. students during their two semesters of residency at the College of Law.

LAW:9473 Writing Tutorial arr.
Writing project on a subject or topical area specified by the supervising faculty member; group meetings; writing tutorial.

LAW:9481 Supplementary Writing arr.
Supplemental writing project that is related to a student’s course, but goes beyond the requirements for the course, and is supervised by the faculty member who teaches the course.

LAW:9486 Directed Research and Writing arr.
Research and writing project unrelated to any substantive course, supervised by a faculty member.

LAW:9490 Independent Research Project arr.
Work under faculty supervision; research.

LAW:9491 Independent Research and Writing arr.
Independent research and writing under thesis adviser/committee chair. Requirements: S.J.D. enrollment.

Examination of issues arising out of contemporary problems of immigration law and policy; topics vary, may include critical analysis of initiatives for national, state, and local immigration reform; traditional class-based component, experiential component, advanced legal research component, and rigorous writing requirement. Requirements: LAW:8577 or legal clinic experience.

LAW:9509 Advanced Problems in International Environmental Law arr.
Research and writing seminar exploring selected topics that may be encountered in practice; topics vary.

LAW:9511 Advanced Problems in International Law and Policy arr.
Relationships between international law and several political visions of a world order; the United Nations Charter; other visions that have historically characterized United States, Western European, Russian, Chinese, Islamic, and other perspectives; how several of these historical perspectives appear to be at work in current conflicts involving U.N. Security Council, ISIS and other terrorist organizations, Ukraine, South China Sea, European Union, Eurozone; conflicts and potential for international law to aid in their resolution.

LAW:9518 Advanced Topics in Corporate Law arr.
Wide range of topics; theory of the firm, fiduciary duties, corporate counseling issues, history of corporate law, and so forth. Requirements: one law or business course in corporate law.

LAW:9528 Advanced Topics in International Law arr.
Contemporary problems of public international law and policy; issues arising from armed conflict, use of force, pacific settlement of disputes; human rights law and policy (individual civil, political, economic, social, and cultural rights; group rights such as self-determination, development, environment, peace); trade and development; environmental law and policy (e.g., climate change, species extinction, pollution).

LAW:9537 Appellate Adjudication Seminar 3-4 s.h.
Introduction to skill and art of writing appellate judicial opinions; brief, preliminary study of appellate jurisdiction and procedure; group responsibility for deciding a number of cases pending before regional appellate courts (e.g., the Iowa Supreme Court, the United States Court of Appeals for the Eighth Circuit); students study briefs and conduct additional research as appropriate, conference cases sitting as a mock appellate court, assign and prepare opinions, solicit votes, and write one or two opinions.
LAW:9549 Capital Punishment arr.
Overview of the death penalty as presently applied in America; moral issues; long-term trends limiting the use of the death penalty in the United States and abroad; legal issues and Eighth Amendment jurisprudence that has developed since the 1960s regarding limits on the exercise of jury discretion, jury selection, proportionality, the execution of minors, racial discrimination, mens rea requirements, capital appeals and collateral attacks, and death penalty lawyering; critique of death penalty bills proposed in recent years for Iowa.

LAW:9550 Capitalism arr.
Economic and moral aspects of capitalism as a system for organizing a society's economic activity; major topics including the beginnings of capitalist theory in Smith, Marxist critiques of capitalism in 19th century, capitalism and its critics in the Gilded Age and Progressive Era, the Great Depression and Keynesianism, modern defenses and criticisms of capitalism in Hayek, Habermas, Friedman, Rawls, and others.

Coercive state intervention through child welfare system to protect children from maltreatment by parents and other caretakers; definitions of child abuse and neglect as defined by statutes and case law, reporting laws, civil child abuse and neglect proceedings, foster care and out-of-home placement of children, termination of parental rights, role of attorneys and guardians ad litem in child abuse and neglect proceedings.

LAW:9557 Constitutional Interpretation Seminar arr.
How the United States Supreme Court interprets the Constitution; particular emphasis on substantive due process and equal protection doctrine. Corequisites: LAW:8280.

LAW:9559 Corporate Ethics arr.
Examination of ethical issues that businesses and their attorneys confront in multiple contexts; particular emphasis on analyzing the meaning of ethical behavior, approaches to ethical decision making, issues of sustainability, development of social enterprise business models, and attorney's role in counseling corporate clients on ethical issues. Prerequisites: LAW:8331.

LAW:9563 Topics in Criminal Procedure arr.
In-depth look at criminal procedure topics not addressed or discussed briefly in basic criminal procedure courses, including jury selection, trial strategies, bond hearings, litigating suppression motions, sentencing advocacy, inner workings of courtrooms, and mass incarceration.

LAW:9573 Cultural Property/Heritage arr.
Concept of cultural property, measures for its protection, impact of these measures on the transfer of cultural items; traditional art and architecture, biological and fossil material, human remains; contexts in which issues have arisen, such as stolen cultural property, property acquired during armed conflict and in colonial settings, and property collected in the field or excavated; international, national, and state law, including UNESCO convention on illicit transfer of cultural property, U.S. Archaeological Resources Protection Act, Native American Graves Protection and Repatriation Act; how developing professional ethics codes affect the concept of cultural property.

LAW:9582 Deals arr.
Economic structure of complex commercial transactions as memorialized in agreements including bank credit facilities, indentures, underwriting agreements, other documents governing equity financings and financings involving convertible or preferred securities, venture capital agreements, securitization documents, business combination agreements, joint venture and shareholders agreements, limited liability company operating agreements, project finance documents; commercial agreements and how sophisticated parties order their private relationships to achieve efficient results. Prerequisites: LAW:8331.

Introduction to the most pressing legal issues facing colleges and universities today: free speech on campus; academic freedom and tenure; diversity; student discipline; student privacy, safety, and well-being; Title IX; and intercollegiate athletics; a major goal is to consider the policy questions associated with institutional responses to these legal issues.

LAW:9639 History of Regulation of Smoking and Tobacco arr.
Regulation of smoking and tobacco use; history, beginning with 19th and early-20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.

LAW:9656 Topics in 19th-Century American Legal History arr.
Exploration of selected focus topics, may include developments in the law of the home and the law of the workplace (free labor, worker immigration, apprenticeship, indentured labor, slavery); women's legal history; land issues and various Homestead Acts; Blackstone in America; Reconstruction of the Constitution after the Civil War; The National Archives—which houses American legal historical documents—displays the phrase, "What is past is prologue;" legal history that explains how we got to the legal present and to understand what is the law, you have to know how something got to be the law. Same as HIST:7256.

LAW:9681 Elder Law arr.
Qualification for Medicaid, elder abuse and neglect, discrimination in employment and elsewhere, retirement pension planning and taxation, elderly patients' rights in nursing homes; conservatorships and guardianships.

LAW:9692 Innovation, Business, and Law Colloquium arr.
Varied topics; antitrust, intellectual property, corporate and securities law, and the interfaces between those disciplines; readings, discussion.

LAW:9701 Terrorism, ISIS, and International Criminal Law arr.
Available legal responses to ISIS; topics include the law of genocide, war crimes (including gender crimes), crimes against humanity, terrorism, human trafficking, money laundering, the International Criminal Court, and alternatives to prosecution including national truth commissions; strengths and weaknesses of international criminal law as a response to mass atrocity; practical considerations that limit and permit the effective functioning of this burgeoning legal experiment.
LAW:9717 Iowa Medical Innovation Group Seminar  arr.
Interdisciplinary seminar intended to simulate the experience of product development, including potential business and legal issues; over the course of a year a team of students, with at least one law student on each team, will originate an idea for a medical device, design it and produce figures or a prototype, design a business model for marketing it, and evaluate legal issues and prepare draft legal documents; law students will analyze and counsel team members on intellectual property and business law issues and prepare draft contracts, licensing agreements, and materials for procuring intellectual property rights.

LAW:9720 UI Center for International Finance & Development  arr.
Study of problems and issues in the complex world of international finance and development; focus on the International Monetary Fund and the World Bank; research and writing a new issue for the UCIFD website.

LAW:9723 Seminar on Islamic Law and Government  3 s.h.
Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as RELS:6723.

LAW:9758 Law and Lawyers in Literature  arr.
Fundamental societal issues and ethical questions examined through discussion of literary works, including novels and plays by writers such as Camus, Coetzee, Dostoyevsky, Durrenmatt, Faulkner, Ibsen, Kafka, Melville, Schaffer, Thucydides.

LAW:9803 Law and Social Science  arr.
Fundamental legal concepts and theories built on empirically testable assumptions about human behavior and decision making; testing common sense assumptions against relevant psychological and social neuroscience research; focus on domains of criminal law and criminal procedure.

LAW:9811 Law of War, Peace, and Military Affairs  arr.
How does the law seek to restrain use of force in armed conflict? When may sovereign states lawfully take up arms? Once war begins, what methods may states and soldiers employ? How does and should the law of war deal with non-state actors, notably terrorists and private military contractors? Must the world reassess its answers to these questions in light of geostrategic developments since 9/11? When and why is a soldier’s obedience to illegal orders an acceptable excuse? Is the Nuclear Non-Proliferation Treaty a success or failure?

LAW:9818 Legal Issues: Intercollegiate Athletics  arr.
Legal issues affecting college and university athletics and athletes; includes drug testing, recruitment, gender equity (Title IX), NCAA regulations, endorsement contracts, coaching contracts, trademark licensing, and broadcasting rights.

LAW:9826 LL.M. Seminar  arr.
Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.

LAW:9838 Selected Topics in Comparative Law  arr.
Selected focus topics in different offerings.

Trial skills and strategy; real trial transcripts, contemporary accounts of the selected trials, secondary literature evaluating what actually happened in the courtroom and relevant history; skills of opening and closing argument, voir dire, direct and cross examination, witness selection, use of exhibits.

LAW:9849 Nonprofit and Philanthropic Organizations  arr.
Issues in law and policy relating to philanthropic and nonprofit institutions; creation, role, nature, and history of nonprofit entities; tax exemption, tax treatment (including property and donor tax issues); political and legislative activities; roles of members, directors, officers; problems of external regulation, accreditation, ethics; special issues for religious organizations, community foundations, private foundations, universities; development of philanthropic and nonprofit activity in foreign jurisdictions.

LAW:9855 Policy Lab Seminar  arr.
Application of legal skills to real world policy problems; work in teams to investigate a live issue, conduct necessary research, talk to stakeholders, prepare a legal work product (proposed legislation, regulation, doctrinal changes) and a policy justification for that proposal; focused instruction on a specific policy space, general instruction in tools and methods used to analyze policy and design solutions; independent research on particular issues within that space; presentations; working through challenges that arise during process.

LAW:9863 Patent Prosecution Seminar  3-4 s.h.
Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisites: LAW:8643.

LAW:9882 Public Health Law  arr.
Introduction to scope, function, and history of governmental activities and programs encompassed by public health regimes (primarily in the United States); legal and constitutional powers and duties of states to create prerequisites for health of population as a whole; limitations on exercise of that power to restrict individuals interests (inter alia) in liberty, autonomy, privacy, and property; tensions and conflicts that arise when collective action on behalf of public/common good constrains what the state deems to be acceptable risks triggered by actions of private individuals.

LAW:9912 Selected Issues in Family Law  arr.
In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

LAW:9920 Federal Criminal Sentencing  arr.
Sentencing as a key stage of the criminal justice system; purposes of sentences, guilty pleas, and plea bargaining; procedural rights during the sentencing process; types of sentencing statutes, federal guidelines, and the federal death penalty; supervised release, probation, and revocation of supervised release and collateral; consequences and sanctions.

LAW:9941 State Constitutional Law  arr.
Power of state courts to independently interpret state constitutional provisions that are identical or similar to the federal counterparts; various approaches taken by state courts with respect to this issue; in-depth analysis of cases where a state court has departed from the federal interpretation. Prerequisites: LAW:8280.
LAW:9950 S.J.D. Continuous Enrollment 1 s.h.
Intended for S.J.D. students working on their dissertation with no mandatory classes left to take; continuous registration is a College of Law policy and students should register for continuous registration only if they are not going to register for any other tuition and fee-assessing courses. Requirements: S.J.D. enrollment, completion of required course work, and promotion to candidacy.

LAW:9959 Supreme Court Seminar arr.
Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases sitting as a mock Supreme Court, assigning and preparing opinions, soliciting votes of colleagues; preparation of two opinions.

LAW:9990 Wrongful Convictions and the American Criminal Justice System arr.
Over 300 innocent persons in the United States have been exonerated through DNA evidence after being convicted of crimes they did not commit since 1989; how wrongful convictions occur, how they are remedied, how future injustices can be prevented; introduction to criminal appeals and postconviction proceedings; examination of cases of wrongful convictions; common factors that contribute to conviction of innocent; challenges of proving innocence under statutory and constitutional law; how the system can be reformed to prevent wrongful convictions.

Law Study Abroad Courses

LWAB:8230 Program in Comparative Law in Bordeaux, France arr.
Intensive course work in France taught by professors from Iowa and France. Five-week courses in May and June.

Study abroad program for students from seven law schools (Iowa, Georgia, Utah, Kansas, Missouri-Columbia, Indiana-Bloomington, Chicago-Kent); American and British law taught by faculty drawn from the seven schools and British universities; clinical law program, work with British barristers and solicitors.

LWAB:8250 Law Study Abroad at Peking University School of Transnational Law arr.
Exchange study program at Peking University of Transnational Law in China.

LWAB:8825 International and Comparative Study Abroad arr.

LWAB:9220 Law Study Abroad at Bucerius arr.
Exchange student study at Bucerius Law School, Hamburg, Germany. Fall semester.

LWAB:9223 Law Study Abroad at Católica University arr.
Exchange student study at the University of Católica in Lisbon, Portugal.

LWAB:9226 Law Study Abroad at Radboud University Nijmegen arr.
Exchange student study at Radbound University in Nijmegen, Netherlands.
Juris Doctor, J.D.

The Juris Doctor (J.D.) is a professional degree awarded by the College of Law. The University of Iowa College of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

The first year of the J.D. program offers the personal connection and attention students need to develop a strong intellectual foundation for legal thinking and writing. The College of Law has one of the lowest student-faculty ratios of any law school. Professors have an open-door policy, and they serve as models for the kind of highly collaborative, rigorously professional behavior that prepares students to serve as counselor to their clients. Students get intensive, individualized instruction from legal writing faculty; the College of Law is one of the few law schools in the nation with a full-time faculty dedicated solely to a student’s growth as a legal writer.

In the second and third years, students focus on the areas of law that most interest them, drawing from a rich menu of mainstream, specialized, and clinical courses. A wide array of opportunities provides experiential learning: moot court competitions, the Clinical Law Program that allows students to take the lead in real cases, or allowing students to write for one of the four student-run scholarly journals. The externship program provides a wide range of placements for students still in law school. Students have worked in U.S. District Courts, legal aid centers, federal public defenders’ offices, and nongovernmental organizations (NGOs) around the world. Students also may add distinction to their résumés by participating in study abroad or exchange programs.

Details about applications and admission to the program are available on the College of Law website.

Cocurricular Programs

Students enrich their course of study by participating in the college’s cocurricular programs, which include Moot Court, the Trial Advocacy Program, and four student-produced journals.

Moot Court

The Moot Court appellate advocacy programs familiarize students with writing appellate briefs, acquaints them with citation form, develops research skills, and strengthens persuasive ability in oral argument at the appellate court level.

Trial Advocacy

The Trial Advocacy Program is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is LAW:9060 Trial Advocacy, a 2 s.h. course taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent the University of Iowa in the national trial competition.

