# Introduction to *Poroi* 13.2

**David J. Depew**

*University of Iowa, emeritus*

*Poroi* 13,2 (January 2018)

Volume 13, Issue 2 of *Poroi: An Interdisciplinary Journal of Rhetorical Analysis and Invention* makes available three articles on topics in the rhetoric of science.

Michelle Gibbons, University of New Hampshire, writes on contemporary neuroscience as favoring “epistemologies that value the speculative, indeterminate, and contingent,” not as a new foundation for rhetoric, as is sometimes suggested.

Alan Gross, University of Minnesota- Twin Cities, *emeritus*, calls on the figures of hyperbole and irony to point out differences between the technological sublime of 18<sup>th</sup> and 19<sup>th</sup> century and “a growing sense of disempowerment and reduction in social capital and cohesion as a consequence of a digital revolution.”

David J. Depew, University of Iowa, *emeritus*, explores the evolutionary biologist Richard Lewontin’s appeal to the argument from *ethos* to support his claim that racism has no biological justification and defend himself from accusations that his politics distorts his science.

POROI encourages and welcomes submissions on the rhetorical aspects of knowledge production and the role of various media, old and new, in this process. Use the “submit article” portal on the journal’s homepage (<http://ir.uiowa.edu/poroi/>).

The editors wish to express gratitude to the authors, manuscript reviewers, guest editors, and editorial assistants, Sarah Raine and Chloe Waryan, of *Poroi*: Volume 13.
