IOWA GEOLOGICAL SURVEY

VOLUME XXXII

Annual Reports, 1925 and 1926

with

Accompanying Papers

GEORGE F. KAY, Ph.D., State Geologist
JAMES H. LEES, Ph.D., Assistant State Geologist

Published by
THE STATE OF IOWA
Des Moines

## GEOLOGICAL BOARD

- **His Excellency, John Hammill** - Governor of Iowa
- **Hon. J. C. McClune** - Auditor of State
- **Dr. Walter A. Jessup** - President State University
- **Dr. Raymond A. Pearson** - President State College
- **Mr. R. I. Cratty** - President Iowa Academy of Science

## ADMINISTRATIVE OFFICERS

- **George F. Kay** - State Geologist
- **James H. Lees** - Assistant State Geologist
- **Nellie E. Newman** - Secretary

## GEOLOGICAL SECTION

- **George F. Kay** - Pleistocene Geology
- **James H. Lees** - Areal Geology
- **William H. Norton** - Underground Waters
- **B. Shimek** - Areal Geology
- **A. O. Thomas** - Stratigraphic Geology and Paleontology
- **John E. Smith** - Economic Geology
- **A. C. Noe** - Stratigraphic Geology, Des Moines Series
- **Harry S. Ladd** - Stratigraphic Geology, Maquoketa Formation
- **Earl T. Apple** - Pleistocene Geology
- **G. Marshall Kay** - Stratigraphic Geology, Decorah Formation
- **A. C. Tester** - Stratigraphic Geology, Cretaceous System

## TOPOGRAPHIC SECTION

- **E. L. McNair** - Assoc. Geodetic Engineer
- **Herbert W. Elmore** - Assoc. Cartographic Engineer
- **Frank L. Whaley** - Assoc. Topographic Engineer
- **H. E. Simmons** - Asst. Topographic Engineer
- **H. R. Kilmer** - Topographer
- **Arthur Johnson** - Junior Topographic Engineer
- **W. R. Broaddus** - App. Eng. Field Assistant
- **J. D. Whitright** - Rodman
- **Earle Fennell** - Rodman
- **Earl Hammack** - Rodman

## WATER GAGING SECTION

- **J. B. Spiegel** - District Engineer
- **Karl Jetter** - Assistant Engineer
- **S. C. Fuller, Kalona** - Gage Reader
- **B. S. Beehrle, Marshalltown** - Gage Reader
- **John Strothoff, Maquoketa** - Gage Reader
- **Mrs. H. H. Sherburne, Clarksville** - Gage Reader
E. J. Prolow, Garber
John A. Dale, Ames
Mrs. Emma Cameron, Janesville
C. L. Ehrhart, Boone
Calvin K. Smith, Van Meter
D. M. Coleman, Tracy
Floyd A. Nagler, Iowa City
R. L. Coon, Ames
C. W. Warren, Wapello
J. A. Schroeder, Augusta
J. W. Hicks, Coppock
Frank Schreckengast, Keokuk
Mrs. J. B. Williams, Keokuk
CONTENTS

THE ANNUAL REPORTS OF THE DIRECTOR, 1925 AND 1926, GEORGE F. KAY................. 7
MINERAL PRODUCTION IN IOWA IN 1925, JAMES H. LEES........................................ 9
MINERAL PRODUCTION IN IOWA IN 1926, JAMES H. LEES........................................ 35
ROCK RESOURCES OF IOWA, GEORGE F. KAY......................................................... 51
IOWA COAL AREAS AND CHARACTERISTICS OF IOWA COAL, JAMES H. LEES................... 65
THE USE OF IOWA COAL FOR STEAM PRODUCTION, T. A. MARSH................................. 82
POSSIBLE RESEARCHES IN IOWA COAL, B. P. FLEMING........................................ 91
GEOLGY OF LUCAS COUNTY, ALVIN L. LUON...................................................... 101
GEOLGY OF CRAWFORD COUNTY, JAMES H. LEES.................................................. 233
ALTITUDES IN IOWA, JAMES H. LEES............................................................... 363

LIST OF ILLUSTRATIONS

PLATE
I. Generalized sections of coal prospect holes..................................................... 136
   II. General columnar section of Lucas county strata........................................ 142

FIGURE
1. General geological section for Iowa............................................................... 52
2. Geological map of Iowa.................................................................................... 53
3. Iowa mineral production, 1920 to 1925...................................................... 55
4. Relative values of Iowa minerals, 1925....................................................... 56
5. Values of coal produced, 1920 to 1925....................................................... 57
6. Tons and values of coal produced, 1920 to 1925.......................................... 57
7. Map showing counties producing coal......................................................... 58
8. Values of cement produced, 1920 to 1925................................................... 59
9. Values of gypsum produced, 1920 to 1925.................................................. 60
10. Chart showing values of clay products, 1920 to 1925.................................... 61
11. Sand and gravel production, 1920 to 1925................................................ 62
12. Stone and lime produced, 1920 to 1925..................................................... 63
13. Map showing chances for oil in Iowa............................................................ 64
14. Location of Lucas county in Iowa.................................................................. 106
15. Profile through the Norwood upland............................................................. 109
16. The Norwood upland....................................................................................... 110
17. Profile across Pleasant township..................................................................... 111
18. Drainage map of Lucas county....................................................................... 114
19. Gradient profile of Chariton river................................................................. 115
20. Cross section profile of Chariton river valley.............................................. 115
21. Gradient profile of White Breast creek........................................................ 116
22. Gradient profile of Barker creek.................................................................... 117
23. Cross section profile of White Breast creek................................................ 117
24. Coal Measures and fluvio-glacial deposits exposed on White Breast creek...... 118
25. Cross section profile of Little White Breast creek......................................... 119
26. White Breast creek in flood........................................................................... 122
27. White Breast creek in time of low water...................................................... 233
28. An exposure of Cherokee beds in Pleasant township..................................... 144
29. Strata of part of exposure north of Wheeler’s bridge..................................... 160
30. Typical Coal Measures exposure in Swede Hollow....................................... 161
31. Sandstone in Swede Hollow........................................................................... 162
32. Contact of Cherokee and Henrietta formations in section 5, White Breast...... 163
township.................................................................................................................. 164
33. Disintegrating granite bolder in transition zone between till and gumm........................................................................................................... 170