Iowa Law Review

Since its inception in 1915, the Iowa Law Review has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the review since 1935, editing and publishing articles by professors and students. To learn more, visit the Iowa Law Review website.

Journal of Corporation Law

The Journal of Corporation Law is the nation’s oldest and most cited student-published legal periodical specializing in corporate law. The journal’s scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted by practitioners and academics are published in each of four annual issues. See the Journal of Corporation Law website.

Journal of Gender, Race & Justice

The Journal of Gender, Race & Justice pushes the boundaries of legal scholarship and theory in its focus on social justice issues. The journal hosts a symposium at the College of Law every other year, bringing together nationally renowned legal scholars and practitioners to discuss the relationships among the law and race, gender, sex, sexual identity, economic class, ability, and other identity characteristics. The journal publishes an annual volume of legal works that includes symposium papers, papers from conferences outside the college, and articles written by Iowa law students. To learn more, visit the Journal of Gender, Race & Justice website.

Transnational Law & Contemporary Problems

Transnational Law & Contemporary Problems (TLCP) addresses issues and problems that transcend traditional political boundaries, that are of interest to the international and comparative law community, and that are not commonly found in other journals and reviews. One issue takes the form of a symposium addressing specific topics; this issue has a guest editor who is a legal scholar noted for his or her work on the symposium topic. The second issue is submission based. Every other year the journal organizes and sponsors a symposium on a contemporary international issue; past topics include climate change, the European Union’s sovereign debt crisis, and war crimes. For more information, visit the Transnational Law & Contemporary Problems website.

Requirements

To be eligible for a J.D. degree, a student must:

• meet the credit hour requirements;
• meet the length of study requirements;
• achieve a cumulative g.p.a. of at least 2.1;
• take and complete all required courses;
• satisfy the writing requirements; and
• satisfy the experiential course requirement.
First-Year Curriculum

The first-year curriculum emphasizes development of analytical skills, a sense of the role of legal institutions in society, and essential writing skills. Each course in the first-year curriculum shares these emphases and conveys substantive knowledge about a particular area of the law.

First-year students take the following courses.

The two-semester sequence LAW:8032 and LAW:8033, called Legal Analysis Writing and Research (LAWR), is designed to equip students with effective skills in legal analysis, writing and oral communication (oral advocacy), and research.

Second- and Third-Year Curriculum

Second- and third-year courses cover the range of specialties within the legal profession, allowing students to explore and follow their professional interests in a particular career specialization, to write for one of the school's four student-run scholarly journals, to pursue joint degrees in law-related graduate programs, or to simply obtain the widest possible exposure to the legal landscape.

All second- and third-year students must complete the following work.

Joint J.D./Graduate Degrees

The College of Law and the Graduate College offer several joint degree programs in which students work toward the J.D. degree and a graduate degree concurrently. Students in joint J.D./graduate degree programs pay tuition at the College of Law rate if the tuition is higher for the J.D. program than for the graduate program. An exception is made for students who are not enrolled in College of Law courses or in other courses that will be applied to the J.D. degree during a fall or spring semester or a summer session. Joint J.D./graduate degree students are charged tuition at the College of Law rate for at least six semesters.
Master of Laws, LL.M.

Requirements

The Master of Laws (LL.M.), offered in the College of Law, is designed for two types of students:

Foreign-trained jurists who seek a comparative introduction to, and specific training in, aspects of United States law and legal institutions and a path to state bar admission. Students benefit from the College of Law’s legal analysis, writing, and research course, and core courses including contracts, property, torts, and professional responsibility. An extended orientation provides an introduction to United States law. This is the Legal Practice Track; see below.

Foreign-trained jurists or graduates of J.D. programs in the United States who wish to deepen their understanding of law and are interested in research. The program encourages close collaboration with renowned experts in comparative law; anti-competition law; law and economics; law and society; international law, including the law pertaining to international business transactions and/or human rights; and business and innovation. This is the Research Track; see below.

The LL.M. program admits fewer applicants so students receive substantial attention from the faculty; thus, admission is competitive. All applicants must present evidence of high academic potential and strong recommendations, especially from law professors who supervised their work in classes or seminars.

Degree Requirements

The LL.M. degree requires that students successfully complete a minimum of 24 s.h. of credit, as approved by their faculty advisor. The 24 s.h. is selected from the College of Law’s general course offerings and from LL.M.-specific courses.

Legal Practice Track

This track is open to foreign-trained lawyers who do not have a J.D. earned in the United States. Students enroll in the LL.M. orientation to the U.S. legal system course in two parts (2 s.h.); a course in professional legal writing (2 s.h.); a course in professional responsibility (3 s.h.); and at least 6 s.h. of basic bar exam courses, such as contracts, torts, or constitutional law. This track is designed to qualify students to take the bar exam in states that allow graduates of L.L.M. programs to complete the bar exam.

Research Track

This track is open to both foreign-trained students and students who hold a J.D. degree earned in the United States. LL.M. students without a J.D. degree must take the LL.M. orientation to the U.S. legal system course in August before the start of the fall semester (1 s.h.). Students take the LL.M. seminar, a research and writing course in which they write a research paper on a topic chosen with the approval of their advisor (for at least 1 s.h.). This track is especially suitable for those seeking to enter into an academic career or one that primarily involves policy formulation or research.

Students who earned a J.D. in the United States and international students who have been trained in another common-law jurisdiction, whose English competence is sufficiently high, and who choose the research track are required to undertake a more ambitious research project (4 s.h.) intended to lead to the production of a publishable paper. Others suitably qualified also may attempt the longer research paper with their advisor’s approval.

With the exception of the LL.M. orientation course and the LL.M. seminar, courses are taken with other J.D. students from law course offerings, especially offerings on U.S., international, and comparative law. This method of instruction ensures a very effective comparative experience through broad contact with U.S. law students and professors, and U.S.-trained students similarly benefit from close contact with foreign-trained lawyers.
Master of Studies in Law, M.S.L.

The Master of Studies in Law (M.S.L.) degree is primarily intended to educate students and professionals in other fields who do not wish to practice law but who need to recognize and respond effectively to legal issues arising in their work. Individuals who have completed their B.A. or B.S. degree may choose to better position themselves in the job market. Others may be on an established career path but seek to increase their skill set and enhance mobility and promotion opportunities.

The M.S.L. program provides professionals with an overview of the legal system as a whole, as well as an introduction to some of the legal issues that they are likely to confront in their fields. Students take existing courses in the College of Law alongside J.D. students.

The degree may be completed in as little as one year of full-time study or in not more than four years of part-time study. The M.S.L. program does not qualify graduates to practice law.

Requirements

The Master of Studies in Law (M.S.L.) program requires 30 s.h. of credit. With law school approval, M.S.L. students may take up to 9 s.h. in related disciplines from other colleges across campus. Students complete common requirements and select a specialty track. Consult the College of Law for track information.

Common Requirements

All students must take the following.

Both of these:

<table>
<thead>
<tr>

<td>Torts</td>
<td>4</td>
</tr>
</tbody>
</table>

Admission

Applicants must submit an application for admission; a short statement detailing their reasons for pursuing the M.S.L. degree; a current résumé; official transcripts from all institutions students have attended; two letters of recommendation; and an official ACT, SAT, Graduate Record (GRE) General Test, Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) score. International students whose first language is not English also must demonstrate English language proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL).

Application materials are reviewed by the M.S.L. Faculty Oversight Committee.
Doctor of Juridical Science, S.J.D.

The Doctor of Juridical Science (S.J.D.) program is intended for students who wish to conduct original and advanced legal research in law under faculty supervision. S.J.D. students are expected to write a dissertation of publishable quality making a significant and original contribution to legal scholarship. The dissertation should be a book-length manuscript or a series of related articles of equivalent intellectual ambition and scope.

To be admitted to the S.J.D. program, students typically first complete the LL.M. degree at the University of Iowa or a similar masters-level degree at another law school, either in the United States or at an English-language law school with academic standards equivalent to those of highly-ranked U.S. LL.M. programs. In appropriate circumstances, however, the admissions committee will consider applications from excellent students without an English-language master’s-level degree who wish to proceed directly to work on their S.J.D. degree.

Admission to the S.J.D. program will be granted only if a tenured member of the faculty of the College of Law is available and agrees to serve as the S.J.D. chair of a student’s dissertation committee.

Requirements

Degree Requirements

There are five requirements for earning the S.J.D. degree.

Year of Residency

Doctor of Juridical Science students must spend at least one academic year (two semesters) in residence in the S.J.D. program at the College of Law. The course of study in that year differs depending on whether a student already has an LL.M. or an equivalent master’s-level degree.

Students who already have an LL.M. or equivalent master’s-level degree must complete 18 s.h. of credit during their first year of residency. They must enroll in the S.J.D. tutorial (5 s.h. each semester; 10 s.h. total) to conduct research and writing under the supervision of their S.J.D. dissertation committee. The work in the S.J.D. tutorial focuses on formulating a detailed dissertation proposal, beginning research for and writing of portions of the dissertation, and completing one or more chapters.

The balance of the required 18 s.h. will be earned through research and writing related to a student’s dissertation, supervised by the student’s S.J.D. chair. However, at the discretion of a student’s S.J.D. committee, some of the semester hours may be allocated to courses or seminars that the committee feels a student needs to strengthen the ability to write a successful dissertation.

Students who do not already have an LL.M. or equivalent master’s-level degree must complete 24 s.h. of credit during their first year of residency. Students must complete 18 s.h. as indicated above and courses that provide an introduction to the U.S. legal system and require significant research and writing in preparation for the S.J.D. thesis.

Admission to Candidacy for the S.J.D.

Admission to S.J.D. candidacy is a formal step that must be achieved before a student has the right to continue in the S.J.D. program to complete a dissertation and is determined by the student’s committee on the basis of the work done during the student’s year of residency in the program.

As part of the assessment process, the S.J.D. committee will hold an oral examination toward the end of the student’s year of residency that focuses on the work the candidate has completed on the dissertation, the candidate’s general knowledge and understanding in relation to the subject matter of the dissertation, and the candidate’s further plans for completion of the dissertation. If the committee is not able to admit the student to S.J.D. candidacy at the conclusion of the first year of residency, the committee may give an extension of up to one calendar year if it finds a sufficient basis to believe that the student likely will be able to satisfy the foregoing standard within that time.

Presentation of Dissertation Work

Each S.J.D. student is required to make at least one substantive presentation of dissertation work at a meeting of the S.J.D. tutorial to a specially constituted group of faculty, or in a public meeting, as arranged with the student’s S.J.D. committee.

Completion of the Dissertation

Students admitted to S.J.D. candidacy continue to enroll in one s.h. of dissertation credit, which provides access to University resources, including the Law Library. However, students admitted to S.J.D. candidacy are free to complete their dissertation wherever they wish. In any event, they must continue to coordinate with their S.J.D. committee and continue to register each fall and spring semester as an S.J.D. candidate in the college.

Oral Defense of the Dissertation

Before the student’s S.J.D. committee decides whether to approve a student’s completed dissertation for award of the S.J.D. degree, the student must successfully defend the dissertation in an oral defense led by the student’s S.J.D. committee. A student must complete the dissertation and have it approved by the S.J.D. committee within five calendar years from the date of admission to S.J.D. candidacy.
University of Iowa Center for Human Rights

Director, Center for Human Rights

Associate Director, Center for Human Rights and Director, Human Rights Certificate Program
• Greg Hamot

Assistant Director, Center for Human Rights and Associate Director, Human Rights Certificate
• Amy Weismann

Undergraduate certificate: human rights
Website: http://uichr.org

Human rights concern the inherent dignity of all human beings and the promotion and protection of that dignity regardless of race, color, gender, sexual orientation, religion, culture, nationality, birth, or other status. The Certificate in Human Rights broadens students' understanding of human rights issues and helps them learn how to use an interdisciplinary approach to identify solutions.

Course work for the certificate is drawn from units across the University of Iowa. It prepares students to examine societal problems critically and to design specific solutions to human rights dilemmas in a wide range of areas, such as civil governance, the situations of women and racial and sexual minorities, child welfare, socioeconomic development and well-being, hunger and poverty, education, health, immigration, ecological sustainability, and mass violence.

The Certificate in Human Rights is administered and awarded by the College of Law [p. 1326].

Programs

Undergraduate Program of Study

Certificate
• Certificate in Human Rights [p. 1347]

Courses

University of Iowa Center for Human Rights Courses

HRTS:2115 Introduction to Human Rights 3 s.h.
Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as IS:2115.

HRTS:3895 Human Rights and Community Development 3 s.h.
Exploration of connections and tensions between human rights as defined by member states of the United Nations; meaning and practice of community development, especially but not exclusively, in the United States; focus on critical thinking, in-depth discussion of readings, group work, and individual writing.

HRTS:3900 Child Labor and International Human Rights 3 s.h.
Complexity of child labor in global, regional, national, and local contexts; international human rights system, current programs and strategies for reducing or eliminating abusive child labor. Same as IS:3900.

HRTS:3905 Topics in Human Rights 1-3 s.h.
Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:3905.

Beginning of modern human rights era in 1948 and newly formed United Nations as one of the few institutions acting to protect human rights; present day aspiring advocates confronted by bewildering array of institutions to which they might bring human rights concerns; human rights enforcement mechanisms from an advocate's point of view; shortcomings of human rights enforcement and how it can be made better; broad definition of advocacy; legal and nonlegal conceptions of enforcement.

HRTS:3910 Human Rights Advocacy 3 s.h.
Theoretical foundations and critical issues for international human rights advocacy and international humanitarian movements. Same as IS:3910.

HRTS:3915 Human Rights and the Arts 3 s.h.
Ways in which violations of and struggle for human rights have affected and been affected by literary, musical, visual, architectural, and theatrical/dramatic arts in various countries past and present; art considered as expression, as market of identity, and as historical document.

Supervised internship in human rights praxis; focus on field-based advocacy and human rights frameworks.

HRTS:4283 U.S. Women’s History as the History of Human Rights 3-4 s.h.
History of human rights in the United States traced through the perspective of women; aspects of women's experience (social, political, intellectual) related to fundamental human rights—right to a nationality, right to life, liberty and personal security, right to freedom of movement, right to take part in the government of their country, right to own property; these and other rights specified by the United Nations in the Universal Declaration of Human Rights, 1948; different history of men and women enjoying these rights; how human rights have been constructed and experienced in the United States from the era of colonial settlement to present. Same as AMST:4283, GWSS:4283, HIST:4283.
Human Rights, Certificate

The Certificate in Human Rights requires 18 s.h. of credit. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. They may count a maximum of 6 s.h. of transfer credit toward the certificate with approval from the certificate program's faculty advisory group.

Individuals must declare their intent to earn the certificate. They must consult with the Certificate in Human Rights advisor to complete a plan of study; see the Certificate in Human Rights website for details.

The Certificate in Human Rights requires the following course work.

**Philosophical Foundations and Contemporary Issues in Human Rights**

Professional degree: M.D.
Graduate degrees: M.A.; M.M.E.; M.P.A.S.; M.S.; D.P.T.; Ph.D.
Website: http://www.medicine.uiowa.edu

The Roy J. and Lucille A. Carver College of Medicine is an integral part of the University of Iowa. It contributes to the education of thousands of University students, is home to groundbreaking research in a wide array of disciplines, and provides a statewide health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in medical laboratory science, nuclear medicine technology, and radiation sciences (see Undergraduate Programs of Study [p. 1348] in this section of the Catalog) as well as Master of Science and Doctor of Philosophy degrees in several disciplines; the Master in Medical Education; the Master of Physician Assistant Studies; and the Doctor of Physical Therapy (see Graduate Programs of Study [p. 1348] in this section of the Catalog).

