Fight in Florida, MO.
Notched and un-notched arrow and spear heads of superior workmanship and design are in the Lamb collection, and of pottery he has besides a large number of rim shards a small pot with four necks on which a conventional bird design and lines have been drawn with light blue pigment, blue dots forming a background. The ware is a rich orange and is unfamiliar to the writer who has not found similar material or design in the Missouri valley. The pot, which is of the size of a small teacup, has no counterpart in any collection I have seen, and it reminds one of the pottery of the pueblo region of the southwest. It was found near Mr. Lamb's home, on the surface, several years ago.
