The Prairie Press: a Thirty-Year Record

L. O. CHEEVER

This fall The University of Iowa Libraries will hold an exhibition of the work of an Iowan, Carroll Coleman, operator of the Prairie Press and one of the nation's outstanding typographers and printers. It is particularly appropriate that the exhibition be held at this time. It was thirty years ago that the Prairie Press was born at Muscatine and only twenty short years ago that Coleman appeared on The University of Iowa campus as director of the newly established Typographic Laboratory and as designer for University publications.

In those thirty years Coleman has achieved distinction and honors for the printed pieces emanating from his press. In his work with the University, many of his students, with their interest heightened by his enthusiasm, have gone to jobs in the typographical and designing fields of the printing medium and several are operating their own private presses now. In addition to his teaching and designing, his counsel was sought by publishers and editors throughout the state in re-designing their magazines and newspapers. He was called on frequently to judge newspaper and other printed communications competitions. In his last five and one-half years with the University he served as University editor and director of publications. Now Coleman is back at the Prairie Press again and his books and brochures are appearing in greater numbers for those interested in beautifully printed and tastefully designed items.

The Prairie Press is probably the first private press ever to operate in Iowa. Such a press is usually a one-man venture with the operator being editor, printer and publisher. To be sure of a sale, private press operators have been prone to reprint the classics or little known pieces by better known authors. Coleman has published original material almost entirely. In this connection, he has said that he hopes to be known as the only private press operator who has not reprinted Elizabeth Barrett Browning's Sonnets from the Portuguese.
In starting the Prairie Press it was Coleman’s intention to confine his publishing to the midwestern area. In Some Notes on the Prairie Press, he wrote:

I had given ear to the preachings of my friend, Grant Wood, the artist, and I was convinced that I could do no better than to follow, in publishing, the regionalism which he advocated in painting. I envisioned writers, artists and printers working together to produce beautiful books which would embody the life and thought of the heart of this great Mississippi valley region. Here on the rolling prairies, on the hills along the rivers, in the endless fields of corn that bend before the summer wind in green waves, in the soft little cities hardening under the growth of industrialism, these writers, artists and printers might record and preserve, for all to see, the form and direction of life here in the Middlewest.

This was written in 1935. In a short time, this regionalism was abandoned. He has accepted manuscripts that meet his rigid requirements regardless of the area in which the author may live.

Coleman’s first years as the operator of a private press were not easy ones. The Prairie Press was launched in the depression years, and the venture was supported by doing commercial printing. This required the larger part of Coleman’s time, but from three to five books were published in most years. From the beginning Coleman has been a stickler for absolute perfection in every item issuing from his press. No artist, painting a picture, could take greater pains than Coleman in making a layout or designing a printed piece. Using hand-set type, he experiments until he has established rapport with the copy. Paper is selected with care and, finally, type and paper are brought together with adequate margins and ink of just the right tone and impression. Even though there is an automatic feeder on the newer press now being used, frequently Coleman will hand feed because of the better control he has over the actual printing process. A good example of how his idea for perfection rules his printing life is shown in the handling of his 1937 Christmas book, printed for presentation to friends of the press. He printed 100 copies of this 20-page brochure and, after it was completed, became dissatisfied with the title page. Except for a few copies the entire edition was destroyed.

John Begg has said, “A love of letters is the beginning of typographical wisdom—letters as literature rather than as physical entities.” This fits Coleman perfectly. He has been a constant reader since the age of four, and to him the content of the books he publishes is always of first importance; the typography is a secondary matter, but a very important one. To him the best book is a fusing of fine writing with a fine type face, used as skillfully as he knows how, and printed and bound so the whole book is an attractive entity which will induce reading.
It is to be hoped that more people will become interested in the work of Carroll Coleman and the Prairie Press through the current exhibition at The University of Iowa Libraries and the checklist of his work included in this issue of *Books at Iowa*. Now is the time for Iowans to recognize one of their own—a master craftsman in the printing field.

[*Asterisk denotes item selected for inclusion in American Institute of Graphic Arts Fifty Books of the Year.]*

*46. DINNER PARTY: Poems by Jessica Nelson North. 5¾ x 8¾; 82 p.; Arrighi, hand-set; black; 550 signed copies on laid paper; cloth.

47. THE WOMANHOOD OF TRINITY EPISCOPAL CHURCH, MUS-
Along an empty road I watched the barns
Crouched on the hillsides while the morning light
Poured in among the trees like mist and fitful.
Dunes to the windows now locked winter tight.
And overhead a birdless waste went streaming
Missed the sharp trees and mirrored with its own.
Our rolling hills but not in the grey country.
Rice, roots like these, low bent and rooted in stone.

The bare and tattered fields have long been empty.
Empty the pasture, too, of all save weather
Sowing his measure of snow, where side by side
Fences and stones and barns sleep together.

After the death of summer the barns inherit
Blossom and leaf and stem: granary and mow.
Shoulder their loads in the darkness of timbers
And pigeons sobbing. Winter is coming now.

And so the rafters arch to loosen the bony
Long fingers of the wind pressed toward the warm.
And yellow pens where little calves lie sleeping
Rescued from their first snow. The heart of the farm
Beats a slow beat and is steady, the pulse awaken.
Strength in the beams indelible, the harness rooves.
Stretch them tight to the walls and a staring window.
Discover the farmer hastening his chores.

Thus shall the heart against a bitter season
Guard countless doors and windows, bring to ban
The fruit and seed of love, the stalks of reason.
The crops of its own raising and gather in.

And stand alone among the vacant meadows
Calmly awaiting the age of winter weather.

When, through the ice, a chill and cloudy heaven
Drops from its mantle of snow the first fine feather.
Frontispiece and title page from a recent Prairie Press publication. Item 139 in the Cheever list.
CATINE, IOWA, 1941-1942. 5½ x 8%; unpaged; Bulmer; black and red; wrapper. Printed for private distribution.

1943