Doctor of Medicine and other health sciences students have a number of opportunities to gain experience in medical clinics, community hospitals, and a major academic medical center. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 13 University of Iowa-affiliated residency programs in six Iowa cities. The college also participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health and in the life sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college’s year-round continuing medical education programming, updating their knowledge and skills through refresher courses, clinics, and conferences. The college also offers a variety of services that support Iowa physicians and community hospitals.

In addition to providing education and resources for physicians and other health care organizations, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

Professional Program of Study (M.D.)

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. For a description of the M.D. curriculum and information about admission to the program, financial support, and academic rules and procedures, see Doctor of Medicine [p. 1380] in the Catalog.

Undergraduate Programs of Study

The Carver College of Medicine offers a Bachelor of Science with majors in medical laboratory science, nuclear medicine technology, and radiation sciences. The medical laboratory science major is offered through a partnership with Allen College, in Waterloo, Iowa. See Medical Laboratory Science [p. 1399], Nuclear Medicine Technology [p. 1421], and Radiation Sciences [p. 1459] in the Catalog. In addition, the college offers an undergraduate certificate; see EMT Paramedic Program [p. 1352] in this section of the Catalog.

Graduate Programs of Study

The Carver College of Medicine offers graduate programs leading to the M.S. in pathology [p. 1432]; the M.S. and Ph.D.

It also offers a joint M.D./Ph.D. degree through the Medical Scientist Training [p. 1402] Program; see “Joint M.D./Graduate Degrees” in the Doctor of Medicine [p. 1380] section of the Catalog.

Many of the college’s faculty members participate in the Graduate College’s interdisciplinary programs in genetics [p. 1281], immunology [p. 1287], molecular and cellular biology [p. 1305], and neuroscience [p. 1307].

Undergraduate Rules and Procedures

Undergraduate study in the Carver College of Medicine is governed by the following academic rules and procedures.

Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or visit its website.

All health sciences students must show proof of health examinations and screenings annually. For more information, contact Student Health & Wellness and see Requirements and Forms on its website.

Application for Degree

Students who want to be considered for graduation must submit a Degree Application with the Office of the Registrar through MyUI before the deadline for the session in which the degree is to be conferred. Students who have fulfilled the requirements for a minor must indicate this on the degree application form filed through MyUI so that completion of the requirements for the minor can be verified and noted on their transcript.

Academic Recognition

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

Graduation with Distinction

Graduating students may be recognized for their scholastic achievement upon recommendation by their academic program and with the dean’s approval. Graduation with distinction, high distinction, or highest distinction is determined by both the cumulative and the University of Iowa grade-point average. Highest distinction requires a g.p.a. of 3.85 or higher; high distinction requires a g.p.a. of 3.75 to 3.84; and distinction requires a g.p.a. of 3.65 to 3.74.

To graduate with distinction, students must have completed a minimum of 60 s.h. of graded course work at the University of Iowa. Both S (satisfactory) and A-F (letter) grades are included in the total semester hour total. However, S grades are not calculated into the grade-point average. Radiologic technology certificate course grades are not included in the grade-point average and are not considered graded course work.

Students graduating with distinction have a notation added to their transcript and diploma. To be recognized for distinction, students must have completed 45 of their final 60 s.h. and earned the required grade-point average before their final semester of graduation.

Dean’s List

Undergraduate students who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean’s List for that semester. Students may qualify for the Dean’s List with fewer than 12 s.h. of graded credit if deemed appropriate by the college.

President’s List

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded course work and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President’s List.

Financial Support

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University’s Office of Student Financial Aid. Part-time work in related areas is sometimes available.

Registration, Credit, Grading

Registration

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Each course dropped after the deadline results in a W (withdrawn) on the transcript (see Changes in Registration below). Students are not allowed to register for full-course or half-course classes after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course.

The maximum permitted registration for fall and spring semesters is 18 s.h. per semester. The maximum registration for summer session varies: 4 s.h. for the four-week session; 9 s.h. for the eight-week session; 9 s.h. for the six- and eight-week sessions combined; 12 s.h. for the four-week session and the eight-week session; and 12 s.h. for the four-, six-, eight-, and twelve-week sessions combined. Students may register for a maximum of 16 s.h. of fall semester or spring semester course work during early registration. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

Changes in Registration

Courses may be added with the signatures of the advisor and the course instructor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the dean of the Carver College of Medicine for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course. Students whose drop of one or more courses results in a registration of 0 s.h. for the semester must follow
the procedure for withdrawal from the University instead of the add/drop procedure.

Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course.

Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is a student’s responsibility to see that the change of registration form is approved by the necessary individuals and is delivered to the Registrar’s Service Center. Changes in registration become effective on the date the completed form is submitted to the Center.

Withdrawal of Registration

Students may withdraw their registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is subsequently given. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.

Auditing Courses

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of AUS (audit successful) is assigned if a student’s attendance and performance are satisfactory; if they are unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

Courses Offered by Other University of Iowa Colleges

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges’ rules in matters regarding the courses. See Policy Governing Undergraduate and Professional Students Enrolled in Courses Outside Their Own College or Degree Program on the College of Liberal Arts and Sciences website.

In-Residence Requirement

The in-residence requirement may be met by earning the final consecutive 30 s.h. in residence at the University of Iowa, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes course work and correspondence study at other colleges, universities, and institutions. Undergraduate course work in other University of Iowa colleges counts toward in-residence requirements.

Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

Duplication and Regression

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar. Semester hours earned by duplication or regression do not count toward graduation.

Minimum Grade Requirement

Students must earn a g.p.a. of at least 2.00 each semester in all college work attempted, all work undertaken at the University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

Students must earn a C or higher in professional specialty (modality) courses.

Grading Procedures

Grading procedures vary from program to program. Students should consult individual program policy statements for information.

Pass/Nonpass

Students have the option of taking elective courses pass/ nonpass (P/N) with the permission of the course instructor and/or the department offering the course. Students may register for the P/N grading option from the first day of classes until the last day for undergraduates to add a course; see Academic Calendar on the Office of the Registrar website.

To register for a P/N course, the student must print the Grading Option Form, have it signed by the course instructor and the academic advisor, and submit the completed form to the Registrar’s Service Center before the published deadline.

Semester hours graded P/N are not used in computing a student’s grade-point average. Semester hours graded P count toward graduation; those graded N do not. The college accepts a maximum of 15 s.h. of University of Iowa credit graded P toward the bachelor’s degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor’s degree. Students must be in good academic standing to be eligible for the pass/nonpass option.

Satisfactory/Fail or Satisfactory/ Unsatisfactory

A number of courses only use satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U) grading. All students registered for these courses receive a grade of S, F, or U. Students do not need special forms or permission in order to register for S/F or S/U courses.

Semester hours graded S or U are not used in computing a student’s grade-point average, but semester hours graded F are used in grade-point average computation. Semester hours graded S count toward graduation; semester hours graded F or U do not.

Students may use course work graded S to fulfill General Education Program requirements and/or the requirements of their major, a minor, or a certificate. The college accepts a maximum of 15 s.h. of University of Iowa credit graded S toward the bachelor’s degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor’s degree.

Second-Grade-Only Option

Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course
for the second-grade-only option, students must obtain the signatures of the course instructor, the program director, and the dean on a form available from the dean’s office; the signed form must be returned to the Registrar’s Service Center before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and credit earned. Students using the second-grade-only option for courses that are not part of their major must follow the procedure for the college that offers the course.

Incomplete
A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the course work will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. A student must work with the instructor so that an incomplete grade may be rectified by official action.

Reports to Students
Instructors notify any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on a student’s transcript, following University protocol. No formal midterm reports are given.

Degrees and Minors

Two Bachelor’s Degrees
Students who want to earn two bachelor’s degrees, each from a different college, must contact the University’s Office of Admissions. Interested students must complete the degree requirements for both majors, including the residency requirements.

Second Bachelor’s Degree
Students who already hold a bachelor’s degree and wish to earn an additional bachelor’s degree must complete at least 30 s.h. consecutively in the Carver College of Medicine and must meet college and program degree requirements. Individuals interested in earning a second bachelor’s degree must apply for admission to the degree program at the University’s Office of Admissions.

Minors
Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department’s requirements for the minor.

Academic Progress, Probation, Dismissal
Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the Bachelor of Science and certificate of completion. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that students will not graduate unless their academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by a faculty committee, at least four months before the requested date of readmission.

Students placed on probation or dismissed from a program are notified by e-mail; copies are placed in their files. An academic probation notation is placed on the transcript.

In order to be restored to good standing, students placed on academic probation during a semester or summer session must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.00 by the end of the next semester (for full-time students) or by the time they have earned the next 8 s.h. (for part-time students). Students on academic probation who fail to meet the grade-point average requirement in the designated time frame for restoration to good standing are subject to dismissal at the end of the semester.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

Academic Misconduct

Plagiarism and Cheating
All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student's grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a period of time, or recommendation of expulsion from the program.

Appeals Procedure
Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.
Emergency Medical Technology (EMT) Paramedic Program

Website: https://www.uihealthcare.org/otherservices.aspx?id=1672

This nationally accredited, 1,160-hour full-time program leads to certification as a paramedic in Iowa and on the National Registry. The full-time program is conducted in three segments and consists of 15 weeks of intensive classroom training at the University of Iowa Hospitals and Clinics, five days a week. The second segment consists of 280 hours of supervised clinical experience in a hospital setting. A minimum of 360 hours of supervised paramedic field time internships with a paramedic-level ambulance service rounds out the training program. Internships are available at a number of approved sites in Iowa.

Students obtain credentials in advanced cardiac life support provider, advanced medical life support, geriatrics education for EMS, neonatal resuscitation program (NRP), pediatric advanced life support provider, pediatric education for pre-hospital professionals provider, and pre-hospital trauma life support provider.

The program is conducted twice each year, beginning in January and August.

Goals

The goal of the Emergency Medical Services Learning Resources Center’s (EMSLC) paramedic education program is to facilitate a student’s development of cognitive and technical competencies to an entry-level paramedic.

Upon completion of the program, students demonstrate:

• the ability to comprehend, apply, and evaluate the clinical information relative to their role as an entry-level paramedic;
• the technical proficiency in all skills necessary to fulfill the role of an entry-level paramedic; and
• personal behaviors consistent with professional and employer expectations for an entry-level paramedic.

Curriculum

The program adheres to the National Emergency Medical Services Educational Guidelines as defined by the National Highway Traffic Safety Administration (NHTSA) throughout the program. Students who successfully complete the program are eligible to take the National Registry paramedic examinations.

Accreditation

The Emergency Medical Services Learning Resources Center at the University of Iowa Hospitals and Clinics is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

Facilities

The Carver College of Medicine consists of twelve buildings containing 1.6 million square feet of space with one building (College of Medicine Administration Building) dedicated to administrative departments only. The other eleven buildings house research activities which include research centers, programs and institutes, as well as the Core Research Facilities which are a collection of centralized laboratories dedicated to developing and providing state-of-the-art research resources to facilitate biomedical research. They are available on a fee-for-service basis to the entire health sciences community along with outside entities.

The Medical Education Research Facility houses medical education space and research laboratories, including the Holden Cancer Research Laboratories and the Wynn Institute for Vision Research. It also contains the college’s four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education Research Facility also houses the Performance-Based Assessment Program, which evaluates students’ clinical and communications skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

Students acquire clinical skills experience at the 711-bed University of Iowa Hospitals and Clinics, the Iowa City Veterans Health Care System, and in affiliated hospitals and ambulatory care centers throughout Iowa. University of Iowa Hospitals and Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to UI Hospitals and Clinics for care and treatment not available in their home communities.

Eckstein Medical Research Building, currently in the planning stages for future renovations and upgrades, is the home of the Iowa Institute of Human Genetics Genomics Division, Viral Vector Core Facility, Flow Cytometry Facility, and the Biomedical Research Store.

The five basic science departments are housed in the Bowen Science Building and include the Departments of Anatomy and Cell Biology, Biochemistry, Microbiology, Molecular Physiology and Biophysics, and Pharmacology.

The Medical Education Building houses research and educational space for the Department of Physical Therapy and Rehabilitation Science [p. 1439]. It also houses research space for the Department of Psychiatry [p. 1456] and is the home of the Office of Consultation and Research in Medical Education (OCRME). OCRME is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators in all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

There are teaching laboratories located in the Medical Education Building, the Bowen Science Building, and the Medical Research Facility.

Other buildings that house a wide range of College of Medicine departments, administration, and research activities are the Carver Biomedical Research Building, Westlawn, Medical Laboratories, the Medical Research Facility, the Medical Research Center, and the Multi-Tenant Facility.

The newest building, completed in 2014, is the Pappajohn Biomedical Discovery Building. On the first floor is the Neurosciences Institute. Third and fourth floors house the Fraternal Order of Eagles Diabetes Research Center and the Abboud Cardiovascular Research Center, on the fifth floor is the Auditory Research Group, and on the sixth floor is the Lung Biology Center. The Iowa Institute for Biomedical Imaging is on the lower basement levels housing the 7 Tesla Imaging is on the lower basement levels housing the 7 Tesla
MRI scanner (one of 20 such devices in the U.S.), 3T along with several smaller devices, and a 3-D visualization lab. All researchers in this building are chosen by the Pappajohn Biomedical Institute in which scientists from across the University collaborate to explore high-risk/high-yield scientific questions in the life sciences with the goal of advancing treatments for a wide array of human diseases.

**Interdisciplinary Programs and Centers**

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the vice dean for research.

The following centers are subdivisions of the Carver College of Medicine.

**Alzheimer's Disease Research Center**

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

**Carver Genetic Testing Laboratory**

The John and Marcia Carver Nonprofit Genetic Testing Laboratory provides genetic testing for rare eye diseases, especially diseases so rare that commercial tests are unavailable for them. The laboratory's test results provide information to patients and their families while keeping the tests affordable.

**Holden Comprehensive Cancer Center**

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has "comprehensive" status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

**Iowa Mental Health Clinical Research Center**

The major emphasis of the Iowa Mental Health Clinical Research Center is the study of schizophrenia. The center provides the facilities for research linking the clinical picture of the illness with its underlying neurobiology. The center's seven research units conduct the necessary integrative and interdisciplinary research to advance knowledge about the disease.

**UI Heart and Vascular Center**

The UI Heart and Vascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Foundation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

**Courses**

Most Carver College of Medicine courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

**Carver College of Medicine Courses**

**MED:1100 Introduction to Health Care Professions** 3 s.h.

Introduction to current U.S. health care system and changes that are likely in the near future; information about distinct health care professions grouped by discipline (e.g., nursing, pharmacy, public health), and less traditional career pathways in health care fields; how health care professionals across disciplines coordinate to deliver better health care; instruction by prominent health care faculty at the University of Iowa; for students considering a career in the health care field.

**MED:3740 End-of-Life Care for Adults and Families** 3 s.h.

**MED:5300 Health Informatics I** 3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as HMP:5370, IE:5860, IGPI:5200, RSNM:3195, SLIS:5900.

**MED:7205 Foundations of Clinical Practice for Physician Assistants** 5 s.h.

Practice and expansion of clinical skills; development of broad understanding of the practice of medicine in social context; strengthening of self-directed learning skills in clinical medicine. Prerequisites: PA:8209. Requirements: Physician Assistant Studies and Services enrollment.

**MED:7215 Foundations of Clinical Practice IV for Physician Assistants** arr.

Basic diagnostic considerations in each of medicine's clinical disciplines, as required of primary care providers.

**MED:8001 Medical Elective** arr.

**MED:8003 Clinical Clerkships** arr.

**MED:8005 Medical Student Research Fellowships** 0 s.h.

**MED:8006 Doris Duke Clinical Research Fellowship** 0 s.h.

Clinical research projects under University of Iowa faculty mentorship. Requirements: leave of absence from Carver College of Medicine.

**MED:8010 Introduction to Medical Education at Iowa** 0 s.h.

Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for M.D. students.
MED:8021 Community Health Outreach I 0-1 s.h.
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8022 Community Health Outreach II 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8023 Community Health Outreach III 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8028 Introduction to U.S. Health Care System 1 s.h.
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

MED:8040 Teaching of Physical Exam Skills 1-2 s.h.
Components of complete physical exam and educational techniques for teaching such skills: teaching of physical exam components to first-year students. Requirements: fourth-year M.D. enrollment.

MED:8041 Facilitation of Patient-Centered Learning 1-2 s.h.
Experience in facilitating patient-centered learning groups; case discussion, critique of student presentations and assignments, clinical insight, evaluation of student performances.

MED:8070 The Examined Life: Writing and Medicine 1 s.h.
Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.

MED:8071 Career Life Planning 1 s.h.
Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.

MED:8072 Evidence-Based Medicine for Clinical Medicine 1 s.h.
Evaluation of literature and development of critical thinking skills necessary for evidence-based medical practice.

MED:8073 Biomedical Innovation 1 s.h.
Introduction to all phases of medical device/technology development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: M.D. enrollment.

MED:8074 Research Skills Seminar 1 s.h.
Seminar series designed to bridge gap from undergraduate and medical student experiences to research during residency and beyond; topics include identification of projects and mentors, leadership, collaboration, translation, evidence-based medicine, project development, statistical analysis, presentation, publication, and career progression.

MED:8076 Bioethics and Humanities Seminar 1 s.h.
Broad range of topics in bioethics and medical humanities, including philosophical principles, clinical ethics, research ethics, medical professionalism, narrative ethics, and historical and cultural aspects of medicine. Requirements: enrollment in Carver College of Medicine Humanities Distinction Track.

MED:8081 Global Health Issues I 1 s.h.
Core issues in the current field of global health, including history of global health, health and development, social determinants of health, measuring health and disease, disparities in the American health care system, poverty and health, gender issues and reproductive health, child health, immigrant and migrant health issues, and introduction of major players in global health. Requirements: M.D. enrollment.

MED:8082 Global Health Issues II 1 s.h.
Core issues in the current field of global health, including health care as a human right, why the Third World is the Third World, communicable disease issues, outbreaks and pandemics, noncommunicable issues, malnutrition and obesity, cultural context of health care, violence as a health issue, and emergency response and transition to development. Prerequisites: MED:8081. Requirements: M.D. enrollment.

MED:8083 Global Cross-Cultural Elective arr.
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.

MED:8084 Global Health Seminar 1 s.h.
Presentations by faculty members, University special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: M.D. enrollment.

MED:8102 Medical Cell Biology 2 s.h.
Microscopic structure and function of major and specialized human organ systems; approach integrating normal microscopic anatomy and human physiology. Requirements: M.D. enrollment.

MED:8115 Foundations of Clinical Practice II 5 s.h.
Introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into context of patient care through the Longitudinal Clinical Mentor (LCM) program; interaction with students from other health sciences colleges to explore interprofessional approach to caring for patients. Requirements: M.D. enrollment.

MED:8121 Clinical and Professional Skills I 3 s.h.
Delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; application of health and risk assessment to individual patients and self. Requirements: M.D. enrollment.

MED:8123 Foundations of Cellular Life 5 s.h.
Genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of human body; necessary framework to explore six mechanisms of health and disease. Requirements: M.D. enrollment.
MED:8124 Mechanisms of Health and Disease I 8 s.h.
Normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development; first in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

MED:8131 Clinical and Professional Skills II 4 s.h.
Interpersonal skills, lifelong learning, interviewing skills, physical examination skills, ethical issues in patient care, and basic approach to patients in terms of prevention, treatment, and follow-up care. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.

MED:8132 Medicine and Society II 4 s.h.
Knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.

MED:8133 Mechanisms of Health and Disease II 7 s.h.
Normal and healthy processes within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; second in a series on mechanisms of health and disease. Requirements: M.D. enrollment.

MED:8134 Mechanisms of Health and Disease III 11 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development; third in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

MED:8199 First-Year Special Study arr.
First-year special study. Requirements: M.D. enrollment.

MED:8205 Foundations of Clinical Practice III 5 s.h.
Experience practicing and expanding clinical skills and self-directed learning skills in clinical medicine; understanding medical practice in a social context. Prerequisites: MED:8115. Requirements: second-year M.D. enrollment.

MED:8213 Healthcare Ethics, Law, and Policy 2 s.h.
Ethical and legal aspects of health care delivery.

MED:8215 Foundations of Clinical Practice IV ICD arr.
Basic diagnostic considerations in each of medicine's clinical disciplines, as required of primary care providers. Prerequisites: MED:8115 and MED:8205. Requirements: second-year M.D. enrollment.

MED:8221 Clinical and Professional Skills III 4 s.h.
Advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations; emphasis on integration and use of concepts for cost conscious, patient-centered, interdisciplinary care. Requirements: M.D. enrollment.

MED:8222 Medicine and Society III 4 s.h.
Health services organization and delivery; emphasis on community dimensions of medical practice and patient safety. Requirements: M.D. enrollment.

MED:8223 Mechanisms of Health and Disease IV 10 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; fourth in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

MED:8224 Mechanisms of Health and Disease Keystone 7 s.h.
Transition between classroom instruction in mechanisms of health and disease and clinical practice; foundational information from mechanisms of health and disease sequence approached from perspective of what is commonly encountered in clinics; application of information to making diagnostic and management decisions of common important clinical problems. Requirements: M.D. enrollment.

MED:8299 Second-Year Special Study arr.
Second-year special study. Requirements: M.D. enrollment.

MED:8300 Clinical Beginnings 1 s.h.
Orientation to third-year clerkships; technical skills, simulated patient activities, competence with the physical exam.

MED:8301 Community-Based Primary Care arr.
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Requirements: M.D. enrollment.

MED:8320 Transition to Clerkships 1-2 s.h.
Two weeks of skills training prior to start of core clinical clerkships. Requirements: M.D. or M.P.A.S. enrollment.

MED:8401 Medicine, Literature, and Writing arr.
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.

MED:8403 Teaching Skills for Medical Students 4 s.h.
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.

MED:8404 Advanced Teaching Skills for Medical Students 2 s.h.
Opportunity to expand knowledge and experience in medical education; investigation of medical education in students' specialty of interest through literature research and interaction with faculty; primary focus is to design and successfully complete a faculty approved project. Prerequisites: MED:8403. Requirements: fourth-year M.D. enrollment.

MED:8405 Leadership for Future Physicians 2 s.h.
Formal training in multiple aspects of leadership; offers future leaders in health science specialties an earlier opportunity to consider leadership abilities and perspectives; for fourth-year medical, physician assistant, nursing, pharmacy, public health, and dental students. Requirements: health science enrollment.

MED:8410 Quality Improvement and Patient Safety 2 s.h.
Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals and Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers. Same as NURS:3728.

MED:8480 Global Cross-Cultural Clerkship arr.
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.

MED:8499 Individually Arranged Medicine Elective arr.
Individually arranged elective through the Office of Student Affairs and Curriculum.
MED:9701 Instructional Design and Technology  3 s.h.
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.

MED:9702 Clinical Teaching in Medical Education  3 s.h.
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: MED:9701 or PSQF:6205. Recommendations: educational psychology course.

MED:9703 Educational Research and Evaluation  3 s.h.
Research design and program evaluation; approaches relevant to medical education.

MED:9711 Teaching Methods in Medical Education  3 s.h.
Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.

MED:9712 Introduction to Educational Measurement in Medical Education  3 s.h.
Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

MED:9713 Assessment in Medical Education  3 s.h.
Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisites: MED:9712.

MED:9714 Current Issues in Medical Education  3 s.h.
Selected issues, policies, and research.

MED:9720 Portfolio Project  3 s.h.
Production of individual student portfolios used to integrate knowledge across courses; capstone activity.

MED:9721 Study in Faculty Development  3 s.h.
Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

MED:9722 Independent Study  arr.

MED:9724 Leadership in Medicine  3 s.h.
Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator. Requirements: Master in Medical Education degree program enrollment.

MED:9725 Simulation in Medical Education  3 s.h.
Appropriate use of various types of simulation in medical education; how to design, deliver, and debrief a simulation activity; literature supporting use of simulation in medical education. Requirements: Master in Medical Education degree program enrollment.

MED:9726 Curriculum Development in Medical Education  3 s.h.
Curriculum development using knowledge and experience gained from MED:9701, MED:9702, and MED:9711; identification of an area/topic for creation of curriculum; conduction of a needs assessment to identify topics and/or components of curriculum; creation of plan with curriculum goals, learning objectives, methods for evaluation; development of preliminary planning and aspects of implementation and evaluation phases of the model.

MED:9727 Teaching and Assessing Communication Skills in Medical Education  3 s.h.
Explores broad issues related to both teaching and assessing clinician-patient communication skills in medical education; review literature on best practices in clinician-patient communication and on teaching and/or assessing skills among medical learners; explore observation and feedback as key technique in addressing communication skills through observation of peers and learners; video recording of interactions with patients.

Hospital Certificate Programs of Study
The following courses are conducted by University of Iowa Hospitals and Clinics staff.

EMT-Paramedic Program Courses
EMTP:0101 Emergency Medical Technician#Paramedic I  0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: certification as an emergency medical technician--basic.

EMTP:0102 Emergency Medical Technician#Paramedic II  0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: EMTP:0101.

EMTP:0103 Emergency Medical Technician#Paramedic III  0 s.h.
Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: EMTP:0102.

Orthoptics Teaching Program Courses
OTP:4902 Orthoptics Program  0 s.h.
Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Requirements: bachelor's degree with specific class recommendations.
Anatomy and Cell Biology

Chair
• John F. Engelhardt

Graduate degrees: M.S. in anatomy and cell biology; Ph.D. in anatomy and cell biology
Faculty: http://www.medicine.uiowa.edu/dept_primary_apr.aspx?appointment=Anatomy%20and%20Cell%20Biology
Website: http://www.medicine.uiowa.edu/acb/

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience. The department participates in the Carver College of Medicine's Medical Scientist Training [p. 1402] Program and the Graduate College's Molecular and Cellular Biology [p. 1305], Immunology [p. 1287], Genetics [p. 1281], and Neuroscience [p. 1307] Programs. On occasion, students are directly admitted to a Department of Anatomy and Cell Biology laboratory by arrangement with the laboratory director.

Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the University of Iowa health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and the Abboud Cardiovascular Research Center, faculty and students also have access to outstanding research facilities throughout the University's health sciences campus.

Courses

Anatomy and Cell Biology Courses

ACB:3110 Principles of Human Anatomy 3 s.h.
Gross and microscopic human anatomy; systemic approach to regional anatomy, with emphasis on clinical relevance; optional tutorial sessions. Offered fall and spring semesters. Prerequisites: BIOL:1411 or BIOL:1141. Requirements: a physical science course. Same as CBE:4156, EES:4156.

ACB:3111 Human Anatomy Lab for Health Professions 1 s.h.
Regional and systemic approaches to the study of human anatomy, using histological (microscopic) as well as gross (macroscopic) studies. Prerequisites: BIOL:1141. Requirements: ACB:3110 for pre-nursing students.

ACB:3130 Human Anatomy Online 4 s.h.
Integrative systemic and regional study of the human body's structure. Prerequisites: BIOL:1141.

ACB:3122 Independent Study in Anatomy and Cell Biology arr.
Projects arranged with department faculty members.

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as CBE:4156, EES:4156.

ACB:5108 Human Anatomy 5 s.h.
Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: physical therapy and rehabilitation science enrollment.

ACB:5203 Gross Human Anatomy for Graduate Students 5 s.h.
Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: anatomy and cell biology graduate standing.

ACB:5206 Graduate Research in Anatomy and Cell Biology arr.
Individual laboratory research training in anatomical sciences.

ACB:5210 General Histology Online 3 s.h.
Histology of all tissues of human body starting with basic tissues and working through systems of the body; linked in sequence to the human gross anatomy for graduate students course so students will be learning about related content at the same time in anatomic and histology; online course consisting of recorded lectures, online modules, and extensive use of Virtual Microscope. Requirements: anatomy and cell biology graduate standing.
ACB:5218 Microscopy for Biomedical Research    arr.
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunocytochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as BIOL:5218, MICR:5218.

ACB:5220 Advanced Microscopy for Biomedical Research    arr.
Technically advanced microscopy and instrumentation for research; individualized laboratory experience with opportunity to explore applications of microscopy methods. Requirements: for ACB:5220 -- an introductory microscopy course; for BIOL:5220 -- ACB:4156 or ACB:5218 or CBE:4156 or EES:4156 or MICR:5218; for MICR:5220 -- an introductory EM course. Same as BIOL:5220, MICR:5220.

ACB:5224 Graduate Student Seminar    0-1 s.h.
Current research, literature. Requirements: anatomy and cell biology graduate standing.

ACB:6000 Human Anatomy for Advanced Practice    3 s.h.
Integrated study of interrelationships between anatomical structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as NURS:6000.

ACB:6200 Special Topics in Genetics    1 s.h.
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as GENE:6200.

ACB:6220 Mechanisms of Cellular Organization    3 s.h.
Current understanding of basic cellular biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as MCB:6220, MPB:6220.

ACB:6225 Growth Factor Receptor Signaling    1 s.h.
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Recommendations: BISC:5201 and BISC:5203. Same as MCB:6225, MPB:6225.

ACB:6226 Cell Cycle Control    1 s.h.
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Recommendations: BISC:5201 and BISC:5203. Same as MCB:6226, MPB:6226.

ACB:6227 Cell Fate Decisions    1 s.h.

ACB:6237 Critical Thinking in Biochemistry and Molecular Biology    1 s.h.
How nucleic acids, proteins, lipids, and carbohydrates interact to influence the function of cells and tissues; how molecules drive signaling pathways and cellular processes essential for biological functions; based on research publications.

ACB:6238 Critical Thinking in Genetics    1 s.h.
Current topics in molecular and classical genetics; emphasis on genetic underpinnings of disease; based on primary research publications.

ACB:6239 Critical Thinking in Cell Biology    1 s.h.
Understanding subcellular organization and intercellular communication; emphasis on critical thinking and primary research publications.

ACB:6248 Critical Thinking in Development    1 s.h.
Current topics in molecular basis of vertebrate development; based on primary research publications.

ACB:6249 Critical Thinking in Cellular Physiology    1 s.h.
Control of physiological systems at the cellular level; emphasis on regulation by molecular signaling pathways; literature-based.

ACB:6252 Functional Neuroanatomy    arr.
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as PTRS:6253.

ACB:6265 Neuroscience Seminar    0-1 s.h.
Research presentations. Offered fall and spring semesters. Same as BIOL:6265, MPB:6265, NSCI:6265, PSY:6265.

ACB:7001 Teaching and Learning in the Anatomical Sciences    2 s.h.
Strategies involved in anatomical sciences education; these include interactive lecturing, dissection, peer teaching/learning, plastination, virtual microscopy, simulation, and case presentation, as well as assessment techniques; online course delivered through recorded lectures and online modules. Requirements: anatomy and cell biology graduate standing.

ACB:7227 Anatomic Study for Teaching    2-3 s.h.
Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in teaching certificate program or anatomy and cell biology graduate program.

ACB:8101 Medical Gross Human Anatomy    5 s.h.
Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: M.D. or M.P.A.S. enrollment.
ACB:8120 Human Gross Anatomy for Dental Students  6 s.h.
Exploration of gross anatomy of human body including thorax, abdomen, upper limb; extensive focus on head, neck, and neuroanatomy; regional and systemic approaches; course sequence and assessment blended with general histology for dental students; cadaveric dissections closely follow lecture sequence; emphasis on correlations to dental practice. Offered spring semesters. Requirements: D.D.S. enrollment.

ACB:8121 General Histology for Dental Students  4 s.h.
Microscopic study of cells, fundamental tissues, organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: D.D.S. enrollment or anatomy and cell biology graduate standing.

ACB:8250 Integrated Gross Human Anatomy, General and Oral Histology for Dental Students (GRISTO)  10 s.h.
Integrated study of morphology of human body at microscopic and macroscopic levels; covers breadth and depth of traditional professional-level anatomy and histology courses; focus on structures of head and neck, oral cavity, and in-depth study of nervous system; combination of traditional lectures, cadaver laboratory dissection, virtual histology laboratories, and supported self-regulated learning strategies. Requirements: D.D.S. program enrollment.

ACB:8401 Advanced Human Anatomy  arr.
Regional dissection of the body with emphasis on systems relevant to student’s specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year M.D. enrollment or graduate standing.

ACB:8402 Teaching Elective in Regional Anatomy  2-4 s.h.
Expand knowledge and experience in medical education; investigate educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; prepare, design, and implement four teaching interactions with M1/D1/PA1 students; design a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: M.D. standing and enrollment in teaching track distinction.
Anatomy and Cell Biology, M.S.

Graduate students normally are admitted to the Department of Anatomy and Cell Biology under the assumption they intend to pursue the Ph.D. degree. Consult the department for more details.

Requirements

The Master of Science program is being revised for fall 2016 admission. Details about the program are not yet available.

See the requirements for the Doctor of Philosophy [p. 1361] with a major in anatomy and cell biology.
Anatomy and Cell Biology, Ph.D.

Requirements

The Doctor of Philosophy program is being revised for fall 2016 admission. Details about the program are not yet available.

The Doctor of Philosophy program in anatomy and cell biology requires a minimum of 72 s.h. of graduate credit. Students in the Ph.D. program work toward the doctorate without an intermediate master's degree program. They complete courses focused in one of three major areas—molecular medicine and gene therapy, developmental and stem cell biology, or cancer biology—in addition to related background and elective courses. Students also teach in lecture and laboratory courses under faculty supervision. The program may be completed in four or five years of intensive, full-time residence.

By the end of their second year of graduate study, anatomy and cell biology students take the comprehensive examination, which assesses their ability to analyze, organize, and apply the information, concepts, and skills acquired during the first two years of study. They define a research problem with their major advisor and formulate a research prospectus.

Subsequent years are devoted primarily to research.

The final Ph.D. examination consists of a public oral defense of the dissertation. The dissertation is based on original research conducted with the guidance of the major advisor and at least four other faculty members on the thesis committee.

Admission

Individuals interested in pursuing a Ph.D. in a laboratory housed in the Department of Anatomy and Cell Biology have two options for admission. The first option is to apply to, and be accepted by, the Medical Scientist Training Program (Carver College of Medicine) or one of the interdisciplinary graduate programs in molecular and cellular biology, immunology, genetics, or neuroscience (Graduate College). These programs accept applicants with a variety of backgrounds in the biological and physical sciences. Each program has specific admission requirements—all include a bachelor's degree; certain scores on the Graduate Record Examination (GRE) General Test; and for applicants whose first language is not English, specific scores on the Test of English as a Foreign Language (TOEFL). For detailed admission requirements and application information, refer to the section for each program in the Catalog.

The second option is direct admission to a specific laboratory, by arrangement with the laboratory's director. After such an arrangement has been made, students apply to the Graduate College for admission to the Ph.D. program in the Department of Anatomy and Cell Biology. The department's graduate admission committee evaluates an applicant's credentials. Most applicants will have completed a bachelor's degree with the following undergraduate course work: chemistry through organic chemistry, one semester of biochemistry or the equivalent, one semester of another advanced biology course, mathematics through calculus, one year of physics, and one semester of statistics or the equivalent. Desirable qualifications include an undergraduate major in the biological sciences or chemistry; a master's degree in the biological sciences, chemistry, or a related area; and scores from a GRE Advanced Test in the applicant's major area.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

All students in the Department of Anatomy and Cell Biology receive stipends and tuition support. Sources include training grants from the National Institutes of Health, University of Iowa and departmental fellowships and graduate research assistantships, and individual faculty research grants.
Anesthesia

Chair
• Cynthia Wong

Faculty: http://www.anesth.uiowa.edu/People/Faculty.aspx
Website: http://www.anesth.uiowa.edu/

Since its inception, the Department of Anesthesia at the University of Iowa has educated more than 400 anesthesiologists. Eighteen former residents have served as heads of departments of anesthesiology at American medical colleges.

The department has been, and continues to be, well-represented on editorial boards of major anesthesia journals. It provides refresher course lectures for the annual meeting of the American Society of Anesthesiologists, has physician-researchers who are recognized by the National Institute of Health as independently-funded principal investigators, provides many board examiners for the oral exams of the American Board of Anesthesiology; and has earned high national ranking because of these and other objective accomplishments.

M.D. Training

The Department of Anesthesia introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty. It offers the following courses for medical students. For course descriptions and prerequisite information, see Courses (p. 1362) in this section of the Catalog.

Residency

Postgraduate and Residency Program

The department’s postgraduate and residency program involves diverse clinical experiences, seminars and teaching conferences, and ongoing research activities that help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

Anesthesia Nursing Program

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, which is open to nurses who hold a bachelor’s degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesiology and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. It includes the following courses. For course descriptions and prerequisite information, see Courses (p. 1362) in this section of the Catalog.

Courses

Anesthesia Courses

ANES:6005 Chemical and Physical Principles of Anesthesia Practice 3 s.h.
Basic chemical and physical properties of molecules fundamental to practice of anesthesia; relationship of these properties in relation to physiological processes and pharmacological principles essential in monitoring a patient's physical status and administration of anesthesia medications; basic chemical and physical calculations, properties of substances in solution, measurement of such chemical species, behavior of gases and other fluids, effects of heat transfer, specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Requirements: admission to anesthesia nursing program. Same as NURS:6005.

ANES:6006 Pharmacology of Anesthesia Practice 3 s.h.
Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as NURS:6006.

ANES:6007 Basic Principles of Anesthesia Practice 5 s.h.
Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6006 with a minimum grade of B- and NURS:6016 with a minimum grade of B-. Same as NURS:6007.
ANES:6010 Advanced Principles of Anesthesia Practice I 4 s.h.
Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6010.

ANES:6012 Advanced Principles of Anesthesia Practice II 1 s.h.
Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6012.

ANES:6016 Equipment and Technological Principles of Anesthesia Practice 3 s.h.
Introduction to gas and anesthesia delivery systems, ancillary equipment, monitoring devices, infusion devices, invasive line placement, airway management equipment, and anesthesia electronic medical record keeping; correlation of applicable chemical and physical principles for use, safe operation, and care of all anesthesia and related equipment. Prerequisites: NURS:6005 or ANES:6005. Corequisites: NURS:6006. Requirements: anesthesia nursing program enrollment. Same as NURS:6016.

ANES:6050 Introductory Clinical Anesthesia 2 s.h.
Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6006 and NURS:6016. Corequisites: NURS:6007. Same as NURS:6050.

ANES:6051 Clinical Anesthesia I 2 s.h.
Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as NURS:6051.

ANES:6052 Clinical Anesthesia II 2 s.h.
Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as NURS:6052.

ANES:6053 Advanced Clinical Anesthesia 2 s.h.
Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as NURS:6053.

ANES:6054 Obstetrical Anesthesia 2 s.h.
Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as NURS:6054.

ANES:6055 Rural Anesthesia 2 s.h.
Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as NURS:6055.

ANES:8301 Clinical Anesthesia 2 s.h.
Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.

ANES:8401 Clinical Anesthesia Senior arr.
Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.

ANES:8402 Surgical and Neurosciences Intensive Care arr.
Evaluation and treatment of critically ill neurological and post-surgical patients; evaluation of pulmonary function, ventilator management, monitoring and management of hemodynamics, fluid balance, acid-based problems, acute kidney injury, acute neurological events, and advanced monitoring techniques.

ANES:8495 Intensive Care Off Campus arr.
Evaluation and treatment of critically ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: ANES:8401. Requirements: 4 s.h. of ANES:8401.

ANES:8498 Anesthesia On Campus arr.
Well defined research project relating to anesthesia; arranged by student with departmental approval.

ANES:8499 Anesthesia Off Campus arr.
Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.
Biochemistry

Chair
• Charles M. Brenner

Undergraduate major: biochemistry (B.A., B.S.)
Graduate degrees: M.S. in biochemistry; Ph.D. in biochemistry
Faculty: http://www.medicine.uiowa.edu/dept_primary_apr.aspx?appointment=Biochemistry
Website: http://www.medicine.uiowa.edu/biochemistry/

Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

The Department of Biochemistry offers an undergraduate major and graduate degree programs and determines the curricula for those programs. Undergraduates majoring in biochemistry receive their degrees (Bachelor of Arts or Bachelor of Science) from the College of Liberal Arts and Sciences, and their studies are governed by that college’s undergraduate academic policies. Graduate degrees in biochemistry are conferred by the Graduate College.

Faculty and Research

The department’s faculty members supervise research in biochemistry; molecular, cellular, developmental, computational, and structural biology; and model system genetics. Their work is supported by grants from the National Institutes of Health, the National Science Foundation, the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association, and other sources. To learn more about the department’s faculty members and areas of research, visit the Department of Biochemistry website.

Programs

Undergraduate Programs of Study

Majors
• Major in Biochemistry (Bachelor of Arts) [p. 1367]
• Major in Biochemistry (Bachelor of Science) [p. 1370]

Graduate Programs of Study

Majors
• Master of Science in Biochemistry [p. 1373]
• Doctor of Philosophy in Biochemistry [p. 1374]

Facilities

The Department of Biochemistry occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 7,500 square feet on the third floor of the Medical Education Research Facility, and 2,900 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the University’s health sciences campus. It has a number of well-equipped research laboratories; other departmental facilities include the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments; among them are an Applied PhotoPhysics stopped flow spectrometer SX20 (2009); a Jasco spectropolarimeter, model J815 (2010); a Horiba fluorolog-3 spectrophotofluorometer (2010); and a Beckman Coulter ultra XLI analytical centrifuge (1996).

Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the X-ray Crystallography Facility, the IIHG Genomics Division (DNA Facility), the Medical NMR Facility, the Proteomics Facility, the Flow Cytometry Facility, the Viral Vector Core Facility, the Small Animal Imaging Core Facility, and the Genome Editing Core Facility. The University also supports resources such as the Central Microscopy Research Facilities and the High Throughput Screening Facility.

Courses

Biochemistry Courses

BIOC:1001 CLAS Master Class 1-3 s.h.

BIOC:3101 Technical Communication in Biochemistry 2 s.h.
Preparation for biochemistry majors pursuing a senior research project in BIOC:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BIOC:3130 or BIOC:3120 or BIOC:3140. Requirements: biochemistry major, and junior or senior standing.

BIOC:3110 Biochemistry 3 s.h.
One-semester survey of basic concepts in modern biochemistry and molecular biology; emphasis on application of biochemical concepts to human metabolism; appropriate for students who plan to pursue a career in health care or want an overview of biochemistry as a discipline. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.

BIOC:3120 Biochemistry and Molecular Biology I 3 s.h.
Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with BIOC:3130. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: BIOL:1411, BIOL:1412, and an additional organic chemistry course.

BIOC:3130 Biochemistry and Molecular Biology II 3 s.h.
Carbohydrate biosynthesis, lipid metabolism, hormone regulation and integration of metabolism, signal transduction, genes and chromosomes, DNA replication and repair, transcription, RNA processing, protein translation and regulation of gene expression. Prerequisites: BIOC:3120 with a minimum grade of C-. 
BIOC:3140 Experimental Biochemistry 2 s.h.
Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: BIOL:3210. Requirements: two semesters of general chemistry and one semester of organic chemistry.

BIOC:3150 Development of Senior Research Project 2 s.h.
Preparation for biochemistry majors pursuing a senior research project in BIOL:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BIOL:3130 or BIOL:3120 or BIOL:3140. Requirements: biochemistry major, and junior or senior standing.

BIOC:3800 Biochemistry Teaching Practicum arr.
Training for qualified junior or senior undergraduates majoring in biochemistry or a related field to contribute to undergraduate courses; interns may hold review sessions, offer regular office hours, draft questions for homework or exams, assist in proctoring exams, assist students in a laboratory setting, and help with course implementation; guidance from the faculty director and instructors in each course; interns are expected to work approximately three hours per week for each semester hour of credit earned. Requirements: completion of a course covering the same or equivalent material with a grade of B or higher, and must arrange for a short interview with the appropriate course director prior to registration.

BIOC:3993 Undergraduate Independent Study arr.
Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; exploration of scientific literature on topic of interest; arranged in advance by student and faculty member. Requirements: first-year, sophomore, or junior standing.

BIOC:4241 Biophysical Chemistry I 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Prerequisites: BIOL:3120 with a minimum grade of C- and BIOL:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BIOC:4242 Biophysical Chemistry II 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Prerequisites: BIOL:3120 with a minimum grade of C- and BIOL:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BIOC:4310 Computational Biochemistry 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOL:3110 or BIOL:3120. Same as BME:4310.

BIOC:4999 Research, Independent Study arr.
Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry honors advisor. Prerequisites: BIOL:3101. Requirements: grades of B- or higher in BIOL:3120, BIOL:3130, and BIOL:3140; average grade of B or higher for all three courses; and BIOL:3993 or HONR:3994 or prior research experience or lab practicum.

BIOC:5215 Directed Readings for Graduate Students arr.
Directed readings with course content arranged with professor.

BIOC:5241 Biophysical Chemistry I 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Prerequisites: BIOL:3120 with a minimum grade of C- and BIOL:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BIOC:5242 Biophysical Chemistry II 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.

BIOC:5243 Biophysical Chemistry I, Module I 1 s.h.
Overview of principles of protein structure, stability, folding, and dynamics; brief treatment of structural biology approaches to help students become critical users of models derived from X-ray crystallography and NMR; taken alone or as part of BIOL:5241. Requirements: introductory course in biochemistry.

BIOC:5244 Biophysical Chemistry II, Module I 1 s.h.
Enzymes as unparalleled catalysts that represent a unique class of drug targets; focus on organic chemistry of enzyme catalyzed reactions and enzyme inhibition by small molecules from a medicinal chemistry perspective; chemical and enzyme kinetics, sources of catalytic power, chemical mechanisms used in enzyme catalysis, role of coenzymes; strategies in enzyme inhibition, drug resistance, drug synergism, reversible enzyme inhibitors, transition state analogs, slow tight binding inhibitors, irreversible inhibition; taken alone or as part of BIOL:5242. Requirements: introductory course in biochemistry. Same as PHAR:5542.

BIOC:5245 Biophysical Chemistry I, Module II 1 s.h.
In-depth examination of statistical thermodynamics and molecular forces in biological systems as related to protein structure, stability, and folding; nucleic acid structure and stability; taken alone or as part of BIOL:5241. Requirements: introductory course in biochemistry.
BIOC:5246 Biophysical Chemistry II, Module II 1 s.h.
Utilization of X-ray crystallography and NMR spectroscopy in determining atomic resolution biomolecular structures; crystal geometry, X-ray diffraction, the phase problem, data collection, structure solving and refinement; basic principles of NMR spectroscopy including magnetic properties of nuclei, chemical shift, resonance assignments, determination of NOEs, scalar couplings, RDCs, and simulated annealing approaches to structure determination; for students interested in structural biology; taken alone or as part of BIOC:5242.
Requirements: introductory course in biochemistry.

BIOC:5247 Biophysical Chemistry I, Module III 1 s.h.
In-depth examination of protein-protein interactions and protein-nucleic acid interactions; implications in biological motility, transcription, and replication; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.

BIOC:5248 Biophysical Chemistry II, Module III 1 s.h.
Methods for studying biomolecular dynamics, structure of large biomolecules and biomolecular complexes; measurement and analysis of NMR parameters for characterization of dynamics including T1, T2, hetNOE, CPMG-RD, and RDCs; introduction to computational approaches (e.g., molecular dynamics); NMR methods for studying large biomolecular systems and survey of other approaches including cryoEM and SAX; for students interested in structural biology; taken alone or as part of BIOC:5242. Requirements: one year of biochemistry. Recommendations: basic knowledge of spectroscopy and some previous exposure to NMR from basic chemistry courses.

BIOC:5261 Research Techniques 1-6 s.h.
Laboratory rotation for first-year graduate students in biochemistry.

BIOC:5282 Seminar 0-2 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

BIOC:5875 Perspectives in Biocatalysis 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CBE:5875, CEE:5875, CHEM:5875, MIRC:5875, PHAR:5875.

BIOC:7251 Introduction to Protein Structures 1 s.h.
Basics of protein structures and amino acids; module covers chapters 1-5 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BIOC:7252 Enzymes, Carbohydrates, Nucleic Acids, and Bioenergetics 1 s.h.
Basics of enzyme kinetics and enzyme mechanisms, carbohydrates, nucleic acids, and bioenergetics; module covers chapters 6, 7, 8, and 13 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.

BIOC:7253 Metabolism I 1 s.h.
Basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway), hormonal regulation of carbohydrate metabolism, the citric acid cycle, amino acid catabolism, oxidative phosphorylation; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module. Requirements: undergraduate biochemistry course or background in enzyme function.

BIOC:7254 Metabolism II 1 s.h.
Central carbon metabolism, carbohydrate biosynthesis in plants and bacteria, lipid structure/function, fatty acid catabolism, lipid biosynthesis, and biological membranes/transport; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module; module covers chapters 10, 11, 17, 20, and 21 of Lehninger's *Principles of Biochemistry*; course can be taken alone or as part of BIOC:3130. Recommendations: first-year graduate standing in biosciences or physical sciences.

BIOC:7255 Metabolism III and Biosignaling 1 s.h.
Basics of membranes and transport, biosignaling, nitrogen metabolism, integration of metabolism, genes, and chromosomes; module covers chapters 11, 12, 22, 23, and 24 of Lehninger's *Principles of Biochemistry*; course can be taken alone or as part of BIOC:3130. Recommendations: first-year graduate standing in biosciences or physical sciences.

BIOC:7256 Molecular Biology 1 s.h.
DNA, RNA, and protein metabolism, regulation of gene expression, and DNA-based information technologies; module covers chapters 25, 26, 27, 28, and 9 of Lehninger's *Principles of Biochemistry*; course can be taken alone or as part of BIOC:3130. Recommendations: first-year graduate standing in biosciences or physical sciences.

BIOC:7292 Research Biochemistry arr.
Thesis research.

BIOC:8101 Biochemistry for Dental Students 3 s.h.
Biochemistry, B.A.

The Department of Biochemistry offers two bachelor's degrees—a B.A. and a B.S. To maximize student flexibility, the curriculum in the first two years of study is identical for both degrees.

Requirements

The Bachelor of Arts with a major in biochemistry requires a minimum of 120 s.h., including 57-58 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program [p. 437].

The biochemistry major for the Bachelor of Arts degree provides a rigorous education in biochemical concepts and practice in the laboratory while giving students flexibility to specialize in additional disciplines or to obtain clinical volunteer experience. The B.A. program is intended for most students majoring in biochemistry, including those with pre-medicine, pre-pharmacy, pre-dental, and other pre-health professions interests. It also is appropriate for students earning more than one major.

Qualified students in the Bachelor of Arts degree program may graduate with honors in the biochemistry major; see "Honors in the Major" below.

The major in biochemistry (B.A.) requires the following work.

Common Requirements

All biochemistry majors complete the following course work during their first two years:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOC:3120 &amp; BIOC:3130</td>
<td>Biochemistry and Molecular</td>
<td>6</td>
</tr>
<tr>
<td>BIOC:3140</td>
<td>Experimental Biochemistry</td>
<td>2</td>
</tr>
<tr>
<td>BIOL:1411-1412</td>
<td>Foundations of Biology - Diversity of Form and Function</td>
<td>8</td>
</tr>
<tr>
<td>CHEM:1110 &amp; CHEM:1120</td>

<td>College Physics I</td>
<td>4</td>
</tr>
<tr>
<td>PHYS:1512 or PHYS:1612</td>
<td>College Physics II</td>
<td>3-4</td>
</tr>
</tbody>
</table>

Total Hours: 48-49

Additional Requirements

In addition to the common requirements listed above, biochemistry majors who elect to earn a Bachelor of Arts must complete the following work.

One of these:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOC:5241</td>
<td>Biophysical Chemistry I</td>
<td>3</td>
</tr>
</tbody>
</table>

Honors in the Major

Students majoring in biochemistry have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33. To graduate with honors in the biochemistry major, students must earn 6 s.h. in BIOC:4999 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report given at a special open departmental seminar.

In addition to honors in their major, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the
major are those required to complete the major; they may be offered by departments other than the major department.

**Before the third semester begins:** CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, MATH:1850 Calculus I, and MATH:1860 Calculus II

**Before the fifth semester begins:** BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2420 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors

**Before the seventh semester begins:** PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, a science elective, and at least 90 s.h. earned toward the degree

**Before the eighth semester begins:** CHEM:4430 Principles of Physical Chemistry or CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:5241 Biophysical Chemistry I or BIOC:5242 Biophysical Chemistry II, and a science elective

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

---

<sup>1</sup> General Education (GE) courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses. For more information, view the General Education Program.[p. 437]

<sup>2</sup> Enrollment in chemistry and math courses require completion of placement exams.

<sup>3</sup> Students may use their elective courses to complete a double major, minors, or certificates.

<sup>4</sup> Students who have completed four years of a single language in high school have satisfied the College of Liberal Arts and Sciences GE: World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
Career Advancement

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Biochemistry, B.S.

The Department of Biochemistry offers two bachelor's degrees—a B.S. and a B.A. To maximize student flexibility, the curriculum in the first two years is identical for both degrees.

Requirements

The Bachelor of Science with a major in biochemistry requires a minimum of 120 s.h., including 69-70 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences General Education Program [p. 437].

All students majoring in biochemistry are initially placed in the Bachelor of Arts degree program. Students in good academic standing can switch to the Bachelor of Science program after completing one semester of organic chemistry (CHEM:2230 Organic Chemistry I for Majors or CHEM:2210 Organic Chemistry II). Students who wish to change their degree program to the Bachelor of Science should do so by filling out a change of degree form at the College of Liberal Arts and Sciences Office of Academic Programs & Student Development.

The biochemistry major for the Bachelor of Science degree is intended primarily for students planning careers in research. The B.S. program prepares students to pursue graduate degrees, such as an M.S., Ph.D., or joint M.D./Ph.D., or to work as research technicians. The B.S. program requires 12 s.h. more credit in science and laboratory electives than the B.A. program does.

Qualified students in the Bachelor of Science degree program may graduate with honors in the biochemistry major; see "Honors in the Major" below.

The major in biochemistry (B.S.) requires the following work.

Common Requirements

All biochemistry majors complete the following course work during their first two years.

<table>

All of these:

Advanced science electives approved by biochemistry advisor

Advanced laboratory courses, including BIOC:4999

Students are encouraged to begin research by taking BIOC:3993 Undergraduate Independent Study, which has no prerequisites. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BIOC:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

In order to register for BIOC:4999 Research, Independent Study, students must have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, and BIOC:3140 Experimental Biochemistry. They must have a grade average of B or higher in the three courses and a grade of B-minus or higher in each course. They also must have completed BIOC:3101 Technical Communication in Biochemistry and should have prior research experience (e.g., BIOC:3993 or HONR:3994 Honors Research Practicum) or consent of the instructor.

B.S. with Teacher Licensure

Biochemistry majors interested in earning licensure to teach in elementary and/or secondary schools must complete the College of Education’s Teacher Education Program (TEP) in addition to the requirements for the major and all requirements for graduation. The TEP requires several College of Education courses and student teaching. Contact the Office of Student Services for details.

Students must satisfy all degree requirements and complete Teacher Education Program licensure before degree conferral.

Honors in the Major

Students majoring in biochemistry have the opportunity to graduate with honors in the major. Departmental honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33. To graduate with honors in the biochemistry major, students must earn 6 s.h. in BIOC:4999 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report given at a special open departmental seminar.

In addition to honors in their major, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University’s honors program.
Joint B.S./Ph.D.
The joint Bachelor of Science/Doctor of Philosophy program in biochemistry permits students to transition into the Ph.D. program during their senior year and to count 12 s.h. of credit toward both the B.S. and Ph.D. requirements. The joint program provides a research-intensive experience and shortens the training time for students interested in pursuing independent biochemistry research careers. Students in the program receive financial support during the second half of their senior year and throughout their Ph.D. study.

Students must apply to enter the joint B.S./Ph.D. program. They must be pursuing a Bachelor of Science with a major in biochemistry, and by the beginning of their senior year they must:

- have 108 s.h. of undergraduate credit;
- have a minimum grade-point average of 3.50;
- have completed four semesters of research experience (summer research counts as one semester); and
- have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, and BIOC:3140 Experimental Biochemistry.

Students interested in the joint program should speak with their academic advisor and the biochemistry honors advisor during their first year or at the beginning of their sophomore year. They should apply to the program in spring of their junior year; applications are due at the beginning of the spring semester. Application materials must include a letter of application and statement of purpose; official scores on the Graduate Record Exam (GRE) General Test; and three letters of recommendation, including at least one from a research advisor.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3101 Technical Communication in Biochemistry, one semester of BIOC:3993 Undergraduate Independent Study for students planning to take BIOC:4999 Research, Independent Study, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, two science electives, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:5241 Biophysical Chemistry I or BIOC:5242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of BIOC:4999 Research, Independent Study

During the eighth semester: enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

---

1. General Education (GE) courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses. For more information, view the General Education Program. [p. 437]
2. Enrollment in chemistry and math courses require completion of placement exams.
3. Students may use their elective courses to complete a double major, minors, or certificates.
4. Students who have completed four years of a single language in high school have satisfied the College of Liberal Arts and Sciences GE: World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.

### Career Advancement

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Biochemistry, M.S.

Students admitted to graduate study in biochemistry usually pursue the Doctor of Philosophy.

**Requirements**

*The Master of Science program is being revised for fall 2016 admission. Details about the program are not yet available.*

The Master of Science program in biochemistry requires a minimum of 32 s.h. of graduate credit, thesis research, and a thesis. Work for the master’s degree provides a research-based mentored program, and M.S. students must complete a thesis that details prior work. See Biochemistry, Doctor of Philosophy [p. 1374] in the Catalog for information about the graduate curriculum.

**Admission**

Individuals interested in admission to the M.S. program should contact the Department of Biochemistry to inquire about admission to the master's program. All applicants must be able to identify a biochemistry faculty member that will sponsor and support them.

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

**Career Advancement**

The University of Iowa's biochemistry program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. Biochemists with advanced degrees work in teaching and research. They also pursue administrative careers at universities, medical schools, hospitals, government laboratories, private research agencies, biotechnology companies, and in food, drug, cosmetics, chemistry, petroleum, and other industries.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Biochemistry, Ph.D.

Students admitted to graduate study in biochemistry usually pursue the Doctor of Philosophy. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training [p. 1402] Program, which offers a joint M.D./Ph.D. program.

Requirements

The Doctor of Philosophy program is being revised for fall 2016 admission. Details about the program are not yet available.

The Doctor of Philosophy program in biochemistry requires a minimum of 72 s.h. of graduate credit. Students complete 34 s.h. of course work and earn 38 s.h. of credit for research. The focus of the graduate program is on the individual student, so students work with the director of the biochemistry graduate programs to tailor the curriculum to their educational goals.

The Ph.D. in biochemistry requires the following work.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for one semester. Throughout the program, students are associated with faculty-directed research groups. They receive close personal attention from the biochemistry faculty members who serve as research advisors.

Admission

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College.

Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

Career Advancement

The University of Iowa's biochemistry program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. Biochemists with advanced degrees work in teaching and research. They also pursue administrative careers at universities, medical schools, hospitals, government laboratories, private research agencies, biotechnology companies, and in food, drug, cosmetics, chemistry, petroleum, and other industries.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.
Cardiothoracic Surgery

Chair
- Ronald J. Weigel

Faculty: http://www.medicine.uiowa.edu/surgery/people/division/cardiothoracic-surgery
Website: http://www.medicine.uiowa.edu/surgery/divisions/cardiothoracic-surgery/

The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as the Division of Cardiothoracic Surgery, the program has advanced from providing operative interventions for patients with diseases of the chest to performing a broad range of the most current and innovative surgical procedures.

The Department of Cardiothoracic Surgery's facilities are located at University of Iowa Hospitals and Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are under way for providing coronary artery bypass grafting using robotics.

Postbaccalaureate Training

The department plays a primary instructional role in University of Iowa Hospitals and Clinics' 20-month postbaccalaureate Perfusion Technology Program; see the department's perfusion technology courses listed under Courses [p. 1375] in this section of the Catalog. For more information about the Perfusion Technology Program, contact the Department of Cardiothoracic Surgery or visit the Perfusion Technology Program website.

Research

University of Iowa cardiothoracic surgeons are leaders in clinical research, particularly in oncologic surgery, diseases of the esophagus, artificial organs, pediatric cardiac surgery, and transplantation. Research also is under way in the sequence of mutations and in localization of genes predisposed to cancer.

M.D. Training

The department trains fourth-year M.D. students in two courses, CTS:8401 Subinternship in Cardiothoracic Surgery and CTS:8497 Research in Cardiothoracic Surgery.

Residency

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education. It is the only cardiothoracic surgery training program in Iowa. Two residents are accepted into the two-year program each year.

Facilities

The Department of Cardiothoracic Surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

Courses

Cardiothoracic Surgery Courses

- CTS:8499 Cardiothoracic Surgery Off Campus 4 s.h. Individually arranged by student with approval of department to rotate outside of the University of Iowa Hospitals and Clinics. Requirements: M.D. enrollment.

Perfusion Courses

- PERF:4161 Instrumentation in Perfusion Technology 3 s.h.
  Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.
- PERF:4162 Pathophysiology of Perfusion Technology 5 s.h.
  Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.
- PERF:4163 Clinical Experience I 2 s.h.
  Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Requirements: Perfusion Technology Program enrollment.
- PERF:4164 Clinical Experience II 3 s.h.
  Continuation of PERF:4163; setup of extracorporeal circuit; ancillary duties of perfusionist. Prerequisites: PERF:4161 and PERF:4162 and PATH:8133 and PERF:4163.
- PERF:4165 Clinical Experience III 12 s.h.
  Continuation of PERF:4164; management of cardiopulmonary bypass system. Prerequisites: PCOL:4130 and PERF:4171 and PERF:4164 and PERF:4170.
- PERF:4166 Clinical Experience IV 12 s.h.
  Continuation of PERF:4165; emphasis on supply maintenance, perfusion department management. Prerequisites: PERF:4165.
- PERF:4167 Perfusion Seminar 1 s.h.
  Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.
- PERF:4168 Research in Perfusion 1 s.h.
  From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.
- PERF:4169 Clinical Experience V 12 s.h.
  Continuation of PERF:4166. Prerequisites: PERF:4166.
**PERF:4170 Principle and Practice of Perfusion Technology**  6 s.h.
Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation.
Prerequisites: PERF:4161 and PERF:4163 and PERF:4162 and PATH:8133.

**PERF:4171 Devices in Perfusion Technology**  3 s.h.
Dermatology

Chair
• Janet A. Fairley

Faculty: http://www.medicine.uiowa.edu/dept_primary_apr.aspx?appointment=Dermatology
Website: http://www.medicine.uiowa.edu/dermatology/

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

M.D. Training

The Department of Dermatology rotation is one of seven selective courses offered to third- and fourth-year medical students. Students spend two weeks in the clinic and attend approximately 10 one-hour lectures. They see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals and Clinics and Iowa River Landing and a large number of patients referred from Student Health & Wellness. Additional patients are seen at the nearby Iowa City Veterans Affairs Health Care System.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

Courses

Dermatology Courses

DERM:8301 Clinical Dermatology 2 s.h.
Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year M.D. enrollment.

DERM:8401 Dermatology Elective arr.
Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year M.D. enrollment.

DERM:8497 Research in Dermatology arr.
General principles of medical research; clinical or laboratory projects; individual study.

DERM:8499 Dermatology Off Campus arr.
Arranged by student with departmental approval.
Dietary

Executive Associate Dean

- Patricia Winokur

Graduate certificate: dietetic internship program
Website: http://www.healthcare.uiowa.edu/fns/Internship/internship.htm

University of Iowa Hospitals and Clinics offers a dietetic internship program that is fully accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND). It qualifies graduates to take the exam for qualification as a Registered Dietitian (RD). Clinical dietitians and food service operation managers of the Food and Nutrition Services at University of Iowa Hospitals and Clinics provide the instruction for the program. Graduate-level courses in the program are administered by the Carver College of Medicine and the College of Public Health.

Programs

Graduate Program of Study

Certificate
- Certificate in Dietetic Internship Program [p. 1379]

Courses

Dietary Courses

DIET:9203 Clinical Dietetics 1 s.h.
Nutritional aspects of health and disease, with emphasis on medical nutrition therapy; human nutrition in the clinical state as it relates to physiology and biochemistry.
Dietetic Internship Program, Certificate

Students complete the program with 9 s.h. of credit. Approximately half of the program’s graduates go on to complete advanced degree programs.

Students must complete a didactic program in dietetics that has approval of the Academy of Nutrition and Dietetics (AND) Accreditation Council for Education in Nutrition and Dietetics (ACEND).

Students enter the program in the fall semester. The postmark deadline for applications is February 15.

The following course work is required (at least 9 s.h.).

Doctor of Medicine

**Professional degree:** M.D.

**Website:** http://www.medicine.uiowa.edu/md/

The Doctor of Medicine is a professional degree awarded by the Carver College of Medicine. The college is accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges and meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards.

**Programs**

**Professional Program of Study**

**Major**

- Doctor of Medicine [p. 1381]

**Academics Rules and Procedures**

**Student Promotion**

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards, and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student’s skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college; suspension for a specified period of time; requiring the student to repeat all or any part of the curriculum on academic probation; and allowing the student to continue on academic probation with a full or partial course load. The committee’s recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Medical students have the right to appeal a promotion decision. They must submit the appeal in writing to the Carver College of Medicine’s executive dean within five days of notification of the decision. Appeals are considered by the Appeals Committee, made up of faculty representatives of the Medical Council and the Executive Committee, a medical student, a lay member, and the associate dean for student affairs (ex officio). Students may request an opportunity to appear before the Appeals Committee to make a statement and answer questions. The committee then makes its recommendation to the college’s dean, who is the final authority.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Student Handbook.

**Leaves of Absence, Withdrawal, Reinstatement**

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available at the college’s Office of Student Affairs and Curriculum and is published annually in the Student Handbook.

**Disputes and Complaints**

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University’s Policy on Sexual Harassment.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Student Handbook.
Doctor of Medicine, M.D.

Requirements

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. The program admits 152 new students each year.

The M.D. curriculum is built on a triple-helix model whose three strands extend through all four years of medical school: the clinical and professional skills strand, the mechanisms of health and disease strand, and the medicine and society strand.

Clinical experiences begin during the first few weeks of medical school, and clinical clerkships start after just three semesters of preclinical instruction. By the end of the fifth semester, students have completed all of their core requirements and have the remaining three semesters to tailor their educational experience in preparation for their selected specialty.

Students complete in-depth clinical course work and serve clinical clerkships primarily at University of Iowa Hospitals and Clinics, the Iowa City Veterans Health Care System, and the Des Moines Area Medical Education Consortium. Students also may have opportunities to gain experience in private medical offices and community hospitals.

Graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one or more University of Iowa-affiliated residency programs in six Iowa cities. They also have access to two transitional-year programs. For more information, contact the Office of Student Affairs and Curriculum and visit Information for Current Students on the Carver College of Medicine website.

Preclinical Curriculum

The first three semesters of the M.D. program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.

Course work includes human anatomy, foundations of cellular life, a three-course series on clinical and professional skills, a three-course series on medicine and society, and a five-course series on multisystem mechanisms of health and disease. Each of these courses is described below.

Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The M.D. program’s preclinical curriculum requires the following course work.

First Semester

ACB:8101 Medical Gross Human Anatomy: complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, and independent activities.

MED:8121 Clinical and Professional Skills I: introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into the context of patient care through the Longitudinal Clinical Mentor (LCM) Program; interactions with students from other health sciences colleges to explore the interprofessional approach to caring for patients.

MED:8122 Medicine and Society I: delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and the community on health care; community resources; students apply health and risk assessment to individual patients and to themselves.

MED:8123 Foundations of Cellular Life: genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of the human body; framework necessary for exploring the mechanisms of health and disease.

MED:8124 Mechanisms of Health and Disease I: normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development.

Second Semester

MED:8131 Clinical and Professional Skills II: reinforcement of clinical reasoning concepts introduced in MED:8121 and introduction of additional concepts; application of concepts through interactions with standardized patients and through Longitudinal Clinical Mentor clinical visits; varied experiences help students gain a deeper appreciation for issues in biomedical ethics; strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8132 Medicine and Society II: knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease; focus on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8133 Mechanisms of Health and Disease II: normal and healthy processes within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III: abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development.

Third Semester

MED:8221 Clinical and Professional Skills III: advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students’ ability to integrate and use concepts from the M.D. curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

MED:8222 Medicine and Society III: health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

MED:8223 Mechanisms of Health and Disease IV: abnormalities or disruptions leading to disease within and
among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone: transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.

Clinical Curriculum

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-a-half year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside on in-patient units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student’s individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships. Students then enter various pathways where they complete a minimum of twelve weeks of selectives, four weeks of emergency or critical medicine, one four-week subinternship, and 36 weeks of advanced electives.

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during the fall of their fourth year of the M.D. program.

During the advanced clinical years, students complete a minimum of 20 weeks of required clerkships (12 weeks of two-week subspecialty clerkships, a four-week emergency medicine/critical care, and a four-week subinternship), and 36 weeks of electives.

Primary venues for clinical training of medical students include University of Iowa Hospitals and Clinics, the Iowa City Veterans Health Care System, and the Des Moines Area Medical Education Consortium. Students also participate in the family practice preceptorship and the community-based primary care clerkship, which are off-campus sites. Other courses may be assigned to off-campus sites, as well.

The M.D. program’s clinical curriculum requires the following clerkships and electives.

Generalist Core

M.D. students complete the generalist core during the fourth and fifth semesters. It consists of the following 44 weeks of clerkships.

| Ambulatory Practice Module |  |
|----------------------------|  |
| MED:8301 Community-Based Primary Care (4 weeks) | 4 |
| FAM:8301 Preceptorship in Family Medicine (4 weeks) | 4 |
| IM:8302 Outpatient Internal Medicine (4 weeks) | 4 |

| Internal Medicine/Pediatrics Block |  |
|-----------------------------------|  |
| IM:8301 Inpatient Internal Medicine (6 weeks) | 6 |
| PEDS:8301 Clinical Pediatrics (6 weeks) | 6 |

| Obstetrics and Gynecology/Surgery Block |  |
|------------------------------------------|  |
| OBG:8301 Clinical Obstetrics and Gynecology (6 weeks) | 6 |
| SURG:8301 Clinical Surgery (6 weeks) | 6 |

| Neurology/Psychiatry Block |  |
|----------------------------|  |
| NEUR:8301 Clinical Neurology (4 weeks) | 4 |
| PSYC:8301 Clinical Psychiatry (4 weeks) | 4 |

| Selectives |  |
|------------|  |
| After finishing the generalist core, M.D. students complete 12 weeks of selectives chosen from the following. |  |
| ANES:8301 Clinical Anesthesia (2 weeks) | 2 |
| DERM:8301 Clinical Dermatology (2 weeks) | 2 |
| OPHT:8301 Clinical Ophthalmology (2 weeks) | 2 |
| ORTH:8301 Clinical Orthopedics (2 weeks) | 2 |
| OTO:8301 Clinical Otolaryngology (2 weeks) | 2 |
| RAD:8301 Clinical Radiology (2 weeks) | 2 |
| URO:8301 Clinical Urology (2 weeks) | 2 |

| Other Required Clerkships |  |
|---------------------------|  |
| M.D. students complete the following additional required clerkships and other work during the three advanced clinical-year semesters. |  |
| Emergency medicine or critical care medicine (4 weeks) |  |
| One subinternship (4 weeks during the fourth year) |  |
| Advanced electives (total of 36 weeks during the fourth year) |  |

| Joint M.D./Graduate Degrees |  |
|-----------------------------|  |
| The Carver College of Medicine offers a joint M.D./Ph.D. program for students who are interested in a career that combines clinical and academic medicine with basic and clinical research; see Medical Scientist Training Program [p. 1402] in the Catalog. |  |
| The college also collaborates with other University of Iowa colleges to offer the joint M.D./B.A. program with the Tippie College of Business [p. 913]; the joint M.D./J.D. program with the College of Law [p. 1326]; and the joint M.D./M.P.H. program with the College of Public Health [p. 1258]. |  |
| Students must be admitted to both of the individual degree programs before they may be admitted to the joint degree program. Those interested in joint M.D./graduate degree programs must make arrangements with the appropriate graduate department and with the Carver College of Medicine associate dean for student affairs and curriculum. |  |

| Admission |  |
|------------|  |
| The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is November 1. |  |
Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college. A $60 fee must accompany the secondary application from all applicants.

Admitted applicants must have an official transcript from each college they have attended sent to the University’s Office of Admissions.

**Technical Standards for Admission and Retention**

The Carver College of Medicine seeks students who will serve the needs of society best, and it strives to graduate skilled and effective physicians. To achieve these goals, it applies the following principles and technical standards to candidates for admission and to continuing students.

**Principles**

Technical standards refer to criteria that go beyond academic requirements for admission and are essential to meeting the academic requirements of the M.D. program.

Applicants to the Carver College of Medicine and students continuing in the college, with or without disabilities, are expected to meet the same requirements.

Matriculation and continuation in the college assume a certain level of cognitive and technical skill. Medical students with disabilities are held to the same fundamental standards as their nondisabled peers. Although not all students should be expected to gain the same level of proficiency with all technical skills, some skills are so essential that mastery must be achieved, with the assistance of reasonable accommodations where necessary.

Reasonable accommodations are provided to assist in learning, performing, and satisfying the technical standards.

Every reasonable attempt is made to facilitate the progress of students, providing that such efforts do not compromise collegiate standards or interfere with the rights of other students and patients.

**Technical Standards**

Applicants for admission to the Carver College of Medicine and continuing students must possess the capability to complete the entire medical curriculum and be granted the degree. To this end, they must complete all courses in the curriculum successfully. In order to acquire the knowledge and skills to function in a broad variety of clinical situations and to provide a wide spectrum of patient care, M.D. students must have abilities and skills in six areas, including observation; communication; motor skills; intellectual, conceptual, integrative, and quantitative abilities; behavioral and social attributes; and cultural competence.

Technological compensation can be made for some disabilities in certain areas, but students must meet the essential technical standards in such a way that they are able to perform in a reasonably independent manner. The use of a trained intermediary is not acceptable in many clinical situations, because it implies that the student’s judgment must be mediated by someone else’s power of selection and observation.

**Observation:** Students must have the functional ability to observe demonstrations and experiments in the basic sciences and must have sufficient use of the senses necessary to perform a physical examination.

**Communication:** Students must be able to relate reasonably to patients and establish sensitive, professional relationships with patients, colleagues, and staff. They are expected to communicate the results of the history and examination to the patient and to their colleagues with accuracy, clarity, and efficiency.

**Motor:** Students are expected to participate in basic diagnostic and therapeutic maneuvers and procedures. Those who cannot perform these activities independently should be able to understand and direct the methodology involved in such activities.

**Intellectual, conceptual, integrative, and quantitative abilities:** Students must be able to learn to analyze, synthesize, solve problems, and reach reasonable diagnostic and therapeutic judgments. Students are expected to be able to display good judgment in the assessment and treatment of patients. They must be able to learn to respond with prompt and appropriate action in emergency situations.

**Behavioral and social attributes:** Students are expected to be able to accept criticism and respond with appropriate modification of their behavior. Students also are expected to possess the perseverance, diligence, and consistency necessary to complete the M.D. curriculum and enter the independent practice of medicine in a reasonable period of time. They must demonstrate professional and ethical demeanor and behavior in all dealings with peers, faculty, staff, and patients.

**Cultural competence:** Medical students must be able to communicate with and care for persons whose culture, sexual orientation, or religious beliefs are different from their own. They must be able to perform a complete history and physical exam on any patient regardless of the student’s or the patient’s race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference. Similarly, students must be able to interact professionally with colleagues and other health care professionals without regard to race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference.

Applicants who may not meet these standards are encouraged to contact the college’s admissions office.

**Admission Requirements**

Applicants for admission to the Carver College of Medicine must have a bachelor’s degree, or they must be enrolled in a bachelor’s degree program with the expectation of receiving their degree before enrolling in the Carver College of Medicine. Applicants must have earned college credit in the following courses.

**Physics:** a complete introductory course (one year), including lab instruction.

**Mathematics:** an advanced college mathematics course or a statistics course.

**Chemistry:** a minimum of two years of chemistry, which must include general and organic chemistry with labs, and biochemistry.

**Biology:** a complete introductory course in the principles of biology (one year), with the appropriate laboratories; and an advanced biology course (one semester or quarter); recommended advanced biology courses include molecular and cell biology, human physiology, genetics, and microbiology.
**English:** two courses, including composition and literature; the requirement may be waived if the applicant’s school has an integrated writing requirement in courses across its curriculum.

**Social and behavioral sciences, and humanities:** four courses; because writing skills are important in the study and practice of medicine, prospective applicants are encouraged to fulfill this requirement with courses that include a writing component; recommended courses include behavioral psychology, world language, and other courses that encourage appreciation for diversity and cultural competency.

Applicants should have taken the required science courses for a grade rather than electing pass/fail grading.

Fulfillment of these requirements does not guarantee admission to the Carver College of Medicine. The college’s admissions committee selects applicants who appear to be best qualified to study and practice medicine. Preference is given to Iowa residents with high scholastic standing. Consideration also is given to outstanding nonresidents.

Applicants are required to take the Medical College Admission Test (MCAT) no earlier than five years before and no later than September of the year of application. To register for the test, see the Medical College Admission Test website.

Personal interviews are part of the admission process. Candidates invited for an interview are contacted by the admissions committee. An external criminal background check is performed for all admitted students at the time of admission.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University’s Student Health & Wellness in cooperation with University of Iowa Hospitals and Clinics; see Requirements and Forms on the Student Health & Wellness website.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at the University.

**Financial Support**

The Carver College of Medicine’s philosophy is that no student should be denied a medical education due to a lack of financial resources. The college’s financial aid staff actively seeks sources of aid so that every student interested in a medical education will be able to finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Direct Grad PLUS loan, and the Primary Care Loan (PCL). Students also may qualify for collegiate loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college’s financial aid office and are awarded as a part of a student’s total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean’s Scholarships are awarded by the college’s admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean’s Scholarships are included in the recipient’s overall financial aid package.

To learn more about financial aid, contact the Carver College of Medicine Financial Services office.

**Career Advancement**

An interest in science, the healing arts, helping people, and medical research can lead to a great number of satisfying careers. For information about career options in health care, review The Road to Becoming a Physician on the College of Medicine’s website and the Occupational Outlook Handbook.
Emergency Medicine

Chair

- Andrew Nugent

Faculty: http://www.medicine.uiowa.edu/dept_primary_apr.aspx?appointment=Emergency%20Medicine
Website: http://www.medicine.uiowa.edu/emergencymedicine/

The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

Resources

The Emergency Department, located on the first floor of Roy Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

M.D. Training

Elective rotations for Doctor of Medicine students are available at University of Iowa Hospitals and Clinics and at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Medical Center, Burlington; Covenant Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; and Mercy Medical Center, Sioux City. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers an annual introductory month to emergency medicine; advanced life support; and Wilderness Medicine, a rotation that includes scenario and didactic training in wilderness medicinal skills with travel to areas such as Colorado.

Residency

The emergency medicine faculty directs the Iowa Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

This clerkship at the Iowa Poison Control Center provides an intense introduction to the breadth and depth of medical toxicology; the student will have the freedom to work independently and concentrate on many different areas and interests, working with a multi-disciplinary team of nurses, pharmacists, and physicians; specific activities include, but are not restricted to, reviewing and presenting active poisoned patient cases during daily rounds; possible opportunities to see toxicology patients at the bedside; prepare and present a short presentation in any area of medical toxicology. Requirements: M.D. enrollment.
EM:8498 Emergency Medicine On Campus arr.
Clinical research experience with a mentor in the Emergency Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.

EM:8499 Emergency Medicine Off Campus arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; Liaison Committee on Medical Education (LCME) accredited off-campus site. Requirements: completion of M.D. third year and approval from UIHC Emergency Medicine clerkship director.
Family Medicine

Chair
• Paul A. James

Faculty:  http://www.medicine.uiowa.edu/familymedicine/
DepartmentalLeadership/
Website:  http://www.medicine.uiowa.edu/familymedicine/

The Department of Family Medicine is recognized nationally for excellence in patient care, teaching, and research. The
department is dedicated to providing primary care for the
citizens of Iowa, educating medical students, training resident
physicians, providing continuing education, and creating new
knowledge to improve primary care and health care delivery
systems.

M.D. Training

The Department of Family Medicine trains primary care
physicians. The department offers course work that is
included throughout the four-year M.D. program. Twenty-
one elective senior rotations give students opportunities
for exposure to various Iowa communities through work in
affiliated hospitals or connected facilities, in the department's
model office on the University of Iowa campus, and in
preceptorships with selected family physicians throughout
the state. Students also have the opportunity for independent
study during the fourth year.

Residency

Family Medicine Residency

The Department of Family Medicine directs a three-year
residency program whose graduates are eligible for
certification by the American Board of Family Medicine. The
residency program trains physicians to provide continuous and
comprehensive medical care to patients and their families.
Residents are educated in all areas of family medicine—adult
medicine, maternal and child health, behavioral science,
surgical specialties, and community medicine. Training
emphasizes the value of wellness and preventive medicine as
well as curative medicine.

The program is organized as a progressive educational
experience. It consists of formal teaching and clinical
experiences on assigned rotations, structured conferences,
and patient care in the Family Medicine Clinic. As residents
develop clinical skills, medical judgment, and competence,
their patient responsibilities increase. Some patients at
the Family Medicine Clinic are assigned to residents, who
provide medical care under faculty supervision. Residents are
responsible for their patients for the duration of the residency
program.

Residents also learn the principles of practice management,
including organizational and administrative decision making,
patient record and bookkeeping procedures, and chart
auditing methodologies.

Residents are expected to take responsibility for their learning
environment, to avail themselves of the department's diverse
resources, and to collaborate with the faculty in order to have
the best possible learning experience.

Family Medicine-Psychiatry Residency

The Department of Family Medicine and the Department
of Psychiatry cosponsor the combined Family Medicine-
Psychiatry Residency program. The program's residents
acquire broad-based training in both disciplines, including
focused training in geriatrics and geriatric psychiatry,
substance and alcohol abuse, diagnosis and treatment of
depression, delirium, eating disorders, panic disorders, and
neurotic and somatizing behavior. Graduates are eligible for
certification by the American Board of Family Medicine and the
American Board of Psychiatry and Neurology.

Facilities

The Department of Family Medicine is located on the
University of Iowa health sciences campus. Faculty offices
are close to the Family Medicine Clinic, where patients are
seen by appointment. The department also has community-
based clinics in southeast Iowa City, Muscatine, North Liberty,
Riverside, and Sigourney, Iowa.

Courses

Family Medicine Courses

FAM:8005 Medical Education Community
Orientation  0 s.h.
Experience in a local health care delivery system away from
the University setting, between first and second year of M.D.
program.

FAM:8301 Preceptorship in Family Medicine  arr.
One-on-one experience with a practicing physician in his or
her office; exposure to illnesses, conditions often seen in
primary care; realistic background for evaluation of family
medicine as a career alternative.

FAM:8401 Subinternship in Family Medicine, University
of Iowa  arr.
Inpatient aspects of family medicine's key components;
experience on the family medicine inpatient service.

FAM:8402 University of Iowa Family Medicine
Clerkship  2-4 s.h.
Work with family practice residents and staff in day-to-
day delivery of primary medical care at Family Practice
Center; experience in the Family Stress Clinic observing
family-centered counseling; nursing home visits, work with
departmental social worker and sports medicine specialist.

FAM:8403 Advanced Preceptorship in Family
Medicine  2-4 s.h.
Experience in community practice of family medicine.

FAM:8404 Rural Preceptorship in Family
Medicine  2-4 s.h.

FAM:8405 Geriatrics Elective  arr.
Experience in monitoring and evaluating health and functional
status of patients age 65 and older in the UI Geriatric
Assessment Clinic and community settings.

FAM:8406 Subinternship in Family Medicine - Cedar
Rapids  4 s.h.
Experience as a junior resident in all areas of inpatient family
medicine, including maternity care, child and adolescent
health, adult medicine.
FAM:8407 Clerkship in Family Medicine - Cedar Rapids 4 s.h.
Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.

FAM:8408 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center 4 s.h.
Clinical experience in inpatient and outpatient care.

FAM:8409 Subinternship in Family Medicine, Iowa Lutheran 4 s.h.

FAM:8410 Family Medicine, Iowa Lutheran arr.
Requirements: fourth-year M.D. enrollment.

FAM:8411 Family Medicine Clerkship, Davenport 4 s.h.
Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.

FAM:8412 Sub-Internship in Family Medicine, Davenport 4 s.h.
Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.

FAM:8413 Family Medicine Geriatrics, Davenport 4 s.h.
Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management of patients; interdisciplinary nature of geriatric and palliative care.

FAM:8415 Subinternship in Family Practice, Sioux City 4 s.h.
Experience as a junior resident in all areas of family medicine. Requirements: fourth-year M.D. enrollment.

FAM:8416 Family Medicine Clerkship, Sioux City 4 s.h.
Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.

FAM:8417 Subinternship in Family Medicine, Waterloo 4 s.h.
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.

FAM:8418 Family Medicine Clerkship, Waterloo 4 s.h.
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.

FAM:8419 River Crossing Family Medicine Clerkship 2-4 s.h.
Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year M.D. enrollment.

FAM:8420 Family Medicine, Mason City 2-4 s.h.
Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.

FAM:8421 Primary Care Sports Medicine 4 s.h.
Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: M.D. enrollment.

FAM:8422 Family Medicine/Psychiatry Elective 2-4 s.h.
Integration of mental and physical health care across outpatient family medicine and outpatient psychiatry arenas. Requirements: M.D. enrollment.

FAM:8450 Continuity of Care - Family Medicine 4 s.h.
Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.

FAM:8496 Independent Studies arr.
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.

FAM:8499 Family Medicine Off Campus arr.
Clerkships; may include community hospitals.
Free Radical and Radiation Biology

Director
- Douglas R. Spitz

Graduate degrees: M.S. in free radical and radiation biology; Ph.D. in free radical and radiation biology.

Faculty: https://frrbp.medicine.uiowa.edu/faculty-and-staff
Website: https://frrbp.medicine.uiowa.edu/

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on the metabolic production of free radicals and their role in biology and medicine.

Free radicals are of interest to researchers and clinicians due to their role in a variety of diseases and pathological states, including degenerative diseases of aging and cancer. Manipulation of free radical reactions and redox biology holds great promise for the future development of new therapies for a variety of human diseases. The Free Radical and Radiation Biology Program stresses the importance of these areas of research to basic science, translational research, and public health.

Undergraduate Education

Three courses offered by the Free Radical and Radiation Biology Program are open to University of Iowa undergraduate students: FRRB:3130 Radiation Safety and Radiobiology and FRRB:4000 Special Topics: Advanced Undergraduates, and FRRB:5000 Radiation Biology is open with undergraduates with instructor approval. Students looking for an overview of the biological effects of radiation, including the role of free radicals, will find FRRB:5000 especially appropriate. These courses are appropriate for students who plan to enter medicine, biomedical research, nuclear medicine technology, environmental health, or related programs.

Graduate Education

The Carver College of Medicine administers graduate programs in free radical and radiation biology; graduate degrees are granted through the Graduate College. See Carver College of Medicine [p. 1348] and Graduate [p. 1258] College in the Catalog for general information about study in medicine and graduate study at the University.

Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

Courses

Free Radical and Radiation Biology Courses

FRRB:3110 Medical Physics I 2-3 s.h.
Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as RSTH:3110.

FRRB:3130 Radiation Safety and Radiobiology 2 s.h.
Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as RSP:3130.

FRRB:3215 Medical Physics II 2-3 s.h.
Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as RSTH:3215.

FRRB:4000 Special Topics: Advanced Undergraduates arr.
Readings and/or laboratory experience. Offered fall semesters.
FRRB:5000 Radiation Biology 4 s.h.
Comprehensive study of molecular and biological effects of ionizing radiations with an emphasis on biomedical therapeutic applications; mammalian radiobiology, contribution of metabolism to radiation effects, and therapeutic applications of radiation in cancer therapy. Offered fall semesters of odd years. Prerequisites: BIOL:3120 and CHEM:2210. Requirements: college-level physics.

FRRB:5001 Research: Special Topics arr.

FRRB:6000 Seminar: Free Radical and Radiation Biology 1 s.h.
Seminar presentations of cutting edge science in the field of free radical and radiation biology, given by experts in the field as well as trainees.

FRRB:6004 Research: Free Radical and Radiation Biology arr.
Representation of intensive laboratory-based studies in the field of free radical and radiation biology, determined by mutual agreement between faculty members sponsoring the research and consultation with graduate student.

FRRB:6006 Topics in Free Radical Biology and Medicine 1 s.h.
Discussion and presentation of new literature reports in the field of free radical biology and medicine in journal club format.

FRRB:6008 Topics in Radiation and Cancer Biology 1 s.h.
Emerging concepts in the biological effects of radiation and cancer biology; current topics in journal club format.

FRRB:7000 Redox Biology and Medicine 4 s.h.
Chemistry of free radicals, related oxidants, and antioxidants; antioxidant (redox) enzymes--their structure, biochemical function, regulation, and function in redox biology; targets of oxidants--lipids, proteins, DNA; redox biology of health (infants to healthy aging) and disease (cancer, cardiovascular disease, diabetes, neurodegenerative diseases). Offered fall semesters of even years. Prerequisites: BIOL:3120 or CHEM:2210.

FRRB:7001 Molecular and Cellular Biology of Cancer 3 s.h.
Fundamental aspects of oncology at the cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters of odd years. Requirements: strong basic science background. Same as PATH:7001.
Free Radical and Radiation Biology, M.S.

Requirements

The Master of Science program is being revised for fall 2016 admission. Details about the program are not yet available.

The Master of Science in free radical and radiation biology requires a minimum of 30 s.h. of graduate credit.

The M.S. program is open to graduate students with a background in physics, chemistry, mathematics, biology, health sciences, veterinary medicine, or engineering.

After completing the introductory courses FRRB:5000 Radiation Biology and FRRB:7000 Redox Biology and Medicine, students typically concentrate on a particular aspect of the field. Some students elect to focus on radiation and cancer biology, while others choose to emphasize redox biology.

In addition to formal lectures and some structured laboratory exercises, plans of study for redox biology, cancer biology, and radiation biology students involve small-group conferences, discussions, and seminars.

Some of the department’s graduate students elect to take FRRB:3130 Radiation Safety and Radiobiology, a course that covers safe operation of radiation-producing equipment and handling of radioactive materials, regulations and regulatory agencies, formulas and techniques in radiation protection programs, radiation protection, and other topics.

Required Courses

Students must complete the following course work. Certain courses must be taken on a graded basis; consult the program office.

<table>

</tr>
</tbody>
</table>

If a student has completed an equivalent course from another institution, either as a didactic course or through work experience, the student may formally ask for the opportunity to take a by-pass exam, a course substitution, or an exemption. Students should consult the program office.

Credit earned from English as a second language (ESL) courses do not count toward the M.S. degree.

Attendance at other seminars and lectures outside the Free Radical and Radiation Biology Program is strongly encouraged.

M.S. with Thesis

M.S. students who wish to earn the degree with thesis must complete a minimum of 30 s.h. and write a thesis.

Financial Support

Graduate students are supported as graduate assistants from funds available through research grants and contracts or from departmental funds.
Free Radical and Radiation Biology, Ph.D.

Requirements

The Doctor of Philosophy program is being revised for fall 2016 admission. Details about the program are not yet available.

The Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit.

The Ph.D. program is open to graduate students with a background in physics, chemistry, mathematics, biology, health sciences, veterinary medicine, or engineering.

After completing the introductory courses FRRB:5000 Radiation Biology and FRRB:7000 Redox Biology and Medicine, students typically concentrate on a particular aspect of the field. Some students elect to focus on radiation and cancer biology, while others choose to emphasize redox biology.

In addition to formal lectures and some structured laboratory exercises, plans of study for redox biology, cancer biology, and radiation biology students involve small-group conferences, discussions, and seminars. Ph.D. students are encouraged to spend at least one semester as teaching assistants, for which no registration is required and no academic credit is given.

Required Courses

Students must complete the following course work. Certain courses must be taken on a graded basis; consult the program office.
